Burner design for solid propellants burning properties dynamic testing, using broadband tuned Helmholtz resonator for instability onset delay 04 p0509 A72-15497

Solid propellant flame spectral and temporal details during unstable and stable combustion, using middle infrared spectrometer [AIAA PAPER 72-32] 05 p0703 A72-16896

Wall thermal radiation influence on solid propellants burning rate in electrically heated tube furnace, noting correlation with laminar flame theory [AIAA PAPER 72-35] 05 p0703 A72-16938

Solid propellant reaction kinetics at gaseous fuel and catalyst-containing ammonium perchlorate interface, studying ignition and deflagration 07 p1051 A72-19367

Quench combustion studies with two dimensional propellant sandwiches with ammonium perchlorate oxidizer and various binders, using high pressure combustion vessel for deflagration characteristics determination 07 p1051 A72-19727

Barium styphnate replacement for discontinued SR-4990 smokeless powder as propellant base charge in MK 24 actuator 08 p1222 A72-20784

Automated mechanical system for solid propellant sheet stretch tests in two directions as function of time 08 p1147 A72-21331

Small perturbation stability of discontinuous solution of equations of motion for solid fuel combustion processes 08 p1253 A72-21463

Solid propellant gas generators, discussing propellant processing, grain, ignition, insulation and restrictions 09 p1263 A72-23600

Parallel rail solid fuel pulsed electric microthruster performance, noting mathematical model for mass ablation and plasma acceleration mechanism [AIAA PAPER 72-458] 11 p1708 A72-26194

Solid propellants oscillatory burning with gas phase time lag, solving nonsteady governing differential equations by numerical integration 13 p0205 A72-29301

Metallized solid propellants burning rate augmentation by internal ballistics effect of spinning rocket motor, deriving relationship between burning rate, pressure level and acceleration 13 p0205 A72-29302

Solid propellants burning rate dynamic response to rapid pressure changes, discussing equations applicability to combustion extinction prediction as function of pressure decay rate 13 p0205 A72-29304

Effective stabilizer content measurement in smokeless powder propellants, discussing nitrogen dioxide generation by cellulose nitrate and glycerin trinitrate decomposition 14 p2144 A72-30755

Double base solid propellants life determination from accelerated aging tests at elevated temperatures, discussing surface properties effect on weight loss and autocatalytic decomposition 14 p2144 A72-30757

Carboxy-terminated polybutadiene/ammonium perchlorate base solid propellants aging properties under long time storage conditions at 243-353 K, considering mechanical, dimensional and combustion properties 14 p2145 A72-30763

Insulation and bonding materials effects on double base solid propellants stability, using vacuum reactivity testing technique 14 p2145 A72-30766

The effects of various cure cycles upon the viability of *Bacillus subtilis* var. *niger* spores within solid propellant. 18 p2652 A72-36437

Qualitative determination of organometallic substances in solid propellants by thin layer chromatography 23 p3262 A72-43598

Fracture mechanics and cumulative damage of simulated solid propellant under dynamic loads, obtaining low cycle fatigue curve 23 p3325 A72-43706

The transient processes in hybrid solid propellant combustion chamber throttled by supersonic nozzle. 24 p3434 A72-45198

SOLID ROCKET PROPELLANTS

NT DOUBLE BASE ROCKET PROPELLANTS

NT METAL PROPELLANTS

Fracture analysis of two dimensional thermal loaded solid propellant rocket grain models under cooldown [SESA PAPER 1927A] 02 p0270 A72-11513

Na and K trace amounts detection in Al based solid rocket propellants by neutron activation analysis, using gamma ray spectroscopy for nondestructive analysis 02 p0270 A72-11959

Combustion of composite solid propellants with ammonium perchlorate base and pyrolyzable binder, investigating perchlorate grain size, binder concentration and catalyst effects 06 p0867 A72-17574

Solid charge design for hybrid rocket engine with constant liquid propellant component consumption, deriving differential equation for perforated grain burning rate 07 p1053 A72-18994

Particle mass spatial distribution effect on particulate damping of combustion acoustic vibrations in solid rocket combustors 08 p1224 A72-21617

German monograph on flight performance optimization of solid propellant rockets covering thrust values, burning time, rocket design and orbits within earth atmosphere 10 p1550 A72-23770

Solid teflon pulsed plasma thruster quasi-steady and short pulse discharge operations, discussing propulsion system performance and erosion behavior [AIAA PAPER 72-459] 11 p1709 A72-26195

Combustion surface acoustic admittance model of blended solid propellant with allowance for foam zone inertia and solid/gas interface reactions 12 p1889 A72-27980

Solid rocket propellant combustion instability research, discussing data acquisition and reduction, motor instrumentation, motors and burning rate measurements 13 p0204 A72-28929

Solid rocket propellants storage life analysis and prediction by mathematical modeling of physical-chemical failure generating processes 14 p2145 A72-30762

Case bonded solid rocket propellants mechanical strength characteristics determination by photoelastic stress measurements or viscoelastic calculation 14 p2145 A72-30765

High efficiency hybrid rocket motor based on polyester fuel and RFNA oxidizer, determining correlation between burning rate, oxidizer and total flow rates 15 p2297 A72-31207

German book - Solid-propellant rocket engines I: Introduction and fundamentals 17 p2597 A72-35453

Investigation of the resonant combustion of a rocket charge with longitudinal slots 18 p2720 A72-36241

Solid rocket propellant erosion burning in turbulent gas flow, discussing burning velocity dependence on Pobedonostsev criterion 19 p2878 A72-37351

Nonlinear equations solutions for interior ballistics parameters of solid rocket propellants combustion during rocket engine nozzle opening 19 p2878 A72-37352

Erosion combustion effect on unsteady solid rocket propellant burning stability during engine nozzle opening, noting combustion velocity and surface temperature 19 p2879 A72-37353

Development of a solid fuel on a polyurethane basis for a hybrid rocket propulsion system with 98% nitric acid as oxidizer 20 p2962 A72-39416

Burn-up rate of a solid-propellant slab in contact with a solid-oxidizer layer 22 p3245 A72-43180

A nonacoustic wave instability of processes in a solid-fuel engine 22 p3217 A72-43182

SOLID ROTATION

U ROTATING BODIES

SOLID SOLUTIONS

Carbon atoms thermodynamic properties in bcc and fcc Fe-Si-C solid solutions from equilibrium measurements with hydrogen-methane gas mixtures as function of temperature and carburizing gas composition 01 p0083 A72-10207

Coarse grained dispersion strengthened Al alloys, investigating solute solutions effects on steady state creep behavior 01 p0087 A72-11025

Matrix hardening in dispersion strengthened powder products, discussing dispersion, grain boundary and solid solution hardening 02 p0241 A72-11457

Atomic structural mechanism of solid solution decomposition by nucleation and equilibrium phase particles in Fe-Co-Ti alloy, using X ray analysis and transmission microscopy 02 p0242 A72-12008

Niobium anomalous oxidation below 600 C, noting suboxide formation between solid solutions and heat resistance reduction 02 p0243 A72-12214

Titanium and aluminum variations effects on eta and gamma prime solvus temperatures and on mechanical properties of iron-nickel superalloy 02 p0245 A72-12508

Fan shaped precipitate formation during supersaturated Al-Zr solid solution decomposition, discussing interpretation as grain boundary migration 02 p0247 A72-12820

Niobium-oxygen-nitrogen system solid solution, noting gas composition effects on hardness and electrical resistivity 03 p0369 A72-12958

Nb-Mo-N solid solution nitrogen solubility equilibrium at various temperatures and pressures 03 p0370 A72-12962

Ta and Nb addition effects on W solid solution strengthening, determining W-Nb-Ta alloys phase diagram and melting point 03 p0375 A72-13943

Y-Mn-Al ternary alloy solid solution phase diagram isothermal section construction from X ray structural data 03 p0376 A72-13945

Fibrous structure of precipitates produced at bottom of trace due to friction in work hardened Al-Cu alloy solid solution

03 p0376 A72-13970

Yield stress of solid solution iron and Fe-Ge alloys with bcc structure, obtaining interaction energy between solute atoms and screw dislocation

03 p0402 A72-13974

Fine structure of Mo-Re alloys single crystals in solid solution region as function of Re content

03 p0377 A72-14019

Temperature dependence of X ray interference lines for Al-V alloy obtained at high cooling rate, noting metastable solid solution thermal stability

03 p0377 A72-14022

Ni-C solid solution, determining room temperature neutron irradiation effects on C distribution during decomposition

03 p0378 A72-14251

Statistical mechanical calculation of thermodynamic properties of interstitial solid solutions involving second nearest neighbor solute atom mutual interactions based on Kirkwood expansions

03 p0459 A72-14252

Supersaturated semiconductor solid solutions decay kinetic equations and time constants, noting free current carriers effect

04 p0561 A72-15081

Ni-Mo-N system alpha-solid solution thermodynamic analysis, deriving reaction enthalpies/entropies, free energy and interaction coefficients

05 p0676 A72-16795

Alloying elements effects upon iron mechanical properties, investigating lattice parameters, temperature dependence of yielding and plastic flow, solid solution strengthening and softening, etc

05 p0676 A72-17101

Electron transmission microscope study of quenched Mo-N alloys supersaturated solid solution low temperature aging behavior, investigating recovery processes

06 p0830 A72-18056

Short range order and X ray diffused scattering in Ti-WC solid solution, using least squares method

06 p0834 A72-18741

Solid solution yield strengthening and weakening of V-Ti alloys, investigating strain rate sensitivity temperature dependence as indication of two deformation mechanisms

07 p1021 A72-20434

Bcc solid solutions formation in Cr-W binary alloys, investigating interface reaction and two phase grain boundary diffusion by X ray diffraction and microscopy

08 p1185 A72-21246

Precipitation effect on microstructure, coercive force, resistivity and cell formation changes in heterogeneous decomposition of supersaturated solid solutions and aging alloys

08 p1218 A72-21777

Nonstoichiometric solid solutions based on ZrC and NbC, investigating microhardness variation due to differing valences of atoms in metal sublattices

08 p1188 A72-22100

Cast Nb alloys plasticity enhancement by heat treatment, discussing solid solution decay kinetics and carbides composition of Nb-Mo-Zr-C system

09 p1327 A72-22229

Opaque mineralogy of Luna 16 soil sample, emphasizing compositional variations of Fe-Ti-Cr-Al-Mg spinels

09 p1380 A72-22261

Transition metal superconductors transition temperatures survey, considering d-band solid solution alloys and intermetallics and ferromagnetic element compounds

09 p1367 A72-22552

X ray K absorption edges in binary solid solutions of Co, Fe and Ni with localized hole increases

09 p1371 A72-22846

Al alloys solid binary solution soft X ray emission spectra interpretation by rigid band and virtual bound state models

09 p1371 A72-22847

Environment and grain size effect on steady state creep and creep rupture properties of Ni-W solid solution

09 p1331 A72-23381

Mo-Zr solid solutions internal bonding, discussing diffusion controlled process and hardness dependence on Zr

10 p1494 A72-23833

Differential sputtering yield of Ni-Cu alloy solid solution bombarded by Ar ions

10 p1495 A72-24057

Lattice source interference method for detection of X ray diffraction in Al-Zn solid solutions, taking into account precipitation effects

10 p1499 A72-24981

Polarization characteristics of ferroelectric barium strontium titanates in solid solution at 4-100 K

10 p1527 A72-24984

Temperature dependence of Ni and Ni alloys and solid solutions microhardness, noting strengthening effect of Ti, Cr, Al and B additions

11 p1654 A72-25491

Solid solutions of stabilized Zr in cubic form prepared from zirconium and yttrium oxide mixture by ammonia precipitation and heat treatment

11 p1660 A72-26486

Fe-Mo solid solutions transient creep behavior as function of applied stress, noting temperature effect

11 p1662 A72-26656

Carbon solubility in Nb at 1500-2150 C, determining saturation concentrations from electrical resistivity vs reaction time curves

11 p1662 A72-26740

Thermodynamic description of metal rich side of Nb-Mo-N solid solution, determining equilibrium nitrogen solubility as function of pressure and temperature

11 p1664 A72-26842

Critical resolved shear stress and solute atom concentrations relationship in solid solution hardening of metal crystals

12 p1853 A72-27101

Electron microprobe analysis of solute segregation near grain boundaries in Al-Zn-Mg alloy after quenching and aging heat treatment

13 p1973 A72-28652

High temperature steady state tensile creep behavior of Ni-W solid solutions, showing creep rate relation to stress and stacking fault energy

13 p1975 A72-28668

Al-Zn alloy supersaturated solid solution decomposition during aging, studying single crystal lattice characteristics via X ray diffusive scattering techniques

13 p1976 A72-28902

Tin lead telluride rock salt structure solid solutions phase stability at 356-500 C, using room temperature lattice parameter measurements

13 p1913 A72-29750

Zirconium oxycarbide formation, solubility and one phase properties by X ray diffraction, chemical and metallographic analyses

13 p1982 A72-30107

Mechanical strength of interstitial solid tantalum-oxygen solutions obtained by electron beam fusion, thermal cycling and saturation as function of temperature and oxygen contents

14 p2112 A72-30163

Tungsten and carbon combined solubility in solid niobium at 2000, 1700 and 1100 C

14 p2113 A72-30165

Room temperature negative photoconductivity of p-type ZnTe-CdTe solid solutions mixed crystals within model with electron and hole capture levels

14 p2141 A72-30173

Hydrogen gas solubility measurement in solid Mo at atmospheric pressure and 905-1521 C, noting quasi-regular linearity of Arrhenius plot

14 p2113 A72-30246

U-Zr-Nb and U-Nb-Mo alloys gamma solid solution phase isothermal transformation kinetics at 500-600 C from dilatometric, microstructural and X ray analyses, noting decomposition

14 p2114 A72-30403

Mutual solid solubilities of rare earth metals with Zr extended by splat quenching, noting metastable low temperature allotropic forms of solid solutions

14 p2119 A72-30609

Alpha solid solution of nitrogen in Nb-Mo alloys, obtaining excess partial quantities and activity and interaction coefficients at high temperatures

14 p2121 A72-30773

Decomposition mechanism of Cn, Ag and Au solid solutions in InAs single crystals, using isotopic radiography

14 p2143 A72-30961

Nb-Ti-Zr-Hf system phase diagram from X ray analysis, observing beta solid solution below solid curve

14 p2122 A72-30977

Phase composition of Nb-O-Hf and Nb-O-Zr ternary alloys, noting O solubility decrease

14 p2122 A72-30980

Mo-W-C system high temperature phase equilibria from X ray and microstructural analysis, noting decrease of C solid solubility with temperature

14 p2123 A72-30984

Binary systems phase diagrams qualitative and quantitative analysis based on free atoms electron state energy ratios, formulating solid solubility criterion

14 p2123 A72-30994

Russian papers on light and nonferrous alloys structure and properties covering phase diagrams, alloying effects, reduction, crystallization and recrystallization, solid solutions decomposition, etc

14 p2123 A72-31027

Phase equilibrium of Mg base solid solutions of Mg-Li-Sn system at 200-500 C, analyzing microstructure, microhardness and electrical resistivity

14 p2124 A72-31029

Mn, Zr and Cr alloying effects on grain size and solid solution decomposition of cast Al-Zn-Mg alloy bars

14 p2125 A72-31039

Surface energy effect on alloy structure formation, analyzing crystal growth and formation from supersaturated solutions

15 p2253 A72-31221

Russian papers on alloying and properties of heat resistant alloys covering creep, solid solution and dispersion hardening, chemical interactions and protective coatings

15 p2254 A72-31557

Chemical interaction within crystals for generation of stacking fault vacancies and phenomena associated with solid solution microheterogeneity dislocations discussing heat resistance

15 p2254 A72-31558

Structural decomposition and hardening of supersaturated Al-Cu, Al-Cu-Ag, Al-Zn, Cu-Sn and Cu-Ni-Co solid solutions

15 p2255 A72-31565

Concentration dependence of interdiffusion coefficient in binary metallic systems with continuous and bounded solid solutions

15 p2243 A72-31572

Solution kinetics of secondary phases in cast dendritic and nondendritic Mg-Zn and Mg-Zn-Zr alloys, using cylindrical and spherical diffusion models

15 p2257 A72-32119

Ti-Mo binary solid solution, investigating superconducting transition temperature, lattice instability and electron-to-atom ratio by calorimetric measurements

15 p2295 A72-32544

Heat capacity data analysis for solid solutions of superconducting Nb-Ti system, investigating electronic structure

15 p2296 A72-32692

Co-Cr-C system carbon activity and solubility at 950-1200 C, deriving equation for temperature dependence and solid solution-carbide precipitation zone boundaries

16 p2407 A72-33441

Al-Mg solid solution creep at 570-800 K, discussing creep rate controlling mechanism due to Mg atoms interactions with dislocations

16 p2407 A72-33442

Strain rate and temperature effects on supersaturated Al-Cu-Mg solid solution mechanical properties considering ultimate tensile strength and hardening

16 p2407 A72-33443

Grain-size dependence of Snoek peaks in niobium

17 p2566 A72-34678

High temperature solid-solubility limit and phase studies in the system tantalum-oxygen

17 p2567 A72-34733

High-temperature resistant cobalt alloys

17 p2567 A72-35171

Thermodynamics and phase relations in refractory metal solid solutions containing carbon, nitrogen, and oxygen

18 p2699 A72-36576

Phase structure and solution kinetics of cast and wrought Al alloys after plastic deformation by rolling

18 p2700 A72-36583

Diffusion in the nickel-rich, Ni-Al solid solution at 1260 C

18 p2701 A72-36593

Thermodynamic description of the metal-rich part of the system niobium-molybdenum-nitrogen

18 p2701 A72-36597

Solid-state phase transformations

19 p2815 A72-37442

Characteristics of temperature dependences for the thermal conductivity coefficients of niobium-zirconium solid solutions

19 p2817 A72-37739

Electrical and thermoelectrical effects in GaAs-InAs solid solutions

19 p2844 A72-37752

Phase diagrams of AlSb-GaSb and InAs-GaAs systems, noting mixing energy for liquid and solid phases

19 p2845 A72-38207

Interaction of titanium diboride with titanium disilicide and silicon at high temperatures

19 p2819 A72-38284

Formation of fluorine-containing solid solutions based on barium titanate

19 p2845 A72-38407

X-ray analysis of iron-chrome solid solutions

19 p2821 A72-38572

Activity-composition relations in the fayalites-forsterite solid solution between 900 and 1300 C at low pressures

20 p2915 A72-39178

Decomposition, solubility and coherent phase stability of modulated structure Co-Ni-Ti system at high nucleation temperatures

20 p2939 A72-39312

Investigation of solid solution decay in cobalt-titanium, iron-cobalt-titanium-aluminum and iron-nickel-titanium-aluminum alloys

20 p2939 A72-39314

Interdiffusion in nickel-molybdenum and palladium-molybdenum systems 20 p2939 A72-39315

The effect of Si, Zr, Al and Mo on the structure and strength of Ti martensite. 20 p2941 A72-39792

Effect of alloying on the decay of an aluminum-magnesium solid solution 20 p2942 A72-39823

Mutual interdiffusions of thorium, lanthanides, and bismuth in Th-Ln-Bi solutions - Evidence for the formation of ThLnBi₃ compounds. 20 p2942 A72-39986

Precipitation thermodynamics of unstable and metastable solid solutions, discussing interfaces, vacancies, spinodal decomposition, nucleation, reversion and macroscopic diffusion 20 p2943 A72-40000

Beta to omega phase transformation and structure in Zr and Ti alloys bcc solid solutions by dark field electron microscopy, diffraction and ultrasonic technique. 21 p3065 A72-40092

Conditions and mechanism of formation of suboxide phases in the niobium-oxygen system 21 p3066 A72-40381

The nature of solid solutions of the titanium-vanadium-oxygen and titanium-vanadium-aluminum-oxygen systems 21 p3068 A72-40962

Mechanism of high temperature creep of aluminum-magnesium solid solution alloys. 21 p3069 A72-41299

Physical properties and electronic structure of V_{1-x}Cr_x/SSi ternary alloys 22 p3192 A72-43014

Compound tellurides and their alloys for Peltier cooling - A review. 22 p3215 A72-43088

Contact interaction between high-melting compounds and liquid metals. I - Interaction between subgroup IVA metals and metals of the iron family 23 p3299 A72-43287

X ray, microstructural and differential thermal analysis for binary Zr alloys, noting formation of ternary phases and solid solutions 23 p3300 A72-43588

Physicochemical problems in silicon and germanium heat treatment, covering solubility and solid solutions stability and saturation variation with temperature 23 p3324 A72-43687

Investigation of the influence of the gas medium on the phase composition and certain properties of refractory materials containing zirconium 23 p3306 A72-43690

Contribution to the study of some HfO₂-MO systems 23 p3302 A72-43999

Solid solution, subsolidus reduction and compositional characteristics of spinels in some Apollo 15 basalts. 23 p3262 A72-44135

Relationship between the electrical resistivity and solute concentration in the solid solution of tantalum-hydrogen system. 24 p3412 A72-44718

Influence of boron on the structure and properties of electron-beam melted molybdenum 24 p3414 A72-45380

Co-V solid solution decomposition by equilibrium phase precipitation at aging temperatures, using electron microscopic and X ray analysis 24 p3414 A72-45382

Physicomechanical properties of titanium-tungsten solid alloys with deficiency of carbon in the carbide solid solution lattice 24 p3415 A72-45385

SOLID STATE

Normal, highly conducting and ion-exchanging solid electrolytes structure and conductivity, with particular attention to rechargeable silver halide batteries 16 p2352 A72-33899

Optical constants of cesium in the wavelength range from 0.3 to 2.5 microns and their dependence on temperature and state of matter 24 p3426 A72-44800

Phased array antennas design and performance characteristics, examining feeding and electronic scanning problems with special attention to all-solid-state designs 01 p0038 A72-10659

Low noise phase locked power microwave sources for solid state radio links with 960 voice channels, discussing design 01 p0006 A72-10712

Shf electromagnetic radiation interaction with solid body plasma, explaining wave propagation in solid state plasma waveguides 02 p0170 A72-11561

Book on microwave electronics covering electron beam microwave devices and solid state microwave oscillators and amplifiers 03 p0331 A72-13233

Narrow band medium power X, Ku and C band solid state amplifiers, demonstrating TWT replacement with GaAs and avalanche diodes 03 p0334 A72-14072

Solid state tunnel diode amplifier-rectifier expander for microwave pulse regenerators 03 p0335 A72-14184

Hf solid state and quantum electronic devices - Conference, Cornell University, August 1971 06 p0787 A72-18453

Transferred electron effect in GaAs, presenting three level solid state microwave oscillator advantages 06 p0866 A72-18454

System potential of microwave solid state generation and amplification, comparing IMPATT, TRAPATT, Gunn, LSA, transistor and transistor-multiplier devices 06 p0787 A72-18456

Pulsed and CW solid state microwave oscillator EM noise as function of power level and locking parameters 06 p0788 A72-18465

Solid state Ku-band local Gunn oscillator for airborne radar applications, discussing design and batch process fabrication 06 p0789 A72-18480

Solid state microwave power amplifier with unidirectional transmission line loaded by negative resistance diode series, calculating large signal characteristics 08 p1142 A72-21558

Solid state microwave devices, discussing varactor, varistor, tunnel, Gunn, IMPATT and TRAPATT diodes and power transistors characteristics and applications 09 p1285 A72-22567

Inexpensive solid state microwave sources development and applications considering spectrum allocations, health hazards and reliability problems 09 p1285 A72-22595

HF thermal noise in single and double injection space charge limited solid state diodes 09 p1288 A72-23124

Solid state sinusoidal signal generator based on current density oscillation effect in high resistivity p-type InSb with transmutation doping 09 p1288 A72-23191

Magnetic integrated circuits design and fabrication problems involving branched and logic circuits and solid state structures controlled domains 10 p1448 A72-24279

Power-combining methods for synchronous detuned solid state microwave oscillators with stable large signal locking characteristics, noting feasibility 10 p1449 A72-24306

Solid state RC network for single sideband frequency converter using phase difference carrier suppression 11 p1598 A72-26731

VOR and Doppler VOR ground station equipment based on reliable solid state radio transmitters and signal generating devices for aircraft navigation 12 p1779 A72-27104

Solid state array camera based on diffused junction phototransistors, discussing sensor technology and fabrication 12 p1810 A72-27931

Solid state InP sources for microwave transferred electron oscillators and amplifiers with improved conversion efficiencies, comparing with GaAs 13 p2020 A72-28432

OMEGA receiver with digital solid state circuits for remote unmanned platform positioning, discussing ship to shore tests and design features 13 p1925 A72-29184

Solid state ac square law function generator based on fixed elements and operating on electrical servo system principle 13 p1933 A72-29973

Solid state dc power controller design functional requirements, considering system overcurrent protection, power control by low voltage signals, power output to load status, etc 15 p2182 A72-31219

Carrier wave propagation at semiconductor surface with electron drift, discussing solid state traveling wave amplifier design 15 p2290 A72-31288

Solid state modular ground based distance measuring equipment /DME/ receiver for en route aircraft navigation and landing 16 p2420 A72-33521

High-frequency ultrasonic devices. 17 p2526 A72-34564

Image pickup and display devices. 17 p2552 A72-34568

Characterization of a bilateral DC converter as a DC transformer. 17 p2497 A72-34705

Modular I-band solid-state microwave amplifier. 17 p2528 A72-34711

Solid state phased arrays for ECM applications. 17 p2531 A72-35569

Airborne waveguide element reliable advanced solid state radar /RASSR/ phased array radiation patterns and design 17 p2531 A72-35571

Thermal noise in double injection diodes operating in the insulator regime. 18 p2667 A72-36979

An all solid-state MIC transmit-receive module. 19 p2771 A72-37268

Radio astronomical observations in the 0.9 to 1.5 mm band using a 22-m radio telescope with an n-InSb receiver 19 p2858 A72-37803

Fast response solid state phase lock refractometer for airborne measurement of atmospheric refractive index 19 p2802 A72-38225

Book - Solid state electronic devices. 20 p2907 A72-39024

Measurements of electron detection efficiencies in solid state detectors. 20 p2925 A72-39401

Conference on Solid State Devices, 3rd, Tokyo, Japan, September 1, 2, 1971, Proceedings. 20 p2960 A72-39701

Reliable advanced solid state radar /RASSR/ array design featuring transmit-receive elements arranged in triangular grid and built-in test equipment 20 p2904 A72-39732

Disk and toroidal solid state computer storage cell arrays without boundary cells, comparing read- and write-time characteristics with conventional organizations 20 p2910 A72-39966

Raman scattering techniques applied to problems in solid state physics. 21 p3096 A72-40602

A solid-state 'flux-drive' control circuit for latching-ferrite-phaser applications. 23 p3275 A72-43574

Solid state microwave devices, discussing varactor, varistor, tunnel, Gunn, IMPATT, and TRAPATT diodes and power transistors characteristics and applications 24 p3384 A72-44746

SOLID STATE LASERS

NT RUBY LASERS

Axial mode locking and equidistant frequency generation in solid state lasers due to active medium saturation, using self consistent equations with broadened amplification line 01 p0079 A72-10347

Solid state laser emission angular divergence, considering active medium optical inhomogeneity and cavity parameters effects 01 p0081 A72-10976

Active and passive parameters correlations of solid state laser ruby crystals and Nd glass, using mechanical, thermal, chemical, optical, spectroscopic and electrical measurements 01 p0081 A72-11183

Solid state Q switched laser emission frequency drift from Fabry-Perot rings interferograms 02 p0237 A72-12108

High resolution atmospheric transmission measurement of wavelength dependence of absorption losses in carbon dioxide of solid state Er laser radiation 02 p0238 A72-12201

Mode locked oscillation in ring cavity Nd glass laser, showing satellite pulse and spectral broadening due to self phase modulation 02 p0238 A72-12203

Picosecond pulse production and measurement from mode locked Nd glass laser 02 p0238 A72-12492

Neodymium laser plasma dispersion and diffusion in magnetic field, using electrostatic injection of LiH particles 03 p0393 A72-13081

Ruby and Nd lasers fundamental emission effects on excitation of stimulated Raman scattering in liquid and crystalline media by second harmonics 03 p0366 A72-13364

Single mode solid state laser periodic Q switching effects on spike pulse shape and synchronization by harmonic analysis with convergent series

03 p0366 A72-13371

Internal Q switching in CdS laser activated by exciton recombination, observing lag in emission onset after input pulses delivery

04 p0528 A72-14575

Pulsed Nd laser beam polarization components energy measurement by double reflecting plate calorimeter, checking accuracy against NBS liquid cell calorimeter

04 p0531 A72-15479

Spectral heterogeneous lasing media with asymmetric luminescence bands, considering neodymium phosphate and germanate glass

06 p0824 A72-17392

Pinched vortex tube high current arc discharges for continuous pumping of ion crystal YAG-Nd lasers

06 p0825 A72-17839

Single pulse Nd laser with KDP cascade multipliers and tunable frequency converter using organic dye solution

06 p0825 A72-17841

Temporal characteristics of emission line broadening in lasers with dispersive resonators for Nd ion activated phosphate glasses and disordered crystals

06 p0826 A72-18011

Laser beam welding by solid state pulsed lasers, discussing heat conduction relation to power density utilization

06 p0822 A72-18254

Continuously pumped repetitively Q switched Nd-yttrium-aluminum trioxide laser, discussing mode selection technique based on gain excess over hold-off loss

07 p1000 A72-19045

High power UV light pulse generation using Nd-YAG laser with frequency doubling

07 p1002 A72-19202

Ho doped YLF and YAG laser threshold and slope characteristics at room temperature, considering Q-switched operation lifetime

07 p1004 A72-19233

Lamp pumped IR solid state laser obtaining 20 W output and 4 percent efficiency from transition of Ho ion in sensitized YAG

07 p1004 A72-19234

Continuous TEM power from single longitudinal mode Nd-YAG laser pumped with tungsten-iodine lamp

07 p1004 A72-19235

Thermal distortion insensitive TEM mode beam of hf YAG laser for high precision drilling machine

07 p1004 A72-19236

Wideband laser communication for space applications, comparing carbon dioxide and Nd-YAG systems on basis of SNR

07 p0941 A72-19239

Neodymium-glass laser emission spectral and temporal correlations during Q switching by rotating prisms and passive shutter

07 p1006 A72-19633

Laser applications in industrial machining and welding, describing theory and operation of optically pumped ruby, glass-Nd, YAG-Nd, Ar and carbon dioxide lasers

07 p1007 A72-20224

High speed rotating mirror camera adapted to solid state laser radiation, noting continuous recording and simultaneous imaging

07 p0990 A72-20401

Laser triggered spark gaps characteristics initiated by switched out picosecond pulse from mode locked Nd-glass laser, investigating breakdown formation time delay

07 p1008 A72-20547

Continuous laser action in Nd-yttrium aluminum oxide rod, determining terminal state loss coefficient in stimulated emission

08 p1217 A72-21322

Nd-glass laser time characteristics and radiation ordering from cavity lengthening

08 p1183 A72-21771

Nd smooth pulsed laser action with narrow spectral line and emission amplification from Nd doped phosphate and silicate glass rods

08 p1183 A72-22027

German monograph on luminous intensity amplification by means of solid state lasers covering experiments with GaAs and ruby lasers and traveling wave amplifiers

09 p1322 A72-22331

Gas, solid state and semiconductor lasers review, discussing applications

09 p1322 A72-22594

Stimulated emission and spectroscopic properties of activated ferroelectric crystal laser, noting Stark effect

09 p1323 A72-22981

CW Kr arc lamps for high power Nd-YAG laser pumping, testing operating life and electrical and spectral characteristics as function of design

09 p1324 A72-23080

Single picosecond light pulses from mode locked Nd-glass laser, discussing temporal structure, spectral energy distribution and pulse shape measurements

09 p1324 A72-23082

FM mode locked Nd-YAG pulsed laser controlled bistable phase position operation, using modulator cut as Brewster angle prism

09 p1325 A72-23089

Electro-optical Q switching of solid state laser sources without linear energy polarization in optical resonator

09 p1326 A72-23422

High power Nd-glass laser systems, discussing oscillator and amplifier operating parameters optimization

10 p1489 A72-23945

Near field characteristics of solid state laser frequency converters emission, determining medium transluence during single pulse excitation of organic phosphors

10 p1490 A72-24052

Solid state laser with slow relaxation bleachable filter, calculating modes self synchronization probability statistics relationship to relaxation time

10 p1492 A72-24512

IR radiation generation by Raman scattering and difference frequency mixing with Q switched Nd-YAG laser, noting peak power and photon conversion efficiency

11 p1647 A72-26149

Vortex discharge in Ar as optical pumping source for ionic crystal CW lasers, comparing efficiency with YAG-Nd crystal pumping

11 p1648 A72-26331

Pumping conditions relationship to tube filling in Nd-YAG pulsed laser

11 p1649 A72-26344

Multilayer dielectric reflective coatings performance in solid state laser pumping systems

11 p1649 A72-26345

Populations modulation and spatial harmonics influence on gas and solid state laser radiation characteristics, discussing uniform and nonuniform line broadening

11 p1650 A72-26353

Polyhedral radiation energy guides for laser sources and amplifiers, presenting solid state resonator design computation methods

11 p1650 A72-26354

Multichannel monopulse Nd glass laser design characteristics, describing input generator, preamplifier and amplifier channel beam distribution

11 p1651 A72-26363

Angular spectra and frequency characteristics of quasi-continuous monomode and two mode Nd-YAG lasers with spherical resonator

12 p1819 A72-27054

High power Nd glass laser with stepwise pulse amplification for intensive heating of solid target plasmas

12 p1849 A72-27061

High power light pulse generation with steep leading edges in Nd-glass laser, noting duration change based on transparency increase under light transmission

12 p1820 A72-27583

Second, third and fourth optical harmonics generation of Nd-doped YAG laser radiation under Q switching fast repetition pulse conditions

12 p1821 A72-27594

Solid state laser resonator inhomogeneous dielectric and mirror elements matching effects on Q factor and output power

12 p1822 A72-27609

Temperature gradient and thermoelastic stresses in Nd-YAG laser active elements under continuous pumping conditions, noting refractivity radial distribution

12 p1822 A72-27614

Nd-glass amplifier gain saturation by 1.06 micron light pulses determined by two laser states lifetimes and degeneracies and thermalization rates

12 p1792 A72-27752

Nd laser second harmonic generation by organic crystalline powders, noting suitability of benzophenone, xanthone, benzimidazole and resorcin

12 p1823 A72-27854

Active elements for high power Nd-glass laser facility to generate short and ultrashort pulses

12 p1825 A72-27881

Nd-fiberglass laser intensity fluctuations due to fibers absorption centers, deriving population inversion threshold, pumping power and center formation rate from kinetic equations

12 p1825 A72-27884

Frequency tuning and intracavity high efficiency extraction of second harmonic radiation from prism type Nd laser

12 p1825 A72-27885

Second harmonic conversion of CW YAG-Nd laser radiation on lithium metaniobate crystals, discussing conversion coefficient optimization

12 p1825 A72-27886

Crystal growth, physical and spectroscopic properties and laser performance of Nd and Ho doped crystals with apatite structure

12 p1825 A72-27927

Q switched YAG-Nd laser implementation into target designators and range finders, stressing temperature insensitive design with electronic compensation and thermal equalization

12 p1825 A72-27928

Nd-YAG laser bibliography covering oscillation, dynamics, engineering, materials and harmonic generation

12 p1826 A72-27957

Gas and solid state lasers amplitude and phase fluctuations calculated from Langevin equations, noting spectral line width and collision waves

12 p1826 A72-28050

Picosecond pulse efficient second harmonic generation by crystals inside high power dye mode locked Nd-glass laser folded cavity

12 p1826 A72-28220

Nd laser irradiation of LiH particles in magnetic trap, investigating resultant plasma expansion and diffusion

13 p2015 A72-29431

Periodic motions of weakly interacting modes in solid state lasers, using active matter pellet-resonator model

13 p1969 A72-29517

Angular spectrum of second harmonic generation during two frequency interactions in KDP laser

13 p1969 A72-29524

Energy conversion efficiency of xanthene dye laser pumped by mode-locked Nd-glass laser second harmonic, discussing effect of excited molecules transition to triplet state

13 p1970 A72-29686

High power monopulse Nd laser, obtaining single longitudinal frequency stabilized mode with anisotropic spar or quartz plates

13 p1971 A72-29922

Giant pulse radiation in Q factor modulated Nd glass laser frequency stabilization by molecular Cs vapor

15 p2245 A72-31411

Pulsed solid state lasers with large area Si photodiode for output measurement in feedback control system to compensate flash lamp aging

15 p2247 A72-32027

Nd glass laser drilling and welding applications and tests on materials to evaluate feasibility and operational advantages, identifying optimal pulse energies and durations

15 p2244 A72-32028

High power CW Nd-YAG laser efficiency improvement by optical pump wavelength, power coupling and balance factors, noting krypton arc lamp contribution

15 p2247 A72-32029

Single crystal scheelite material for Nd doped intermediate gain laser host substance, considering optimum growth conditions, lasing parameter and Nd concentration

15 p2292 A72-32030

Avalanche photodiodes for Nd and injection lasers radiation detection, reducing noise equivalent power

15 p2247 A72-32035

Tunable monochromatic IR laser based on magneto-Raman scattering from conduction electrons in n-type InSb, discussing physical processes and experimental techniques

15 p2250 A72-32393

Spiking response of luminescent diode pumped CW Nd-YAG laser to sinusoidal modulation, showing agreement with relaxation oscillation resonance prediction

15 p2250 A72-32526

Q switched laser operation with electro-optic switch mechanism, measuring initial photon number per mode of Nd-glass and Nd-YAG lasers

16 p2399 A72-33014

Q switched and free emission mode locking of neodymium glass and ruby lasers via liquid bleachable dye filter

16 p2400 A72-33296

Populations modulation and spatial harmonics influence on gas and solid state laser radiation characteristics, discussing uniform and nonuniform line broadening

16 p2402 A72-33706

Polyhedral radiation energy guides for laser sources and amplifiers, presenting solid state resonator design computation methods

16 p2402 A72-33707

Multichannel monopulse Nd glass laser design characteristics, describing input generator, preamplifier and amplifier channel beam distribution

16 p2403 A72-33715

Active elements for high power Nd-glass laser facility to generate short and ultrashort pulses

16 p2404 A72-33990

Nd-fiberglass laser intensity fluctuations due to fibers absorption centers, deriving population inversion threshold, pumping power and center formation rate

16 p2404 A72-33993

Frequency tuning and intracavity high efficiency extraction of second harmonic radiation from prism type Nd laser

16 p2404 A72-33994

Second harmonic conversion of CW YAG-Nd laser radiation on lithium metaniobate crystals, discussing conversion coefficient optimization
16 p2404 A72-33995

Laser systems.
17 p2562 A72-34567

Output fluctuations of CW-pumped Nd:YAG lasers.
17 p2564 A72-35345

Multicomponent structure of Nd-glass laser radiation, observing active medium gain band portions in interrelationships in free running and stimulated emission operation modes
17 p2564 A72-35507

Off-axis hologram recording on thin bismuth film with picosecond pulse train from mode-locked Nd-glass laser
17 p2558 A72-35817

Effects of thermal lensing in glass lasers.
19 p2810 A72-37512

Experimental evidence of an X-ray laser /Coherent radiation/copper/II/ gel target/neodymium-glass pump/.
19 p2811 A72-37774

Active Q switching technique for producing high laser power in a single longitudinal mode.
19 p2811 A72-37845

Relation between the plasma ion current and the surface defects produced by ruby and neodymium laser emission
19 p2812 A72-38210

Properties of stimulated neodymium laser emission under the action of Co 60 gamma emission
19 p2812 A72-38214

Nonlinear optics with picosecond laser pulses.
19 p2812 A72-38379

Harmonic mode locking of the Nd:YAG laser.
19 p2813 A72-38688

Multipulsing behavior of electrooptically Q-switched lasers.
19 p2813 A72-38692

Single-mode laser with a continuously variable pulse duration.
20 p2933 A72-39511

Influence of gas pressure in arc lamps on the pumping efficiency of CW garnet lasers.
20 p2933 A72-39513

Diffraction of a laser beam by domains in yttrium iron garnet.
20 p2933 A72-39521

Frequency-tunable stimulated IR parametric fluorescence produced by barium sodium niobate crystal pumped with picosecond pulses from frequency-doubled mode locked Nd-glass laser
20 p2933 A72-39560

Flash lamp optimal operating parameters determination by impedance matching to driving circuit and spectral matching to material of optically pumped solid state pulsed lasers
21 p3061 A72-40204

Solid state laser sources, light modulators and silicon avalanche photodiode detectors for fiber optical communication, discussing performance and limitations from system design viewpoint
21 p3018 A72-40866

A stable neodymium-glass laser harmonic generator
21 p3064 A72-41739

Study of the operation of a neodymium glass laser under nonsteady thermal conditions, with thermal insulation of the active element by air
22 p3185 A72-42172

Gas absorption lines detection based on multiple light passage through absorbing medium during generation process, noting radiation spectra of neodymium glass laser
23 p3295 A72-43305

Investigation of the fast recombination channel in InSe during excitation by neodymium laser light
23 p3295 A72-43339

Optical signal envelopes recording and reproduction with parametric superregenerative frequency converters, noting optical pumping by continuous wave YAG laser emission
23 p3292 A72-44471

Neodymium-glass laser emission spectral and temporal correlations during Q switching by rotating prisms and passive shutter
24 p3408 A72-44565

Nanosecond and picosecond laser-produced CD2 plasmas.
24 p3427 A72-44709

The effect of a harmonic-oscillator velocity distribution on an ideal solid-state laser.
24 p3409 A72-44953

Investigation of the uniformity of neodymium-glass laser emission
24 p3410 A72-45419

Increase in the ratio of the energy of ultrashort laser pulses to the energy of the background radiation.
24 p3411 A72-45613

Threshold characteristics of receivers with optical quantum amplifiers.
24 p3412 A72-45617

High power Nd glass laser with stepwise pulse amplification for intensive heating of solid target plasmas
24 p3431 A72-45714

SOLID STATE PHYSICS

Solids static electrification models based on solid state physics, considering contact, deformation and cleavage charging processes
02 p0269 A72-12552

Solid state colloidal plasma physics, discussing statistical ionization mechanics, electron emission and recombination, rocket exhausts, MHD generation, metal vapors electrostatic precipitation, etc
02 p0267 A72-12842

Electron beam interaction with bounded solid state plasma, deriving slow wave dispersion relations
04 p0561 A72-15080

Thermal expansion in simple solids and structural composites due to anharmonic vibrations, using atomic density model
15 p2322 A72-31257

Oscillatory current characteristics of Stark ladder electron with weak LO phonon coupling in solids
15 p2293 A72-32218

Book - Topics in solid state and quantum electronics
17 p2594 A72-34560

Solid state physics - An overview.
17 p2594 A72-34561

Physics of strengthening mechanisms in crystalline solids.
19 p2843 A72-37444

Charge states and charge-changing cross sections of fast heavy ions penetrating through gaseous and solid media.
19 p2837 A72-37849

Quantum crystals in the single-particle picture.
19 p2844 A72-37943

Russian book - Radiation effect method in the investigation of the structure and properties of solids.
20 p2958 A72-38951

Diffusion effects in solids caused by radiation exposure, calculating diffusion coefficients of additions and defects
20 p2958 A72-38952

Solid state physics experiment for conduction electrons effective mass determination in ultrapure n-type InSb by means of magnetophonon effect
21 p3096 A72-40203

SOLID SURFACES

NT CRYSTAL SURFACES

Solid thermal motion influence on atom colliding with solid surface linear semifinite atomic chain, presenting accommodation coefficient calculation method
06 p0853 A72-18140

Thermal emittance measuring methods for solids at temperatures above 1500 K, discussing emittance dependence on surface characteristics
06 p0818 A72-18253

High intensity laser beams for solid surface material removal by vaporization and explosion, noting surface and subsurface temperature relations
07 p1002 A72-19210

Numerical simulation of gas atom scattering from solid surface and satellite drag coefficient calculation
07 p0910 A72-20106

German monograph on lattice and solid metal surface transport processes, discussing atom migration, activation energies, impurity atom diffusion, Kossel-Stranski model, etc
08 p1212 A72-22173

Optical measurement of point velocity on surface of moving solid, applying to Mylar foil accelerated by plasma gun
09 p1310 A72-22773

Compressible turbulent boundary layer with arbitrary pressure gradients on solid or permeable surfaces, using extended mixing length theory
11 p1616 A72-25917

Conductive heat propagation with finite rate for semibound solid body under periodic surface temperature fluctuations dependent on relaxation time
12 p1890 A72-28174

Hertz formulas for undulate solid surface height distribution
12 p1819 A72-28196

Conjugate unsteady problem of convective heat transfer for uniform flow over solid body with matching boundary conditions at interface
13 p2064 A72-28889

Solid surface inspection by X ray diffraction, electron microscopy and chemical techniques
14 p2131 A72-30693

Laminar boundary layer separation point in steady two dimensional constant density flow past solid surface, deriving pressure-vorticity gradient relationship
15 p2218 A72-32467

Velocity distributions of molecular beams evaporating into vacuum from polycrystalline hexachlorobenzene and sulfur surfaces
16 p2429 A72-33058

Spatial distribution of nitrogen molecular beam scattering from solid nitrogen surface as function of beam energy and incidence angle
16 p2430 A72-33063

Numerically computed momentum and energy accommodation coefficients and angular distributions of gas molecules reflected from solid crystalline surfaces applied to satellite drag calculation
16 p2430 A72-33065

Aerodynamic coefficients determination from momentum and energy exchange between low velocity molecular jet and solid surfaces, describing time of flight measurement technique
16 p2390 A72-33069

Solid-body-surface and thin-layer analyses by the static method of secondary-ion mass spectroscopy
18 p2719 A72-36830

Solid surface geometry, atomic composition and electronic structure observations, discussing Auger spectroscopy, field ion microscopy and electron diffraction and scattering techniques
19 p2803 A72-38389

Electron spectroscopic investigation of solid surfaces chemical composition and atomic binding states and structure, discussing methods of inducing electron emission
20 p2927 A72-39695

Water film formation and breakdown during motion over solid surfaces, predicting flow rate difference due to contact angle hysteresis
21 p3085 A72-41178

A re-evaluation of material effects on microbial release from solids.
23 p3253 A72-43383

SOLID SUSPENSIONS

Cascade wind tunnel and water table determination for trajectories and velocities of suspended particles in fluid flow through axial compressor stage
07 p0907 A72-18756

SOLID-SOLID INTERFACES

Finite element method extension using computer program for solving problems of elastic bodies in contact with stiffness method advantages
01 p0141 A72-11047

Two dimensional contact problems solutions for nonclassical elastic regions for layer and strip
02 p0288 A72-11603

Vitreous silica and silicon-silicon dioxide interface defect structure and behavior during ionizing or particle irradiation
03 p0403 A72-14081

Air ionization, secondary electron emission and Compton currents at W-Be interfaces under Co 60 gamma radiation
03 p0403 A72-14083

Slow motion in shear flow of doublet of two spheres in contact, using Stokes equations solution
04 p0511 A72-14860

N- and p-type semiconductors energy band structure bending near interface
05 p0702 A72-16197

Metal polymer interface synthesis based on linearly cyclic oligoelementary high molecule compounds, analyzing heat and thermal oxidation resistances
05 p0680 A72-16202

Point contact realization between helical transmission wheels teeth
05 p0667 A72-17058

Differential thermal and X ray analyses of ignition and preignition solid-solid reactions in Zr-Mo trioxide delay system over 440-475 C
08 p1219 A72-20756

Integral contact temperatures and heat balance calculation for heat transfer between contacting bodies with rotational motions
08 p1252 A72-21444

Water effect at epoxy resin-steel interface on adhesive bond strength as function of vitrification temperature
08 p1196 A72-21863

Tensionless contact area between beam and elastic half space determined by approximate technique
09 p1398 A72-22623

Tractions at interface between fiber and matrix in fiber reinforced composites, considering axially symmetric deformations and stress fields
09 p1339 A72-23173

Stress wave reflection and transmission at interfaces between homogeneous isotropic linear elastic materials
09 p1353 A72-23501

Metallic foils effects on thermal joint resistance of interface between lathe turned and optically flat surfaces, noting optimal thickness
11 p1685 A72-25223

[AIAA PAPER 72-283]

Wear mechanism of lead-bronze dry sliding in air on hardened steel ring
11 p1638 A72-25510

Alloying addition effects on structural stability and particle-matrix cohesion in metal-alumina composites
11 p1665 A72-26864

Uniqueness and existence theorems for nonideal thermal contact between three dimensional solid parts in heat conduction theory, noting case of two dimensional body
12 p1889 A72-27996

Surface roughness effects on seizure and friction of contacting metal plates under atmospheric pressure and vacuum
12 p1819 A72-28197

Tribochemical effects during friction of non-lubricated amorphous and crystalline polymer surfaces under mild and hard contacting conditions
12 p1835 A72-28200

- Conjunction mechanism of two real contacting bodies with rough surfaces under normal load
12 p1819 A72-28202
- Chemical reactions between solids during boundary friction, presenting literature review on mechano-chemical or tribo-chemical reactions between solid lubricants and metal surfaces
[ASLE PREPRINT 72AM 1] 13 p1964 A72-28969
- Rigid smooth body pressing into elastic plate surface subjected to cylindrical bending, discussing contact problem and transverse shear strain
13 p2062 A72-29950
- Tangential force distribution at fiber surface in composite material under tensile stress without displacement at fiber axis
15 p2260 A72-31743
- Elastic dilatational field association with twist dislocation loop interaction with free surface of two phase system interface
15 p2331 A72-32504
- Mathematical model and simulation for contact problems involving elastic half spaces and viscoelastic and friction effects
18 p2734 A72-36371
- Thickness-punch size ratio effects on stress state response of elastic plates and beams in flat contact under symmetric loads due to rigid punches
18 p2734 A72-36378
- Transport coefficient of multi-layer film of semiconductors.
19 p2843 A72-37401
- Contact interactions of smooth rigid punch impressing into thin laminar anisotropic reinforced plastic plate
19 p2872 A72-37541
- Adhesive wear theoretical model based on asperity interactions number, area and volume, considering implications for friction and surface temperature analysis
19 p2809 A72-38377
- Stress concentration around circular crack on interface between two bonded dissimilar isotropic elastic half spaces
20 p2982 A72-40020
- Polymer adsorption as a cause of changes in contact interaction intensity between two solid surfaces
21 p3059 A72-40083
- Phenomena and interpretation of the transients caused by temperature change on capacitance of metal-oxide-metal systems.
21 p3097 A72-40690
- Conductance associated with interface states in MOS tunnel structures.
21 p3032 A72-40701
- Observation on phenomena associated with a slowly varying surface barrier at niobium oxide and aluminum interface.
21 p3097 A72-40702
- Photovoltaic properties of single-crystal CdS-Cu2S cells.
22 p3214 A72-42457
- Capacitance voltage characteristics instability of metal-aluminum oxide-silicon dioxide-silicon (MAOS) structures, suggesting polarization effect in layer formed during deposition and annealing
23 p3324 A72-44070
- ### SOLIDIFICATION
- Directional solidification of off-eutectic Al-Be alloy, obtaining ultimate strength, elastic modulus and concentration perturbation caused by freezing rate changes
[AD-738212] 02 p0242 A72-11985
- Steel cleanliness conditions for formation and decantation of inclusions due to deoxidation during production up to solidification
03 p0371 A72-13198
- Solidification, microsegregation and homogenization of austenitic stainless steels containing delta ferrite
05 p0672 A72-16142
- Rapidly and unidirectionally solidified Al alloys microstructure, discussing crystal dislocation origins and patterns
07 p1019 A72-20240
- Nucleation mechanism for weld solidification in electron beam and tungsten-inert gas welding processes
09 p1332 A72-23641
- Coupling of interstitial liquid and porous elastic medium deformation, calculating solidification by numerical integration of partial differential equations system of Lamé type
10 p1465 A72-24116
- Acoustic measurement of solid-liquid interface motion and solidification during freezing of Hg and paraffins
10 p1563 A72-25044
- Solidification mode of weld metal in Inconel 718, using optical and electron transmission microscopy, etch-pit technique and electron-microprobe analysis
11 p1653 A72-25344
- Vibration viscometer measurement of viscosity of alkali metals Rb, Cs, Na and K near solidification temperature, studying oxygen effects on metal surface
11 p1746 A72-26236
- Ultrasonic oscillations effects on alloy castings grain size and heat resistance, suggesting waveguide direction for oriented solidification
11 p1642 A72-26822
- Weld solidification synthesis with crystalline organic materials, investigating substructure size, growth rate and thermal gradients
13 p1966 A72-29424
- Modified Al-Si eutectic solidification behavior and microstructure, investigating LF mechanical vibration effects
14 p2120 A72-30617
- Al-Zn-Mg alloys hot cracking during solidification, discussing chemical composition, Al purity, temperature, aging, dissolved gases and grain refining additives effects
15 p2256 A72-31774
- Temperature and pressure requirements for producing superfluid liquid molecular hydrogen, noting use of solid deuterium or Ne walls to prevent hydrogen solidification
16 p2422 A72-32911
- Isotropic fiber coarsening in unidirectionally solidified eutectic alloys, showing effect on alloy microstructure
16 p2409 A72-33802
- Pure metal unidirectional solidification as function of liquid superheat, metal/mold heat transfer coefficient and mold material
16 p2399 A72-33804
- Chill zone structures in Al-Cu alloys as function of heat sink, surface microprofile and liquid metal fluid flow
16 p2409 A72-33810
- Separation of iron and annealing-out of lattice defects in rapidly-solidified aluminum-iron alloys. I - Microstructure and properties of quenched samples. II - Tempering behavior
17 p2567 A72-35174
- Filler wire composition effects on solidification cracking resistance in weldable Al-Zn-Mg alloy
18 p2699 A72-36426
- Calculation of residual stresses in wound materials produced by a layer-on-layer solidification process
19 p2872 A72-37532
- Study of the solidification of cryogenic fluids by means of evacuation
19 p2881 A72-38039
- Rates of solidification of Apollo 11 basalt and Hawaiian tholeiite.
20 p2967 A72-39181
- Metals and alloys solidification concepts, applying to casting techniques development
20 p2936 A72-39211
- Unidirectionally oriented pseudobinary eutectic solidification in ternary systems, investigating crystallographic and mechanical characteristics of ZrCuSi fibers embedded in Cu matrix
20 p2940 A72-39441
- Effects of modification and additional elements on the solidification of Al-Si alloy - Studies on the solidification of Al-Si alloys in a shell mold. II.
21 p3067 A72-40937
- Metastable phases in very rapidly solidified aluminum-germanium alloys
21 p3070 A72-41644
- ### SOLIDIFIED GASES
- #### NT SOLID NITROGEN
- Southern Martian polar cap seasonal change, describing variation at vernal equinox and dry ice hypothesis
04 p0581 A72-15621
- ### SOLIDS
- #### NT SOLIDIFIED GASES
- Perturbed vibrational motion in isotropic elastic solid, using nonlinear Truesdell equations
01 p0101 A72-10039
- Griffith crack stress intensity factor and crack face displacement in elastic solid, detailing symmetrical, antisymmetrical and point body force distributions
01 p0136 A72-10185
- Stokes and Love integral representations for elastodynamic displacement fields in elastic solid deduced by potential theory method
01 p0138 A72-10513
- Kink movement and cutting forest dislocation models of creep in thermally activated crystalline solids
01 p0140 A72-10857
- Calorimetric and radiometric methods for thermal radiation properties of solids, considering reflectance, absorbance, transmittance and spectral emittance
02 p0223 A72-11499
- Solid body surface strain field optical determination, using diffraction gratings
[SESA PAPER 1751] 02 p0199 A72-11512
- Rheological properties of Maxwell fluid-St Venant solid model for solids, noting slip lines direction during plastic flow
02 p0259 A72-12238
- Optimal stabilization of permanent rotation of solid body with arbitrary mass distribution by controlled gyroscope
02 p0230 A72-12337

Anelastic solid energy dissipation linear memory models based on viscoelasticity theory, applied to earth and metals experimental data and dynamic loading problems
02 p0294 A72-12447

Solids static electrification models based on solid state physics, considering contact, deformation and cleavage charging processes
02 p0269 A72-12552

Surface subsidence in semiinfinite resilient elastic solid mass supporting annular load distributed over circular ring
02 p0297 A72-12616

Resistive force on moving dislocations at low temperature in solids and crystal defect studies by ultrasonic methods, determining temperature dependence of mechanical properties
03 p0362 A72-13224

Shock waves in solids, investigating Hugoniot curve for condensed and porous media and phase transformation effects in polycrystals
03 p0446 A72-13689

Solid materials inelastic constitutive relations, developing internal variable thermodynamic formalism for microstructural rearrangements
03 p0446 A72-13710

Linear viscoelastic solid defined by constitutive equations replacing bounded domain in time interval on real axis, deriving theorem regarding solution of second problem of limits
03 p0447 A72-13787

Specific quantitative trace analysis technique for solids using spark source mass spectrometry
03 p0361 A72-13849

High temperature thermal conductivity measurements of solids at 800-1500 C using heat pipe technique
04 p0547 A72-14544

Plane periodic oscillations of solid body on elliptic orbit, characterizing stability of motion equations periodic solutions
04 p0582 A72-14632

Seminfinite elastic solid response to arbitrary axially directed line load, transforming simultaneous partial differential equations by Hankel transforms
[ASME PAPER 71-APMW-1] 04 p0589 A72-15180

Thermodynamic solids theory generalized for internal strains in perfect non-Bravais crystals, applying to trigonal Se and Te structure
04 p0562 A72-15470

Geometric displacements and space-time derivatives determining velocity and strain fields in solids under deformation
05 p0738 A72-16529

Plastic deformation of solid body in terms of slip dislocations displacement rate
06 p0894 A72-17687

Solid bodies crack development theory, emphasizing crack tip fine and hyperfine structures concepts and time dependent effects
06 p0898 A72-18554

Free solid body kinetic moment vector effects on long period motion in resonant state during transition from rotational to somersaulting mode
06 p0849 A72-18699

Finite element and finite difference formulations for solid continua by variational principles, including potential energy, complementary energy and Reissner principles
07 p1087 A72-18792

Surface relief effect on radiative properties of solid body with random surface roughness distribution
07 p1098 A72-18934

Test facility for thermal diffusivity measurements in solids by method of plane temperature waves using periodic optical heating at 1500 K
07 p0982 A72-18942

High intensity pulsed laser beam heating of solid transparent materials
07 p1002 A72-19212

Unsteady thermal conductivity and heat transfer in solid bodies heated by radiation, using cascade linearization method
07 p1100 A72-19884

Motion equations order reduction for solid body with fixed point
08 p1207 A72-21340

Transformation of integrodifferential equation of motion of heavy solid body about fixed point
08 p1207 A72-21341

Solid body motion about fixed point, determining moving and fixed angular velocity hodographs
08 p1208 A72-21351

Helical line deformation in solid body motion about fixed point
08 p1209 A72-21366

Optimal stabilization of permanent rotation of solid body with arbitrary mass distribution by controlled gyroscope
08 p1168 A72-21552

Asymptotic analysis of activation energy limit for radiant ignition of reactive solid with in-depth absorption
[AD-741533] 08 p1255 A72-22044

- High strength solids compositional, heat treatment and chemical environmental effects on fracture strength, considering alumina as example
09 p1334 A72-22387
- Thermal diffusion in solids subject to deformation, using classical elasticity theory body force analogy for variational and reciprocal theorems
09 p1403 A72-22757
- Equation of state data of solids from shock vaporization, using spectroscopic technique
09 p1351 A72-22856
- Perturbed motion of rotating solid body with viscous fluid filled cavity, linearizing motion and Navier-Stokes equations
09 p1295 A72-23487
- Stress intensity factor for circular crack embedded in finite thickness solid under uniform tension, noting semielliptical surface flaw in brittle material [ASME PAPER 71-APMW-6]
10 p1554 A72-24183
- Heat conduction and thermoelasticity in solids, discussing thermomechanical coupling, structural analysis and thermal stresses and deformations [SMRT PAPER L 1/1]
10 p1556 A72-24394
- Solid body elastic deformation potential energy and structure calculation on computer by finite element method and calculus of variations
10 p1559 A72-24924
- Cumulative shock loading fatigue in solids, describing experimental setup and fracture morphologies
10 p1560 A72-25124
- Laser stimulated Raman scattering and IR absorption on crystal defects leading to atomic migration in solids
11 p1647 A72-26144
- Axisymmetric stress field in infinite homogeneous isotropic elastic solid with crack surrounding cylindrical cavity, solving elastic equilibrium equations
11 p1738 A72-26720
- Physical properties of atoms, molecules and solid material in ultrastrong magnetic field, using quantum drift approximation
12 p1847 A72-27055
- Molecular dynamic techniques for simulating one dimensional shock wave motion in three dimensional solid, using rare gas solid model
12 p1881 A72-27282
- Impulse and kinetic momentum equations for dynamics of variable mass solid using mechanical model
12 p1846 A72-27543
- Dead load static stability of elastic solids in terms of zero moment condition of Beatty theory
12 p1883 A72-27557
- Stress intensity factor of Griffith crack in elastic solid opened by thin symmetric wedge, using triple integral equations
12 p1883 A72-27558
- Laser-interferometer instrumentation for shock stress wave measurements in solids, using velocity and displacement techniques
12 p1808 A72-27638
- Acceleration waves propagation in elastic-plastic strain hardening rate independent solids, obtaining solution for discontinuity change in strength in homogeneously prestressed medium
12 p1846 A72-27729
- Cryogenic microwave equipment for solids study provided by adiabatic demagnetization cooling system, noting relaxation time measurement in magnetic fields
12 p1796 A72-27856
- Russian papers on solid bodies friction mechanism and properties covering adhesion, lubricants effects, wear in presence of aircraft fuels and temperature effects
12 p1817 A72-28180
- Solids deformation resistance increased by active lubricants effects on coupled friction surfaces, noting damage localization to thin surface layers
12 p1817 A72-28181
- Temperature effects on crystalline solids adhesion, noting friction rise above seizure point
12 p1818 A72-28187
- Solid deformable body mean stress determination by statistical summation of stress squares on faces of parallelepiped rotated within Euler angle limits
12 p1887 A72-28233
- Stability in mechanics of continuous solids - Conference, University of Waterloo, Ontario, Canada, October 1970-September 1971
13 p2054 A72-28476
- Thermomechanical interactions between elastic waves and nonstationary temperature fields in solid continua, considering coupled and uncoupled theories
13 p2064 A72-29093
- Three dimensional steady temperature field calculation for solid bodies under concentrated heat source, using flow kinetic heat conduction method
13 p2065 A72-29151
- Three grid LEED-Auger display system for electron emission from solids at low primary beam energies
13 p1932 A72-29751
- Axisymmetric hypersonic motion around thin solid of revolution, taking into account boundary layer interaction with inviscid external flow
13 p1895 A72-29847
- Numerical solution of algebraic equation encountered in aerodynamics of hypersonic boundary layer interacting with external flow on thin solids of revolution
13 p1895 A72-29848
- Microinhomogeneous solid bodies elastic fields and effective moduli calculation method within framework of random field theory, using singular approximation
13 p2062 A72-29884
- Variational problem solution for solid strained body with nonlinear stress-strain relation, applying finite element method
14 p2130 A72-30189
- Solid bodies microanalysis by mass spectrum microscopy based on secondary ion-ion emission, discussing ion source and focusing systems
14 p2104 A72-30449
- Elastoplastic equilibrium theorems for solid subjected to variable external effects, considering perfectly plastic and arbitrary hardening materials
14 p2165 A72-30574
- Russian papers on relaxation mechanisms in solids covering microscopic theory, mechanical, electrical, chemical, thermal and magnetic processes, equipment and techniques
14 p2121 A72-30951
- Mobile point defects interaction with moving dislocation in inelastic solid bodies, considering energy dissipation due to impurity relaxation
14 p2169 A72-30954
- Energy losses due to hysteresis friction during oscillations of dislocations in elastic field of point defect in solids, discussing temperature and amplitude effects
14 p2121 A72-30955
- Relaxation methods of magnetic and acoustic spectrography for studies of gravitational and inertial dipoles and quadrupoles in molecules and nuclei of solid bodies
14 p2143 A72-30963
- Dislocation motions as internal friction mechanism in solids due to medium frequency acoustic waves, considering motional energy transfer to thermal phonons and lattice vibrations
15 p2292 A72-31833
- Displacement and stress field for elastic solid containing cruciform crack with unequal length arms
15 p2330 A72-32292
- Nearly incompressible elastic solid compressibility effects theory, applying to annular wedge straightening, stretching and shearing and cylindrical tube telescopic shear problems
15 p2330 A72-32477
- Strain release method for investigating thermally activated microflow mechanisms in solids, discussing technique for activation energy and relaxation strength measurements
16 p2372 A72-32822
- Three dimensional potential flow with lift about solid body calculated by distribution of sink, source and vortex type singularities satisfying Laplace equation
16 p2342 A72-32896
- Limit displacement or solids parameters optimization for perfectly locking bodies, presenting mathematical models based on extremum energy theorems
16 p2423 A72-33104
- First and second order shock discontinuity waves propagation in thermoelastic incompressible solids, deriving Piola-Kirchhoff stress tensor via Clausius-Duhem relation
16 p2423 A72-33109
- Exponential representation of isotropy groups of simple solids, noting conditions for conjugation of unimodular to orthogonal group subgroups
16 p2423 A72-33111
- Magnetic field effect on ruby laser generated plasma in solid target, measuring thermal ion energy increase
16 p2439 A72-33988
- Note on dynamic fracture toughness measurement
17 p2566 A72-34257
- Unsteady thermal conductivity and heat transfer in solid bodies heated by radiation, using cascade linearization method
17 p2637 A72-35132
- Stress analysis of axisymmetric solids with asymmetric properties
17 p2632 A72-35227
- Temperature distribution in solids under laser irradiation
17 p2564 A72-35355
- Simultaneous determination of the thermokinetic characteristics of solids by a variable regime method
17 p2638 A72-35749
- Distortion of the semi-infinite solid due to transient surface heating
17 p2635 A72-35974
- Wave-front singularities for two-dimensional anisotropic elastic waves
18 p2739 A72-37175
- Book - Annual review of materials science. Volume 1
19 p2843 A72-37441
- Optical holography and holographic interferometry applications in solid mechanics, considering surface physics, bomb breakup, transverse wave propagation, nondestructive testing and vibration analysis
19 p2797 A72-37603
- A photoelectric method for measuring the temperature pulsations of solids
19 p2799 A72-37664
- Plane bending problems in the theory of elasticity for nonhomogeneous solids
19 p2877 A72-38162
- Semiempirical method for determining electron wave-function parameters in solids
20 p2959 A72-38955
- Criteria for delayed fracture in solids and their experimental verification
20 p2981 A72-39954
- The vertical stress distribution due to parabolical strip load and uniform load over an ellipse in the interior of a semi-infinite solid
21 p3121 A72-41243
- Radiant conduction heat transfer in semitransparent solid materials
22 p3243 A72-41955
- Coherent/incoherent elastic/inelastic neutron scattering in amorphous solids, presenting neutron intensity and correlation functions
22 p3206 A72-42799
- Plane waves in a new theory of thermoelasticity
22 p3239 A72-42856
- Inverse problems of the dynamics of a ponderous solid with one fixed point
23 p3312 A72-43219
- Computer simulation of fracture spreading in a visco-elastic solid
23 p3267 A72-43702
- Statistical strength and plasticity criterion for materials in a complex stress-strain state
23 p3349 A72-43953
- Reissner-Sagoci problem for semiinfinite elastic solid stress and displacement determination, discussing generalization to nonhomogeneous media with circular part under axisymmetric twisting
23 p3314 A72-44266
- Physical properties of atoms, molecules and solid material in ultrastrong magnetic field, using quantum drift approximation
24 p3427 A72-45708
- SOLIDS FLOW**
Solid cylinder stress-strain state under thermal and mechanical loads, obtaining analytical solutions via flow theory based on Von Mises yield condition
09 p1401 A72-22723
- Kinetic freezing effects of supersonic gas flow with solid particles into vacuum, analyzing continuous to collisionless transition flow for Maxwell molecules
14 p2094 A72-30295
- Two phase flow types defined as flow problems of two-phase matter mixtures /solid, liquid, gas or plasma/ and interface interaction
20 p2915 A72-39971
- SOLIDUS**
Nb-Ti-B ternary system melts hardened in vacuum, determining solidus temperature and surface from phase diagram
03 p0370 A72-13186
- Nonequilibrium subsolidus reduction of lunar spinels at low oxygen fugacities based on Cr-Al ulvöspinel and olivine decomposition
03 p0439 A72-14298
- Yttrium alloys isoperiodic lines, solidus isotherms, equal hardness lines and resistivity presented diagrammatically
15 p2289 A72-31185
- SOLITHANES**
The fracture energy and some mechanical properties of a polyurethane elastomer
19 p2823 A72-38450
- SOLSTICES**
F 2 layer midlatitude local centers of anomalous nighttime ionization during winter and summer solstices
11 p1623 A72-26283
- SOLUBILITY**
Metal powders sintering activation mechanism, considering heterogeneous metals particles diffusion flow, mutual solubility and crystal lattices distortion
02 p0232 A72-11432
- Hydrogen diffusivity and solubility in alpha-Ti alloys, considering absorption effect on stress corrosion cracking
02 p0244 A72-12481
- Nb-Mo-N solid solution nitrogen solubility equilibrium at various temperatures and pressures
03 p0370 A72-12962
- Phosphate solubilization and activation on primitive earth, using apatite solubility as function of pH
04 p0483 A72-14769
- Carburization of various irons in methane-hydrogen atmosphere at 750 C, comparing activity coefficients and solubility limits
04 p0533 A72-14978

- Nitrogen interaction with liquid binary Ni alloys, investigating solubility as function of temperature and pressure and titanium nitrides existence conditions
07 p1011 A72-19547
- Cast Nb-C alloys carbon solubilities of 1.4 and 0.25 percent at 2100 and 1200 C, showing molten microstructure and measuring procedures
07 p1023 A72-20669
- Temperature dependence of Ge solubility in CdSb single crystals from microstructural observations and measurements of microhardness and electrical properties
09 p1372 A72-23480
- Isotope effect calculation hydrogen and deuterium solubility in fcc metals, analyzing elastic vibrational spectrum of crystal with impurity atom in internode
10 p1498 A72-24873
- Carbon solubility in Nb at 1500-2150 C, determining saturation concentrations from electrical resistivity vs reaction time curves
11 p1662 A72-26740
- Nitrogen solubility, degassing kinetics and diffusion coefficients for Mo-N, W-N and Re-N systems for 1300-3050 C
11 p1663 A72-26841
- Thermodynamic description of metal rich side of Nb-Mo-N solid solution, determining equilibrium nitrogen solubility as function of pressure and temperature
11 p1664 A72-26842
- High temperature solubility and diffusion coefficient of nitrogen in rhenium
12 p1827 A72-27138
- Binary ordering alloys with fcc lattice, studying volume effects on solubility of impurity atoms in interstices
13 p2023 A72-29907
- Hydrogen gas solubility measurement in solid Mo at atmospheric pressure and 905-1521 C, noting quasi-regular linearity of Arrhenius plot
14 p2113 A72-30246
- Solute quenching technique to determine hydrogen solubility in Ta to liquid He temperature, comparing with equilibrium measurements
15 p2259 A72-32640
- Co-Cr-C system carbon activity and solubility at 950-1200 C, deriving equation for temperature dependence and solid solution-carbide precipitation zone boundaries
16 p2407 A72-33441
- Hydrogen solubility in Zr-Nb-Hf systems as function of composition, temperature and hydrogen equilibrium pressure
16 p2410 A72-33816
- Studies of the electron transport chain of extremely halophilic bacteria. VII - Solubilization properties of menadiene reductase.
19 p2755 A72-37649
- Rate of molybdenum solution in carbon-saturated liquid iron.
22 p3193 A72-43027
- Physicochemical problems in silicon and germanium heat treatment, covering solubility and solid solutions stability and saturation variation with temperature
23 p3324 A72-43687
- Immiscible materials processing experiments in near weightlessness environments during Apollo 14 mission and on NASA short duration low gravity test facilities
24 p3407 A72-45155
- The mutual solubilities of titanium and boron in pure aluminum.
24 p3415 A72-45482

SOLUTES

- Maximum volatile solute vaporization escape prior to droplet solidification during metal vapor chemical release process
08 p1128 A72-21618
- Solute dispersion distribution over tube cross section with flowing solvent, comparing with Gaussian distribution
10 p1466 A72-24330

SOLUTIONS

- NT AQUEOUS SOLUTIONS
NT DETONABLE GAS MIXTURES
NT GAS MIXTURES
NT NUCLEAR EMULSIONS
NT PHOTOGRAPHIC EMULSIONS
NT SOLID SOLUTIONS
Calculation of the surface properties of elastic polymer molecules in athermal solutions by the Guggenheim method
21 p3095 A72-40078
- Concentration dependence of surface tension in solutions of surface-inactive polymers
21 p3072 A72-40079

SOLVENT EXTRACTION

- Determination of copper, iron, cobalt, nickel, and manganese in biological samples of vegetable origin
23 p3260 A72-43924

SOLVENTS

- Solute dispersion distribution over tube cross section with flowing solvent, comparing with Gaussian distribution
10 p1466 A72-24330

SOMMERFELD APPROXIMATION

- Altitude dependence of vlf field of vertical electric dipole in spherical waveguide of radially inhomogeneous ionosphere and earth, using Sommerfeld integral representations
08 p1130 A72-20736
- Wire antenna half-space problem analysis by Sommerfeld integral approach and plane wave reflection coefficient approximation
14 p2085 A72-30338
- Altitude dependence of VLF field of vertical electric dipole in spherical waveguide of radially inhomogeneous ionosphere and earth, using Sommerfeld integral representations
19 p2766 A72-38364

SOMMERFELD WAVES

- Coupled thermoelasticity in infinite body with cavity, introducing Sommerfeld type scalar potential and temperature radiation conditions
02 p0259 A72-12236
- Microwave resonators excited in coupled and E sub zero modes, determining equivalent circuit and Sommerfeld resonator Q factor and guide wavelength
11 p1605 A72-26369

SONAR

- Double ended scan converters for multisensor data display in radar, sonar and TV applications
02 p0193 A72-12394
- Narrow-band radar/sonar signal optimal detection under known direction and uncertain phase/arrival time conditions, considering statistical signal sampling
02 p0180 A72-12572
- Regulating amplifier with optoelectronic coupler for sonar sea bed layer measurements
09 p1284 A72-22239
- Operator independence test for human performance reliability modelling based on symptom detection and fault location of sonar system failure
10 p1429 A72-24002
- Sensitivity loss from approximation to radar and sonar signal square law detectors in quadrature systems with postdetection integration
10 p1437 A72-24690
- Sonar techniques application to radar, stressing utilization of preformed channels in rapid and distant detection of satellites and ballistic missiles
15 p2197 A72-31874

SONDES

- NT IONOSONDES
NT RADIOSONDES
NT RAWINSONDES
Free atmosphere vertical temperature structure at mesoscale, using continuous recording sonde
[AD-739147] 04 p0519 A72-15158

SONIC BOOMS

- Finite element method for determining transient response of box-type structure to traveling sonic pressure wave
01 p0136 A72-10219
- Sonic boom pressure signatures during F-104 overflights at Mach 1.3 and 30,000 ft, explaining variations by atmospheric turbulence
01 p0006 A72-11158
- Real gas effects in atmosphere to make sonic bang shock wave full dispersion and thickness wide variations
02 p0154 A72-11972
- Transonic air transport design, discussing wind tunnel tests, supercritical flow technology, sonic beam avoidance, cruising speed, operating costs and transport family development
03 p0310 A72-13487
- Sonic boom generation, propagation and minimization, discussing atmospheric conditions and ground characteristics influence and means for boom signature reduction
04 p0464 A72-14815
- N-wave dynamic magnification factors for sonic bangs response on complicated structures
04 p0464 A72-14849
- Sonic boom generation, propagation and minimization, discussing atmospheric turbulence and temperature gradients and aircraft configuration effects
[AIAA PAPER 72-194] 05 p0612 A72-16849
- Sonic boom signature by bicharacteristic method, correcting zeroth order/free stream characteristics to obtain solution to compressible fluid exact equations of motion
[AIAA PAPER 72-195] 05 p0652 A72-16907
- SST operational maneuver effects on sonic boom, discussing steady flight and acceleration-to-cruise pressure signatures
[AIAA PAPER 72-196] 05 p0613 A72-16981
- Characteristic overpressure concept for sonic bangs effect on structures and dynamic magnification factor engineering formula
06 p0758 A72-17858
- Simulated sonic boom effect on tracking performance and autonomic response, noting heart rates, skin conductance and startle reflex
06 p0767 A72-17868
- Ground focus line location of sonic bang propagation in stratified atmosphere with wind for transonically accelerating aircraft
07 p0912 A72-19645

Turbojet and turbofan engines noise signatures and sonic boom effects, discussing frequency spectra, atmospheric attenuation and noise suppression systems
07 p0912 A72-20163

Booms generated on ground by supersonic aircraft flying at high altitude through stratified atmosphere
08 p1149 A72-21019

Acoustic tests of jet aircraft noise and sonic boom effects on sleep pattern and human performance, using EEG analysis
[ASA PAPER W11] 08 p1125 A72-21487

Sonic booms - Conference, Houston, November 1970
08 p1110 A72-21901

Sonic booms generation theory and prediction methods for supersonic aircraft during nonaccelerated flight in quiet atmosphere
08 p1110 A72-21902

Sonic boom minimization, obtaining positive phase signature pressures as function of altitude, Mach number, weight and length
08 p1110 A72-21903

Maneuvering aircraft sonic boom propagation and signatures prediction in stratified atmosphere by geometric acoustic method
08 p1110 A72-21904

Atmospheric stratification irregularities effects on sonic boom propagation, obtaining probability density functions
08 p1111 A72-21905

Sonic boom simulation devices and techniques, including wind tunnels, ballistic ranges, spark discharges and shock tubes
08 p1147 A72-21906

Seismic and underwater effects of sonic booms, comparing theory with experiments
08 p1162 A72-21907

Building structures response to transient pressures caused by sonic booms, discussing three dimensional loading effects, air cavity coupling and nonlinearities influence
08 p1249 A72-21908

Animal response to sonic booms, considering mink reactions in detail
08 p1119 A72-21909

Human response to sonic booms, discussing super-sonic commercial flights acceptability
08 p1127 A72-21910

Concorde sonic boom measurement, discussing structural vibrational response
08 p1111 A72-21911

Sonic boom exposure effect on humans based on visual performance and tracking tests
08 p1127 A72-21912

Sonic booms generation and propagation, discussing effects on animate and inanimate objects
09 p1262 A72-23316

Sonic boom research facilities and techniques emphasizing applicability to other environmental problems
09 p1262 A72-23317

Sonic boom effects on structures, discussing ground motion, direct excitation by shock waves and damages
09 p1304 A72-23318

Sleep disturbance due to sonic booms, discussing laboratory findings and experimental techniques standardization
09 p1273 A72-23319

Human reactions to sonic boom acoustic stimuli, noting startle reflex responses
09 p1267 A72-23320

Human annoyance reactions to sonic booms, discussing field and laboratory findings
09 p1273 A72-23321

Sonic booms effects on domestic and wild animals, discussing field and laboratory findings
09 p1267 A72-23322

Field and laboratory sonic boom simulators, noting required characteristics
09 p1292 A72-23323

Summary of 1971 Stockholm workshop on sonic boom effects, discussing humans, animals and structure exposure and interdisciplinary aspects
09 p1273 A72-23324

Mechano-acoustical network model for room-hallway-window system response to sonic booms or other transient loads, determining damping ratios
11 p1686 A72-25729

Hypersonic vehicle far field behavior for sonic boom strength, position and positive phase duration
11 p1617 A72-26002

Window response to sonic booms, establishing upper bounds by mechano-acoustical network modeling of one and two degree of freedom dynamic systems
13 p2057 A72-29091

Supersonic jet noise and sonic boom sources, propagation and reduction, considering airport community disturbances, aircraft cabin noise and fatigue problems
13 p1898 A72-29578

Sonic boom magnitude and location in stratified atmosphere calculated from gas dynamical equations for lifting body of revolution
13 p1898 A72-29585

Maximum overpressures of supersonic aircraft maneuvering-produced sonic booms occurring at geometrical acoustic ray focus points [acoustic cusps]
13 p1898 A72-29586

Acoustically scaled simulation of sonic boom N-wave energy penetration into ocean for flat air-water interface
13 p1951 A72-29587

Far field sonic boom approach effects, describing Whitham theory extension for ultimate N wave deviations for body configurations with continuous or discontinuous tangent
16 p2347 A72-33010

Analytical method of characteristics to determine front shock and sonic boom due to flat delta wing with supersonic leading edges
[DFVLR-SONDDR-205] 16 p2348 A72-33401

Sonic boom induced pressure wave propagation and attenuation in water, comparing ballistic range measurements with theoretical predictions
[AIAA PAPER 72-654] 16 p2349 A72-34080

Sonic boom alleviation by flow field alteration near supersonic aircraft, considering finite rise times, reduced overpressures and shock pressure rises
[AIAA PAPER 72-653] 16 p2349 A72-34081

Sonic boom induced flow field at supersonic/hypersonic speeds, using shock expansion method and hypersonic equivalence principle for sharp and blunt nosed bodies
[AIAA PAPER 72-652] 16 p2349 A72-34082

An estimate of sonic boom damage to large windows.
17 p2623 A72-34234

Sonic boom duration effects on thin circular elastic plate transient axisymmetric vibration via Hankel and Laplace transforms
18 p2734 A72-36409

Sonic jet noise pressure source model for radiated sound power and jet pressure frequency spectra ratio derivation with application to noise suppression
18 p2680 A72-36414

Theoretical and experimental studies of the focus of sonic booms.
18 p2642 A72-36506

Supersonic aircraft wing form influence on sonic boom, discussing supersonic wind tunnel tests for noise reduction
20 p2888 A72-39931

Canadian sonic boom simulation facilities.
[ICAS PAPER 72-26] 21 p3040 A72-41151

Closed form solution for the sonic boom in a polytropic atmosphere.
21 p2992 A72-41258

Supersonic aircraft focused sonic boom suppression by slowing down during turning flight, obtaining conditions for focus cut-off at ground by atmospheric refraction
23 p3251 A72-44125

Sonic boom effects on sleep - A field experiment on military and civilian populations.
23 p3261 A72-44370

Sonic boom startle - A field study in Meppen, West Germany.
24 p3374 A72-44916

SONIC FLOW
U TRANSONIC FLOW
SONIC SPEED
U ACOUSTIC VELOCITY
SONIC WAVEGUIDES
U ACOUSTIC DELAY LINES
SONOGRAMS
Intercoms 3 satellite vlf radiation and natural signals recording with circular antenna, whistler recorders, sonograms and spectroanalizers
08 p1157 A72-21146

Magnetosphere thermal plasma densities determination from hydromagnetic whistler digital sonograms and modified normalized dispersion curves
15 p2283 A72-31430

Intercoms 3 satellite VLF radiation and natural signals recording with circular antenna, whistler recorders, sonograms and spectroanalizers
20 p2903 A72-39251

SOOT
Soot oxidation rate from diffusion flame measurements extrapolated for gas turbine combustion chambers
05 p0747 A72-16368

Mean emissivity of a luminous flame - Spray combustion of liquid fuel.
18 p2740 A72-36148

SORBENTS
NT ADSORBENTS
SORPTION
NT ADSORPTION
NT CHEMISORPTION
Anion sorption mechanisms and product composition in anodic aluminum oxide filled with phosphate, chromate and sulfate solutions, discussing chemisorptive compound formation and oxide dehydration
05 p0624 A72-17053

Sorption properties of anodic aluminum oxides prepared in orthophosphoric and chromic acid solu-

tions, determining dependence on pH by isotopic labeling method
05 p0624 A72-17055

Heat stretching-induced changes effect on strength, sorption and structural properties of polyformaldehyde fibers, noting structural orientation enhancement and porosity growth
08 p1194 A72-21757

Equipment and techniques for He sorption by condensed gas layers at 0.1 picotorr
09 p1364 A72-23227

Thermogravimetric design, using electromagnetic microbalances and turbomolecular pump for automatic sorption isotherm measurements in surface area and pore size analyses
11 p1636 A72-26788

High temperature low pressure reaction kinetics of nitrogen sorption by titanium foil, using ultrahigh vacuum microbalance
12 p1777 A72-27045

SORTING
U CLASSIFYING
SOUND
U ACOUSTICS
SOUND ABSORPTION
U SOUND TRANSMISSION
SOUND AMPLIFICATION
Coupling between chemical kinetics and sound propagation, discussing conditions for amplification and attenuation of acoustic wave
13 p1912 A72-28547

Piezoelectric substrate covered with semiconductor layers, calculating sound amplification characteristics at microwave frequencies
15 p2197 A72-31893

Plane acoustic-gravity wave reflection, refraction and amplification at interface separating two fluids in relative motion, noting shear flow speed effect
16 p2383 A72-32968

SOUND BARRIER
U ACOUSTIC VELOCITY
SOUND DETECTORS
U SOUND TRANSDUCERS
SOUND FIELDS
Wideband acoustic pressure field sensing by moving receivers and sensors, calculating motion effects on response including directional pattern and gain
02 p0259 A72-12176

Sound reflection by dense doubly periodic grating parallel to rigid baffle, describing asymptotic characteristics by double lattice virtual mass including mirror image
03 p0387 A72-12914

Acoustical field from streamlined body of revolution moving in homogeneous gaseous medium past seminfinitesimal rigid screen, using Wiener-Hopf method for diffraction radiation
03 p0340 A72-12916

Acoustic field hf asymptotic characteristics after sound transmission through elastic shell, using integro-differential equations system
03 p0388 A72-12917

Holographic investigation of acoustical fields, describing shadowgraph recording apparatus for sound pressure amplitude distribution
03 p0352 A72-12918

Optical acoustic field recordings application to turbulent characteristics measurement for transparent media
05 p0660 A72-15848

Acoustic /ultrasonic/ holography techniques for acoustic field recording and image reconstruction in coherent light, including applications
07 p0981 A72-18920

Sound field measurement in circular and rectangular air duct with sound-absorbing walls /mufflers/, deriving empirical formula for attenuation frequency characteristics
09 p1354 A72-23683

Vibration of infinite thin plate coupled with acoustic field in surrounding fluid, using Fourier transformation
10 p1511 A72-24223

Two dimensional low Mach number sound field from line vortex passage around rigid half plane edge, calculating space-time variation by perturbation methods
10 p1468 A72-24370

Radiation resistance for natural modes of rectangular panel from far field acoustic radiation energy distribution
11 p1687 A72-26059

Acoustic /ultrasonic/ holography techniques for acoustic field recording and image reconstruction in coherent light, including applications
13 p1957 A72-29206

Unstable discharge regime of nonisothermal axisymmetric subsonic turbulent jet in acoustic field with local perturbations
13 p1943 A72-29883

Lighthill method for ohmic dissipation pulsation effect on sound field generated by turbulent flow of conducting fluid
14 p2141 A72-31001

Optical acoustic field recordings application to turbulent characteristics measurement for transparent media of fluid flows
15 p2232 A72-31267

Blowdown wind tunnel internal and external noise fields prediction by empirical method, considering valves, burners, turbulent boundary layers and exhaust jets as sources
[AIAA PAPER 72-668] 16 p2374 A72-34070

Supersonic jet noise mechanisms and scaling laws, studying acoustic fields for rectangular and axisymmetric nozzle configurations
[AIAA PAPER 72-641] 16 p2381 A72-34091

Space-modulated lateral emission of an ultrasonic beam in a solid
17 p2583 A72-35546

Multipole expansion of sound radiation from moving rigid bodies.
18 p2710 A72-36404

Separation and analysis of the acoustic field scattered by a rigid sphere.
18 p2710 A72-36408

Resonant mode sound field radiated by nonuniform slender circular cross section free-free beams, using dipole array modeling
18 p2710 A72-36410

Spheroids with surface vibration at specified normal velocity distributions, calculating acoustic radiation by Green function approach
18 p2710 A72-36412

The acoustics of axial flow machines.
18 p2685 A72-37204

Numerical study of the characteristic magnitudes of turbulence on the far sound field radiated by a subsonic jet
[ONERA, TP NO. 1058] 19 p2786 A72-37761

Uniform moving source radiated sound field from equivalent stationary source distribution via transformation based on retarded-time position and Doppler frequency shift
22 p3205 A72-42461

Holographic techniques in high intensity acoustic fields analysis, applying to chemistry, medicine and engineering
23 p3287 A72-43549

SOUND GENERATORS
Acoustic pulse generation and transmission loss characteristics measurement by single pulse method with simple shape to facilitate Fourier analysis
03 p0388 A72-12955

Sound generation in shear flow turbulence, discussing dependence on mean flow velocity and temperature
07 p0909 A72-20097

Circular jets sound generation analysis, using Lighthill equation and Michalke spectral method
[DFVLR-SONDDR-179] 07 p0910 A72-20100

Sonic booms generation theory and prediction methods for supersonic aircraft during nonaccelerated flight in quiet atmosphere
08 p1110 A72-21902

Field and laboratory sonic boom simulators, noting required characteristics
09 p1292 A72-23323

Acoustic waves generation in liquids by Q-switched ruby laser, noting transition from plane to spherical waves with dye concentration and focusing configuration variations
10 p1490 A72-23954

Turbulence generated sound due to interaction with sound absorbent liners, investigating dynamic process via rigid boundary model with homogeneous array of circular orifices or pistons
10 p1511 A72-24424

Matched acoustic generator for sweep frequency testing of power gain of fluoric amplifiers
[ASME PAPER 71-WA/FLCS-2] 10 p1423 A72-25051

Flexural vibrating free edge plate transducer with stepped thickness for high directional ultrasonic radiation generation in fluids
11 p1687 A72-26060

Sound generation by fluid flow interaction with sharp-edged vibrator, predicting sound radiation pressure by quasi-steady analysis based on reed velocity
13 p2005 A72-29562

Sound generation by finite rectangular plate vibrations, deriving radiated power as function of aspect ratio and vibration pattern
13 p2005 A72-29564

Moving sound sources spectral analysis techniques, discussing computer controlled one-third octave band and narrowband analysis
13 p2005 A72-29566

Fan noise estimation from equation involving delivery volume and pressure to correct ratings to generated sound power levels
16 p2377 A72-33323

Blowdown wind tunnel internal and external noise fields prediction by empirical method, considering valves, burners, turbulent boundary layers and exhaust jets as sources
[AIAA PAPER 72-668] 16 p2374 A72-34070

The acoustics of axial flow machines.
18 p2685 A72-37204

Linear acoustic model to predict axial flow turbomachinery aerodynamic sound generation including flow effects on radiation 19 p2788 A72-38568

Use of acoustic emission for the detection of weld and stress corrosion cracking. 20 p2925 A72-39283

Observation and analysis of simulated ultrasonic acoustic emission waves in plates and complex structures. 20 p2925 A72-39284

Theoretical model for acoustic emission relationship to fiber cracking during rising load tensile test on fiber reinforced composites 20 p2925 A72-39285

Acousto-optic modulation with coupled Gunn oscillator-piezoelectric structure. 20 p2960 A72-39702

Canadian sonic boom simulation facilities. 21 p3040 A72-41151 [ICAS PAPER 72-26]

Jet noise generation theory /Lighthill-Ffowkes Williams/ verification by model tests, discussing means of reducing or eliminating shock cells 21 p3047 A72-41852 [ICAS PAPER 72-55]

Uniform moving source radiated sound field from equivalent stationary source distribution via transformation based on retarded-time position and Doppler frequency shift 22 p3205 A72-42461

SOUND INTENSITY

Jet noise simple-source theory experimental verification, determining relation of measured sound power and jet pressure levels of turbojet engine 06 p0867 A72-17856

Mark VII ear performance calculation procedure for perceived loudness or noisiness levels relation to sound pressure, using experimental frequency weighting contours 08 p1127 A72-21895

Monaural perstimulatory loudness adaptation measurement by delayed and single simultaneous balance methods, discussing intensity, frequency and duration effects 08 p1127 A72-21896

Auditory adaptation tests confirmation of Small loudness model prediction of lower adaptation for test tone greater than adapting tone intensity 08 p1127 A72-21897

High intensity sound effects on electronic equipment and components in aircraft noise environment, noting whisker diode and printed circuit board damage 15 p2209 A72-32621

Auditory induction of fainter by louder sounds as perceptual phenomenon cancelling masking effects 16 p2354 A72-33170

Response bias and sensitivity variations in psychophysical test of rats discrimination between standard and attenuated auditory signal intensities 16 p2356 A72-33648

Sound reduction by barriers on the ground. 17 p2580 A72-34235

Determination of the functional state of the auditory analyzer through the action of short-term acoustic stimuli of increasing intensity 20 p2893 A72-38939

Turbulent combustion induced noise, discussing scaling rules for sound power and directional characteristics of radiated sound 20 p2984 A72-39557

Acoustic pressure and sound intensity levels and noise annoyance international standards for civil aircraft noise reduction 20 p2888 A72-39803

Reaction time to the second of two shortly spaced auditory signals both varying in intensity. 22 p3142 A72-42549

SOUND LOCALIZATION

Directional hearing perception threshold in normal and auditory-defective patients, studying frontal and median planes for rising and falling noise frequencies 02 p0158 A72-11740

Human cerebral hemodynamic changes during arousal and orienting reactions to auditory stimuli 16 p2353 A72-32993

SOUND MEASUREMENT

U ACOUSTIC MEASUREMENTS

SOUND PERCEPTION

U AUDITORY PERCEPTION

SOUND PRESSURE

Wideband acoustic pressure field sensing by moving receivers and sensors, calculating motion effects on response including directional pattern and gain 02 p0259 A72-12176

Hypersonic boundary layer transition in presence of wind tunnel noise, indicating rms sound pressure relationship to transition Reynolds number 02 p0151 A72-12278

Holographic investigation of acoustical fields, describing shadowgraph recording apparatus for sound pressure amplitude distribution 03 p0352 A72-12918

White noise mean square sound pressure in turbulent flow in cylindrical duct, using cross correlation technique [ASME PAPER 71-WA/FE-5] 05 p0647 A72-15936

Axial sound sources number, strengths and phases in jets, using experimental measurements of audio pressure in near field 05 p0652 A72-16910 [AIAA PAPER 72-159]

Sound pressure levels and acoustic fatigue tests for 11,200 and 9,300 pound thrust J-52 engines comparison in A-6A aircraft 07 p0910 A72-18757

Sound pressure in liquid layer bounded by oscillating plate under bending as function of boundary acoustic impedance 07 p1034 A72-18923

JT8D engine exhaust noise field, considering internal noise sources contribution from exhaust duct sound pressure measurements 07 p1054 A72-19331

Mean sound pressure level measurement with mobile microphone carriers, noting difference from mean energy density measurement 08 p1165 A72-21297

Mark VII ear performance calculation procedure for perceived loudness or noisiness levels relation to sound pressure, using experimental frequency weighting contours 08 p1127 A72-21895

Subsonic jet noise directivity prediction from acoustic pressure measurements 11 p1706 A72-26041

Sound generation by fluid flow interaction with sharp-edged vibrator, predicting sound radiation pressure by quasi-steady analysis based on reed velocity 13 p2005 A72-29562

Space-averaged sound pressure measurement by sequentially sampled microphone arrays, considering scanning rate and rms detector time constants effect 13 p1958 A72-29565

Compressor directivity determination at discrete frequencies by tone power separation from noise background, using Fourier analysis of sound pressure autocorrelation 13 p2028 A72-29572

Acoustic mode propagation and interaction in hard walled cylindrical ducts, determining pressure and power spectral densities from pressure cross spectrum measurements 15 p2277 A72-32018

Turbulence induced sound pressure level measurement for noise generated by grill in air flow, using streamlined probe microphone 16 p2344 A72-34001

Data correlation of jet noise total sound power and peak sideline overall sound pressure level for subsonic and supersonic convergent exhaust nozzles 16 p2381 A72-34089 [AIAA PAPER 72-643]

Design requirements for a quiet helicopter. 17 p2488 A72-34484 [AHS PREPRINT 604]

Sound propagation in duct shear layers. 17 p2582 A72-35413

Experimental determination of the aeroacoustic environment about a slender cone. 17 p2486 A72-35482 [AIAA PAPER 72-706]

The estimation of nonstationary spectra from moving acoustic source distributions. 17 p2583 A72-35486 [AIAA PAPER 72-667]

Sonic jet noise pressure source model for radiated sound power and jet pressure frequency spectra ratio derivation with application to noise suppression 18 p2680 A72-36414

A new approach to the measurement of very low acoustic noise levels. 20 p2953 A72-39554

Acoustic pressure and sound intensity levels and noise annoyance international standards for civil aircraft noise reduction 20 p2888 A72-39803

Response of the average pressure acting on the surface of an emitting circular transducer due to different reflecting objects. 21 p3055 A72-40948

Evaluation of transonic and supersonic wind-tunnel background noise and effects of surface pressure fluctuation measurements. 21 p3041 A72-41588 [AIAA PAPER 72-1004]

SOUND PROPAGATION

NT VOICE

Sound propagation and absorption mechanism in liquid-base foams explored by bubble pulsation and coupling mathematical model and distributed parameter mechanical analog 01 p0115 A72-10161

Sound wave propagation velocity in partially dissociated and ionized gas, discussing attenuation coefficient, chemical process relaxation time and high temperature oxygen and nitrogen calculations 01 p0051 A72-11212

Sound propagation in acoustic ducts with shear flow and wall lining by Ritz-Galerkin technique 04 p0511 A72-14848

Sound propagation within and radiated from annular duct flow, measuring acoustic distributions for single and multimode excitations 05 p0691 A72-16924 [AIAA PAPER 72-197]

Carbon fibers elastic modulus inference from electrical conductivity inverse correlation with sound propagation rates 08 p1191 A72-21498

Acoustic approximation of pressure step discontinuity sound propagation in attenuating and dispersive ionosphere 08 p1162 A72-22139

Combined translational and internal relaxation theory of sound propagation in polyatomic gases, using 17 moment approximation 11 p1687 A72-26054

Wave equation for sound velocity propagation in suspensions based on mass and momentum balances 11 p1687 A72-26056

Atmospheric infrasound measurement techniques and instrumentation for long distance propagation, considering wind and temperature effects 11 p1635 A72-26509

Coupling between chemical kinetics and sound propagation, discussing conditions for amplification and attenuation of acoustic wave 13 p1912 A72-28547

Electron contribution to phonon damping in anharmonic metal for collision-free regime, evaluating relaxation times 15 p2277 A72-31890

Atmospheric sound absorption prediction based four-gases composition and energy transfer mechanisms, comparing results with experiments at different humidities 15 p2277 A72-32020

Relativistic hydrodynamics and gravitational instability. 17 p2581 A72-35356

Sound propagation in duct shear layers. 17 p2582 A72-35413

Acoustic refraction and attenuation in cylindrical and annular ducts. 17 p2582 A72-35414

Space-modulated lateral emission of an ultrasonic beam in a solid 17 p2583 A72-35546

Theory of sound propagation in mixtures of monatomic gases. 17 p2583 A72-35613

Theoretical and experimental studies of the focus of sonic booms. 18 p2642 A72-36506

Vibration of an infinite thin plate coupled with a fluid 18 p2736 A72-37002

Sound propagation in ionized gases and electro acoustic effect. 21 p3085 A72-40993

A model of low-frequency sound propagation in a lined duct. 21 p3085 A72-41112

Thermal properties of polymers below 4 K. 22 p3197 A72-42800

The propagation of sound in a circular duct of continuously varying cross-sectional area. 22 p3207 A72-42911

Radiation properties of the semi-infinite vortex sheet. 24 p3359 A72-44918

SOUND TRANSDUCERS

NT ELECTROACOUSTIC TRANSDUCERS

NT MICROPHONES

Log-periodic interdigital transducer design to obtain wide bandwidth for acoustic surface waves 06 p0784 A72-18241

Acoustic wave detection in strain transducer consisting of silicon insulated gate field effect transistor with piezoelectric film incorporated in insulator region 08 p1168 A72-21556

Interdigital acoustic surface wave transducer impedance characteristics calculation from equivalent circuit, demonstrating effectiveness on delay lines [AD-743552] 09 p1316 A72-23421

Hot thermistor and hot-wire anemometer principles for phonocardiographic transducer design, using theory of hydraulic amplification with high SNR 10 p1430 A72-24374

Atmospheric turbulent coherent noise in pipe arrays design for infrasonic wave detection 11 p1689 A72-26511

SOUND TRANSMISSION

Resonant and nonresonant sound transmission through cylinder walls, using statistical analysis 02 p0260 A72-12374

Acoustic field hf asymptotic characteristics after sound transmission through elastic shell, using integro-differential equations system 03 p0388 A72-12917

Wall shear layers effect on sound attenuation spectra in acoustically lined rectangular ducts, noting dependence on Mach number 04 p0462 A72-14842

Cat and rabbit middle ear muscles contraction by electric stimulation of motor nerves, noting sound transmission reduction 08 p1115 A72-21136

Turbulence generated sound due to interaction with sound absorbent liners, investigating dynamic process via rigid boundary model with homogeneous array of circular orifices or pistons

10 p1511 A72-24424

Sound transmission loss through double leaf walls, noting correction for LF calculations

11 p1687 A72-26038

Boundary reflection and transmission of N-shaped acoustic shock wave radiated from circular pipe into free air space

12 p1844 A72-27262

Statistical energy analysis of sound-structural interaction, considering sound transmission through complex walls and piping systems and fluid filled container vibrations

13 p2005 A72-29556

Sound transmission loss and diffraction measurements by combined correlation and Fourier techniques

13 p2006 A72-29768

Waldman-Snyder equation application to sound absorption and dispersion in dilute polyatomic gases, presenting truncation procedure for perturbation function expansion in irreducible Cartesian tensors

14 p2131 A72-30673

Transmission of sound in ducts with thin shear layers - Convergence to the uniform flow case.

18 p2710 A72-36405

The utility of the Galerkin method for the acoustic transmission in an attenuating duct.

21 p3083 A72-40332

Bending waves propagation through flat plate forming rigid sound bridge between two parallel plates, calculating energy transfer at LF oscillations

22 p3234 A72-42128

Sound absorption in atmosphere at 20°C, predicting relaxation times and strengths in 100 Hz to 1 MHz as functions of relative humidity

23 p3285 A72-44112

Acoustic transmission and reflection by a shear discontinuity separating hot and cold regions.

23 p3315 A72-44373

SOUND VELOCITY

U ACUSTIC VELOCITY

SOUND WAVES

NT AERODYNAMIC NOISE

NT AIRCRAFT NOISE

NT ELECTROACOUSTIC WAVES

NT ENGINE NOISE

NT JET AIRCRAFT NOISE

NT LAMB WAVES

NT NOISE [SOUND]

NT ROCKET ENGINE NOISE

NT SONIC BOOMS

NT THERMAL NOISE

LF large scale oblique Alfvén wave propagation in turbulent ion acoustic plasma, investigating dispersion relation, Landau damping and interactions

01 p0107 A72-10137

Acoustic power radiated by jet aircraft fuselage structure exposed to turbulent boundary layer pressure field, evaluating noise reduction treatments

01 p0002 A72-10216

Sound radiation from axial flow fans running in turbulent flow, evaluating fluctuating lift on rotor blades due to incident gusts

01 p0002 A72-10220

Small harmonic oscillations of isothermal atmosphere due to acoustic-gravity wave downward reflection caused by kinematic viscosity increase with altitude

01 p0102 A72-10229

MHD waves nonlinear interaction in magnetosphere, calculating transverse Alfvén and magnetosonic and longitudinal acoustic wave decay instabilities

01 p0109 A72-10618

Zinc oxide longitudinal acoustic microwave transducer, measuring untuned insertion loss and electroacoustic coupling constant

01 p0042 A72-10705

Unstable sound waves in uranium plasma, taking into account fission power density, radiation diffusion and ionization variations

01 p0112 A72-11336

Moving load effect on circular cylindrical shell in acoustic medium, discussing free axisymmetric vibration mode, shape and frequencies

02 p0290 A72-11627

Papers on noise and vibration control covering acoustics in free space, outdoors, small enclosures and rooms, measurement, analysis and design problems

02 p0258 A72-12100

Unstiffened cylinders natural frequency equations, determining modal density distribution and acoustic radiation efficiency

02 p0293 A72-12373

Noise reduction by acoustic interference, using sound generators operating in antiphase mode to noise input

02 p0262 A72-12897

Dynamic calibration by sound wave of hot wire operated by constant resistance method, using open

resonance tube in homogeneous incompressible air flow

03 p0356 A72-13235

Apodized interdigital transducers acoustic surface wave front distortion, describing perturbation and compensation method

03 p0360 A72-13602

Hf electric field influence on electron drift instability and slow ion-acoustic waves for inhomogeneous magnetized plasma stabilization

04 p0555 A72-14617

Ionospheric hydromagnetic and acoustic gravity wave interactions, examining stratified nonisothermal atmospheric model

04 p0516 A72-14934

Nonstationary hydroacoustic wave diffraction at curvilinear rigid surface, deriving transfer function and radiation pressure

04 p0589 A72-15062

Closed form solution of wave equation for sound wave scattering by rotating cylinders and spheres

04 p0550 A72-15567

Dispersion equation derived for acoustic-gravity type natural modes in solar atmosphere

05 p0712 A72-15769

Acoustic radiation pressure of small radius spherical obstacle in high level harmonic plane field for application to microphone calibration [ONERA, TP NO. 1008]

05 p0661 A72-16023

Pressure source model of sound radiated by sonic jet, deriving frequency spectra ratio and jet pressure

05 p0600 A72-16105

Ion-acoustic instability in ionosphere in presence of fast particles inhomogeneity, estimating ions and electrons drift velocities

05 p0656 A72-16245

Sound effect on diffusion flames, presenting vortex model

05 p0747 A72-16701

Dispersion properties of drift waves in low-beta weakly collisional plasma in presence of ion acoustic or Langmuir waves parallel to magnetic lines

05 p0698 A72-17019

Acoustic waves generation in afterglow of weakly ionized low pressure He plasma, using electrostatic probe

05 p0699 A72-17083

Ion-acoustic waves and ionization waves instabilities in gas discharge plasmas

05 p0699 A72-17222

Perturbed density and ion velocity distribution functions of grid-excited ion acoustic waves in collisionless plasma in single ended Q device

06 p0855 A72-17511

Pseudowaves and ion acoustic waves simulation, calculating time evolution of ion distribution for oscillating negative plasma potentials applied at grid

06 p0855 A72-17512

Parametric excitation of ion-acoustic waves in Q machine plasma, controlling electron temperature by amplitude modulated rf heating

06 p0855 A72-17513

Plasma microinstabilities due to ion acoustic waves propagation with double-humped ion velocity distribution function in Q machine

06 p0855 A72-17516

Energy absorption measurements of ion heating by ion-acoustic waves in ion streaming plasma

06 p0856 A72-17518

Ion acoustic wave excitation in plasma by modulated energetic electron beam, compared with grid excitation

06 p0856 A72-17519

Cylindrical plasma ion-acoustic resonance measurements from various excitation methods for noise component identification

06 p0856 A72-17523

Ion acoustic waves instability from electron-ion temperature difference in homogeneous collisional ionized plasma, using fluid equations perturbation analysis

06 p0856 A72-17524

Wake behind body moving in plasma parallel to magnetic field, observing coupling with parallel ion acoustic waves and with perpendicular Bernstein modes

06 p0875 A72-17525

Trapped ion instability in collisionless plasma ion acoustic waves, discussing sideband waves frequency spectrum and growth rate

06 p0859 A72-17545

Ion sound waves decay instability induced by large amplitude Bernstein mode in plasma

06 p0859 A72-17546

Ion heating caused by ion acoustic waves in ion streaming argon plasma

06 p0860 A72-17746

Ion acoustic and cyclotron harmonic plasma waves parametric excitation by hf electric field, measuring thresholds and growth rates agreeable with theory

06 p0861 A72-17827

Acoustic waves refraction, reflection and transmission from moving medium layer with space-dependent

velocity, considering Poiseuille flow three sublayer approximation

06 p0848 A72-17852

Weighted acoustic surface wave dispersive microwave filter apodized interdigital array design modification for phase error correction to reduce distortion

06 p0787 A72-18380

Spacecraft incipient failure detection, stressing acoustic energy release techniques

07 p0964 A72-18829

Oscillations and acoustic emission by interacting elastic shells in connecting medium, using quadratures with Green function

07 p1034 A72-18922

Ion-acoustic solitary waves formation and interaction in collisionless warm plasma, using Vlasov equation for ions and Boltzmann distribution for electrons

07 p1041 A72-19507

Laser probes for acoustic surface wave amplitude and phase measurements

07 p1008 A72-20385

Ion-sound plasma turbulence theory, considering collisionless shock waves data and anomalous resistivity calculations

07 p1045 A72-20480

Nonlinear ion acoustic instability in plasma for sub-harmonic and harmonic forcing oscillations similar to Van der Pol effect

07 p1046 A72-20541

Acoustic and gravity waves nonlinear propagation and structural deformation in isothermal and incompressible atmospheres with traveling wave induction

07 p0981 A72-20696

Moving plasma heating by fast large amplitude hf magnetoacoustic wave, noting Doppler effect resonance splitting

08 p1212 A72-21070

Growth rate estimation of negative energy Bernstein and ion acoustic waves explosive interaction, noting collisionless shock turbulence

08 p1212 A72-21248

Sound wave propagation in plasma, attributing acoustic cavity resonance curve sharpening to collisional energy transfer from electrons to neutrals

08 p1213 A72-21256

Slow and fast longitudinal ion acoustic waves in plasma cylinder under axial magnetic field

08 p1215 A72-21873

Electron Larmor radius effect on hf hose and mirror instabilities of fast magnetoacoustic and ion acoustic waves in nonisothermal plasma

08 p1215 A72-21874

Ray trace of sound refraction by point source on jet flow axis, numerically calculating directivity pattern

08 p1152 A72-21893

Sound refraction by sinusoidal point source in subsonic jet flow, obtaining solution by finite difference method for comparison with ray tracing results

08 p1152 A72-21894

Quartz crystals ultrasonic vibrations produced by laser beam, noting light modulation depth dependence on effective cross section and amplitude

09 p1322 A72-22415

Self consistent collisionless theory of turbulent low Mach number ion-acoustic shocks, noting resistive heating

09 p1360 A72-22872

Propagating crack properties characterization during fatigue cycling, using ultrasonic flaw detection and acoustic emission

09 p1310 A72-22922

Stable large amplitude high Mach number ion acoustic shocks in collisionless plasma, obtaining electron density as function of time

09 p1364 A72-23445

Ar/He plasma acoustic wave properties, expressing phase velocity and damping as function of ion-electron temperature ratio and relative species densities

10 p1520 A72-24300

Sound waves radiative damping in isothermal atmosphere, discussing relaxation influence on model response to body force and chromosphere dissipation effect on oscillation

10 p1543 A72-24622

Phase velocity and Landau damping of ion acoustic waves propagating through plasma boundary layer at conducting sphere or cylinder based on two fluid model

10 p1523 A72-24746

Surface acoustic wave technology in communication systems, discussing analog and digital matched filters and navigation, ATC and collision avoidance applications

10 p1483 A72-24940

Burning gunpowder surface reactions relative to temperature, chemical enthalpy and acoustic waves of pressure, velocity and density

11 p1744 A72-25337

Grid produced LF electrostatic perturbations propagation and damping in near isothermal plasma, discussing ion ballistic contributions to ion acoustic waves

11 p1692 A72-25520

Fracture surface energy and acoustic emission of boron fiberepoxy resin composite, using linear elastic fracture mechanics and compliance variation methods 11 p1674 A72-25858

Schlieren visualization of radiated wave fronts for Al plates illuminated with short acoustical pulses in water, comparing with Lamb theory 11 p1687 A72-26057

Radiation resistance of baffled beam modes from far field acoustic power intensity 11 p1687 A72-26058

Sound radiation impedance of vibrating prolate spheroids as function of nearfield variation 11 p1688 A72-26064

Negative auroral arc infrasonic wave observations during substorm poleward expansions at Inuvik, Canada 11 p1627 A72-26516

Bibliography on infrasonic sound wave generation, propagation and detection at ground level and ionospheric heights 11 p1690 A72-26520

Plasma sheath from plane negatively biased electrode immersed in low pressure discharge investigated by ion acoustic waves and hot probe 12 p1850 A72-27279

Acoustic pressure wave effect on motion of elastic conical shell fastened in rigid screen, using Timoshenko theory 13 p2055 A72-28772

Plane sound wave scattering by acoustically soft sphere at constant subsonic velocity 13 p2003 A72-28797

Infinite plane plates sound radiation due to bending waves interactions with density and stiffness fluctuations in material 13 p2004 A72-29094

Weak ion-acoustic quasi-shock wave propagation in collisionless plasma, determining long time behavior of precursor ion stream reflected by electrostatic potential 13 p2012 A72-29125

Parametric decay instability of Langmuir and acoustic plasma waves induced by incident electromagnetic wave near plasma frequency, noting application to ionospheric instabilities 13 p2012 A72-29126

Oscillations and acoustic emission by interacting elastic shells in connecting medium, using quadratures with Green function 13 p2004 A72-29208

Acoustic dipole radiation by wall pressure fluctuations in turbulent boundary layer flow over rigid and plane surface at low Mach number 13 p1894 A72-29583

Alternating magnetic field effect on collisionless nonhomogeneous magnetoplasma ion acoustic oscillations stability, examining parametric excitation of Langmuir oscillations 13 p2016 A72-29604

Sound radiation by shock wave front in cesium vapors, describing experimental shock tube 13 p2017 A72-29608

Radio aurora ion-acoustic wave propagation direction divergence due to magnetic field distortion by large ionospheric horizontal sheet current [AD-746367] 13 p1923 A72-29662

Dispersion characteristics of ion-acoustic waves in positive gas discharge plasma column 13 p2019 A72-29912

Directional dependence of sound wave emission by convective turbulence in solar atmosphere, considering cut-off frequency effects on transmitted acoustic spectrum 13 p2048 A72-29926

Stationary nonlinear ion acoustic oscillations in dense weakly ionized current carrying plasma, considering wave propagation velocity and instability process 13 p2019 A72-29988

Ion-acoustic oscillations effect on turbulent plasma electric conductivity within weak external electric field 13 p2019 A72-29990

Acoustic shock wave diffraction at moving or static plate immersed in ideal gas 13 p1943 A72-30011

Ion sound turbulence in dense plasma within magnetic field, representing global equilibrium spectrum 14 p2137 A72-30356

Acoustic wave diffraction at fixed plate boundary, determining velocity field by inverting Volterra-type integral equations 14 p2070 A72-31016

Dislocation motions as internal friction mechanism in solids due to medium frequency acoustic waves, considering motional energy transfer to thermal phonons and lattice vibrations 15 p2292 A72-31833

High amplitude ultrasonic stress waves effect on metals elastic and plastic deformation characteristics, verifying model for sound waves-lattice structure interactions 15 p2328 A72-31842

Acoustic mode propagation and interaction in hard walled cylindrical ducts, determining pressure and power spectral densities from pressure cross spectrum measurements 15 p2277 A72-32018

Ion acoustic and guided electron plasma waves excitation by grid antenna produced LF signals in cylindrical plasma column 15 p2289 A72-32650

Acoustic emission from carbon fiber-epoxy composite during continuous tensile stress cycling 16 p2413 A72-32868

Plane acoustic-gravity wave reflection, refraction and amplification at interface separating two fluids in relative motion, noting shear flow speed effect 16 p2383 A72-32968

Nondestructive vibration analysis of mechanical structures, using digital computer technique for sound wave spectrum analysis 16 p2397 A72-33220

Acoustic tunnel effect in elastic waveguide, noting penetration coefficient and quantum mechanics potential barrier 16 p2364 A72-33588

Plasmapause and geomagnetic micropulsations correlation from universal magnetospheric instability model, noting drift waves conversion to sound or Alfvén waves 16 p2387 A72-33906

Book on basic acoustics covering mathematical methods, diffraction phenomena, statistical theory of signal processing, wave acoustics, membrane sound radiation, music, source array theory, etc 16 p2427 A72-33973

Acoustic radiation from multiple spheres 17 p2579 A72-34226

Ion heating via turbulent ion acoustic waves 17 p2588 A72-34873

A modified Navier-Stokes equation, and its consequences on sound dispersion 17 p2540 A72-35146

Damping coefficient measurement for sound waves inside cylindrical tube closed at one end and excited at other end by loudspeaker 17 p2582 A72-35426

The steepening of the wavefront due to nonlinearities /An electric model test regarding the origin of shock waves/ 17 p2582 A72-35428

Sonic discontinuities in a radiative gas 17 p2582 A72-35435

Acoustic power spectrum of a subsonic jet 17 p2541 A72-35544

A stability mechanism for the ion-acoustic waves 17 p2592 A72-35625

Beam-generated collisionless ion-acoustic shocks 17 p2592 A72-35626

Nonlinear saturation of 'type I' irregularities in the equatorial electrojet 18 p2685 A72-35990

High-speed image scanning devices using acoustic surface waves and photodiode array 18 p2658 A72-36267

Multipole expansion of sound radiation from moving rigid bodies 18 p2710 A72-36404

The radiation of sound from vibrating composite membranes 18 p2711 A72-36757

Independent moving vibrational /acoustic/ source-induced wave losses during friction of two elastic bodies 18 p2696 A72-36966

Vibration of an infinite thin plate coupled with a fluid 18 p2736 A72-37002

Nature of sound dispersion in a plasma 18 p2717 A72-37178

Short-wave asymptotic representation of the solution to the problem of diffraction by a circular disk 19 p2769 A72-38849

Acoustic and gravity waves nonlinear propagation and structural deformation in isothermal and incompressible atmospheres with traveling wave induction 20 p2915 A72-39011

Acoustic emission; Proceedings of the Symposium, Bal Harbour, Fla., December 7, 8, 1971. 20 p2924 A72-39276

Acoustic emission testing and microcracking processes 20 p2924 A72-39277

Acoustic emission experiments design based on piezoelectric transducer, discussing signal detection and data acquisition methods 20 p2924 A72-39278

Factors affecting acoustic emission response from materials 20 p2924 A72-39279

Dislocation motion as a source of acoustic emission 20 p2924 A72-39280

Correlation analysis techniques to characterize acoustic emission pulses from Mg alloys, obtaining time varying spectra 20 p2924 A72-39281

Crack growth behavior correlation to acoustic emission signal amplitude distribution in high strength steel heat treated to different fracture toughness values 20 p2924 A72-39282

Turbulent combustion induced noise, discussing scaling rules for sound power and directional characteristics of radiated sound 20 p2984 A72-39557

Amplification of acoustic surface waves under transverse magnetic field in coupled intrinsic semiconductor-piezoelectric systems 20 p2960 A72-39703

Acoustic emissions and energy transfer during crack propagation 20 p2981 A72-39925

Experimental investigation of the influence of acoustic oscillations on the evaporation intensity of liquid droplets 20 p2987 A72-40037

Microwave scattering from a radially propagating ion acoustic wave in a positive column 21 p3089 A72-40203

Plane acoustic pressure wave effect on motion of thin elastic truncated conical shell fastened in rigid screen, using Timoshenko theory 21 p3116 A72-40263

Nonexistence of ion acoustic waves and Landau damping driven electrostatically in an ideal Q machine 21 p3090 A72-40348

Alternating magnetic field effect on ionoacoustic oscillations stability of collisionless nonhomogeneous magnetoplasma, examining parametric excitation of Langmuir oscillations 21 p3091 A72-40658

Sound radiation generation by shock wave front in Cs vapors, describing experimental shock tube 21 p3091 A72-40662

Coulomb-collision corrected ion-acoustic linear profiles 21 p3092 A72-40819

Excitation of volume ion-acoustic oscillations in an inhomogeneous dense plasma by the field of an electromagnetic wave 21 p3092 A72-40836

Linear and nonlinear aspects of ion-sound current instability for solar atmosphere conditions of full ionization, noting implications for flare mechanism 21 p3100 A72-41040

Wall temperature, thermal conductivity and acoustic vibration frequency as function of critical heat flux density for unstable water film boiling conditions 21 p3130 A72-41065

Sideband waves excitation by large amplitude ion acoustic waves in collisionless plasma, noting frequency spectrum and growth rate agreement with trapped particles theory 21 p3094 A72-41626

Quasi-static loading of the earth by propagating acoustic waves 22 p3172 A72-42466

Acoustic shock wave diffraction at moving or stationary flat plate immersed in ideal gas 22 p3206 A72-42732

Reflection and transformation of sound waves in a superfluid liquid at a solid boundary 22 p3207 A72-42956

Electromagnetic waves interaction with transverse waves of thin piezoelectric plate in waveguide, noting transformation into acoustic waves 23 p3312 A72-43407

Stationary solitary, snoidal and sinusoidal ion acoustic waves 23 p3320 A72-43520

Electronic devices with Rayleigh ultrasonic acoustic surface wave excitation for storage, recognition and separation of electrical signals usually requiring computerized operation 23 p3314 A72-44148

Acoustical holography with a scanned linear array 24 p3401 A72-44702

Diffraction of an acoustic wave by a stationary plate 24 p3360 A72-44987

A bibliographical survey of acoustic emission 24 p3408 A72-45293

High-frequency instabilities in a plasma with a nonlinear ion-acoustic wave 24 p3429 A72-45489

Effects of pseudosonic and electroacoustic waves on the radiation of a plasma-coated spherical antenna 24 p3386 A72-45642

SOUND-SOUND INTERACTIONS

Lift fan blade interaction discrete frequency noise; discussing potential and viscous interactions relation to rotor-stator spacing 15 p2297 A72-32019

SOUNDERS

U SOUNDING

SOUNDING

NT BALLOON SOUNDING

NT IONOSPHERIC SOUNDING

NT ROCKET SOUNDING

- Mesosphere meteorological sounding by acoustic grenade and pitot probe techniques, investigating seasonal and latitudinal variations
03 p0383 A72-13384
- Spectroscopic sounding of clouds and snow and ice covers from below /earth surface/ and above /space or planet/
16 p2417 A72-33288
- ### OUNDING ROCKETS
- NT SKUA ROCKET VEHICLES
NT SKYLARK ROCKET VEHICLE
- Sounding rockets spin rate sensor, describing apparatus operation and size and weight reduction
01 p0071 A72-11173
- EUV and soft X ray images of sun from sounding rocket experiments
03 p0415 A72-12934
- Motion equations of constrained split fairing for avoiding contamination of sounding rocket payload environment by uncontained explosive actuation device
05 p0724 A72-16102
- Three-axis attitude control and stabilization system for sounding rocket payload, discussing performance from simulation and ground test results
05 p0728 A72-16478
- Sounding rocket programs and balloon implemented upper atmosphere research in Australia
07 p1070 A72-19088
- Sounding rocket radio tracking systems with real time trajectory plotting, developing computer program for exoatmospheric trajectory determination
07 p0939 A72-19089
- Photometer using rotating wedge interference filter as wavelength scanning element near 6300 Å for high altitude sounding rocket application
07 p0985 A72-19403
- Parachute design for very high altitude sounding rockets, discussing stability and descent velocity requirements and test methods
07 p1085 A72-19604
- Attitude reference platforms in ASTRID and DACHS control systems for high altitude research rockets
07 p0990 A72-20283
- High performance sounding rockets design, discussing Skylark propulsion system improvement and new rocket vehicle design for 200 kg payload capability with existing motor hardware
08 p1241 A72-21172
- Sounding rocket payloads environmental testing, discussing test techniques for shock, vibration, temperature, humidity, pressure, contamination, corrosion effects during handling, storage, launch, flight and recovery
08 p1241 A72-21173
- ESRO sounding rockets program survey, discussing launchings in terms of number, vehicle types and sites, member participation, payload integration policy and success rate
10 p1551 A72-24197
- Space environment and astronomical studies with sounding rockets, satellites and orbiting solar observations
10 p1548 A72-24974
- Low cost meteorological sounding rocket evolution, including Arcas, Lokidart and Viper Dart systems for various altitude ranges
10 p1552 A72-25090
- Sounding rocket heat pipe experiment in zero gravity, testing spiral and pedestal arteries and plain groove designs
11 p1739 A72-25204
- [AIAA PAPER 72-259]
Stability criteria for limiting oscillatory motion of coasting sounding rocket exiting atmosphere
13 p2051 A72-28886
- Two stage solid propellant sounding rocket, discussing engine design, operation and tests
13 p2052 A72-29859
- Upper atmosphere research rockets missions, payloads and measurements, describing various international aeronomy research projects
13 p2052 A72-30081
- Equipment for ground and sea recovery of sounding rocket payloads, discussing airbrakes, buoy and parachute assemblies
15 p2319 A72-31690
- Parachute systems and flotation gear used to recover sounding rocket payloads and components after water landings
15 p2320 A72-31691
- Report to COSPAR on Australian space program covering earth atmosphere, cosmic and synchrotron radiation, X ray astronomy, weather satellites, deep space and sounding rockets
15 p2338 A72-32007
- Japanese report to COSPAR on space research by sounding rockets, balloons and SHINSEI scientific satellite
15 p2338 A72-32011
- Report to COSPAR on Argentina space program covering sounding rockets and balloons and Experimental Inter-American Meteorological Network meteorological rocket launchings
15 p2338 A72-32015
- ESRO report to COSPAR on satellites in orbit and under development and on 1971 sounding rocket program
15 p2338 A72-32016
- Sounding rocket experiment on nonlinear interaction between two electron plasma waves and ion acoustic wave in ionosphere to investigate artificial realization feasibility
15 p2331 A72-32333
- Mobile launching facility for high altitude sounding rockets, describing telemetered data recording, radar and optical tracking, range safety and payload recovery equipment
16 p2374 A72-33499
- [DGLR PAPER 72-012]
Reusable two-stage meteorological rocket vehicle, discussing design, performance, second stage recovery technique and cost
17 p2619 A72-34185
- Simulation in plasma wind tunnels of the environmental conditions for sounding rocket experiments
20 p2912 A72-39928
- Ground and flight tests of the Ramzes rocket sonde
21 p3115 A72-41499
- The dynamics of the ascending flight of sounding rockets
22 p3231 A72-42582
- [ONERA, TP NO. 1056]
Sounding rockets for astronomical research, discussing rocket types, payloads, launch sites, advantages over satellites, economic factors and future prospects
22 p3231 A72-42983
- ### SOUTHEAST ASIA
- Plate convergence, transcurent faults, and internal deformation adjacent to Southeast Asia and the Western Pacific.
20 p2917 A72-39479
- ### SOUTHERN HEMISPHERE
- NT ANTARCTIC REGIONS
- French-U.S. Eole meteorological satellite project to map Southern Hemisphere winds, describing system based on pressurized balloons for data acquisition
11 p1680 A72-25813
- Global horizontal sounding technique balloon flights, determining Southern Hemisphere temperate latitude circulation climatology
13 p1988 A72-28443
- Explorer 19 satellite drag evidence for neutral exosphere He concentration asymmetry between Northern and Southern Hemispheres over entire solar activity cycle
15 p2228 A72-31977
- Stratospheric winds and winter warmings in the Southern Hemisphere.
20 p2948 A72-39862
- Satellite-observed Southern Hemisphere cloud vortices in relation to conventional observations.
23 p3285 A72-44145
- ### SOYUZ SPACECRAFT
- Soyuz 9 flight crew physiological data, discussing mental and physical performance and adaptation and readaptation to space-earth environments
01 p0020 A72-10933
- Soyuz manned spacecraft meteorological observations, dealing cloud cover in various climatic zones, atmospheric turbidity and snow cover in mountain areas
02 p0253 A72-11731
- Natural formation interpretation from spectrophotometric measurements of underlying earth surface from manned spacecraft Soyuz 7 and Soyuz 9
02 p0228 A72-11887
- Radiation doses received by cosmonauts in manned Soyuz 3-9 from mission retrieved thermoluminescent glass dosimeters
02 p0168 A72-12075
- [CERN-71-16]
Soviet manned space flight history and characteristics, discussing Vostok, Voskhod and Soyuz vehicles
03 p0440 A72-13475
- Manual orbital control used on Soyuz spacecraft in orbital flight, investigating equations of motion and pilot work load
05 p0725 A72-16438
- Soyuz 5 satellite vehicle space flight factors effect on chlorella cells, investigating survival rates and mutability
05 p0623 A72-16776
- Skylink project as prospective joint American-Soviet space mission, combining Skylab and Soyuz spacecraft
05 p0731 A72-17092
- Design of Salyut manned orbital laboratory combined with Soyuz service module
12 p1876 A72-27107
- Soyuz 9 spectrophotometry of earth surface features, comparing manned spacecraft-obtained and conventional spectrographs
14 p2100 A72-30464
- Design features of Soyuz life support and launch escape systems and Vostok rocket booster stage
23 p3343 A72-44335
- ### SPACE BIOLOGY
- U EXOBIOLOGY
- ### SPACE CAPSULES
- NT ESCAPE CAPSULES
NT MERCURY SPACECRAFT
- ### SPACE CHARGE
- Monograph on electron beam welding covering space charge effect, equipment, metallurgical and mechanical aspects, production engineering, economics and applications
01 p0073 A72-10167
- High efficiency transferred electron microwave oscillators operated in short LSA mode, noting pulse-operated diode power appearance time delay behavior
01 p0036 A72-10634
- Size determination for stationary space charge clouds in streaming media from theoretical model of tanks filled with electrostatically chargeable inflammable fluids
02 p0261 A72-12554
- Gunn effect and associated phenomena, covering semiconductor domain formation and movement, space charge waves and thin samples with dielectric coatings
02 p0270 A72-12889
- Moving plasma beam capture by transverse magnetic field due to polarization space charges electrostatic separation
03 p0396 A72-13657
- Dc flow through p-n junction by modified Melehy force field method, discussing space charge variation in depletion layer
03 p0338 A72-13866
- Space charge recombination in forward biased diffused p-n junction silicon diodes
04 p0562 A72-15127
- Space charge layer /ion sheath/ effects on impedance of lf transmitting electric dipole in ionospheric plasma
04 p0490 A72-15399
- Semiconductor-dielectric system for controlling space charge and valley population redistribution by external field
05 p0702 A72-16201
- High pressure gas lasers excitation, determining energy introduction and space charge stability
05 p0668 A72-16415
- Two dimensional space charge wave propagation in semiconductors with anisotropic small signal mobility, investigating stability
05 p0632 A72-17097
- Separatrix structure and stability of helical Tornado trap magnetic field from electron space charge measurements
06 p0863 A72-18407
- LSA oscillators performance and control optimization, discussing multiaxis radial microwave cavity effectiveness in oscillation starting and coupling to coaxial transmission line
06 p0789 A72-18481
- High power GaAs LSA transmitter oscillator refinements, noting pulsers development to change load and thermal environment frequency stability
06 p0789 A72-18482
- Fast algorithm for space charge layer and semiconductor junction capacitance calculation, applying to impurity profile determination
07 p0954 A72-19120
- Physical parameters of transistor, discussing carrier transfer, space charge and potential drop as function of current and voltage changes
08 p1139 A72-21058
- Reverse biased p-n diffused junction design with two impurities in nonhomogeneous semiconductors, calculating depleted space charge region thickness
08 p1140 A72-21062
- Plasma potential determination near probe by space charge layer reactance observation
09 p1361 A72-22962
- HF thermal noise in single and double injection space charge limited solid state diodes
09 p1288 A72-23124
- Width of space charge layer of reverse-biased p-n junction in p-n-p-n structure effect on current density, mobile charge carriers and constituent transistors gain coefficients
10 p1526 A72-24584
- Space charge limited current theory of thin film organic semiconductor systems, investigating energy spectrum of traps and free carrier capture kinetics
11 p1700 A72-25783
- Signal propagation along homogeneous drifting electron beam focused by strong magnetic field, obtaining phase velocity and space charge density
13 p1914 A72-28373
- Field mill measurement of atmospheric electric space charge density, discussing effects of snow melting and artificial charge sources
13 p1952 A72-29666
- P channel MOS transistors hardening against ionizing radiation based on positive space charge density and electrode injection efficiency
13 p2023 A72-29837
- Nonlinear plasma oscillations effect on electron bunching in microwave devices, noting space charge waves of finite amplitude
14 p2089 A72-31106
- GaAs Gunn diode LSA operation mode in multiloop circuit to extend high frequency limit
15 p2207 A72-31888

Space charge electron flow between parallel conducting walls, developing relativistic method for potential and field distribution time variation

15 p2279 A72-32510

Electron trapping data in neutron irradiated high purity Si, using space charge limited current measurements

15 p2294 A72-32514

Plasma accumulation in electrostatic potential well produced by electron space charges, determining diocotron instability as function of electron plasma and gyrofrequency ratio

16 p2434 A72-32819

Pulsed discharge development mechanism relationship to carbon dioxide laser lasing process, considering positive space charge ion role

16 p2401 A72-33369

Separatrix shape, presence and position and electron lifetime and space charge in helical Tornado trap magnetic field

17 p2588 A72-34857

Propagation and instability characteristics of small signal electro-fluid-mechanical space charge and polarization waves in nonhomogeneous fluids

17 p2542 A72-35612

Plasma potential determination near probe by space charge layer reactance observation

17 p2593 A72-35892

LSA diode relaxation oscillator loading effect on oscillation damping, calculating optimum loading as function of conductance

18 p2667 A72-36690

Electromagnetic and space charge disturbance transmission and reflection at plasma boundary and oblique incidence, discussing isotropic Vlasov plasma

19 p2839 A72-37336

Dynamics of stratified liquids in the presence of space charge.

19 p2788 A72-38432

Interpretation of the preswitching behaviour of chalcogenide-glass switches in terms of a space-charge-injection mechanism.

21 p3034 A72-41466

Influence of a surface space charge on certain photoelectric properties of p-type gallium arsenide

21 p3098 A72-41684

Impedance of a unipolar semiconductor diode under conditions of space-charge limited current with allowance for recombination

23 p3270 A72-43630

Negative resistance, transit time and limited space charge accumulation modes of semiconductor devices operation with electron transitions

23 p3272 A72-44138

The negative space-charge density distribution and the potential distribution in a Penning discharge cell

23 p3324 A72-44211

The ionization of caesium vapour by the method of space charge amplification.

23 p3316 A72-44344

SPACE COMMUNICATION

NT LUNAR COMMUNICATION

NT REENTRY COMMUNICATION

NT SPACECRAFT COMMUNICATION

Convolutional coding, Viterbi decoding and binary phase shift keyed modulation for reliable communication on power limited satellite and space channels

01 p0026 A72-10342

Educational satellites - Conference, Nice, France, May 1971, covering space communication, TV, performance, data handling, economics, etc

01 p0147 A72-11277

Extraterrestrial life and civilization possibility in other planetary systems in universe, suggesting communication by hydrogen line frequency low harmonics

02 p0276 A72-11642

Multichannel space station communications using PCM-PSK-PM interplex modulation for reducing cross modulation loss

02 p0174 A72-12131

High data rate convolutional coding for space station telemetry links, considering sequential and cascaded Viterbi decoding

02 p0174 A72-12132

International frequency allocation table revision by World Administrative Radio Conference for Space Telecommunications

02 p0177 A72-12385

Frequency sharing criteria for terrestrial and space services, showing improved radio spectrum utilization and permissible interference

02 p0178 A72-12388

Book on global communication law covering maritime transport, civil aviation, radio, space communication postal services, international cooperation, etc

02 p0305 A72-12575

Book on radio wave propagation covering ground, tropospheric and ionospheric waves, atmospheric and cosmic noise, reflection, attenuation, signal distortion, space communication, etc

04 p0487 A72-15269

Millimeter wave and laser space-to-space communication links comparison, considering chf system based

on size, weight, power consumption and communication parameters calculations

04 p0493 A72-15609

Geodetic determination of geoid shape by computerized laser-effect space telemetry ground stations

04 p0495 A72-15724

Space real time data links during processing of French D2 scientific satellite for hydrogen frequency bands investigation

05 p0628 A72-16447

Noise parameters of space communication systems ground receiving antennas, considering noise effects on gain and radiation patterns

06 p0783 A72-17499

Wideband laser communication for space applications, comparing carbon dioxide and Nd-YAG systems on basis of SNR

07 p0941 A72-19239

Concatenated coded command system for low error probabilities at moderate SNR, emphasizing spaceborne portions implementation

07 p0949 A72-19299

International space communication systems legal and operational aspects, discussing Intelsat and Intersputnik systems

07 p1104 A72-19470

Space communication application for information, education and cultural exchange, noting need for international cooperation

07 p1104 A72-19473

International cooperation in space law problems, considering space communication systems, geostationary orbits use, frequency band allocation, world weather watch and earth resources survey programs

07 p1105 A72-19475

Laser communication systems for terrestrial and space data transmission, discussing line-of-sight requirements and atmospheric effects

07 p0947 A72-20225

Layer-like atmosphere discontinuities effects on earth-space communications, noting electromagnetic waves alteration and reflection by grazing incidence

09 p1279 A72-22898

Auto and cross correlation functions of combined binary pseudorandom sequences in digital space communication systems

10 p1439 A72-24907

Trojan deep space communications systems, maintaining powerful relay satellites in equilibrium at Lagrangian points of earth, Mars and Venus orbits

10 p1548 A72-24975

NASA program for acquisition, analysis and dissemination of space propagation and interference data for space systems designers, operators and regulatory agencies

[AIAA PAPER 72-577]

13 p1918 A72-28985

Limitations of technological state-of-the-art with satellite and space communications above 10 GHz.

19 p2765 A72-37940

Book - Eleventh report by the International Telecommunication Union on telecommunication and the peaceful uses of outer space.

20 p2988 A72-39025

Low noise microwave parametric amplifier design for space communication receivers, using inverted diode balanced mixers

21 p3025 A72-40304

The 20 and 30 GHz communications system for the ATS-F millimeter wave experiment.

21 p3019 A72-40882

Linguistic message decoding algorithms for communication with extraterrestrial intelligences, considering unified procedure and key problems solutions

24 p3382 A72-45226

SPACE DEBRIS

Daily mean amount of cosmic matter falling on earth

09 p1389 A72-23195

SPACE DENSITY

Cosmological density fluctuations in hadron stage, examining relativistic free particle and high temperature hadron gas models

03 p0426 A72-13273

Vlasov equation phase space boundary integration for evolution of one dimensional self gravitating collisionless stellar systems with constant density

05 p0714 A72-16056

Collective relaxation of two phase space density collisionless one dimensional self gravitating stellar systems, following boundary curve motion

05 p0714 A72-16057

Four phase space density collisionless one dimensional stellar system evolution in time by following motion of boundary curves

06 p0876 A72-17577

Space densities and time scales of Seyfert galaxies, radio galaxies and quasi-stellar objects

10 p1534 A72-23905

Rapid perturbation growth conditions for expanding universe, discussing background density decrease with time

10 p1543 A72-24661

One and two boundary curves systems for Vlasov equation of one dimensional collisionless self gravitating

stellar systems evolution with constant phase space density

12 p1874 A72-27911

Boundary curves for collective relaxation in one dimensional collisionless two phase space density self gravitating stellar system evolution, noting velocity dispersions dependence

12 p1875 A72-27911

Intercloud atomic H gas density distribution from 21 cm line width variations with galactic longitude

19 p2867 A72-38511

Fluid sphere of uniform density and vanishing pressure at periphery, expressing internal motion in terms of Schwarzschild mass and radius and central pressure

22 p3205 A72-42453

On irrotational Bianchi-type universes in the Brans-Dicke cosmology.

23 p3314 A72-44311

SPACE DETECTION AND TRACKING SYSTEM

Hybrid carrier and modulation tracking loops exploiting sideband coherency for phase coherent tracking, telemetry and command system performance improvements

07 p0939 A72-19066

SPACE DIVERSITY

U RECEPTION DIVERSITY

SPACE ELECTRIC ROCKET TESTS

Aerospace reliability methods, discussing distribution functions, sampling, accelerated life testing and case histories of space electric rocket and microthruster power conditioner tests

04 p0526 A72-14444

Space simulation facility for one year SERT 2 mercury ion thruster testing, discussing cryogenic operation and electrical and thermal insulation

[AIAA PAPER 72-430]

11 p1613 A72-26177

SPACE ENVIRONMENT

U AEROSPACE ENVIRONMENTS

SPACE ENVIRONMENT SIMULATION

NT WEIGHTLESSNESS SIMULATION

Silica based surface insulation material for space shuttle thermal protection system, discussing cyclic tests in simulated environment and fiber purity effects on crystallization

01 p0091 A72-10766

Microbial survivability in deep space environmental simulation experiments, describing aerospace ecology and panspermia avoidance

01 p0019 A72-10833

Multiprogrammed digital computer controlled acquisition and processing of quasi-static analog transmitter data during spacecraft environmental simulation tests

02 p0200 A72-12477

Space environment simulator with ultrahigh vacuum chamber and UV and corpuscular radiation for material samples physical properties in-situ measurement

02 p0201 A72-12704

Polymer fractionation in simulated Jovian atmosphere according to molecular weight, suggesting substance responsible for red color

04 p0572 A72-14777

AEROS aeronomy satellite solar cell array power supply system simulation tests under space conditions

04 p0466 A72-15654

Laboratory ionization chamber measurement of ion chemistry and production rates from partial simulation of disturbed nighttime ionosphere at 300 K

09 p1275 A72-22366

Thermal nodal analysis of spacecraft hull-canister model from space simulation test, using least squares estimation and regression analysis

09 p1412 A72-23498

Micrometeoroid simulation by accelerated microparticles bombardment of metal targets, discussing energy partition as function of impact velocity

09 p1409 A72-23666

ATS specular thermal control louver system performance in simulated solar vacuum environment as function of sun and blade angle, noting white paint effect

[AIAA PAPER 72-268]

11 p1740 A72-25209

Laboratory irradiation tests with van de Graaff generator for simulation of spacecraft component radiation damage due to high energy space protons and electrons

12 p1863 A72-27551

Solar cell array tests for high intensity application up to 0.3 AU from sun under simulated space environment

12 p1758 A72-28031

Prevention of weightlessness effects on blood hydrostatic pressure, musculoskeletal system and sensorimotor performance, discussing space flight training and space environment simulation tests

13 p1909 A72-28781

Amitetrayite /biological protectant/ effect on natural immunity state of dogs exposed to chronic gamma irradiation simulating space flight environment

14 p2074 A72-30388

Russian book on thermal simulation of spacecraft and space environment covering heat transfer, cosmic

radiation, vacuum chambers, radiant flux simulators, etc

15 p2319 A72-31275

Spacecraft thermal control materials research, discussing surface selection, coatings, space simulation and environmental effects

15 p2260 A72-31806

Solar wind and planetary atmosphere interaction observation by simulation of ionization mechanism in comet, using gun produced plasma stream and gas cloud

15 p2301 A72-32341

Space simulation shrouds cryogenically cooled with liquid carbon dioxide, discussing automatic temperature control and operating cost savings

15 p2214 A72-32611

Experimental motion sickness studies in slow rotation room simulating rotating spacecraft conditions, noting relation between subject susceptibility and number of head motions

16 p2354 A72-33542

German book on vacuum technology covering theory, measurement techniques and applications in nuclear physics research facilities, electronic tubes, space environment simulation, mass transfer, etc

18 p2709 A72-36250

Space environment simulation and testing techniques, considering vacuum systems, low temperature, solar radiation and motion simulation

18 p2676 A72-36833

Survival of common terrestrial microorganisms under simulated Jovian conditions.

19 p2755 A72-37721

Thermal control techniques used in space simulation laboratory testing.

22 p3164 A72-42997

SPACE ENVIRONMENTAL LUBRICATION

U SPACECRAFT LUBRICATION

SPACE ERECTABLE STRUCTURES

NT BEACON SATELLITES

ESRO satellite power supply solar paddles deployment mechanism, describing simulated zero gravity tests

[DGLR PAPER 71-112] 02 p0286 A72-12713

Integral and modular space stations objectives, construction and utilization for astronomy, scientific experiments and technology

03 p0441 A72-14308

Spin stabilized satellites attitude dynamics during rigid booms extension, deriving equations of motion approximate solution

11 p1726 A72-25915

Flexible rolled-up solar array /FRUSA/ operational performance from spaceborne accelerometers, strain gages and temperature sensors telemetered data, noting damage-free extension-retraction exercises

[AIAA PAPER 72-510] 13 p2051 A72-28952

Spacecraft boom deployment dynamics environmental simulation and testing for preflight system reliability evaluation

15 p2321 A72-32627

SPACE EXPLORATION

NT VIKING MARS PROGRAM

Book on earth, moon and planet space photography, discussing synoptic meteorological data, mapping, surface detail inspection and planetary exploration

03 p0438 A72-14099

Extraterrestrial life on Mars and Venus and Jupiter atmospheres, discussing abiogenesis failures on life-supportable planets

04 p0471 A72-14805

Exobiology research objectives, discussing planetary exploration data on origin, nature and distribution of life, spacecraft contamination, manned and unmanned missions and specific mission targets

05 p0714 A72-16133

Anthropomorphic robots design and performance for space exploration

05 p0644 A72-16448

Automatic craft for planet surface exploration, classifying propulsion gear

05 p0644 A72-16449

Soviet book on space exploration in U.S.S.R. covering Elektron, Proton and Cosmos research satellites, communication and meteorological satellites, lunar and manned spacecraft, etc

06 p0879 A72-17815

Future deep space missions, discussing exploration of interplanetary conditions outside ecliptic plane and solar system Grand Tour with outer planets flyby

07 p1068 A72-19059

Limitations on principle of freedom of exploration and use in space treaty, discussing meaning and implications of benefit and interests terms

07 p1103 A72-19458

Legal status of outer space, defining human activities in space

07 p1104 A72-19465

UN agencies role in communication satellites technology exploitation, discussing international cooperation in outer space peaceful use and exploration and development of space law

07 p1074 A72-19468

Image tube, film and mechanical scan camera imaging systems comparison for spacecraft-borne planetary photography based on maximum data return at acceptable cost

08 p1170 A72-21964

Soviet book on radiation hazards and protection in space covering detection, radiobiology and effects on human organism

11 p1713 A72-26050

Solar electric propulsion upper stage for multiple space exploration missions, discussing spacecraft performance, configurations and program plans

[AIAA PAPER 72-464] 11 p1709 A72-26199

Optical and electronic imaging systems optimization for solar system exploration, discussing effects on public support for national funding

12 p1807 A72-27346

International cooperation in space operations and exploration - AAS Conference, Washington, D.C., March 1971

14 p2175 A72-31135

NASA space plans for 1970s including lunar, planetary and universe explorations, cost reduction, human living and working capability, technology applications and international cooperation

14 p2162 A72-31136

U.S.-U.S.S.R. space cooperation, considering Eisenhower and Kennedy initiatives, NASA-Soviet Academy negotiations and current situation

14 p2176 A72-31145

Economic analysis of satellite network construction program, suggesting Italian national center formation for space exploration

15 p2319 A72-31231

Mars and Venus automatic station data transmission systems for surface and atmosphere studies, discussing relay and direct transmission modes

15 p2203 A72-31823

Report to COSPAR on 1971 Soviet space programs, discussing moon, planets, cosmic radiation, interplanetary medium, magnetosphere, upper atmosphere, meteorological, orbital station and biomedical studies

15 p2337 A72-32002

Report to COSPAR on U.S. space program covering stellar astronomy, lunar and planetary research upper atmospheric physics, earth and life sciences, etc

15 p2337 A72-32006

High accuracy approach guidance system for outer planet exploration.

[AIAA PAPER 72-867] 20 p2951 A72-39132

ESOC Darmstadt - ESRO's European center of operations for space exploration

20 p2988 A72-39415

Russian book - Equipment for space studies.

21 p3014 A72-40301

Spacecraft and missions for Jupiter exploration, discussing launch vehicle requirements, solar electric propulsion for midcourse correction, Pioneer flyby and orbiter missions, TOPS mission, etc

21 p3103 A72-40457

Data link design for planetary video data transmission back to earth based on rate distortion theory generalization of information theory

21 p3019 A72-40891

'Mars-2,' 'Mars-3' observatories exploring the 'red' planet.

21 p3109 A72-41318

Mariner spacecraft 1973 for flyby Venus and encounter Mercury, discussing launch and arrival conditions and aiming zones selection to maximize science return

[AIAA PAPER 72-942] 21 p3113 A72-41578

Flyby missions to comets, asteroids and meteors for obtaining solar system geological information, considering space dynamics feasibility

23 p3340 A72-44351

Two early missions to comets in 1977-1980 as precursors to more ambitious missions in 1984-1986, discussing exploration objectives and spacecraft configurations

23 p3340 A72-44352

Viking Mars exploration project, discussing orbiter and lander design and operational features and scientific experiments relevant to existence of life

24 p3440 A72-45123

NASA space science, exploration and applications plans and policies in view of space shuttle capabilities, emphasizing cost reduction

24 p3440 A72-45162

Comparative merits of manned and unmanned /automated/ space exploration, considering lunar observations, earth orbiting space stations and interplanetary missions

24 p3441 A72-45220

Potential contributions of the United States space program to exploration of the solar system.

24 p3445 A72-45467

The results of Soviet research into Mars.

24 p3447 A72-45559

SPACE FLIGHT

NT APOLLO FLIGHTS

NT HYPERBOLIC REENTRY

NT HYPERSONIC REENTRY

NT INTERPLANETARY FLIGHT

NT INTERSTELLAR TRAVEL

NT MANNED REENTRY

NT MANNED SPACE FLIGHT

NT MERCURY FLIGHTS

NT RETURN TO EARTH SPACE FLIGHT

NT SPACECRAFT REENTRY

NT VIKING MARS PROGRAM

Space flight biological effects on lysogenic bacteria and human cells in culture

01 p0011 A72-10365

Effective dose change after repeated radiation exposures as function of time intervals between fractions, evaluating space flight radiation hazards

[CERN-71-16] 02 p0161 A72-12059

Azur satellite flight data evaluation of thermal behavior, measuring temperature with thermistors

05 p0746 A72-16139

Dynamic system optimal design with various degrees of maneuver parameters information, considering space flight mechanics problem of payload maximization for limited propulsive power

06 p0849 A72-18306

Space flight experience application to human factors engineering problems in air and maritime navigation, considering use of small digital computers, display and sensing devices

09 p1348 A72-22785

Bioastronautic results of Apollo space flight biomedical operations, discussing weightlessness, sleep impairment, motion sickness, preventive medicine, etc

15 p2189 A72-31827

Medical investigations during Salut space station flight, discussing weightlessness effects and efficiency evaluation of preventive measures for crewmembers high performance in space flight

15 p2189 A72-31918

Book on man machine system experiments covering ATC, air defense, logistics organizations, space flight, battlefield operation, police dispatching, communications, etc

16 p2359 A72-33796

SPACE FLIGHT FEEDING

Apollo 14 food system, describing new items, improvements in production methods, packaging and preparation with emphasis on rehydratable foods

02 p0166 A72-11706

Biochemical and physiological effects of Apollo flight diet, noting no significant variations in serum electrolytes, endocrine values, body fluids and hematologic parameters

02 p0167 A72-11707

Menu selection for SKYLAB astronauts by computer technique based on mixed integer programming code, using measure of pleasure lists

12 p1769 A72-27442

Synthetic carbohydrates toxicity effects on rat liver lysosomes application to astronaut potential food sources

14 p2074 A72-30381

Dihydroxyacetone /DHA/ as nutrient in growing rats diet, showing unsuitability of regenerated DHA-containing formose mixtures for space crew diets

16 p2354 A72-33371

Biochemical and physiological evaluation of nourishment of subjects feeding on dehydrated products in test chamber with regenerative life support system, discussing metabolic data and hormone function

24 p3375 A72-45128

Spacecraft food synthesis, using carbon dioxide and water from chemically regenerated human metabolic and waste products

24 p3376 A72-45277

SPACE FLIGHT STRESS

Soviet book on astronaut activity psychological features covering space flight living conditions, space and time perception psychophysiological mechanism changes and weightlessness effects

03 p0317 A72-14246

Optimum duration of human circadian cycle with respect to energy cost during work hours, relating normal cycle change to prolonged space mission stresses

05 p0619 A72-16639

Space flight effects on chlorella cell survival and mutability in Zond automatic stations

05 p0623 A72-16775

Chromosome aberrations and germination speedup in Soyuz 5 carried oat seeds, noting stimulating effect by preflight ethylenimine treatment

05 p0623 A72-16777

Medicobiological investigations of prolonged weightlessness effects on astronaut physiological system based on Soyuz flight program

10 p1425 A72-24409

Space flight ecology and physiology, discussing atmospheric temperatures and radiation, biological effects of acceleration, deceleration and weightlessness and physiological stresses

11 p1584 A72-26018

Russian book on pathophysiological principles of air and space pharmacology covering stress and fatigue reduction and pilots and astronauts performance improvement

12 p1772 A72-27926

- Red cell mass plasma volume decrease in Apollo mission crews, indicating erythropoiesis inhibition 12 p1765 A72-28266
- Integrated medical and behavioral laboratory for detection and measurement of space flight stresses, specific etiologies and human tolerances and adaptivity 12 p1796 A72-28279
- Russian book on functional morphology under extremal space flight conditions covering overloads, hypoxia and hyperoxia effects on organism and cellular structure and metabolism 14 p2077 A72-30996
- Technology R and D program to qualify man for long term weightlessness, assessing space flight stress effects on physiology and psychology 16 p2358 A72-33544
- Social and emotional crises with respect to isolation, confinement and group dynamics of astronaut crews during long duration space flight 16 p2354 A72-33545
- Long term space flight weightlessness and hypodynamic effects on orthostatic and vestibular tolerances, infection susceptibility and drug reactivity 16 p2355 A72-33550
- Sleep factors and limitations during prolonged space flights, considering weightlessness, hypokinesia, nervous tension, cabin confinement, rhythm, environment and noise effects 16 p2356 A72-33561
- Space flight effects on chlorella cell survival and mutability in Zond automatic stations 17 p2504 A72-35278
- Soyuz 5 satellite vehicle space flight factors effect on chlorella cells, investigating survival rates and mutability 17 p2505 A72-35279
- Chromosome aberrations and germination speedup in Soyuz 5 carried barley seeds, noting stimulating effect by preflight ethylenimine treatment 17 p2505 A72-35280
- Problem of artificial gravitation in terms of experimental physiology 21 p3006 A72-40441
- Psychological principles of active rest during long space flights 21 p3006 A72-40446
- Psychic adaptation of man to a long-duration stay in space 22 p3149 A72-41988
- The prediction of the condition of man during a space flight 22 p3149 A72-42067
- The effect of space flight conditions and prolonged hypokinesia on the kidney function in man 22 p3149 A72-42068
- Motor activity capability of an astronaut in flight 22 p3149 A72-42220
- Effects of the space flight environment on man's immune system. I - Serum proteins and immunoglobulins. 22 p3150 A72-42493
- Effects of weightlessness on astronauts - A summary. 23 p3253 A72-43385
- Effects of an 18-day flight on the human body. 23 p3253 A72-43386
- Studies on weightlessness in a primate in the Biosatellite 3 experiment. 23 p3253 A72-43388
- Human organism and space flight stress endurance limits and manned space mission rescue capabilities requirements, considering cabin decompression, anoxia, radiation, onboard illness, etc 24 p3376 A72-45218
- ### SPACE FLIGHT TRAINING
- Prevention of weightlessness effects on blood hydrostatic pressure, musculoskeletal system and sensorimotor performance, discussing space flight training and space environment simulation tests 13 p1909 A72-28787
- ### SPACE GLIDERS
- ### U LIFTING REENTRY VEHICLES
- ### SPACE LABORATORIES
- NT MANNED ORBITAL LABORATORIES
- NT MANNED ORBITAL RESEARCH LABORATORIES
- Nonlinear and digital synthesis of computerized optimal control systems for long-life orbital stations and laboratories 05 p0724 A72-16434
- Orbiting space laboratories for earth resources program, discussing satellites and Skylab missions and international cooperation [AIAA PAPER 72-741] 18 p2742 A72-36547
- ### SPACE LAW
- Space law existence, contents and legal sources, discussing international decisions on outer space and celestial bodies use 01 p0147 A72-11108
- Committee organization and international law concepts on outer-space peaceful uses, detailing Ukrainian delegation position 05 p0752 A72-16203
- United Nations international space law development, discussing concepts of state jurisdiction, territorial sovereignty, damage liability, etc 06 p0905 A72-17814
- Space law - IAF Conference, Konstanz, West Germany, October 1970 07 p1102 A72-19452
- United Nations activities in space law, discussing creation of Committee on Peaceful Uses of Outer Space 07 p1102 A72-19453
- United Nations role as center of international cooperation in space law norms elaboration 07 p1102 A72-19454
- Structure and organization of UN bodies concerned with space activities, discussing legal contribution 07 p1102 A72-19455
- International space agency necessity, discussing registry of space objects, claims settlement, cooperation and space rescue 07 p1103 A72-19456
- Space treaties, discussing factors of UN contribution success 07 p1103 A72-19457
- Limitations on principle of freedom of exploration and use in space treaty, discussing meaning and implications of benefit and interests terms 07 p1103 A72-19458
- Liability for space activities, considering international organizations status before international tribunals 07 p1103 A72-19459
- Liability for damage caused by space objects, noting UN resolution 07 p1103 A72-19460
- Legal aspects of international manned orbiting laboratories, discussing space objects registry and liability for damage 07 p1103 A72-19461
- Manned orbital laboratories within framework of space treaty 07 p1103 A72-19462
- UN registry of space vehicles, reviewing historical development of registration procedures in U.S. and U.S.S.R. 07 p1103 A72-19463
- United Nations proposals concerning legal principles for use of natural resources of celestial bodies and ocean floor 07 p1103 A72-19464
- Legal status of outer space, defining human activities in space 07 p1104 A72-19465
- Space and atmosphere contamination by industrial wastes, aircraft and spacecraft exhaust and radioactive waste disposal, considering legal safeguards 07 p1104 A72-19466
- UN agencies role in communication satellites technology exploitation, discussing international cooperation in outer space peaceful use and exploration and development of space law 07 p1074 A72-19468
- European space organization with scientific and technological research objectives, noting jurisdictional status 07 p1105 A72-19474
- International cooperation in space law problems, considering space communication systems, geostationary orbits use, frequency band allocation, world weather watch and earth resources survey programs 07 p1105 A72-19475
- Conventions on international responsibility for damage caused by space objects, studying UN juridical subcommittee resolution 08 p1255 A72-21076
- Book - Law and politics in outer space: A bibliography. 21 p3132 A72-41535
- Government, military safety, police permission and insurance regulations for European rocket activities 24 p3467 A72-45124
- ### SPACE MAINTENANCE
- Human role in space shuttle on-orbit maintenance vs space station modules earth return, considering feasibility and cost effectiveness 10 p1487 A72-24440
- Space maintainability experiment aboard subsatellite during 30 day drift mission, noting application to Skylab manpower distribution [AIAA PAPER 72-232] 10 p1431 A72-24442
- Design considerations and reliability analysis for long duration manned space missions, noting redundancy and inflight maintenance requirement [AIAA PAPER 72-239] 10 p1487 A72-24446
- Space tools and support equipment for earth orbital systems maintenance, replacement and repair, discussing Skylab requirements and teleoperator applications [AIAA PAPER 72-230] 10 p1488 A72-25049
- In orbit servicing of spacecraft. [AIAA PAPER 72-731] 18 p2730 A72-36543
- Man serviced spacecraft systems reliability and maintainability optimization methodology, developing parametric data based on failure modes analysis, components MTBF, duty cycles, redundancy and costs [SAWE PAPER 943] 23 p3343 A72-43483
- ### SPACE MANUFACTURING
- Extraterrestrial environment utilization, describing space power plants, manufacturing operations in earth orbit and planetary mineral resources 12 p1871 A72-27625
- High temperature and vacuum solar furnace processing of refractory metals in space or on moon 19 p2857 A72-37675
- Environmental characteristics and advantages of manufacturing in space, considering gravity, vacuum, temperature, pressure and radiation effects on materials and products processing 21 p3060 A72-40968
- New space processing experiments for the Skylab missions. 24 p3407 A72-45125
- Investigation of the possibility of using radiant solar energy for welding and soldering of materials 24 p3407 A72-45126
- Immiscible materials processing experiments in near weightlessness environments during Apollo 14 mission and on NASA short duration low gravity test facilities 24 p3407 A72-45155
- Laser spin melting experiments for glass production in space from high melting metal and rare earth oxide ceramics 24 p3417 A72-45156
- Economic materials processing in orbiting spacecraft under zero gravity conditions, emphasizing single crystal electronic materials and high purity biologicals 24 p3407 A72-45157
- ### SPACE MECHANICS
- NT ASTRODYNAMICS
- NT CELESTIAL MECHANICS
- NT KEPLER LAWS
- NT ORBITAL MECHANICS
- ### SPACE MISSIONS
- Nuclear gas core and fusion rocket engines performance potential for various space missions, comparing capabilities in terms of payload ratio 01 p0099 A72-11328
- Nuclear radiation interference and damage effects in galactic and solar cosmic ray measurements during charged particle experiments by deep space missions. 03 p0438 A72-1408-
- Future deep space missions, discussing exploration of interplanetary conditions outside ecliptic plane and solar system Grand Tour with outer planets flyby 07 p1068 A72-19054
- Manned space flight escape, rescue and survival systems based on onboard, prepositioned aid and earth launched concepts, considering earth orbit, lunar and interplanetary missions 09 p1395 A72-23151
- International standardization of manned spacecraft components for rescue efforts and joint multinational space missions 09 p1395 A72-23154
- Lunar landing mission escape and rescue concepts, considering emergencies during earth orbit, translunar, lunar orbit, surface and rendezvous, transearth and earth reentry phases 09 p1396 A72-23157
- Trajectory optimization for low thrust mission and system analysis, exemplifying by Jupiter flyby and comet rendezvous missions 11 p1721 A72-26171
- Multimission and engine performance requirements for solar electric spacecraft propulsion stage configurations, considering launch vehicle compatibility integration payload and environmental extreme effects [AIAA PAPER 72-465] 11 p1712 A72-26325
- Space Shuttle supported manned earth orbital laboratories for operational communication and navigation systems, discussing mission program, design and equipment [AIAA PAPER 72-533] 12 p1876 A72-27357
- Solar electric multimission spacecraft /SEMMS/ concept, investigating Mariner, Viking and TOPS technologies applicability to postulated mission/science objectives [AIAA PAPER 72-469] 13 p2026 A72-28946
- Second generation European multi-mission launcher system for scientific and application satellites, using high energy propulsion modular design 15 p2320 A72-31804
- Deep space navigation requirements for interplanetary missions /1978-1990/ 15 p2269 A72-32178
- International space cooperation, emphasizing arrangements and prospects between U.S. and U.S.S.R. [AIAA PAPER 72-740] 18 p2743 A72-36549
- German Aros satellite mission and payload, noting mass spectrograph, EUV spectrometer for UV solar radiation and neutral particles temperature measuring instrument 20 p2974 A72-39935
- An integrated medical system for long-duration space missions. 21 p3009 A72-41305

Two early missions to comets in 1977-1980 as precursors to more ambitious missions in 1984-1986, discussing exploration objectives and spacecraft configurations

23 p3340 A72-44352

SPACE NAVIGATION

NT INTERPLANETARY NAVIGATION

Apollo spacecraft guidance and control systems, reviewing navigation objectives, concepts and performances during cislunar, rendezvous and landing maneuver phases

01 p0097 A72-10943

Soviet book on electro-optical devices for space vehicles orientation and navigation covering vertical plotters and sun, planet and star trackers

02 p0256 A72-12125

Nighttime airglow layer effect application to autonomous navigation and orientation of piloted space vehicles

02 p0256 A72-12289

Soviet book on space navigation covering dimensional spaces, navigation functions, relativistic phenomena, position finding, motion parameters, statistical methods, etc

02 p0256 A72-12297

Kalman filter divergence due to errors, applying to orbital navigation

02 p0198 A72-12805

Book on orbit determination, space navigation and celestial mechanics covering two body problem integration, units and constants, perturbation theory, orbit correction, etc

05 p0712 A72-15862

Optimal linear filtering for unmodeled time correlated driving disturbances of forcing function, applying to space navigation

05 p0685 A72-16461

Spacecraft, aircraft and ship navigation by satellites, noting Navy Navigation Satellite System

05 p0687 A72-16747

Iterative process convergence in least squares and maximum likelihood methods of processing measurements in spacecraft trajectory control, space navigation and geodesy systems

05 p0633 A72-16761

Spacecraft planetary approach navigation with TV camera onboard Mariner 9 giving images of Mars natural satellites against star background, discussing optical data processing programs

07 p1032 A72-18946

Outer planets Grand Tour trajectory correction requirements, examining combined radio/onboard navigation system and delta V estimates

07 p1068 A72-18947

Nonoptimality of Lawden spiral for minimum fuel transfer orbits in space navigation

07 p1033 A72-20246

Nighttime airglow layer effect application to autonomous navigation and orientation of piloted space vehicles

10 p1508 A72-23758

Space navigation - Conference, Orlando, Florida, March 1972

15 p2269 A72-32176

Low thrust spacecraft navigation requirements for minimum propellant guidance, using neighboring external law

15 p2270 A72-32194

Recursive filtering techniques in space navigation, describing initialization procedure to account for state vector errors correlation

17 p2532 A72-34214

Iterative process convergence in least squares and maximum likelihood methods of processing measurements in spacecraft trajectory control, space navigation and geodesy systems

17 p2523 A72-35264

Spectral factorization in periodically time-varying systems and application to navigation problems

17 p2578 A72-35492

Enlarging the region of convergence of Kalman filters that encounter nonlinear elongation of measured range

20 p2907 A72-39121

An adaptive technique for a redundant-sensor navigation system

20 p2952 A72-39134

Russian book - Algorithms for calculation of navigation data on spacecraft position

21 p3103 A72-40460

Analytical assessment of the accuracy of autonomous space navigation from measurements of the flight altitude and zenithal distance of one reference star

22 p3202 A72-42222

An attitude reference system with discrete-correction capability

22 p3203 A72-42864

Viewing Phobos and Deimos for navigating Mariner 9

24 p3423 A72-45433

[AIAA PAPER 72-927]

SPACE ORIENTATION

Psychophysical perceived orientation experiments on Poggendorff illusion (transversal interrupted by parallel lines)

01 p0013 A72-10717

Dust grain orientation parameter from Fokker-Planck equation, considering magnetic relaxation time, nearly spherical grains and oblate spheroids

02 p0283 A72-12627

Earth bow shock nonuniform structure observation correlation with interplanetary field orientation, using Explorer 33 and 35 data

11 p1722 A72-26395

Hypergravity effects on bats spatial orientation, noting resistance to head-pelvis and pelvis-head accelerations

13 p1907 A72-30015

Optical sensors for spacecraft attitude determination, discussing operation principles based on solar radiation, albedo, IR contrast and stellar radiation detection

16 p2389 A72-32849

Control simulation models of three dimensional joint angle motions, including circle, ellipse and straight line trajectories and orientations in space

22 p3162 A72-42187

SPACE PERCEPTION

NT AUTOKINESIS

Object size erroneous perception by apparent distance alteration

01 p0012 A72-10478

Neuronal mechanisms of binocular vision and space perception from tests on cats and men, discussing neurophysiological models of stereopsis

01 p0012 A72-10479

Stereopsis spring coupled magnetic dipole model of binocular stereoscopic depth perception in man

01 p0012 A72-10480

Poggendorff illusion depth processing theory, noting noncollinear line resolution effects on projective relationships within figure

01 p0013 A72-10714

Contrast reversal or distance paradox in temperature perception aftereffect

01 p0013 A72-10716

Position constancy and motion perception tests of head movement feedback calibration of perceived direction of optical motions

01 p0013 A72-10719

Perspective effects on direction of rotation judgments, using figures with rectangular and trapezoidal contours

02 p0167 A72-11898

Stereoscopic depth movement perception sensitivity compared to monocular movement

02 p0169 A72-12209

Classical optical measurement and holographic methods of flow field visualization, discussing operating principles, measurement sensitivity, three dimensional and depth-focusing properties

02 p0230 A72-12300

Binocular depth perception based on two retinal images spatial frequency content

02 p0164 A72-12486

Soviet book on astronaut activity psychological features covering space flight living conditions, space and time perception psychophysiological mechanism changes and weightlessness effects

03 p0317 A72-14246

Successive visual motion illusion during perception of rotating kymograph drum by human eye

04 p0476 A72-15588

Pilot perception tests on estimating flight path inclination, ground image and touchdown time under poor visibility

05 p0684 A72-16180

Geometric central projection properties of optical illusions, including Muller-Lyer, Zollner and Hering configurations

05 p0689 A72-16194

Oculomotor accommodation and convergence as distance perception cues, showing size perception change relation to glasses adaptation

06 p0765 A72-17411

Perceived common rotary motion of ambiguous stimuli as criterion of perceptual grouping

06 p0765 A72-17413

Oculomotor cue-based distance perception, discussing glasses adaptation-caused accommodation and convergence changes in stereoscopic depth perception

06 p0765 A72-17414

Recognition algorithms of moving objects for patterns alone and in symbolic and motion context, indicating possible recognition mechanism degradation

06 p0780 A72-18257

Visual space geometry and perception experiments, demonstrating size-distance relations for various visual cues

07 p0926 A72-19031

Counteradaptation and cue discrepancy as perceptual adaptation basis, considering changes in registered and apparent distance of luminous object moving in dark

08 p1115 A72-20988

Adjustment to subjective horizontal, vertical and 45 deg tilt in dark as function of age in 3-20 year old subjects

08 p1124 A72-20989

Stereoscopic acuity for photometrically matched background wavelengths at scotopic and photopic levels, plotting variable depth error as function of retinal illuminance

10 p1425 A72-24269

Natural visual capture result of vision and touch conflict in bilateral comparisons of object length

10 p1430 A72-24270

Character recognition experiments to determine attention control and temporal-spatial capacity limitation during visual information processing

12 p1768 A72-27074

Slant range visibility measurements by lidar for aircraft landing operations under low clouds and fog at coastal region

13 p1992 A72-28847

Individual differences in motion-in-depth detection from Lissajous pattern test for judgment of object approach, receding and movement rate

14 p2081 A72-30965

Airplane attitude display motion relationship to external world as factor in pilot error due to visual frame of reference shift

14 p2083 A72-31151

Disparity-associated depth sensation masking, suggesting visual signal processing inhibitory mechanisms for crossed and uncrossed stimuli

15 p2184 A72-31366

Visual stimulus orientation effect on movement perception, relating physiological and psychological factors

15 p2184 A72-31368

Head-up display for aircraft three dimensional sky path observation during navigation and landing, discussing computer units, CRT and image generating subsystems

15 p2268 A72-32042

Size scaling rate from retinal image size comparison judgment time during observation of briefly presented concentric rectangles of varying size and orientation

15 p2187 A72-32762

Voluntary eye movement and convergence effects on relation between binocularly perceived and physical distance ratios

16 p2358 A72-33647

Visual depth perception response functions for sine and square wave modulated binocular parallax

17 p2498 A72-34293

Effect of target-background luminance contrast on binocular depth discrimination at photopic levels of illumination

17 p2508 A72-34879

REM period functional maintenance of coordinated eye movement facilitation and binocular depth perception accuracy following sleep

17 p2509 A72-35462

Peripheral contrast thresholds for moving images

17 p2509 A72-35688

The relative importance of contrast and motion in visual detection

17 p2509 A72-35689

Congruent and spurious motion in the learning and performance of a compensatory tracking task

17 p2510 A72-35692

The tracking of targets located outside of Panum's area

17 p2505 A72-35916

Effect of selective adaptation on detection of simple and compound parafoveal stimuli

18 p2651 A72-36607

Optokinetic thresholds in the normal monkey

18 p2651 A72-36610

Vergence eye movements to pairs of disparity stimuli with shape selection cues

18 p2651 A72-36612

Division and orientation in the vertical-horizontal illusion

18 p2651 A72-36913

The neurophysiology of binocular vision

19 p2755 A72-37250

Discontinuity of seen motion reduces the visual motion aftereffect

19 p2760 A72-37600

Psychophysical procedures to investigate selective visual adaptation to light of different wavelengths from test gratings with various orientations and spatial frequencies

19 p2756 A72-37829

Target distance and adaptation in distance perception in the constancy of visual direction

21 p3008 A72-41022

Apparent movement and change in perceived location of a stimulus produced by a change in accommodative vergence

21 p3002 A72-41024

Interactions between spatial and kinetic dimensions in movement aftereffect

21 p3003 A72-41254

Book - Aspects of motion perception

21 p3012 A72-41531

- Visually directed pointing as a function of target distance, direction, and available cues.
22 p3151 A72-42929
- Moving spot detection threshold measurement for varying exposures, noting product of stimulus duration and velocity for comparison with Bloch law
22 p3151 A72-42930
- Visual angle and apparent size of objects in peripheral vision.
22 p3152 A72-42932
- Role of eye movements in the perception of apparent motion.
23 p3259 A72-43804
- Motion thresholds for fovea and peripheral retina with/without correction for peripheral refractive error
23 p3260 A72-43978
- Conjugate and disjunctive optokinetic eye movements in the rabbit, evoked by rotatory and transitory motion.
23 p3257 A72-44243
- On a long-term temporal aspect of stereoscopic depth sensation.
23 p3258 A72-44381
- Line length detectors in the human visual system - Evidence from selective adaptation.
23 p3258 A72-44384
- Signal detection analysis of meridional variations to vertical and horizontal gratings.
23 p3259 A72-44389
- Visual stimuli distance estimation with head stationary or moving, discussing performance after monocular motion parallax training
24 p3374 A72-44557
- Optical directionality of retinal receptors and corresponding points. I - Nasal-temporal asymmetry of retinal spatial values and orientation of receptors: Are the corresponding points cones. II - Variation of form of the experimental horoptera, and possibility of reorganization of the retinal correspondence according to the orientation of the eyes
24 p3371 A72-44907
- SPACE PHOTOGRAPHY**

NT EARTH ORBITAL RENDEZVOUS
NT ORBITAL RENDEZVOUS
Comet rendezvous and outer planet exploration mission operations by unmanned nuclear electric propulsion (NEP) system with inciner thermionic reactors for electric power generation
[AIAA PAPER 72-428] 11 p1722 A72-26177
- Solar electric propulsion application to comet and asteroid rendezvous and docking CARD missions without sample return
[AIAA PAPER 72-470] 11 p1722 A72-26201
- Encounter sequences determination techniques for multitarget flyby and rendezvous missions to asteroids and comets by spacecraft using solar electric propulsion
[AIAA PAPER 72-429] 13 p2037 A72-28947
- Functional equations for optimal spacecraft or rocket interception by similar vehicle within limits of dense atmosphere
17 p2621 A72-35121
- Iterative method for the calculation of two-impulse spacecraft rendezvous maneuvers
17 p2622 A72-35216
- Spacecraft rendezvous trajectories and targeting maneuvers onboard sequential computation, taking into account maneuver constraints and state vector update information
24 p3450 A72-45172
- SPACE RENDEZVOUS MANEUVERS**
U SPACE RENDEZVOUS
U SPACECRAFT MANEUVERS
SPACE SCIENCES
U AEROSPACE SCIENCES
SPACE SHUTTLE ORBITERS
Real time estimation of trajectory for lifting reentry vehicle of shuttle orbiter type, discussing iterated nonlinear filter and adaptive filter
[AIAA PAPER 72-874] 20 p2966 A72-39126
- Significant factors in environmental and thermal control/life support system design for space shuttle orbiter
[ASME PAPER 72-ENAV-21] 20 p2895 A72-39156
- Comparative evaluation of environmental control and life support systems for the space shuttle orbiter.
[ASME PAPER 72-ENAV-19] 20 p2895 A72-39158
- Computer simulation of the space shuttle orbiter environmental thermal control system.
[ASME PAPER 72-ENAV-12] 20 p2896 A72-39165

- Influence of discontinuity stresses on main propellant tankage of a space shuttle orbiter.
[ICAS PAPER 72-10] 21 p3120 A72-41135
- Delta wing separation can dominate shuttle dynamics.
[AIAA PAPER 72-976] 22 p3230 A72-42336
- Space shuttle mission and orbiter element description, discussing European participation
23 p3343 A72-44366
- ### SPACE SHUTTLES
- Aerospike rocket engine system for orbit-to-orbit space shuttle, discussing light-weight regeneratively cooled thrust chamber performance tests
[SAE PAPER 71070] 01 p0116 A72-10264
- Space shuttle materials - Conference, Huntsville, Alabama, October 1971, Volume 3
01 p0090 A72-10726
- Composite materials application for space shuttle structures, relating structural weight to payloads
01 p0090 A72-10727
- Boron-epoxy tubular struts for one third scale space shuttle booster thrust truss structure, discussing design, analysis, fabrication, weight, test and quality control
01 p0138 A72-10735
- Hat section stiffened compression panel of graphite/epoxy composite for space shuttle, discussing quality control procedures
01 p0139 A72-10736
- Fiberglass overwrapped Al alloy for space shuttle cryogenic hydrogen and oxygen tanks, noting weight reduction and impeding effect on cyclic loading induced crack growth rate
01 p0139 A72-10738
- Composite space shuttle booster and orbiter engine support structures design and analysis, stressing weight savings
01 p0139 A72-10740
- Titanium alloys and superalloys selection for elevated temperature use on space shuttle
01 p0084 A72-10743
- Multiple reentry effects on space shuttle thermal protective superalloys mechanical properties, presenting cyclic simulation results for different temperatures, pressures and stresses
01 p0084 A72-10754
- Test program to evaluate metallic materials candidates for space shuttle booster thermal protection system
01 p0085 A72-10755
- Coated Nb alloys as radiative thermal protection system skin materials for space shuttle, investigating flaw growth
01 p0085 A72-10757
- Field repair of Nb alloy panels with protective coatings designed as part of space shuttle thermal protection system
01 p0091 A72-10758
- Field repair of fused slurry silicide coating for oxidation protection of Nb alloys in space shuttle environment
01 p0075 A72-10759
- High temperature insulation for radiative thermal protection system of space shuttle orbiter, evaluating survival chances under acoustic, vibration and thermal loads
01 p0091 A72-10760
- Space shuttle reusable surface insulation thermal protection system, discussing thermal stress distribution, failure modes and mechanical properties
01 p0091 A72-10761
- Reusable external thermal insulation multilayer for space shuttle vehicle, presenting conductivity, expansion coefficient, specific heat, stability, tensile strength and strain capability
01 p0091 A72-10762
- Silica based surface insulation material for space shuttle thermal protection system, discussing cyclic tests in simulated environment and fiber purity effects on crystallization
01 p0091 A72-10764
- Space shuttle low density ablative thermal protection systems, emphasizing low cost refurbishment techniques
01 p0091 A72-10766
- Electrochemical carbon dioxide concentrator materials compatibility to space shuttle life support environment, comparing with LiOH method
01 p0018 A72-10768
- Impact sensitivity of space shuttle materials in liquid and gaseous oxygen at high pressures
01 p0102 A72-10772
- High pressure gaseous hydrogen effect on space shuttle main engine components alloys under static loads, using surface flawed flat plate PTC samples
01 p0085 A72-10774
- Corrosion and stress corrosion cracking prevention on space shuttle by materials selection
01 p0085 A72-10775
- Refractory material development for space shuttle hydrogen tank reusable internal gas layer insulation
01 p0139 A72-10777
- Space shuttle cryogenic tanks self evacuating multilayer insulation, evaluating thermal and dynamic performance
01 p0139 A72-10778
- Temperature and compressive loading cycles effects on high performance multilayer insulation materials and composites, discussing application to space shuttle orbiter
01 p0092 A72-10779
- Characterization of graphite/polyimide composites for space shuttle applications
01 p0092 A72-10784
- Space shuttle oriented polyimide reinforced Ti matrix composites properties, noting weight saving
01 p0139 A72-10785
- Space shuttle thermal protection system, discussing oxidation resistant coatings, refractory metals, heat shield technology, ballistic reentry programs, weight and cost
01 p0135 A72-10935
- Plasma arc testing of space shuttle Nb and Co alloys thermal protection materials, using IR radiometric and photographic techniques
01 p0048 A72-10977
- Arc jet simulation tests of thorium dispersed Ni and Co alloys for space shuttle Metallic Thermal Protection System, determining material degradation
01 p0086 A72-10978
- Nondestructive tests of Nb alloy radiative thermal protection heat shield design for space shuttle requirements
01 p0048 A72-10980
- Power conditioning requirements and tradeoff considerations for space shuttle, warning against central power conversion use on orbiter and booster vehicles
01 p0007 A72-11052
- Aircraft and spacecraft integrated avionics systems design with emphasis on telemetry, discussing space shuttle subsystems integration
02 p0179 A72-12403
- Space shuttle orbiter flight instrumentation, data handling and communication requirements, discussing data gathering methods, crew displays, computer processing, recording and digital data bus telemetry
02 p0179 A72-12406
- Space shuttle optimal boost trajectories, showing payload increase by flying pitch profiles optimization
[AAS PAPER 71-325] 02 p0286 A72-12423
- Post Apollo program, considering space shuttle design, operation, transportation and payload cost reduction, rocket developments and plans for Mars expedition
03 p0440 A72-13612
- Space shuttle safety problems, discussing hydrogen pump bearings and air breathing turbofan blades failures and fuel tank fire hazards
03 p0441 A72-13694
- Space shuttle cryogenics technology, flight and ground operations, checkout, maintenance and safety
03 p0441 A72-13695
- High velocity boundary layer problems for space shuttle, investigating free interaction with detachment, shock wave, penetration, air bubbles in circulation and adherence conditions
03 p0308 A72-13699
- Space shuttle system purposes, noting space program cost reduction
04 p0582 A72-15265
- Space operations cost effectiveness improvement by earth-to-orbit shuttle, discussing space utilization growth and economics
[SD-71-780] 05 p0724 A72-16048
- Three dimensional supersonic flow about space shuttle, comparing method-of-characteristics and shock-capturing computations
[AIAA PAPER 72-191] 05 p0729 A72-16845
- Space shuttle flow field fluid dynamic hyperbolic equations numerical solution by noncentered finite difference schemes, noting advantages in programming logic simplicity and multidimensional generalizations
[AIAA PAPER 72-193] 05 p0729 A72-16848
- Wind tunnel study of space shuttle longitudinal dynamic stability at supersonic speeds, discussing damping-in-pitch
[AIAA PAPER 72-135] 05 p0730 A72-16890
- Reusable shuttle for cost reduction, including reusability rate, expanded orbit capabilities and flight frequency
06 p0906 A72-18171
- Shuttle ascent guidance and control, discussing self targeting, trajectory optimization problems and flight phases
06 p0892 A72-18178
- Space shuttle program evaluation, discussing national economic benefits relative to aerospace industry employment, domestic production, balance of trade, etc
06 p0893 A72-18612
- NASA materials science and manufacturing in space program involving space shuttle reusable equipment and weightlessness applications experiments
06 p0797 A72-18621
- Space shuttle payloads and space manufacturing candidate materials and methods, discussing float-zone refined semiconductors, electronic crystals, viral insecticides, vaccines and biological cells
06 p0824 A72-18622
- Supersonic transition flight mode of reusable two stage space shuttle booster for orbiter launching, comparing with subsonic and high lift to drag designs
[AIAA PAPER 72-133] 07 p0104 A72-18963
- Space shuttle vehicle configurations with reusable booster and orbiter modules, discussing cargo capacity, maneuvering capability, mission duration, engine characteristics and acceleration constraints
07 p1085 A72-19058
- Stochastic simulation model for space shuttle fleet operations, using closed loop queuing system approach
07 p0965 A72-20330
- Digital simulation for predicting performance of data communication networks with computerized switching centers, detailing space shuttle interior communication system
07 p0952 A72-20364
- Onboard orbital navigation system analysis on space shuttle radio range and range rate measurement data relative to ground beacon, using Kalman filter
08 p1203 A72-20856
- Space shuttle, tug and orbital station transportation system benefits and applications, noting European economic implications
08 p1229 A72-20977
- NASA research and applications module (RAM) for interim space station development and possible missions with space shuttle
08 p1240 A72-20978
- NASA space programs, discussing future Apollo, Skylab, orbiting space station, space shuttle and deep space projects
08 p1230 A72-21002
- Space shuttle phase B design studies regarding configurational alternatives, propulsion systems, displays and controls, simulations and flight test programs
08 p1240 A72-21009
- Satellite long life assurance, investigating shuttle era spacecraft program cost relationship to mean time to failure
[AIAA PAPER 72-225] 10 p1551 A72-24436
- Space shuttle flight crew/computer interface display and control functional requirements optimization by real time digital simulation
[AIAA PAPER 72-226] 10 p1460 A72-24437
- Unpowered shuttle orbiter piloted control during approach and landing, discussing energy management technique based on fixed base six degree of freedom simulation
[AIAA PAPER 72-227] 10 p1551 A72-24438
- Human role in space shuttle on-orbit maintenance vs space station modules earth return, considering feasibility and cost effectiveness
[AIAA PAPER 72-229] 10 p1487 A72-24440
- Econometric approach to space shuttle design for optimum operational redundancy levels, using payload-cost effectiveness criterion
[AIAA PAPER 72-242] 10 p1551 A72-24448
- Metallic materials for delta wing space shuttle configuration with metallic thermal protection system
10 p1498 A72-24876
- Space shuttle orbiter thermal protection system metallic interaction with chemical environment during reentry, emphasizing degradation in dissociated oxygen
[AIAA PAPER 72-262] 11 p1590 A72-25206
- Heat pipe applications for waste heat rejection, cooling and temperature control in space shuttle, discussing design and performance
[AIAA PAPER 72-272] 11 p1725 A72-25212
- Separation flow field measurements for space shuttle cylindrical configurations in hypersonic streams, using pressure heat transfer and visualization techniques
[AIAA PAPER 72-294] 11 p1567 A72-25232
- Thermal boundary layer interaction with distortions in shape or material of adjacent surface for space shuttle design
[AIAA PAPER 72-312] 11 p1614 A72-25246
- Rarefied flow fields and heating rates for space shuttle orbiter reentry at high angles of attack, using Monte Carlo simulation technique
[AIAA PAPER 72-314] 11 p1567 A72-25248
- Laminar and turbulent convective heating distributions on delta wing space shuttle boosters with interference effects
[AIAA PAPER 72-315] 11 p1567 A72-25249
- Liquid propellants coupling effects on parallel stage space shuttle configuration structural dynamics, using forty degree of freedom analytical model
[AIAA PAPER 72-347] 11 p1725 A72-25376
- Orthotropic point-supported rectangular panel vibration and flutter analysis for natural frequencies and flutter boundaries, applying to space shuttle design
[AIAA PAPER 72-350] 11 p1728 A72-25379

Space shuttle orbiter vehicle structural design configurations development and evaluation with respect to overall system weight and program cost
[AIAA PAPER 72-373] 11 p1726 A72-25397

Space shuttle thermal protection refurbishment labor costs and techniques, noting motion studies results for maintenance tasks in terms of manpower and performance time
[AIAA PAPER 72-374] 11 p1726 A72-25398

Unsteady airfoil stall and stall flutter analysis, discussing application to space shuttle configuration
[AIAA PAPER 72-380] 11 p1730 A72-25404

Space shuttle heat shield metallic refractory, superalloy and composite materials joining, discussing vacuum furnace brazing of Al/B matrix structures
[AIAA PAPER 72-387] 11 p1638 A72-25408

Reusable external insulation materials for space shuttle thermal protection, evaluating local heat transfer at interface areas in plasma arc test facility
[AIAA PAPER 72-388] 11 p1744 A72-25409

Liquid film transpiration cooling concept application to space shuttle leading edge heating and shock heating
[AIAA PAPER 72-389] 11 p1744 A72-25410

Hot versus shielded aerodynamic surfaces trade study for space shuttle booster wings and fins design, considering materials, structural weight and cost estimates
[AIAA PAPER 72-390] 11 p1726 A72-25411

Space shuttle booster and orbiter thermal protection systems, examining heat sink, metallic radiative, reusable surface insulation and surface cooled designs
[AIAA PAPER 72-391] 11 p1726 A72-25412

Boron-epoxy reinforced Ti tubular truss for application to space shuttle booster thrust structure, evaluating performance
[AIAA PAPER 72-393] 11 p1730 A72-25414

Boron-epoxy reinforced composite metal shear web design for space shuttle orbiter main engine thrust beam structure
[AIAA PAPER 72-395] 11 p1726 A72-25416

Manufacturing process for dispersion strengthened nickel-chromium-thorium dioxide alloys for space shuttle thermal protection system panels, discussing joining optimization and mechanical properties
11 p1659 A72-26035

Space shuttle orbiter reentry heat shield materials, considering hot structures and hot radiative metallic, ceramic insulative and ablative heat shields
11 p1660 A72-26245

Space Shuttle supported manned earth orbital laboratories for operational communication and navigation systems, discussing mission program, design and equipment
[AIAA PAPER 72-533] 12 p1876 A72-27357

Space shuttle cost savings from viewpoints of reusable system, launch rate, vehicle life and overall program
12 p1877 A72-27514

Space technology developments during 1970s and 1980s, discussing solar system exploration, space shuttle systems, cost effectiveness, international cooperation, nuclear propulsion systems, etc.
13 p2051 A72-28453

Atmospheric model effects on space shuttle ascent and reentry trajectories and aerodynamic heating
13 p1990 A72-28813

Atmospheric model for random density variations effects on space shuttle reentry parameters, using Monte Carlo trajectories for delta wing orbiter
13 p1990 A72-28814

LB 21 and space shuttle orbiter aerodynamic testing, discussing computer program supplanting reentry vehicle free flight aerodynamic testing
13 p1894 A72-28934

Space shuttle applications as spacecraft launcher, unmanned instrumentation platform and manned laboratory, discussing advantages to space research
13 p2051 A72-28935

Structural design characteristics of low density fiber ceramic materials coated with refractory ceramics for space shuttle reusable surface insulation thermal protection systems
[AIAA PAPER 72-372] 13 p2056 A72-28957

Teleoperator manipulator for payload handling in space shuttle, noting design features and simulations of master-slave remote control system
[AIAA PAPER 72-238] 13 p1909 A72-29075

European programs on space stations, tugs, shuttles, propulsion and avionics and consideration for participation in NASA programs for 1970s and 1980s
14 p2175 A72-31137

U.S. industry views on NASA plans for 1970s, emphasizing interplanetary nuclear propulsion, space transportation, shuttle costs and economics
14 p2175 A72-31139

Space shuttle umbilical systems for mating, connection and checkout of carrier assemblies and couplings for cryogenic, electrical, pneumatic and hydraulic services
15 p2213 A72-31695

Space Shuttle Orbiter onboard ultrasonic system for structural integrity tests and assessment, noting limitations factors due to configuration and vehicle launch noise effects
15 p2256 A72-31698

Failure detection techniques for Space Shuttle redundant multiple gimbaled inertial measurement units, using simulated boost and entry trajectories
15 p2270 A72-32189

Space shuttle payload design for weight and cost reduction, discussing refurbishable modular design concept
15 p2321 A72-32317

Longitudinal dynamic stability of hypersonic shuttle vehicle designed for operation to planetary atmosphere rim
16 p2462 A72-34019

Inviscid surface streamlines and laminar, transitional and turbulent heating of blunt nose shuttle configurations in hypersonic flow
[AIAA PAPER 72-703] 16 p2345 A72-34041

Finite difference method computation of multishocked three dimensional wing-body supersonic flow fields with real gas effects, applying to delta winged space shuttle
[AIAA PAPER 72-702] 16 p2345 A72-34042

The earth orbit shuttle as a space rescue vehicle.
17 p2620 A72-34437

Space shuttle program, discussing configurational concepts, payload carrying capacity variants and cost reduction design changes
17 p2621 A72-34869

Carbon-carbon composites for space shuttle reentry thermal protection.
17 p2572 A72-35667

Design of model-reference adaptive control systems using Liapunov functions.
18 p2672 A72-36326

The manufacture of mullite reusable surface insulation materials for space shuttle.
[SME PAPER EM 72-714] 18 p2695 A72-36527

In orbit servicing of spacecraft.
[AIAA PAPER 72-731] 18 p2730 A72-36543

Space shuttle configuration, discussing payload accommodation requirements, accessories, mission operations and reusable tug
[AIAA PAPER 72-737] 18 p2731 A72-36546

Space science advances and NASA Planetary Program, noting solar system evolution, life origin and Skylab and Space Shuttle programs
19 p2855 A72-37274

Development of a GH2/GO2 pulsejet engine with 6.7 kN thrust for the attitude control system of the space shuttle
19 p2848 A72-37495

Long term storage and propellant transfer capabilities of propellant depot system design to act in earth orbit as resupply station for cargo/personnel shuttles
19 p2870 A72-38831

An explicit automatic terminal energy management guidance technique for space shuttle.
[AIAA PAPER 72-833] 20 p2950 A72-39094

Space shuttle terminal navigation with conventional navigation aids.
[AIAA PAPER 72-832] 20 p2950 A72-39095

Thermally controlled entry guidance for shuttle.
[AIAA PAPER 72-831] 20 p2951 A72-39096

Constrained payload-optimum extremal ascent trajectories for space shuttle vehicles.
[AIAA PAPER 72-829] 20 p2966 A72-39097

Modular heat rejection system to accommodate widely varying thermal loads in space shuttles and future spacecraft, emphasizing commonality design philosophy for cost reduction
[ASME PAPER 72-ENAV-34] 20 p2976 A72-39144

Structural thermal protection systems for Space Shuttle, noting reusable surface insulation with active cooling
[ASME PAPER 72-ENAV-32] 20 p2976 A72-39145

Thermal control design for research applications module (RAM) shuttle compatible payload carriers, using Freon 21-water system
[ASME PAPER 72-ENAV-31] 20 p2894 A72-39146

Development of a laboratory prototype spraying flash evaporator.
[ASME PAPER 72-ENAV-28] 20 p2894 A72-39149

Multi-cycle plasma arc evaluation of oxidation inhibited carbon-carbon material for shuttle leading edges.
[ASME PAPER 72-ENAV-26] 20 p2894 A72-39151

Optimal shuttle research applications module (RAM) environmental control and life support system for sortie missions
[ASME PAPER 72-ENAV-20] 20 p2895 A72-39157

Space shuttle environmental temperature control-life support system program changes, discussing air cooled electronic equipment, cryogenic stores, crew size and mission duration
[ASME PAPER 72-ENAV-18] 20 p2895 A72-39159

Modular environmental control/life support system design for low cost shuttle launched space station, evaluating humidity, carbon dioxide, water and waste management
[ASME PAPER 72-ENAV-17] 20 p2895 A72-39160

Space shuttle waste collection system development, discussing human-interface requirements, zero gravity effects and operational considerations
[ASME PAPER 72-ENAV-13] 20 p2896 A72-39164

Development of a desiccant CO2 adsorbent tailored for shuttle application.
[ASME PAPER 72-ENAV-11] 20 p2896 A72-39166

Panel-flutter analysis of a thermal protection-shield concept for the space shuttle.
20 p2980 A72-39623

European participation in space shuttle and space tug programs, discussing funding and technical aspects
21 p3103 A72-40456

Space shuttle technological evolution prospects, discussing cooperative development phases toward space transportation system with globally dispersed launch and landing bases
21 p3132 A72-40966

Laminar and turbulent boundary-layer studies at hypersonic speeds.
[ICASE PAPER 72-09] 21 p2990 A72-41134

The optimum configuration and the optimum reentry trajectory of space shuttle vehicles.
[ICASE PAPER 72-27] 21 p2991 A72-41152

Shuttle flight opportunities between stations orbiting the earth and moon.
21 p3108 A72-41302

Space shuttle ascent trajectory optimization by Davidson/Broyden crude search technique for matrix updating
[AIAA PAPER 72-907] 21 p3111 A72-41556

Structural dynamics and aeroelasticity analysis of space shuttle, covering vibration modes, thermal protection system dynamics, ground winds, flutter, buffet and noise
22 p3237 A72-42761

RAM - A concept for reducing space payload costs.
[SAWE PAPER 942] 23 p3343 A72-43482

Space shuttle mission and orbiter element description, discussing European participation
23 p3343 A72-43666

Space Shuttle landing navigation using precision distance measuring equipment.
24 p3421 A72-44637

Aeroacoustic, vibration and shock environments for the space shuttle orbiter.
24 p3448 A72-44679

Diffusion bonded columbium panels for the shuttle heat shield.
24 p3406 A72-44886

Boron-aluminum structural component for Shuttle.
24 p3458 A72-44899

Operational support of space shuttle transportation and payload systems with modular checkout and test equipment, noting service life and economy of operations
24 p3388 A72-45111

Extending the utility of the Space Shuttle as a space rescue vehicle.
24 p3449 A72-45130

Utilization of advanced composite materials for spacecraft and space shuttle applications.
24 p3417 A72-45153

Aircraft/spacecraft design approach and performance data, considering space shuttle program
24 p3467 A72-45159

NASA space science, exploration and applications plans and policies in view of space shuttle capabilities, emphasizing cost reduction
24 p3440 A72-45162

Space shuttle design evolution for program cost minimization, discussing refurbishment, payload impact, management cost and mission specifications and objectives
24 p3450 A72-45171

Transportation of radioactive waste-materials into the sun.
24 p3450 A72-45184

Optimal guidance for the space shuttle transition.
24 p3422 A72-45186

Study of shuttle-based systems for high-energy planetary missions.
24 p3441 A72-45189

NASA's management concept for the Space Shuttles Program.
24 p3468 A72-45194

The Agena orbit transfer stage as an interim space tug.
24 p3451 A72-45195

The effect of space shuttle payload design techniques on total space program cost.
24 p3451 A72-45210

Energy management during the space shuttle transition.
24 p3452 A72-45347

Space shuttle optimal entry trajectories for thermal protection system weight minimization, considering constant and variable angles of attack
[AIAA PAPER 72-977] 24 p3452 A72-45414

SPACE SIMULATORS
Space environment simulator with ultrahigh vacuum chamber and UV and corpuscular radiation for material samples physical properties in-situ measurement
02 p0201 A72-12701

Star sky simulation in testing and training stands, using spherical mirror, collimator and imbedded spheres
09 p1310 A72-22949

Closed loop life support systems, discussing manned ninety day test in space station simulator, Soviet experiments and water and oxygen regeneration
10 p1432 A72-24973

Space simulation facility for one year SERT 2 mercury ion thruster testing, discussing cryogenic operation and electrical and thermal insulation
[AIAA PAPER 72-430] 11 p1613 A72-26174

Dynamical motion simulation facility for Symphonie satellite, using sensors, attitude control electronics and analog computer in closed loop system [DEVLR-SONDDR-201] 12 p1795 A72-27659

Dual spin spacecraft simulation on three axis air bearing ball in atmosphere testing propellant tank dissipation and spacecraft stability in autotrack mode
[AIAA PAPER 72-860] 20 p2911 A72-39108

Theory of an experiment in an orbiting space laboratory to determine the gravitational constant.
20 p2968 A72-39200

SPACE STATIONS

NT HALO ORBIT SPACE STATION

NT ORBITAL SPACE STATIONS

NT ORBITAL WORKSHOPS

NT SALYUT SPACE STATION

Manned space station design for astronomy, space physics and biology, earth surveys, aerospace medicine, materials science and advanced technologies applications
01 p0135 A72-10937

Multichannel space station communications using PCM-PSK-PM interplex modulation for reducing cross modulation loss
02 p0174 A72-12131

High data rate convolutional coding for space station telemetry links, considering sequential and cascaded Viterbi decoding
02 p0174 A72-12132

Integral and modular space stations objectives, construction and utilization for astronomy, scientific experiments and technology
03 p0441 A72-14308

Angular quadrature effects on two dimensional space power reactor radiation shield calculation for manned space station application
04 p0546 A72-14426

Spin dynamics model of space station with counterweight connected by multiple cables, using linearized motion equations
[AIAA PAPER 72-172] 05 p0730 A72-16882

Triaxial space station orbit around oblate earth, presenting equations of motion, Hamiltonian and integration methods
06 p0878 A72-17663

Artificial gravity effects on space station crews performance, discussing unusual mechanical and perceptual phenomena
06 p0766 A72-17715

Educational programs for increasing public interest in space program benefits, describing summer teacher workshop on Apollo lunar and Skylab space station missions
06 p0906 A72-18623

NASA space station activities, describing Skylab missions and capabilities in physical and life sciences, earth resources surveying and technology experimentation
09 p1395 A72-22935

Malfunction detection for space station environmental/thermal control and life support system, using onboard computer
[AIAA PAPER 72-241] 10 p1423 A72-24447

Closed loop life support systems, discussing manned ninety day test in space station simulator, Soviet experiments and water and oxygen regeneration
10 p1432 A72-24973

High temperature biowaste resistojets with electrically conducting ceramic heaters, discussing lifetime and space station power systems adaptability
[AIAA PAPER 72-454] 11 p1708 A72-26190

High reliability long life heat pipe thermal control system for space station application
[AIAA PAPER 72-261] 14 p2171 A72-30835

European programs on space stations, tugs, shuttles, propulsion and avionics and consideration for participation in NASA programs for 1970s and 1980s
14 p2175 A72-31137

Monitoring system for ionospheric disturbances prediction from satellite observation, discussing optimum locations for space stations
15 p2220 A72-31233

Aerial IR line scanner systems for forest fire detection, considering escalation from aircraft to space platform
15 p2221 A72-31250

Elastic damping of spin stabilized space stations nutational oscillations induced by time-variant moments of inertia
15 p2319 A72-31458

Habitability factors in a rotating space station.
18 p2652 A72-36436

Stability and CMG wobble damping of flexible, spinning space stations.
[AIAA PAPER 72-888] 20 p2975 A72-39113

Space station prototype environmental/thermal control and life system - A current overview.
[ASME PAPER 72-ENAV-35] 20 p2894 A72-39143

Thermal control concept evaluation for a ten-year life modular space station.
[ASME PAPER 72-ENAV-30] 20 p2894 A72-39147

Design criteria for the modular space station environmental control and life support system selection.
[ASME PAPER 72-ENAV-25] 20 p2894 A72-39152

Space station atmospheric revitalization system design, covering temperature, humidity, carbon dioxide, contaminant and oxygen generation and composition control and vehicle configuration
[ASME PAPER 72-ENAV-24] 20 p2894 A72-39153

Environmental control and life support subsystem conceptual design studies for shuttle launched 6-12 man crew modular space station
[ASME PAPER 72-ENAV-22] 20 p2895 A72-39155

Modular environmental control/life support system design for low cost shuttle launched space station, evaluating humidity, carbon dioxide, water and waste management
[ASME PAPER 72-ENAV-17] 20 p2895 A72-39160

Water and waste management subsystem design for a space station prototype.
[ASME PAPER 72-ENAV-8] 20 p2896 A72-39169

Safety design of space station against collision hazards with artificial orbiting bodies.
24 p3449 A72-45143

SPACE SUITS

Calculation procedures for some parameters of space suit gas medium supply systems
21 p3006 A72-40449

SPACE SURVEILLANCE [GROUND BASED]

Visible displays of millimeter and submillimeter wave images for all-weather ground surveillance, discussing image conversion
[AD-736578] 04 p0494 A72-15612

SPACE SURVEILLANCE [SPACEBORNE]

Air surveillance using satellite range-difference measurement from noninterrogated aircraft beacons for ATC
04 p0545 A72-14826

Terrestrial surface observation from space platform, considering atmospheric effects, surface spectral properties and information resolution and transmission
08 p1170 A72-21965

Computer processed image enhancement applications to spacecraft returned photoreconnaissance, discussing data transmission and resolution vs recognition and color quality
17 p2520 A72-34408

SPACE SYSTEMS ENGINEERING
U AEROSPACE ENGINEERING

SPACE TOOLS

Space tools and support equipment for earth orbital systems maintenance, replacement and repair, discussing Skylab requirements and teleoperator applications
[AIAA PAPER 72-230] 10 p1488 A72-25049

Recommendations for selection and use of torque wrenches for aerospace propulsion systems applications.
[SAE AIR 1268] 18 p2648 A72-36531

SPACE TRANSPORTATION

Post Apollo program, considering space shuttle design, operation, transportation and payload cost reduction, rocket developments and plans for Mars expedition
03 p0440 A72-13612

Atmospheric rendezvous concept to increase space transportation system efficiency and flexibility, discussing structural weight savings
[AIAA PAPER 72-134] 05 p0730 A72-16889

Space shuttle, tug and orbital station transportation system benefits and applications, noting European economic implications
08 p1229 A72-20977

U.S. industry views on NASA plans for 1970s, emphasizing interplanetary nuclear propulsion, space transportation, shuttle costs and economics
14 p2175 A72-31139

Expendable space transportation - A 1972 assessment.
[AIAA PAPER 72-732] 18 p2730 A72-36542

Space shuttle technological evolution prospects, discussing cooperative development phases toward space transportation system with globally dispersed launch and landing bases
21 p3132 A72-40966

Transportation of radioactive waste-materials into the sun.
24 p3450 A72-45184

Implications of new transport vehicles and cost analysis of supplying and maintaining a manned lunar laboratory.
24 p3441 A72-45209

Flight mechanics aspects in space transportation system for international rescue, analyzing potential crises situations requiring emergency action
24 p3451 A72-45217

SPACE TUGS

European reusable space tug, discussing computer controlled attitude stabilization and maneuvering system design for orbital rendezvous and docking
05 p0725 A72-16446

Reusable space tug mission profile for interplanetary spacecraft recovery, using branched trajectory, steepest descent optimization and propellant minimization
[AIAA PAPER 72-13] 05 p0730 A72-16949

Space shuttle, tug and orbital station transportation system benefits and applications, noting European economic implications
08 p1229 A72-20977

European Special Space Tug electronic subsystem requirements, considering strapdown inertial measuring unit, remote sensors, computer and fail-safe backup system
09 p1396 A72-23258

European Special Space Tug structural and configurational layouts and problems
09 p1396 A72-23259

Nuclear rocket for space tug, comparing performance and operational costs with chemical propulsion
13 p2000 A72-28926

Space tug for recoverable reusable system with winged manned boost-glide vehicle, discussing feasibility in economics and engineering
13 p2051 A72-28930

Space tug design constraints, configurational alternatives, subsystem arrangements, docking system, propellant tank pressurization system, main engine and power supply, etc
13 p2051 A72-28933

European programs on space stations, tugs, shuttles, propulsion and avionics and consideration for participation in NASA programs for 1970s and 1980s
14 p2175 A72-31137

Space shuttle configuration, discussing payload accommodation requirements, accessories, mission operations and reusable tug
[AIAA PAPER 72-737] 18 p2731 A72-36546

European participation in space shuttle and space tug programs, discussing funding and technical aspects
21 p3103 A72-40456

Aerospace tug using atmospheric braking during return from geostationary orbit, discussing radiative thermal protection, mass, design and advantages
23 p3340 A72-44275

Extending the utility of the Space Shuttle as a space rescue vehicle.
24 p3449 A72-45130

The Agena orbit transfer stage as an interim space tug.
24 p3451 A72-45195

The space tug orbital operations.
24 p3451 A72-45196

The space tug optimum cost evaluation.
24 p3468 A72-45212

SPACE VEHICLE CHECKOUT PROGRAM

Space shuttle cryogenics technology, flight and ground operations, checkout, maintenance and safety
03 p0441 A72-13695

Structure-borne acoustic nondestructive testing for readiness assessment, fault isolation and automatic checkout of space vehicle mechanical devices
15 p2214 A72-31699

Operational support of space shuttle transportation and payload systems with modular checkout and test equipment, noting service life and economy of operations
24 p3388 A72-45111

SPACE VEHICLE CONTROL
U SPACECRAFT CONTROL

SPACE VEHICLES
U SPACECRAFT

SPACE-TIME CONTINUUM
U RELATIVITY

SPACE-TIME FUNCTIONS

Nonlinear hydromagnetic waves in finite beta collisionless plasma, calculating space-time evolution with nonlinear integrodifferential equation
01 p0107 A72-10143

Electromagnetic waves diffusion by space-time fluctuations in plasma electron density
[ONERA, TP NO. 1043] 01 p0110 A72-11180

Gravitational biology theory problems, discussing possibility of applying relativistic phenomena to living organisms in inertial or noninertial systems
02 p0160 A72-12016

Spatial-temporal correlation functions of field due to electromagnetic waves backscattering from random inhomogeneities in extended layer
02 p0180 A72-12580

Anisotropic universe model based on Einstein equations for metric with cosmological term
03 p0388 A72-13193

Gravitational field of bounded and isolated material in empty four-dimensional locally Minkowskian space-time, emphasizing radiation zone and gravitational waves
04 p0570 A72-14556

Human body kinematics numerical analysis, obtaining spacetime resolution by photogrammetric restitution and electronic data processing of photographic recordings 04 p0478 A72-14710

Metric tensor components of isotropic inhomogeneous cosmological model obtained from Einstein equations 07 p1072 A72-19340

Wightman field theory generalization for application to gravitational field quantization, describing curved space-time by strongly geodesically complete manifolds 07 p1036 A72-20198

Space-time relationship derivation to estimate traveling time of discontinuities running against magnetosphere in unperturbed solar wind 08 p1153 A72-20714

Probabilistic derivation of quantum mechanics wave equations for Brownian motion and spatial-temporal diffusion 10 p1505 A72-24071

Equations of motion with gravitational radiation reaction terms for gravitating system as source of asymptotically flat space 10 p1511 A72-24416

Godel metric type MHD universes, using Maxwell and conservation equations 10 p1524 A72-24857

Radiative displacement of molecular beam sidebands by spatiotemporal modulation of irradiating RF field 10 p1492 A72-24858

Time-space nonholonomic characteristics of curvature tensor for three dimensional physical space in gravitational and inertial fields 12 p1843 A72-27049

Space-time model locally identical with Minkowski space in geometrical and causality features, implying non-Doppler red shift and cosmology 12 p1868 A72-27218

Space-time correlation of field amplitude and phase in plane waveguide with statistically irregular boundary, using Born approximation and perturbation theory method 13 p1928 A72-28471

Dipole antenna radiation patterns in sinusoidal space-time periodic media 13 p1915 A72-28531

Conformally flat linear axial symmetry chronometrically invariant cosmological models, discussing various types of spaces realized during model evolution 13 p2036 A72-28759

Spatial-temporal coherent processing technique application to thermal radio emission random signal reception, deriving ambiguity function 13 p1920 A72-29282

Luminosity variation of star in circular orbit around extreme Kerr black hole due to Doppler effects and gravitational field light focusing 13 p2041 A72-29416

Electromagnetic waves backscattering in magnetoactive plasma containing random inhomogeneities of electron density, calculating field spatial-time and cross correlation functions 14 p2086 A72-30789

Anisotropic and isotropic descriptions of physical process speeds in special relativity theory space-time metric 15 p2279 A72-32768

Curved space cosmological bounds on time variation of gravitational constant in terms of Brans-Dicke theory for Friedmann expanding cosmologies 16 p2450 A72-32864

Lorentz-covariant procedure for equations of structure and motion of particles represented by singularities in Einstein relativistic field theory 16 p2422 A72-32880

Information propagation time direction of cosmological models in terms of conventional electrodynamic theory, contrasting with Wheeler-Feynman theory 16 p2424 A72-33286

Electromagnetic wave propagation and wave-vector diagram in space-time periodic media 17 p2514 A72-34381

Relativistic kinetic theory combined with surface layer theory in curved space-time to study counter-rotating disks with fine central red shift 17 p2582 A72-35389

Correlation of noise-like emission reflected from a statistically uneven surface 17 p2583 A72-35543

Structural analysis of gravitational field in asymptotic limit at spatial infinity, introducing three dimensional spacelike surface carrying initial data for space-time 17 p2583 A72-35824

Conformally flat linear axisymmetric chronometrically invariant cosmological models, discussing various types of spaces realized during model evolution 18 p2724 A72-36237

Isotropic, space-like, Maxwellian particles of real mass and of time-like velocity 18 p2710 A72-36472

Universe expansion induced electromagnetic wave backscattering absence in Robertson-Walker space-time as consequence of motion equations conformal invariance 18 p2711 A72-36711

Equations of motion in the linear approximation. 19 p2835 A72-38174

Space-time relationship derivation to estimate traveling time of discontinuities running against magnetosphere in unperturbed solar wind 19 p2791 A72-38342

Electromagnetic wave dispersion in ionized cosmic medium for spatially flat Brans-Dicke cosmology 20 p2969 A72-39265

Introduction of time and space into a point system endowed with a signal 20 p2946 A72-39574

The geometry of free fall and light propagation. 20 p2954 A72-40005

Minkowski space-times for impulsive gravitational waves, considering idealized plane fronted wave form and limiting case of Robinson-Trautman null spherically fronted wave 20 p2955 A72-40007

Plane-symmetric similarity solutions for self-gravitating fluids. 20 p2955 A72-40009

Construction of a general cosmological solution of the Einstein equations with a singularity with respect to time 21 p3103 A72-40403

Spatially homogeneous general relativistic Bianchi cosmological models with diagonal metrics, noting field equations simplicity 21 p3104 A72-40569

Electron processes in nonrelativistic electron streams against stationary ion background as wave packet envelope deformation in space and time 21 p3094 A72-41652

On the cosmological equations in a universe with small scale condensations. 22 p3220 A72-41998

First derivative discontinuities of space-time metric tensor in Einstein equations solution for nonisotropic and isotropic hypersurfaces, proving coordinate system existence for continuity 23 p3312 A72-43302

Generalization of the Taub-Kazner cosmological metric in the scalar-tensor gravitation theory. 23 p3313 A72-43500

Analysis of optimal space-time signal discrimination 23 p3266 A72-44217

Mathematical consequences of physical laws invariance hypothesis under space-time-dependent changes in unit length, discussing conformally covariant and cosmological theories interrelationship 24 p3447 A72-45626

Time-space nonholonomic characteristics of curvature tensor for three dimensional physical space in gravitational and inertial fields 24 p3425 A72-45702

SPACE-TIME METRIC U SPACE-TIME FUNCTIONS SPACEBORNE ASTRONOMY

Space astronomy experiments with TV scanning, discussing data from Telescope catalog of UV observations and photometric and astrometric accuracy 08 p1170 A72-21957

Spaceborne Uvicon/Telescope astronomical observatory for stellar UV TV pictures, discussing system design requirements 08 p1170 A72-21958

Electronography in space astronomy, discussing use of Lallemand electronic camera as photon receptor onboard balloons or rockets 08 p1170 A72-21963

Image dissector application to D2B astronomical satellite position field plotting in solar and stellar UV photometry 08 p1172 A72-21976

Space environment and astronomical studies with sounding rockets, satellites and orbiting solar observations 10 p1548 A72-24974

Spacecraft-based observations of gamma and X radiation resulting from planetary surface and atmosphere processes to obtain source medium chemical composition 10 p1530 A72-25060

Large space telescope /LST/ project, discussing instrumentation, observation program and operational characteristics 11 p1630 A72-25681

Astronomical observations from astrophysical observatory onboard orbital space station controlled by astronaut, discussing telescope orientation outside of spacecraft 15 p2242 A72-32740

Construction and optical equipment of astrophysical observatory Orion onboard Salyut space station, discussing mirror telescope, spectrograph and star tracker 15 p2242 A72-32741

Orion spaceborne astronomical observatory automatic control system for instrument orientation and

star tracking, discussing servomechanism and pulse duration modulation 15 p2242 A72-32743

Spectrograph for Orion spaceborne astronomical observatory on Salyut space station calibrated with synchrotron radiation from particle accelerator 15 p2242 A72-32744

Photographic characteristics of high resolution film for Orion spaceborne astronomical observatory spectrograms, discussing aerospace environment effect on sensitivity and physicochemical properties 15 p2243 A72-32745

Extra-atmospheric astronomical studies and instruments, discussing spaceborne, X ray and heavy orbiting telescopes and ground-space radio interferometer designs 16 p2462 A72-33516

Space observations of the solar corona. 17 p2611 A72-35326

Sounding rockets for astronomical research, discussing rocket types, payloads, launch sites, advantages over satellites, economic factors and future prospects 22 p3231 A72-42983

OA0 3 satellite Copernicus onboard equipment, discussing UV reflecting and X ray telescopes, attitude sensor, star tracker, solar sensor and computer 22 p3231 A72-42985

The on-board computer of the Astronomical Netherlands Satellite /ANS/. 24 p3382 A72-45163

Astronomy from a space platform; Proceedings of the Symposium, Philadelphia, Pa., December 27, 28, 1971. 24 p3446 A72-45526

Skylab solar astronomical observation programs and instruments, discussing X ray and H alpha telescopes, coronagraphs, spectroheliographs and UV spectrographs 24 p3453 A72-45528

Space astronomical observatory mission planning, analysis and operation and data utilization in terms of space and ground facility instruments and support subsystems 24 p3382 A72-45530

UV and IR observations of galactic and intergalactic matter from space stations, noting spatial resolution increase 24 p3446 A72-45532

Future orbital observatory modules for stellar and galactic astronomy. 24 p3453 A72-45533

Unmanned OA0 spacecraft series and experiment packages, discussing space astronomy scientific achievements, mission plans and space shuttle role 24 p3453 A72-45535

Radiation pressure supported stars, degenerate dwarfs, neutron stars and black holes high energy observations from space platforms 24 p3446 A72-45536

HEAO satellite to carry instruments required in high energy astrophysics missions, discussing observational objectives, configuration and experiments 24 p3453 A72-45538

NASA X ray satellite UHURU and HEAO-C instruments and observational data on supernova remnants, pulsars, extars quasars, radio galaxies and galactic clusters 24 p3446 A72-45539

Charged and neutral cosmic rays radioactive isotope and momentum distribution measuring techniques in high energy particle astronomy observatories /HEAO/ 24 p3404 A72-45540

Spaceborne astronomy by synthetic aperture optics for high resolution without cost and weight disadvantages of large telescopes, considering Michelson stellar interferometer 24 p3404 A72-45541

Electronic imaging devices for astronomy from a space platform. 24 p3404 A72-45542

Future giant-aperture orbital space telescope design based on active optics and electro-optical techniques, discussing laser interferometry and precise servomechanisms roles 24 p3405 A72-45544

OSO and Skylab astronomical instruments technology, emphasizing precision pointing, spatial and spectral resolution and photometric efficiency problems 24 p3405 A72-45545

Manned and unmanned space-based astronomical observatory systems pros and cons, discussing experiment management complexity and cost reduction 24 p3447 A72-45546

SPACEBORNE PHOTOGRAPHY NT SATELLITE-BORNE PHOTOGRAPHY

Interpretation model for aircraft and spacecraft remote sensing of tropical agricultural systems 02 p0210 A72-11798

High altitude aircraft and Apollo 9 multispectral photography and simulated ERTS-A imagery evaluation, comparing with ground observations in Arizona 02 p0210 A72-11799

Meteorological precipitation and earth surface under cloud characteristics from airborne microwave radiation measurements using millimeter and centimeter waves

02 p0216 A72-11889

Space and high altitude aerial photography agricultural ground data collection and processing for Arizona survey evaluation

02 p0220 A72-12200

Integral image tube optical systems for far UV narrow band and broad bandpass photography from spacecraft outside atmosphere

03 p0355 A72-13063

Book on earth, moon and planet space photography, discussing synoptic meteorological data, mapping, surface detail inspection and planetary exploration

03 p0438 A72-14099

Mars surface topographic characteristics relationship to earth features, using Mariner 6 and 7 photographs

04 p0569 A72-14501

Atmospheric contrast degradation and turbulence effects on photography from space with computerized optimization of ground resolution

06 p0813 A72-17431

Image resolutions for ERTS return beam vidicon TV, Skylab multispectral cameras and Gemini/Apollo photographs

06 p0818 A72-18328

Apollo 6 photogrammetric, photometric and neutron activation analysis of smoke plume, determining eddy diffusivity

06 p0819 A72-18439

Soviet book on terrestrial studies by satellite observation covering meteorology, hydrology, oceanography, geomorphology, geobotany, geography, pedology, atmospheric physics and TV and photographic analysis

06 p0810 A72-18523

International legal aspects of earth resources survey from space

07 p1104 A72-19467

Image tube, film and mechanical scan camera imaging systems comparison for spacecraft-borne planetary photography based on maximum data return at acceptable cost

08 p1170 A72-21964

Si diode array vidicon for ground based and spaceborne planetary and stellar imaging, noting integration time, storage and slow scan capabilities extension through cooling

08 p1171 A72-21970

Mass and energy exchange in tropical convective cloud systems from ATS cloud photographs

09 p1344 A72-22430

Mars surface lineament systems from Mariner photographs, noting global and radial type associated with Hellas and South Pole basins

12 p1868 A72-27259

Apollo mapping camera system synchronized laser altimetry utilization in astro-photogrammetric triangulation

12 p1872 A72-27816

Image deformation sources correction in space photography, discussing stationary and moving cameras and panoramic and complex sensing systems

12 p1809 A72-27817

Atmospheric air pollution study by space techniques via thermal radiation spectral measurements and laser sounding, considering spaceborne photography

15 p2220 A72-31237

Lunar orbital photography of astronomical and geophysical phenomena during Apollo 15 flight, noting solar corona and Milky Way

15 p2236 A72-31974

Apollo 9, Skylab and Earth Resources Technology Satellite-borne multiband cameras performance requirements and tolerances comparison, considering geometric and spectroradiometric properties

16 p2395 A72-34103

Multispectral angular reflectivity effect on optimum filter combinations for spaceborne multiband photography sensing mission in visible and near IR regions

16 p2395 A72-34104

Determination of the parameters of a satellite camera

17 p2556 A72-35360

Recent developments in digital image processing at the image processing laboratory at the Jet Propulsion Laboratory.

18 p2658 A72-36255

Photomorphologic units for regional analysis from hyperaltitude and spacecraft remote sensing data

18 p2690 A72-36321

The new Mariner 9 map of Mars.

18 p2729 A72-36988

A detailed analysis of Mariner nine TV navigation data.

20 p2977 A72-40061

Photogrammetric method for determining the deflection of light beams by spacecraft windows during flight

21 p3052 A72-40305

Mars photographic mapping and UV/IR spectrometric investigation by Mariner 9, discussing Martian surface features and atmospheric composition

21 p3105 A72-40967

First approximation for spacecraft observations of noctilucent clouds from circular orbits with optimal optical axis orientations

21 p3049 A72-41438

An orthographic photomap of the South Pole of Mars from Mariner 7.

21 p3110 A72-41455

The location of the Mountains of Michel and evidence for their nature in Mariner 7 pictures.

21 p3110 A72-41456

Jupiter - Its Red Spot and disturbances in 1970-1971.

24 p3435 A72-44690

Mariner 9 spacecraft systems and photographs of Martian surface details

24 p3441 A72-45170

High resolution imagery with the large space telescope.

24 p3404 A72-45537

SPACEBORNE TELESCOPES

TV tube type image sensors to replace photographic film for space telescope, discussing design and performance

08 p1169 A72-21956

Limiting magnitudes of stars in visual telescopic observations /Ground and extraatmospheric locations of instrument and observer/

19 p2859 A72-37907

Fine guidance pointing stability of a 120-inch /3 meter/ large space telescope /LST/.

[AIAA PAPER 72-853]

20 p2949 A72-39076

Precision X-ray telescopes on HEAO-C.

24 p3403 A72-45202

Orbiting telescopes improved angular resolution and access to UV spectra as advantages in determining stellar composition, mass, luminosity and distance

24 p3446 A72-45531

Future orbital observatory modules for stellar and galactic astronomy.

24 p3453 A72-45533

High resolution imagery with the large space telescope.

24 p3404 A72-45537

Future giant-aperture orbital space telescope design based on active optics and electro-optical techniques, discussing laser interferometry and precise servomechanisms roles

24 p3405 A72-45544

SPACECRAFT

Aircraft and spacecraft conceptual definitions in national and international law

11 p1749 A72-26561

SPACECRAFT ANTENNAS

Microwave breakdown prediction models for antenna system in ionized reentry environment

04 p0486 A72-14531

Spacecraft antenna radiation pattern numerical analysis using combined electric and magnetic integral equations

04 p0500 A72-15407

Radiation pattern of spacecraft dipole antenna mounted on conducting finite length cone calculated by superposition of radiated and diffracted waves

09 p1282 A72-23524

Electra method of plasma diagnosis around reentry vehicle head, describing onboard antennas impedance measurements and use of triple Langmuir probe mounted on telescopic mast

10 p1552 A72-24659

Autotracking antenna effect on dual spin spacecraft nutational stability, using averaging, eigenvalues and digital simulation techniques

[AIAA PAPER 72-571]

12 p1876 A72-27379

Test facility for aircraft and spacecraft antennas radiation patterns and optimal installation determination

12 p1795 A72-27412

Digital simulations of effects of two-antenna interference on space vehicle guidance.

19 p2830 A72-37292

Selection of an optimal design for a spacecraft antenna system

21 p3025 A72-40311

Circular-polarization antennas with controlled radiation patterns

21 p3026 A72-40314

Microwave filters in antenna circuit feeder systems of space vehicles

21 p3026 A72-40318

Spacecraft antenna feeder channel parameter control in flight

21 p3026 A72-40319

Controlling the directive gain of weakly directional antennas during space-vehicle flight

21 p3026 A72-40324

Certain problems in designing highly directional spacecraft antennas

21 p3026 A72-40325

Radiation patterns of wideband horn antenna loaded by dielectric belt, noting satellite and terrestrial radio relay applications

21 p3036 A72-41832

SPACECRAFT CABIN ATMOSPHERES

Miniaturized magnetic mass spectrometer for trace contaminants continuous monitoring and control, discussing applications to closed atmospheric systems in spacecraft and undersea environments

[AIAA PAPER 71-1122]

01 p0608 A72-10558

Rat brain acetylated and unacetylated coenzyme A aberration in marginally hyperoxic space capsule environments

06 p0763 A72-17875

Spacecraft cabin atmosphere thermal scale modeling based on radiative-convective-convective heat transfer, obtaining adequate thermal similitude through mass flux and heat transfer coefficient preservation

[AIAA PAPER 72-288]

11 p1741 A72-25226

Space station atmospheric revitalization system design, covering temperature, humidity, carbon dioxide, contaminant and oxygen generation and composition control and vehicle configuration

[ASME PAPER 72-ENAV-24]

20 p2894 A72-39153

Spacecraft atmosphere trace contaminant sensor system using mass spectrometric analysis of contaminants concentrated on sorbents in monitor inlet system

[ASME PAPER 72-ENAV-15]

20 p2896 A72-39162

Development of a desiccant CO₂ adsorbent tailored for shuttle application.

[ASME PAPER 72-ENAV-11]

20 p2896 A72-39166

Six-month test program of two water electrolysis systems for spacecraft cabin oxygen generation.

[ASME PAPER 72-ENAV-5]

20 p2896 A72-39172

Expired air as a source of spacecraft environment carbon monoxide contamination

24 p3375 A72-45120

SPACECRAFT CABINS

Future spacecraft habitable compartment layout from psychophysiological viewpoint, considering human visual and motor field parameters and crew members social needs

13 p1910 A72-29321

SPACECRAFT COMMUNICATION

NT REENTRY COMMUNICATION

Diurnal and seasonal variations of scintillations in short wave radio signals of earth satellites and spacecraft

01 p0053 A72-10359

Spacecraft-ground communications system, discussing electromagnetic wave propagation and frequency bands

01 p0027 A72-10445

Grid controlled 100 W microwave transmitter power triode for space applications, noting high reliability and stability through use of metal dispenser cathode

01 p0009 A72-11223

Orbiting lunar spacecraft Endeavor radio transmission postocclusion reception, considering surface wave propagation and mountain formation prismatic refraction

02 p0171 A72-11753

Initial Canadian domestic satellite communication system plans and progress

02 p0177 A72-12382

Space shuttle orbiter flight instrumentation, data handling and communication requirements, discussing data gathering methods, crew displays, computer processing, recording and digital data bus telemetry

02 p0179 A72-12406

Multiple access techniques in satellite telecommunication systems, discussing clean mesh type network

02 p0182 A72-12699

High speed digital communication over space to earth satellite links by quadriphase modulation, discussing modulator, receiver and system technology for maximizing data transfer

04 p0485 A72-14477

Phase locked loop bandwidth, acquisition time and SNR for Doppler tracking deep space communications for Venus and Jupiter probes

05 p0629 A72-16575

Scintillation effects on synchronous satellite communications systems at 250 MHz in equatorial region, discussing diversity techniques and composite diffraction refraction theory

[AIAA PAPER 72-178]

05 p0631 A72-16906

Recovered carrier phase ambiguity resolution in four-phase PSK digital satellite communications system

06 p0772 A72-17409

Error coding techniques application to communication satellite links, discussing computer simulation results

07 p0948 A72-20495

Parameters affecting communication and rescue time constraints for emergency astronaut return from low earth orbits

09 p1395 A72-23155

Terminal guidance systems and techniques application to manned space flight rescue operations, discussing emergency location and rescue spacecraft communication and guidance

09 p1396 A72-23158

Frequency bands for space-earth links in broadcasting satellite service, stressing application to educational television

10 p1435 A72-24032

Microwave equipment and technology application for instrument landing, terminal ATC, millimeter wave CAT detection and satellite communications

10 p1509 A72-24036

Space communications period forecasting algorithm for limited power ground based transmitters and spacecraft in earth orbit

11 p1598 A72-26735

Simultaneous measurements of ionospheric electrons number vertical distribution by incoherent ground radio wave scattering and coherent signals from Intercoms 2 and Cosmos 321 satellites

11 p1628 A72-26918

Intelsat 4 satellite communication transponder design for broadband multicarrier operation, using frequency and pulse modulation techniques

[AIAA PAPER 72-535]

12 p1780 A72-27358

SkyLab communications system, discussing voice, data, TV and command mission requirements and microwave instrumentation

[AIAA PAPER 72-543]

12 p1781 A72-27366

Franco-German Symphonie project of point to point communication and TV distribution by satellite, describing spacecraft and ground station characteristics

[AIAA PAPER 72-549]

12 p1794 A72-27372

Flight prototype satellite communications repeater with two transponder channels and dual beam antenna, discussing design parameters and advanced systems application

[AIAA PAPER 72-579]

12 p1789 A72-27381

Experimental earth station for wave propagation studies in satellite communications using frequency range above 10 GHz

12 p1785 A72-27801

Ground terminals spatial diversity for earth satellite mm wave communication systems to avoid attenuations by rainfall

13 p1989 A72-28810

Data compression for spacecraft borne signal measurement, discussing nonlinear quantizing, histogram parameter extraction, and signal encoding

[DFVLR-SONDDR-204]

13 p1921 A72-29346

Spacecraft-borne computer and electronic systems interface for radio reception, transmission and TV imagery applications

21 p3014 A72-40309

Optical communication with distant spacecraft, discussing electro-optical transducers, light sources and receivers

21 p3014 A72-40321

Telemetric frame compression coefficient and shaping algorithm for spacecraft data processing systems for arbitrary number of active channels

21 p3014 A72-40326

Statistical analysis of information from remote space vehicles

21 p3015 A72-40327

A priori estimation of the quality of a data-compression system from the statistical characteristics of the sensors employed

21 p3024 A72-40328

Reflector antennas for satellite communication, discussing hybrid mode, dieguide and lens feeds, spherical and stepped reflectors, and high efficiency paraboloid antennas

21 p3028 A72-40513

Planning of a broadcast-satellite service

21 p3016 A72-40771

Computer simulation of a digital satellite communications link

21 p3024 A72-40854

Error correcting codes applied to satellite channels

21 p3018 A72-40874

Phase noise types in digital satellite communication links, discussing continuous binary phase shift keyed modulation systems with coherent detection

21 p3020 A72-40896

Economic considerations for low-traffic satellite earth stations

21 p3022 A72-41320

Relation between satellite radio signal scintillations and magnetic activity

23 p3264 A72-43850

SPACECRAFT COMPONENTS

NT SERVICE MODULES

NT SPACECRAFT CABINS

NT SPACECRAFT MODULES

Microbiological examination of space hardware, discussing viable organisms neutralization buried inside solid materials, sampling procedures and culture media

01 p0019 A72-10820

Space flight hardware sterilization, considering dry heat and chemical destruction

01 p0019 A72-10822

Nonsterile space flight hardware effects on planetary quarantine, evaluating contamination sources, design and mission parameters, cleanliness conditions and biohazard

01 p0020 A72-10824

Long life aerospace explosive components, examining material degradation mechanisms and effects of

pressure, temperature, moisture, chemical reactions and impurities

08 p1219 A72-20759

International standardization of manned spacecraft components for rescue efforts and joint multinational space missions

09 p1395 A72-23154

Vehicle components oxidation in thermal control coatings, investigating resistance to oxidation by UV photoproduct ZnO electronic holes

[AIAA PAPER 72-264]

11 p1699 A72-25207

Reliability, quality and testing assurance in ATS F and G system, discussing computerized handling of spacecraft parts information

12 p1814 A72-27524

Laboratory irradiation tests with van de Graaff generator for simulation of spacecraft components radiation damage due to high energy space protons and electrons

12 p1863 A72-27552

Heat losses due to spacecraft installation discontinuities on aluminized Mylar multilayer insulation, predicting blanket performance

[AIAA PAPER 72-285]

14 p2171 A72-30829

French aerospace industry difficulties in procuring parts, suggesting purchasing centralization or setting up of parts stocks

17 p2639 A72-35951

Problems encountered in aerospace material components procurement, considering purchase centralization and inventories creation policies

18 p2743 A72-37125

Modular heat rejection system to accommodate widely varying thermal loads in space shuttles and future spacecraft, emphasizing commonality design philosophy for cost reduction

[ASME PAPER 72-ENAV-34]

20 p2976 A72-39144

Boron-aluminum structural component for Shuttle

24 p3458 A72-44890

SPACECRAFT CONFIGURATIONS

NT APOLLO TELESCOPE MOUNT

NT SATELLITE CONFIGURATIONS

Experiment sensors impact on on-orbit vehicle configurations and operations in NASA program, synthesizing and cost analyzing common module sets

01 p0135 A72-10945

Integral and modular space stations objectives, construction and utilization for astronomy, scientific experiments and technology

03 p0441 A72-14308

Space shuttle vehicle configurations with reusable booster and orbiter modules, discussing cargo capacity, maneuvering capability, mission duration, engine characteristics and acceleration constraints

07 p1085 A72-19058

Space shuttle phase B design studies regarding configurational alternatives, propulsion systems, displays and controls, simulations and flight test programs

08 p1240 A72-21009

European Special Space Tug structural and configurational layouts and problems

09 p1396 A72-23259

Liquid propellants coupling effects on parallel stage space shuttle configuration structural dynamics, using forty degree of freedom analytical model

[AIAA PAPER 72-347]

11 p1725 A72-25376

Unsteady airfoil stall and stall flutter analysis, discussing application to space shuttle configuration

[AIAA PAPER 72-380]

11 p1730 A72-25404

Solar electric propulsion upper stage for multiple space exploration missions, discussing spacecraft performance, configurations and program plans

[AIAA PAPER 72-464]

11 p1709 A72-26199

Space shuttle program, discussing configurational concepts, payload carrying capacity variants and cost reduction design changes

17 p2621 A72-34869

Parameters influencing dynamic stability characteristics of Viking-type entry configurations at Mach 1.76

17 p2622 A72-35494

Space shuttle configuration, discussing payload accommodation requirements, accessories, mission operations and reusable tug

[AIAA PAPER 72-737]

18 p2731 A72-36546

Russian book - Space ergonomics

21 p3004 A72-40300

Viking configuration pitch damping derivatives as influenced by support interference and test technique at transonic and supersonic speeds

[AIAA PAPER 72-1012]

21 p3041 A72-41593

Configuration analysis as applied to aerospace vehicle design synthesis

[SAWE PAPER 911]

23 p3342 A72-43458

Two early missions to comets in 1977-1980 as precursors to more ambitious missions in 1984-1986, discussing exploration objectives and spacecraft configurations

23 p3340 A72-44352

Rescue operation capability for Skylab, discussing mission requirements, response time and vehicle configuration

24 p3449 A72-45132

SPACECRAFT CONSTRUCTION MATERIALS

Space shuttle materials - Conference, Huntsville, Alabama, October 1971, Volume 3

01 p0090 A72-10726

Composite materials application for space shuttle structures, relating structural weight to payloads

01 p0090 A72-10727

Continuous casting of metallic tubular structural elements reinforced with boron filaments, stressing application to space shuttle structures

01 p0074 A72-10731

High temperature testing of metal matrix composites mechanical properties, noting aerospace structural applications

01 p0084 A72-10732

Hat section stiffened compression panel of graphite/epoxy composite for space shuttle, discussing quality control procedures

01 p0139 A72-10736

Composite space shuttle booster and orbiter engine support structures design and analysis, stressing weight savings

01 p0139 A72-10740

Space shuttle mechanical fastener design, discussing drives, threads, manufacturing and refractory alloys

01 p0075 A72-10751

TD nickel as construction material for rocket thrust chambers, discussing spin-forming, welding, machining, electric discharge machining and electroforming operations

01 p0075 A72-10753

Test program to evaluate metallic materials candidates for space shuttle booster thermal protection system

01 p0085 A72-10755

Adhesive materials based on room temperature vulcanizing silicone elastomers for space shuttle vehicle reusable surface insulation bonding

01 p0075 A72-10763

Silica based surface insulation material for space shuttle thermal protection system, discussing cyclic tests in simulated environment and fiber purity effects on crystallization

01 p0091 A72-10764

Zirconium diboride-silicon carbon-graphite composition for lifting entry vehicle hot leading edges, investigating mechanical behavior by tension and flexural tests

01 p0091 A72-10767

Refractory material development for space shuttle hydrogen tank reusable internal gas layer insulation

01 p0139 A72-10777

Oxidation screening at 2200 F of Ni, Fe and Co wrought alloys for space shuttle thermal protection system, noting microstructural changes

01 p0085 A72-10781

Characterization of graphite/polyimide composites for space shuttle applications

01 p0092 A72-10784

Combustion chamber and nozzle materials for fluorine and/or metal combustibles high energy propellant rocket engines, considering cooled and uncooled nozzles and spoiler plates

01 p0117 A72-10941

High modulus high strength graphite composites for aerospace structures, noting materials, machining properties and applications

[SME PAPER EM 71-191]

01 p0092 A72-10965

Macroscopic metal crystal plastic deformation applications to aircraft and spacecraft materials production, considering internal friction and energy conversion into strain energy and heat

01 p0071 A72-11020

Strain gage tests on three dimensional composites for reentry vehicle structural design evaluation

02 p0287 A72-11506

Optical mirrors contamination by condensation of outgassed spacecraft materials in vacuum under UV irradiation, describing test apparatus and results with various materials

[AIAA PAPER 72-267]

11 p1637 A72-25208

Thermal emittance, reflectance, absorptance and transmittance of aerospace materials

[AIAA PAPER 72-307]

11 p1742 A72-25241

Dimensional stability and micromechanical properties of materials for use in OAO, investigating residual stresses, creep properties and stress relaxation

[AIAA PAPER 72-325]

11 p1653 A72-25362

Reusable external insulation materials for space shuttle thermal protection, evaluating local heat transfer at interface areas in plasma arc test facility

[AIAA PAPER 72-388]

11 p1744 A72-25409

Beryllium sheet and foil application to lightweight space structures, discussing mechanical properties

[AIAA PAPER 72-404]

11 p1726 A72-25425

Satellite surface coating materials photoemission properties, discussing reflectance, work function, photoyield and photoelectron energy distributions

12 p1844 A72-27280

Environmental effects on spacecraft materials, structures and design, discussing sterilization, gravity, vacuum, micrometeoroids, radiation, etc

15 p2320 A72-31802

The manufacture of mullite reusable surface insulation materials for space shuttle.
[SME PAPER EM 72-714] 18 p2695 A72-36527

Interferometric holography for bond inspection in aerospace composite materials and honeycomb structures
19 p2806 A72-37607

Multi-cycle plasma arc evaluation of oxidation-inhibited carbon-carbon material for shuttle leading edges.
[ASME PAPER 72-ENAV-26] 20 p2894 A72-39151

Thermal conductivity of honeycomb sandwich panels for space applications.
22 p3244 A72-42650

Nonlinear elastic torsion analysis for aerospace materials.
23 p3354 A72-44251

Construction of a high-performance resistojel for satellite propulsion.
23 p3328 A72-44324

Utilization of advanced composite materials for spacecraft and space shuttle applications.
24 p3417 A72-45153

SPACECRAFT CONTAMINATION

Planetary quarantine microbiological and engineering problems, discussing cost, international policies, contamination and sterilization
01 p0019 A72-10818

Apollo 12 retrieved Surveyor 3 TV camera mirror surface and camera-shroud organic contamination attributed to spacecraft outgassing and engine exhaust products
03 p0415 A72-12948

Motion equations of constrained split fairing for avoiding contamination of sounding rocket payload environment by uncontained explosive activation device
05 p0724 A72-16102

Exobiology research objectives, discussing planetary exploration data on origin, nature and distribution of life, spacecraft contamination, manned and unmanned missions and specific mission targets
05 p0714 A72-16133

Rocket plume contamination effect on transmitting and reflecting materials optical properties, noting predominant absorption and scattering effects
[AIAA PAPER 72-56] 05 p0750 A72-16967

Forecasting technique for accumulated particulate contamination on spacecraft assemblies, discussing cleanliness optimization and test procedures
07 p0915 A72-18763

Surface contamination effect on alpha particle resolution of surface barrier detector/preamplifier combination for use in space environment
08 p1168 A72-21517

Temperature effects on microorganism survival in deep space vacuum, using molecular sink test
09 p1265 A72-22641

Spacecraft critical surfaces protection from molecular and particulate contamination sources including gloves, tissues, and covering or packaging materials
12 p1768 A72-27042

Orbiting satellite environment and self contamination, calculating pressure, density and condensation rates and adsorption layers on critical surfaces
15 p2321 A72-31870

Surface contamination effect on electron temperature measurement using rocket-borne Langmuir probe in lower ionosphere
15 p2236 A72-31926

Survival of common terrestrial microorganisms under simulated Jovian conditions.
19 p2755 A72-37721

Spacecraft atmosphere trace contaminant sensor system using mass spectrometric analysis of contaminants concentrated on sorbents in monitor inlet system
[ASME PAPER 72-ENAV-15] 20 p2896 A72-39162

Development of planetary quarantine in the United States.
23 p3259 A72-43382

A re-evaluation of material effects on microbial release from solids.
23 p3253 A72-43383

Effects of aeolian erosion on microbial release from solids.
23 p3253 A72-43384

Spacecraft functional properties degradation due to surface contamination with outgassing vapors, discussing contaminant materials transport and sorption characteristics
23 p3254 A72-43619

Microflora accumulation prevention methods during spacecraft flight, noting bacterial filters for air purification and wiping with disinfectants for surface contamination reduction
24 p3376 A72-45213

SPACECRAFT CONTROL

NT SATELLITE ATTITUDE CONTROL

NT SATELLITE CONTROL

Optimal control algorithm for spacecraft descent in atmosphere at speed near escape velocity, using game theory
01 p0135 A72-10298

Group matrix representation theory application to elastic spacecraft stabilization
01 p0135 A72-10497

Apollo spacecraft guidance and control systems, reviewing navigation objectives, concepts and performance during cislunar, rendezvous and landing maneuver phases
01 p0097 A72-10943

Control axes misalignment effects on spinning satellite wobble damping and requirements for active momentum exchange controllers
02 p0286 A72-12267

Nighttime airglow layer effect application to autonomous navigation and orientation of piloted space vehicles
02 p0256 A72-12289

Roll control algorithm for parabolic velocity spacecraft reentry, using successive stepwise extrapolation of approach trajectory parameters
05 p0685 A72-16431

Nonlinear and digital synthesis of computerized optimal control systems for long-life orbital stations and laboratories
05 p0724 A72-16434

Manual orbital control used on Soyuz spacecraft in orbital flight, investigating equations of motion and pilot work load
05 p0725 A72-16438

Spacecraft initial solar orientation techniques estimation and classification
05 p0685 A72-16444

Language for description of onboard control system location and attitude control operations during spacecraft maneuvering
05 p0726 A72-16456

Three dimensional global spacecraft attitude control system analytical design technique based on system stability considerations
05 p0726 A72-16457

Spacecraft precision off-on attitude control by pure jet torquing, using electronics based on control system idealized model
05 p0726 A72-16459

Optimal nonlinear logical filters for noise protection of space vehicle servosystems
05 p0726 A72-16460

Automatic control of ESRO drag-free deep space probe for measuring Robertson matrix beta and gamma constants
[ONERA, TP NO. 952] 05 p0727 A72-16468

Spacecraft attitude control system reliability and performance improvement through nonorthogonal coordinates application, using matrix technique
05 p0728 A72-16477

Gas jet attitude control systems for spacecraft, discussing accuracy and time of active operation
05 p0728 A72-16479

Satellites and spacecraft flight control systems, discussing approaches for stationkeeping and orbit determination/correction
05 p0729 A72-16746

Control system design computerized optimization technique based on high speed repetitive simulations and gradient minimization, considering application to reusable and expendable boost vehicles
[AIAA PAPER 72-98] 05 p0729 A72-16812

Large space vehicles automatic docking guidance and control system design, using single plane and six degrees of freedom analysis
[AIAA PAPER 72-99] 05 p0729 A72-16874

Spacecraft banking control during reentry, deriving dynamic equations of angular motion
05 p0730 A72-17026

Dynamic stability of controlled spacecraft with liquid propellant rocket engines, considering acceleration and braking sections of trajectory
05 p0730 A72-17027

Controlled motion dynamics of spacecraft performing maneuvers, applying point transformation to third-order nonlinear system moving about center of mass in lateral motion
05 p0730 A72-17029

Pulsed relay control system for stabilizing spacecraft orientation in flight, allowing for changes in characteristics of guidance sensor systems and slave mechanisms
05 p0731 A72-17031

Shuttle ascent guidance and control, discussing self targeting, trajectory optimization problems and flight phases
06 p0892 A72-18178

Space shuttle phase B design studies regarding configurational alternatives, propulsion systems, displays and controls, simulations and flight test programs
08 p1240 A72-21009

Nighttime airglow layer effect application to autonomous navigation and orientation of piloted space vehicles
10 p1508 A72-23758

Solar rudder for spacecraft steering in form of right circular cone with ideally reflecting surface
11 p1727 A72-25943

Parabolic velocity atmospheric reentry navigation algorithm for spacecraft control, demonstrating guidance accuracy to landing point
11 p1684 A72-26899

Spacecraft motion control algorithm for reentry at escape velocity based on object motion model
11 p1684 A72-26900

Spacecraft optimal control after transfer from hyperbolic trajectory to planetary satellite orbit by atmospheric drag, minimizing engine thrust
14 p2129 A72-30470

European synchronous meteorological satellite system Meteosat, discussing mission, control and data acquisition
15 p2265 A72-31345

Conical scanning system for Pioneer Jupiter spacecraft pointing control, discussing signal processor, spacecraft dynamic behavior, system stability and error budget
15 p2320 A72-31791

Flexible space vehicle multiple closed loop attitude control system design, discussing stability, structure interaction and performance by analog simulation
15 p2321 A72-32587

Russian book - Mathematical methods of modeling in space studies
17 p2607 A72-35026

A method of realization of the functions of a program timer on a computer used in a spacecraft on-board equipment control system
17 p2522 A72-35028

Controlled systems with discontinuous couplings and means of optimization of their control
17 p2621 A72-35035

Synthesis of a nonlinear law for spacecraft motion control in the earth's atmosphere
17 p2621 A72-35201

Synthesis of a nonlinear law for the control of spacecraft motion in the atmosphere of the earth
17 p2621 A72-35202

Parabolic switching boundaries method for optimal fuel consumption control of manned orbital space vehicles
18 p2672 A72-36325

Design of model-reference adaptive control systems using Liapunov functions.
18 p2672 A72-36326

Astroelasticity in design and analysis of flexible space vehicles, presenting dynamics and control considerations
18 p2738 A72-37082

Invariant poles feedback control of flexible, highly variable spacecraft.
19 p2869 A72-38240

Development of coordinate signal transmission and data processing equipment for operation supervision in space travel
19 p2765 A72-38305

Constrained payload-optimum extremal ascent trajectories for space shuttle vehicles.
[AIAA PAPER 72-829] 20 p2966 A72-39097

The development of a 150,000 watt-inch variable conductance heat pipe for space vehicle thermal control.
[ASME PAPER 72-ENAV-14] 20 p2896 A72-39163

Proportional control of space vehicles with the aid of auxiliary jet engines
20 p2977 A72-39593

A control algorithm for the orbital reentry of a space vehicle
22 p3223 A72-42206

Motor activity capability of an astronaut in flight
22 p3149 A72-42220

An attitude reference system with discrete-correction capability.
22 p3203 A72-42864

A simple algorithmic method for the simulation of a spacecraft with flexible appendages.
23 p3343 A72-44552

SPACECRAFT DESIGN

NT SATELLITE DESIGN

Manned space station design for astronomy, space physics and biology, earth surveys, aerospace medicine, materials science and advanced technologies applications
01 p0135 A72-10937

Space vehicles development and fabrication cost estimation, deriving statistical-analytical formulas with allowance for technical complexity and learning factor
01 p0147 A72-11219

Aerodynamic design of atmospheric reentry vehicles forebody, considering maximum drag for hypersonic bodies
02 p0149 A72-11726

Post Apollo program, considering space shuttle design, operation, transportation and payload cost reduction, rocket developments and plans for Mars expedition
03 p0440 A72-13612

Small astronomy satellite program for X ray experiments and mapping, discussing structure design, systems, testing and launching
03 p0441 A72-14395

Lifting reentry vehicle Bumerang design and development, discussing experimental verification of theoretical design concepts by aircraft launched unmanned flying model

05 p0724 A72-16312

Time optimal and fuel optimal control of spin stabilized space vehicle for body-fixed and gimbaled jets, using maximum principle

05 p0728 A72-16476

Extrapolation procedure for determining small-scale wind shear definition from Rawinsonde vertical wind profiles statistical data for aerospace vehicle design

07 p1085 A72-19687

Space shuttle phase B design studies regarding configurational alternatives, propulsion systems, displays and controls, simulations and flight test programs

08 p1240 A72-21009

Delta wing configuration design with anhedral heat shield for high lift reentry in 6-20 Mach number range [AIAA PAPER 72-132]

09 p1259 A72-22501

Soviet interplanetary spacecraft Mars 2 and 3, describing design, mission objectives, onboard systems and instrumentation

09 p1395 A72-22974

Emergency reentry manned spacecraft remedial concepts, mission constraints and system designs in terms of cost effectiveness

09 p1396 A72-23159

ITOS-1/Tiros M/ satellite design, describing structure, thermal and attitude control, primary and secondary sensor subsystems, power supply and operational goals

09 p1396 A72-23373

Safety design review for Skylab program based on experience from prior space projects and ground tests

10 p1550 A72-23990

Statistical-analytical cost models for spacecraft development and fabrication, taking into account various technical and management factors

10 p1564 A72-24026

Econometric approach to space shuttle design for optimum operational redundancy levels, using payload-cost effectiveness criterion

10 p1551 A72-24448

Product assurance cost aspects on high reliability space programs, discussing design, packaging, failure trends, acceptance testing and Apollo project

10 p1551 A72-24452

Multimission capability of solar electric propulsion (SEP) spacecraft, analyzing payload variations, propellant requirements, thrusting time limitations and throttling range

10 p1552 A72-25125

Thermal boundary layer interaction with distortions in shape or material of adjacent surface for space shuttle design

11 p1614 A72-25246

Computerized structural design of aerospace vehicle, stressing automated routines for finite element models generation

11 p1727 A72-25367

Spacecraft structural dynamics, design and testing, using Fourier transform and analog vibration simulation

11 p1728 A72-25378

Electric propulsion spacecraft design for ion thruster systems testing with circular solar cells array as gyroscopic stable platform

11 p1578 A72-26200

Design of Salyut manned orbital laboratory combined with Soyuz service module

12 p1876 A72-27107

Space Shuttle supported manned earth orbital laboratories for operational communication and navigation systems, discussing mission program, design and equipment

12 p1876 A72-27357

Space technology application to ATS F and G program, discussing high power requirements, parabolic antenna design, tracking accuracy and ground station simplification

12 p1870 A72-27523

Space tug design constraints, configurational alternatives, subsystem arrangements, docking system, propellant tank pressurization system, main engine and power supply, etc

13 p2051 A72-28933

Mars 3 probe design and mission details, covering trajectory correction lander separation, engine start-up, aerodynamic braking and dust storm data

14 p2151 A72-30477

Environmental effects on spacecraft materials, structures and design, discussing sterilization, gravity, vacuum, micrometeoroids, radiation, etc

15 p2320 A72-31802

Second generation European multi-mission launcher system for scientific and application satellites, using high energy propulsion modular design

15 p2320 A72-31804

Space shuttle payload design for weight and cost reduction, discussing refurbishable modular design concept

15 p2321 A72-32317

Flexible space vehicle multiple closed loop attitude control system design, discussing stability, structure interaction and performance by analog simulation

15 p2321 A72-32587

Bumerang lifting body design for reentry vehicles, discussing optimal configurations and experimental flight testing

16 p2462 A72-33050

Space shuttle program, discussing configurational concepts, payload carrying capacity variants and cost reduction design changes

17 p2621 A72-34869

Astroelasticity in design and analysis of flexible space vehicles, presenting dynamics and control considerations

18 p2738 A72-37082

Compact expressions for maximum and minimum eclipse durations of spacecraft circular orbit, presenting numerical data as aid to spacecraft design

19 p2862 A72-38021

Recent development on thermal design of spacecraft

21 p3115 A72-41125

Viking configuration pitch damping derivatives as influenced by support interference and test technique at transonic and supersonic speeds

21 p3041 A72-41593

Configuration analysis as applied to aerospace vehicle design synthesis

23 p3342 A72-43458

Structural problems of the helios solar probe

24 p3449 A72-45122

Viking Mars exploration project, discussing orbiter and lander design and operational features and scientific experiments relevant to existence of life

24 p3440 A72-45123

OSO pointing accuracy improvement through dual spin stabilization, discussing OSO design evolution

1962-72

24 p3449 A72-45145

Aircraft/spacecraft design approach and performance data, considering space shuttle program

24 p3467 A72-45159

Space shuttle design evolution for program cost minimization, discussing refurbishment, payload impact, management cost and mission specifications and objectives

24 p3450 A72-45171

The Agena orbit transfer stage as an interim space tug

24 p3451 A72-45195

Design and operation objectives and constraints for German scientific spacecrafts, discussing orbital performance and reliability and quality control requirements

24 p3451 A72-45205

The effect of space shuttle payload design techniques on total space program cost

24 p3451 A72-45210

The space tug optimum cost evaluation

24 p3468 A72-45212

Helios solar probe development, discussing scientific experiments, structural, thermal and engineering models and systems tests

24 p3451 A72-45214

SPACECRAFT DOCKING

Large space vehicles automatic docking guidance and control system design, using single plane and six degrees of freedom analysis

05 p0729 A72-16874

Spaceborne laser radar for target acquisition and tracking in spacecraft rendezvous and docking applications

07 p0943 A72-19387

Apollo 14 mission report covering crew training, launch, docking, lunar landing and surface activities

08 p1230 A72-21006

Skylab launch and mission program, describing modular components, crew training, checkout, launch and docking procedures, flight plan and crew working schedules, rescue and reentry procedures, etc

08 p1240 A72-21008

Solar electric propulsion application to comet and asteroid rendezvous and docking CARD missions with sample return

11 p1722 A72-26201

Space tug design constraints, configurational alternatives, subsystem arrangements, docking system, propellant tank pressurization system, main engine and power supply, etc

13 p2051 A72-28933

The space tug orbital operations

24 p3451 A72-45196

SPACECRAFT ELECTRONIC EQUIPMENT

NT AIRBORNE/SPACEBORNE COMPUTERS

Spacecraft electronic equipment requirements, discussing effects of planned missions

02 p0196 A72-12739

Spacecraft electronic equipment design criteria for maintainability and installation, discussing mockup zero g demonstration tests of new packaging concepts

10 p1487 A72-24445

Electric power supply systems for satellites, discussing packaging standardization of electronic circuits modules

13 p1900 A72-30096

Survey of current component reliability problems and methods for prevention

18 p2668 A72-37102

Spaceflight-qualified tunable C-band parametric amplifier system

19 p2770 A72-37253

S-band high power microstrip switches with p-i-n diodes for spacecraft radio systems

19 p2770 A72-37257

Thermal control system incorporation into lunar roving vehicle (LRV) for electronic component protection during translunar transportation and lunar surface operation

[ASME PAPER 72-ENAV-27] 20 p2894 A72-39150

Navigation satellite system based on triangular distance measurement between two satellites and aircraft, noting simplification of air- and satellite-borne equipment requirements

21 p3080 A72-40285

Spacecraft-borne computer and electronic systems interface for radio reception, transmission and TV imagery applications

21 p3014 A72-40309

Biological instrumentation for the Viking 1975 mission to Mars

23 p3259 A72-43396

SPACECRAFT ENVIRONMENTS

MORL and Orbital Biomedical Laboratory projects, reviewing crew accommodation, spacecraft and booster requirements and biomedical measurements

05 p0724 A72-16177

Chromosome aberrations and germination speedup in Soyuz 5 carried oat seeds, noting stimulating effect by preflight ethylenimine treatment

05 p0623 A72-16777

Skylab experimental space station, discussing environmental comfort, Apollo spacecraft rendezvous for crew rotation and onboard experiments in earth resources, biomedicine, astronomy, etc

06 p0893 A72-18611

Weightlessness effects on human organism, discussing physiological changes, artificial gravity by spacecraft rotation and exercise to counter adverse reactions

11 p1589 A72-26891

Radar backscattering cross section and power of conducting cylindrical spacecraft in compressible electron-ion plasma environment

12 p1779 A72-27173

ESRO satellites solar array performance under orbital environmental conditions, discussing radiation damage and earth albedo effects

12 p1759 A72-28047

Meteorological-astronomical diurnal and seasonal environmental rhythm simulation for psychological stresses alleviation in long term space missions

13 p1910 A72-29322

Russian book on thermal simulation of spacecraft and space environment covering heat transfer, cosmic radiation, vacuum chambers, radiant flux simulators, etc

15 p2319 A72-31275

Orbiting satellite environment and self contamination, calculating pressure, density and condensation rates and adsorption layers on critical surfaces

15 p2321 A72-31870

Radiation hazards in space with respect to galactic radiation shielding, solar flare prediction and conventional terrestrial safety standards

16 p2358 A72-33556

Sleep factors and limitations during prolonged space flights, considering weightlessness, hypokinesia, nervous tension, cabin confinement, rhythm, environment and noise effects

16 p2356 A72-33561

Astronauts red cell mass changes associated with space flight due to space and earth environment differences

16 p2356 A72-33564

Soyuz 5 satellite vehicle space flight factors effect on chlrella cells, investigating survival rates and mutability

17 p2505 A72-35279

Habitability factors in a rotating space station

18 p2652 A72-36436

Space station prototype environmental/thermal control and life system - A current overview

[ASME PAPER 72-ENAV-35] 20 p2894 A72-39143

Modular environmental control/life support system design for low cost shuttle launched space station, evaluating humidity, carbon dioxide, water and waste management

[ASME PAPER 72-ENAV-17] 20 p2895 A72-39160

Development of a spacecraft wet oxidation waste processing system

[ASME PAPER 72-ENAV-3] 20 p2896 A72-39174

Dry incineration of wastes for aerospace waste management systems

[ASME PAPER 72-ENAV-2] 20 p2896 A72-39175

Toxicological evaluation of some synthetic materials designed for airtight space equipment
21 p2998 A72-40434

Some transport techniques for liquid human wastes and wash water under space flight conditions
21 p3006 A72-40436

Influence of Cosmos 368 space flight conditions on radiation effects in yeasts, hydrogen bacteria and seeds of lettuce and pea.
23 p3254 A72-43390

The problem of decontaminating and preserving drinking water in spacecraft water supply systems
24 p3375 A72-45121

SPACECRAFT GUIDANCE

NT SATELLITE GUIDANCE

Optimal control for thrusting rocket guidance with controllable steering angle rate during insertion into circular orbit, using flat earth approximation
01 p0097 A72-10383

Minimum propellant impulsive optimal spacecraft guidance and trajectory problem, developing deterministic theory in discrete linear quadratic form with second order perturbation analysis
01 p0130 A72-10929

Apollo spacecraft guidance and control systems, reviewing navigation objectives, concepts and performances during cislunar, rendezvous and landing maneuver phases
01 p0097 A72-10943

Soviet book on electro-optical devices for space vehicles orientation and navigation covering vertical plotters and sun, planet and star trackers
02 p0256 A72-12125

Space vehicles guidance with UV optical systems, describing photometric celestial images with various receptors and different wavelength bandwidth selection
03 p0354 A72-13054

Spacecraft soft orbital rendezvous guidance involving orbital transfer maneuver for velocity vector directional coincidence to reduce terminal relative velocity
05 p0729 A72-16757

Large space vehicles automatic docking guidance and control system design, using single plane and six degrees of freedom analysis
05 p0729 A72-16874

Shuttle ascent guidance and control, discussing self targeting, trajectory optimization problems and flight phases
06 p0892 A72-18178

Explicit analytic guidance technique for hyperbolic approach phases of lunar and interplanetary spacecraft trajectories from first order solution for perturbed planet centered trajectory
07 p1032 A72-18944

German monograph on optimal guidance of spin stabilized space bodies for combined attitude and angular velocity control and time optimal rotation damping
08 p1241 A72-21847

German monograph on inertial platform stabilization by optical sensors for space vehicle guidance covering aircraft position determination
09 p1394 A72-22334

Terminal guidance systems and techniques application to manned space flight rescue operations, discussing emergency location and rescue spacecraft communication and guidance
09 p1396 A72-23158

Spacecraft interplanetary guidance trajectory correction, deriving algorithm for optimal accuracy and minimum fuel expenditure
11 p1718 A72-25931

Cruise guidance, trajectory and navigation analysis for solar electric Mercury orbiter, considering engine performance, thrust and terminal errors
11 p1684 A72-26172

Aerospace guidance multiprocessor with memory units attached to time-multiplexed data bus, predicting performance in terms of queueing theory, Markov process and simulation
12 p1786 A72-27433

Outer planets masses and ephemerides, noting guidance system and fuel quantity for orbit corrections on interplanetary flight
15 p2312 A72-32181

Low thrust spacecraft navigation requirements for minimum propellant guidance, using neighboring extremal law
15 p2270 A72-32194

Steering algorithm for fail-safe guidance of continuously thrusting interplanetary spacecraft to maintain ballistic intercept target objective
15 p2271 A72-32195

Optimal deterministic guidance for bounded-thrust spacecrafts.
17 p2609 A72-35101

Analytical guidance in the neighborhood of optimal multi-impulse trajectories.
17 p2609 A72-35102

Spacecraft soft orbital rendezvous guidance involving orbital transfer maneuver for velocity vector directional coincidence to reduce terminal relative velocity
17 p2622 A72-35260

Digital simulations of effects of two-antenna interference on space vehicle guidance.
19 p2830 A72-37292

Spacecraft orientation according to reference celestial bodies direction determination, noting successive orientation permissible time intervals
19 p2831 A72-38149

An explicit automatic terminal energy management guidance technique for space shuttle.
20 p2950 A72-39094

High accuracy approach guidance system for outer planet exploration.
20 p2951 A72-39132

A detailed analysis of Mariner nine TV navigation data.
20 p2977 A72-40061

Perturbation guidance for minimum time flight paths of spacecraft.
21 p3082 A72-41560

Computer simulation of retargeting procedure with closed form iterative solution and parameter optimization for nonlinear low thrust spacecraft guidance scheme
21 p3082 A72-41561

Guidance and navigation techniques for a solar electric Mercury orbiter.
21 p3082 A72-41562

Evaluation of optical data for Mars approach navigation.
24 p3422 A72-44646

On required guidance for transfer from hyperbolic trajectory to the planetary satellite orbit by aerodynamic drag in atmosphere.
24 p3450 A72-45176

Optimal guidance for the space shuttle transition.
24 p3422 A72-45186

High level cleanliness maintenance and contamination control for instrument unit ring guidance system in Saturn 5 launch vehicle
24 p3388 A72-45297

SPACECRAFT INSTRUMENTS

NT LASER ALTIMETERS

NT SATELLITE INSTRUMENTS

NT SPACECRAFT POSITION INDICATORS

Space shuttle orbiter flight instrumentation, data handling and communication requirements, discussing data gathering methods, crew displays, computer processing, recording and digital data bus telemetry
02 p0179 A72-12406

NASA spacecraft instrumentation for high energy phenomena measurements, discussing collimated proportional counters, wire grid digitized spark chambers and modulation and slit collimators
03 p0353 A72-13038

Coarsely stabilized spacecraft-borne Michelson interferometer, obtaining high resolution by computerized spectrum reconstruction with fast Fourier transform
03 p0354 A72-13055

Spacecraft-borne UV spectroheliograph with spherical mirror, considering moving part weight reduction
03 p0355 A72-13057

Long life magnetic tape recorder for onboard data storage in space flights, discussing two motor tape transport and static memories for improved reliability
03 p0360 A72-13767

Impedance determination for symmetrical spherical probes and spacecraft housing with flat screen separation, using partial capacitance formula
05 p0662 A72-16268

Proton recording equipment onboard automatic interplanetary stations Zond 4 and 5 at 1.5-50 MeV using silicon drift counters
06 p0814 A72-17699

OSO-H solar X ray instrument for solar flares energy release investigation via thermal and nonthermal electrons X ray emission
08 p1167 A72-21514

Gamma ray spectrometer with antiCompton shield for OSO-7 spacecraft
08 p1167 A72-21515

Surface contamination effect on alpha particle resolution of surface barrier detector/preamplifier combination for use in space environment
08 p1168 A72-21517

ESRO program in imaging detector development for UV and soft X ray space missions, presenting image storage target details
08 p1171 A72-21971

High resolution vidicons, image orthicons, esicons and ebicons design for space missions
08 p1171 A72-21972

Bimetallic actuator for spacecraft thermal control with design emphasis on external power source elimination, high reliability, frictionless operation, simplicity and low weight
09 p1305 A72-22249

SkyLab S-193 altimeter experimental mission objectives and spacecraft instrumentation, considering precision designs, oceanographic surface remote sensing and electromagnetic scattering measurement
09 p1306 A72-22317

European Special Space Tug electronic subsystem requirements, considering strapdown inertial measur-

ing unit, remote sensors, computer and fail-safe backup system
09 p1396 A72-23258

Energetic particle flux measurement on spacecraft based on statistics of overflowing register counting Poisson process
09 p1312 A72-23261

Spacecraft orientation angle measurement by inertial sensors, analyzing equipment kinematic efficiency and limitations
11 p1684 A72-26913

Spaceborne scatterometer measurement standard deviation derivation, noting integration time, signal bandwidth and SNR effects on accuracy
12 p1783 A72-27636

Apollo 15 orbital science payload instruments for exploring lunar origin and evolution to relate to earth history
15 p2310 A72-31984

Spacecraft onboard compact low-power coherent optical data processing system, using GaAs laser and paraboloid mirror segments
15 p2248 A72-32052

Space and upper atmosphere environmental effects on spacecraft and instrument surfaces, considering high energy particle radiation, interstellar and lunar dust effects, etc
18 p2712 A72-36832

Russian book - Equipment for space studies.
21 p3014 A72-40301

Photogrammetric method for determining the deflection of light beams by spacecraft windows during flight
21 p3052 A72-40305

Space applications of Fabry-Perot modulator as alternative to mechanical devices, presenting optical and electrical performance data for different temperatures
21 p3055 A72-40824

A bivariate normal theory maximum-likelihood technique when certain variances are known.
21 p3075 A72-40826

Analysis of cryogenic suspensions for use in spacecraft
22 p3230 A72-42208

Evaluation of optical data for Mars approach navigation.
24 p3422 A72-44646

Extraterrestrial electromagnetic radiation and particle flux characteristics of low and medium energy, considering onboard spacecraft measuring instruments and data processing systems
24 p3404 A72-45398

SPACECRAFT LANDING

NT LUNAR LANDING

NT MARS LANDING

NT PLANETARY LANDING

Unpowered shuttle orbiter piloted control during approach and landing, discussing energy management technique based on fixed base six degree of freedom simulation
10 p1551 A72-24438

Spacecraft reentry into random medium atmosphere, determining optimal control procedure for prescribed arrival region and time with simulation equation
11 p1686 A72-25930

Landing control algorithm using onboard digital computer for spacecraft hyperbolic velocity reentry, discussing simulation test results
11 p1684 A72-26898

Spacecraft rescue/recovery capabilities, discussing in-flight escape, ground egress and descent systems, performance and technical and human factors
24 p3450 A72-45147

SPACECRAFT LAUNCHING

Guiana Space Center launch complexes for Diamant B and Europa satellite launchers and rocket probes, discussing trajectory, telemetry and safety measures
03 p0339 A72-12912

Apollo 14 mission report covering crew training, launch, docking, lunar landing and surface activities
08 p1230 A72-21006

Spacecraft mean time to failure (MTTF) and launch success probability /LSP/ effects on annual satellite system costs
09 p1395 A72-22775

Ionospheric disturbances due to shock front from Apollo 15 launching, using split signal observation in ion acoustic and normal mode
09 p1397 A72-23569

Titan 3 family systems analysis for delivering multiple communication satellites to geostationary orbits
12 p1870 A72-27378

Spacecraft propulsion into orbit by ground based high-power lasers via thrust generation by material evaporation, emphasizing advantages in launching small payloads
13 p2025 A72-28454

Waxwing solid propellant rocket motor design for third stage propulsion of Black Arrow satellite launcher
13 p2026 A72-28932

Space shuttle applications as spacecraft launcher, unmanned instrumentation platform and manned laboratory, discussing advantages to space research

13 p2051 A72-28935

Booster launch vehicle guidance scheme for critical aborts from staging through burnout, minimizing aerodynamic phases for different landing sites

15 p2269 A72-32182

Resource allocation for minimum cost launch vehicle assignment to space missions, using network and dynamic programming algorithm

16 p2482 A72-33498

Controlled systems with discontinuous couplings and means of optimization of their control

17 p2621 A72-35035

Real-time launch vehicle steering program selection. [AIAA PAPER 72-830]

20 p2977 A72-40058

Minimum energy trajectory and propellant consumption considerations for launch windows to Mars and Venus planets with Grand Tour mission possibilities

23 p3336 A72-43553

Optimization of altitude and inclination change schedules during low thrust ascent to geosynchronous orbit.

24 p3440 A72-45150

SPACECRAFT LUBRICATION

Self lubricating polytetrafluoroethylene and polyimide composites transfer film formation tests, studying film thickness and uniformity

06 p0824 A72-18596

SPACECRAFT MANEUVERS

Transfer from high elliptical to circular orbit, using successive spacecraft braking maneuvers in planetary atmosphere with incomplete information

01 p0130 A72-10927

Optimal dynamic system design for maneuvers with complete statistical information applied to limited power space flight

05 p0641 A72-16313

European reusable space tug, discussing computer controlled attitude stabilization and maneuvering system design for orbital rendezvous and docking

05 p0725 A72-16446

Language for description of onboard control system location and attitude control operations during spacecraft maneuvering

05 p0726 A72-16456

Spacecraft soft orbital rendezvous guidance involving orbital transfer maneuver for velocity vector directional coincidence to reduce terminal relative velocity

05 p0729 A72-16757

Controlled motion dynamics of spacecraft performing maneuvers, applying point transformation to third-order nonlinear system moving about center of mass in lateral motion

05 p0730 A72-17029

Adaptive filter techniques application to maneuvering reentry vehicle tracking, using Wald sequential test, decision theory and stochastic approximation

10 p1509 A72-23779

Optimal dynamic system design for maneuvers with complete statistical information applied to limited power space flight

11 p1610 A72-25796

Elliptical orbiting spacecraft minimum fuel consumption rendezvous maneuver, formulating variational extremum problem with constraints

14 p2150 A72-30329

Iterative method for the calculation of two-impulse spacecraft rendezvous maneuvers

17 p2622 A72-35216

Spacecraft soft orbital rendezvous guidance involving orbital transfer maneuver for velocity vector directional coincidence to reduce terminal relative velocity

17 p2622 A72-35260

Nonlinear on-line rapid estimation scheme with application to trajectory maneuvering vehicles.

19 p2781 A72-38258

Experimental and simulation study results on the development of a planetary landing site selection system.

[AIAA PAPER 72-868]

20 p2951 A72-39131

High accuracy approach guidance system for outer planet exploration.

[AIAA PAPER 72-867]

20 p2951 A72-39132

Optimal three dimensional maneuvering of a rocket powered hypervelocity vehicle.

24 p3450 A72-45151

Thrust-weight ratio optimization for spacecraft orbit inclination change maneuver, deriving motion kinematics via point mass gravitational model

24 p3440 A72-45167

Spacecraft rendezvous trajectories and targeting maneuvers onboard sequential computation, taking into account maneuver constraints and state vector update information

24 p3450 A72-45172

A teleoperator system for space application.

24 p3407 A72-45174

Maneuver design and implementation for the Mariner 9 mission.

[AIAA PAPER 72-913]

24 p3443 A72-45429

Maneuver strategies for multi-planet missions.

[AIAA PAPER 72-914] 24 p3443 A72-45431

SPACECRAFT MODELS

Imperfect thermal modeling of spacecraft based on error states representation in multidimensional Euclidean space, evaluating approximate total error effect

03 p0441 A72-13635

Lifting reentry vehicle Bumerang design and development, discussing experimental verification of theoretical design concepts by aircraft launched unmanned flying model

05 p0724 A72-16312

Si solar cells nonpenetrating proton damage model in satellite radiation environment, showing open and short circuit current dependence on proton energy

07 p0914 A72-20492

Thermal nodal analysis of spacecraft hull-canister model from space simulation test, using least squares estimation and regression analysis

09 p1412 A72-23497

Finite element equations for hybrid coordinate dynamic analysis of interconnected rigid bodies with elastic flexible appendages for use in spacecraft simulation

12 p1876 A72-27257

SPACECRAFT MODULES

NT LUNAR MODULE

Experiment sensors impact on on-orbit vehicle configurations and operations in NASA program, synthesizing and cost analyzing common module sets

01 p0135 A72-10945

Space shuttle vehicle configurations with reusable booster and orbiter modules, discussing cargo capacity, maneuvering capability, mission duration, engine characteristics and acceleration constraints

07 p1085 A72-19058

NASA research and applications module /RAM/ for interim space station development and possible missions with space shuttle

08 p1240 A72-20978

Skylab launch and mission program, describing modular components, crew training, checkout, launch and docking procedures, flight plan and crew working schedules, rescue and reentry procedures, etc

08 p1240 A72-21008

Human role in space shuttle on-orbit maintenance vs space station modules earth return, considering feasibility and cost effectiveness

10 p1487 A72-24440

Thermal control design for research applications module /RAM/ shuttle compatible payload carriers, using Freon 21-water system

[ASME PAPER 72-ENAV-31]

20 p2894 A72-39146

Design criteria for the modular space station environmental control and life support system selection.

[ASME PAPER 72-ENAV-25]

20 p2894 A72-39152

Environmental control and life support subsystem conceptual design studies for shuttle launched 6-12

man crew modular space station

[ASME PAPER 72-ENAV-22]

20 p2895 A72-39155

Optimal shuttle research applications module /RAM/ environmental control and life support system for sortie missions

[ASME PAPER 72-ENAV-20]

20 p2895 A72-39157

Future orbital observatory modules for stellar and galactic astronomy.

24 p3453 A72-45533

SPACECRAFT MOTION

German book on gyroscope theory and applications, covering artificial satellites motion in gravitational field

03 p0360 A72-13675

Relative motion of active interceptor spacecraft approaching passive craft in central gravitational field, using dimensionless differential equations similarity coefficients method

05 p0728 A72-16592

Earth satellite plane periodic oscillations damping with respect to center of mass in orbital plane during motion on elliptical Kepler orbit

05 p0730 A72-17030

Center of mass motion of spacecraft in central gravitational field, analyzing programming of size and position of elements in mass geometry leading to arbitrarily large displacements

05 p0731 A72-17032

Aberration introduced by high satellite velocities, investigating application to laser telemetry

07 p0947 A72-20258

Moment of forces on spacecraft with low angular velocities in variable magnetic field, using electrodynamics equations

08 p1240 A72-21140

Earth-moon system gravitational effect on Venera automatic interplanetary stations motion away from earth

08 p1239 A72-22086

Spacecraft motion stabilization about mass center and optimal angular velocity control using minimax technique

11 p1684 A72-26903

Dynamical motion simulation facility for Symphonie satellite, using sensors, attitude control electronics and analog computer in closed loop system [DFVLR-SONDDR-201]

12 p1795 A72-27659

Oscillations of spacecraft with on-off attitude control under constant perturbation moment, calculating energy expenditures for desired orientation maintenance

14 p2162 A72-30459

Earth-moon system gravitational effect on Venera automatic interplanetary stations motion away from earth

17 p2606 A72-34655

Spacecraft oscillatory motion as function of attitude control impulse and slave mechanism efficiency

17 p2622 A72-35205

Relative motion of active interceptor spacecraft approaching passive craft in central gravitational field, using dimensionless differential equations similarity coefficients method

19 p2869 A72-37564

Moment of forces on spacecraft with low angular velocities in variable magnetic field, using electrodynamics equations

20 p2976 A72-39245

Influence of the terrestrial magnetic field on the motion of a satellite around its center of gravity

21 p3106 A72-41048

Kepler second law based moment of gyration concept application to spacecraft and missiles mechanics and kinematics, proposing Skylab weightless environment experiment for validation [SAWE PAPER 931]

23 p3342 A72-43471

SPACECRAFT ORBITS

NT INTERPLANETARY TRANSFER ORBITS

NT PARKING ORBITS

NT POLAR ORBITS

NT SATELLITE ORBITS

NT STATIONARY ORBITS

NT TRANSFER ORBITS

NT TROJAN ORBITS

NT TWENTY-FOUR HOUR ORBITS

Orbiting space vehicle life extension by momentum management using gravity gradient torques

05 p0727 A72-16467

Satellites and spacecraft flight control systems, discussing approaches for stationkeeping and orbit determination/correction

05 p0729 A72-16746

Rocket orbit in mass point gravitational field, studying KS variables separability, elliptic functions and equivalent problems

06 p0877 A72-17656

Shock wave generation and propagation from Apollo rockets at orbital altitudes

11 p1690 A72-26511

Error sources in numerical integration of spacecraft equations of motion in solar and planetary gravitational fields, suggesting methods for improving accuracy

14 p2151 A72-30457

Data processing method for optimal prediction of spacecraft orbital elements, using dynamic and quadratic programming

14 p2151 A72-30455

Spacecraft optimal control after transfer from hyperbolic trajectory to planetary satellite orbit by atmospheric drag, minimizing engine thrust

14 p2129 A72-30476

First approximation for spacecraft observations of nocturnal clouds from circular orbits with optimal optical axis orientations

21 p3049 A72-41438

Spacecraft local vertical estimation and error limits in meridional and equatorial planes based on terrestrial IR radiation measuring instruments

22 p3223 A72-42205

A control algorithm for the orbital reentry of a space vehicle

22 p3223 A72-42206

Dynamic characteristics, stability and steady state accuracy for orbital gyroscope with digital control, noting bit density requirements of onboard computer

22 p3202 A72-42207

SPACECRAFT PERFORMANCE

Satellite low orbit transfer to stationary orbit, emphasizing stage and payload recovery effects on performance

01 p0130 A72-10936

Spacecraft attitude control system reliability and performance improvement through nonorthogonal coordinates application, using matrix technique

05 p0728 A72-16477

Solar electric propulsion upper stage for multiple space exploration missions, discussing spacecraft performance, configurations and program plans [AIAA PAPER 72-464]

11 p1709 A72-26199

Solar array degradation effect on electric propulsion spacecraft performance, presenting power allocation strategy during mission

[AIAA PAPER 72-444]

13 p2037 A72-28943

Intelsat 3 global multichannel wideband multiple access communication system, describing technological advancements in communication performance, attitude control and testing procedures

[AIAA PAPER 72-534]

13 p1918 A72-28982

Experimental communications satellite system of ATS F and G geostationary satellites for specific ap-

- plication, discussing system performance measurement instruments
[AIAA PAPER 72-578] 13 p1918 A72-28986
- Description and in-orbit performance of the Orbiting Solar Observatory control system.
[AIAA PAPER 72-852] 20 p2975 A72-39077
- HEOS-2 in orbit - Its technical performance.
24 p3449 A72-45108
- Design and operation objectives and constraints for German scientific spacecrafts, discussing orbital performance and reliability and quality control requirements
24 p3451 A72-45205
- SPACECRAFT POSITION INDICATORS**
- Flight laser altimeter for Apollo vehicle height measurements above lunar surface, using telescope relay and quartz crystal oscillator
05 p0660 A72-15786
- Atomic clocks application to spacecraft position determination, discussing ground stations synchronization and accuracy improvement by lasers [ONERA, TP NO. 1020] 05 p0660 A72-15858
- Three axis angular deviations measurement by flexure monitor system for spacecraft, using pulsed light sources, autocollimator and porro reflectors
[AIAA PAPER 72-855] 20 p2951 A72-39106
- Choice of parameters to be measured in determination of a spacecraft trajectory
22 p3223 A72-42201
- Spacecraft local vertical estimation and error limits in meridional and equatorial planes based on terrestrial IR radiation measuring instruments
22 p3223 A72-42205
- SPACECRAFT POWER SUPPLIES**
- Aerospace radioisotope power systems, discussing heat source technology, shielding, safety and thermoelectric integration
[SAE AIR 1213] 01 p0098 A72-10387
- Charging methods for Ni-Cd batteries used in satellites, noting life increase and weight reduction
01 p0007 A72-11054
- Design and performance of Intelsat III dual TWT power supply, noting space, weight and cost savings
01 p0007 A72-11056
- Dc-dc converter input filter requirements and design for spacecraft power processing equipment
01 p0007 A72-11058
- Multiphase, 2 kw, high voltage, regulated, conditioned power supply for space application, discussing efficiency, weight, design and performance
01 p0008 A72-11063
- Electrical power subsystem design in Pioneer F/G spacecraft, using SNAP 19 deployable radioactive thermoelectric generators supplemented by Ag-Cd battery
01 p0008 A72-11065
- Electrical power subsystem for Initial Defense Communications Satellite Program/Augmentation, noting solar cells for power conversion and Ni-Cd batteries for energy storage
01 p0008 A72-11066
- ESRO satellite power supply solar paddles deployment mechanism, describing simulated zero gravity tests
[DGLR PAPER 71-112] 02 p0286 A72-12713
- Satellite electrical power, discussing energy converters, satellite feeder subsystem and voltage requirements
03 p0311 A72-13639
- Nuclear Brayton space power systems, discussing efficiency, isotope decay and reactor design
04 p0546 A72-14423
- AEROS aeronomy satellite solar cell array power supply system simulation tests under space conditions
04 p0466 A72-15650
- Heat pipe radiator with 50 kW heat rejection capability for potassium working fluid of Rankine cycle space power system, discussing design, fabrication and testing
[ASME PAPER 71-WA/HT-16] 05 p0744 A72-15875
- Power supply and converters for satellite and spacecraft, discussing fuel cells, radioisotopes, nuclear reactors, etc
05 p0615 A72-16745
- Ion engine performance optimization by power sharing with secondary batteries on synchronous equatorial satellites
[AIAA PAPER 72-206] 05 p0706 A72-16852
- Spacecraft power system with Maximum Power Point Tracker, discussing German Aeros satellite and orbit simulation program
07 p0914 A72-19090
- Kilowatt rotary dc-dc power transformer in modular sections for spacecraft applications, discussing electrical and mechanical designs and characteristics
08 p1112 A72-21414
- Uranium mononitride as nuclear reactor fuel for space vehicle power supply applications, discussing fabrication techniques and irradiation behavior
09 p1349 A72-22406
- ITOS-1/Tiros M/ satellite design, describing structure, thermal and attitude control, primary and secondary sensor subsystems, power supply and operational goals
09 p1396 A72-23373
- Solar cells in satellite power supplies, discussing design, environment effects, reconditioning, microwave performance and testing
10 p1422 A72-24150
- Lunar roving vehicle reliability program and design features of mobility, electrical power and navigation subsystems
[AIAA PAPER 72-233] 10 p1460 A72-24443
- GaAs solar batteries for spacecraft power supplies, comparing effectiveness with Si cells for optimum utilization
11 p1578 A72-25940
- Structural design, performance and costs of rigid or semirigid solar panels for geostationary satellites power supplies
12 p1758 A72-28034
- Silicon solar cell calibrations for space applications, discussing equivalent diagram, I-V characteristics and stratospheric balloon measurement
12 p1758 A72-28040
- Space tug design constraints, configurational alternatives, subsystem arrangements, docking system, propellant tank pressurization system, main engine and power supply, etc
13 p2051 A72-28933
- Electric power supply systems for satellites, discussing packaging standardization of electronic circuits modules
13 p1900 A72-30096
- Cost analysis for solar cell space power systems, considering array area and module standardization
15 p2338 A72-32133
- Silicon solar energy conversion for electrical power generation on spacecraft.
17 p2494 A72-34186
- Thermionic reactor system for auxiliary power and electric propulsion.
17 p2494 A72-34579
- Auxiliary power and electric propulsion applications of thermionic reactor power systems in manned and unmanned space missions
18 p2644 A72-36168
- Controlled dc to dc converter for a space-qualified thermionic-reactor.
18 p2644 A72-36170
- Voltage-conversion for incore-thermionic-reactors.
18 p2645 A72-36182
- A comparison of thermionic reactor designs employing a common thermionic fuel element.
18 p2645 A72-36183
- An out-of-core thermionic-converter system for nuclear space power.
18 p2645 A72-36187
- Parallel operation of the solar generator and battery on the Symphonie satellite
18 p2648 A72-36681
- Power regulation in the Symphonie satellite
18 p2648 A72-36682
- Solar array cost reduction.
19 p2754 A72-37642
- Hydrogen oxygen fuel cell development for spacecraft power supply systems, emphasizing service life and reliability under elevated temperature and high current density
19 p2754 A72-37643
- Minimisation of the solar array generated electrical interference on the GEOS satellite.
20 p2889 A72-38990
- Thermal conductivity measurements of nickel-cadmium aerospace cells. II - Component conductivities.
21 p2997 A72-40841
- Nuclear rocket reactor and radioisotope power technology for propulsion and electricity requirements in spacecraft and space stations
24 p3423 A72-45166
- SPACECRAFT PRELAUNCH TESTS**
- U SPACE VEHICLE CHECKOUT PROGRAM**
- SPACECRAFT PROPULSION**
- NT ELECTROMAGNETIC PROPULSION
- NT ELECTROSTATIC PROPULSION
- NT ION PROPULSION
- NT PHOTONIC PROPULSION
- NT PLASMA PROPULSION
- NT SOLAR PROPULSION
- High temperature gaseous U fission plasma core reactor engine concepts for space propulsion
01 p0099 A72-11327
- Space vehicle with solid-liquid propulsion system, determining optimal initial mixing ratio for cylindrical configuration
[DGLR PAPER 71-101] 02 p0271 A72-12706
- Maximum propellant utilization in electron bombardment ion thruster for space applications
04 p0564 A72-14432
- Controlled thermonuclear fusion for space propulsion, discussing magnetic-confinement and laser-plasma fusion engines
04 p0556 A72-14889
- Gas core nuclear rocket reactor program for 60 day Mars, shuttle and Skylab applications
05 p0688 A72-15778
- Automatic craft for planet surface exploration, classifying propulsion gear
05 p0644 A72-16449
- Current and future rocket and spacecraft propulsion systems based on chemical propellants, nuclear thermoelectric, electrostatic and electromagnetic power generators
05 p0705 A72-16743
- Space shuttle phase B design studies regarding configurational alternatives, propulsion systems, displays and controls, simulations and flight test programs
08 p1240 A72-21009
- Quasi-steady MPD propulsion systems for astronautical applications, describing electric energy storage bank, mass supply system, accelerator and operation principle
09 p1374 A72-22934
- High energy rocket propellants for space probe propulsion systems, evaluating various propellant combinations in terms of specific impulse, toxicity, corrosiveness, cost and availability
11 p1702 A72-25299
- Biowaste resistojet propulsion system development program, discussing design, propellant management and control subsystems
[AIAA PAPER 72-448] 11 p1707 A72-26185
- System tradeoffs for high performance pulsed MPD thruster in space mission application
[AIAA PAPER 72-457] 11 p1708 A72-26193
- RF ion thruster for spacecraft propulsion, discussing tests and digital computer calculations to optimize design parameter
[AIAA PAPER 72-474] 11 p1709 A72-26205
- ESRO electric propulsion systems R and D, discussing various concepts in terms of weight, cost, thrust level, efficiency, simplicity, exhaust velocity and development potential
[AIAA PAPER 72-478] 11 p1710 A72-26207
- Electric propulsion systems assessment for military spacecraft, discussing ion, colloid, pulsed and quasi-steady plasma thrusters
[AIAA PAPER 72-493] 11 p1711 A72-26217
- Spacecraft nuclear electric propulsion system multimission performance evaluation, discussing launch mode and vehicle capability factors in system size selection
[AIAA PAPER 72-503] 11 p1685 A72-26226
- Multimission and engine performance requirements for solar electric spacecraft propulsion stage configurations, considering launch vehicle compatibility integration payload and environmental extreme effects
[AIAA PAPER 72-465] 11 p1712 A72-26325
- Spacecraft propulsion based on electric energy extraction from solar wind or energy transfer from ground via plasma arcs
11 p1712 A72-26779
- Ion thruster module design for primary electric propulsion systems, discussing optical configurations, discharge chamber, control and performance tests
[AIAA PAPER 72-508] 12 p1860 A72-27423
- Liquid fuel rocket engines design for space applications, describing combustion chambers, thrust and vector control systems and propellant mixtures physicochemical properties
12 p1861 A72-27861
- Spacecraft propulsion into orbit by ground based high-power lasers via thrust generation by material evaporation, emphasizing advantages in launching small payloads
13 p2025 A72-28454
- Nuclear rocket for space tug, comparing performance and operational costs with chemical propulsion
13 p2000 A72-28926
- Encounter sequences determination techniques for multitarget flyby and rendezvous missions to asteroids and comets by spacecraft using solar electric propulsion
[AIAA PAPER 72-429] 13 p2037 A72-28940
- Solar electric multimission spacecraft (SEMMS)/concept, investigating Mariner, Viking and TOPS technologies applicability to postulated mission/science objectives
[AIAA PAPER 72-469] 13 p2026 A72-28946
- Communication satellites auxiliary propulsion systems surveyed for attitude and stationkeeping systems selection
[AIAA PAPER 72-515] 13 p2052 A72-28978
- Propulsion modes compared for communication satellites design optimization, discussing attitude and longitude control, orbit inclination control, station change and orbit raising
[AIAA PAPER 72-517] 13 p2052 A72-28979
- Second generation European multi-mission launcher system for scientific and application satellites, using high energy propulsion modular design
15 p2320 A72-31804
- Nonchemical space propulsion systems for lunar and planetary flights, discussing fission, fusion and electric rockets
15 p2297 A72-31810
- Nuclear rocket propulsion program, discussing solid refractory core technology, Rover project and NERVA engine development and tests
15 p2273 A72-31811

Small power nuclear propulsion engines for Europa launching systems, discussing heat exchange reactor using hydrogen propellant

15 p2273 A72-31812

Laser pulse produced high temperature plasma engine propulsion system, noting thrust/power ratio and requirements for orbital applications

[AIAA PAPER 72-719] 16 p2443 A72-34029

Prediction of tank pressure history in a blowdown propellant feed system.

17 p2537 A72-34211

Mixed-mode propulsion - Optimum burn profile for two-mode systems.

17 p2596 A72-34212

Thermonuclear fusion spacecraft propulsion systems operation principles, interplanetary orbit-to-orbit mission capabilities and environmental safeguard problems

17 p2598 A72-35953

Thermionic reactor electric propulsion system requirements.

18 p2720 A72-36167

Auxiliary power and electric propulsion applications of thermionic reactor power systems in manned and unmanned space missions

18 p2644 A72-36168

Development of a digital control system for a spacecraft propulsion test facility.

19 p2783 A72-37641

Hydrazine thrusters for space application.

21 p3098 A72-40123

Development of a digital control system for a spacecraft propulsion test facility.

22 p3163 A72-42685

Saturn-Jupiter rebound - A method of high-speed spacecraft ejection from the solar system.

23 p3340 A72-44323

Construction of a high-performance resistor for satellite propulsion.

23 p3328 A72-44324

Nuclear rocket reactor and radioisotope power technology for propulsion and electricity requirements in spacecraft and space stations

24 p3423 A72-45166

Development and testing of a radioisotope-fueled thruster for spacecraft propulsion.

24 p3434 A72-45178

SPACECRAFT RADIATORS

Heat pipe radiator with 50 kW heat rejection capability for potassium working fluid of Rankine cycle space power system, discussing design, fabrication and testing

[ASME PAPER 71-WA/HT-16] 05 p0744 A72-15875

Precision temperature control system for spacecraft equipment thermal loads rejection by space radiator, using acetone variable conductance heat pipes

[AIAA PAPER 72-270] 11 p1740 A72-25211

Thermal scale models utilization to predict spacecraft radiator system performance, presenting criteria for modeling fluid system with combined convection, conduction and radiation effects

[ASME PAPER 72-ENAV-29] 20 p2894 A72-39148

SPACECRAFT RECOVERY

Satellite low orbit transfer to stationary orbit, emphasizing stage and payload recovery effects on performance

01 p0130 A72-10936

Reusable space tug mission profile for interplanetary spacecraft recovery, using branched trajectory, steepest descent optimization and propellant minimization

[AIAA PAPER 72-13] 05 p0730 A72-16949

Reusable two-stage meteorological rocket vehicle, discussing design, performance, second stage recovery technique and cost

17 p2619 A72-34185

International Space Rescue Symposium, 4th, Brussels, Belgium, September 21, 1971, Proceedings.

17 p2620 A72-34426

Spacecraft rescue and recovery capabilities assessment based on anticipated U.S. space programs, discussing mission design, recovery response, weather prediction and communications

17 p2620 A72-34429

International Space Rescue Symposium, 1st, New York, N.Y., October 14, 1968, Proceedings.

20 p2977 A72-39550

Spacecraft rescue/recovery capabilities, discussing in-flight escape, ground egress and descent systems, performance and technical and human factors

24 p3450 A72-45147

Despinning and detumbling satellites in rescue operations.

24 p3450 A72-45160

SPACECRAFT REENTRY

Scientific satellite with simple inertial system, deriving discrete feedback reentry guidance algorithms based on closed-form equations solvable by onboard computer

01 p0098 A72-10944

Spacecraft reentry trajectory parameter selection and optimal control algorithm under random atmospheric density variation

05 p0685 A72-16429

Spacecraft reentry communications, discussing plasma sheaths, blackout alleviation and flight experiments

05 p0628 A72-16562

Emergency reentry manned spacecraft remedial concepts, mission constraints and system designs in terms of cost effectiveness

09 p1396 A72-23159

Space shuttle orbiter thermal protection system metal interaction with chemical environment during reentry, emphasizing degradation in dissociated oxygen

[AIAA PAPER 72-262] 11 p1590 A72-25206

Rarefied flow fields and heating rates for space shuttle orbiter reentry at high angles of attack, using Monte Carlo simulation technique

[AIAA PAPER 72-314] 11 p1567 A72-25248

Ablation phase duration during spacecraft decelerated hypersonic reentry flight, using theoretical model based on quasi-steady assumptions

11 p1745 A72-25815

Spacecraft reentry into random medium atmosphere, determining optimal control procedure for prescribed arrival region and time with simulation equation

11 p1686 A72-25930

Two step spacecraft reentry guidance involving skip trajectory at parabolic speeds, proposing algorithm for running coordinate and speed vector components values

11 p1684 A72-26896

Spacecraft roll stabilization during parabolic earth atmosphere reentry, developing single parameter multistep algorithm

11 p1684 A72-26897

Landing control algorithm using onboard digital computer for spacecraft hypersonic velocity reentry, discussing simulation test results

11 p1684 A72-26898

Parabolic velocity atmospheric reentry navigation algorithm for spacecraft control, demonstrating guidance accuracy to landing point

11 p1684 A72-26899

Spacecraft motion control algorithm for reentry at escape velocity based on object motion model

11 p1684 A72-26900

Synthesis of a nonlinear law for spacecraft motion control in the earth's atmosphere

17 p2621 A72-35201

Synthesis of a nonlinear law for the control of spacecraft motion in the atmosphere of the earth

17 p2621 A72-35202

Analytical evaluation of the spacecraft descent range for hyperbolic reentry trajectories

17 p2610 A72-35203

The development of the Apollo entry thermal protection system.

21 p3115 A72-41124

A control algorithm for the orbital reentry of a space vehicle

22 p3223 A72-42206

Explorer satellites and Pioneer space probes development program, discussing launching rockets, reentry tests, payloads, radio communication, Van Allen belts discovery, etc

23 p3358 A72-44353

Optimization of spacecraft reentry into a planetary atmosphere

24 p3453 A72-45597

SPACECRAFT RELIABILITY

Space shuttle cryogenics technology, flight and ground operations, checkout, maintenance and safety

03 p0441 A72-13695

Oxygen hazards, mishaps and safety programs in NASA operations, considering material, design, cleaning and procedural deficiencies and failures

04 p0564 A72-14436

Statistical distribution of maximum response for reliability-based optimum spacecraft structural design for random excitations from booster shutdown

05 p0724 A72-16103

Spacecraft attitude control system reliability and performance improvement through nonorthogonal coordinates application, using matrix technique

05 p0728 A72-16477

Spacecraft incipient failure detection, stressing acoustic energy release techniques

07 p0964 A72-18829

Spacecraft mean time to failure /MTTF/ and launch success probability /LSP/ effects on annual satellite system costs

09 p1395 A72-22775

Failure modes, effects and criticality analysis method for evaluating spacecraft reliability characteristics

10 p1485 A72-23974

Safety design review for Skylab program based on experience from prior space projects and ground tests

10 p1550 A72-23990

Communication satellite systems reliability assessment using figure of merit method

10 p1435 A72-23991

High reliability long life heat pipe thermal control system for space station application

14 p2171 A72-30835

Development of electronic part failure rates for long-duration space missions.

17 p2527 A72-34684

Man serviced spacecraft systems reliability and maintainability optimization methodology, developing parametric data based on failure modes analysis, components MTBF, duty cycles, redundancy and costs

[SAWE PAPER 943] 23 p3343 A72-43483

Design and operation objectives and constraints for German scientific spacecrafts, discussing orbital performance and reliability and quality control requirements

24 p3451 A72-45205

SPACECRAFT RENDEZVOUS

U SPACE RENDEZVOUS

SPACECRAFT SENSORS

U SPACECRAFT INSTRUMENTS

SPACECRAFT SHIELDING

Space shuttle thermal protection system, discussing oxidation resistant coatings, refractory metals, heat shield technology, ballistic reentry programs, weight and cost

01 p0135 A72-10935

Active shielding against radiation in space using charged particle deflection by electric and magnetic fields

[CERN-71-16] 02 p0258 A72-12076

Zirconium dioxide white pigment coatings for spacecraft thermal control, discussing impurities effects on optical absorption properties

07 p1023 A72-19692

Solar proton flares forecasting methods in connection with active region developments for spacecraft radiation shielding

07 p1061 A72-20017

Hot versus shielded aerodynamic surfaces trade study for space shuttle booster wings and fins design, considering materials, structural weight and cost estimates

[AIAA PAPER 72-390] 11 p1726 A72-25411

Spacecraft thermal control coating damage by energetic Hg ion bombardment, using absorbance measurements

[AIAA PAPER 72-445] 11 p1746 A72-26183

Apollo heat shield silica reinforcement fiber and ablation char reactions in laboratory and actual reentry tests

14 p2172 A72-30922

Spacecraft thermal control materials research, discussing surface selection, coatings, space simulation and environmental effects

15 p2260 A72-31806

Panel-flutter analysis of a thermal protection-shield concept for the space shuttle.

20 p2980 A72-39622

Shadow shields for minimizing radiant heat transfer into cryogenic propellant tanks on interplanetary missions, predicting performance for comparison with scale model experiment

21 p3130 A72-41181

SPACECRAFT STABILITY

Group matrix representation theory application to elastic spacecraft stabilization

01 p0135 A72-10497

Symphonie satellite stability during perigee, apogee and orbital transfer, considering propellant motion in tank and spinning top containing liquid

02 p0287 A72-12717

Astronomical Netherlands Satellite automatic stabilized detection system for soft celestial X rays measurement, describing various modes of operation

03 p0354 A72-13048

Autonomous star mapping attitude reference technique for providing three-axes attitude information on inertially stabilized or slowly spinning spacecraft

03 p0387 A72-13952

TV programs direct broadcasting by satellites, discussing frequency range, amplitude vs frequency modulation, satellite stabilization and economic aspects

04 p0494 A72-15678

Meteorological satellite stabilization and attitude control in synchronous equatorial orbit for two years life, emphasizing nutation damper optimal dynamic characteristics

05 p0725 A72-16437

Three dimensional global spacecraft attitude control system analytical design technique based on system stability considerations

05 p0726 A72-16457

Magnetic damper for gravity gradient stabilized satellite rotational and librational motions, deriving formula for calculating damping coefficients

05 p0726 A72-16463

Steady state angular motion stability of passive magnetically stabilized satellites, using Liapunov method

05 p0726 A72-16464

Spin-axis attitude stability in torque-free environment of dual spin spacecraft with energy losses in both bodies

05 p0730 A72-16964

Onboard equipment layout effect on dynamic stability against liquid propellant sloshing in spacecraft

05 p0730 A72-17028

Tracking efficiency calculation for laser telemetry with laser reflector on nonstabilized satellite 07 p0947 A72-20260

Laser tracking of magnetically and gravity gradient stabilized satellites, noting latitude effect on efficiency 07 p0947 A72-20263

Flexibly stabilized satellite orientation determination by stellar sensors and magnetic damping of rotation 08 p1240 A72-21139

Librational transverse oscillations boundary value problems of heavy thread on orbiting satellite, determining equilibrium and eigenfunctions 08 p1240 A72-21142

Self excited oscillations and transient responses of spacecraft stabilization relay system with delayed feedback, analyzing time delay effects in actuator circuit 08 p1241 A72-21170

Liquid filled spinning projectiles and satellites flight stability based on Stewartson gyroscope analysis method 08 p1168 A72-21600

Stationary motions, stability of satellite with rotary gyroscope and gimbals in circular orbit and central Newtonian force field 08 p1241 A72-21801

Image dissector, silicon photodiode and vidicon behavior comparison for medium resolution star mappers design for three axis stabilized vehicles 08 p1172 A72-21975

Liapunov direct method in synthesis of frequency-pulse system for automatic stabilization of spacecraft position 09 p1397 A72-23427

Compensator improvement for relative stability and frequency response of large space vehicle, using nonlinear programming 10 p1442 A72-23791

Thrust profile shaping for spin stabilized vehicles, analyzing effect on wobble motion and pointing error 10 p1552 A72-24647

Coupled librational motion of gravity oriented satellite in circular orbit under aerodynamic forces, discussing limiting stability and periodic solutions 11 p1726 A72-25914

French R and D work on ion propulsion systems for communication satellite stabilization, discussing principal characteristics, mathematical modeling, design and economic problems [AIAA PAPER 72-437] 11 p1727 A72-26179

Spacecraft roll stabilization during parabolic earth atmosphere reentry, developing single parameter multilevel algorithm 11 p1684 A72-26897

Spacecraft motion stabilization about mass center and optimal angular velocity control using minimax technique 11 p1684 A72-26903

Autotracking antenna effect on dual spin spacecraft nutational stability, using averaging, eigenvalues and digital simulation techniques [AIAA PAPER 72-571] 12 p1876 A72-27379

Gravitational stabilization systems parameters determination for minimum amplitude of satellite eccentric vibrations 14 p2162 A72-30457

Optimal efficiency of satellite passive nutation damper, noting system moment of inertia and flywheel axis relationship and viscous friction coefficient 14 p2162 A72-30458

Stability analysis of satellite motions in Newton planetary field by Liapunov method, considering ellipsoid of revolution under gravitation of sphere 14 p2162 A72-31081

Optimum design parameters for a spin-stabilized spacecraft nutation damper. 17 p2619 A72-34208

Satellite orientation and stabilization systems aerodynamic compensation for circular orbit perturbations 17 p2621 A72-35034

Gravitational stabilization of a satellite in a fixed inertial orientation. 17 p2622 A72-35487

Passive stability of a spinning Skylab. 18 p2730 A72-36314

Attitude control of satellites with large flexible solar arrays. [AIAA PAPER 72-733] 18 p2730 A72-36541

Attitude stability and performance of a dual-spin satellite with nutation damping. 19 p2862 A72-38022

Dual spin spacecraft simulation on three axis air bearing ball in atmosphere testing propellant tank dissipation and spacecraft stability in autotrack mode [AIAA PAPER 72-860] 20 p2911 A72-39108

Stability of dual spin spacecraft containing tracking payloads. [AIAA PAPER 72-890] 20 p2975 A72-39111

Stability and CMG wobble damping of flexible, spinning space stations. [AIAA PAPER 72-888] 20 p2975 A72-39113

Nutational stability of a dual-spin satellite under the influence of applied reaction torques. [AIAA PAPER 72-885] 20 p2976 A72-39116

Loosely stabilized satellite orientation determination by stellar sensors and magnetic damping of rotation 20 p2976 A72-39244

Librational transverse oscillations boundary value problems of heavy thread on orbiting satellite, determining equilibrium and eigenfunctions 20 p2977 A72-39247

Solar pressure control of a spinning satellite with a stabilized platform. [AIAA PAPER 72-918] 21 p3115 A72-41563

Small oscillations of gravity gradient satellite in circular near-equatorial orbit, discussing operational efficiency of magnetic damping systems 22 p3230 A72-42223

OSO pointing accuracy improvement through dual spin stabilization, discussing OSO design evolution 1962-72 24 p3449 A72-45145

SPACECRAFT STERILIZATION

Papers on planetary quarantine covering microbial survival in deep space, contamination by nonsterile flight hardware and sterilization 01 p0019 A72-10817

Planetary quarantine microbiological and engineering problems, discussing cost, international policies, contamination and sterilization 01 p0019 A72-10818

Microbiological examination of space hardware, discussing viable organisms neutralization buried inside solid materials, sampling procedures and culture media 01 p0019 A72-10820

Space flight hardware sterilization, considering dry heat and chemical destruction 01 p0019 A72-10822

Dry heat resistance of bacillus spores on spacecraft metal surfaces for different pressures, atmospheres and materials 04 p0475 A72-15261

The effects of various cure cycles upon the viability of *Bacillus subtilis* var. *niger* spores within solid propellant. 18 p2652 A72-36437

A stochastic bioburden model for spacecraft sterilization. 18 p2652 A72-36442

Application of planetary quarantine methodology and spacecraft sterilization technology to improved health care delivery. 24 p3375 A72-45148

SPACECRAFT STRUCTURES

Space shuttle safety problems, discussing hydrogen pump bearings and air breathing turbofan blades failures and fuel tank fire hazards 03 p0441 A72-13694

Adhesive bonded components in aircraft and aerospace structures, discussing manufacturing, metal surface preparation, inspection and environmental exposure [SAE PAPER 720118] 06 p0835 A72-17325

Mars 3 spacecraft structure and experiments, noting central hypergolic fuel tanks, S-band directional antenna and solar panels 06 p0892 A72-17400

European Special Space Tug structural and configurational layouts and problems 09 p1396 A72-23259

ITOS-1/Tiros M/ satellite design, describing structure, thermal and attitude control, primary and secondary sensor subsystems, power supply and operational goals 09 p1396 A72-23373

Thermal nodal analysis of spacecraft hull-canister model from space simulation test, using least squares estimation and regression analysis 09 p1412 A72-23497

Viking conical aeroshell structural prototype design, analysis and testing, comparing buckling failure data with theoretical predictions 11 p1725 A72-25395

Space shuttle orbiter vehicle structural design configurations development and evaluation with respect to overall system weight and program cost [AIAA PAPER 72-373] 11 p1726 A72-25397

Arc cast vacuum melted Mo base alloy properties, production and applications to heat pipes, aerospace structures and pressure vessels 11 p1644 A72-26844

Composite materials mechanical and thermal properties for ATS reflector supporting truss, noting graphite fiber reinforced epoxy plastic design, fabrication and tests 12 p1886 A72-28158

Energetic Hg ion bombardment erosive and chemical effects on spacecraft surfaces downstream of electrostatic rockets [AIAA PAPER 72-446] 13 p1983 A72-28944

Space Shuttle Orbiter onboard ultrasonic system for structural integrity tests and assessment, noting limita-

tion factors due to configuration and vehicle launch noise effects 15 p2256 A72-31698

Environmental effects on spacecraft materials, structures and design, discussing sterilization, gravity, vacuum, micrometeoroids, radiation, etc. 15 p2320 A72-31802

Flow area computerized prediction for multicompart ment series-parallel spacecraft venting satisfying pressure differential requirements [AIAA PAPER 72-707] 16 p2462 A72-34038

Predictions of solar induced response of thin-walled open-section booms for design. 18 p2733 A72-36364

Combined spot weld-adhesive bonding to join sheet metal parts with applications to propellant tanks and spacecraft and aircraft structures [SME PAPER AD 72-710] 18 p2695 A72-36526

Impact tests for aid in data interpretation of measured meteor particles impact on spacecraft structures, noting transducer response dependence on impact angle 22 p3234 A72-42218

Structural problems of the helios solar probe. 24 p3449 A72-45122

SPACECRAFT TELEVISION

NT SATELLITE TELEVISION

Adaptive variable length coding for efficient compression of spacecraft TV data of Grand Tour missions 06 p0771 A72-17401

Mariner 9 television reconnaissance of Mars surface and satellites, observing south polar cap and dark spots with crater features 06 p0889 A72-18341

Channel coding/decoding schemes compatibility with TV data compressor for planetary missions in real time transmission 07 p0941 A72-19274

Space astronomy experiments with TV scanning, discussing data from Telescope catalog of UV observations and photometric and astrometric accuracy 08 p1170 A72-21957

Spaceborne Uvicorn/Telescope astronomical observatory for stellar UV TV pictures, discussing system design requirements 08 p1170 A72-21958

Mars observation by Mariner 9, discussing TV pictures of surface, UV and IR spectroscopy of atmosphere, S band experiment and Phobos and Deimos studies 10 p1538 A72-24309

Mariner 9 TV experiment image data display, processing and production for real time analysis, noting computer algorithms 15 p2236 A72-31982

Spacecraft-borne computer and electronic systems interface for radio reception, transmission and TV imagery applications 21 p3014 A72-40309

SPACECRAFT TRACKING

NT SATELLITE TRACKING

Nonlinear theory of cascaded two-way coherent spacecraft tracking system model, obtaining steady state probability density functions of phase and Doppler error 02 p0174 A72-12137

Error correcting data decoder assembly for mission independent sequential decoding at all stations in deep space tracking network, discussing design and performance 07 p0949 A72-19298

Spaceborne laser radar for target acquisition and tracking in spacecraft rendezvous and docking applications [CLEA PAPER 9,5] 07 p0943 A72-19387

Closed loop covariances prediction in reentry vehicle tracking and data compression, presenting simulation results 08 p1144 A72-20846

Compression of data from measurements in real time nonlinear estimation to reduce data processing requirements without performance deterioration, applying to reentry vehicle tracking 10 p1442 A72-23802

Satellite orbit tracking data accuracy estimation by partial differentiation, using Doppler and interferometer methods 11 p1593 A72-26097

Cosmological geodetic survey network construction via spacecraft tracking and laser beams, calculating power required for balloon satellite photography 13 p1922 A72-29631

Space tracking stations in Spain. I - The Madrid space station and its activities 17 p2536 A72-34945

Spectral factorization in periodically time-varying systems and application to navigation problems. 17 p2578 A72-35492

Global network of ground based facilities /infrastructure/ including spacecraft launching, tracking, communication and readout sites for international space operations [AIAA PAPER 72-739] 18 p2742 A72-36545

Low noise microwave receiving systems on a 64 m antenna. 19 p2763 A72-37255

Location estimation for spacecraft landed on Mars surface via statistical techniques application to earth based radio tracking data, taking into account ephemeris biases [AIAA PAPER 72-903] 21 p3082 A72-41554

SPACECRAFT TRAJECTORIES

NT EARTH-MARS TRAJECTORIES

NT EARTH-MOON TRAJECTORIES

NT EARTH-VENUS TRAJECTORIES

NT INTERPLANETARY TRAJECTORIES

NT LUNAR TRAJECTORIES

NT MOON-EARTH TRAJECTORIES

Spacecraft flight trajectory parameters from unknown second moment matrix of navigation measurement errors 01 p0127 A72-10352

Accuracy of spacecraft trajectory determination by complex expressions in multidimensional geometric representation 01 p0127 A72-10353

Optimal measurement programs for instrument controlled spacecraft trajectory sections, using maximum likelihood method 01 p0127 A72-10354

Soviet book on space navigation covering dimensional spaces, navigation functions, relativistic phenomena, position finding, motion parameters, statistical methods, etc 02 p0256 A72-12297

Spacecraft trajectories optimization by gradient method combination with Euler equations in calculus of variations 04 p0571 A72-14631

Interplanetary spacecraft trajectory error analysis by closed form approximation to state transition matrix, enabling rapid estimation with computer program 05 p0718 A72-16443

Dynamic system observation accuracy in spacecraft trajectory measurement, deriving processing algorithm based on state-estimate error correlation matrix analysis with maximum likelihood procedure 05 p0721 A72-16760

Iterative process convergence in least squares and maximum likelihood methods of processing measurements in spacecraft trajectory control, space navigation and geodesy systems 05 p0633 A72-16761

Polynomial class random process realization based on statistical methods of processing spacecraft orbital measurement data, considering random and systematic errors 05 p0683 A72-16763

Methodical errors in spacecraft local vertical determination due to variability of physical effects, considering planet oblateness, atmospheric refraction, incident radiation fluctuations, etc 05 p0721 A72-16764

Dynamic stability of controlled spacecraft with liquid propellant rocket engines, considering acceleration and braking sections of trajectory 05 p0730 A72-17027

Explicit analytic guidance technique for hyperbolic approach phases of lunar and interplanetary spacecraft trajectories from first order solution for perturbed planet centered trajectory [AIAA PAPER 72-15] 07 p1032 A72-18944

Recursive and nonrecursive real time spline methods for nonlinear estimation of independent trajectory parameters for vehicle entering earth atmosphere 08 p1197 A72-20862

Disturbing parameters effect on spacecraft trajectory X coordinate values estimation, including planetary masses and coordinates, astronomical unit and light speed 08 p1232 A72-21151

Liapunov direct method in synthesis of frequency-pulse system for automatic stabilization of spacecraft position 09 p1397 A72-23427

Pioneer 10 probe survival hazards during passage through asteroids belt and intense Jupiter radiation fields 10 p1551 A72-24272

Interplanetary single impulse flight trajectories optimization and computation, determining geometrical and kinematic characteristics 11 p1718 A72-25927

Spacecraft trajectories for reentry at hyperbolic velocity, examining aerodynamic control loads and characteristics in atmospheric skip 11 p1718 A72-25929

Atmospheric model effects on space shuttle ascent and reentry trajectories and aerodynamic heating 13 p1990 A72-28813

Trajectory shaping advantages for outer planet orbiter solar electric propulsion, considering radiation belt constraints, dual launch and target orbit geometries [AIAA PAPER 72-423] 13 p2036 A72-28938

Space center tractography and telemetry systems, including radar stations, interferometric equipment, optical methods and interlinked computers [DGLR PAPER 72-014] 13 p1938 A72-28961

Vibration stability and interference transfer function of onboard transponder with phase lock AFC used in Doppler system for measuring spacecraft trajectory parameters 13 p1958 A72-29456

Multiple probe targeting from spacecraft for 1977 Venus mission, considering trajectory, spin, release, attack angle, location and navigation and control accuracy effects 15 p2312 A72-32193

Spacecraft free fall trajectory calculation, using numerical optimization procedure based on Hamilton principle for two point boundary value problems 16 p2460 A72-34021

Synthesis of a nonlinear law for spacecraft motion control in the earth's atmosphere 17 p2621 A72-35201

Dynamic system observation accuracy in spacecraft trajectory measurement, deriving processing algorithm based on state-estimate error correlation matrix analysis with maximum likelihood procedure 17 p2610 A72-35263

Iterative process convergence in least squares and maximum likelihood methods of processing measurements in spacecraft trajectory control, space navigation and geodesy systems 17 p2523 A72-35264

Polynomial class random process realization based on statistical methods of processing spacecraft orbital measurement data, considering random and systematic errors 17 p2576 A72-35266

Methodical errors in spacecraft local vertical determination due to variability of physical effects, considering planet oblateness, atmospheric refraction, incident radiation fluctuations, etc 17 p2610 A72-35267

Disturbing parameters effect on spacecraft trajectory X coordinate values estimation, including planetary masses and coordinates, astronomical unit and light speed 20 p2969 A72-39256

About the interaction between a satellite and its environmental ionospheric plasma. 21 p3090 A72-40454

N-burn analytic solution for propellant-optimal transfer trajectories in vacuum, taking into account gravitational effects [AIAA PAPER 72-929] 21 p3112 A72-41569

Choice of parameters to be measured in determination of a spacecraft trajectory 22 p3223 A72-42201

Nonlinear problems of analyzing the observability of the trajectories of spacecraft motion on the basis of measured data 22 p3223 A72-42203

Saturn-Jupiter rebound - A method of high-speed spacecraft ejection from the solar system. 23 p3340 A72-44323

Rendezvous at specified destinations through optimum transfer paths 24 p3442 A72-45281

Mission strategy for combined comet-asteroid flybys. [AIAA PAPER 72-939] 24 p3444 A72-45436

Minimum-time entry of space vehicles into a planetary atmosphere 24 p3452 A72-45442

SPACECREWS

Spacecraft and aircraft crew survival after emergency landing in adverse environments, discussing water and food requirements, survival supplies and medical and first aid equipment 05 p0621 A72-16629

Soviet space crews selection and training based on professional and scientific background, emphasizing psychological qualities for working compatibility in space environment 09 p1274 A72-23672

Rest and activity patterns effect on space crews well-being and operational effectiveness during prolonged extraterrestrial missions, noting work load effect on long-haul transport aircrews 10 p1427 A72-23727

Ground and flight crews coordinated effort in Apollo mission operations, noting experts on ground and spacecraft spot judgments capability [AIAA PAPER 72-236] 11 p1586 A72-26557

Red cell mass plasma volume decrease in Apollo mission crews, indicating erythropoiesis inhibition 12 p1765 A72-28266

Future spacecraft habitable compartment layout from psychophysiological viewpoint, considering human visual and motor field parameters and crew members social needs 13 p1910 A72-29321

Social and emotional crises with respect to isolation, confinement and group dynamics of astronaut crews during long duration space flight 16 p2354 A72-33545

Spacecrews rescue requirements, considering escape capsules earth-based and orbit-based rescue systems and flight hazards 17 p2620 A72-34438

International Space Rescue Symposium, 1st, New York, N.Y., October 14, 1968, Proceedings. 20 p2977 A72-39550

An integrated medical system for long-duration space missions. 21 p3009 A72-41305

SPACING

NT AIRCRAFT APPROACH SPACING

Reynolds number and cylindrical spacing effect on Karman vortex street formation from smoke visualizations of single and tandem cylinder wakes 09 p1261 A72-22931

SPADATS [TRACKING SYSTEM]

U SPACE DETECTION AND TRACKING SYSTEM

SPAIN

Spanish winter anomalous ionospheric short wave absorption observed by high precision ground based measurements 01 p0055 A72-10434

SPALLATION

Pu-244 fission Xe isotopic composition parameters in achondrite meteorites, using lunar spallation systematics 01 p0124 A72-10058

Apollo 12 lunar igneous rocks 12004, 12040, 12051 and 12053, obtaining Kr 78/Kr 83 and Xe 131/Xe 126 spallation component ratios correlation line 01 p0124 A72-10065

Early solar system nucleosynthesis of Al 26, discussing silicon and carbon burning and spallation 04 p0567 A72-14912

Proton bombarded CsI crystal spallation-caused radioactive decay products contribution to background rate in satellite X ray telescope detector 06 p0853 A72-18084

Largest Apollo 15 lunar rock mass spectrometry analyses of noble gases with gas retention age estimation and spallation Kr data 06 p0888 A72-18267

Mathematical model for superheavy cosmic ray production by spallation on interstellar hydrogen, assuming single source for particle injection with given charge spectrum 07 p1062 A72-20197

Lunar glass particle micrometeorite crater morphology, showing radial fracture and spallation zone relationships 13 p2036 A72-28755

Spallation origin of anomalous He 3/He 4 ratio in 3 Centauri A, considering thermonuclear processes model 14 p2158 A72-30731

Light elements production from primary cosmic rays spallation in interstellar gas, noting diffusion coefficient of relativistic particles in galaxy 15 p2301 A72-32754

Shock wave propagation produced by explosive detonation in contact with inert solid, considering spallation occurrence and prevention 16 p2469 A72-33356

Li, Be and B spallation reactions in galactic cosmic rays from observations of cross sections of energetic protons incident on C and O targets 16 p2447 A72-33734

Li, Be and B nuclei production via nuclear spallation reactions generated by Galactic cosmic ray bombardment of interstellar gas 16 p2448 A72-33737

Nonelastic interactions of nucleons and pi mesons with complex nuclei at energies below 3 GeV. 19 p2837 A72-38027

Recent developments in the history of the nucleosynthesis of the solar system. 20 p2971 A72-39837

SPALLING

Shock precompression effect on dynamic fracture strength of steel and Al alloy, investigating crack initiation and growth 04 p0533 A72-14541

Prediction of thermal-shock resistance during heating at very high rates. 22 p3241 A72-43000

SPARE PARTS

Electronic data processing in airline materiel supplies operations, discussing procedural efficiency improvement through reduction of stochastic effects inherent in aircraft maintenance operations 14 p2174 A72-30823

SPARK CHAMBERS

Optical multiplate spark chamber in balloon-borne gamma ray telescope, describing triggering signal from plastic scintillator directional Cerenkov counter and photographic recording system 03 p0353 A72-13035

NASA spacecraft instrumentation for high energy phenomena measurements, discussing collimated proportional counters, wire grid digitized spark chambers and modulation and slit collimators 03 p0353 A72-13038

Spark calorimeter calibration by particle accelerator induced high energy pions, noting neutral and charged particles track detectors high geometric resolution
06 p0811 A72-17292

Wide gap spark chamber feeding technique for compensation of charged particle track drift due to avalanches
07 p0988 A72-19956

Multiple-wire spark counter characteristics for alpha particle detection, discussing electrodes surface finish and gas filling
08 p1164 A72-20941

TD-1 satellite mounted slow analysis camera with supervidicon image tube to observe cosmic ray tracks in spark chamber
08 p1170 A72-21961

Spatial spark jitter measurements of highly charged nuclei for optical spark chambers.
21 p3055 A72-41003

A transmitting television tube for collecting information from streamer spark chambers
23 p3290 A72-44160

A study of the mechanisms of formation of penetrating particle groups by the spark calorimeter method
23 p3291 A72-44430

Electric field orientation, magnetic field strength and high voltage pulse delay effects on spark chamber track displacement from true particle trajectory
23 p3291 A72-44441

SPARK DISCHARGES
U ELECTRIC SPARKS
SPARK GAPS

Laser triggered spark gaps characteristics initiated by switched out picosecond pulse from mode locked Nd-glass laser, investigating breakdown formation time delay
07 p1008 A72-20547

Ignition energy measurement by nanosecond electric sparks produced by transmission line method, recording voltage pulses onto spark gap
10 p1563 A72-25138

Electrode gap current and temperature distributions during electrochemical precision processing of metals, studying gas and electrolyte flow
11 p1613 A72-26258

Spark interferometry of plasma filaments in gases from self focused single mode ruby laser beam
12 p1852 A72-27869

Vacuum gap discharge conditions as function of electron beam parameters and metal vapor pressure
13 p2017 A72-29611

Spark interferometry of plasma filaments in gases from self focused single mode-locked ruby laser pulses
16 p2439 A72-33978

SPARK IGNITION

Secondary explosive spark detonators design and performance, determining ambient pressure variations effects on firing characteristics
08 p1219 A72-20758

Ignition energy measurement by nanosecond electric sparks produced by transmission line method, recording voltage pulses onto spark gap
10 p1563 A72-25138

SPARK MACHINING

Multilead electrical spark discharge machining for mass production technology, noting carburetor slot cutting and data processing equipment applications
01 p0078 A72-11097

Electronic system for electrodischarge machining, considering thyristor spark control and circuitry design for automatic feed down and short circuit clearance
04 p0502 A72-15530

Minimum charging resistance in relaxation generators for spark machining as function of supply voltage, using thyristor and voltage source circuit model
07 p0956 A72-19594

Thermomechanical model for calculating craters formed by short pulses in electro discharge machining
08 p1173 A72-21028

Electrical erosion efficiency of metal working under increased pressure in discharge gap in air and water
08 p1174 A72-21029

Automatic control of electroerosion machining by process computer, using pulse-voltage-metal removal relation
08 p1174 A72-21030

Technological characterization of electric discharge machines by metal removal rate, volumetric electrode wastage and machined surface roughness
08 p1174 A72-21031

Electroerosion machining with optimal control of electrical parameters, number of passes and electrode wear, using nonlinear programming and critical path method
08 p1174 A72-21032

Optimization for maximum productivity of electric spark machining with vibrating electrode, noting erosion product removal difficulties
08 p1174 A72-21033

Dielectric sulfur activated liquids for high productivity electroerosion machining of steels and metallic carbides, comparing with petroleum
08 p1174 A72-21034

Pulse energy and heat distribution in dielectric and metal during electroerosive machining
08 p1174 A72-21035

Surface structure changes in metal worked by electroerosion, discussing temperature and electrical tension effects
08 p1174 A72-21036

Oscillographic transient analysis of electric spark machining processes with electrode natural or forced vibrations
08 p1174 A72-21037

Transistorized static pulse generators for spark erosion machining, discussing operating principle, design, applications, automatic control system and maintenance procedures
08 p1146 A72-21038

Optimization criteria for electroerosion machining, determining objective functions
08 p1175 A72-21039

Complex erosion machining control and optimization, investigating current and tension effects
08 p1175 A72-21042

Electrochemical machining with forward speed control via hydraulic means
08 p1175 A72-21043

Realisation of a high-efficiency electrodischarge-machining power supply.
19 p2807 A72-37846

SPARK SHADOWGRAPH PHOTOGRAPHY
U SHADOWGRAPH PHOTOGRAPHY
SPARKS

NT ELECTRIC SPARKS

Laser spark plasma initial development phase showing high electron temperature and concentration, continuous spectrum emission, line broadening and shock wave formation
02 p0237 A72-11405

Shock front radius of subsonic radiation front driven by plasma fireball during final stages of decaying laser spark
20 p2934 A72-39844

SPASMS

Hyperventilation relationship with spasmophilia, noting psychoemotional cause and neuromuscular excitability
07 p0922 A72-20384

Description of an easy and simplified test for electromyographic diagnosis of latent spasmophilia in flight personnel
19 p2760 A72-37878

SPATIAL DEPENDENCIES

Nonlinear dynamic response of deformable solids under time and space dependent thermal and mechanical loads determined by finite element method
08 p1248 A72-21822

Hydrometeorological parameters spatial-temporal variations analysis and forecasting based on association functions and conditional probability distribution functions
08 p1202 A72-22116

Surveyor spacecraft lunar thermal data, comparing spatial resolution with earth based measurements
12 p1869 A72-27329

Spatial and time dependence of electron velocity in short channel microwave FET, using Monte Carlo method
12 p1790 A72-27434

Polarization and spatial and frequency characteristics of ground signal resulting from finite source Pc 1 micropulsation disturbance
13 p1922 A72-29391

Spatial and temporal summation characteristics and relationship in human peripheral retina investigated for stimuli viewed at eccentricity against luminous background
13 p1907 A72-29970

Impulse excited spatial systems of rigid bodies linked by pivot joints with arbitrary kinematics, applying Maxwell-Betti theorem
15 p2323 A72-31461

Transversely excited pulsed carbon dioxide laser with and without hydrogen addition, observing gain spatial and temporal dependence
15 p2251 A72-32529

Space and time variations of the solar Na D line profiles.
17 p2616 A72-35697

Models of neurons reacting to input signal alternation in space and time
19 p2759 A72-37424

Quiet day daily geomagnetic field variability associated with equatorial ionospheric upheavals, noting longitudinal extent
19 p2794 A72-38869

Atmospheric transmittance measurements time and spatial representativeness optimization by allowing for fog element caused discontinuities
20 p2947 A72-38971

Positive geomagnetic bays in evening high-latitudes and their possible connection with partial ring current.
21 p3049 A72-41387

SPATIAL DISTRIBUTION

Time scales and correlations in a turbulent boundary layer.
21 p3047 A72-41626

Investigation of laser light spatial correlation by the photon coincidence method
21 p3064 A72-41691

Conditions for space invariance in optical data processors used with coherent or incoherent light.
23 p3288 A72-43887

Semigray approximation to nongray radiative transfer, taking into account mean absorption coefficient variation with spatial position and photon propagation direction
23 p3314 A72-44328

SPATIAL DISTRIBUTION
NT STAR DISTRIBUTION

Interstellar medium physical properties and distribution, discussing ionization heating by starlight, cosmic X rays and subcosmic rays
01 p0128 A72-10413

Plasma potentials spatial distribution measurement, describing switching circuit and probe design
01 p0109 A72-10580

Sporadic E layer occurrence frequency distribution during 1958-1960, investigating characteristics over equatorial, temperate and auroral zones
01 p0059 A72-10596

Spatial alignment for low noise difference picture detection in side-looking radar imagery
01 p0129 A72-10874

Precipitated electron energy latitude and time variations from auroral-height measurement during IQSY, using meridian scanning photometers
01 p0120 A72-10896

Critique on luminosity volume test for quasars, considering space distribution and luminous function
01 p0133 A72-11126

Fabry-Perot interferometer for studying spatial distribution of plasma electron concentration, discussing resolution using solid state gas laser light source
02 p0223 A72-11403

Spatial distribution of plasma density from phase shift measurement in millimeter waves based on microwave multichannel probes
02 p0263 A72-11412

Multifrequency interferometer for inhomogeneous plasma density soundings, determining time dependence, spatial distribution and plasma layer size
02 p0263 A72-11413

Atmospheric pollutants time and spatial profiles monitoring by geosynchronous satellite remote sensors
02 p0211 A72-11806

Urban geographic social-spatial pattern determination with aerial photographic interpretation
02 p0229 A72-12019

Bright galaxies and quasars associations based on spatial distribution and red shift considerations, discussing probability analysis
02 p0279 A72-12188

Incompressible two dimensional plane jet spatial stability analysis, presenting disturbance vorticity, Reynolds stress and energetics distribution in cross stream direction
02 p0152 A72-12352

Phototrophic substance effect on spatial structure of passive Q switched ruby laser emission, considering gallium phthalocyanine solution
02 p0239 A72-12568

Dust grain existence at large distances from galactic plane by computing interstellar radiation field pressure effects on grains
02 p0283 A72-12629

Dust particle dynamical behavior during cloud collisions, discussing grain distribution in resultant cloud
02 p0284 A72-12638

Galactic superclusters and matter distribution in universe, considering systematic catalog errors and uncertainty of statistical tests
03 p0421 A72-13172

Magellanic Clouds star clusters spatial distribution, color-magnitude diagrams, structures, dynamics and origins
03 p0425 A72-13254

Magellanic Clouds neutral hydrogen distribution, concentrations and velocity structure, noting H II correlation with supergiant stars
03 p0425 A72-13256

Spatial distribution of total magnetic vector and of electric currents in unipolar sunspot
03 p0428 A72-13300

Magnetic field fine structure in undisturbed photosphere for high latitude solar regions, constructing model to explain magnetograph response
03 p0428 A72-13306

Solar photospheric facula blue light limb photographs, determining spatial variation in contrast levels
03 p0434 A72-13494

Comet hypotheses, examining orbit axes and perihelions spatial distribution as possible interstellar origin
03 p0438 A72-13978

Spatial distribution of gaseous nitrogen molecules scattered from metal surface, estimating beam capture coefficient
03 p0392 A72-14056

Central peaked Martian crater distribution from Mariners 6 and 7 photographs, comparing south polar region to equator

03 p0440 A72-14310

Spatial transformation in geodesy, considering point in space as position function for orthogonal and curvilinear coordinates

03 p0351 A72-14329

Closed-loop nonlinear sampled-data systems with sampler and finite Hankel transformable distributed elements, deriving frequency domain stability criteria

04 p0504 A72-14662

Iterative procedure for computing optimal controls in distributed parameter systems described by linear parabolic differential equations, applying to metal slab temperature profile problem

04 p0504 A72-14664

Dual variational principles application to distributed parameter system suboptimal control strategy evaluation, considering control variable and feedback gain as piecewise function of time

04 p0505 A72-14665

Distributed parameter control system optimal control problems, formulating existence with minimum norm technique

04 p0505 A72-14667

Distributed systems modeled by partial differential equations, identifying unknown parameters by Galerkin method using steepest descent method and nonlinear filter

04 p0505 A72-14674

Spatial dispersion effects in crystal optics, obtaining dispersion law for normal waves in crystals via electromagnetic field tensor equations

04 p0548 A72-14739

Spatial structure coherence in sublayer of turbulent boundary layer, using spanwise flow hot-wire anemometer measurements

04 p0462 A72-15116

N galaxies and quasars properties comparison, suggesting continuous distribution and luminosity function

04 p0578 A72-15285

Quasar red shifts and spatial density with statistical approach, confirming cosmological distances and uniform distribution in accompanying space

04 p0580 A72-15452

Three dimensional temperature distribution at thermally insulated crack in plate

04 p0593 A72-15658

Low velocity neutral hydrogen spur coincidence with radio continuum Loop IV, discussing average excess surface density and total mass

05 p0711 A72-15765

Distributed parameter state regulator system, investigating order of spatial discretization error in finite difference approximation to optimal response, control and performance cost

05 p0639 A72-15805

Asteroids origin, discussing Phaethon model, masses, distribution, fragmentation and disintegration

05 p0713 A72-15980

Refraction theory applied to isotropic absorbing media, noting spatial distribution of incoherent components according to polarization states

05 p0689 A72-16173

Galactic high energy electron differential spectrum, estimating spatial distribution and random magnetic field intensity

05 p0709 A72-16237

F 2 region electron density spatial and temporal distribution, investigating plasma vertical drift effects

05 p0657 A72-16263

Neutral hydrogen distribution in spiral and irregular galaxies, discussing H II regions

05 p0716 A72-16371

Stable molecules spatial concentration profiles in high intensity combustion chamber, using quartz sampling probe and gas chromatograph

05 p0751 A72-17088

Optimal averaging of control in distributed random parameter system described by hyperbolic partial differential equations, considering boundary values on characteristics as control functions

05 p0683 A72-17133

Extensive air showers radio emission polarization, spatial distribution and electric field strength, noting geomagnetic mechanism effect

06 p0870 A72-17278

Electrons spatial and temporal response in collisionless plasma to externally applied voltage pulse

06 p0856 A72-17522

Double and multiple galaxies relative number and space distribution with respect to single galaxies number from sky survey map analysis

06 p0882 A72-18005

High radial velocity neutral hydrogen outside galactic plane, noting inability to correlate with radio spurs, absorption and emission regions

07 p1069 A72-19082

Atmospheric eddy flux spatial variations in constant flux layer, noting heat and momentum flux variability of less than 10 percent

07 p1030 A72-19107

Numerical solution of equations for asteroidal mass distribution under collisional fragmentation

07 p1071 A72-19180

M supergiants in Carina arm, discussing photometric studies at 4-18 microns, interstellar extinction uncertainties and spatial distribution

07 p1072 A72-19344

Magnetospherically trapped particles sources, losses and transport processes, presenting time averaged proton, electron and alpha particle distributions in trapping and pseudo-trapping regions

07 p1062 A72-20028

Plasma sheet distribution in magnetosphere from low energy particle observations in equatorial region of magnetotail

07 p0977 A72-20031

Upper atmosphere minor component distribution rearrangement, investigating transition time to diffusion equilibrium

08 p1155 A72-20803

Measuring equipment for charged particles spatial distribution in cosmic ray showers, considering multiaxial and secondary young showers

08 p1226 A72-21077

Spatial-temporal temperature distribution on CW laser irradiated materials, noting application to water film

08 p1252 A72-21289

Frost rule for meteoroid spatial sorting as basis for Allende meteorite shower strewn field examination of fragment mass and position

08 p1237 A72-21651

Spatial structure of sinusoidally modulated light beam propagating in medium with forward extended scattering characteristics

08 p1136 A72-21742

Quasi-stellar radio sources spectroscopic and photometric observations, determining spatial distribution and bivariate radio and optical luminosity function

09 p1382 A72-22279

Differential photoelectron fluxes at 560 km altitude observed by OVI-18 satellite on 22 March 1969, noting latitudinal variation

09 p1378 A72-23013

Quasar redshift distribution and optical and radio luminosity functions analysis

10 p1534 A72-23904

Inversion spatial nonuniformity effects on spectrum and kinetics of ruby laser, using spherical mirrors

10 p1491 A72-24361

Time optimal control of distributed systems with random properties, considering n integral relations and flying wing vehicle torsional vibration problems

10 p1421 A72-24427

Spiral galaxy density wave maintenance mechanism from rotating disk star-gas system model description of stellar birth and disintegration effects

10 p1547 A72-24869

Spatial distribution of electron beam excited plasma wave spectrum, determining wavenumber, amplitude and frequency by incoherent microwave scattering

11 p1693 A72-25564

Dayside magnetosphere stably trapped radiation zone high latitude boundary determination from energetic electron intensity spatial distribution observation by Imp 3 satellite

11 p1713 A72-26106

Planetary nebula classification based on forbidden line ratios and morphology, discussing galactic plane distribution, radial velocities and evolution

12 p1867 A72-27209

Russian book on spectral, spatial and time characteristics of lasers covering luminescence and resonator theories, electromagnetic field structure and radiation dispersion

12 p1820 A72-27500

ATS F/G radio beacon experiments for study of exosphere and ionosphere integrated electron content, spatial structure and time dependent behavior

12 p1782 A72-27526

Spatial characteristics of equal energy visual stimuli in metacontrast design for targets and masks of constant separation and varying width, deriving weighting functions

12 p1762 A72-27680

High level Canberra flight for three dimensional picture of wind and temperature fields, showing CAT, gravity waves and smooth flight characteristics

12 p1841 A72-27709

Equatorial spread F spatial and temporal distribution from short wave side reflection observations along Lindau-Tsumeb transequatorial HF radio transmission path

12 p1803 A72-27778

Plasma ionization traveling disturbances velocity and spatial structure in strong electromagnetic waves field

13 p1915 A72-28469

Estimated peak regional concentration of SST exhaust in stratosphere from expected flight operation levels

13 p1991 A72-28837

Time varying magnetospheric electric field spatial distribution effect on plasmasphere temporal evolution, considering fine structure due to periodic gusts in convection electric field

13 p1953 A72-29804

Solar photosphere velocity field photoelectric measurements, emphasizing long periods and low spatial wave numbers in deep layers

13 p2048 A72-29927

Electron energy distribution, ions mass spectral composition and spatial charge concentration of currentless photoresonant Ce plasma obtained by associative ionization

14 p1236 A72-30175

Refraction theory applied to isotropic absorbing media, noting spatial distribution of incoherent components according to polarization states

14 p2130 A72-30242

Dc arc plasma, investigating applied magnetic field, trace elements and gap spacing effects on spectral line intensity spatial distribution

14 p2139 A72-30783

Solar proton flare on 2 November 1969, investigating active region magnetic field development and spatial structure, near limb and coronal phenomena

14 p2160 A72-30909

Voluntary saccade length dependence on visual field nontarget stimuli number, locus and distance from target

14 p2077 A72-30966

Gravity waves parametric generation on liquid surface, presenting threshold values for space distribution of amplitudes and phases

14 p2097 A72-31111

Particular and general exact solutions of Einstein equations for matter filled space under assumption of spherically symmetric distribution of perfect fluid

15 p2305 A72-31343

Surface electrode distance, area and pressure effects on electromyogram recording of large skeletal muscle electrical activity during defined muscular tensions

15 p2190 A72-32490

Spatial distribution of nitrogen molecular beam scattering from solid nitrogen surface as function of beam energy and incidence angle

16 p2430 A72-33063

Face centered solid crystal cell spatial distribution effect on body surface-reflected molecular beam intensity distribution

16 p2430 A72-33066

Spatial flow velocity fields of incompressible continuous media with family of instantaneously inextensible planes, applying plastic flow theory

16 p2423 A72-33107

Variational principle by imposing time-independent spatial variation on hypothetical system governed by differential equation

16 p2416 A72-33664

Mode locked lasers, investigating effect of grating-induced phase and spatial modulations by multiple transverse modes on pulse compression across beam cross section

16 p2403 A72-33840

Spatial characteristics of magnetic field fluctuation in the magnetosheath

17 p2545 A72-34474

Inversion spatial nonuniformity effects on spectrum and kinetics of ruby laser with spherical mirrors

17 p2563 A72-34960

Spectral analysis of highly inhomogeneous chromospheric flares

17 p2617 A72-35709

Spatial distribution and temporal nature of the entry of solar cosmic rays into the polar cap

17 p2603 A72-35870

Spatial distribution of galactic globular clusters stars from Palomar sky survey

18 p2724 A72-36092

X ray observation inadequacy in detection of background radiation surface brightness fluctuations due to irregular distribution within galactic cluster sources

18 p2729 A72-37006

The structure of the Coma cluster of galaxies

19 p2854 A72-37229

Ignition moment of solid propellant particles monodisperse aggregate uniformly distributed in gaseous oxidizer

19 p2879 A72-37359

Bright nebulae near concentrations of high-velocity gas

19 p2856 A72-37504

All sky photography of auroral arcs alignment, noting oval distribution pattern

19 p2793 A72-38750

OH airglow IR observation from high altitude sites with bandpass filter, noting average spatial and diurnal fluctuations

19 p2794 A72-38861

Noise and stimuli current time and spatial distribution effect on visual performance of eye with image intensifier

21 p3054 A72-40742

Three-dimensional pattern of instability development during the interaction between a modulated electron beam and a plasma
21 p3092 A72-40800

Effects of thermo-optical distortion on the radiation loss magnitude and spatial-angular radiation characteristics for a lamp-pumped rhodamine-6G laser
22 p3185 A72-42173

High energy electron spatial distribution in plasma sheet from Ogo 5 magnetometer experiments
22 p3211 A72-42406

Plasma sheet characteristics of geomagnetic tail at 60 earth radii, inferring spatial distribution of magnetic field magnitude and plasma energy density
22 p3211 A72-42407

Spatial and temporal variations of thermal plasma ion and electron densities as function of L at 3000-5700 km from polar orbiting OV 3-1 satellite observation
22 p3211 A72-42414

Light scattering studies in amorphous media.
22 p3206 A72-42798

Light scattering in a sphere in the presence of an arbitrary source distribution
22 p3207 A72-42965

The effect of meteoric ion processes on radio studies of meteoroids.
23 p3336 A72-43558

Optimally sensitive control for distributed parameter systems.
23 p3275 A72-43612

Spatial and temporal temperature distribution in plasma from a low-voltage aperiodic spark discharge in an atmosphere of argon
23 p3320 A72-43677

Equivalence conditions for classes of linear and non-linear distributed parameter systems.
23 p3277 A72-44369

Fluctuations of the spatial distribution of the number of particles in showers generated by muons in heavy material
23 p3331 A72-44431

Behavior of the spatial distribution function of shower particles near the axis of a cascade shower
23 p3331 A72-44432

Lensless multiplication of images and their spatial frequency spectra with the aid of Fresnel holograms
23 p3292 A72-44470

Identification of four novae and a super-nova in Palomar Sky Atlas.
23 p3341 A72-44474

SPATIAL FILTERING

Wave front sampling points in spatial filtering of nonequidistant discrete holograms of flat objects
02 p0232 A72-12751

Spatial pulse modulation of optical signals for use in picture transmission, cinematography and holography
03 p0358 A72-13440

Nonlinear spatial filter synthesis by one-to-one signal-to-reference beam ratio and optimum exposure condition
05 p0663 A72-16676

Sunspot umbra spectrophotometric scans with spatial cancellation techniques, finding 4200 K umbral temperature with 0.60 photosphere contrast
07 p1069 A72-19081

Fluctuating signal propagation in plane laminar medium acting as spatial frequency filter, determining electron density distribution curvature radius in plasma layers
08 p1135 A72-21732

Linear analysis and synthesis of three dimensional interference system stationary in space and time domains
09 p1278 A72-22573

Spatial filtering techniques and numerical classification methods for pattern recognition in automated photointerpretation
09 p1312 A72-23305

Multichannel signal processing system for spatial optical filters synthesized by orthogonal functions
09 p1314 A72-23342

Holographic image structure spatial filtering resulting from nonlinear distortions in hologram recording
10 p1479 A72-24048

Radiographic image enhancement based on mathematical concepts of image convolution, Fourier transformation and spatial frequency filtering, discussing hardware and computer needs
10 p1481 A72-24322

Rotating mirror image position sensor for high angular resolution optical tracking, discussing performance improvement by computer generated variable density spatial filter
11 p1591 A72-25312

Phi-spatial filter method for straight or curved line geometric feature extraction of characters, using coherent optical system
12 p1820 A72-27494

Amplitude and phase local distribution analysis by filtering of spatial frequencies, examining holographic system by Hilbert and Fourier transformation
12 p1812 A72-27952

Frequency-specific color aftereffects as result of alternate exposure of subject to inspection gratings of different spatial frequencies
13 p1901 A72-28615

Relationship between antenna synthesis for a given radiation pattern and the synthesis of spatial signal processing systems
17 p2515 A72-34832

Encoding and decoding of color information using two-dimensional spatial filtering.
17 p2556 A72-35537

Computational algorithms compared for spatial frequency image filtering, considering tradeoffs between direct convolution and fast Fourier transform under equal point-spread functions assumption
18 p2658 A72-36263

Use of amplitude filter to improve the partially space coherent diffraction of a defocused circular aperture.
19 p2833 A72-37402

Wave front sampling points in spatial filtering of nonequidistant discrete holograms of flat objects
20 p2923 A72-39057

Optimum spatial filter for an anisotropic background-noise.
21 p3036 A72-41839

Visual information space-time dependent filtering by retinal and geniculate body neural nets
22 p3142 A72-42299

Comparison of theoretical and experimental results concerning spatial filtering in coherent optics
23 p3288 A72-43724

Linear analysis and synthesis of three dimensional interference system stationary in space and time domains
24 p3379 A72-44752

SPATIAL ISOTROPY

U ISOTROPY

U SPATIAL DISTRIBUTION

SPATIAL ORIENTATION

U ATTITUDE (INCLINATION)

SPECIES DIFFUSION

Stress induced oxygen diffusion in alpha Zr, attributing temperature dependent internal friction peak to oxygen-titanium interactions
02 p0247 A72-12818

Au distribution parameters in Si semiconductor devices, using radioactive isotope diagnostic methods
03 p0400 A72-12970

Pure metals creep or self diffusion activation energy from hot-hardness data, noting temperature and elastic modulus effects
03 p0375 A72-13931

Impurity diffusion of Ag, Cd, In, Sn and Sb in magnesium single crystals, observing valence effect on activation energy
03 p0378 A72-14254

Annealing effects in plated-wire memory elements, investigating Cu and Permalloy interdiffusion at low temperatures by X ray diffraction and electron beam microprobe
04 p0503 A72-15715

Reactive diffusion in binary systems, explaining diffusive saturation process from phenomenological viewpoint
05 p0701 A72-15753

Pure Al self diffusion at 130-200 C, determining activation energy from prismatic loop annealing rates
05 p0677 A72-17109

Diffusive mobility of C in Mo single crystals and Mo-Re alloy, using autoradiography and electron microscopy
06 p0829 A72-17733

Heterogeneous composite solid propellants ignition behavior under exposure to hot oxidizing gas, using gas phase model with species and energy radial diffusion
07 p1051 A72-19726

Diffusion kinetics in Nb-Al system for varying time and temperatures
07 p1015 A72-19930

Neutral species chemical reactions in D and E regions, taking into account effects of photodissociation and transport by horizontal and vertical flow and molecular diffusion
07 p0936 A72-20039

Bcc solid solutions formation in Cr-W binary alloys, investigating interface reaction and two phase grain boundary diffusion by X ray diffraction and microscopy
08 p1185 A72-21246

Defects high temperature diffusion effect on Mossbauer spectral lines width and positions in crystals with quantum transfer between multiplet sublevels in fine structure
09 p1372 A72-23038

Mo-Zr solid solutions internal bonding, discussing diffusion controlled process and hardness dependence on Zr
10 p1494 A72-23833

Interdiffusion of tight contact welded ring Ti-W pairs at high temperature, using X ray analysis and electron beam techniques
10 p1497 A72-24785

Diffusive mobility of C in Mo single crystals and Mo-Re alloy, using autoradiography and electron microscopy
11 p1652 A72-25340

Metal silicide phase formation for Nb, Ta, Mo and W, examining Si diffusion and transport processes
11 p1664 A72-26859

Electron microscope observed dislocation splitting in bent thin tantalum carbide sheet, analyzing results in terms of strain rate law and carbon diffusion model
11 p1669 A72-26948

Lithium diffusion into silicon by evaporation and homogenization technique, discussing dislocations and oxygen effects from aging in Ar at 150 C
12 p1757 A72-28025

Mo addition effect on Al and Ti diffusion from inter-metallic compounds into Ni matrix, noting increased high temperature stress rupture life
13 p1975 A72-28670

Gaseous species diffusion in carrier gas under various geometries and flow conditions, using finite element method
14 p2095 A72-30928

Ionized and neutral specie concentration in rarefied hypersonic wake flow behind cone, using electrostatic and electron density probes
15 p2177 A72-31209

Solution kinetics of secondary phases in cast dendritic and nondendritic Mg-Zn and Mg-Zn-Zr alloys, using cylindrical and spherical diffusion models
15 p2257 A72-32119

Boltzmann-Matano analysis of substitutional interstitial diffusion profiles of Zn in GaAs by radio tracer techniques
16 p2441 A72-33209

Chemical diffusion in the titanium-aluminum system
17 p2510 A72-34275

Binary diffusion of a jet embedded in a boundary layer.
17 p2541 A72-35238

Studies of the influence of CVD tungsten depositing conditions on the formulation of pores resulting from interdiffusion in the emitters of thermionic converters.
18 p2698 A72-36145

Diffusion in the nickel-rich, Ni-Al solid solution at 1260 C.
18 p2701 A72-36593

Diffusion effects in solids caused by radiation exposure, calculating diffusion coefficients of additions and defects
20 p2958 A72-38952

Relation between diffusion and defect formation rates in silicon detectors exposed to gamma radiation
20 p2959 A72-38956

Self-diffusion of cobalt in coarse grained polycrystalline Ni-Co alloys at low temperature.
20 p2935 A72-39016

Developments in the field of metallic diffusion protective layers employed against high-temperature corrosion
20 p2944 A72-39450

Surface reactions in similar boundary layers.
20 p2915 A72-40014

Russian book - Heat and mass transfer: A reference book.
21 p3128 A72-40350

Iron transport in chondrites - Evidence from the Warrenite meteorite.
21 p3104 A72-40491

Investigation by the mass transfer method of the diffusion of nickel at a /110/ surface of tungsten single crystals
21 p3068 A72-40955

Application of Tolubinskii's integral method to the solution of boundary value problems of nonstationary convective diffusion
21 p3129 A72-41056

Diffusion of cobalt in Ni-Co alloys at temperatures up to 1000 C
21 p3070 A72-41645

Isotope effect measurements application to determination of sodium diffusion mechanism and rate in sodium silicate glass
22 p3196 A72-42794

German monograph - Determination of the diffusion coefficient of hydrogen in the binary iron-nickel system at 25 and 58 C.
22 p3194 A72-43057

Kinetic equations solution approximation for two species isothermal reactions in homogeneous turbulent mixing
24 p3392 A72-45059

SPECIFIC HEAT

NT HEAT OF SOLUTION

Tungsten heat capacity, electrical resistivity and thermal radiation measurement over 2000-3600 K range by pulse heating technique
01 p0082 A72-10174

Positive and negative deviations of linear electrical resistance of d-transition metals at high temperatures as function of Debye temperature and Fermi level
02 p0242 A72-12006

Solar wind plasma flow through earth bow shock, deriving specific heats ratio based on one-fluid theory and conservation equations

03 p0412 A72-13509

Quasi-static measurement and electron phonon interpretation of specific heat of metals at low temperature

03 p0456 A72-13843

Method of characteristics calculations of inviscid free jet flow with low specific heat ratios for perfect gas at 1.10 Mach number

03 p0309 A72-13926

Low temperature heat capacity of chromium silicide, observing superconducting transition and magnetic susceptibility

03 p0377 A72-14024

Electron correlation effects on low temperature thermodynamics of amorphous semiconductors, predicting Curie law magnetic susceptibility and equilibrium electronic specific heat dependence on temperature

04 p0562 A72-15153

Tantalum carbide specific heat and other thermodynamic properties over 0-3000 K range

05 p0672 A72-16097

Thermal conductivity, electrical resistivity, emissivity and specific heat of polycrystalline vanadium under electron bombardment heating at 1200 to 1800 K

06 p0828 A72-17613

Niobium carbide thermodynamic properties tabulated for 0-3000 K, deriving equation for heat capacity from low temperature experiments

06 p0832 A72-18430

Electroconductivity, thermal conductivity and diffusivity, specific heat and emissivities of Ti at 1000-1700 K

07 p1010 A72-18935

Test facility for studying temperature dependence of thermal diffusivity and true heat capacity of metals between minus 150 and plus 400 C

07 p0982 A72-18941

Thermal diffusivity and heat capacity measurement by temperature vs time curve shape by laser pulse absorption, using thermocouple

07 p1101 A72-19890

Critique of paper on heat capacity and thermal conductivity of Apollo 11 lunar rocks at liquid helium temperatures, noting constraints imposed by Mossbauer data

07 p1084 A72-20521

Unsteady heat conductivity equation for finite dimensions parallelepiped, noting temperature dependence of specific heat and thermal conductivity

08 p1252 A72-21321

Stagnation conditions of magnetoradiative supersonic flow through shock waves for temperature dependent specific heat parameter

08 p1255 A72-21795

Thermal diffusivity and conductivity and specific heat of hard electrode graphite intermediate medium in hydraulic hot extrusion of metals

08 p1181 A72-22072

Thermal conductivity, diffusivity and specific heat of lunar soil and basalt analogs, using Luna 16 samples

10 p1532 A72-23753

Levitron calorimetry for solid and liquid Mo enthalpy measurement, calculating specific heat and heat of fusion

10 p1496 A72-24243

Fiber reinforced plastics thermophysical properties, thermal conductivity and heat capacity, determining effects of reinforcement fiber type, resin amount and type

[AIAA PAPER 72-366] 11 p1669 A72-25391

Hot wire cell measurement of specific heat in low pressure gases, determining thermal conductivity and accommodation coefficient

11 p1634 A72-26367

Specific heat temperature coefficient measurement of W at 2000 to 3600 K for defect and phase transition studies

11 p1661 A72-26625

Isochoric heat capacity peaks of water and argon near boundary in two phase region at critical state

11 p1747 A72-26964

Energy capacity margin of heat absorbing liquid /water/ in cooling system, considering specific heat and maximum critical heat flux

11 p1747 A72-26969

Apollo 11 and 12 lunar samples thermal properties, presenting diffusivity, conductivity and specific heat

12 p1869 A72-27334

Experimental data gathering, processing and presentation for materials enthalpy, heat capacity, thermal conductivity, compressibility and volume over wide pressure and temperature ranges

14 p2130 A72-30599

Orthogonal projection method for nonstationary heat conduction boundary value problem with thermal conductivity and specific heat as prescribed functions of position

14 p2126 A72-31049

Temperature measurement error due to solid body and temperature sensor specific heat differences for unsteady heat transfer

14 p2106 A72-31160

Benzene isochoric specific heat curves along saturation line in biphasic and single phase states, noting variations near critical point

15 p2334 A72-31393

Debye-Waller factors measurement for Mo and Cr surfaces near normal incidence based on LEED

15 p2292 A72-31857

Heat capacity data analysis for solid solutions of superconducting Nb-Ti system, investigating electronic structure

15 p2296 A72-32692

Semiconductor thermal diffusivity and heat capacity measurements, using carbon bolometer and high sensitivity point microthermistor

16 p2442 A72-33855

Thermal conductivity and heat capacity measurement by temperature vs time curve shape by laser pulse absorption, using thermocouple

17 p2637 A72-35138

Enthalpy and heat capacity of boron carbide at temperatures ranging from 273 to 2600 K

18 p2704 A72-37191

Determination of the temperature dependence of the thermophysical characteristics of solid materials by the method of successive approximations

19 p2881 A72-38044

Elastic constants of niobium-molybdenum alloys in the temperature range -190 to +100 C

19 p2821 A72-38591

Liquid dielectrics specific heat determination by adiabatic calorimeter with monotonic heating

21 p3059 A72-41819

Enthalpy and specific heat of tantalum carbide over the temperature range from 273 to 3600 K

22 p3187 A72-41890

Thermal properties of polymers below 4 K

22 p3197 A72-42800

Apparatus for measurement of specific heats between 0.3 and 3 K in the oscillating thermal region

22 p3180 A72-42936

Specific-heat and magnetic measurements in superconducting Ta-Nb alloys

23 p3323 A72-43273

Thermal and electrical conductivities, thermal expansion and specific heat of commercial graphite obtained by precipitation of methane pyrolysis products on hot surface

23 p3306 A72-43689

Application of a strongly doped semiconductor model to the study of thermodynamic and conductivity properties

24 p3432 A72-45068

The shock-combustion /expansion-combustion/ polar with allowance for variation of the specific heat ratio of a gas passing through a flame front

24 p3465 A72-45446

Phonon dispersion relations and Debye characteristic temperature for Ti, Hf and Y hcp lattices

24 p3415 A72-45629

SPECIFIC IMPULSE

Algol 3 solid propellant rocket motor design for Scout D and E launch vehicles first stage, considering high total impulse, payload/mass capability and propellant grains

[SAE PAPER 710765] 01 p0115 A72-10261

Fluorine-ammonia as high energy liquid bipropellant for rocket engines, presenting ground test results regarding velocity and specific impulse characteristics as functions of mixture ratio

01 p0114 A72-11220

Nozzle and cavity wall cooling limitations on uranium plasma nuclear rocket specific impulse, discussing wall heat flux and transpirational cooling by propellant flow

03 p0387 A72-14383

Rocket propellants R and D toward higher specific impulses, discussing liquid, solid, hybrid and tribrid systems

05 p0702 A72-16744

Specific impulse, mass and propellant efficiency characteristics of miniature motors using cryogenic fuels for auxiliary rocket thrusters

07 p0914 A72-18983

High energy rocket propellants for space propulsion systems, evaluating various propellant combinations in terms of specific impulse, toxicity, corrosiveness, cost and availability

11 p1702 A72-25299

ATS F ion thruster system for north-south station-keeping, discussing specific impulse, thrust vectoring, propellant system and power conditioning circuitry

[AIAA PAPER 72-439] 11 p1707 A72-26180

Duration test and performance of annular colloid thruster, noting specific impulse increase and electrostatic vectoring

[AIAA PAPER 72-483] 11 p1710 A72-26209

Generalized relations for determining specific impulse losses in nonequilibrium two-phase nozzle flows

20 p2914 A72-39909

SPECIFICATIONS

NT AIRCRAFT SPECIFICATIONS

NT EQUIPMENT SPECIFICATIONS

Proposed gas turbine procurement standards for gaseous and liquid fuel specifications emphasizing fuel contaminants

[ASME PAPER 71-WA/GT-3] 05 p0703 A72-15896

SPECIMENS

Vacuum mold preparation and flexural testing of miniature carbon fiber reinforced composite specimens

11 p1671 A72-25468

A study of the vestigial records of cosmic rays in lunar rocks using a thick section technique

23 p3341 A72-44459

Green and blue-green algae reflectance and transmittance characteristics, selecting spectral bands for multispectrum scanning of algal suspensions in water bodies

02 p0213 A72-11857

Nonisothermal gas layer IR radiation in multiatomic molecular vibrational-rotational band range, determining lowest level energy for wide line spectrum

04 p0547 A72-14657

Fluorescence polarization and intensities of nitric oxide vibrational bands from Cd line and continuum excitation for spectrometer calibration

04 p0552 A72-14893

Height profiles for volume emission rate and intensity of second positive band of nitrogen molecule excited by photoelectron impact, noting solar activity effects

04 p0518 A72-14962

Intensity-height profiles for molecular oxygen first and second negative bands in F region, using equilibrium velocity distribution of photoelectrons

04 p0518 A72-14963

White dwarf Grw plus 70 deg 8247 circular polarization spectral structure with molecular absorption bands coincident with Minkowski bands

04 p0580 A72-15368

Artificial barium oxide clouds band spectrum analysis, calculating rotational and vibrational temperatures in total wavelength region

05 p0655 A72-16069

Martian atmospheric pressure determination from carbon dioxide bands spectroscopic measurements

06 p0884 A72-18032

Radio sources sky survey with radio telescope, discussing 5C1 and 5C2 spectral distributions

07 p1069 A72-19074

German monograph on sky scanner for short term sky spectral density distribution using glass fiber bundles for spectral components simultaneous measurement

07 p0983 A72-19266

Martian height gradients from 1.6 micron carbon dioxide band intensity, using telescopes with prismatic quartz spectrometer

08 p1231 A72-21125

Einstein A coefficients, band oscillator strengths and absolute band strengths calculation for comet tail band system of CO cations

09 p1355 A72-22789

CO Cameron system band intensity from measurements of equivalent widths of resolved rotational lines, using Doppler growth curve for line strength conversion

10 p1514 A72-24095

Radiative displacement of molecular beam sidebands by spatiotemporal modulation of irradiating RF field

10 p1492 A72-24858

Martian atmospheric pressure determination from carbon dioxide bands spectroscopic measurements

11 p1719 A72-25968

Cameron bands phosphorescent yield of carbon monoxide from carbon dioxide photodissociation in helium buffer

11 p1590 A72-26013

Carbon dioxide laser vibrational-rotational band small signal gain factor dependence on time elapsing after breakdown of equilibrium distribution

13 p2008 A72-29503

Absolute cross sections for Werner band system excitation of molecular hydrogen by electron impact, discussing relative spectral response calibration

13 p2009 A72-30065

Ferric ion traces evidenced in lunar and meteoritic titanates by charge transfer bands observations during heating, interpreting origin as caused by cosmic radiation

14 p2154 A72-30515

Methane spectral band tetrahedral fine structure analysis, using vibration-rotation Hamiltonian

14 p2084 A72-30523

CO overtone band and vibrational transitions in CW carbon disulfide-oxygen chemical laser, discussing pressure effects

15 p2250 A72-32525

Band model and scaling approximation validity for computation of transmission profile in V4 band of methane in Jovian atmosphere

16 p2461 A72-34099

Application of dispersion techniques to molecular band intensity measurements. I - Principles of 'fringe shift' and 'fringe slope' band analysis procedures

17 p2586 A72-35832

Fringe shift and slope analysis of interferometric spectrogram formed by NO-gamma system spectral band

17 p2586 A72-35833

New observations on the Kuiper bands of Uranus.

21 p3106 A72-41043

Temperature range estimation method for planetary atmospheric component generating spectral lines, applying to Venus observations at 7820 A carbon dioxide band

21 p3106 A72-41045

Quantitative spectroscopy of the aurora. I - The spectrum of bright aurora between 7000 and 9000 A at 7.5 A resolution.

21 p3049 A72-41724

Second positive system of nitrogen bands in the day airglow from Cosmos-224 data

23 p3282 A72-43356

A shock tube determination of the electronic transition moment of the CN red band system.

23 p3316 A72-44329

Interpretation of X-ray emission bands of AIII-BV compounds

24 p3432 A72-44914

SPECTRAL CORRELATION

Spectral correlation and transition probabilities of mutually dependent orthogonal binary random signals

11 p1595 A72-26299

SPECTRAL EMISSION

Materials spectral emission properties measurement, comparing with absolute black body model

04 p0596 A72-14652

Quasar radio structure, investigating morphology, statistical characteristics, angular size of spectra and red shift correlations from interferometer measurements

05 p0716 A72-16377

Temperature inhomogeneity effect on plasma column microwave resonant behavior in presence of axial magnetic field, ascribing spectral shifts to electron density and temperature profiles changes

06 p0854 A72-17417

Terrestrial surface observation from space platform, considering atmospheric effects, surface spectral properties and information resolution and transmission

08 p1170 A72-21965

Apollo lunar fine samples total emittance as function of temperature, using spectral emittance measurement technique

09 p1388 A72-23028

Regional observation of atmospheric spectral transmittance by Bouguer and high/low star methods

13 p2044 A72-29650

Electric field excited stable auroral red arc time dependent behavior, noting inconsistency with satellite and ground observation of 6300 A emission for electron energy

13 p1953 A72-29812

Emission line polarization prediction for planetary nebula C IV ion emitted spectrum via theory for energy level population

16 p2458 A72-33689

Spectral emittance of Apollo-12 lunar fines.

20 p2970 A72-39486

Spectral reflectance and emittance of Apollo 11 and 12 lunar material.

20 p2970 A72-39609

Peculiar absorption and emission microstructures in the type IV solar radio outburst of March 2, 1970.

22 p3217 A72-42044

Photochemistry of the airglow continuum.

22 p3153 A72-42889

Spectral investigations of the comet Bennett 1970 II (1969 i)

23 p3337 A72-43646

SPECTRAL ENERGY DISTRIBUTION

RF interference in angle-modulated system with predetection linear bandpass filter, calculating output power spectral density in baseband

01 p0045 A72-10332

Cosmic ray energetic spectrum variation from observed latitudinal effects during 1954-1962 solar activity cycle

01 p0119 A72-10607

Irregular, spiral and elliptical galaxies radio continuum measurements at 1420 MHz, presenting positions flux densities and brightness distributions

01 p0131 A72-11005

Galactic clusters red shifts and absolute spectral energy distributions, inferring evolutionary effects by comparison with giant elliptical galaxies light energy distribution

02 p0279 A72-12185

Space observation of stars and interstellar medium, considering stellar energy distributions and line spectra, interstellar absorption lines, galactic nebulae and X ray sources

03 p0420 A72-13122

Solar corona X ray data from SOLRAD satellites, detailing spectral energy distribution, ionization balance, continuum radiation and line emission

03 p0410 A72-13219

Solar radiation characteristics, calculating concentration and spectral energy distribution

04 p0572 A72-14701

Spectral energy distributions of peculiar galaxies and quasars by photoelectric spectrometry, observing emission lines strength

05 p0716 A72-16373

Mf/hf/vhf scattering from sea, deriving received power and spectral energy density dependence on grazing angle, frequency, range and surface impedance

06 p0770 A72-17338

Quasars red shift distribution apparent maximum for Z near 2.0, investigating possible sources of observational selection

06 p0882 A72-18000

Solar Fraunhofer line profiles determination by digital data recording double-pass spectrophotometer, presenting observed atomic Ni and Fe lines intensity distributions

06 p0884 A72-18028

Early type stars photoelectric spectra obtained with Mariner 9 UV spectrometer, obtaining resonant line features and spectral energy distribution

06 p0890 A72-18347

Spectral distributions of laser emission as dynamic variables of electromagnetic field modes and active medium excitations, using perturbation theory

07 p1007 A72-20120

High temperature black body model based on induction heating of graphite crucible, noting application to stellar energy spectral distribution determination

07 p0991 A72-20404

Optimum lasing conditions and spectral characteristics of organic dye lasers at 3,100-11,000 A

07 p1009 A72-20613

Spectral density curves for intensity fluctuations of stimulated emission from low and ultralow frequency gas lasers as function of thermal oscillation, mode interference and heat effects

08 p1182 A72-21379

Fabry-Perot spectrometer/premonochromator assembly integral transmissivity as function of spectral tuning noting selectivity by amplitude modulation

08 p1172 A72-22035

Spectral distribution characteristics of geomagnetic field mean intensity variations, relating longitudinal

SPECTRAL ENERGY DISTRIBUTION

specific resistance and integral conductivity of top rock layer

09 p1296 A72-22236

Single picosecond light pulses from mode locked Nd-glass laser, discussing temporal structure, spectral energy distribution and pulse shape measurements

09 p1324 A72-23082

LF noise spectral density measurements in avalanche diodes as function of frequency, considering mean square voltage drift

09 p1287 A72-23118

Simulated superposed coherent and chaotic thermal radiation of arbitrary spectral shape, using laser beam modulation and photocount statistics

09 p1352 A72-23240

Spectral indices of extragalactic radio sources at 1.4 GHz independent on flux density

10 p1545 A72-24807

Spectral distribution of signal power in AM, FM and PM PCM systems with time division multiplexing

10 p1439 A72-24909

Solar Fraunhofer line profiles determination by digital data recording double-pass spectrophotometer, presenting observed atomic Ni and Fe lines intensity distributions

11 p1719 A72-25964

Semiconductor injection laser with distributed radiative loss, calculating radiation line shape and width and quantum efficiency

11 p1648 A72-26329

Russian book on satellite-borne electro-optical IR radiometers design for celestial bodies spectral radiance and energy distribution measurement

11 p1634 A72-26376

Turbulent plasma electric field energy density spectrum from statistical mechanics investigation based on canonical formalism for electron plasma

12 p1851 A72-27387

Negative photoconductivity effect in high resistance n-type indium phosphide single crystals, noting photocurrent spectral distribution and I-V characteristics

13 p2022 A72-29647

Signal level fluctuations line spectra energy characteristics comparison for oblique and oblique-backscatter sounding, noting changes in harmonics intensity and period

14 p2085 A72-30638

Stellar UV radiation spectral energy distribution investigation of stellar composition and atmosphere and interstellar gas, discussing observation restriction by earth atmosphere absorption

15 p2302 A72-31284

List of galaxies with UV continuum, noting emission lines, Seyferts, quasars and spectral energy distribution

15 p2304 A72-31326

Venus long wave radiation spectral composition, angular distribution and carbon dioxide transmission from thermal, structure and vertical radiation absorption profile

15 p2305 A72-31394

Spectral intensity distribution of vibrational electron interaction with strong coupling during polymerization of monomer cyanine dye and dimer molecules

15 p2280 A72-31410

B type main sequence star absolute energy flux envelope from ground based and OAO 2 observations, comparing with model atmosphere prediction

15 p2311 A72-31997

IR radiant energy emission from conical jet exhaust of turbojet aircraft

15 p2298 A72-32399

Emitted phonon spectrum effects on detected signal response in superconducting Sn diodes, noting deviation from linearity

15 p2209 A72-32541

Torch temperature measurements in vacuum by spectral radiative energy distribution method

16 p2476 A72-33258

Determination of the parameters of minority carriers in semiconductor photocells from a spectral sensitivity curve

17 p2498 A72-35512

Evaluating the light from the sun.

19 p2790 A72-37933

IR chemiluminescence technique /method of arrested relaxation/ to measure spectral energy distribution among Cl and HI and DI reaction products

19 p2763 A72-38802

Rate constant determination for reaction product molecule in vibrational and rotational quantum states, obtaining spectral energy distribution

19 p2763 A72-38803

Energy distribution among reaction products. VI - F + H2, D2.

19 p2763 A72-38804

An analysis of the spectral scanning technique for determining the temperature distribution in a semi-transparent medium.

20 p2986 A72-39677

Velocity oscillations in the solar atmosphere.

21 p3107 A72-41278

A spectral study of the nebula NGC 7635 and the star BD +60.2522 deg

21 p3113 A72-41755

Type II supernova spectral intensity minima due to blueshifted absorption lines of hydrogen and Fe II based on observed and synthetic spectra wavelength comparison

23 p3334 A72-43257

Galactic submillimeter background radiation energy density limit, taking into account recalibrated gamma ray flux measurements agreement with cosmic ray-interstellar matter interactions

23 p3329 A72-43942

Spectrometric zonal standards - Selection of stars and methodology of their study

23 p3338 A72-44031

Orion nebula continuum spectrum energy distribution from spectrophotometric measurements, comparing color temperature with previously obtained data

24 p3438 A72-44839

Angular spectra and frequency characteristics of quasi-continuous monomode and two mode Nd-YAG lasers with spherical resonator

24 p3412 A72-45707

SPECTRAL LINE WIDTH

Self broadened rotational half widths for Lorentzian line shape and slit function in CO fundamental, using line center transmission measurements

01 p0104 A72-10095

Spectral distribution of total continuous emission coefficient for LTE hydrogen plasma over 8000-16,000 K and 400-15,000 Å ranges, observing Stark broadening

01 p0108 A72-10175

Orion A and M17 radio recombination line width increases, discussing Stark broadening functional dependence on principal quantum number

01 p0131 A72-11010

Line profile shape analysis of X ray diffraction broadening from deformed W, showing close approximation to Voigt distribution

01 p0088 A72-11046

Laser spark plasma initial development phase showing high electron temperature and concentration, continuous spectrum emission, line broadening and shock wave formation

02 p0237 A72-11405

Spectral broadening in laser Doppler velocimeter, showing identity of wave vectors spread for incident and detected fields and scattering center finite volumetric stay

02 p0229 A72-12094

Electron impact broadening of ionized Be and Ba lines in electric shock tube plasma, measuring electron density and temperatures

03 p0393 A72-13020

Single electron approximation of Stark broadening of hydrogen spectral lines without constraints of collision and quasi-static theories

03 p0391 A72-13079

Magnetic field and turbulence in sunspots, studying local variations of saturation and Doppler broadening

03 p0428 A72-13297

Fluctuation theory for single mode laser detuning effect on photon intensity and spectral line width

03 p0368 A72-13671

Electron impact Stark broadening of ionized chlorine lines in pulsed arc plasma using laser interferometric and spectroscopic measurements

03 p0396 A72-13748

Optical excitation of divergent alkali atomic beam by radiation absorption, deriving absorption coefficient for line broadening and/or Doppler effect

03 p0393 A72-14062

Eclipsing variable system AW Peg spectrophotometric data, examining spectral line geometries and intensities and atmospheric conditions

03 p0439 A72-14244

Curve of line width correlation application to alpha Orionis OH lines, determining atmospheric turbulence and thermal velocities

04 p0571 A72-14558

Pressure broadened water vapor line shape resonance dispersion at 22 GHz, deriving expression for instrument induced deviation from Lorentzian behavior

04 p0552 A72-14891

Blanketing effect of strong line spectra collisionally broadened wings, evaluating stellar atmospheric model computation

04 p0573 A72-14907

Solar flares, presenting line width changes curves, chromospheric observation by spectrohelioscope and solar flux measurements

04 p0567 A72-14923

Stark contours of hydrogen spectral lines in turbulent plasma with high noise level due to hf Langmuir oscillations

04 p0557 A72-14986

Interstellar sodium lines intensities and widths as discriminants for two component models of galactic H I cloud regions

04 p0578 A72-15310

Plasma satellite linewidth broadening due to density inhomogeneity, considering evidence based on light scattering from Ar plasma jet

04 p0559 A72-15355

Two mode lasers with photon intensity coupling near threshold treated by fluctuation theory detailing intensity, correlations and line widths

05 p0667 A72-16017

Horizontally averaged nonthermal velocities determination in lower solar chromosphere, observing Doppler widths of weak rare earth emission lines in H and K wings

05 p0718 A72-16504

He-Ne laser amplitude fluctuations with hot and cold cathode discharge tube operation, determining emission spectral line width

05 p0669 A72-16613

Be stars emission line profile broadening due to surrounding gaseous ring in circular motion according to Kepler law

06 p0880 A72-17892

Temporal characteristics of emission line broadening in lasers with dispersive resonators for Nd ion activated phosphate glasses and disordered crystals

06 p0826 A72-18011

Flare spectra of AD Leo during strong burst, comparing Balmer discontinuity and line widths with UV Cet stars

06 p0883 A72-18020

Red shift and spectral line broadening model based on emitting and absorbing atom effects

06 p0883 A72-18023

Van der Waal broadening of shock excited emission lines at 5000 K for astrophysical applications

06 p0852 A72-18053

Gas laser emission fluctuations of total radiation energy, polarized field components and line widths in longitudinal magnetic field

07 p0999 A72-18911

Doppler broadening elimination in red Balmer line of atomic hydrogen at 6563 Å by high resolution saturation spectroscopy

07 p1037 A72-19132

Coupled mode locking equations solved for homogeneously broadened lasers modulated near axial mode separation frequency

07 p1001 A72-19192

Spontaneous emission from driven Doppler broadened gas of two level atoms radiating into free space, predicting power spectrum

07 p0940 A72-19194

High gain xenon laser spectral narrowing dependence on line-broadening mechanism including saturation and distributed loss effects

07 p1001 A72-19201

Energy transfer rates and spectral line inhomogeneity of narrow band oscillation phosphate glass and inorganic liquid lasers with Nd

07 p1004 A72-19227

Carbon dioxide IR absorption lines broadening at 298 and 207 K by evacuated high-resolution Czerny-Turner spectrograph, comparing with values based on fixed collision cross section

07 p1038 A72-19834

Single mode laser line width calculation by reduction to non-Hermitian eigenvalue problem using Fokker-Planck equation

07 p1008 A72-20440

Plasma If waves nonlinear spectral broadening in magnetic field based on degeneracy splitting

07 p1045 A72-20443

Laser induced line narrowing effects in coupled Doppler broadened transitions within standing wave field

07 p1039 A72-20682

Internal asynchronous modulation of multifrequency He-Ne laser with Doppler broadened transition line

08 p1181 A72-20793

Coalescence /collapse/ of overlapping spectral lines due to nonadiabatic broadening for Stark structure of hydrogen and helium lines in discharge plasma

08 p1211 A72-21717

Nd smooth pulsed laser action with narrow spectral line and emission amplification from Nd doped phosphate and silicate glass rods

08 p1183 A72-22027

Hydrogen line broadening in plasma theory with limitations of Stark component intensity distribution by quasi-static and impact approximations

09 p1358 A72-22493

Carbon monoxide in carbon dioxide atmosphere, determining IR absorption lines broadening at reduced temperatures

09 p1351 A72-22612

Pressure broadened atomic line shapes calculation for Cs resonance line pressurized by Ar, using Lennard-Jones potentials

09 p1354 A72-22663

Mossbauer lines diffusion broadening and weakening in crystals impurity atoms nuclear spectra

09 p1371 A72-23030

Defects high temperature diffusion effect on Mossbauer spectral lines width and positions in crystals

with quantum transfer between multiplet sublevels in fine structure

09 p1372 A72-23038

Laser pulse description by Fourier analysis, showing broadened spectral line widths relationship to cavity modes

09 p1324 A72-23078

Foreign gas collisional broadening of nitrous oxide absorption lines, obtaining optical collision cross sections

09 p1276 A72-23332

Xenon plasma produced in cascaded arcs, investigating spectral line widths, temperature and electron density profiles, transition probabilities and I-V characteristics

09 p1364 A72-23392

Methane absorption line profile, intensity and width studied with magnetically tuned He-Ne laser

10 p1490 A72-24041

Smooth variation of He-Ne laser spectral line width in single to multifrequency mode transition, passing laser beam through coated quartz plate

10 p1490 A72-24051

CO Cameron system band intensity from measurements of equivalent widths of resolved rotational lines, using Doppler growth curve for line strength conversion

10 p1514 A72-24095

Radio recombination lines broadening in hydrogen by electron collisions, using Baranger impact theory

10 p1435 A72-24142

Laser source spectroscopic determination of pure and nitrogen perturbed carbon dioxide transition lines half-widths

10 p1491 A72-24227

Transition probabilities and line shapes and widths of unimolecular problem computed using numerical methods for scattering processes

10 p1514 A72-24337

Optical hyperfine structure of Ne 21 excited states and quadrupole moment obtained by laser induced line narrowing techniques

10 p1515 A72-24601

Stellar absorption spectral line fineness indication for cold interstellar molecular clouds between observer and star

10 p1546 A72-24848

Stellar spectra differential analysis from solar curve of growth for Fe I with revised gf-scale, noting van der Waals broadening and microturbulence

10 p1547 A72-24868

Doppler spectral width of radar signal reflected from sea surface as function of illuminated region dimensions, waviness scale and emission factors

10 p1439 A72-24904

Paschen beta emission line equivalent width variation in IR spectra of omicron Ceti

11 p1716 A72-25679

Flare spectra of AD Leonis during strong burst, comparing Balmer discontinuity and line widths with UV Cet stars

11 p1718 A72-25956

Red shift and spectral line broadening model based on emitting and absorbing atom effects

11 p1718 A72-25959

Carbon dioxide laser cross relaxation effects on hole burning process in Doppler broadened gain or absorption line

11 p1647 A72-26146

Semiconductor injection laser with distributed radiative loss, calculating radiation line shape and width and quantum efficiency

11 p1648 A72-26329

He-Ne laser with absorption cell, investigating high contrast power resonances due to Lamb dip at nonuniformly broadened absorption line center

11 p1649 A72-26340

Two axial modes competition in He-Ne laser with uniform line broadening, noting application for high stability frequency standards

11 p1649 A72-26349

Populations modulation and spatial harmonics influence on gas and solid state laser radiation characteristics, discussing uniform and nonuniform line broadening

11 p1650 A72-26353

HD 4180 shell H lines width variations comparison with Be stars, noting thirty year period emission decrease followed by outer shell absorption

12 p1867 A72-27213

Gas and solid state lasers amplitude and phase fluctuations calculated from Langevin equations, noting spectral line width and collision waves

12 p1826 A72-28050

Single electron approximation of Stark broadening of hydrogen spectral lines without constraints of collision and quasi-static theories

13 p2007 A72-29429

Adiabatic characteristics of impact to quasi-static transition during electron induced Stark hydrogen line broadening in plasmas

13 p2016 A72-29516

- Inner corona spectral data of 7 March 1970 solar eclipse, noting line half widths and emission line origin area relationship 13 p2042 A72-29535
- Solar corona spectral line width and wavelength measurements during 7 March 1970 total eclipse, using Fabry-Perot photographic interferometer 13 p2043 A72-29548
- Interaction between generating lines in coupled channels with arbitrary line broadening, studying radiation generation regimes in cascade circuit 13 p1970 A72-29680
- Tunable wide field birefringent element /filter magnetograph/ to separate polarized magnetic signal from selected spectral line width 13 p2045 A72-29706
- Nitrous oxide band intensities, half widths and pressure broadening coefficients 13 p2008 A72-30059
- Phononless lines shift and broadening and electron phonon interaction in lanthanum trifluoride-Nd crystal, obtaining temperature dependence of non-radiative transition probability 14 p2142 A72-30359
- Methane collision broadened rotational fundamental line, calculating line width dependence on temperature 14 p2135 A72-30893
- HCl and HF in carbon dioxide atmosphere, determining line intensities, halfwidths and shapes at room temperature 14 p2135 A72-30894
- Fundamental and overlapping bands integrated intensities and nitrogen broadened half widths of rotational lines in nitrous oxide obtained from absorption measurements 14 p2135 A72-30895
- Ionized plasma line widths and intensities due to Landau and collisional damping, observing effects by light scattering techniques 14 p2140 A72-30901
- Noncoherent isotropic scattering in plane parallel finite layer, considering Doppler line broadening 15 p2273 A72-31331
- Spectrometer entrance slit diffraction effects on observed fast beam spectral line width 15 p2280 A72-31383
- Singly ionized Ca and Mg electron impact broadened resonance lines from rapid scanning Fabry-Perot spectrometer measurements in shock tube generated high temperature plasma 15 p2282 A72-32643
- Na-He atomic collisions induced D lines broadening, fine structure transitions cross sections and multipole polarization resonance levels relaxation 15 p2283 A72-32651
- Minimum values estimation of amplitude fluctuations dispersion and spectral line width for conventional and quartz crystal controlled oscillators 15 p2210 A72-32735
- Sodium D lines broadening and shift parameters under atomic H and He collisions effect, calculating low lying states interatomic potentials 15 p2317 A72-32772
- Spectral line width measurement accuracy based on digital autocorrelation of photon counting fluctuations, noting light field and photoelectric process limiting effects 16 p2357 A72-32949
- High gain laser amplifier spectral linewidth dependence on external signal or spontaneous emission source, noting saturation role and relevance to interstellar medium radiation 16 p2453 A72-33166
- Two axial modes competition in He-Ne laser with uniform line broadening, noting application for high stability frequency standards 16 p2402 A72-33702
- Populations modulation and spatial harmonics influence on gas and solid state laser radiation characteristics, discussing uniform and nonuniform line broadening 16 p2402 A72-33706
- Hydrogen line broadening in plasma theory with limitations of Stark component intensity distribution by quasi-static and impact approximations 17 p2588 A72-34657
- Papers on kinetic equations covering axiomatics, quantum and relativistics, plasma kinetic theory role in spectral line width, etc 17 p2590 A72-35151
- A first order analysis of variations of the limb darkening and the shapes for solar Fraunhofer lines. 17 p2616 A72-35694
- Space and time variations of the solar Na D line profiles. 17 p2616 A72-35697
- Improved Stark-profile calculations for the He II lines at 256, 304, 1085, 1216, 1640, 3203, and 4686 Å. 17 p2585 A72-35768
- Forbidden line intensities in cesium plasmas. 19 p2840 A72-37776
- Tabulation of physical conditions in proton and non-proton solar flares from observations and H alpha line width measurements 19 p2851 A72-37815
- Spectral line contours in the solar chromosphere, hydrogen line. IV - Contours in the chromosphere on the disk 19 p2859 A72-37905
- Early star absolute magnitude from equivalent H gamma and delta line widths and Balmer hydrogen series line 19 p2859 A72-37908
- Measurement of the equivalent widths of oxygen A-band absorption lines at different pressures 19 p2837 A72-37959
- Absorption line profile and equivalent line width derivation for planetary atmosphere with low and high optical thicknesses, assuming arbitrary scattering coefficients 19 p2863 A72-38071
- Measurements of the laser linewidth due to quantum phase and quantum amplitude noise above and below threshold. I. 19 p2811 A72-38084
- H and K emission intensity and line width dependence on stars age and luminosity, discussing dwarf stars and giants 19 p2866 A72-38503
- Investigation of the 0.63-micron line shift in an He-Ne/20/ laser with an absorbing cell 19 p2814 A72-38787
- Balloon-borne UV spectrophotometer observation of Mg II resonance doublet at 2795 and 2802 Å in stellar spectra, comparing to Ca II line widths 20 p2965 A72-38907
- Hot star with broad H lines with weak variable central emission, noting Ca II and He I 20 p2966 A72-38920
- Gas laser emission fluctuations of total radiation energy, polarized field components and line widths in longitudinal magnetic field 20 p2931 A72-39377
- Observation of quantum-phase and quantum-amplitude noise for a laser below and above threshold. 20 p2934 A72-39813
- Calculation of solar CO vibration-rotation line profiles and equivalent widths. 20 p2973 A72-39889
- Anomalous line broadening in the low temperature X-ray diffraction pattern of niobium. 20 p2942 A72-39989
- A unified analysis on laser Doppler velocimeters. 21 p3061 A72-40211
- Influence of polarization of laser fields on nonlinear interference effects 21 p3062 A72-40405
- Shapes and widths of ammonia lines collision-broadened by hydrogen. 21 p3013 A72-40817
- Speed-dependent collisional width and shift parameters in spectral profiles. 21 p3088 A72-40820
- Electron impact effects on Ba I, Ba II and Sr I selected spectral line Doppler widths calculated for laser-generated plasmas for chemical release simulation 21 p3092 A72-40821
- Spectrophotometry of the Wolf-Rayet type stars HD 195765, HD 192163, and HD 192103 21 p3109 A72-41437
- Kinetic theory of the lasing bandwidth in a spectrally inhomogeneous medium 21 p3064 A72-41695
- Behavior of carbon monoxide in the upper photosphere 21 p3114 A72-41777
- The solar abundance of calcium and collision broadening of Ca I- and Ca II-Fraunhofer lines by hydrogen. 22 p3221 A72-42027
- Broadening and shift of magnesium lines by van der Waals interaction with argon atoms and by microfields. 22 p3208 A72-42388
- Lyman alpha resonance line asymmetry calculation in dense hydrogen plasma, noting disagreement between theory and experiment 22 p3212 A72-42917
- Study of the Stark effect in the resonance lines of sodium by an atomic jet method 22 p3209 A72-43048
- Investigation of several nebulae in Cassiopeia with a Fabry-Perot interferometer. 23 p3333 A72-43233
- Spectral line identification computer program determining wavelength and equivalent line width for photometric measurements 23 p3267 A72-44029
- A new method of measuring temperature, inversion ratio, and pressure-broadened linewidth in a CW molecular laser. 23 p3297 A72-44188
- Light spectral width and constant frequency shift during spontaneous diffusion in ideal gas for fixed photon wave 23 p3315 A72-44479
- Laser-source spectroscopy. II - Experimental study of line broadening for the 00 1-1/10 0, 02 0/ transition of CO2 disturbed by N2: Application of the theory of Anderson, Tsao, and Curnutte to the calculation of pure and N2-disturbed CO2 linewidths 23 p3298 A72-44535
- A study of cold-worked titanium-aluminum alloys by X-ray diffraction. 24 p3413 A72-44720
- Rhodamine laser emission spectral band control by plane parallel plates and polarizing prisms, noting band widening by resonator loss modulation with Fabry-Perot interferometer 24 p3410 A72-45418
- Gain and line width in stimulated Brillouin scattering in gases. 24 p3412 A72-45616
- Critical-point anomalies in the electron-paramagnetic-resonance linewidth and in the zero-field relaxation time of antiferromagnets. 24 p3432 A72-45674
- Stellar spectra analysis from measured truncated equivalent spectral line widths, calculating curves of growth for given truncations, source functions and absorption coefficients 24 p3447 A72-45680
- SPECTRAL LINES**
U LINE SPECTRA
- SPECTRAL NOISE**
U WHITE NOISE
- SPECTRAL RECONNAISSANCE**
IR detector specifications, construction and applications to industry science and military 23 p3291 A72-44393
- Earth resources technology satellites /ERTS/ program requirements, considering coverage, spectral characteristics, system performance, photographic interpretation and information extraction 24 p3398 A72-45115
- SPECTRAL REFLECTANCE**
Grasslands mapping for ecosystem analysis, determining spectroradiance/reflectance characteristics by aerial and satellite-borne multispectral scanner imagery, aerial and ground photography and spectrometry 02 p0208 A72-11783
- Visible and near IR reflectance spectra of soil mineralized trees, using multispectral photographic filters 02 p0209 A72-11789
- Ponderosa pine foliage visible and near IR spectra, investigating soil copper contents effect on foliage spectral reflectance 02 p0209 A72-11790
- Natural formations optical spectral reflectance optimal coding with speedy digital computer processing advantage for remote sensing of earth surface 02 p0187 A72-11811
- Spectral texture effects on remotely sensed high altitude automatic IR image interpretation, using Bayesian probability techniques 02 p0228 A72-11873
- Bidirectional reflectance at several wavelengths from moonlit earth observations by airglow photometer on OGO-4 satellite 03 p0433 A72-13428
- Vacuum deposited films on CsI, AgCl, TiBr and TiCl for IR antireflection coatings on silicon [AD-734261] 03 p0380 A72-13431
- Spectral reflectance of various soils and vegetation, measuring solar energy reflection as function of sun elevation in UV, visible and near IR regions 06 p0810 A72-18446
- Spectral reflectance properties of lunar surface areas, discussing materials identification and maria depth determination 09 p1393 A72-23664
- Blackness degree calculation for semitransparent film on nontransparent substrate with layer temperature gradients, allowing for polarization emission and multiple reflections 14 p2130 A72-30296
- Vacuum UV reflectance dependence of Re and W vapor-deposited films on substrate temperature during deposition, film thickness and aging in air 15 p2274 A72-31377
- Multispectral angular reflectivity effect on optimum filter combinations for spaceborne multiband photography sensing mission in visible and near IR regions 16 p2395 A72-34104
- Spectral reflectance and emittance of Apollo 11 and 12 lunar material. 20 p2970 A72-39609
- Temperature effects on water refractive index from normal incidence IR spectral reflectance measurements 21 p3012 A72-40150
- SPECTRAL RESOLUTION**
Pohlman cell for ultrasonic hologram production, describing construction, resolution and real time reconstruction 02 p0225 A72-11751
- Far UV astronomical studies with moderate spectral and spatial resolution instruments, discussing Lyman alpha line background 03 p0417 A72-13049

High spectral resolution UV space astronomy spectrographs with echelle gratings

03 p0354 A72-13052

High spectral resolution balloon-borne spectrograph for near UV solar Mg II resonance lines

03 p0354 A72-13053

Kitt Peak 40 channel magnetograph using fiber optic probe for spectral and spatial resolution in weak photospheric field detection

03 p0356 A72-13282

Astronomical spectroscopy using ultravioletable resolution single Fabry-Perot interferometer in tandem with echelle Hilger monochromator

12 p1811 A72-27942

Spectral transmittance enhancement in Fabry-Perot narrow band light filter by wavelength shifted dielectric mirror technique

15 p2233 A72-31414

Computerized analysis of overlapping Raman and IR spectral lines, describing routine for resolving complex spectrum into component lines via operator intervention

16 p2366 A72-33027

IR heterodyne radiometer SNR and spectral resolution, noting application to solar physics and air pollution detection

17 p2555 A72-35196

Evaluation of the possibilities of IR diffraction spectrometers

19 p2801 A72-37965

High resolution Michelson interferometer for spectral investigations of lasers.

21 p3062 A72-40610

Fast Fourier transform algorithm for astronomical line spectra resolution enhancement, estimating central line intensity, line width parameter and line shape

24 p3438 A72-44841

SPECTRAL SIGNATURES

Crop classification by airborne multispectral observations, suggesting sample regions selection method for spectral signatures identification based on statistical similarities

11 p1628 A72-26985

Remote sensing system for oil pollution spectral signature properties, analyzing UV, IR, visible light, radar and microwave data

15 p2242 A72-32624

Gases and vapors spectral signatures application in correlation spectroscopy and interferometry for aerospace monitoring of earth resources and pollution

16 p2393 A72-33630

SPECTRAL THEORY

Spectral theory of Taylor vortices. I - Structure of unstable modes.

19 p2788 A72-38550

SPECTROGRAMS

Classification-dispersion spectrograms of early decline of Nova Serpentis 1970, discussing diffuse enhanced absorption system behavior

07 p1071 A72-19338

Zeeman patterns and energy level Lande g factors from spectrograms of As ion electrodeless discharge tubes in presence of 24,025 G magnetic field

07 p0987 A72-19832

Soyuz 9 spectrophotometry of earth surface features, comparing manned spacecraft-obtained and conventional spectrograms

14 p2100 A72-30464

Alpha Lyra and beta Cen spectrograms by Orion observatory onboard Salyut space station, noting veiled and overexposed photographic films

15 p2316 A72-32742

Photographic characteristics of high resolution film for Orion spaceborne astronomical observational spectrograms, discussing aerospace environment effect on sensitivity and physicochemical properties

15 p2243 A72-32745

Temporal properties of Ca II K line profile in solar disk nonmagnetic regions, noting time sequences of spectrograms and spectroheliograms

15 p2317 A72-32773

Characteristics of the Ca II K-line profiles in the quiet sun.

21 p3108 A72-41280

SPECTROGRAPHS

U SPECTROMETERS

SPECTROHELIOGRAPHS

Spacecraft-borne UV spectroheliograph with spherical mirror, considering moving part weight reduction

03 p0355 A72-13057

High resolution magnetographic and spectrographic observations of plage fields and photospheric effects in weakly active regions

03 p0429 A72-13308

Solar magnetic field measurement with 10,830 Å He I line photoelectric spectroheliograms, observing filamentary fine structure in active regions

03 p0429 A72-13310

Solar spectra photographic recording technique, using spectra-spectroheliography method with data reduction

03 p0429 A72-13313

Spectroheliogram movies of magnetic, velocity and intensity field in solar atmosphere, showing time resolution of line spectra

03 p0429 A72-13314

Zeeman spectroheliograms of photospheric magnetic fields in Ca I 6102.7 Å line

03 p0430 A72-13317

OSO-G satellite spectroheliograms of chromospheric, transition zone and coronal lines, indicating magnetic field spread with height

03 p0432 A72-13351

Intercomos 4 solar radiation equipment, including Lyman, optical and X ray photometers, spectroheliographs, polarimeters and optical orientation system

07 p0986 A72-19643

Extreme UV solar images televised in flight with rocket-borne SEC vidicon system, noting pictures reconstruction enhancement

12 p1810 A72-27930

OSO-6 Mg X spectroheliogram data for corona electron density map construction during 7 March 1970 solar eclipse period

13 p2031 A72-29529

Slit spectrogram and direct photograph observation of inner corona fine structure during 7 March 1970 solar eclipse, describing line and continuum intensities

13 p2042 A72-29533

Aerobee rocket far UV flash spectrum observations of chromosphere and corona during 7 March 1970 solar eclipse

13 p2042 A72-29539

Mg filterheliogram comparison with Ca spectroheliogram, noting correlation coefficient between location and intensity of bright features on sun

13 p2045 A72-29708

Comparative spectroheliograms of He 10830 Å and H alpha lines in chromosphere

13 p2047 A72-29733

Spectroheliograph study of fine structure of Evershed effect, determining radial velocity in penumbra along dark filaments and interfilamentary space

13 p2047 A72-29739

Solar transition zone and corona EUV lines formation heights measurement from OSO-4 spectroheliograms

13 p2050 A72-29939

Coronal condensation X ray sources from heliograms, discussing relation to active region evolution

14 p2146 A72-30204

Cycle 20 solar flare and sunspot distribution along heliographic longitude, using isoline analysis method

14 p2152 A72-30482

Solar instruments and methods for photosphere magnetic field measurement, noting spectroheliographic mapping in violet spectral region

15 p2306 A72-31647

Temporal properties of Ca II K line profile in solar disk nonmagnetic regions, noting time sequences of spectrograms and spectroheliograms

15 p2317 A72-32773

Microwave spectrograph with broadband superheterodyne total-power radiometer for time-shared recording solar burst dynamic spectra

17 p2552 A72-34191

On the dependence of the linear velocity of solar rotation on latitude and optical depth.

17 p2607 A72-35076

A compact grating spectroheliograph for the MgII resonance lines.

17 p2554 A72-35079

EUV observations of solar quiet region with OSO 6 spectroheliometer, noting chromospheric network structure

17 p2616 A72-35703

A new project of 8-cm radioheliograph.

18 p2691 A72-36434

Initial phase in the development of activity centers in the photosphere

19 p2860 A72-37951

Solar magnetic fields derived from hydrogen alpha filtergrams.

20 p2969 A72-39338

Multiple-frequency operation of the Culgoora radioheliograph.

21 p3053 A72-40397

He-D3 spectroheliogram absorption features correlation with magnetic field regions and H alpha structures

21 p3108 A72-41279

Characteristics of the Ca II K-line profiles in the quiet sun.

21 p3108 A72-41280

Measurement of the electron temperature of small 3-cm radio bursts /Research note/.

21 p3100 A72-41291

Coronal condensation X ray sources from heliograms, discussing relation to active region evolution

23 p3328 A72-43234

Apollo 12 liquid oxygen cloud spectrum observations, describing spectrograph with off axis zone plate for transmission grating and sieve plate collimator

01 p0071 A72-11172

Microwave spectrometer remote sensing of atmospheric temperature and water vapor, discussing cloud, topography and sea state effects and multiple regression statistical method

02 p0228 A72-11859

Stilbene scintillator detector for gamma ray spectrometry in energy range 0.5-5 MeV, separating gamma rays from neutrons by pulse shape discrimination technique

03 p0408 A72-13031

X ray astronomy techniques survey, covering image forming telescopes, detectors, nondispersive spectrometers and polarimeters

03 p0353 A72-13037

Bragg crystal spectrometer for Sco X-1 spectrum scanning, using Aerobee 170 rocket

[AD-736552] 03 p0353 A72-13039

Pressure scanning Fabry-Perot magnetometer using KDP crystal and Glan-Thompson prism with echelle interferometer spectrograph for polarized Zeeman components

03 p0356 A72-13283

Jones matrix representation of optical instruments applied to Fourier interferometers /spectrometers and spectropolarimeters/

03 p0358 A72-13434

Doubly multiplexing dispersive spectrometer, noting high SNR and Littrow mode operation

03 p0359 A72-13446

Apparatus for emission spectroscopic studies on high density molecular jets excited by slow electron bombardment

03 p0392 A72-14054

Aberration correction in collimator of Schmidt spectrograph camera by changing surface geometry and grating positioning

03 p0362 A72-14358

Airborne gamma ray spectrometer investigation circle, considering altitude, air density, source density and gamma ray attenuation coefficient effects

04 p0520 A72-14564

Fluorescence polarization and intensities of nitric oxide vibrational bands from Cd line and continuum excitation for spectrometer calibration

04 p0552 A72-14891

Autocorrelation signal detection method application to spectrometry by modulation amplitude, investigating SNR

04 p0521 A72-14972

Apollo 14 charged particle lunar environment experiment, describing ALSEP particle spectrometer

04 p0508 A72-15097

Ion transit time in ion cyclotron resonance spectrometer, using combination of pulsed ion formation and time dependent trapping conditions

04 p0523 A72-15484

High resolution electrons image intensifier for particle spectrographs, using channel plate, scintillator and fiber optics

04 p0524 A72-15536

Microwave spectrometer crystal current leveler for broadband video detector and rotary wave attenuator control

04 p0524 A72-15541

Fiber optics system for H beta line shape measurement in transient high temperature plasma, using narrow slits at spectrograph exit plane

[AIAA PAPER 72-106] 05 p0663 A72-16816

Spectrometers for phase audible frequencies, discussing linearization theory and application to spectrum analyzer calculation

07 p0983 A72-19186

Sound velocity and attenuation variations with magnetic field from ultrasonic continuous wave spectrometry

07 p0984 A72-19321

Multichannel modular spectrometer with electrostatic analyzers for low energy electron and proton flux measurement

07 p0988 A72-19954

Spectrometers with electrostatic analyzers alternating with shielding and suppressing gratings for low energy electron flux measurement

07 p0988 A72-19955

High resolution multiple particle spectrometer for measuring energetic protons, electrons and alpha particles during solar particle events

08 p1167 A72-21509

Gamma ray spectrometer with antiCompton shield for OSO-7 spacecraft

08 p1167 A72-21515

Optimal pulse height analyzer with quadratic transfer function for gamma ray spectrometer on OSO-H

08 p1167 A72-21516

- IR spectral emittance measurement with airborne spectrometer for geological mapping over Pisgah Crater /California/ 08 p1162 A72-22017
- Spectroscope model design using ruby laser highly monochromatic light pulses, electro-optical scanning and high speed photography to study atmospheric gases absorption spectra 09 p1322 A72-22205
- Cumulus cloud microstructure measurement by single particle optical spectrometer, inferring transition from water to ice phase regions from droplet size and number distributions 09 p1307 A72-22444
- High energy cosmic ray hadrons energy measurement using glass scintillator ionization spectrometer 09 p1309 A72-22523
- Spectrometric oil analysis program /SOAP/ method for turbid and helicopter transmissions damage monitoring and flight safety 09 p1319 A72-22933
- Field compensated Michelson spectrometer systems, discussing tolerances, usefulness, resolution luminosity products, stigmatism and astigmatism 09 p1313 A72-23328
- Double beam single detector wavelength modulation spectrometer for background elimination from observed spectra, noting application to semiconductors band structure determination 09 p1315 A72-23402
- High resolution NMR spectrometer conversion from continuous wave to Fourier transform operation, permitting computer systems and pulse amplifiers use 09 p1316 A72-23408
- Continuous scan diffraction spectrometer for thermal sounding experiment on Meteor satellite, presenting vertical temperature and humidity profiles 09 p1347 A72-23588
- Optical properties of nuclei of normal, Seyfert and N-type galaxies and quasars from spectrographic and photometric observations 10 p1534 A72-23902
- Martian atmosphere water vapor detection and mapping during Viking missions, discussing experimental approach and spectrometer choice 10 p1539 A72-24378
- Interferometric photoelectric scans of interstellar Ca K lines in stellar spectra, noting interstellar Na lines presence 10 p1544 A72-24663
- Image intensifier tube scanner replacement of slit and multiplier tube of spectrograph, discussing application to rockets 11 p1631 A72-25689
- Automated echelle spectrograph data handling using computer control 11 p1716 A72-25693
- Penetrating particles effect on low energy scintillation spectrometers sensitivity in various regions of magnetosphere 11 p1632 A72-25934
- He-like lines in solar X-ray spectrum observed by Bragg crystal spectrometer, noting absolute wavelengths determination with shaft encoder for angle readout 11 p1714 A72-26572
- Antimatter search in primary cosmic rays by balloon-borne superconducting magnetic spectrometer capable of direct matter-antimatter separation 12 p1863 A72-27296
- Satellite-borne low energy electron and proton spectrometer for measuring auroral electron and proton spectra 13 p1960 A72-29841
- Low energy particles spectrometer channels calibration for satellite auroral observation, discussing photomultiplier detector properties 13 p1960 A72-29843
- Relative cross sections for gas phase photodetachment of electrons from amide and arsenide ions using ion cyclotron resonance spectrometer 13 p1914 A72-30064
- Photon correlation spectrometer for laboratory wind tunnel measurement of laser Doppler signals backscattered from dust particles 14 p2111 A72-30854
- Spectrometer entrance slit diffraction effects on observed fast beam spectral line width 15 p2280 A72-31383
- Soft X ray appearance potential spectrometer construction and operation for metal film diffusion detection in microcircuit technology 15 p2241 A72-32442
- Construction and optical equipment of astrophysical observatory Orion onboard Salyut space station, discussing mirror telescope, spectrograph and star tracker 15 p2242 A72-32741
- Spectrograph for Orion spaceborne astronomical observatory on Salyut space station calibrated with synchrotron radiation from particle accelerator 15 p2242 A72-32744
- Construction, tuning and characteristics of high resolution spectrometers with scanning interferometers for He-Ne laser radiation analysis 16 p2400 A72-33080
- Comet Tago-Sato-Kosaka /1969g/ L alpha emission image recorded by f/2 objective-grating spectrograph aboard Aerobee rocket, discussing ice sublimation in nucleus 16 p2455 A72-33466
- Computer simulation of airborne gamma ray spectrometer with prescribed photopeak windows from flight over surfaces with arbitrary-dimension radiation sources 16 p2392 A72-33617
- Spectral measurements of atomic level populations in a plasma 17 p2591 A72-35307
- Photon count circuit conjugation with photomultiplier for spectrometric measurement of lines emitted by atomic barium jet excited by slow electron beam 19 p2799 A72-37671
- Low-temperature part of a spectrometer for gigahertz-ultrasonics and ultrasonic paramagnetic resonance. 21 p3051 A72-40215
- Investigation of the structural content and the determination of the optimal image of focus series in light and electron microscopy with the aid of Fraunhofer diffraction /structure spectroscopy/ 21 p3055 A72-40747
- A simple, low power, multiple pulse NMR spectrometer. 21 p3056 A72-41005
- Astrospectrography with a mirror telescope. II - One-prism spectrograph with 60 deg flint prism 22 p3178 A72-42545
- Spectrometer for absolute stellar spectroscopy 23 p3290 A72-44039
- SPECTROMETRY**
U SPECTROMETERS
SPECTROPHOTOGRAPHY
Spectrophotographic recording of UV auroral emissions during rocket probe flight, noting excitation by electron impact on molecular nitrogen 08 p1159 A72-21225
- K-2 astrophysical rocket observatory for far UV and X ray solar radiation recording, discussing trajectory, orientation and stabilization, electric and spectrographic instrumentation 14 p2163 A72-30970
- Apollo 16 far-ultraviolet camera/spectrograph - Earth observations. 21 p3105 A72-40600
- Spectrographic, photometric and chemical identification of Giacobinid /Draconid/ meteoroids, noting compositional similarity to carbonaceous and olivine-bronzite chondrites 23 p3336 A72-43600
- SPECTROPHOTOMETERS**
NT INFRARED SPECTROPHOTOMETERS
NT ULTRAVIOLET SPECTROPHOTOMETERS
Spectrophotometer and tristimulus mask calorimeter using double grating mirror dispersion system 03 p0358 A72-13427
- Laboratory spectrophotometer calibration for specular light over 0.5-2.5 micron range by means of stacked glass plates, noting accuracy 04 p0524 A72-15535
- Solar Fraunhofer line profiles determination by digital data recording double-pass spectrophotometer, presenting observed atomic Ni and Fe lines intensity distributions 06 p0884 A72-18028
- Time range extension methods for rapid readout dual wavelength spectrophotometers 07 p0983 A72-19319
- Optical bidirectional modulator for two beam spectrophotometer, using tuning fork as oscillatory system 07 p0988 A72-19962
- Double beam spectrophotometer with automatic gain controlled preamplifier to achieve insensitivity to signal strength change in noise at low cost 07 p0992 A72-20579
- Total ozone measurements by selective transmission filter ozonometer comparable to Dobson spectrophotometer 09 p1307 A72-22453
- Solar Fraunhofer line profiles determination by digital data recording double-pass spectrophotometer, presenting observed atomic Ni and Fe lines intensity distributions 11 p1719 A72-25964
- Spherical mirror camera for southern galaxy planar photometry, discussing photographic calibration methods 15 p2306 A72-31597
- Balloon-nacelle for small scale photography and multispectral photometric ground measurements, describing automatic adjustment device for photographic lens diaphragm 16 p2349 A72-33633
- Spectrophotometers and photometers calibration and standardization, emphasizing necessity for periodic control of instrument parameters 16 p2394 A72-33872
- Modified Dobson ozone spectrophotometer with revised electronic design circuitry, considering high voltage power supply, photomultiplier tube circuit, amplifier and electromechanical phase sensitive rectifier 20 p2921 A72-38968
- A multislot shadow sensor of direction to a luminous object 21 p3052 A72-40308
- Pulsed photoexcitation /flash photolysis/ spectrophotometers in terms of light sources, recording sensitivity enhancement, data processing, laser use and performance requirements 21 p3058 A72-41726
- Spectrophotometer linearity testing using the double-aperture method. 23 p3289 A72-43894
- SPECTROPHOTOMETRY**

SPECTROSCOPES

U SPECTROMETERS

SPECTROSCOPIC ANALYSIS

Hydrogen iodide flash photolysis in presence of nitrous oxide, carbon dioxide and water investigated by kinetic spectroscopy, observing imidogen as intermediate reaction product

01 p0023 A72-11114

Far IR Fourier spectrometer with built-in real time digital computer for routine physical and chemical spectroscopy

04 p0520 A72-14523

Self absorption and temperature gradient effects on fluorine-hydrogen flame spectroscopic temperature determination, comparing calculated and theoretical Lorentz intensity profile

04 p0596 A72-14890

German monograph on spectroscopic investigation of Cs plasma electron density and temperature and excited atom density in various operational states of thermionic converter

04 p0560 A72-15699

Spectrographic measurement of electron temperature and ion density profiles in cesium plasma thermionic converter

06 p0862 A72-18309

Artificial intelligence applications for chemical inference, discussing modified heuristic DENDRAL computer program for cyclic structure and linear molecule identification

07 p0936 A72-19498

Two channel high resolution spectrometric measurements of plasma velocity from intrinsic radiation in optical range by Doppler effect

07 p1044 A72-19885

Shock tube spectroscopy role in laboratory astrophysics, stressing hook method effectiveness for quantitative analysis of shock heated gases in solar abundances determination

08 p1146 A72-21017

X ray emission spectroscopy of electronic structure of transition metals and alloys, obtaining electron energy spectrum

09 p1370 A72-22841

Electron spectroscopy for chemical analysis /ESCA/ application to band structure measurements in transition metals, discussing photoexcitation, energy loss and escape depth

09 p1371 A72-22843

Standard deviation in ghost lines size due to random sampling position errors of monochromatic spectral line in Fourier transform spectroscopy

09 p1314 A72-23344

Spectroscopic techniques for high temperature materials research program, studying light emission from plasmas generated by intense electron beam

10 p1518 A72-23937

Turbojet engine oil circuit contamination rate determination by spectrometric analysis, obtaining mathematical theory for data interpretation

[SAE PAPER 720303]

11 p1703 A72-25567

Spectral analysis for Cu, Cl, Br and I impurity distribution in doped bismuth telluride crystals prepared by Bridgman method

13 p2023 A72-29979

Atomic spectroscopy role in modern physics, discussing 1913 genesis, golden age in 1930s and revival in 1960s

14 p2133 A72-30577

Spectroscopic binary orbital elements calculated by FORTRAN IV computer programs, considering period, radial velocity Fourier coefficients and element improvement by least squares method

14 p2159 A72-30736

Pulsed Ar plasma temperature and charged particle concentration obtained as functions of elapsed discharge time by spectroscopic observation

14 p2139 A72-30780

Pavel stony meteorite microspectral analysis to obtain metallic elements weight percentages in chondrules, matrix and core, using laser source for local vaporization and excitation

14 p2159 A72-30785

Hemoglobin determination in whole blood with Specol-Zeiss spectrophotometry, comparing accuracy to cyanmethemoglobin measurements

14 p2080 A72-30787

Atmospheric air pollution study by space techniques via thermal radiation spectral measurements and laser sounding, considering spaceborne photography

15 p2220 A72-31237

Low energy electron spectroscopy measurement of thin oxide layer growth on Al surface, noting oxidation uniformity dependence on residual gas water content

15 p2276 A72-31859

Chondrite Pavel microspectral analysis with laser beam vaporization of sample from microzone

16 p2450 A72-32850

Spectroscopic sounding of clouds and snow and ice covers from below /earth surface/ and above /space or planet/

16 p2417 A72-33288

Electron spectroscopy for chemical analysis /ESCA/ technique for nondestructive elemental analysis of lunar and terrestrial minerals

16 p2454 A72-33447

Two channel high resolution spectrometric measurements of plasma velocity from intrinsic radiation in optical range by Doppler effect

17 p2590 A72-35133

Solid surface geometry, atomic composition and electronic structure observations, discussing Auger spectroscopy, field ion microscopy and electron diffraction and scattering techniques

19 p2803 A72-38389

Heat-pipe plasma oven for microwave and spectroscopic measurements.

20 p2912 A72-39433

Electron spectroscopic investigation of solid surfaces chemical composition and atomic binding states and structure, discussing methods of inducing electron emission

20 p2927 A72-39695

Comparative studies of various spectral lamp designs for atom-absorption analyses and use of double-discharge multielement lamps to account for non-selective interference

22 p3176 A72-42170

Sensitivity enhancement of atom absorption measurements by the method of pulse vaporization from the microprobe into the flame

22 p3176 A72-42174

Usability of a graphite dish for atom absorption analyses of laser collected samples

22 p3176 A72-42175

Spectroscopic study of the parameters of a turbulent plasma

22 p3213 A72-43107

Standard Ti bars samples for spectral determination of H concentration and distribution in Ti alloys, using mathematical statistical method

23 p3287 A72-43676

The presence of P700 in chloroplast fragments prepared by short time incubation with Triton X-100.

23 p3258 A72-44325

SPECTROSCOPIC TELESCOPES

NT STRATOSCOPE TELESCOPES

Red interference filter design for high performance prominence telescope for H alpha line observation

01 p0064 A72-10203

Telescopic phase retardation effect on Zeeman triplet Fe of polar sunspot umbrae in Stokes parameter measurements

03 p0357 A72-13288

Computer controlled coude and Cassegrain scanner telescope spectrometers at McDonald Observatory, discussing design, instrument performance and computer program

11 p1632 A72-25698

Orbiting telescopes improved angular resolution and access to UV spectra as advantages in determining stellar composition, mass, luminosity and distance

24 p3446 A72-45531

Electron scattering off atoms, diatomic and polyatomic molecules in impact spectroscopy, applying simple group theory

02 p0262 A72-11913

Miniature vacuum furnace for Mossbauer spectroscopic samples heating to 1000 C, discussing temperature control, use of inert atmospheres, etc

04 p0523 A72-15481

Statistical analysis of spectrographic plasma temperature measurements, obtaining numerical solution to Abel integral equation

12 p1852 A72-27685

Spectroscopy by synthesis of two or more fixed or moving diffraction gratings, obtaining transfer functions for total information increase

12 p1811 A72-27943

High speed frame photography application in spectroscopic studies of plasma jet in cylindrical pulsed accelerator with dielectric

15 p2283 A72-31418

Electron transmission spectroscopy - Core-excited resonances in diatomic molecules.

17 p2586 A72-35771

SPECTRUM ANALYSIS

Radiation spectral properties in mode locking region of He-Ne 20 laser at 0.63 microns, generating three axial modes

01 p0078 A72-10154

Electrostatic potential fluctuations spectrum in turbulent hot ion plasma confined between magnetic mirrors, investigating mode coupling, energy cascading and electron concentration

01 p0108 A72-10242

Multichannel hf spectrograph for decimeter wave solar burst spectrum fine structure analysis, noting operation at any desired frequency and channel separation

01 p0065 A72-10416

Error fluctuation component spectral density determination in closed automatic nonlinear system for controlling random vibration spectrum

01 p0045 A72-10505

Gas filter correlation spectral analysis technique for measuring pollutant concentrations in presence of interfering gases, describing application to hydrochloric and hydrofluoric acids monitoring

[AIAA PAPER 71-1049]

01 p0066 A72-10525

Magnetic field effects on ruby laser radiation kinetics and spectral composition, studying crystal heating and light emission

01 p0080 A72-10577

Spectral analyses of Mira-type variable stars near light maximum, discussing empirical curve of growth, Doppler velocity, damping constant and electron pressures

01 p0129 A72-10792

Flare region curved absorption lines interpreted as photospheric and chromospheric mass motions

01 p0129 A72-10800

Cygnus X-6 soft X ray source location, presenting polycarbonate pulse-height spectrum and counter response to different model source energy spectra

01 p0121 A72-11096

Apollo 12 liquid oxygen cloud spectrum observations, describing spectrograph with off axis zone plate for transmission grating and sieve plate collimator

01 p0071 A72-11172

Statistical long term speech spectrum analysis and perceptual evaluation, using digital bandpass filter technique

02 p0171 A72-11660

Compact extragalactic radio source spectrum analysis, discussing successive uncorrelated outburst models

02 p0277 A72-11774

Sedimentary rocks remote multispectral analysis by aerial data covering UV to microwave spectral regions

02 p0209 A72-11783

Spectrum analysis of synchronous recordings of Pi irregular pulsations and auroral brightness at Sogra fo ionospheric electric fields

02 p0216 A72-11924

Spectral characteristics of ionospheric signal wave phase lags introduced in multichannel field recorder

02 p0172 A72-11926

Mountaintop high resolution spectral observations of diffuse isotropic submillimeter atmospheric and sky emission

02 p0274 A72-12194

Grating spectra of Jupiter North Equatorial Belt, noting absorption feature at 4.73 microns

02 p0280 A72-12200

Noisy radar signal processing by spectral analysis method

02 p0177 A72-12222

Ionospheric small scale electron density irregularity structure from power spectral analysis of radio source scintillation observations

03 p0345 A72-12985

Celestial gamma rays arrival direction and energy spectra measurement and spectrum analysis using ESO satellite COS-B data

03 p0408 A72-13029

High energy solar and celestial X ray experiment with OSO 5, measuring spectrum as function of time intensity and spatial distribution

03 p0353 A72-13044

Scanning Fabry-Perot interferometer for He-Ne laser spectral composition, discussing transmission coefficient, resolution, resonator dissipative losses, active medium saturation and light field spatial nonuniformity

03 p0356 A72-13190

Magellanic Clouds supergiant stars intrinsic colors: observing in five spectral bands to separate from Galactic foreground stars

03 p0425 A72-13260

Sunspot magnetic field evolution in time and space from four-camera spectral scanning method, obtaining magnetic flux and radial velocity field

03 p0428 A72-13301

Spectroscopic characteristics of continuous wave neutral argon laser using helium and chlorine wave power enhancement

03 p0367 A72-13432

- Mean value, repetition and discontinuity errors of spectral transposition method involving memory storage and compressed signal processing
03 p0338 A72-13892
- Photopic spectral curves of relative luminous efficiency for congenital deficiencies of color vision, using optical bench, interference filters and Bachstein flicker photometer
03 p0316 A72-13935

- Radio meteor observations of upper atmosphere long period wind variations, determining oscillation spectra peaks by harmonic analysis
08 p1161 A72-21537
- Spectrum shape of Doppler radar return from two dimensional random rough surface model using helmholtz integral approach and Kirchhoff approximation
09 p1277 A72-22314
- Al alloys solid binary solution soft X ray emission spectra interpretation by rigid band and virtual bound state models
09 p1371 A72-22847
- Gravitational radiation spectrum and energy computation from point test particle falling radially into Schwarzschild black hole
09 p1393 A72-23646
- Spectral reflectance properties of lunar surface areas, discussing materials identification and maria depth determination
09 p1393 A72-23664
- Methane absorption line profile, intensity and width studied with magnetically tuned He-Ne laser
10 p1490 A72-24041
- Spectral position of spontaneous self regulatory systems, comparing to classical wave spectra
10 p1511 A72-24221
- Spectrographic analysis of K-type supergiant epsilon Pegasi for effective temperature, surface gravity and heavy and light element abundances
10 p1543 A72-24621
- Data window for digital spectrum estimation of random data by fast Fourier transform techniques, noting bandwidth increase by various data smoothing sequences
10 p1439 A72-24804
- Stellar spectra differential analysis from solar curve of growth for Fe I with revised gf-scale, noting van der Waals broadening and microturbulence
10 p1547 A72-24868
- Spectral measurements of temperature in low temperature plasma, describing line reversal method
10 p1485 A72-25110
- Spectral density of frequency deviation process for performance predictions from oscillator testing and frequency noise calibration, discussing sample averages convergence to statistical values
11 p1593 A72-25892
- Electromagnetic interference measurement by wide dispersion type spectrum analyzer electronically tuned over octave frequency range [SAE AIR 1255]
11 p1632 A72-26027
- Auroral spectrum analysis in 1200-4000 A band, obtaining photon emission rates
11 p1624 A72-26402
- Cometary spectra analysis, noting resonance fluorescence mechanism of emissions
11 p1722 A72-26433
- Holographic method of correlation and spectral analysis of radio signals applied to stable oscillator, randomly inhomogeneous media fields and stereophonic transmission measurements
11 p1636 A72-26726
- Magnetic field gradient in sunspot umbrae from magnetically split line profiles
12 p1867 A72-27206
- Russian book on spectral, spatial and time characteristics of lasers covering luminescence and resonator theories, electromagnetic field structure and radiation dispersion
12 p1820 A72-27500
- Distant thunderstorm center location with VLF atmospherics, determining delay time difference of Fourier spectrum groups of 6 and 8 kHz
12 p1841 A72-27793
- Automated scanning spectroradiometer for color vision test stimuli and luminescence measurements, applying computer analysis of spectral data
12 p1811 A72-27944
- X ray and Mossbauer spectral analyses of thermomagnetically treated nickel ferrite samples containing Co, investigating ordering mechanism
13 p2020 A72-28490
- X ray spectral analysis of Ti-Mo system alloys, investigating K and L lines and electronic structure
13 p1972 A72-28491
- Spectrum analysis of PCM/AM-FM and PCM/FM-FM telemetry signals, using approximation technique to Fourier transform time signal to frequency domain
13 p1919 A72-29025
- Real time interferential spectrum analysis of deterministic signals in form of partially summed Fourier series
13 p1919 A72-29041
- Dispersion method for real time spectral analysis of signals by Fourier transform for class of integrable functions with finite energy
13 p1919 A72-29042
- Quasi-one dimensional spectral analysis of input signal by delay line circulator, discussing ring frequency characteristic influence on harmonic signal buildup efficiency
13 p1930 A72-29043
- Spectrum analysis of synchronous recordings of Pi 1 irregular pulsations and auroral brightness at Sogra for ionospheric electric fields
13 p1948 A72-29235
- Spectral characteristics of ionospheric signal by phase lags introduced in multichannel field recorder
13 p1920 A72-29238
- Moving sound sources spectral analysis techniques, discussing computer controlled one-third octave band and narrowband analysis
13 p2005 A72-29566
- Solar corona intensification analysis based on ionized Fe monochromatic emission spectra, in-

investigating spectral lines behavior as function of temperature and electron density

13 p2047 A72-29736

Natural instabilities development in laminar boundary layer of incompressible flow, considering AM spectrum and abscissa-ordinate development compared to Orr-Sommerfeld equation solution

13 p1943 A72-29784

Ti, B, Zr and Be trace additions effect on Al alloy grain refining from spectrochemical analysis

13 p1913 A72-29838

Solar photospheric fluctuations, applying fast Fourier transform to power coherence and phase spectra calculations

13 p2049 A72-29928

Single pulses and random samplings signal spectrum analysis on real time scale by ultrasonic dispersion waveguide

13 p1934 A72-30018

Collisional relaxation and rotational intensity distributions in aeronomic spectra, including radiative losses effects from weak interaction model

13 p2008 A72-30057

Radio absorption spectra sounding for planetary atmospheric impurities calculating water vapor content in Venus cloud level

14 p2149 A72-30238

K beta emission spectrum of metallic Cr, discussing structural X ray analysis revealed cubic structure

14 p2116 A72-30414

Spectral changes of light reflected back from plasma during heating by mode locked Nd laser, noting equidistant lines presence

14 p2138 A72-30447

Apollo 12 lunar fines spectral and thermal radiation properties as function of bulk density, presenting emittance as function of temperature and solar reflectance

14 p2154 A72-30513

Spectral line identifications and classifications of Li like spectra of elements K through Mn in extreme UV region, detailing extrapolation procedures

14 p2133 A72-30563

Spectral line profile of optical transition spontaneous radiation during resonance with strong field on adjacent transition

14 p2110 A72-30781

Spectrochemical trace analyses in electric arc plasma, examining external magnetic field effects on spectral line intensity variation

14 p2139 A72-30784

Elliptical and barred spiral Markarian galaxies, discussing starlike and diffuse spectra dependence on morphology

15 p2304 A72-31327

Spectral brightness coefficient and photodensity measurements for remote vegetation productivity sensing in visible band

15 p2222 A72-31396

Control theory of second order linear hyperbolic partial differential equations, discussing relation to harmonic and spectral analysis

15 p2263 A72-31757

Boundary value problems for discrete spectrum of nonlinear ordinary differential operators on unbounded intervals

15 p2263 A72-31760

Jovian synchrotron emission measurements by radioheliograph at 80 MHz, passing square low detector outputs through RC integrators

15 p2307 A72-31799

Whistler mode VLF signal transmission in ground transmitter and magnetically conjugate zones, observing spectrum broadening and AM in magnetosphere

15 p2197 A72-31919

Signal with bounded spectrum, obtaining higher derivatives by reduction to stationary random process filtering problem solvable with Kolmogorov-Wiener and Kalman-Bucy techniques

15 p2207 A72-32171

Mean value, repetition and discontinuity errors of spectral-transposition method involving memory storage and compressed signal processing

15 p2212 A72-32703

Spectral index-luminosity relation for radio galaxies and quasi-stellar sources with power law spectra

15 p2315 A72-32714

Computerized analysis of overlapping Raman and IR spectral lines, describing routine for resolving complex spectrum into component lines via operator intervention

16 p2366 A72-33027

Nondestructive vibration analysis of mechanical structures, using digital computer technique for sound wave spectrum analysis

16 p2397 A72-33220

Stellar velocity dispersion in elliptical galaxy NGC 7332 from coude spectrum obtained by SEC vidicon TV camera and telescope

16 p2454 A72-33453

Planetary nebula M2-9 spectrum analysis, discussing IR excess, internal motions and Fe II emission lines

16 p2455 A72-33459

Quasars and emission line objects red shift distribution using power spectrum analysis method

16 p2457 A72-33625

Gaussian electromagnetic radiation beam propagation in turbulent medium, calculating broadening dependence on outer scale by modified Karman spectrum characterization

17 p2580 A72-34291

Study by Mossbauer spectrometry of the iron distribution in mineralogical fractions separated from lunar rocks brought back by Apollo 12

17 p2607 A72-34917

High speed spectrum analyzer/hissa and its application to the study of geomagnetic pulsations. I - S-type hissa.

17 p2554 A72-35061

Spectral analyses of solar photospheric fluctuations. II.

17 p2608 A72-35081

Low-energy proton observations in July and August, 1970, on the 'Molniya-1' satellite

17 p2600 A72-35208

Digital computer investigation of radio signals transmitted by Venera 7 during Venus soft landing, describing spectral analysis and telemetric data detection methods

17 p2516 A72-35273

On the temperature of the helium emission regions in the solar atmosphere.

17 p2616 A72-35699

Spectral analysis of highly inhomogeneous chromospheric flares.

17 p2617 A72-35709

Results of observation of spectra and polarization of meter solar radio emission with high time resolution - May-June, 1969.

17 p2602 A72-35714

X ray spectrum analysis of Sco X-1 type sources, showing plasma sheath with high electron temperature

17 p2617 A72-35727

Application of dispersion techniques to molecular band intensity measurements. I - Principles of 'fringe shift' and 'fringe slope' band analysis procedures.

17 p2586 A72-35832

Radio galaxies monochromatic luminosity-spectral index relationship from 3CR spectra studied at 10 MHz to 10,700 MHz

18 p2726 A72-36621

Pm existence evidence for HR 465 from analysis of Pm II spectral line data

18 p2727 A72-36738

Some aspects of cosmic ray differential spectrum measurements

18 p2722 A72-36852

Flash desorption spectrum and LEED studies of CO adsorption on W single crystal planes, measuring work function increase as function of coverage

18 p2657 A72-37040

Comparison of theoretical and experimental limits of detection in atomic absorption spectrometry using air-acetylene and nitrous oxide-acetylene flames.

19 p2762 A72-37725

Theoretical study of the Zeeman spectrum and of the magnetic resonance in the evanescent wave of Fresnel - Case of the magnetic transverse mode

19 p2834 A72-37790

Solar chromospheric flare details motion differences from spectrum analysis and H alpha line frame photography, noting radial velocities difference

19 p2851 A72-37816

Table for reduction of stellar radial velocities to the center of the sun

19 p2859 A72-37909

Solution of the problem of a fast Fourier transform in a homogeneous associative parallel processor

19 p2779 A72-37993

Study of the spectrally variable silicon Ap star 56 Ari

19 p2862 A72-38055

Galactic radio emission spectrum analysis via horn antennas with wavelength proportional apertures, calculating full beam antenna temperatures for selected radio frequencies

19 p2852 A72-38484

Spectral characteristics of surface-layer turbulence.

19 p2829 A72-38559

Geomagnetic activity index Ap variation spectral data analysis, noting correlation to sunspot number variation

19 p2793 A72-38747

Correlation analysis techniques to characterize acoustic emission pulses from Mg alloys, obtaining time varying spectra

20 p2924 A72-39281

Statistical analysis for best fit of compact X ray object spectra to black body, bremsstrahlung and power law models

20 p2969 A72-39387

Expanding ring in Galactic center from analysis of microwave spectroscopic data, measuring expansion and rotation velocities

20 p2972 A72-39860

H II region fine structure from 11 and 3.7 cm observations, deducing physical parameters from continuum

21 p3105 A72-41031

Electron paramagnetic resonance spectrum of vanadyl acetylacetonate dissolved in liquid crystal or isotropic solvent

21 p3013 A72-41177

Hydrogen sulfide detection in Galactic sources via observation of single line corresponding to rotational transition, comparing abundance to formaldehyde, CS, HCN and CO

21 p3107 A72-41271

Jupiter atmospheric C12/C13 ratio for methane from equivalent width measurements in R[2] multiplet

21 p3107 A72-41271

Application of holographic Fourier spectroscopy to the analysis of the microwave radiation spectrum

21 p3058 A72-41733

Statistical tests for spectral correlation analysis of continuum VHF radio emission fluctuations from noise storms

21 p3102 A72-41778

Airglow observations with a Hadamard photometer.

22 p3169 A72-42022

Solar photospheric fluctuations measured from time sequence of Sacramento Peak Observatory spectrograms, using power, coherence and phase spectra computed by fast Fourier transform

22 p3221 A72-42029

Type 3 solar burst distinction from auroral type high pass noise via spectrum analysis

22 p3222 A72-42043

Spectral analysis of microwave pulses by a ferrite transducer

22 p3158 A72-42119

Determination of the spectra of modulated pulse trains by the spectral function method

22 p3154 A72-42122

Electronic analyzer of structural vibration frequency characteristics and mutual spectra, considering bandpass filter and automatic frequency spectrum recorder

22 p3176 A72-42134

Determination of optical transfer functions by Fourier transformation in spatially incoherent light

22 p3205 A72-42296

Spectrophotometry 0/3 to 1.1 micron/ of visited and proposed Apollo lunar landing sites.

22 p3225 A72-42506

Observations of the airglow continuum.

22 p3174 A72-42818

Some results of an analysis of Pc4-type steady geomagnetic pulsations at a network of stations

23 p3283 A72-43371

The analysis of the small Magellanic Cloud supergiant HD 7583.

23 p3336 A72-43558

Digitally pressure-scanned Fabry-Perot interferometer for studying weak spectral lines.

23 p3289 A72-43806

Spectral line identification computer program determining wavelength and equivalent line width from photometric measurements

23 p3267 A72-44027

Spectral characteristics of the scattering field of uniformly traveling and rotating impedance cylinder

23 p3265 A72-44201

The lunar conductivity profile and the nonuniqueness of electromagnetic data inversion.

24 p3436 A72-44606

Stellar spectra analysis from measured truncated equivalent spectral line widths, calculating curves of growth for given truncations, source functions and absorption coefficients

24 p3447 A72-45688

SPECULAR REFLECTION

Aqueous solutions specular reflectance measurement, using organic dye laser spectrophotometer at 360-650 nm and reflectometer equipped spectrophotometer at 0.2-20 micron wavelengths

02 p0226 A72-11831

Laboratory spectrophotometer calibration for specular light over 0.5-2.5 micron range by means of stacked glass plates, noting accuracy

04 p0524 A72-15531

Quasi-specular and Lambert reflection of short radio waves from lunar surface dependent on central portion of near side

05 p0631 A72-17031

Thin films thickness and refraction index calculation from curves of specularly reflected X ray intensity vs grazing angle, obtaining surface roughness variance

07 p1050 A72-20403

Pseudo-hemispherical properties applied to radiative transfer in absorbing-emitting medium involving specular directional surfaces

09 p1351 A72-22674

ATS specular thermal control louver system performance in simulated solar vacuum environment as function of sun and blade angle, noting white paint effect

[AIAA PAPER 72-268]

11 p1740 A72-25202

Roughness effects on radiant heat transfer between interacting surfaces based on Beckman reflectance model
[AIAA PAPER 72-305] 11 p1742 A72-25239

Spherical specularly reflecting nonresonant cavities for use as absorption cells in far IR spectroscopy, predicting performance
11 p1629 A72-25301

Specular components of thermal reflectance as function of directional incident intensity variations
11 p1746 A72-25993

Laser induced transparent dielectrics surface fracture mechanism determination based on electron microscopic photograph analysis and disturbed specular reflection under predischARGE conditions study
11 p1648 A72-26333

Kinetic model for electromagnetic field fluctuations in bounded isotropic plasma half space with specular reflection of electrons at boundary
14 p2135 A72-30170

Kinematic intensity recovery from LEED data of specular and nonspecular beams from Ni(111) surface, noting multiple scattering interference elimination
15 p2276 A72-31855

Effect of fluidization on the polarization of reflected light from lunar dust layers.
18 p2729 A72-36987

Effect of polarization on the apparent emittance of rectangular groove cavities.
20 p2954 A72-39629

Design of a specular aspheric surface to uniformly radiate a flat surface using a nonuniform collimated radiation source.
[ASME PAPER 72-HT-J] 20 p2984 A72-39653

Methods for the quality control of the reflecting surfaces of solar energy condensers (Survey)
22 p3140 A72-43187

Formation of defects in reflecting coatings under the action of high temperatures
22 p3197 A72-43193

PEECH
NT SYLLABLES
NT WORDS (LANGUAGE)

Air flow and acoustic characteristics of speech sounds produced with turbulence noise at glottal constriction, using flow equations
[AD-744389] 01 p0101 A72-10162

Breathing control during speech, noting carbon dioxide response, hyperventilation and apnea
04 p0480 A72-15218

Right ear prevalence in hearing process determined by dichotic speech audition
04 p0476 A72-15584

Fourier, Hadamard and Karhunen-Loeve transformations for digital speech processing, comparing bit rate requirements
06 p0772 A72-17405

German book - Hearing, voice, balance /Physiology of the senses III/.
22 p3146 A72-42784

Human vocal apparatus anatomical and neural structure, considering linguistic sounds composition
22 p3147 A72-42789

Features of a speech signal during cumulative action of Coriolis accelerations
23 p3257 A72-44154

PEECH DISCRIMINATION
U SPEECH RECOGNITION
PEECH RECOGNITION

Voice quality improvement in He atmospheres by on-line segment dilation
01 p0101 A72-10158

Human touch deficiency in artificial pattern recognizers regarding handwriting, speech and pattern recognition involving nonevents
01 p0017 A72-10464

Earplugs effect on passenger speech reception and intelligibility in rotary wing aircraft, noting protection against noise annoyance, fatigue and deafening
01 p0022 A72-11294

Statistical long term speech spectrum analysis and perceptual evaluation, using digital bandpass filter technique
02 p0171 A72-11666

Correlation functions of signal and noise at output of discrete channel, determining SNR or speech intelligibility
03 p0323 A72-13891

Formant-coded voiced speech parameters smoothing and quantizing effects subjective evaluation, obtaining average quantization threshold levels
04 p0487 A72-15298

Digital speech detector with increased voice signal and reduced noise sensitivity for satellite capacity improvement
07 p0939 A72-19067

Noise rating methods for speech communication effectiveness evaluation, presenting charts and tables for intelligibility limits with various communication techniques and equipment
07 p0932 A72-20167

Design criteria for transportation system noise regulation, considering ambient noise, hearing damage, speech interference and subjective reactions
07 p0932 A72-20173

Human cortical auditory evoked response to speech and sound effects, relating EEG interhemispheric wave amplitude asymmetry to stimulus meaningfulness
08 p1115 A72-20984

Air traffic control messages syllabic and word prominence patterns, discussing impact on continuous speech recognition by machine
09 p1274 A72-23581

PCM speech transmission systems, comparing pseudorandomly dithered quantization with fixed level method by intelligibility and subjective appreciation tests and statistical analysis
14 p2087 A72-30942

Correlation functions of signal and noise at output of discrete channel, determining SNR or speech intelligibility
15 p2202 A72-32702

Language and speech capacity of the right hemisphere.
19 p2757 A72-38150

Speech intelligibility during exercise at normal and increased atmospheric pressures.
22 p3150 A72-42496

SPEED
U VELOCITY
SPEED CONTROL

Self adaptive controlled robot velocipedist, discussing speed control and equations of motion
04 p0505 A72-14984

Aircraft turbo-alternator speed control for constant frequency power supply, presenting theoretical relationships for electrohydraulic or mecano-hydraulic control loops
04 p0466 A72-15462

Electrochemical machining with forward speed control via hydraulic means
08 p1175 A72-21043

Dynamic structural analysis of system formed by engine, variable ratio differential and working machine, calculating differential ratio for constant shaft rotation speed
15 p2182 A72-31609

Monitor and regulator for automatic speed control and flow velocity measurement in wind tunnel
16 p2392 A72-33609

A new instrument for the measurement of low dynamic torque.
18 p2692 A72-36820

Optoelectronic speed control for replacing mechanical gear drives for precisely variable shaft speed ratios
21 p2997 A72-40259

Optimal control of the speed of a two-shaft helicopter turbine
23 p3326 A72-44278

SPEED INDICATORS
NT ANEMOMETERS
NT HOT-FILM ANEMOMETERS
NT HOT-WIRE ANEMOMETERS
NT TACHOMETERS

Doppler system with navigation radar device, computer unit and data transmitter for continuous recording of aircraft position and speed
02 p0258 A72-12749

Display device for engine rotational speed nonuniformity parameters indication on oscilloscope without supplementary computation
05 p0662 A72-16125

Received signal spectrum gravity center and effective antenna centers of airborne Doppler velocimeter in horizontal flight
11 p1606 A72-26730

SPEED REGULATION
U SPEED CONTROL
SPEED REGULATORS

Investigation of the dynamic characteristics of the speed governor of a hydropneumatic feed drive
23 p3253 A72-44022

SPEEDMETERS
U SPEED INDICATORS
SPHALERITE
U ZINCBLENDE
SPHERES

NT CELESTIAL SPHERE
NT FALLING SPHERES
NT POINCARÉ SPHERES
NT ROTATING SPHERES

Gravity and magnetic anomalies interpretation in terms of buried spherical bodies, calculating bodies size and depth of burial
01 p0064 A72-11101

Mechanical constraints effects on loose spherical metal particles sintering rates, considering one, two and three dimensional arrays
02 p0232 A72-11433

Contact problem of rigid sphere intrusion into viscoelastic half space, obtaining solution by Green function construction and integral-operator equation formulation
02 p0289 A72-11615

Magnetosonic perturbations caused by ideally conducting sphere expansion in cold plasma, determining electric field and magnetic induction time dependences
02 p0217 A72-11939

Half range differential approximation for spherically symmetric radiative transfer in concentric spheres with and without internal heat sources
02 p3032 A72-12259

Concentric spherical heat exchanger, showing heat transfer coefficient decrease with coolant flow rate increase
02 p3033 A72-12320

Motion stability of sphere and homogeneous semi-infinite rotating cylinder in circular orbits and monoenergetic streams, integrating by trajectories
02 p0285 A72-12832

Radiative cooling system for nearly spherical or polyhedral bodies using radially attached diverging conical elements
02 p3034 A72-12863

Static isotropic elastic body first and second boundary value problems solutions for inside and outside m dimensional sphere
02 p3030 A72-12876

Hard sphere liquid Bernal model with cell method extension, determining liquid argon behavior near melting
03 p0388 A72-13151

Viscous fluid flow at small Reynolds numbers past porous permeable sphere, obtaining drag formula
04 p0511 A72-14858

Slow motion in shear flow of doublet of two spheres in contact, using Stokes equations solution
04 p0511 A72-14860

Hydrodynamic field around sphere moving along Poiseuille flow axis determined by least squares method, formulating flow resistance
04 p0511 A72-14968

Small sphere hydrodynamic drag in ionized gas at local thermodynamic equilibrium, taking into account nonlinear transport properties variations with temperature
[ASME PAPER 71-APM-CC] 04 p0558 A72-15176

Al finished and Au plated triple calibration sphere as multispectral optical sensor for testing Cook hypothesis concerning satellite drag dependence on surface material
04 p0500 A72-15305

Hf electromagnetic wave scattering and diffraction by smooth dielectric cylinder and sphere based on Lorentz excitation theory
04 p0490 A72-15397

Flat plate, sphere and circular cylinder drag and lift coefficients in free molecular flow
04 p0463 A72-15645

Multimoment solutions to convective heat transfer from sphere, discussing maximum drag coefficient and validity at all Knudsen numbers
[ASME PAPER 71-WA/HT-1] 05 p0743 A72-15863

High frequency electric field backscattering by plane electromagnetic wave incident on perfectly conducting sphere with radially inhomogeneous dielectric coating
05 p0630 A72-16621

Thermostated integrating sphere for low temperature measurements of reflection and transmission coefficients of materials with arbitrary scattering functions
06 p0816 A72-17838

Dynamic behavior of stiffened hollow viscoelastic cylinder and elastic shell-contained sphere, taking into account compressibility and internal pressure
07 p0900 A72-19751

Sphere unsteady motion in viscoelastic liquids, noting falling-ball technique use for elastic parameters determination
07 p0973 A72-20549

Elasticity and potential theory axisymmetric problems solution for sphere and spherical cavity, constructing x-analytic functions for boundary surfaces
08 p1242 A72-20908

German monograph on steady flow past sphere and cylinder near wall, discussing drag, lift and flow visualization
08 p1108 A72-21950

Light scattering by spherical particles, noting cost effectiveness of logarithmic derivatives calculation method
09 p1350 A72-22412

Local and macroscopic thermal transport in turbulent air stream, discussing measurement from calorimeter instrumented sphere
10 p1417 A72-24148

Autonomous combustion of Al sphere in controlled atmospheres oxygen-argon, nitrogen and air, identifying products
10 p1562 A72-24238

Radial vibrations of isotropic homogeneous sphere and cylinder bonded to thin nonhomogeneous casting outside
10 p1557 A72-24406

Shock layer emission associated with hypersonic air flow past spherical segment, solving flow equations by iteration technique
10 p1418 A72-24539

Magnetic balance measurements of aerodynamic forces on spheres and slender cones in hypersonic low density wind tunnels, noting sting effect

10 p1462 A72-24771

Spheres drag coefficient measurements in laminar flow as function of Reynolds number, using wind tunnel model magnetic suspension system

10 p1419 A72-24772

Hydrodynamic field generated by sphere motion along viscous fluid filled cylinder axis beyond Stokes regime

10 p1470 A72-24852

Time dependent viscous flow past impulsively started sphere using numerical solutions for governing equations based on Legendre series expansion of stream and vorticity functions

11 p1615 A72-25551

Slow drop of heavy rigid spheres through vertical tube filled with viscous liquid, noting minimization of errors due to temperature and trajectory path

11 p1617 A72-26501

Unsteady flow evolution at sphere and elliptical cylinder obtained by flow visualization techniques, showing streamline sequence dependence on angle of attack

12 p1797 A72-27469

Ultrasonic signal propagation with distance along steel sphere surface compared with lunar seismic signal, discussing surface dent and lunar crater effects

13 p2035 A72-28619

Plane sound wave scattering by acoustically soft sphere at constant subsonic velocity

13 p2003 A72-28797

Nonuniform concentration mechanism for observed drag reduction in flows with high molecular weight polymer additives, considering boundary layer with varying viscosity on sphere

13 p1942 A72-29113

Nonlinear heat conduction in rarefied gases between concentric cylinders and spheres, using series expansion in terms of temperature difference for closed-form solution

13 p2064 A72-29118

Magnetosonic perturbations caused by ideally conducting sphere expansion in cold plasma, determining electric field and magnetic induction time dependences

13 p1949 A72-29251

Nonequilibrium dissociating inviscid nitrogen flow pattern over spheres and circular cylinders, obtaining temperature, pressure and density fields

13 p1895 A72-30032

Wind tunnel investigation of wake pressure and vortex shedding characteristics of flow past spheres as function of Reynolds number

13 p1896 A72-30099

Convective heat transfer of sphere in rarefied gas subsonic flow, comparing calculation with measurement

14 p2071 A72-31023

Stress-strain state of spherical body in centrally symmetric temperature field, noting elastoplastic interface and continuity conditions

15 p2327 A72-31742

Elastic wave diffraction on multiconnected cylindrical or spherical regions in nonsymmetric elasticity theory, determining constants of series solution

15 p2330 A72-32290

Thermal force exerted on spherical particle between two flat plates in stagnant monatomic rarefied gas, using moment solution to Boltzmann equation

15 p2336 A72-32403

Spherical particle accelerated motion in stationary viscous fluid, using numerical integration technique for velocity and displacement computations

16 p2375 A72-32907

Radial vibrations and plane wave propagation in elastic deforming sphere with superimposed time dependent displacement field

16 p2467 A72-33117

Onboard radiometric measurement of bow shock generated UV radiation during atmospheric reentry of experimental sphere

[AIAA PAPER 72-692]

16 p2462 A72-34050

Spatial diffusion dynamics, spin, and the Pauli equation

17 p2573 A72-34193

Acoustic radiation from multiple spheres.

17 p2579 A72-34226

Motion of a sphere in an electrically conducting rotating fluid.

18 p2714 A72-36123

Separation and analysis of the acoustic field scattered by a rigid sphere.

18 p2710 A72-36408

Heat transfer from a slowly rotating sphere.

18 p2741 A72-36934

Negative index polytropic sphere gravitational collapse structure, noting application to interstellar gas clouds thermal equilibrium

19 p2857 A72-37794

Thermal stress induced flow around constant temperature solid sphere in rarefied gas with uniform temperature gradient, using asymptotic theory

19 p2788 A72-38433

Critical levitation loci for spheres on cryogenic fluids.

19 p2836 A72-38844

Unsteady heat transfer and temperature for Stokesian flow about a sphere.

[ASME PAPER 72-HT-C]

20 p2983 A72-39482

Sting-free measurements of sphere drag in laminar flow.

21 p2989 A72-40110

A flow induced by thermal stress in rarefied gas.

21 p2989 A72-40193

Plexiglas spheres and cubes effect on circular and rectangular waveguide aperture antennas directive radiation patterns and sidelobe reduction

21 p3021 A72-40904

Force-time investigations for the elastic impact between a rigid sphere and a thin layer.

21 p3121 A72-41212

Transverse mass flow past a sphere at small Reynolds numbers

21 p3047 A72-41664

Influence of blowing on the resistance of a sphere in laminar viscous fluid flow

21 p3047 A72-41665

Determination of the velocity field of the wake of a hypersonic sphere with the aid of ion probe arrays

21 p3057 A72-41725

Fluid sphere of uniform density and vanishing pressure at periphery, expressing internal motion in terms of Schwarzschild mass and radius and central pressure

22 p3205 A72-42451

New method for determining the distribution of delta-g anomalies for a sphere, horizontal cylinder, and vertical material half-line

22 p3173 A72-42574

Light scattering in a sphere in the presence of an arbitrary source distribution

22 p3207 A72-42965

German monograph - Cooling of geometrically simple bodies /flat plate, cylinder, sphere/ by convection and radiation.

22 p3244 A72-43062

Viscous torque on sphere immersed in Newtonian and non-Newtonian fluids in rotating cylinder, comparing experimental results with Collins theory

23 p3280 A72-43714

Stress distribution in a homogeneous elastic sphere containing a penny shaped crack of prescribed shape.

23 p3354 A72-44268

SPHERICAL ANTENNAS

Spherical reflector antenna phase aberration correction by planar array feeds, discussing synthesis procedure for mean square error minimization

06 p0781 A72-17344

Optimal sum-difference characteristics of nonsuperdirective convex slot spherical antennas for maximum directive gain and minimum spatial sidelobe radiation

11 p1598 A72-26713

A wideband antenna array

17 p2531 A72-35766

Cross-polarized radiation from convex spherical antennas with a phase-opposed field distribution

19 p2774 A72-38414

Spherical reflector as possible antenna for millimeter wave astronomy, discussing feed design for spherical aberration corrections

21 p3029 A72-40519

Luneburg lens spherical antenna microwave radiation pattern, computing Maxwell equations via Tai method

21 p3030 A72-40529

Effects of pseudosonic and electroacoustic waves on the radiation of a plasma-coated spherical antenna.

24 p3386 A72-45645

SPHERICAL CAPS

Dynamic buckling and plate to shell transition of thick spherical caps under large amplitude axisymmetric flexural vibrations

08 p1249 A72-22135

Axisymmetric stability of spherical cap rigidly clamped at contour of shells of revolution, using variational difference method for uniformly distributed external pressure

13 p2053 A72-28393

Spherical cap dynamic buckling under impulsive loading, comparing prediction by energy criterion with experiment using spray deposited explosive

15 p2323 A72-31405

A note on buckling of spherical caps with initial asymmetric imperfections.

23 p3351 A72-44060

SPHERICAL HARMONICS

Spherical harmonics method utilization in radiative transfer calculations, describing characteristic equations roots determination technique

03 p0389 A72-13795

Earth gravitational potential, including surface density, crystal thickness, potential coefficients, contour maps and spherical harmonic expansion

06 p0877 A72-17657

Spherical harmonic representations of geomagnetic field including magnetosphere and tail regions based on ground based and low altitude spacecraft measurements within several earth radii

07 p0977 A72-20026

Geomagnetic field optimal model with expansion of spherical harmonic series by least squares method

07 p0980 A72-20657

Nonuniform non-Lambertian diffusely scattering surface optical transfer characteristics and initial radiance distribution inside sphere, discussing spherical harmonic moment measurement

09 p1309 A72-22610

Geomagnetic data testing by including monopoles term in spherical harmonic reduction

13 p1951 A72-29394

Spherical analyses of the principal geomagnetic field for the years 1550 through 1800

18 p2689 A72-36874

Mathematical model of earth liquid core dynamo mechanism for magnetic field maintenance based on simple motions with spherical harmonic form

21 p3048 A72-40400

Earth main magnetic field description by cartography and analytic methods based on dipole or spherical harmonic series representations

23 p3283 A72-43366

SPHERICAL SHELLS

NT SPHERICAL CAPS

Infinite slab, cylindrical or spherical shells with nonuniform heat generation sources and equal surface temperatures, obtaining maximum internal temperature from error bounds

01 p0145 A72-10511

Variable volume spherical cavity motion in ideal liquid near plane surface

02 p2020 A72-11586

Tube and hollow sphere revolving in thermal flux under surface pressure load, obtaining stress-strain state and random temperature dependences of creep

02 p2289 A72-11618

Fluid filled fiber reinforced spherical shells extensional vibrations, evaluating equivalent elastic orthotropic compliance constants, natural frequencies and mode shapes

03 p0443 A72-13403

Elastoplastic stress distribution in thin spherical metallic shells with cylindrical branch pipe under internal pressure

03 p0448 A72-13905

Stress concentration around circular and elliptical holes in isotropic three layer spherical shells with rigid and lightweight fillers

03 p0449 A72-14104

Shallow spherical shell natural vibration frequencies, deflection and stress function, discussing effects of internal pressure, dimensions and material properties

03 p0453 A72-14200

Linearized equilibrium equations for thin spherically shell with internal pressure, obtaining free vibration modes

04 p0587 A72-15018

Nonlinear elastoplastic deformations of flexible shells of revolution, calculating stress concentration at circular hole in spherical shell

04 p0588 A72-15049

Constitutive equations derivation for electrical conduction due to small deformation superposition, applying to deformed spherical shell current density determination

04 p0549 A72-15254

Variable thickness shallow spherical shells of revolution axisymmetric loads carrying capacity, determining limit equilibrium through application of Tresca yield point concept

05 p0734 A72-15983

Equilibrium conditions of closed elastic spherical shell under uniform nearly critical compression loads, determining shell deformation in Hilbert spaces

05 p0739 A72-16587

Telemetry system on board beryllium sphere reentry vehicle for hypersonic gas dynamics and wake chemistry experiments, using flush mounted antennas with isotropic radiation pattern

[AIAA PAPER 72-176]

05 p0631 A72-16836

Supercritical deformation, bulging and instability of spherical edge clamped shell under external pressure, applying variational principle

05 p0742 A72-17210

Shallow axially symmetrical spherical shell flexural vibrations, obtaining equations iterative solution

06 p0901 A72-18705

Optimal rigid-plastic limit load analysis of spherical shells under nonsymmetrical loadings, using SUMT and Rosenbrock method

07 p1087 A72-18791

Shallow spherical shell equations solution for vibration mode and natural frequencies from analogous vibrating plate solution

07 p1089 A72-19489

Stress-strain state of thin walled spherical shell in contact with internal rigid sphere, determining contact area size

07 p1091 A72-19756

Wave propagation in hollow elastic/viscoplastic sphere under impact load, assuming Mises condition, isotropic hardening and incompressibility

07 p1096 A72-20429

Trapped modes structure of rotating fluid in thin spherical shell, noting constitution of free oscillation periods

07 p0973 A72-20455

Dynamic characteristics and nonlinear oscillations of liquid in spherical shell of revolution, modifying Lukovskii approximation method

08 p1148 A72-20962

Green matrix computation algorithm extensible to spherical and toroidal closed shells of revolution for stress-strain state determination

08 p1246 A72-21672

Temperature fields produced in viscoelastic cylindrical, conical and spherical shells by cyclic loads, calculating displacements from zero moment stress theory formulas

09 p1399 A72-22701

Continuum model for cylindrical and spherical elastic laminated composites deformation, using balance and constitutive equations

09 p1405 A72-22992

Boundary value problems for buckling and initial postbuckling of clamped shallow spherical and conical thin walled sandwich shells under uniformly distributed hydrostatic pressure

[ASME PAPER 71-APM-YY]

10 p1554 A72-24182

Gas role in radiative transfer and free convection between concentric spheres, noting gray gas assumption validity

[AIAA PAPER 72-280]

11 p1740 A72-25220

Supercritical deformation, bulging and instability of spherical edge clamped shell under external pressure, applying variational principle

11 p1727 A72-25341

Pressure loaded shallow spherical shells with reinforced circular holes, noting stress concentration increase due to reinforcement bead eccentricity

11 p1734 A72-25736

Mixed variational formulation and finite element method for axisymmetric cylindrical, conical, spherical and ellipsoidal shells

12 p1879 A72-27195

Hollow elastic momentless spherical shell translatory displacements in compressible fluid under nonstationary spherical wave

12 p1880 A72-27234

Shallow spherical sandwich shells limiting equilibrium for material with different tension and compression yield stresses

12 p1885 A72-27974

Thermal stresses near pole of spherical reservoir during cooling, using thermoelastic equations of shell of revolution

12 p1887 A72-28242

Shallow spherical shells axisymmetric vibrations under time varying loads, discussing transverse shear and rotatory inertia effects in terms of Fourier-Bessel series

13 p2056 A72-28880

Tangential displacements of spherical and circular cylindrical shallow shells calculated from stress function

13 p2059 A72-29490

K-order differential equation solution obtained for system of polynomial functions for shallow spherical shell under uniform pressure, using Bubnov-Galerkin and collocation methods

13 p2062 A72-29947

Radiative energy transfer through gray gas layer between black concentric spheres at different temperatures

13 p2066 A72-30055

Carrying capacity of rigidly hinged shell of revolution with concentric reinforcing rib, applying to shallow spherical shell under uniform external pressure

14 p2166 A72-30687

Creep deformation transition theory in spherical shells, using generalized strain measure for asymptotic solution

14 p2169 A72-30999

Stress function method for calculating stress-strain state in homogeneous shallow spherical shell under arbitrary load

15 p2324 A72-31485

Elastic deformation of thin walled spherical and cylindrical shells and associated rings under external loads for small displacements

15 p2325 A72-31604

Stress and displacement solution to Lamé problem for multilayer spherical vessels and cylindrical tubes in nonlinear elasticity theory

15 p2333 A72-32679

Surface stress solution for elastic half space weakened by spherical cut under internal pressure

15 p2333 A72-32681

Vibrational frequency density analysis of thin spherical and cylindrical shells of revolution, using asymptotic integration method

16 p2464 A72-32935

Natural vibration frequency spectra of circular cylindrical and spherical shells of revolution, using Bessel function

16 p2465 A72-32936

Perturbation scheme for branching analysis of postbuckling behavior in elastic spherical shells

16 p2465 A72-33001

Temperature and stress fields generated by pulsating internal pressure in viscoelastic hollow sphere with temperature dependent material properties, using iterative numerical procedure

16 p2473 A72-34122

Numerical procedure for spherical and cylindrical shells creep behavior, taking into account stress redistribution due to interaction between elastic and creep strains

16 p2473 A72-34125

Asymptotic singular perturbation solution to thick spherical shell with circular hole under axisymmetric external pressure

16 p2474 A72-34157

Contact pressure between an elastic spherical shell and a rigid plate.

[ASME PAPER 72-APM-31]

17 p2628 A72-34788

The shielding effect of metallic spherical envelopes with respect to very short EM waves and pulses

17 p2530 A72-35223

Thin spherical shells in equilibrium with displacement and stress fields, satisfying virtual work, kinematic and static requirements

17 p2633 A72-35351

Numerical solution of problems of large deformations for spherical elastic shells

17 p2634 A72-35421

Fracture of cylindrical and spherical shells containing a crack.

17 p2634 A72-35645

Free vibration mode shapes mapping of spherical and paraboloidal plastic shells under acoustic excitation via noncontact fiber optics instrumentation

18 p2690 A72-36372

Free vibrations of a spherically isotropic hollow sphere.

18 p2736 A72-37004

Forced axisymmetric response of fluid filled spherical shells.

18 p2684 A72-37063

On the transient response of a closed spherical shell to a local radial impulse.

18 p2739 A72-37089

On the accuracy and application of the point matching method for shallow shells.

18 p2739 A72-37090

Mathematical analogies in a theory of shallow spherical shells and plates allowing for transverse shear

19 p2872 A72-37540

Equilibrium conditions of closed elastic spherical shell under uniform nearly critical compression loads, determining shell deformation in Hilbert spaces

19 p2872 A72-37558

Determination of the natural frequencies and modes of oscillation of a spherical resinous shell

19 p2873 A72-37662

Investigation of the snap-through of rigidly clamped shallow spherical shells under the action of a dynamic stepped load

19 p2877 A72-38163

Behavior of viscoelastic shallow spherical shells subjected to dynamic pressure.

21 p3122 A72-41245

A collocation solution of the nonlinear equations for axisymmetric bending of shallow spherical shells.

22 p3232 A72-41938

Model studies of plate and shell stability

22 p3233 A72-42055

Rotatory vibration of a thick spherical shell of isotropic non-homogeneous elastic material.

22 p3240 A72-42880

Dynamic loading of a fluid-filled spherical shell.

22 p3240 A72-42891

Dynamic response of viscoelastic shallow spherical shells.

23 p3349 A72-43972

Asymmetric imperfections effect on spherical elastic shell buckling strength under uniform external pressure

23 p3351 A72-44104

Response of shallow spherical shells to pulse pressure loads.

24 p3454 A72-44605

Collapse of massless nonrotating gas particle nonuniform spheroidal shell contracting around gravitating massive point nucleus, interpreting galactic evolution

24 p3438 A72-44844

The transient electromagnetic response of a spherical shell of arbitrary thickness.

24 p3381 A72-45638

Variable thickness shallow spherical shells of revolution axisymmetric loads carrying capacity, determining limit equilibrium through application of Tresca yield point concept

24 p3460 A72-45725

SPHERICAL TANKS

Optimal composite structures of multilayer spherical vessels in terms of elastic deformation under critical loads in thermal field

16 p2467 A72-33158

SPHERICAL WAVES

Atmospheric turbulence induced laser beam spread estimation from spherical wave modulation transfer function

03 p0367 A72-13442

Maxwell equation spinor formulation for Schwarzschild gravitational field effects on spherical electromagnetic waves propagation

05 p0689 A72-16165

Asymmetrical profile calculation of spherical multiple wave interference patterns at finite distance with nonparallel mirror Fabry-Perot interferometer

05 p0662 A72-16193

Multifrequency plane, spherical and beam waves propagation, calculating temporal frequency spectra in turbulent atmosphere

06 p0771 A72-17339

Source distribution estimate in radar mapping, comparing prolate spherical wave functions inverse versus truncated Fourier transform methods

07 p0946 A72-17992

Spherical wave functions in analysis of infinite systems of algebraic equations describing elastic wave diffraction in sequence of spherical cavities

08 p1246 A72-21706

German monograph on pulsed laser induced spherical unsteady blast waves in stationary and flowing gases

09 p1325 A72-23161

Laser heating of plasma based on heat conduction mechanism of spherical thermal wave, taking into account nuclear fusion heat generation

09 p1365 A72-23551

Acoustic waves generation in liquids by Q-switched ruby laser, noting transition from plane to spherical waves with dye concentration and focusing configuration variations

10 p1490 A72-23954

Closed form solution for spherical and cylindrical wave propagation in laser conductively heated plasma, considering account of nuclear fusion energy recovery

10 p1522 A72-24721

Turbulence theory 2/3 law applicability to optical spherical wave propagation through turbulent atmosphere, comparing to von Karman model

11 p1686 A72-25772

Hollow elastic momentless spherical shell translatory displacements in compressible fluid under nonstationary spherical wave

12 p1880 A72-27234

Numerical accuracy of electromagnetic field spherical wave expansions, considering horn antenna radiation pattern

12 p1791 A72-27670

Unsteady spherical shock wave effect on thin infinite elastic plate covering acoustic semispaces, using integral transformation method

13 p1943 A72-29946

Imploding spherical and cylindrical shocks, considering rear flow field with nonadiabatic isothermal and zero temperature gradient

16 p2376 A72-33009

Q switched laser produced hemispherical shock waves in Ar and He plasmas, determining primary and secondary wave trajectories

16 p2439 A72-34028

Propagation of spherical waves in a weak static gravitational field

17 p2581 A72-35170

Strong intensity fluctuations of a spherical wave propagating in a randomly refractive medium

18 p2661 A72-36659

Near sidelobes in Cassegrain antenna systems.

18 p2668 A72-37039

Minkowski space-times for impulsive gravitational waves, considering idealized plane fronted wave form and limiting case of Robinson-Trautman null spherically fronted wave

20 p2955 A72-40007

Scattering of a spherical wave at a spherical discontinuity with an arbitrary radial distribution of the refractive index

21 p3016 A72-40793

Averaged equations of simultaneous hydrodynamic expansion and thermal heating of two-temperature plasma, taking the recovery of thermonuclear fusion into account. I - The plane problem. II - The spherical problem.

21 p3093 A72-41476

Propagation of spherical and cylindrical shock waves in an inhomogeneous atmosphere with allowance for back pressure

21 p3047 A72-41662

Alternative description of laser plasma heating for spherical thermal wave, the fusion energy being taken into account.

22 p3211 A72-42629

SPHEROIDS

NT OBLATE SPHEROIDS

NT PROLATE SPHEROIDS

Extraterrestrial magnetic spheroid concentrations observed in October 1967 and 1969 proposing relationship to rainfall frequency

08 p1226 A72-21109

- Sound radiation impedance of vibrating prolate spheroids as function of nearfield variation
11 p1688 A72-26064
- Book - Angular scattering functions for spheroids
17 p2582 A72-35457
- Spheroids with surface vibration at specified normal velocity distributions, calculating acoustic radiation by Green function approach
18 p2710 A72-36412
- Boundary value problem approximate solution for Stokes flow of unbounded viscous Newtonian fluid past single body, applying algorithm to spheroidal shapes
19 p2784 A72-37369

SPHERULES

- Chemical composition and morphology of silicate spherules, comparing to lunar rocks, meteorites and tektites
02 p0280 A72-12283
- Silicate microspherules distribution anomaly in peats of Tunguska meteorite fall area
02 p0281 A72-12293
- Constant cosmic spherule influx rate measured on quaternary deep sea sediments
05 p0722 A72-17153
- Microscopic, chemical and morphological studies of ultralarge meteoric spherules in Yakut ASSR, noting composition
08 p1229 A72-20838
- Lunar crater region ray systems origin and brightness variation mechanism from surface vitreous spherules examination
11 p1715 A72-25300
- Chondrule like spherules from supercooled molten oxide and silicate droplets by carbon dioxide laser heating compared with meteoritic chondrules
15 p2303 A72-31306

SPICULES

- Toroidal magnetic ring development and interaction with poloidal magnetic field, considering relationships to sunspots bright rings and spicules dynamics
05 p0719 A72-16512
- Fine structure elements of chromosphere, discussing spicules, fibrils and thermal effects
07 p1077 A72-19808
- Spicular field morphology near solar limb from photographs taken with H alpha filter
15 p2305 A72-31512
- Solar chromosphere bright mottles and spicules lifetime relationship from H alpha photograph isophotometry of limb
16 p2456 A72-33509
- Fine structure elements of chromosphere, discussing spicules, fibrils and thermal effects
17 p2617 A72-35733

SPIKE ANTENNAS

U MONOPOLE ANTENNAS

SPIKE POTENTIALS

- Multichannel IC spike height discriminator for separating electrical activity of neural units recorded with microelectrode
04 p0481 A72-15223
- Ultrashort light pulse emission during mode locking in ruby lasers in free emission operation, examining first spike radiation
05 p0668 A72-16413
- Retinal ganglion cell spikes timing in mammalian retina, using electroretinography and computer analysis
06 p0762 A72-17721
- Neuronal spike activity changes in rabbit visual and sensorimotor neocortex and hippocampus during EEG activation
13 p1902 A72-28643
- Cat hypothalamus regions neurons background activity characterized by single nonrhythmic spikes with large interspike intervals, noting frequency of discharge bursts
24 p3370 A72-44588

SPIKES

- Plasma interpretation of solar type 3 and spike bursts associations from high time resolution radiospectrographic observations
09 p1392 A72-23540

SPIKING

- Instantaneous and averaged spiking emission spectra of injection laser under spontaneous pulsation as function of oscillation mode and photon distribution
16 p2404 A72-33984

SPIN

- NT ELECTRON CAPTURE
- NT ELECTRON SPIN
- NT ISOTOPIC SPIN
- NT NUCLEAR SPIN
- NT PARTICLE SPIN
- NT SPIN-ORBIT INTERACTIONS
- Sounding rockets spin rate sensor, describing apparatus operation and size and weight reduction
01 p0071 A72-11173
- SPIN DECOUPLING
- NT SPIN
- Measurement of longitudinal relaxation times for spin-decoupled protons.
24 p3427 A72-45400

SPIN DYNAMICS

NT SPIN

- Galactic rotation origin, discussing tidal, vortex and spinning core theories
01 p0127 A72-10290
- Linear spin-down of stratified rotating Boussinesq fluid in circular cylinder as function of Prandtl number, noting solar interior problem
01 p0051 A72-11231
- Aircraft spin characteristics due to superstall, comparing three stall types with respect to recovery, yaw damping and rate of rotation
02 p0155 A72-12718
- [DGLR PAPER 71-057]
- Ball bearings rolling and spinning friction coefficients determination as function of stress at contact point, race and ball diameter
03 p0363 A72-13561
- Spin dynamics model of space station with counterweight connected by multiple cables, using linearized motion equations
05 p0730 A72-16882
- [AIAA PAPER 72-172]
- Thermally expanding surface effects on aerodynamic roll torques on smoothly ablating spinning cones, comparing analytic study and hypersonic wind tunnel test results
05 p0608 A72-16923
- [AIAA PAPER 72-30]
- Spinning satellite with rigid central body and flexible appendages, deriving equations of motion and Liapunov stability
06 p0892 A72-17652
- Mathematical model for dissipative dual-spin satellite analysis, making use of high speed rotor symmetry to permit quasi-holonomic transformation
07 p1085 A72-19280
- Analog simulation of dual-spin satellite dynamics and control, emphasizing Hughes gyrostat spacecraft
07 p1086 A72-20352
- Dynamical equivalence between vehicles with motor-driven constant speed rotor under bearing friction and freely spinning torque free rotor, deriving equations of motion
08 p1108 A72-21174
- Liquid filled spinning projectiles and satellites flight stability based on Stewartson gyroscopic analysis method
08 p1168 A72-21600
- Spin excitation effects in superconductors, noting impurity concentration effects on transition temperature and thermodynamic properties
09 p1368 A72-22558
- Earth pointing rotating satellites attitude control system based on two-degree of freedom gyroscopes, determining conditions for rotor spin axis fixation in inertial space
10 p1509 A72-24646
- Linear impulsive spin down from rigid body rotational equilibrium of radiation penetrated opaque compressible fluid in circular cylinder
11 p1680 A72-25555
- Metallized solid propellants burning rate augmentation by internal ballistics effect of spinning rocket motor, deriving relationship between burning rate, pressure level and acceleration
13 p2025 A72-29302
- Dynamic spin disorder effect on electrical and thermal conductivity, noting low resonant frequency in metal atom magnon spectrum
15 p2290 A72-31388
- Terrestrial and lunar orbital and rotational motion behavior, discussing kinematic theory and ground and space vehicle based observation techniques
19 p2865 A72-38479
- High angular velocity device design problems, considering gyroscopes, ultracentrifuges, yarn-spinning textile machinery and dental drill
19 p2809 A72-38544
- Characteristics of models of detonation spinning in various combustible media
20 p2987 A72-40045
- Analytic prediction of aircraft spin characteristics and analysis of spin recovery.
22 p3136 A72-42329
- [AIAA PAPER 72-985]
- Development of design criteria for predicting departure characteristics and spin susceptibility of fighter-type aircraft.
22 p3136 A72-42330
- [AIAA PAPER 72-984]
- Generalized subharmonic response of a missile with slight configurational asymmetries.
22 p3134 A72-42339
- [AIAA PAPER 72-972]
- Dynamics of spin-stabilized satellites having flexible appendages.
24 p3449 A72-45140
- Spin response of symmetric ablating vehicle at zero angle of attack, noting spin-up by ablation-induced grooving and spin-down by crosshatching effects
24 p3362 A72-45339
- SPIN EXCHANGE
- Direct fitting of spin wave energies to interatomic exchange parameters in the ferromagnetic rare earth metals.
21 p3097 A72-40625
- SPIN REDUCTION
- German monograph on optimal attitude control of satellites with rotors and simultaneous spin reduction,

covering motion equations for stable equilibrium and circular orbit
09 p1394 A72-22330

Stability of linear systems with constraint damping and integrals of the motion.
19 p2856 A72-37519

Despinning and detumbling satellites in rescue operations.
24 p3450 A72-45160

SPIN RESONANCE

- Hyperfine magnetic field reduction produced in Fe-Cr alloy single crystal by Cr atoms observed by Mossbauer method, proposing spin disturbance mechanism
15 p2293 A72-32230
- Dynamics of the optical-pumping cycle of F centers in alkali halides - Theory and application to detection of electron-spin and electron-nuclear-double-spin resonance in the relaxed-excited state.
18 p2719 A72-36709
- Resonance between spin waves and magnetohydrodynamic waves in antiferromagnetic semiconductors and metals
21 p3096 A72-40415
- Gamma ray scattering asymmetries of Fe 57 nucleus, discussing hyperfine structure and conjugate spin transition
22 p3209 A72-42924

SPIN STABILIZATION

- Far field patterns of hourglass reflector phased array for electronic despin of communications antenna on spin stabilized satellite
01 p0029 A72-10666
- AEROS scientific satellite attitude control system, considering control and measuring electronics, axis and spin control coils and spin stabilization
04 p0503 A72-15649
- AEROS satellite active magnetic attitude control system, describing magnetometer system, sun and IR earth sensors, spin stabilization and axis and spin rate control torque generation
05 p0727 A72-16473
- Time optimal and fuel optimal control of spin stabilized space vehicle for body-fixed and gimbaled jets, using maximum principle
05 p0728 A72-16476
- Universal ball-in-tube nutation dampers for spinning satellites, noting cost savings
05 p0729 A72-16756
- Gas jet control for spinning satellites attitude correction, deriving relations between satellite and control system parameters, response time and fuel consumption
05 p0731 A72-17194
- Spin stabilized axisymmetric probe attitude deviation due to solar pressure in elliptic orbits
06 p0892 A72-17655
- German monograph on optimal guidance of spin stabilized space bodies for combined attitude and angular velocity control and time optimal nutation damping
08 p1241 A72-21847
- Thrust profile shaping for spin stabilized vehicles analyzing effect on wobble motion and pointing error
10 p1552 A72-24647
- Spin stabilized satellites attitude dynamics during rigid booms extension, deriving equations of motion approximate solution
11 p1726 A72-25915
- Synchronous communication satellites body stabilized three axis attitude control superiority over dual spin techniques, emphasizing single large pitch momentum wheel configuration with magnetic torquing
12 p1876 A72-27386
- [AIAA PAPER 72-572]
- Elastic damping of spin stabilized space stations nutational oscillations induced by time-variant moments of inertia
15 p2319 A72-31458
- Frequency shift and mode shapes for equatorial vibrations of flexible boom on spin stabilized satellite, applying to thermal flutter resonance and nutational stability
15 p2320 A72-31803
- Optimum design parameters for a spin-stabilized spacecraft nutation damper.
17 p2619 A72-34208
- Passive stability of a spinning Skylab.
18 p2730 A72-36314
- Attitude stability and performance of a dual-spin satellite with nutation damping.
19 p2862 A72-38022
- Stability and CMG wobble damping of flexible, spinning space stations.
20 p2975 A72-39113
- [AIAA PAPER 72-888]
- Attitude stability of a dual-spin satellite with a large flexible solar array.
20 p2975 A72-39114
- [AIAA PAPER 72-887]
- Analysis of effects of fluid energy dissipation on spinning satellite control dynamics.
20 p2976 A72-39115
- [AIAA PAPER 72-886]
- An antenna principle with universally polydirectional radiation for large spin-stabilized flight devices
21 p3030 A72-40532
- Effect of bearing flexibility on dual-spin satellite attitude stability.
21 p3115 A72-41303

Mass attraction reduction by integral control in spinning drag-free satellites. 21 p3115 A72-41304

Solar pressure control of a spinning satellite with a stabilized platform. [AIAA PAPER 72-918] 21 p3115 A72-41563

Flight mechanics of spin stabilized rotating disks for special ordnance delivery, considering aerodynamic parameters relation to dynamic stability and orientation. [AIAA PAPER 72-982] 22 p3134 A72-42332

Effects of rifling and N-vanes on the Magnus characteristics of bodies of revolution. [AIAA PAPER 72-970] 22 p3135 A72-42341

Spin stabilized ballistic air-to-ground or ground-to-ground rocket, discussing dynamic stability-impact error relationship [SAWE PAPER 928] 23 p3342 A72-43468

Alignment of the figure axis of a spin-stabilized spacecraft perpendicular to sun and earth. 23 p3343 A72-43621

Dynamics of spin-stabilized satellites having flexible appendages. 24 p3449 A72-45140

OSO pointing accuracy improvement through dual spin stabilization, discussing OSO design evolution 1962-72. 24 p3449 A72-45145

Spin stabilization dispersive effect on marginally stable bodies due to precession rate, comparing analytical results with aeroballistic range measurements. 24 p3362 A72-45340

SPIN TESTS

NT SPIN

Boeing 347 helicopter program, discussing simulation, wind tunnel, whirl tower, bench testing, flight test development and demonstration. 05 p0614 A72-16993

F-14 Tomcat test program for hydraulic systems, spinning, low speed performance, stalling, afterburning turbofan engines, in-flight refueling and automatic telemetry equipment. 06 p0758 A72-17582

Flight initial spin testing, discussing aircraft autorotation due to stalled angle of attack and sideslip. 06 p0759 A72-18492

Status of U.S. Navy stall/post-stall/spin flight testing. [AIAA PAPER 72-787] 19 p2749 A72-38104

SPIN-LATTICE RELAXATION

Microwave diode switch operating at 35 GHz for spin lattice relaxation time measurement, discussing insertion loss, and rise and decay times characteristics. 16 p2369 A72-33623

Dynamics of the optical-pumping cycle of F centers in alkali halides - Theory and application to detection of electron-spin and electron-nuclear-double-spin resonance in the relaxed-excited state. 18 p2719 A72-36709

SPIN-ORBIT INTERACTIONS

NT ELECTRON CAPTURE

Long term spin and misalignment in orbit of Azur satellite with passive magnetic attitude control system. 05 p0727 A72-16466

Anomalous Hall effect of polarized electrons spin-orbit interactions in semiconductors, involving emf appearance in electric field and polarized light. 07 p1048 A72-19642

Gas phase photodetachment of electron from selenide ion, determining affinity and spin-orbit coupling constant for SeH negative ion. 16 p2360 A72-33580

Low field magnetization measurements at 4.2 K on bulk and thin film niobium nitride, discussing Pauli spin paramagnetism and spin-orbit scattering. 16 p2442 A72-33843

Observability of hyperfine structure and Lamb, nuclear-volume shifts in ^{151}Sm transitions of heli-unlike ions. 19 p2837 A72-37544

Gravitational spin interaction. 19 p2835 A72-38425

Anomalous Hall effect of polarized electrons spin-orbit interactions in semiconductors, involving emf appearance in electric field and polarized light. 24 p3431 A72-44573

SPINAL CORD

NT SPINE

Spinal reflexes through electric stimulation of gastrocnemius and soleus human leg muscles, attributing increased tendon reflex amplitudes to gamma motoneurons hyperactivation. 04 p0467 A72-14704

Seat cushion evaluation for behavior during helicopter crash or aircraft ejection and spinal injury probability. 08 p1126 A72-21577

Albino rats spinal cord capillaries ultrastructure upon hypothermy, noting endothelial cells sinking to lower levels from microscopic observation. 12 p1760 A72-27304

High threshold afferents role in dorsal surface potential formation in cat spinal cord. 13 p1905 A72-29327

Supraspinal effects on different work regimes of supplementary respiratory muscles, using interference electromyograms cross correlation analysis. 13 p1905 A72-29328

Human spinal segment functional state before voluntary movement during water immersion, using H-reflex for spinal cord motoneuron excitability evaluation. 14 p2073 A72-30255

Nucleic acid contents in cholinergic and adrenergic spinal cord neurons and in their glial satellite-cells during hypoxic hypoxia and a post-hypoxia period. 19 p2756 A72-37742

Russian book - Mechanisms of descending control of spinal cord activities. 21 p2998 A72-40577

A possible anatomical basis for descending control of impulse transmission through the dorsal horn. 21 p2998 A72-40578

Neuronal fiber and synaptic axonal contact structure of cat spinal gray matter in corticospinal, rubrospinal and reticulospinal terminal zones by Golgi method. 21 p2998 A72-40579

Morphological changes in spinal cord neurons of animals due to the decreased intensity of supraspinal stimulation. 21 p2998 A72-40580

The ultrastructure of the lateral basilar region of the spinal cord. 21 p2998 A72-40581

Neuronal organization of descending systems of the spinal cord. 21 p2998 A72-40582

Propriospinal ducts of the lateral funiculus and their possible role in transmission of pyramidal stimuli. 21 p2998 A72-40583

Synaptic suprasegmental control mechanisms of spinal cord motor neurons. 21 p2998 A72-40584

Study of the conductivity of the motor neuron membrane during supraspinal stimulation. 21 p2998 A72-40585

Intracellular study of rubrospinal neurons and of their synaptic activation during the stimulation of the sensorimotor cortical region. 21 p2998 A72-40586

Influence of a preceding afferent stimulation on the pyramidal activation of spinal motor neurons. 21 p2998 A72-40588

Systems analysis approach to the study of spinal mechanisms. 21 p2998 A72-40590

Role of pyramidal and extrapyramidal components of cortically-induced efferent stimuli in the mechanism of cortical motor activity coordination. 21 p2998 A72-40591

Possible role of supraspinal formations in the fixation of trace alterations at the segmental apparatus level of the spinal cord. 21 p2998 A72-40592

Cerebrum sections and related efferent processes as activator of automatic neuron mechanism control of motor activity, discussing segmentary spinal cord changes. 21 p2998 A72-40593

Role of efferent influences of temporo-rhinencephalic cerebral structures in pre-adjustment alterations of spinal motor neuron excitability. 21 p2998 A72-40596

Vasomotor reflexes and the principle of descending control. 21 p2998 A72-40597

Hypothalamic control of the electrical activity of the spinal cord. 21 p3000 A72-40598

Supraspinal effects in the activity of preganglionic sympathetic neurons delivering axons to the cervical sympathetic nerve. 21 p3000 A72-40599

Cortico-visceral studies of spinal cord reticular formation stimulation and destruction effects on electroencephalogram, cardiac activity and interoceptive glycemic reflexes. 21 p3000 A72-40757

Effects of physical exercise on spinal reflectivity in man. 21 p3003 A72-41524

Electromyographic investigation of diaphragm cross contraction following spinal cord section in cats, noting diaphragm motoneurons excitation by breathing center pulses. 22 p3142 A72-42281

Spinal cord heating and cooling effects on body temperature, respiratory and heart rates and arterial blood pressure, investigating feeding and drinking behaviors. 22 p3150 A72-42672

Classification of neurons in the lumbosacral section of the spinal cord according to their discharge during evoked locomotion. 23 p3257 A72-44092

Influence of the sympathetic nervous system on the presynaptic inhibition of the dorsal surface potential of the spinal cord. 24 p3370 A72-44589

SPINDLES

Experimental research on the wave resistance of a thin spindle with an annular shield in a supersonic axial flow. 24 p3364 A72-45393

SPINE

Human spine elastic deformation due to bending stresses, presenting statistical data on caudocephalad acceleration effects in vertebral column injuries. 01 p0016 A72-10111

Synaptic mechanisms of vestibulospinal and reticulospinal effect on transmission to lumbar motoneurons in monkeys. 02 p0158 A72-11760

Aircraft ejection simulation by human thoraco-lumbar spine flexion dynamic model, using strength of materials theory and shear effects for curved elastic beam. [ASME PAPER 71-WA/BHF-7] 05 p0620 A72-15947

Aircraft accident in the Faroe Islands in 1970 - Observations from a medical point of view, with special reference to spinal fractures. 17 p2508 A72-34556

The scoliosis of congenital heart disease. 24 p3370 A72-44560

SPINEL

Apollo flight lunar spinels compositional variations, formulating modified Johnstone prism projections. 01 p0134 A72-11162

Nonequilibrium subsolidus reduction of lunar spinels at low oxygen fugacities based on Cr-Al ulvospinel and olivine decomposition. 03 p0439 A72-14298

Chromian pleonaste and aluminous picotite in Apollo 14 fine grained microbreccias comparing with spinel composition in lunar basalts. 06 p0878 A72-17672

Opaque mineralogy of Luna 16 soil sample, emphasizing compositional variations of Fe-Ti-Cr-Al-Mg spinels. 09 p1380 A72-22261

Oxide spinels crystallographic structure determination, stability relationships, covalent bondings and physical properties. 10 p1501 A72-24730

Electron microprobe analysis of chromian spinels from Apollo 14 rocks indicating crystallization from high aluminum low iron magma. 12 p1865 A72-27113

Absorption spectrum of Cr cations in magnesium aluminate spinel crystals excited by strong optical pumping. 12 p1854 A72-27596

Magnesium aluminate spinel reinforced with sapphire whiskers, investigating whisker content, temperature and deflection rate effects on yield strength. 17 p2572 A72-35661

Room temperature operation of microwave acoustic delay lines with magnesium aluminate spinel, discussing acoustic mode conversion and shear wave piezoelectric transducers. 19 p2800 A72-37875

Elasticity of some mantle crystal structures. I - Pleonaste and hercynite spinel. 20 p2917 A72-39478

Occurrence of chromian, hercynitic spinel /'pleonaste' in Apollo-14 samples and its petrologic implications. 22 p3153 A72-42862

Solid solution, subsolidus reduction and compositional characteristics of spinels in some Apollo 15 basalts. 23 p3262 A72-44135

SPINOR GROUPS

Maxwell equation spinor formulation for Schwarzschild gravitational field effects on spherical electromagnetic waves propagation. 05 p0689 A72-16165

Integrability and identity relations for Newman-Penrose formalism equations in spinor description, assuming Einstein equations validity for vacuum. 10 p1510 A72-24105

Spinor differential equation of generalized unperturbed Kepler motion, using motor method and Lie algebra. 24 p3442 A72-45238

SPIRAL ANTENNAS

NT LOG SPIRAL ANTENNAS

Electronically scanned monopulse cavity backed quadratic spiral antenna array at 1.54-1.66 GHz for maritime satellite communications. 01 p0039 A72-10662

Frequency-independent multimode equiangular/conical spiral antenna with thick wires, calculating current distribution and radiation pattern by numerical program. 07 p0939 A72-19187

Radiation from a directive continuous spiral antenna array. 17 p2526 A72-34376

Experimental investigation regarding Archimedean spiral antennas for the L-band, and radiator groups constructed from them whose radiation directions are controlled by a conduction matrix. 21 p3028 A72-40510

SPIRAL GALAXIES

NT MILKY WAY GALAXY

Irregular, spiral and elliptical galaxies radio continuum measurements at 1420 MHz, presenting positions flux densities and brightness distributions

01 p0131 A72-11005

Spiral galaxies radio continuum emission origin, discussing supernovae and relativistic electrons effects

01 p0131 A72-11006

Milky Way Galaxy spiral structure determination, presenting arms anatomy, gas and star kinetics and radio astronomy data

03 p0417 A72-13104

Galactic spiral arm structure theory, discussing density wave pattern and material objects concepts

03 p0418 A72-13105

Neutral hydrogen distribution in spiral and irregular galaxies, discussing H II regions

05 p0716 A72-16371

Maffei 2 galaxy radio maps and H line studies, discussing distances, intrinsic luminosity, flux density and apparent size

06 p0886 A72-18097

Spiral galaxies hypothesis for higher mass-luminosity ratio of outer parts from undetected cold neutral hydrogen, using model of NGC 300

07 p1068 A72-19071

Stellar dynamical and density wave theories for spiral pattern persistence in Galaxy with differential rotation

07 p1074 A72-19430

Variational principle in equilibrium and stability theory of rotating bodies under magnetic and thermal fields, explaining spiral branch number in galaxies

07 p1077 A72-19806

NGC 3031 spiral galaxy photometry and large scale structure determination by UBV_R integral equidensity curves method

08 p1234 A72-21280

Wolf-Rayet stars identification in spiral galaxy M33/NGC 598/ from narrow band interference filter photographs, tabulating apparent magnitudes and emission indexes

09 p1382 A72-22281

Spiral density waves in galactic model with differentially rotating interstellar gas and stars, deriving dispersion equation by frequency to wave numbers relation

09 p1384 A72-22517

Galactic spiral density waves instability effects, noting local centroid radial motion and apex deviation

09 p1384 A72-22519

Intergalactic matter infall in galaxies, discussing quasar absorption spectra, hydrogen clouds, accretion rate and relations to spiral structure

09 p1386 A72-22660

Interstellar gas streaming velocity due to galactic spiral density waves, deriving mathematical expressions for Oort constant and differential galactic rotation nodes from Lin theory

09 p1391 A72-23538

Radio continuum survey of spiral galaxies M51 and NGC 5195 for study of galactic magnetic field and cosmic rays origin and distribution

10 p1543 A72-24623

Large Magellanic Cloud spiral structure and motion through interstellar gas, determining old and young stars spatial distribution near major spiral arm

10 p1544 A72-24662

Spiral galaxy density wave maintenance mechanism from rotating disk star-gas system model description of stellar birth and disintegration effects

10 p1547 A72-24869

Perseus two armed spiral shock model based on O associations, young open clusters, H II regions, interstellar absorption lines and 21 cm hydrogen maps

11 p1720 A72-26110

Small perturbations in collisionless stellar dynamics, discussing linear modes for flat axisymmetric galaxy and effects introduced by nonlinear theory of spiral structure

12 p1874 A72-27904

Instabilities initiation in spiral arm formation and stellar cluster evolution, noting analogy to hose-pipe instability in plasma physics

12 p1874 A72-27905

Numerical experimentation in collisionless systems for Jeans instability, static self consistent models and spiral patterns

12 p1874 A72-27908

Spiral density wave structure persistence conditions determined from computer simulations of galaxies evolution, noting gravitational azimuthal and radial forces effects

12 p1874 A72-27910

Milky Way spiral structure and star distribution, discussing photometric methods

12 p1875 A72-27967

Two phase flow model of cloud and star formation by galactic shocks in quasi-steady interstellar gas flow in spiral gravitational field

13 p2040 A72-29404

Spiral galaxies radio sources spectral components, noting relativistic electrons radiation and luminosity-surface brightness diagram

14 p2148 A72-30203

Galactic astronomy - Conference, State University of New York, Stony Brook, June-July 1968, covering Galactic structure, spiral shape theories, star migration, etc

14 p2152 A72-30486

H II regions radial velocities in Carina arms from Fabry-Perot interferometric H alpha measurements, determining early stars distances from spectroscopic and photoelectric observations

14 p2159 A72-30740

Elliptical and barred spiral Markarian galaxies, discussing starlike and diffuse spectra dependence on morphology

15 p2304 A72-31327

Spiral galaxy density wave damping by induced large-scale shock in interstellar medium

15 p2315 A72-32718

Spiral structure generation by outward angular momentum transfer, considering gravitational stress tensor, star-spiral wave momentum transfer and galactic secular evolution

16 p2457 A72-33683

Variational principle in equilibrium and stability theory of rotating bodies under magnetic and thermal fields, explaining spiral branch number in galaxies

17 p2617 A72-35730

Galactic spiral structure temporal decay based on density waves hypothesis

17 p2619 A72-35955

Spiral galaxies self gravitating cold disk model, considering equilibrium state, instability, oscillation modes, bending motions, pressure effects and angular momentum distribution

18 p2725 A72-36386

Multicolor photometry of the NGC 5194/5195 double system

19 p2858 A72-37812

Direction of trailing in spiral galaxies

19 p2863 A72-38067

The origin and form of the galactic magnetic field. II.

21 p3104 A72-40479

Gross properties of five Scd galaxies as determined from 21-centimeter observations.

21 p3105 A72-41027

Spiral and halo structure of our galaxy on the basis of optical distance determinations.

22 p3222 A72-42136

A photoelectric study of Messier 81.

22 p3229 A72-42975

Spiral galaxies radio sources spectral components, noting relativistic electrons radiation and luminosity-surface brightness diagram

23 p3333 A72-43232

SPIRALS
Narrow groove theory for spiral groove viscous pump gas bearings generalized to include rarefied gas and turbulence effects

02 p0234 A72-11531

SPIROMETERS
Respiration function testing device using spirometers and gas analyzers

09 p1272 A72-23256

A method for spirometric display of functional residual capacity and other lung volumes.

21 p3005 A72-40427

Radiorespirometry in the case of work and sports activities

22 p3149 A72-42071

SPLASH POINTS

U RECOVERY ZONES

U WATER LANDING

SPLREEN

Dipeptidyl aminopeptidase I preparation from beef spleen and rat liver, discussing contamination with catheptic carboxypeptidase C and Ser-Met dipeptidase

07 p0935 A72-18906

SPLINE FUNCTIONS

Engineering curves and surfaces representation by spline functions, discussing computerized approximation methods for algebraic, transcendental and transfer functions

07 p1024 A72-18777

Interpolation of function of two variables by surface splines method, solving linear equations system by digital computer

07 p1026 A72-19095

Real time recursive algorithms for estimating coefficients of fixed knot spline approximation to trajectory

08 p1197 A72-20849

Recursive and nonrecursive real time spline methods for nonlinear estimation of independent trajectory parameters for vehicle entering earth atmosphere

08 p1197 A72-20862

Increased accuracy cubic spline approximation to two-point boundary value problems for differential equation, noting truncation error

10 p1502 A72-23722

Computer programmed algorithm for conducting smooth piecewise polynomial third order approximation in spline function determination

13 p1986 A72-29065

Polynomial spline function for approximate solution of Cauchy problem for nonlinear differential equations of order n

14 p1216 A72-30716

Holographic strain analysis using spline functions.

19 p2797 A72-37611

Book - Functional analysis and approximation theory in numerical analysis.

20 p2946 A72-39729

Calculation of potential flow about aerofoils using approximation by splines.

22 p3135 A72-42844

Spline transformation of independent variable for free transverse vibration of elastic bars with piecewise constant rigidity, calculating resonant frequencies

23 p3348 A72-43793

Spline functions application to approximation theory problem of determining diameters of subspaces and manifolds in Banach space

24 p3419 A72-45548

SPLINES
Additional deformation work for splines forming in splined circular profiles pressing, deriving characteristic displacement velocity distribution equations

13 p1963 A72-28744

SPLIT FLAPS
Three dimensional wind tunnel investigation of vortex augmented unswept wing with leading edge cusp flap and split upper and lower trailing edge flaps

11 p1568 A72-25584

SPLITS (GEOLOGY)
U GEOLOGICAL FAULTS

SPLITTING
Electric field induced splitting of drift shells composed of trapped particles, taking into account non-dipole field components to lowest order

01 p0062 A72-10905

SPOILERS
Aircraft flight characteristics for landing approach by spoiler-elevator deflection coupling, considering pitch, flight path angle and speed

16 p2343 A72-33423

Jaguar powered flight controls, discussing wing spoilers, slab tailplane, rudder, autostabilization system and integrated packaging of actuators

16 p2353 A72-34144

SPONTANEOUS COMBUSTION
Gaseous diethyl peroxide spontaneous ignition during decomposition in cylindrical vessel, investigating diluents and temperature effects on self heating

02 p3010 A72-12027

Thermal theory of criticality for spontaneous explosion of exothermic reactant mass in bodies of arbitrary shape

03 p0457 A72-13972

Self ignition in hydrogen oxidation kinetics, considering convection, molecular diffusion, mixing and pressure

05 p0625 A72-17212

Turbulent hot gas stream self ignition in oxidizers flow for hydrogen-air and gasoline-air mixtures

14 p2170 A72-30294

Composite and double base solid propellant rocket motors storage, considering ingredients and materials compatibility and ignition temperatures effects on spontaneous inflammation potential

14 p2144 A72-30761

Self-ignited impulsive optical discharge in a laser erosion plasma

23 p3295 A72-43308

SPONTANEOUS EMISSION
Current dependent intensity of spontaneous emission of GaAs injection laser operated at 300 K

02 p0238 A72-12204

Pulsed Ar ion laser quantitative level population mechanism in gas discharges, discussing radiation trapping effects on 4s doublet based on spontaneous emission line data

04 p0529 A72-14602

Neon lower laser level spontaneous emission doublet resonance phenomena, discussing depopulation rates and resonance line profile changes

04 p0531 A72-15138

Spontaneous emission from driven Doppler broadened gas of two level atoms radiating into free space, predicting power spectrum

07 p0940 A72-19194

Temperature dependence of internal quantum efficiency of spontaneous emission as function of beam voltage in electron beam excited p-type GaAs

10 p1526 A72-24559

Instantaneous and averaged emission spectra of injection laser under spontaneous pulsation as function of operation mode and photon distribution

12 p1824 A72-27879

Spectral line profile of optical transition spontaneous radiation during resonance with strong field on adjacent transition

14 p2110 A72-30781

High gain laser amplifier spectral linewidth dependence on external signal or spontaneous emission source, noting saturation role and relevance to interstellar medium radiation

16 p2453 A72-33166

Active medium spontaneous radiation level effect on traveling wave amplifier gain factor, supporting theoretical results by experiments with superluminescent Ne-He active medium

16 p2400 A72-33277

Instantaneous and averaged spiking emission spectra of injection laser under spontaneous pulsation as function of oscillation mode and photon distribution

16 p2404 A72-33984

Behavior of spontaneous emission across threshold in GaAs junction lasers.

19 p2811 A72-37865

Reduction in the rate of increase of spontaneous emission from double-heterostructure injection lasers at threshold.

19 p2811 A72-37866

Spontaneous emission of plasma waves in the presence of a finite amplitude wave.

21 p3093 A72-41494

Effect of increasing beam voltage on the internal quantum efficiency of spontaneous emission in electron-beam-excited p-type GaAs.

22 p3185 A72-42308

Group theory for spontaneous coherent radiation of multilevel sources, noting angular distribution of photon echo effects

23 p3295 A72-43306

Experimental studies of injection lasers - Spontaneous spectrum at room temperature.

24 p3409 A72-44713

PONTANEOUS IGNITION TEMPERATURE

U IGNITION TEMPERATURE

U SPONTANEOUS COMBUSTION

SPORADIC E LAYER

Skyark rocket observations of sporadic E layer magnetic fields, winds and ionization indicating ion divergence region

01 p0052 A72-10086

Sporadic E layer reflection behavior measurements from two closely located stations, deriving drift direction and critical frequencies daily variation

01 p0055 A72-10431

Daily, annual and long term ionosscatter and sporadic E variations above Europe, using hf propagation measurements

01 p0055 A72-10432

Sporadic E layer occurrence frequency distribution during 1958-1960, investigating characteristics over equatorial, temperate and auroral zones

01 p0059 A72-10596

Middle geographic latitude sporadic E-layer initial height variations during 1957-1968 solar cycle

01 p0064 A72-11103

Sporadic E layer motion and spreading under constant horizontal wind action, estimating lifetime

02 p0218 A72-11942

Sporadic E layer shielding frequency correlation to limiting reflection frequency calculated by diurnal data from nine ground stations

02 p0221 A72-12522

Shielding and semitransparent sporadic E layer fine structure characteristics from summer observations data analysis

02 p0222 A72-12523

Reflection and transmission coefficients for radio waves incident upon thin highly ionized layers, comparing with sporadic E reflections

03 p0344 A72-12976

Sporadic E disappearance due to temporary reversal of equatorial electrojet current, observing horizontal geomagnetic field component

03 p0345 A72-12999

Solar X-ray control of E and sporadic E layers during November 1966-July 1968, discussing blanketing frequency

03 p0413 A72-13535

F 2 layer anomalies association with equatorial electrojet, investigating midday critical frequencies of sporadic E layer

04 p0515 A72-14932

Daytime ionogram corrections for underlying ionization in absence of X-trace of sporadic E layer

05 p0657 A72-16265

Geomagnetic pulsations correlation with h type ionospheric sporadic echoes, considering effects on electromagnetic disturbances transmission

05 p0659 A72-16725

Vhf waves transhorizontal propagation and day types correlation with sporadic E ionospheric layers in temperate zone, discussing wind shear theories

05 p0659 A72-16782

Rocket-borne vector magnetometer measurements of midlatitude ionospheric currents near sporadic E, noting nearly uniform vertical distribution

06 p0804 A72-17459

Sporadic E ionization during 1955 partial solar eclipse, considering gravity waves effect due to fast moving shadow region cooling spot

06 p0805 A72-17466

Geophysical aspects of ionospheric scintillation problems, considering correlation with spread F and sporadic E

06 p0889 A72-18282

Metallic ion convergent flow role in sporadic E layer formation in auroral and equatorial ionosphere

06 p0810 A72-18730

PE sub s harmonic components diurnal and seasonal variations and latitudinal dependence, investigating relationship to drift velocity in E region

06 p0811 A72-18749

Unified coordinate system for earth planetary distribution of F2 and sporadic E layer transmission parameters, suggesting geomagnetic longitude and modified magnetic inclination

08 p1153 A72-20726

Polar latitude sporadic E layer diurnal variations with appearance dependence on cutoff frequency

08 p1130 A72-20727

Radar verification of sporadic E layer formation from meteoritic atoms and ions production by meteoritic ablation

08 p1154 A72-20728

Errors in ionospheric sounding of sporadic E layers with auroral presence, discussing continuous reflections duration distribution

08 p1155 A72-20817

Seasonal variation in ionospheric horizontal drift velocities under normal E and sporadic E conditions for middle latitudes

08 p1157 A72-21115

Fading method measurement of normal and sporadic E region drift, reviewing height gradient data

08 p1161 A72-21539

Wind shear theory of midlatitude sporadic E formation, using wind profiles from artificial luminous cloud observations

08 p1161 A72-21540

Sporadic E layer critical frequency relationship to ionospheric wind direction for midlatitudes in summer period

10 p1472 A72-24079

Equatorial sporadic E sudden disappearance associated with magnetic field depressions, noting irregularities and electron velocities role

10 p1475 A72-24956

Temperate latitude sporadic E cause and structure - Conference, Utah State University, Logan, September 1971

10 p1477 A72-25151

Sporadic E layer variations monitoring in 50 MHz band, examining diurnal, seasonal, magnetic and meteoroid showers relationships of oblique incidence paths

10 p1441 A72-25152

Sporadic E layer structure model from radiosonde observation, noting peak plasma frequency variation and total reflection by blobs

10 p1441 A72-25153

Simultaneous rocket observation of wind shear and electron density profile in lower ionosphere, noting sporadic E layer formation

10 p1477 A72-25154

Wind shear theory expectations tested by wind profiles and sporadic E layer observations, stressing time variations significance

10 p1477 A72-25155

Midlatitude sporadic E layer observed by rocket and radio sounding, deriving plasma frequency from peak electron density

10 p1477 A72-25156

Wind shear and midlatitude sporadic E layer theories, discussing metal ions production and loss

10 p1477 A72-25158

Metal ion sheaths in midlatitude sporadic E layer caused by vertical redistribution of neutral ionization, discussing wind shear discontinuities

10 p1477 A72-25159

Temporal variations of sporadic E layer blanketing frequency, virtual height and occurrence rate, calculating electron density profiles and tidal wind influence

10 p1441 A72-25162

Sporadic E layer altitude and density variations caused by lunar influences, using model for electrostatic field and wind shear effects

10 p1478 A72-25163

Small scale sporadic E layer explained by means of cross field instability, proposing numerical solution based on realistic three dimensional perturbation

10 p1478 A72-25164

Electron density maxima position relationship to wind profiles in sporadic E layer with electric fields and vertical ion motion

10 p1530 A72-25165

Sporadic E layer cyclic variations during solar activity cycle, noting time dependence of occurrence probability and critical frequency

11 p1623 A72-26281

Single pulse radio echo fading dependence on sporadic E layer critical and screening frequencies

11 p1595 A72-26282

Sporadic E layer structure and dynamics diurnal and seasonal variations from ionosondes frequency and drift measurements

12 p1804 A72-27781

Sporadic E layer frequency variations from space-diversity sounding data from three ionospheric stations

13 p1946 A72-28599

Sporadic E layer motion and spreading under constant horizontal wind action, estimating lifetime

13 p1949 A72-29254

Diurnal and seasonal variations of ionospheric absorption in D and E regions, discussing blanketing sporadic E presence effect

13 p1922 A72-29392

Midlatitude sporadic E layer formation under wind shear action from artificial cloud data on lower thermosphere wind speed and direction

13 p1951 A72-29589

Auroral sporadic E layer diurnal distribution correlation to charged particle integral flux diurnal variations observed by satellite in winter, noting Kp index effect

14 p2102 A72-30655

Atmospheric gravity waves effects in ionosphere, discussing F region traveling ionospheric disturbances, sporadic E layer and D region radar scattering

15 p2222 A72-31285

Midlatitude nighttime sporadic E layer relationship to geomagnetic field, considering wind shear theory

15 p2224 A72-31798

Blanketing sporadic E layer latitude seasonal variations near geographic equator, noting spread F occurrence and solar cycle effects

15 p2231 A72-32265

Tropical sporadic E reflections and vertical plasma instabilities as function of equatorial electrojet and electron drift ratio based on ionogram observations

16 p2382 A72-32867

Height of the region of principal auroral radio-wave absorption in the presence of a sporadic E layer

17 p2519 A72-33869

Dependence of sporadic ionization in the high-latitude ionospheric E-region on magnetic activity

18 p2688 A72-36860

Unified coordinate system for global distribution of F 2 and sporadic E layer transmission parameters, suggesting geomagnetic longitude and modified magnetic inclination

19 p2791 A72-38354

Polar latitude sporadic E layer diurnal variations with appearance dependence on cut-off frequency

19 p2766 A72-38355

Radar verification of sporadic E layer formation from meteoritic atoms and ions produced by meteoroid ablation

19 p2791 A72-38356

The interpretation of ionospheric radio drift measurements. V - Demonstration of the point effect in time-averaged correlations and drift calculations.

19 p2794 A72-38862

Very-high-frequency wave propagation by the temperate-latitude sporadic-E layer.

22 p3154 A72-42367

Metal ions effect on sporadic E layer formation, noting magnesium ions profile redistribution by vertical gradient in neutral particles wind

23 p3284 A72-43376

Sporadic E layer frequency variations from space-diversity sounding data from three ionospheric stations

24 p3398 A72-45099

SPORADIC METEORIODS

Sporadic meteor orbital parameters measurement by continuous radar, determining out-of-atmosphere rate

02 p0283 A72-12524

Ejected lunar particles in meteoric sporadic background, noting brightness relation to yearly particle concentration

19 p2864 A72-38324

SPORES

Spore survival in dry heat sterilization as function of water activity, indicating entropy-molecular stability relationship

04 p0475 A72-15259

Dry heat resistance of bacillus spores on spacecraft metal surfaces for different pressures, atmospheres and materials

04 p0475 A72-15261

Aliphatic hydrocarbons in phytopathogenic fungi spores, discussing similarity to higher plant alkanes, functional roles and species distribution and occurrence

13 p1906 A72-29834

Aqueous formaldehyde effects on Bacillus subtilis spores, showing sporostasis due to germination inhibition and sporocide due to temperature dependent inactivation

16 p2357 A72-33772

Probability for spore sterilization by aerodynamic heating, considering straight line and decaying circular orbital Mars entry trajectories

16 p2461 A72-34165

The effects of various cure cycles upon the viability of *Bacillus subtilis* var. *niger* spores within solid propellant.

18 p2652 A72-36437

A re-evaluation of material effects on microbial release from solids.

23 p3253 A72-43383

SPOT WELDS

Electron beam welding with filler metal, describing spot and butt welding applications

06 p0819 A72-17498

Spot and seam welding of Cr ferritic stainless steel thin sheets, discussing electric current loading in relation to sheet thickness and contact pressure

07 p0995 A72-19575

Metal inert gas (MIG) spot welding process effects on weld dimensions, shape and strength

09 p1320 A72-23630

Al alloy-graphite composites brazing and welding feasibility, tabulating spot welding parameters

11 p1641 A72-26491

Ultrasound reflection from molten core during spot welding of steel alloys as function of geometrical dimensions and configuration and transition zone dimensions

13 p1965 A72-29152

High speed photographic analysis of spot welding galvanized steel, observing three stage process

13 p1958 A72-29421

A preliminary investigation of joining methods for aluminum-graphite composites.

17 p2561 A72-35665

Combined spot weld-adhesive bonding to join sheet metal parts with applications to spacecraft and aircraft structures [SME PAPER AD 72-710]

18 p2695 A72-36526

SPRAY CHARACTERISTICS

Polydisperse spray device with controllable drop size distribution for two phase detonation research

04 p0509 A72-15486

In-line holography of reacting liquid sprays.

19 p2798 A72-37619

SPRAY NOZZLES

Method of calculating pneumatic spray nozzles

23 p3325 A72-44015

SPRAYED COATINGS

Plasma sprayed tungsten and zirconium dioxide coatings porosity on chromium bronze, Ti and Al alloys and steel

03 p0363 A72-13550

Sprayed single component ceramic coating thermal stability enhancement techniques, noting limitations

05 p0680 A72-16093

Composite plasma sprayed coatings of Cu, Ni and boron nitride, noting antifriction and wear characteristics

06 p0822 A72-18429

Plasma spraying process effects on carbon steel coatings structure and bonding, considering optimal parameters, properties control and phase transformations

07 p0996 A72-19966

Plasma coating formation mechanisms and parameters, studying metal surface and deposited particles temperatures, spraying time effects, etc

10 p1487 A72-24488

Ultrasonic device with magnetostriction vibrator for suspension coating oxide cathodes, noting superiority to spray coating by compressed air

16 p2374 A72-33969

Variables influencing the characteristics of plasma-sprayed coatings.

17 p2561 A72-35920

SPRAYED PROTECTIVE COATINGS

U PROTECTIVE COATINGS

U SPRAYED COATINGS

SPREAD F

Spread F effects on transequatorial ionospheric short wave oblique incidence path great circle deviations

01 p0056 A72-10438

Positive Fe ion concentration relationship to equatorial spread F fromOGO 6 satellite observation near magnetic equator

01 p0062 A72-10902

Ionospheric spread-F mechanism as electromagnetic wave scattering on electron density inhomogeneities, calculating characteristic dependence of height interval on operational frequency

02 p0216 A72-11920

Supermode F range spreading and evening type transequatorial propagation, considering single scattering in east-west plane

03 p0321 A72-12994

Geophysical aspects of ionospheric scintillation problems, considering correlation with spread F and sporadic E

06 p0889 A72-18282

Turbulent LF electric field fluctuations relationship with disturbed F region, spread F and scintillations of radio stars and satellites

09 p1300 A72-23025

Equatorial spread F spatial and temporal distribution from short wave side reflection observations along Lindau-Tsumeb transequatorial HF radio transmission path

12 p1803 A72-27778

Ionospheric spread-F mechanism as electromagnetic wave scattering on electron density inhomogeneities, calculating characteristic dependence of height interval on operational frequency

13 p1948 A72-29232

Range and frequency spread F diurnal and seasonal variations at magnetic equatorial station Thumba, noting geomagnetic activity effect

14 p2097 A72-30130

Spread F association with ionospheric tilts due to total electron content drift, using incoherent scatter radar

15 p2230 A72-32261

Blanketing sporadic E layer latitude seasonal variations near geographic equator, noting spread F occurrence and solar cycle effects

15 p2231 A72-32265

Ground recorded Pc 1 micropulsations occurrence frequency relationship to ionospheric spread F based on long term ionosonde recordings

18 p2685 A72-35987

F 2 layer spread reflections and critical frequencies increase on ionogram recordings during Northern Hemisphere nighttime magnetic storm of 2 December 1967, noting cosmic radio emission decrease

19 p2791 A72-38366

Radar observations of equatorial spread F in a region of electrostatic turbulence.

23 p3286 A72-44528

Equatorial spread F - Recent observations and a new interpretation.

23 p3286 A72-44530

SPREAD REFLECTION

U DIFFUSE RADIATION

SPRINGS [ELASTIC]

Energy-phase time transformations of damped Liapunov system applied to nonlinear spring pendulum and betatron transient oscillations

01 p1013 A72-11387

Springs fracture and vibration in injection pumps by analog model

02 p0236 A72-12437

Impact dampers with spring connection of masses, analyzing periodic motion

02 p0298 A72-12617

Mean-square approximate estimator for standard deviation of natural frequency of two degrees of freedom spring systems, comparing with Monte Carlo simulation

[ASME PAPER 71-WA/APM-7] 05 p0734 A72-15971

Infinitely long Euler-Bernoulli damped periodic aluminum beam with elastic springs, determining distance for steady state sinusoidal response to spatial decay

05 p0736 A72-16111

Damping of lateral oscillatory processes by end terminal displacement compensation, noting spring energy

05 p0691 A72-17132

Impact interaction between free two body system with elastic spring coupling and fixed plane, considering mass ratio and velocity restitution coefficient

08 p1209 A72-21803

Thin walled Bourdon tube manometric spring deformation analysis by Ritz method in second approximation

09 p1397 A72-22349

Mechanical system with inertial vibration sensor and nonlinear spring, obtaining global asymptotic stability of zero solution of differential equations describing natural vibration

09 p1399 A72-22697

Single degree of freedom systems with nonlinear spring characteristics of skew symmetric form, discussing 1/2 subharmonic oscillation analysis by harmonic balance method

09 p1342 A72-23455

Nonlinear elastic suspension system with two springs in parallel, measuring nondimensional load versus deflection curve and frequency response

11 p1736 A72-26007

Coupled nonlinear equations of motion of large deflections of impacted helical springs, comparing with streak photographs

11 p1688 A72-26061

Static deflection effect on nonlinear spring mass system step function response, considering approximate calculation of oscillation period

11 p1688 A72-26372

Natural vibration modes of coupled spring-mass nonlinear system with two degrees of freedom from stability analysis

12 p1844 A72-27245

Heat generation in oscillating torsional spring modeled by viscoelastic hollow cylinder subjected to sinusoidal shear stresses, calculating stress and temperature distribution and displacement

17 p2635 A72-34232

Contractile and muscle-like fibers and autopolusation systems for polymer engine and spring action studies

19 p2760 A72-38200

Electric relay spring design for miniaturization, deriving relation between length and thickness to minimize fiber stress under constant contacting force

19 p2775 A72-3861

Mechanical properties of heat and corrosion resistant nonmagnetic Ni-Cr-Nb spring alloys with W addition tested in aggressive and nitric acid base media

23 p3300 A72-43595

SPUR [REACTORS]

U SPACE POWER UNIT REACTORS

SPUTNIK 1 SATELLITE

Soviet space program review from Sputnik 1 launch, discussing launch sites and vehicles, lunar, planetary and manned missions, civil and military programs and future goals

05 p0722 A72-17091

SPUTNIK 3 SATELLITE

Upper atmosphere density measurement techniques used by Sputnik 3 and San Marco 1 and 2 satellites

12 p1802 A72-27683

SPUTTERING

Sputtered molybdenum disulfide film lubrication, discussing adherence to metal surfaces, particle size, friction experiments and tensile tests

02 p0236 A72-12848

Sputtering sources fabrication by plasma spraying for nitride films deposition with Ta-Hf mixtures

04 p0527 A72-15494

Ni-Cr thick films triode sputtering technique with temperature control by low-energy electron bombardment heating, presenting phase diagram

05 p0675 A72-16393

Thin film formation techniques including evaporation, sputtering, anodization, chemical vapor deposition, electrodeposition and sintering, discussing surface scattering, tunneling, Schottky emission and conduction mechanisms

06 p0790 A72-1857

Sputtered molybdenum disulfide lubrication on polished metal surfaces with low friction coefficients, strong adherence, high density and small particle size

06 p0824 A72-18607

Lunar dust grain fossil coatings of ultrathin metamorphized amorphous layers resulting from solar wind ion implantation

08 p1230 A72-20982

A-15 superconducting films preparation cosputtering method, noting alloying effects and crystal structure stability determinations applications

09 p1368 A72-22554

Noncrystalline Ge film preparation by rf sputtering onto substrate with explosive crystallization triggered by localized transient energy pulse at room temperature

09 p1369 A72-22623

Differential sputtering yield of Ni-Cu alloy solid solution bombarded by Ar ions

10 p1495 A72-24057

Dc and RF sputter deposition in ionized inert gas of thin film coatings solid state microelectronics, solid lubricants and corrosion resistance applications

[ASME PAPER 72-DE-37] 14 p2108 A72-30871

X ray photoelectron spectroscopic measurements of Fe and Cu valence states produced by ion sputtering reduction, applying to multiplet splitting and isoelectronic shifts

16 p2389 A72-33026

Diffusion limitation avoidance at high current densities by fuel cell preparation via Pt thin film sputtering on porous vycor substrates

16 p2352 A72-33893

Thin films deposited by evaporation and sputtering - A comparative study

18 p2696 A72-36834

Effect of structural parameters and temperature on the effective thermal conductivity of plasma-sputtered aluminum oxide

18 p2696 A72-37188

Evidence of crystal structure in some sputtered MoS₂ films.

19 p2823 A72-37897

Physical and electrical properties of thin-film barium titanate prepared by RF sputtering on silicon substrates.

22 p3215 A72-42999

SQUALL LINES

U SQUALLS

SQUALLS

Morning glory, showing squall formation by atmospheric hydrologic jump favored by slack pressure gradients, cloudless skies and low latitudes

11 p1681 A72-26080

SQUARE WAVES

Square wave source gated detector bridge for precise resistance measurement, discussing design and performance, and application in Pt resistance thermometry

06 p0785 A72-18244

Frequency measurements of square wave signal with unknown amplitude by two mismatched channels, comparing rms error with effective estimate variance

10 p1436 A72-24509

Solid state ac square law function generator based on fixed elements and operating on electrical servo system principle

13 p1933 A72-29973

A simple reference generator for lock-in amplifiers.

21 p3025 A72-40206

Shaping circuit for complex RF pulse consisting of simultaneous equallength square pulses with different frequencies, discussing carrier frequencies selection

21 p3022 A72-41118

Parabolic approximation of spatially bounded square and Lorentz two dimensional light pulse propagation in homogeneous isotropic linear medium without dispersion

23 p3313 A72-43682

QUARES [MATHEMATICS]

Laplace equation under Robbin boundary conditions over unit square, discussing numerical solution by difference approximation and iterative procedure

05 p0682 A72-16100

NT ROLLING MOMENTS

NT YAWING MOMENTS

Hypersonic vehicles lateral dynamics during great circle flight, using linearized equations of motion and Newtonian theory for stability derivatives estimation

08 p1110 A72-21603

Aerodynamic force and moment measurements on model in magnetic wind tunnel balance system, using field equations

10 p1461 A72-24765

STABILITY TESTS

NT FLIGHT STABILITY TESTS

NT WIND TUNNEL STABILITY TESTS

Contact surface turbulent mixing instability in free piston high enthalpy shock tunnel waves with test air and argon gases

05 p0644 A72-16548

Aerospace explosive components accelerated storage life and stability tests, basing method on Arrhenius reaction rate equation modification

08 p1220 A72-20762

Liquid nitrate ester sensitivity and dissolved water desensitization, using thermal initiation and drop weight impact tests

09 p1373 A72-23145

Plastic model shells design, construction and instrumentation for elastic stability studies in NDT, discussing deformation measurements for critical condition prediction

22 p3163 A72-42694

Nonlinear nonautonomous dynamic systems practical stability conditions for specified settling time, verifying constant matrix Hurwitz property

23 p3309 A72-43858

STABILIZATION

NT SIGNAL STABILIZATION

NT SPIN STABILIZATION

Austenite stabilization in maraging steel by cumulative heat cycling, using dilatometric and X ray analysis techniques

07 p0998 A72-20483

Control system for stabilization of liquid propellant rockets Pogo oscillations, discussing structure, fuel tank and feed system, combustion chamber, control gain and accelerometer installations

10 p1551 A72-24027

Ionic and hydrophobic interactions effects on Micrococcus lysodeikticus membrane stabilization process

14 p2075 A72-30595

Discharge stabilization in closed cycle carbon dioxide electric discharge convection lasers by aerodynamic, RF power and tandem techniques

[AIAA PAPER 72-723]

16 p2404 A72-34026

Stabilizing techniques for holographic recording.

17 p2556 A72-35416

Problems and solutions related to the design of a control augmentation system for a longitudinally unstable supersonic transport.

[AIAA PAPER 72-871]

20 p2887 A72-39128

STABILIZED PLATFORMS

Differential equations of motion for stable member of three-axis gyro stabilized platform

03 p0387 A72-14190

Equations of motion for stable member of three axis gyro stabilized platform for inertial navigation, including friction, inertia and torque motor effects

05 p0662 A72-16557

Inertial navigation system accelerometer error autocompensation, using reversal by accelerator forced rotation in stabilized platform plane

05 p0664 A72-17148

Three component airborne magnetometer design, discussing direction reference system and stabilized platform

06 p0812 A72-17372

ATS F and G satellites with 30 foot deployable antennas as three axis stabilized platforms in geostationary orbit with high pointing accuracy

07 p1085 A72-19275

Nonlinear controls for single axis gyro platforms, using time optimal Luenberger observers

07 p0989 A72-20278

Optimal alignment and calibration of gyrostabilized platforms, using Kalman filter and minimal weighted squared errors

07 p0989 A72-20280

Attitude reference platforms in ASTRID and DACHS control systems for high altitude research rockets

07 p0990 A72-20283

German monograph on inertial platform stabilization by optical sensors for space vehicle guidance covering aircraft position determination

09 p1394 A72-22334

Tethered autostabilized rotor platform for military surveillance, target location and communication, discussing flight vehicle, tethering cable, ground station and guidance-control system

13 p1898 A72-30078

Stable microprecision test platforms construction and microseismic effects on motion sensing instrument calibration including gyroscopes and inertial navigation and guidance systems

[AIAA PAPER 72-893]

20 p2911 A72-39110

Black Arrow satellite launch vehicle attitude control as part of inertial guidance system, describing four-gimbal gyroscopically stabilized platform and associated electronics

21 p3115 A72-40121

STACKING FAULT ENERGY

Vertical flight direction determination by gyrostabilizers with integral compensation, noting variable platform orientation and vibration damping correction

21 p3059 A72-41812

Method of equivalent turns in the kinematics of inertial systems

23 p3311 A72-43583

Kalman filter design considerations for space-stable inertial navigation systems.

24 p3421 A72-44640

STABILIZERS [AGENTS]

Effective stabilizer content measurement in smokeless powder propellants, discussing nitrogen dioxide generation by cellulose nitrate and glycerin trinitrate decomposition

14 p2144 A72-30755

STABILIZERS [FLUID DYNAMICS]

NT HORIZONTAL TAIL SURFACES

Parachute designs and applications to escape systems, paratrooping, supply dropping, aircraft braking, weapons systems stabilization, flight testing aids and sport

01 p0003 A72-10302

Development of an inflatable fabric structure for the early stabilization of the B-1 crew escape capsule.

[AIAA PAPER 72-801]

20 p2888 A72-40053

Flight test investigation of the aerodynamic behavior of various-sized stabilizers on a small helicopter.

24 p3362 A72-45328

STABLE OSCILLATIONS

Integrated PFM feedback control system, investigating stable periodic oscillation based on nonlinear discrete equivalence

04 p0506 A72-15114

Third order nonlinear van der Pol oscillating systems, discussing digital computer verification for existence of stable limit cycles in state space trajectory plots

05 p0639 A72-15806

Higher order nonlinear autonomous oscillation system limit cycle and stability determination by numerical solution based on Andronov point transformation and Liapunov theory

06 p0838 A72-17377

Microwave parametric amplification and conversion in circuits with Josephson junctions, describing stable oscillation measurements

06 p0866 A72-18477

Bistable hydraulic servomechanisms limit cycle stable oscillations from bang-bang control and cavitation effects, discussing valve driving gear hysteresis and time lag

08 p1113 A72-22155

Oscillation development time in phantastron oscillator, using linearization of nonlinear term

10 p1450 A72-24517

Steady state combination oscillations stability, examining geometrical properties of amplitude surfaces

14 p2133 A72-31128

Stochastic atmospheric density fluctuations effect on circular-orbiting satellite roll-yaw oscillations stability

15 p2319 A72-31457

Lasing kinetics in coupled lasers pair, noting generation of steady state oscillations without relaxation

15 p2252 A72-32696

Frequency/temperature characteristics of Gunn devices.

18 p2667 A72-36684

Nonsymmetric oscillations in certain symmetric nonautonomous systems

19 p2777 A72-37436

STACKING FAULT ENERGY

Hexagonal close packed Ti-Al alloys, determining stacking fault probability with X ray powder diffraction line profiles and Fourier analysis

01 p0087 A72-11029

Rolled metals and alloys with various lattice types and packing defect energies, showing elastic properties isotropy and Young modulus anisotropy

03 p0371 A72-13188

Dislocation substructure in fatigued Al and Ni polycrystals surface layer and interior due to high and low stress cycling, discussing stacking fault energy influence

04 p0534 A72-15577

Dislocation splitting and stacking fault energy variation during plastic deformation of TaC at 2200 C, using bending tests and microscope observations

[ONERA, TP NO. 1005]

05 p0670 A72-15861

Thermodynamic estimation of transition metal stacking fault energy, discussing relation to lattice stability and structural changes

05 p0679 A72-17149

FET devices stacking faults induced leakage currents, pinpointing critical processing steps by diagnostic X ray charts

06 p0782 A72-17364

Martensitic transformations induced by plastic deformation in Fe-Ni-Cr-C system, noting stacking fault energy dependence on temperature

07 p1015 A72-19928

Three and four layer vacancy defects annealing in quenched Al for stacking fault removal

07 p1020 A72-20412

Impurities effects on stress corrosion and work hardening induced dislocation structures in stainless steels, considering stacking fault energy relationship

10 p1496 A72-24231

High temperature steady state tensile creep behavior of Ni-W solid solutions, showing creep rate relation to stress and stacking fault energy

13 p1975 A72-28668

Al and AlMg single crystals static recovery and stacking fault energy at 77-500 K in plastic deformation, noting cross slip onset at 500 K

13 p1978 A72-29222

Chemical interaction within crystals for generation of stacking fault vacancies and phenomena associated with solid solution microheterogeneity dislocations, discussing heat resistance

15 p2254 A72-31558

Alloying effects on high temperature softening due to crystal lattice, stacking fault energy and decreased mobility interactions

15 p2254 A72-31564

High-temperature resistant cobalt alloys

17 p2567 A72-35173

Measurement of the stacking-fault energy of gold using the weak-beam technique of electron microscopy

22 p3177 A72-42320

A study of cold-worked titanium-aluminum alloys by X-ray diffraction

24 p3413 A72-44720

The creep of dispersion-strengthened Ni-Co alloys

24 p3413 A72-44923

Measurement of stacking fault energy in CrMnNiN austenitic steel by the method of extended nodes

24 p3415 A72-45397

STACKING FAULTS

U CRYSTAL DEFECTS

STACKS

Mica polymorph distribution among space groups from unit layer and stacking sequence characteristics

12 p1802 A72-27512

Mass spectrometer sampling system for measuring effluent concentrations downwind of stacks at various positions in turbulent flow within atmospheric simulation facility

[AIAA PAPER 72-649]

17 p2536 A72-35478

STAGE SEPARATION

Altitude chamber simulation of reentry bodies separation from ballistic missiles, examining body shape, nozzle dimensions, gas pressure and distance effects

[ONERA, TP NO. 1029]

05 p0645 A72-17198

Detonating cut-off pyrotechnic chain of explosive devices for stage separation involving primers, relays and fuses

08 p1221 A72-20777

Plume impingement force during tandem stage separation at high altitudes

22 p3231 A72-42872

Dynamic behavior of M-4S rocket devices for strap-on booster separation and nose cone and flare deployment

22 p3232 A72-43143

Extending the utility of the Space Shuttle as a space rescue vehicle

24 p3449 A72-45130

STAGGERING

M-type amplifier operation with two electron beams and staggered dual section cathode

02 p0190 A72-11570

Equivalent-damping and generalized-stagger distributions in single-circuit stagger-stage IF amplifiers at critical staggering

20 p2906 A72-38894

Allowance for transistor parameter dispersion in transistor IF amplifier designs with staggered-cascade pairs

20 p2906 A72-38895

STAGING (ROCKETS)

U STAGE SEPARATION

STAGNATION

U STAGNATION POINT

STAGNATION FLOW

Flowing plasma ionization density measurement by stagnation probe, comparing measured with calculated plasma sheath convection current values

[AD-738692]

01 p0110 A72-11189

Premixed combustible system in laminar axisymmetric stagnation flow, considering steady state and transient response of state variables, blow off extinction, ignition and heat flux

[AD-73387]

03 p0458 A72-14222

Combustion reactions of water catalyzed gas-phase oxidation of carbon monoxide in premixed stagnation flow at atmospheric pressure

[AD-743563]

03 p0459 A72-14223

Low Reynolds number nonequilibrium stagnation heat transfer with helium, argon and hydrogen injection into air boundary and thin viscous shock layers

[ASME PAPER 71-WA/HT-19]

05 p0744 A72-15878

Surface pressure fluctuations near axisymmetric stagnation point in flow over simple impinged body, showing fluid strain suppression of turbulence

06 p0757 A72-18133

Stagnation conditions of magnetoradiative supersonic flow through shock waves for temperature-dependent specific heat parameter

08 p1255 A72-21795

Mathematical model for flow field inside raindrop under aerodynamic transient stresses before impingement at stagnation point of blunt body in supersonic flight

13 p1942 A72-29224

Thermodynamic properties of axisymmetric and planar stagnation flows of air with gas injection, taking into account mass transfer effects on heat transfer rate

16 p2477 A72-33428

Electron density measurements in bow shock stagnation and conical afterbody regions during blunt body atmospheric reentry, using flush mounted electrostatic probes

[AIAA PAPER 72-694]

16 p2345 A72-34047

Radiative and convective heat transfer for stagnation point flow of emitting carbon dioxide and nitrogen gas mixture, assuming thermodynamic equilibrium in shock layer

17 p2636 A72-34470

The boundary layer of higher order at the stagnation line of a yawed cylinder in the case of strong suction or injection

23 p3249 A72-44297

Effect of a flow with a stagnation point on the rate of variation of the total entropy of a fluid mixture

24 p3465 A72-45074

On the unsteady magnetohydrodynamic flow over yawed infinite cylinder

24 p3395 A72-45599

STAGNATION POINT

Two dimensional unsteady incompressible boundary layer near forward stagnation point of infinite plane wall with uniform suction or injection, obtaining iterative solution

01 p0050 A72-11106

Radiative heat transfer between gas flow and axisymmetric ablating body near stagnation point, considering ablation products effects under boundary layer chemical equilibrium conditions

02 p0300 A72-11577

Electron temperature profile across nonequilibrium stagnation point boundary layer in partially ionized gas, investigating charged particles interaction with body in ionosphere

02 p0262 A72-12268

Gas flow fluctuations near stagnation point on hot wall, taking into account laminar boundary layer compressibility effects

[ASME PAPER 71-APM-RR]

04 p0462 A72-15178

Nonequilibrium stagnation heat transfer mathematical models for injecting He, Ar or H into ionizing air laminar viscous layers at low Reynolds numbers

[ASME PAPER 71-WA/HT-18]

05 p0744 A72-15877

Hypersonic axially symmetric laminar boundary layer electrically conducting fluid flow in blunt body stagnation region in presence of radial magnetic field

05 p0600 A72-16063

Inviscid variable density core flow in thin compressible boundary layer near stagnation point of smooth blunt body

05 p0601 A72-16216

Nonstationary oncoming flow temperature effect on heat transfer in thermal boundary layer at forward stagnation point

05 p0746 A72-16217

Hypersonic melting ablation waves simulation near stagnation region by frozen oil models

[AIAA PAPER 72-92]

05 p0750 A72-16977

Convergent power series solution in powers of time for unsteady viscous flow near stagnation after impulsive motion of bluff body from vorticity distribution viewpoint

06 p0757 A72-18135

Monatomic ionized radiating gas nonequilibrium flow in blunt body stagnation region behind shock wave during hypersonic atmospheric reentry

07 p0909 A72-20083

Free convection velocity fields measurements and stagnation point location around horizontal torus in air, using fine particle trajectories

[ASME PAPER 71-HT-X]

08 p1163 A72-20877

Boundary condition for plane or axisymmetric stagnation point flow of micropolar fluid over flat plate, giving numerical solutions for turbulent characteristics

09 p1293 A72-22621

Aerodynamic field around singular stagnation point of blunt body tip with detached shock, using Legendre functions

09 p1261 A72-22932

Viscous boundary layer equations for MHD flow near rear stagnation point at small Reynolds number

09 p1296 A72-23674

Two dimensional unsteady stagnation point flow against plane wall with impulsive motion

10 p1470 A72-25040

Flow fields and inviscid core of two dimensional diffuser with fluid extraction on diverging walls, describing streamline patterns, stagnation region and stall conditions

[ASME PAPER 72-GT-2]

11 p1568 A72-25605

Three dimensional free convection boundary layer equations solution at two dimensional isothermal stagnation point with various Prandtl numbers

11 p1747 A72-26662

Cylindrical pitot tube displacement effects on stagnation point and static pressure angle in impeller nonuniform peripheral flow

14 p2094 A72-30720

Aerothermochemical analysis of thermosetting hydrocarbon plastic ablation rate under heat transfer at reentry vehicle hypersonic stagnation point, describing pyrolysis by chemical kinetic equation

15 p2335 A72-32149

Counterflow diffusion flame gas dynamic structure analysis in porous cylinder forward stagnation region, using surface and boundary layer approximations

15 p2336 A72-32310

Fast numerical solution for supersonic flow past flat-faced blunt body by integration from stagnation point, noting computing time on CDC 6600

16 p2341 A72-32840

Grid-generated turbulence distortion approaching two dimensional bluff body stagnation region

16 p2344 A72-33569

Blunt nose cone flow field characteristics microwave measurement at stagnation point during atmospheric reentry, using plasma diagnostic sensors with antennas and electrostatic probes

[AIAA PAPER 72-693]

16 p2345 A72-34049

Foreign gas injection into three-dimensional stagnation point flows

17 p2483 A72-34205

Liquid fuel droplet transient combustion in supercritical hot stagnant oxidizing environment, solving conservation equations

17 p2636 A72-34903

Influence of a trailing vortex on friction pulsations in the near-wall region of the leading stagnation point of a cylinder in transverse flow

19 p2786 A72-38041

Motion of particles injected from the surface into stagnation-point flow

20 p2913 A72-39611

Instability of hypersonic viscous shock layer with finite rate chemistry

20 p2886 A72-39631

Stagnation-point heat transfer - The effect of the first Damkohler similarity parameter

[ASME PAPER 72-HT-44]

20 p2985 A72-39668

Ablative nose shape change effects on re-entry vehicle aerodynamic performance

[AIAA PAPER 72-974]

22 p3230 A72-42337

Behavior of the lines of flow in the proximity of the stagnation points of blunt bodies

22 p3136 A72-42907

Second order boundary layer solutions on a curved surface

[ASME PAPER 72-FE-21]

23 p3280 A72-44063

A new concept for correcting the attenuation effects in a shock tube

24 p3388 A72-44985

STAGNATION PRESSURE

Cooled miniature pneumometric probes for high temperature gases dynamic or stagnation pressure and velocity measurement

01 p0072 A72-11213

Compressible gas subsonic or transonic flow in front of obstacle, determining stagnation pressure with thermal relaxation time by numerical and wind tunnel methods

02 p0151 A72-12097

Average stagnation pressure measurement in low velocity ducted gas flow with nonuniform velocity profiles, discussing mathematical technique and computer program

[ASME PAPER 71-WA/PUR-1]

05 p0645 A72-15910

Supersonic molecular jet improvement via expansion chamber residual gas pressure reduction and nozzle stagnation pressure increase

16 p2429 A72-33053

A new stagnation pressure probe having a high pressure recovery in supersonic flow

22 p3179 A72-42687

STAGNATION REGION

U STAGNATION POINT

STAGNATION TEMPERATURE

Nozzle boundary layer effects on reisojets performance, presenting conical design model in heated stagnation conditions

03 p0405 A72-12973

Local stagnation temperature measurement in supersonic flow, using hot-wire anemometer

03 p0309 A72-13789

Low pressure gas heating expediency for stagnation temperature increase in gas flow of shock tube

16 p2480 A72-34168

Fine wire thermocouple probes for stagnation temperature measurements in hypersonic mixing layers

[AIAA PAPER 72-1023]

21 p3057 A72-41601

STAINING
The distribution of the long wave photoreceptors in the compound eye of the honey bee as revealed by selective osmic staining. 17 p2500 A72-34877

STAINLESS STEELS
NT AUSTENITIC STAINLESS STEELS
NT FERRITIC STAINLESS STEELS
NT MARTENSITIC STAINLESS STEELS
High chromium ferritic stainless steels weldability and mechanical properties, showing C, N, Ti and residuals effects on recrystallization, toughness, tensile behavior and corrosion resistance
01 p0083 A72-10283
Nondestructive determination of temperature dependence of elastic moduli of Al alloy and Ni and stainless steels by resonant frequency method
01 p0084 A72-10518
Cryogenically formed prestressed stainless steel glass fiber reinforced vessels, demonstrating structural performance for space shuttle life support oxygen/nitrogen high pressure gas tanks
01 p0139 A72-10770
Porous stainless steels as filter medium, describing manufacturing techniques, properties and applications
02 p0233 A72-11449
Deformable stainless steels empirical diagram for structural state estimation from chemical composition, considering various austenite, martensite and ferrite combinations
02 p0243 A72-12241
Organophosphorus antiwear additives in neopentyl polyol ester lubricants on 440C stainless steel surfaces, using four ball wear test machine
[AD-740055] 02 p0250 A72-12849
Stainless steel electrodes resistive and capacitive properties in contact with saline solutions of various concentrations and over extensive frequency range and current densities
03 p0318 A72-12953
Corrosion resistance of stainless steels in acid solutions, describing electrochemical cell for recording potential/current density and polarization curves
04 p0533 A72-15236
Impact fatigue testing apparatus, presenting results for stainless steel
04 p0524 A72-15549
Wear, bending and corrosion resistance of stainless steels with Cr thermal vacuum diffused coating
04 p0535 A72-15661
Heat transfer for water at pressures near atmospheric in wicks formed of stainless steel screen layers, obtaining steady and maximum evaporation rates
[ASME PAPER 71-WA/HT-12] 05 p0744 A72-15872
Ar, Kr, methane and nitrogen physisorption isotherms on stainless steel in low pressure cryogenic baths calculating mean adsorption energies
05 p0624 A72-16395
Ferritic stainless steel roping /buckling/ morphology and texture explanation by anisotropic plastic flow
05 p0677 A72-17105
Stainless steels with improved formability developed through assessment of stress-strain curve slope and plastic strain ratio
07 p1011 A72-19477
Oxygen effect on structure and mechanical, technological and corrosive properties of stainless steel melted in open and vacuum furnaces
07 p1013 A72-19739
Carbide precipitation effect on strength of auroless hardenable hypoeutectoid and hypereutectoid stainless steels
07 p1016 A72-19943
Metallographic properties of vacuum brazed, heat treated and gas quenched Al alloys, low alloy steels and corrosion resistant steel alloys
07 p1017 A72-20001
Vacancy supersaturation effect on enhanced precipitation by high flux electron irradiation in stainless steel
07 p1033 A72-20410
Stainless steel saturation with Al and Cr, investigating structure, microhardness, linear expansion and contact surface seizure reduction
07 p1020 A72-20419
Explosive loading effect on Cr-Ni stainless steel structure with electron microscope study of gamma, alpha and epsilon phases
08 p1187 A72-21780
Oxygen jet-carbon dioxide laser beam cutting in mild and stainless steels, noting speed and material thickness limitations
09 p1321 A72-23639
Impurities effects on stress corrosion and work hardening induced dislocation structures in stainless steels, considering stacking fault energy relationship
10 p1496 A72-24231
Low temperature resistant stainless steels mechanical properties, microstructure and weldability, discussing compositions and heat treatments
10 p1498 A72-24838

Eddy current extensometer for monitoring long term creep in diameter of pressurized tubular stainless steel specimens
11 p1613 A72-25821
Metallographic examination of stainless steel specimens exposed to long term creep rupture tests, noting carbides precipitation and stress induced grain boundary migration
11 p1658 A72-25832
Deformable wrought stainless steels phase diagram for structural state estimation from chemical composition, considering various austenite, martensite and ferrite combinations
11 p1659 A72-26127
Filler wires development for inert gas welding of stainless maraging steel
11 p1660 A72-26488
Ferritic stainless weld metal ductility, investigating yield and fracture stresses after heat treatment
11 p1661 A72-26494
Stainless steels sensitivity to pitting corrosion under sulfides action, measuring rupture potential
11 p1661 A72-26648
Cyclic stress ratio effects on stainless steel fatigue crack propagation at 1000 F, using linear elastic fracture mechanics
12 p1829 A72-27663
High strength low alloy steel and stainless steel recrystallization after hot working at plastic deformation temperature
13 p1973 A72-28654
Precipitated carbide role in Cr-Ni stainless steels high temperature properties and creep rupture strength
13 p1979 A72-29447
Chromium stainless steel fatigue life reduction due to embrittlement in gaseous hydrogen atmosphere at room temperature, noting alleviating effect of atmosphere contaminants
13 p1979 A72-29484
Ni-Cr-Mo stainless maraging steel, investigating yield strength, toughness, corrosion resistance and weldability
14 p2113 A72-30270
Aluminum-stainless steel and Ni-Mo composites prepared by dynamic hot pressing, determining bond strength between fibers and reinforced metal matrix
14 p2107 A72-30431
Heat treatment hardening effect on stress corrosion resistance of ultrapure maraging and stainless steels, emphasizing hydrogen embrittlement
14 p2117 A72-30540
Accelerated intergranular corrosion and grain boundary precipitation mechanisms in stainless steel Fe-Ni-Cr alloy, using Huey, acid and Strauss tests
14 p2118 A72-30548
Low carbon and nitrogen concentrations in chromium ferritic stainless steel obtained with gas rinsing at reduced pressure, noting weldability and corrosion resistance
14 p2119 A72-30606
Stainless steel surface alloy composition characterization as function of vacuum annealing temperature, using proton-induced X rays
15 p2258 A72-32527
Mo and stainless Ni-Cr steel surfaces chemical composition determination by Auger electron spectroscopy during heating in high vacuum
16 p2406 A72-33251
Notch sensitivity of sintered stainless steel powder as function of density from application of sharp crack fracture mechanics methods to plane strain fracture toughness
16 p2408 A72-33700
Deformation substructures in stainless steels under low cycle high strain fatigue tests evaluation for application as fuel cladding for fast breeder reactors
16 p2411 A72-33825
Hot forging of sintered stainless steel.
19 p2815 A72-37592
Temperature effects on the strainrange partitioning approach for creep-fatigue analysis.
19 p2815 A72-37638
Hydrogen and nitrogen desorption phenomena associated with a stainless steel 304 low energy electron diffraction (LEED) and molecular beam assembly.
19 p2762 A72-38023
Fracture behavior of stainless steel fibers in Sn-Pb alloy matrix.
19 p2820 A72-38373
Stress dependent cyclic creep rupture tests of Ti and Co-base alloys and stainless steel at 1300 F
20 p2938 A72-39305
Stainless steels high temperature creep rupture strength relationship to carbide precipitation morphology
21 p3069 A72-41013
Fatigue properties of 18-8 stainless steel at cryogenic temperatures.
21 p3071 A72-41845
Magnetostriction of stainless steels as a function of heat treatment
23 p3300 A72-43596

Some preliminary observations on the extension of cracks under static loadings at elevated temperatures.
23 p3301 A72-43712
Materials creep behavior and elevated temperature design.
24 p3453 A72-44553
Fatigue-crack growth in 20% cold-worked Type 316 stainless steel at elevated temperatures.
24 p3435 A72-44555

STALL
U BOUNDARY LAYER SEPARATION
STALLING
Two dimensional airfoil unsteady stall in incompressible flow, comparing calculated loading during transient and sinusoidal pitching motions with measured values
[AIAA PAPER 72-37] 05 p0607 A72-16899

STAMPING
Axisymmetric contact problem for circular flat stamp on laminated half space, using matrix calculus and Hankel transforms
03 p0448 A72-13903
Variational solution to axisymmetric problem of rigid stamp quasi-static impression into elastoplastic half space
13 p2053 A72-28387
Wiener Hopf integral equation for problem of smooth stamp impression into elastic wedge face, solving by gamma and hypergeometric functions
13 p2059 A72-29500
Dynamic contact problems of stamps bands oscillation on elastic layer surface or cylinder, analyzing vibrationally induced elastic waves
14 p2163 A72-30223
Eigenfunction technique development to incorporate stress singularities at circumference of end planes into problem of solid cylinder compression between rough rigid stamps
17 p2633 A72-35403

STANDARD ATMOSPHERES
U REFERENCE ATMOSPHERES
STANDARD DEVIATION
Mean-square approximate estimator for standard deviation of natural frequency of two degrees of freedom spring systems, comparing with Monte Carlo simulation
[ASME PAPER 71-WA/APM-7] 05 p0734 A72-15971
System natural frequency standard deviation estimator, using Monte Carlo method
[ASME PAPER 71-WA/APM-8] 05 p0734 A72-15972
Vertical two-point longitudinal velocity differences or wind shear in atmospheric boundary layer, obtaining standard deviation from turbulence measurements
06 p0841 A72-17666
Standard deviation in ghost lines size due to random sampling position errors of monochromatic spectral line in Fourier transform spectroscopy
09 p1314 A72-23344
Spaceborne scatterometer measurement standard deviation derivation, noting integration time, signal bandwidth and SNR effects on accuracy
12 p1783 A72-27636
Aircraft pilot reaction capability for switch activation in response to voice countdown, tone initiation and termination, noting standard deviation
15 p2188 A72-31787

STANDARDIZATION
Aircraft high pressure oxygen cylinder system filler valve optimum standards, discussing automatic fill rate and pressure sensitive closing control, design, construction and performance
[SAE AS 1225] 01 p0006 A72-10385
International standardization of manned spacecraft components for rescue efforts and joint multination space missions
09 p1395 A72-23154
Sleep disturbance due to sonic booms, discussing laboratory findings and experimental techniques standardization
09 p1273 A72-23319
Vacuum gage calibration standardization by piston manometer method of pressure determination from direct force-area measurement
12 p1805 A72-27037
Aeronautical navigation/guidance standardization in conjunction with OMEGA, covering sensor and computer equipment life cycles
13 p1999 A72-29199
Electric power supply systems for satellites, discussing packaging standardization of electronic circuits modules
13 p1900 A72-30096
Standardization of microwave irradiation experiments on animals, discussing power density level evaluations and local vs whole-body irradiation effects
14 p2080 A72-30746
Standardization of positive directions for parameters in materials strength theory, noting systems of coordinates, moments, forces, angles and stresses
15 p2325 A72-31502
Spectrophotometers and photometers calibration and standardization, emphasizing necessity for periodic control of instrument parameters
16 p2394 A72-33872

- Airborne equipment electric power supply standards to provide characteristics limits for compatibility with ground support systems
[SAE AS 1212] 18 p2648 A72-36535
- Standardization and reliability assurance on the national and European levels
18 p2743 A72-37128
- Standardization and quality assurance of electronic devices on the national and European levels
18 p2743 A72-37129
- Standardized programming routine operations independent of problem and language for controlling computer program design, discussing advantages and applications
23 p3267 A72-43991
- STANDARDS**
- NT FREQUENCY STANDARDS**
- NT REFERENCE ATMOSPHERES**
- Aerospace wire and cables testing methods standards for evaluating mechanical, electrical and chemical properties, coating thicknesses, continuity flaws, flammability, geometrical characteristics, etc
[SAE AS 1198] 01 p0006 A72-10384
- Pressure altimeter system minimum safe performance standards for subsonic aircraft operation, describing test procedures
[SAE AS 942] 01 p0064 A72-10386
- Telemetry standards for transmitting, receiving and signal processing equipment at missile test ranges
02 p0176 A72-12164
- Bayard-Albert ionization vacuum meter use as primary standard, investigating ion orbiting and collecting processes
03 p0361 A72-13880
- Ac and dc electric power transient test equipment satisfying MIL-STD-704A requirements
03 p0312 A72-14038
- Proposed gas turbine procurement standards for shipment and installation preparation
[ASME PAPER 71-WA/GT-4] 05 p0703 A72-15897
- Europa 2 launch vehicle standardized PCM/FM and FM/PM telemetry system compared with Europa 1
05 p0630 A72-16751
- International comparison of standard solar radiation measurement pyranometers
06 p0816 A72-17925
- Thin wall airflow wire insulation relative thermal life and temperature rating evaluation procedure using Arrhenius plot
09 p1339 A72-23270
- Confidence level determination in terms of reliability index (MTBF) for MIL-STD-781 truncated sequential probability ratio tests
10 p1444 A72-23989
- Technical standards for educational and community TV by satellite, considering picture quality requirement, modulations, SNR, threshold and fade margin, and channel width
10 p1435 A72-24034
- Airborne VHF omni-range (VOR) systems minimum operational standards for navigation and communication in air traffic control
10 p1509 A72-24725
- General aviation equipment standards in light of air traffic system safety needs, emphasizing Technical Standard Order system
[SAE PAPER 720307] 11 p1748 A72-25571
- Pathophysiology of exposure to UV, IR, coherent, microwave and RF radiations, discussing potential hazards, damage, human tolerance threshold, protection guides and safety standards
12 p1772 A72-27963
- Solar cell calibration in uncollimated sunlight, obtaining standards for solar simulator intensity
12 p1759 A72-28042
- Secondary standard solar cells calibration method based on solar spectral response comparison with primary standard, discussing error correction method
12 p1759 A72-28043
- FAA policy in issuing civil airport operating certificates and establishing minimum safety standards
16 p2373 A72-33330
- Thermoemission ion gage stability and design aspects, discussing application as secondary standard for vacuum measurements
16 p2394 A72-33871
- Method for calibration and verification of automatic liquidborne particle counter/light method/
[SAE ARP 1192] 18 p2692 A72-36533
- Attitude instruments, pitch and roll. I - Minimum performance standard for equipment.
[SAE AS 1162] 18 p2692 A72-36534
- Continuous flow general aviation oxygen masks.
[SAE AS 1224] 18 p2653 A72-36536
- Standard iron wavelengths for determining the radial velocities of stars
19 p2859 A72-37910
- Acoustic pressure and sound intensity levels and noise annoyance international standards for civil aircraft noise reduction
20 p2888 A72-39803
- Criteria for valid plane strain fracture toughness testing dealing with straightness of fatigue crack front of metal specimens
20 p2981 A72-39958

- Standard Ti bars samples for spectral determination of H concentration and distribution in Ti alloys, using mathematical statistical method
23 p3287 A72-43676
- Spectrometric zonal standards - Selection of stars and methodology of their study
23 p3338 A72-44031
- STANDING WAVE RATIOS**
- Broadband dipole antenna design based on method of moments, noting VSWR and current distribution
01 p0043 A72-11241
- Mutual microwave coupling effects on element VSWR in linear dipole log periodic antenna array
01 p0043 A72-11242
- Frequency response of passive dipole antennas fed by transistor circuit, investigating power gain, bandwidth and voltage SWR
04 p0503 A72-15670
- Reflection and transmission characteristics of circularly polarized horn antenna, discussing bandwidth properties, phase differences, polarization characteristics and voltage SWR
05 p0635 A72-16334
- STANDING WAVES**
- Ultrasonic bonding tip design for densely wired electronic circuit boards, analyzing standing wave phenomena and resonant frequency
[SAE PAPER 710789] 01 p0074 A72-10279
- Elastic systems nonlinear oscillations with moving inertial loads, noting standing waves superposition
06 p0901 A72-18706
- Laser induced line narrowing effects in coupled Doppler broadened transitions within standing wave field
07 p1039 A72-20682
- Laser holographic imagery of plane and three dimensional objects for supersonic field representation of standing wave in isotropic liquid
08 p1165 A72-21078
- Stationary waves properties dependence on weak skin effect in distributed tunnel diode type of nonlinear active transmission lines
10 p1453 A72-24902
- Standing wave and colliding wave lasing and synchronization region in ring laser using active gas isotope mixture
13 p1968 A72-29511
- Alfvén wave transmission in sunspot umbral magnetic flux tube, noting standing progressive waves and energy dissipation in facular regions
13 p2049 A72-29937
- Kinetic instability bursts during heating of electron plasma in cylindrical resonator with standing electromagnetic waves
14 p2136 A72-30308
- Transmission lines with nonlinear capacitance semiconductor diodes, investigating electromagnetic traveling and standing waves instabilities and self amplitude modulation
14 p2086 A72-30795
- Nonlinear approximation of slowly changing standing waves in self excited parametric oscillators with distributed and bulk structures
14 p2090 A72-31131
- Some comments on the generation of electromagnetic traveling and standing waves for inductive acceleration of plasmas
[DFVLR-SONDDR-209] 17 p2589 A72-34895
- High power microwave nanosecond pulse generator with waveguide standing wave resonator, noting power gain and pulse shape
19 p2776 A72-38672
- Resonant growing standing internal gravity waves, considering transient behavior, numerical results, break due to local gravitational instability, maximum amplitude and secondary flow generation
21 p3048 A72-40648
- Kinetic instability bursts during heating of electron plasma in cylindrical resonator with standing electromagnetic waves
23 p3317 A72-43210
- STANDS**
- U SUPPORTS**

- NT NIOBIUM STANNIDES**
- STANTON NUMBER**
- Reynolds analogy based correlation method for Stanton number prediction for turbulent heat and mass transfer in smooth tubes
06 p0903 A72-18186
- Flat compressible turbulent boundary layers of air, predicting foreign gas injection effects on mass and heat transfer Stanton numbers and skin friction
22 p3165 A72-41958
- STAR CLUSTERS**
- NT VIRGO STAR CLUSTER**
- Radiative, segregation and evaporation processes of ice particles surrounding early type stars of Orion association, justifying ice particle model for dust grains
01 p0129 A72-10794
- Trapezium type star systems photographic observations, presenting rectangular coordinates and relative positions
02 p0286 A72-12878

- Globular cluster NGC 6838 membership from relative proper motions
03 p0415 A72-13001
- He abundances in universe, discussing stellar structure and evolution, He production, variable stars and globular clusters H-R diagrams shape
03 p0418 A72-13112
- Magellanic Clouds star clusters spatial distribution, color-magnitude diagrams, structures, dynamics and origins
03 p0425 A72-13254
- Small Magellanic Cloud NGC 371 region photometric studies for cepheids period-luminosity relations, noting domination by young supergiant stars
03 p0425 A72-13258
- Stellar field structure in NGC 2129 cluster direction, discussing interstellar radiation absorption and star distribution
03 p0433 A72-13491
- Relative stellar orbit determination in clusters NGC 5460, 5617, 6067, 6405 and 6494, presenting gravitational potential, orbital elements and anomalistic period
03 p0434 A72-13495
- Stellar systems existence with positive total energy, using numerical integration of equations of motion for members of Orion Trapezium
03 p0435 A72-13808
- Globular clusters with inhomogeneous composition, deriving partial densities of masses
03 p0436 A72-13826
- Gravitational waves proposed origin, considering black holes, star collapse, white dwarf and neutron star formation and galaxy center neutron star clustering
04 p0576 A72-15074
- Globular clusters NGC 1851 and 2808, reducing plate material with iris photometer
05 p0711 A72-15761
- UBV magnitude measurement for stars in open clusters NGC 6613 and 6716, determining spectral classes, absorption and distances
05 p0712 A72-15768
- Photoelectric photometry of Ca K-line for A stars of population I clusters
05 p0712 A72-15797
- Young cluster NGC 2264 stellar radiation flux measurements, suggesting surrounding circumstellar shells producing observable IR excesses
05 p0720 A72-16716
- Four phase space density collisionless one dimensional stellar system evolution in time by following motion of boundary curves
06 p0876 A72-17577
- Galactic star clusters dynamic evolution, using King type equilibrium and stellar mass distribution models
06 p0879 A72-17860
- Star cluster stability in form of Einstein model of rotating spherically symmetrical mass system, using Newton approximation
06 p0883 A72-18018
- Stellar velocity distribution functions in nonrotating clusters, considering encounter multiplicity effects and dissipation increase from masses dispersion
06 p0883 A72-18024
- Southern globular clusters (NGC 6362 and NGC 6752) photometric standards, stellar photographic and color-magnitude diagrams
07 p1069 A72-19076
- Stellar evolution, pulsation and atmosphere theories for globular cluster stars comparison with observation in bulk properties estimation
07 p1071 A72-19332
- Galactic cluster M67 blue stragglers in pseudohorizontal branch, determining stellar mass relative to turnoff point stars and zero-age main sequence
07 p1071 A72-19335
- Radio emission of galactic clusters at 1.4 and 2.7 GHz, computing mean electron density and hydrogen gas mass
07 p1075 A72-19577
- Population I stars and open cluster age determination methods based on stellar evolution theory, discussing inherent uncertainties effects
07 p1083 A72-20467
- Population II stars age determination by main sequence turnover luminosity and other methods, noting cosmological and galactic evolution implications
07 p1083 A72-20468
- IR emission sources in NGC 2264, IC 2087 and M1-82 H II regions
08 p1236 A72-21397
- Stability solutions of collective oscillations of spherical star cluster rotating in near circular orbits in self consistent field
08 p1239 A72-22180
- Model stability of globular star cluster with nonzero rotational moment, discussing gravitational effects
09 p1383 A72-22494
- Rotating stellar system with stars and interstellar gas within magnetic field, discussing gravitational and magnetic effects on gas pressure
09 p1384 A72-22511

Markov processes in stellar dynamics, discussing relaxation and evaporation times and star velocity distribution for galactic cluster models

09 p1390 A72-23504

Membership probabilities for open cluster IC 4665 based on relative proper motions

09 p1391 A72-23531

Galaxy and globular cluster ages in relation to Hubble constant, deceleration parameter and Friedmann expansion time

10 p1535 A72-23911

Schwarzschild solution to Vlasov equation for velocity distribution function of self gravitating stellar system

10 p1535 A72-24112

Photoelectric UBV photometry for galactic cluster NGC 7039 region stars, discussing MK spectral classifications and peculiar A stars

10 p1545 A72-24827

Peculiar A stars in open cluster Tr 2 region from objective prism plate searches, showing membership by photometrical characteristics and proper motions

10 p1545 A72-24828

Total mass content of early type star clusters associated with reflection nebulosities

10 p1548 A72-24966

Large grazing incidence X ray telescope mirrors for IEO-C mission observations, noting single stars resolution in clusters and galaxies study

11 p1630 A72-25682

Star cluster stability in form of Einstein model of rotating spherically symmetrical mass system, using Newton approximation

11 p1718 A72-25954

Stellar velocity distribution functions in nonrotating clusters, considering encounter multiplicity effects and dissipation increase from masses dispersion

11 p1719 A72-25960

Perseus two armed spiral shock model based on O associations, young open clusters, H II regions, interstellar absorption lines and 21 cm hydrogen maps

11 p1720 A72-26110

IR and optical observations of cluster surrounding Ierbig Be type star BD plus 40.4124, noting extreme outflow of group

11 p1721 A72-26122

Probability and collisional relaxation in stellar systems, discussing gravitational polarization, collective interactions and spatial inhomogeneity

12 p1872 A72-27891

Dynamical evolution of spherical star cluster under effect of internal encounters, using Monte Carlo models

12 p1873 A72-27896

Galactic cluster lifetimes from observed age distribution comparison to evaporation times by numerical experiments with star cluster models

12 p1873 A72-27897

Galactic tidal field and multiple encounters role in stellar escape from star clusters, noting escape rates and kinetic energy involved

12 p1873 A72-27898

Binary evolution in star cluster models from numerical methods of direct integration, noting domination by heavy binary and double star formation and disruption

12 p1873 A72-27899

Runaway stars trajectories stability tested from clusters study, noting preservation of energy, velocity and position and reproducibility

12 p1873 A72-27900

Instabilities initiation in spiral arm formation and stellar cluster evolution, noting analogy to hose-pipe instability in plasma physics

12 p1874 A72-27905

Monte Carlo scheme for dynamical evolution of physical star clusters, considering stellar dense core, gaseous relaxation and escape

12 p1875 A72-27919

Star escape and accumulation in halo from stellar random gravitational encounters in spherical system dense central core

13 p2040 A72-29402

Field stars near NGC 2168 /M 35/ cluster, segregating main sequence stars by proper motion dispersions with allowance for interstellar extinction

14 p2159 A72-30742

Pleiades slow flareup in photosphere, comparing with Orion flare stars

15 p2304 A72-31329

Massive stars velocity distribution function in clusters, determining escape rate and energy dissipation

15 p2305 A72-31339

Studies of extremely young clusters. VI - Spectroscopic observations of the ultraviolet-excess stars in the Orion Nebula cluster and NGC 2264.

17 p2605 A72-34530

Pre-main-sequence stars. II - Stellar polarization in GC 2264 and the nature of circumstellar shells.

17 p2605 A72-34531

Model stability of globular star cluster with nonzero angular momentum, discussing gravitational effects

17 p2606 A72-34658

The reddening, distance modulus, chemical composition and age of the galactic cluster NGC 752.

17 p2607 A72-34675

Clustering properties of the luminosity function in galactic globular clusters.

18 p2723 A72-36091

Stability solutions of collective oscillations of spherical star cluster rotating in near circular orbits in self consistent field

18 p2724 A72-36236

Photometric study of the open cluster NGC 2232.

18 p2728 A72-36742

The colour-magnitude diagram of the globular cluster NGC 6981.

19 p2855 A72-37342

The colour-magnitude diagram of the globular cluster NGC 7099.

19 p2855 A72-37343

Catalog of individual motions of stars in the open star cluster NGC 6866 and vicinity

19 p2860 A72-37918

Absolute magnitudes and color indexes of red giant concentration centers on a color-luminosity diagram

19 p2863 A72-38069

Radial density distribution and luminosity functions for stars in alpha Persei cluster

19 p2863 A72-38070

The kinematics of open star clusters

19 p2865 A72-38488

Models concerning the kinematics of star clusters

19 p2866 A72-38489

Star cluster age relation to mass ratios of stars and interstellar hydrogen and dust

19 p2867 A72-38511

Galactic structure at galactic longitudes from 230 to 355 deg on the basis of photoelectric UBV H beta photometry of 55 southern open star clusters

19 p2867 A72-38513

Structure of spherically symmetrical clusters in the relaxation phase

20 p2974 A72-40022

Model of a stationary star cluster of high binding energy

21 p3103 A72-40401

Pulsating variables in the Pleiades cluster.

21 p3105 A72-41032

Computer-aided numerical experiment of cluster mass increase by accretion in protostar evolution

21 p3113 A72-41754

Bright red giants of the globular clusters M 3, M 5, and M 13

21 p3113 A72-41756

Nebulae of the Southern Milky Way - An atlas.

21 p3114 A72-41847

On circumstellar gas emission among pre-main-sequence stars in Ie Orionis and NGC 2264.

22 p3227 A72-42555

Homogeneous stellar system with purely gravitational interactions, predicting oscillatory relaxation time

22 p3207 A72-42853

Investigation of type-A star condensations in the Perseus and Cassiopeia constellations

22 p3229 A72-42951

Spectral classification of stars with respect to unbroadened low-dispersion spectra. IV - Catalog of spectra of faint stars about the NGC 2129 cluster

24 p3447 A72-45679

STAR DISTRIBUTION

Stellar pair scale technique for determining multiplying factor of ocular micrometer drum in universal astronomical instrument

01 p0064 A72-10197

Soviet book on cool carbon stars covering spectral features, atmospheric composition and temperatures

02 p0281 A72-12296

Globular cluster NGC 6838 membership from relative proper motions

03 p0415 A72-13001

Pulsar observation data, presenting period histogram, intensity, shape and polarization variations, position distribution, physical nature and spectra

03 p0417 A72-13102

Astronomical catalog of 42 novae, presenting tables of exact positions

03 p0433 A72-13489

Stellar field structure in NGC 2129 cluster direction, discussing interstellar radiation absorption and star distribution

03 p0433 A72-13491

Autonomous star mapping attitude reference technique for providing three-axes attitude information on inertially stabilized or slowly spinning spacecraft

03 p0387 A72-13952

Differential equations systems formulation and numerical integration in gravitational problem of stellar n-bodies, discussing close approaches

05 p0713 A72-16052

Equilibrium temperatures of interstellar grains around early stars, discussing dependency on grain size and stellar distance

06 p0875 A72-17297

Photoelectric lunar occultation measurements of multiple star systems, determining separate colors from simultaneous multichannel observations

06 p0880 A72-17862

Stellar velocity distribution functions in nonrotating clusters, considering encounter multiplicity effects and dissipation increase from masses dispersion

06 p0883 A72-18024

Ultrashort period cepheids presence in blue stragglers of old disk population

07 p1071 A72-19334

M supergiants in Carina arm, discussing photometric studies at 4-18 microns, interstellar extinction uncertainties and spatial distribution

07 p1072 A72-19344

Pulsar and supernova remnant relative space position based on runaway pulsar hypothesis, discussing pulsar period-luminosity relation from evolutionary standpoint

08 p1233 A72-21180

NGC 3031 spiral galaxy photometry and large scale structure determination by UBVR integral equidensity curves method

08 p1234 A72-21280

Image dissector, silicon photodiode and vidicon behavior comparison for medium resolution star mappers design for three axis stabilized vehicles

08 p1172 A72-21975

Geodetic azimuth determination by multiple observations of bright stars near meridian

09 p1297 A72-22485

Star sky simulation in testing and training stands, using spherical mirror, collimator and imbedded spheres

09 p1310 A72-22949

Mathematical model of block adjustment and star coordinate accuracy in photographic astrometry

09 p1392 A72-23541

Data reduction for photographic catalog of AGK2-AGK3 stars in terms of random and systematic errors in plate constants

09 p1392 A72-23543

Galactic nuclei origins, evolution, observational evidence and activity relation to cosmological problems, examining Milky Way, spiral and radio galaxies and quasars

10 p1532 A72-23884

Pulsar electrodynamic properties, radiation mechanism, galactic distribution and pulse shape, period distribution and propagation characteristics, reviewing Crab Nebula pulsar features

10 p1533 A72-23888

Galactic nuclei evolution and stellar content models from nearby stars spectral synthesis

10 p1533 A72-23895

Relative orientation of major axes of double radio sources, comparing with Brown ordering of galaxies on megaparsec scale

10 p1541 A72-24472

OB star distribution in Puppis from UBV and H beta photometry, noting correlation with hydrogen concentration

10 p1542 A72-24615

Large Magellanic Cloud spiral structure and motion through interstellar gas, determining old and young stars spatial distribution near major spiral arm

10 p1544 A72-24662

Light curve of TW Delphini from visual observations, noting relationship to RV Tauri-type stars

10 p1546 A72-24830

Stellar velocity distribution functions in nonrotating clusters, considering encounter multiplicity effects and dissipation increase from masses dispersion

11 p1719 A72-25960

Milky Way spiral structure and star distribution, discussing photometric methods

12 p1875 A72-27967

Stellar population in Galactic nuclear bulge, considering interstellar reddening and variable stars

13 p2038 A72-29011

Quasi-stationary spherical system structure model for stars of different masses with isotropic velocity distribution

14 p2149 A72-30212

Galactic supernova remnants radio frequency absorption line observations, deriving distances, radio luminosity function and distribution

14 p2158 A72-30726

Galactic tidal interactions, computing mass loss for hyperbolic collisions and giant system formation from density distribution models

14 p2161 A72-31043

Average interstellar electron and early star density in Galactic disk, examining hot stars ionizing photons and H II regions photoionization

14 p2161 A72-31044

Spiral galaxy density wave damping by induced large-scale shock in interstellar medium

15 p2315 A72-32718

Optical identification of two radio source samples from astronomical B2 catalog, providing finding charts and reference star positions for investigated fields

15 p2316 A72-32749

Local population II stars density upper limit in terms of mass-luminosity ratio based on U, B and V photometric observations

17 p2604 A72-34442

Spatial distribution of galactic globular clusters stars from Palomar sky survey

18 p2724 A72-36092

Investigation of the Talcott levels of zenith telescopes and determination of their division value

19 p2802 A72-37980

Radial density distribution and luminosity functions for stars in alpha Persei cluster

19 p2863 A72-38070

Pulsars as stellar population, considering physical models, pulse emission radiation mechanism and use in galaxy studies

19 p2865 A72-38476

Stellar rings and stellar cavities as random phenomena

19 p2866 A72-38492

Initial results of a PM study in the Hydra ring

19 p2866 A72-38493

Structure and motions in the Carina spiral feature.

20 p2973 A72-39880

Model of a stationary star cluster of high binding energy

21 p3103 A72-40401

The kinematics of semi-regular red variables in the solar neighbourhood.

21 p3111 A72-41473

Bright red giants of the globular clusters M 3, M 5, and M 13

21 p3113 A72-41756

A more accurate determination of the structural features of the instability strip of classical Cepheids from Gascoigne's photoelectric data in the Small Magellanic Cloud

21 p3113 A72-41757

Corrections to star catalogues from satellite observations.

22 p3220 A72-41997

Spiral and halo structure of our galaxy on the basis of optical distance determinations.

22 p3222 A72-42136

Investigation of type-A star condensations in the Perseus and Cassiopeia constellations

22 p3229 A72-42951

Quasi-stationary spherical system structure model for stars of different masses with isotropic velocity distribution

23 p3334 A72-43242

Identification of four novae and a super-nova in Palomar Sky Atlas.

23 p3341 A72-44474

STAR FIELDS

U STAR DISTRIBUTION

STAR TRACKERS

Soviet book on electro-optical devices for space vehicles orientation and navigation covering vertical plotters and sun, planet and star trackers

02 p0256 A72-12125

Gimbale telescope/UV spectrophotometer combination with star tracking facilities for use on ESRO TD-1 A satellite

03 p0355 A72-13061

Thermal heliotrope adaptation to terrestrial applications, discussing solar radiation energy input dominance assurance and wind effect minimization [ASME PAPER 71-WA/SOL-10]

05 p0614 A72-15893

Flexibly stabilized satellite orientation determination by stellar sensors and magnetic damping of rotation

08 p1240 A72-21139

Star sensor with image dissector as pickup tube for Astronomical Netherlands Satellite attitude control system

08 p1171 A72-21974

Radiation resistance of Si photodetectors for star sensors in satellites, using electrical and optical tests

09 p1369 A72-22653

Optical radiation from Hg bombardment ion thrusters downstream regions due to excited atoms radiative decay, examining exhaust interference with star tracker

[AIAA PAPER 72-441]

11 p1707 A72-26182

Construction and optical equipment of astrophysical observatory Orion onboard Salyut space station, discussing mirror telescope, spectrograph and star tracker

15 p2242 A72-32741

Orion spaceborne astronomical observatory automatic control system for instrument orientation and star tracking, discussing servomechanism and pulse duration modulation

15 p2242 A72-32743

Loosely stabilized satellite orientation determination by stellar sensors and magnetic damping of rotation

20 p2976 A72-39244

Star scanner attitude determination for the OSO-7 spacecraft.

21 p3082 A72-41566

STAR TRACKING

U STAR TRACKERS

STARCHES

Ignition of a mixture of ammonium perchlorate and starch by incandescent wires

19 p2847 A72-37367

STARK EFFECT

Spectral distribution of total continuous emission coefficient for LTE hydrogen plasma over 8000-16,000 K and 400-15,000 Å ranges, observing Stark broadening

01 p0108 A72-10175

Molecular Stark effect modulation of IR carbon dioxide laser radiation, using density matrix technique

01 p0079 A72-10515

Orion A and M17 radio recombination line width increases, discussing Stark broadening functional dependence on principal quantum number

01 p0131 A72-11010

Single electron approximation of Stark broadening of hydrogen spectral lines without constraints of collision and quasi-static theories

03 p0391 A72-13079

Electron impact Stark broadening of ionized chlorine lines in pulsed arc plasma using laser interferometric and spectroscopic measurements

03 p0396 A72-13748

Carbon dioxide laser modulation by molecular Stark effect in deuterated ammonia, observing pressure broadening coefficient

04 p0528 A72-14585

Stark contours of hydrogen spectral lines in turbulent plasma with high noise level due to hf Langmuir oscillations

04 p0557 A72-14986

Carbon dioxide laser Q switching by molecular gases intracavity Stark modulation with sine or square wave electric field, using methyl chloride and difluoroethane

05 p0669 A72-16609

Carbon dioxide laser IR radiation modulation by application of Stark effect in various molecular absorbers, showing absence of saturation

07 p1000 A72-19035

Doppler broadening elimination in red Balmer line of atomic hydrogen at 6563 Å by high resolution saturation spectroscopy

07 p1037 A72-19132

Gases for carbon dioxide laser lines modulation by molecular Stark effect, presenting data for fluoroethane, monomethylamine, methyl mercaptan, vapors methanol and trichloroethylene

07 p1001 A72-19193

Coalescence /collapse/ of overlapping spectral lines due to nonadiabatic broadening for Stark structure of hydrogen and helium lines in discharge plasma

08 p1211 A72-21717

Hydrogen line broadening in plasma theory with limitations of Stark component intensity distribution by quasi-static and impact approximations

09 p1358 A72-22493

Stimulated emission and spectroscopic properties of activated ferroelectric crystal laser, noting Stark effect

09 p1323 A72-22981

Hydrogen atom emission spectrum calculation in uniform rotating electric field, applying to charged particles collisions and Stark broadening of plasma H lines

10 p1514 A72-24039

Saturated absorption spectroscopy of ammonia, considering Stark effect on IR transition

10 p1491 A72-24122

Relativistic Zeeman-Stark effect on molecular jet due to molecular translational motion in continuous magnetic field

10 p1514 A72-24135

Charged particles effect on plasma negative ions, examining Stark effect in energy level

11 p1693 A72-25714

Single electron approximation of Stark broadening of hydrogen spectral lines without constraints of collision and quasi-static theories

13 p2007 A72-29429

Adiabatic characteristics of impact to quasi-static transition during electron induced Stark hydrogen line broadening in plasmas

13 p2016 A72-29516

Electronic density measurement in ionized Cs vapor by observation of fundamental series lines mixture, comparing to Stark widening theory based profiles

14 p1314 A72-30852

Oscillatory current characteristics of Stark ladder electron with weak LO phonon coupling in solids

15 p2293 A72-32218

High power carbon dioxide laser produced dense He plasma, comparing experimental and theoretical Stark profile of forbidden and allowed transitions

15 p2285 A72-32223

Early B stars with normal helium abundances and small rotational velocities, deducing gravity from H lines and ESW Stark broadening

15 p2316 A72-32751

Energy difference measurement between 2S and 2P levels of multiply charged O 16 positive ion, using Stark quenching technique

16 p2432 A72-33768

Hydrogen line broadening in plasma theory with limitations of Stark component intensity distribution by quasi-static and impact approximations

17 p2588 A72-34657

Improved Stark-profile calculations for the He II lines at 256, 304, 1085, 1216, 1640, 3203, and 4686 Å.

17 p2585 A72-35768

Measurement of nonthermal oscillations at the plasma frequency and its harmonics in a magnetized arc plasma, using the high-frequency Stark effect.

22 p3212 A72-42916

Study of the Stark effect in the resonance lines of sodium by an atomic jet method

22 p3209 A72-43048

Electromechanical system for wire drive along stellar right ascension of meridian circle of Odessa Astronomical Observatory

09 p1311 A72-2306

Computer processing of star meridian observations: concerning reduction to visible area, declinations right ascensions and conversion

09 p1283 A72-23063

Star declinations from simultaneous observations at upper and lower culminations

09 p1388 A72-23064

Eight color intermediate band photometric three-dimensional star classification system, taking into account spectral classes, absolute magnitudes, Fe/H ratios and interstellar reddening

09 p1392 A72-23546

Corrections to the right ascensions of FK4 according to observations of fundamental star series with the meridian circle of the Cerro Calan Observatory /Chile/

19 p2859 A72-37911

Effective temperatures of massive stars as a function of chemical composition and mass.

22 p3227 A72-42560

Russian book - Problems of the physics of nebulas and unsteady stars.

23 p3338 A72-44026

Compilation of azimuth tables for the North star /for the tropical zone/

24 p3438 A72-44866

Application of the restricted hyperbolic three-body problem to a star-sun-comet system.

24 p3442 A72-45234

STARS [MATHEMATICS]

Multidimensional time dependent flow field analysis by split finite difference operator technique, using star mesh of quadrilateral cells

U ORBITAL POSITION ESTIMATION

STATE VECTORS

Optimal limited state variable feedback controllers design for static and dynamic linear systems [AD-738770]

02 p0198 A72-12809

Nonlinear plant and observation models with white Gaussian noise and continuous data, obtaining state vector a posteriori probability density for optimal prediction

04 p0506 A72-15112

Modal theory of state observers for control of multivariable time-invariant linear systems with plant matrices possessing distinct eigenvalues
04 p0507 A72-15529

Computational algorithm for optimal control problem with variable terminal point constrained on state space surface, using iteration technique for satisfying transversality condition
[ASME PAPER 71-WA/AUT-6] 05 p0640 A72-15957

Penalty function method validity for singular solutions to optimal trajectory control problems with state variable inequality constraints
05 p0641 A72-16531

Error covariance matrix evaluation at end of orbit extrapolation in terms of state vectors at measurement, discussing computation and interpretation
05 p0720 A72-16753

Dynamic system observation accuracy in spacecraft trajectory measurement, deriving processing algorithm based on state-estimate error correlation matrix analysis with maximum likelihood procedure
05 p0721 A72-16760

Satellite motion state vector accuracy estimate algorithm based on angular measurements of stellar positions relative to satellite sent probe
05 p0687 A72-16762

Generalized matrix inverse application to dynamic system state vector estimation, determining covariance matrix for comparison with optimal Kalman type procedure
05 p0641 A72-17089

Conjugate gradient iterative method for optimal control problems with state variable constraint, noting optimal trajectory cases
06 p0793 A72-17953

Optimal control of distributed parameter systems with incomplete state information by dynamic programming and Liapunov methods
07 p1034 A72-18981

Feasible solutions to automatic control problems satisfying multiple state and control variable inequality constraints, discussing algorithmic numerical implementation
07 p0959 A72-19281

Minimax terminal state estimator existence and structure for linear discrete system, applying to stochastic pursuit evasion games of LQG variety
07 p1027 A72-19283

Multiinput and multioutput linear and nonlinear dynamic system maximum likelihood identification based on state vector formulation and optimal filter use
07 p0959 A72-19286

Algorithm for low order linear state variable models construction from measured data
07 p0950 A72-19701

Algebraic algorithm for reducing to state form multivariable control systems defined by linear constant differential operators
07 p0950 A72-19702

Linear multivariable control system state observation by sampling with arbitrary but fixed distribution of sampling instants, emphasizing dual control by step functions
07 p0961 A72-19707

Time optimal closed loop control system synthesis by phase space technique verifying results by state variable approach
07 p0964 A72-20595

Compensated Kalman filter as suboptimal state estimator to eliminate steady state bias errors in use with mismatched asymptotic time-invariant case
08 p1144 A72-20845

Omega radio navigation system lanning problem, discussing ambiguity resolution by multiple state vector Kalman filter
08 p1144 A72-20860

Optimal filtering for state estimation of nonlinear dynamic models observed with discrete noisy observations by retaining second order terms in series approximation
08 p1145 A72-20863

Orbit determination using Kalman-Bucy filter to estimate state and unmodeled acceleration approximated as first order stationary Gauss-Markov process
08 p1145 A72-20867

Conditional mean state estimate approximation for nonlinear systems by parallel computation to reduce computer time
08 p1145 A72-20868

Algorithm for asymptotic behavior approximation of semi-Markov processes with splitting set of states by Markov chain
08 p1198 A72-20997

State estimation for nonlinear discrete-time system based on quantized data, presenting maximum likelihood estimate solution and Monte Carlo simulation results
09 p1290 A72-23095

Optimal probing signals design for state vector parameter estimation, considering Fisher information matrix function as optimality criterion
10 p1454 A72-23786

Optimal nonlinear estimation problem with nonlinear plant and observation models obtaining state vector a posteriori probabilities for prediction and smoothing via partition theorem
[AD-736521] 10 p1455 A72-23803

Optimality conditions for dynamic control systems, considering multidimensional singular controls and state space transformations
11 p1608 A72-25324

Optimal state space synthesis of discrete linear computer controlled systems with quadratic cost function, using Liapunov, Pontryagin, and Bellman techniques
15 p2212 A72-32765

State space approach to linear multivariable servomechanism problem, deriving controllability conditions and design procedure
15 p2213 A72-32801

System models for R and D processes in terms of state variables and control vectors, deriving algorithm for optimization
16 p2482 A72-33864

Recursive filtering techniques in space navigation, describing initialization procedure to account for state vector errors correlation
17 p2532 A72-34214

State space technique application to discrete linear control systems synthesis, discussing time-optimal and quadratic-cost problems, and pole assignment method
17 p2532 A72-34246

State dependent state variable feedback method to control multiple input multiple output nonlinear and/or time varying systems
17 p2532 A72-34420

Dynamic system observation accuracy in spacecraft trajectory measurement, deriving processing algorithm based on state-estimate error correlation matrix analysis with maximum likelihood procedure
17 p2610 A72-35263

Satellite motion state vector accuracy estimate algorithm based on angular measurements of stellar positions relative to satellite launched probe
17 p2578 A72-35265

Optimal regulator inverse problem analysis for multiinput systems with integral type performance indices, using state variable canonical form
17 p2534 A72-35527

Nonlinear dynamic feedback control systems modeling by parameter estimation scheme with polynomial representation for state variables
18 p2672 A72-36057

Criteria for nonlinear systems controllability in terms of state variable analytic function and derivatives, implying strong accessibility for manifolds including Euclidean spaces
18 p2673 A72-36616

Design of digital filters using state-space realization.
18 p2674 A72-36943

Direct and inverse transformations between phase variable and canonical forms.
19 p2826 A72-38230

Linear control system design with parameter uncertainties, using stochastic control approach based on minimization of state vector-dependent quadratic performance index expected value
19 p2780 A72-38239

Nonlinear on-line rapid estimation scheme with application to trajectory maneuvering vehicles.
19 p2781 A72-38258

Decoupling and synthesis of certain nonlinear systems.
19 p2827 A72-38275

Decoupling of linear discrete time systems by state variable feedback.
19 p2827 A72-38563

State vector moments of nonlinear mechanical systems under stochastic excitation, using Fokker-Planck equation for transition probability and differential equations derivation
21 p3084 A72-40679

Nonlinear problems of analyzing the observability of the trajectories of spacecraft motion on the basis of measured data
22 p3223 A72-42203

Analog and digital automatic control systems for aerospace and process applications, discussing transfer function and state variable methods
22 p3162 A72-42714

Infinite-time reachability of state-space regions by using feedback control.
23 p3274 A72-43538

The application of Monte Carlo methods to the nonlinear filtering problem.
23 p3274 A72-43541

On discrete linear time-invariant systems with singular transition matrix.
23 p3275 A72-43545

Optimally sensitive control for distributed parameter systems.
23 p3275 A72-43612

Nonlinear differential equations control systems, determining conditions for observability of initial state and vector of constant parameters extended from time-varying linear systems
23 p3310 A72-44548

Velocity space maps and transforms of tracking observations, for orbital trajectory state analysis.
24 p3440 A72-45135

STATIC AERODYNAMIC CHARACTERISTICS
All-moving tail plane parameters influence on glider static and dynamic characteristics, discussing lateral and longitudinal stability, maneuverability and pilot induced oscillations
08 p1110 A72-21632

Static aerodynamic characteristics of bulbous based cone models and slender wings at subsonic speed, using magnetic suspension and balance system
10 p1461 A72-24769

Determination of the statistical characteristics of a turbine stage and a group of turbine stages
23 p3328 A72-44295

STATIC DEFORMATION
Initial crack effect on slender column compression load carrying capacity, deflection and stress intensity factor
01 p0140 A72-10989

Exoelectronic emission method for examining deformation induced structural changes and interactions with ambient medium of metals and alloys surfaces
07 p0989 A72-20157

Static deflections determination of thin rectangular plates with point clamped restraints, using Ritz method with Lagrange multipliers
10 p1555 A72-24193

Strain work per unit time for static and dynamic pressing processes, taking into account inertial forces
13 p1966 A72-29466

Static deformation of laminar orthotropic shells of revolution with variable rigidity, using integral correlation method
13 p2061 A72-29795

Particulate composite model deformation and failure behavior under plane uniaxial compressive stress, using finite element method
15 p2258 A72-32556

Transverse isotropy effects on beams static behavior, considering Green functions, deflection under distributed loads and beam-column deflection
20 p2980 A72-39613

STATIC DISCHARGERS
Electrically charged low mobility droplet production by water vapor condensation on to gaseous ions from aircraft static discharger
02 p0231 A72-12556

STATIC ELECTRICITY
Static electrification - Conference, London, May 1971
02 p0260 A72-12551

Solids static electrification models based on solid state physics, considering contact, deformation and cleavage charging processes
02 p0269 A72-12552

Transistor damage by electrostatic discharges, noting charge stored by humans and protection techniques
08 p1140 A72-21064

Charge carrier cooling in nonhomogeneous semiconductors by static electric field, plotting average electron temperature as function of current
14 p2142 A72-30362

Radiation from a particle in static electric and magnetic fields.
20 p2956 A72-39459

Static electricity in fueling of superjets.
21 p3040 A72-41375

STATIC FRICTION
Servomechanism with nonlinear static and Coulomb friction under autonomous operation, predicting stability boundaries by analog computer simulation
08 p1113 A72-22154

Friction and molecular structure - The behaviour of some thermoplastics.
20 p2945 A72-39974

STATIC INVERTERS
Time optimal bang-bang response control of two pole single phase static inverter, giving output current transient response data
01 p0008 A72-11062

Series inverter silicon controlled rectifier 2800 watt dc power supply, noting high efficiency, low weight and stable voltage regulation
01 p0008 A72-11064

STATIC LOADS
Static loads effect on natural vibrations of thin truncated conical shells by shallow shell theory, determining resonant frequency spectrum due to prestressing
01 p0142 A72-11362

Test equipment for glass and polymer fibers strength and lifetime in vacuum and inert bases under static loads
01 p0093 A72-11382

Static and dynamic load measurements for stress-strain behavior and load-time characteristics of aerodynamic decelerator canopy fabrics, using metal foil strain gages
02 p0287 A72-11507

Static and dynamic buckling behavior of clamped shallow conical shells under axisymmetric loads
02 p0291 A72-11963

Rupture induced perturbation loads in pressurized orthotropic circular cylindrical shells

02 p0299 A72-12704

Static load transfer to discontinuous elastic filament in fiber reinforced composite, determining fiber force longitudinal distribution by approximation to Fredholm integral equation

03 p0455 A72-14384

Rectangular plates nonlinear vibrations under combined static and vibrational loads, using Bubnov-Galerkin method on Karman type nonlinear differential equations

04 p0588 A72-15061

Uniform circular plates axisymmetric elastic deformation under various static loadings and boundary conditions, solving flexural equilibrium equations

04 p0590 A72-15184

S-glass fiber bundles and composites under quasi-static loads, investigating strength characteristics and failure mechanism

04 p0592 A72-15474

Automatic testing machine for mechanical properties of metals under static loading

06 p0796 A72-18365

Gas turbine blades thermal fatigue test and analysis, investigating static tensile loading effects on heat resistance under thermal cycling

06 p0899 A72-18556

Recrystallized and unrecrystallized deformed semirigid wrought Al alloy under cyclic and static loads, investigating macrofracture kinetics

07 p1014 A72-19840

Fiberglass reinforced plastics fatigue failure prediction based on test demonstrated correlation between static and cyclic strainability

08 p1195 A72-21856

Vibration string static strain gage for high temperature operation, proposing relations for measurement error calculation

09 p1310 A72-22741

Thick steel plate diffusion welding in air with dead-weight loading and autogenous surface cleaning

11 p1637 A72-25343

Static loading and monochromatic excitation influence on transverse vibrations of eccentrically prestressed metallic beam

11 p1732 A72-25535

Two coordinate oscillograph recording device with automatic reversing for stress-strain tests under static and cyclic loads

11 p1637 A72-26814

Linear programming simplex method for static load limit of circular arch

11 p1739 A72-26921

Optimal design of elastic structures, emphasizing stability and response under applied static and dynamic loads

13 p2054 A72-28487

Testing machine for creep resistance of foam plastics under simultaneous static and vibration loads

14 p2092 A72-30591

Atmospheric humidity, temperature, vibrational and static loads effects on composite and double base rocket propellants strength and safety characteristics

14 p2145 A72-30764

Variational principle based Pian hybrid finite element procedure for static cylindrical shell analysis extended to plate and shell vibration

14 p2169 A72-31149

Buckling behavior of simply supported elastic folded plate structures without and with transverse stiffeners under symmetrical and asymmetrical uniform vertical loads

15 p2332 A72-32562

Singular perturbation methods for deflections, frequencies and eigenmodes of statically loaded or freely vibrating circular or annular membrane

16 p2467 A72-33106

Optimal design of static laterally loaded fiber reinforced plates, determining optimum load-path directions at all plate points

16 p2475 A72-34174

Static and tension fatigue and free edge delamination damage induced by uniaxial tensile loads in flat graphite/epoxy laminate coupons

17 p2571 A72-35291

Possibility of determining the fracture toughness of materials on the basis of the form of static bend test fracture samples.

20 p2941 A72-39714

Effect of inertial loading on the compression of powdered materials by a vibration process

21 p3061 A72-41369

Comparison of the resistance to fracture of the K1c of the AK4-IT1, V95T1, and D16T aluminum alloys and VT8 and VT9 titanium alloys under static and cyclic loading

21 p3071 A72-41705

Numerical solution of boundary value problems in the statics of axisymmetric shells by the method of reducing to Cauchy problems

22 p3233 A72-42054

Analysis of static deflections by holographically recorded vibration modes.

22 p3177 A72-42397

A new creep rupture testing machine with loading by tubular springs and electronic temperature control

22 p3164 A72-42860

Aluminum matrix composites fracture mechanism dependence on static loading conditions and reinforcing filament type, investigating failure modes in tension and compression tests

23 p3299 A72-43497

Some preliminary observations on the extension of cracks under static loadings at elevated temperatures.

23 p3301 A72-43712

Fatigue test equipment for 293-233 K and 50-100 ton static or 25-50 ton cyclic loads, using Freon 22 as coolant

23 p3278 A72-43759

Variational analysis of sandwich beams under static loads, presenting shear deformation and normal stress distributions

[ASME PAPER 72-APM-R] 23 p3350 A72-44055

Automatic recording of cyclic creep and strain curves for metals under low cycle static tension

24 p3458 A72-44943

Strength margin estimation in materials sustaining cumulative static and cyclic damage under thermocyclic loads

24 p3460 A72-45736

Automatic testing machine for mechanical properties of metals under static loading

24 p3389 A72-45751

The influence of static stresses on the dissipation of energy due to forced oscillations.

24 p3461 A72-45767

Mechanical behavior of fiber reinforced cylindrical shells.

24 p3461 A72-45783

STATIC PRESSURE

NT HYDROSTATIC PRESSURE

Flight test procedures for subsonic transport aircraft pitot static pressure system, recommending trailing cone calibration method

[SAE ARP 921] 01 p0064 A72-10389

Altitude hypoxia human pulmonary compliance relation between static transpulmonary pressure and inspired volume

02 p0159 A72-11958

Supersonic turbulent boundary layer interaction with compression corner, noting static pressure distributions, flow visualization and schlieren photographs

[AIAA PAPER 72-114] 05 p0610 A72-16976

Cavitation erosion of Al in liquid oxygen as function of static pressure and ultrasound frequency

07 p1034 A72-18921

Static pressure tube calibration for surface pressure measurements in flow over flat plate and airfoil

09 p1261 A72-22937

Radial turbine flow analysis, comparing calculated shroud static pressure distribution and outlet velocity profile with measured data

[ASME PAPER 72-GT-50] 11 p1570 A72-25642

Cavitation erosion of Al in liquid oxygen as function of static pressure and ultrasound frequency

13 p1942 A72-29207

Cylindrical pitot tube displacement effects on stagnation point and static pressure angle in impeller nonuniform peripheral flow

14 p2094 A72-30720

Turbulent boundary layer separation zone subsonic flow before two dimensional rectangular step, examining flow pattern and static pressure distribution

14 p2096 A72-31020

Microscale static pressure fluctuation measurements in lower atmospheric boundary layer turbulent flow using Eulerian measurements

15 p2265 A72-31618

Pressure, shear stress and yaw angle measurements in flow through aircraft intake S-shaped ducts with turbulent boundary layer at entry, noting vortex generation

16 p2377 A72-33403

Relationship between static pressure error/position error and measurable flight parameters for different aircraft weights and configurations

16 p2393 A72-33637

Turbulent boundary layer static pressure and heat exchange dependence on gas injection through porous surface

20 p2912 A72-39363

Instrumentation for measuring static pressure fluctuations within the atmospheric boundary layer.

20 p2927 A72-39799

Errors in static pressure measurements due to protruding pressure taps.

21 p3050 A72-40117

Application of piezoelectric transducers for the measurement of static pressures

21 p3035 A72-41811

STATIC STABILITY

NT DIMENSIONAL STABILITY

NT SHELL STABILITY

NT STRUCTURAL STABILITY

Optimal shape calculation for partially elastic and elastoplastic column under conservative load based on static stability criterion

03 p0447 A72-13851

Atmospheric static stability effect on turbulence layer thickness under nonuniform temperature, using correction factor dependent on Richardson number

03 p0386 A72-14334

Spatial motion of two thread-coupled bodies along satellite circular orbit, discussing system equilibrium position stability and phase trajectories

04 p0582 A72-15003

Optimal fixed point hovering rotor design for improved static performance by pulse theory

05 p0601 A72-16350

Shallow elastic shell under periodic distributed torque loading, investigating static stability enhancement through nonlinear boundary value problem periodic solutions

06 p0900 A72-18697

Conical and spherical nose shapes effects on drag and static stability at Mach 10

07 p0908 A72-19695

Static and dynamic analysis of legged planetary instrument landers, taking into account structural flexibility, elastic-plastic gear load characteristics and soil properties

[AIAA PAPER 72-371] 11 p1725 A72-25396

Static stability of long cylindrical shells under external pressure, using Euler-Lagrange equations

12 p1880 A72-27228

Two dimensional static solutions for cylindrical shells with nonhomogeneous boundary conditions, discussing numerical results for circular shell

12 p1880 A72-27230

Dead load static stability of elastic solids in terms of zero moment condition of Beatty theory

12 p1883 A72-27557

Radiative-dynamic model for static stability of rotating atmospheres, deriving mean equilibrium value of Richardson number in troposphere

14 p1217 A72-30341

Wheel balancing by static and dynamic trial method, using Churchill Mark 3 apparatus

15 p2213 A72-31635

Euler method limitations in static stability analysis, noting criterion for follow-type problem of buckling

16 p2466 A72-33016

Stability loss condition for long rectangular cross section band from nonlinear elastic material with internal constraints, discussing critical loads and deformations

16 p2467 A72-33120

Elastic stability theory of compressible and incompressible composite media

19 p2871 A72-37530

Methods of studying three-dimensional problems of stability in the presence of highly elastic strains

21 p3126 A72-41538

Model studies of plate and shell stability

22 p3233 A72-42055

Control requirements for control configured vehicles.

24 p3368 A72-45349

STATIC TESTS

Linear and nonlinear material static and dynamic structural analysis using NASTRAN digital computer program with finite element approach

01 p0140 A72-10983

Static properties of circular hydrostatic thrust gas bearings with curved surfaces, comparing theory with measurements

[ASME PAPER 71-LUB-22] 02 p0236 A72-11542

Silicate glasses fatigue in dynamic and static tests, discussing fracture stress dependence on time of loading

05 p0681 A72-16422

Monostable three output fluid amplifier models with curved walls in turbulent jet flow, comparing wall design in dynamic and static tests

09 p1263 A72-22931

Statistical failure characteristics and probability evaluation of the static strength of structural components made of composite polymer materials

20 p2943 A72-38942

Surface flaws measurement devices and quasi-static fracture tests, discussing cyclic crack growth, elastic compliance derivative method and stress intensity equations

23 p3353 A72-44229

Dynamic and static characteristics of jet engine simulators

23 p3327 A72-44286

Fan jet Falcon design and certification tests.

24 p3366 A72-44731

Stepwise fatigue testing of high temperature alloy, noting strain hardening phenomena in prestressed samples

24 p3416 A72-45755

STATIC THRUST

Thrust stand for evaluation of thrust vectoring nozzle performance.

[AIAA PAPER 72-1029] 24 p3389 A72-45406

STATICS

NT ELECTROSTATICS

NT HYDROSTATICS

NT MAGNETOHYDROSTATICS

Axiomatic development of mechanics from geometrically formulated kinematics to statics of rigid bodies and systems, using virtual rate of work and reaction principles
13 p2000 A72-28477

Presupposition, aim and methods for teaching transducer technology to users and designers, reviewing transducer static and dynamic performance characteristics and classifications
16 p2393 A72-33632

Conventional aircraft flight mechanics, reviewing vector analytical treatment of rigid body statics
17 p2493 A72-35794

Boundary value problems of lattice plates statics for transversally loaded homogeneous strip, noting elastically supported continuous plates
21 p3123 A72-41394

STATIONARY FRONTS
U FRONTS (METEOROLOGY)
STATIONARY ORBITS
Satellite low orbit transfer to stationary orbit, emphasizing stage and payload recovery effects on performance
01 p0130 A72-10936

Magnetosphere model for low energy cosmic ray proton propagation mode to synchronous orbit satellite, calculating geomagnetic cutoffs and penetration regions
[AD-741079] 02 p0274 A72-12453

Frequency allocation effectiveness and mutual interference calculation for adjacent geostationary communication satellites
07 p0943 A72-19563

Electric thruster for orbit and attitude control of nonspinning geostationary communications satellite
[AIAA PAPER 72-436] 11 p1727 A72-26178

Ion thruster development for Communications Technology Satellite, discussing synchronous orbit stationkeeping requirements, thrust vector control and mounting positions
[AIAA PAPER 72-491] 11 p1711 A72-26216

Frequency allocation effectiveness and mutual interference calculation for adjacent geostationary communication satellites
22 p3153 A72-42081

Celestial mechanics principles application to geostationary satellites in equatorial plane and in earth-moon system libration points, considering Jupiter and Saturn stationary satellites
22 p3222 A72-42141

Optimization of altitude and inclination change schedules during low thrust ascent to geosynchronous orbit.
24 p3440 A72-45150

The Symphonie transponder in the integration phase
24 p3380 A72-45273

STATIONKEEPING
World Administrative Radio Conference for Space Telecommunications data on geostationary orbit utilization, covering stationkeeping and satellite antenna pointing accuracies
02 p0177 A72-12387

Satellites and spacecraft flight control systems, discussing approaches for stationkeeping and orbit determination/correction
05 p0729 A72-16746

ATS F ion thruster system for north-south stationkeeping, discussing specific impulse, thrust vectoring, propellant system and power conditioning circuitry
[AIAA PAPER 72-439] 11 p1707 A72-26180

Ion thruster development for Communications Technology Satellite, discussing synchronous orbit stationkeeping requirements, thrust vector control and mounting positions
[AIAA PAPER 72-491] 11 p1711 A72-26216

Structurally integrated ion thruster /SIT-5/ for synchronous satellites attitude control and stationkeeping, presenting design and performance data
[AIAA PAPER 72-492] 13 p2027 A72-28950

Design and tests of dual deflectable beam strip ion thruster, noting application to two axes satellite attitude control and stationkeeping
[AIAA PAPER 72-494] 13 p2027 A72-28951

Communication satellites auxiliary propulsion systems surveyed for attitude and stationkeeping systems selection
[AIAA PAPER 72-515] 13 p2052 A72-28978

EEG parameters estimation and statistical uncertainty calculation by computer program
01 p0016 A72-10073

Error probability distributions in navigational statistics involving single or identical and diverse instruments or operators
01 p0096 A72-10176

Statistical analysis of track keeping Strumble VOR data for lateral navigation separation standards and collision risk in continental environment
01 p0097 A72-10179

Linear stochastic-parameter output channel, examining signal quadrature components statistical characteristics
01 p0024 A72-10199

Large structural systems dynamic mathematical models, predicting eigenvalue and eigenvector with statistical analysis
[SAE PAPER 710785] 01 p0137 A72-10276

Statistical methods application to parachute materials evaluation, using factorial experiments for multiple variables simultaneous effects analysis
01 p0005 A72-10317

Statistical analysis of ionospheric electron content observations over European stations with nonstationary satellites, taking into account solar radiation and magnetic activity
01 p0054 A72-10422

Statistical analysis of atmospheric average arrival time distribution, using simultaneous data from Berlin and equatorial latitude positioned research ship Meteor
01 p0056 A72-10443

Statistical model for communication probability estimate based on signal-to-interference and SNR criteria
01 p0031 A72-10997

Learning-identification of unknown nonlinear discrete systems, using local estimation results for global function learning
01 p0046 A72-11199

Space vehicles development and fabrication cost estimation, deriving statistical-analytical formulas with allowance for technical complexity and learning factor
01 p0147 A72-11219

Combined bending/torque fatigue test machines design, operation, calibration and results, developing probabilistic S-N diagram from cycles-to-failure data statistical analysis
02 p0199 A72-11514

Stress-strain characteristics of stochastically reinforced materials of high rigidity orthotropic elastic layers alternating with isotropic elastic or viscoelastic layers
02 p0248 A72-11623

Statistical long term speech spectrum analysis and perceptual evaluation, using digital bandpass filter technique
02 p0171 A72-11666

Computerized statistical identification of aerial photograph ground patterns, comparing elliptical boundary condition with minimum distance to mean classification models
02 p0187 A72-11842

Neutron cosmic ray spectrograph method of separating recorded data by energies, using statistical analysis of data combinations with different dead times
02 p0229 A72-11936

Steerable receiving antennas L/S band solar calibration error statistical analysis, obtaining 0.5 db uncertainty by monitoring antenna gain-to-noise temperature ratio
02 p0192 A72-12159

Quasar evolution models statistics suggesting relationship to radio galaxies, discussing continuity equation for density and luminosity changes
02 p0279 A72-12187

Resonant and nonresonant sound transmission through cylinder walls, using statistical analysis
02 p0260 A72-12374

Radar target cross section parameters statistical analysis, discussing real target categories and relative measuring methods
02 p0181 A72-12641

Statistical synthesis of antenna arrays using phase amplitude distribution equivalent to reference array radiation pattern
02 p0196 A72-12758

Thermal advection statistical relation to vertical motion, discussing conventional synoptic meteorological empirical facts utilization in numerical models for long term weather forecasting
02 p0254 A72-12779

Describing function method for nonlinear systems under stochastic input, considering statistical optimizations/linearization and self oscillation under noise
03 p0337 A72-13074

RR Lyrae stars absolute magnitude determination by statistical parallaxes method
03 p0421 A72-13139

Book on random data analysis and measurement procedures covering physical systems dynamic response properties, random processes, statistical sampling, data acquisition and processing, etc
03 p0327 A72-13175

Quiet sun radio emission observation, considering statistical minimum value and time varying structure
03 p0424 A72-13220

Statistical model of small scale discrete structure of magnetoplasma in solar active regions
03 p0430 A72-13335

Relativistic plasma with particles interacting through electromagnetic field, constructing statistical description by reduced distribution functions and correlation patterns
03 p0395 A72-13626

Statistical investigation of 1500 galaxies in MCG catalog with weak surface brightness, noting sculpture type spheroidal galaxies in Virgo cluster
03 p0435 A72-13807

Statistical processing of phase dependence of Martian integral brightness at 0.3-1.1 microns, noting abrupt reflectivity decrease
03 p0436 A72-13816

Soviet book on statistical theory of digital data transmission through parallel channels covering optimal and suboptimal reception systems under signal fading and interference
03 p0323 A72-13968

Ultrasonic defectoscope sensitivity, discussing statistical character of random signal level distribution and test conditions
03 p0364 A72-13988

Electromagnetic noise and effects on communication systems, considering statistical parameters definition and measurements
03 p0324 A72-14036

Composite incidental man-made radio noise data correlation to envelope statistic transformation hypothesis based on vlf airborne measurements of metropolitan area noise
03 p0324 A72-14041

Code performance evaluation over real digital channels, characterizing channel error process by multipag statistics
03 p0325 A72-14183

Statistical methods of stress and reliability analyses of elastic systems under random external loads
03 p0453 A72-14206

Homogeneous first order solutions to Lamé equations in statistical elasticity theory, yielding harmonic surface displacement for elastic body
03 p0454 A72-14371

Statistical properties of random-phase modulated laser beams, calculating coherence functions of optical fields
04 p0528 A72-14580

Cyclic phenomena periodicity by expected mean square deviation statistical analysis of observational data samples, using null hypothesis and unequally spaced sample intervals
04 p0574 A72-14908

Statistical analysis of low latitude F 2 layer disturbances associated with sudden commencement type geomagnetic storms, investigating critical frequencies
04 p0516 A72-14937

Lunar surface small crater statistical analysis and age prediction based on density and diameter correlation from Soviet Lunar Rover panoramic pictures
04 p0576 A72-15065

Lunar stone distribution statistical analysis according to size on Soviet Lunar Rover panoramic pictures, estimating rock ages
04 p0576 A72-15067

Error distribution computation for combined Rayleigh-Gaussian statistics data, applying to antenna radiation beam-pointing example
04 p0500 A72-15303

Boltzmann equation collision integral statistical models, solving shock structure in monatomic gas
04 p0513 A72-15339

Light transmission in medium with random inhomogeneities in Markov random process approximation, obtaining short wave field statistical characteristics

04 p0488 A72-15380

Average ray direction and mean square deviation formula for electromagnetic wave propagation in random inhomogeneous medium suited for calculation by ray tracing program

04 p0488 A72-15382

Probability amplitude analysis of statistical behavior of fading signal envelope

04 p0493 A72-15457

Statistical calculation of wear rate in friction pair with linear contact, analyzing errors

04 p0528 A72-15711

Statistical investigations of solar burst time dependent fine structure, giving data for multichannel spectrograph and recording system design

05 p0708 A72-15767

Stressed state of radial bearings hollow rollers under loads concentrated along generatrix, evaluating test results by statistical analysis

05 p0665 A72-15984

Statistical characteristics of range-guard intrusions and airspace collision conflicts in terminal area

05 p0611 A72-16110

Statistical description of Brownian particle motion in turbulent flow, using theory of canonical correlations

05 p0648 A72-16171

Quasar radio structure, investigating morphology, statistical characteristics, angular size of spectra and red shift correlations from interferometer measurements

05 p0716 A72-16377

Two dimensional turbulence stationary states from statistical equilibria for Navier-Stokes equation

05 p0649 A72-16686

Characteristic functional for random delayed events and cluster processes, using Blanc-Lapierre statistical model

05 p0693 A72-17079

Statistical solution of analytical design of optimal control system maintaining coarseness/universality/with minimum quality loss

05 p0691 A72-17135

Statistical analysis of sunspot activity, forecasting solar cycle events

05 p0723 A72-17176

Time to failure statistics for communications satellites redundant systems with spares and negative exponential reliability function, discussing perfect and imperfect switching

05 p0731 A72-17250

Statistical criteria of geomagnetic activity, considering solar corpuscular radiation effect

06 p0803 A72-17369

Statistical equations for turbulent fluctuations of energy, concentration and rotation in compressible flows

06 p0797 A72-17557

Aerosol scattering coefficient in atmosphere, determining statistical characteristics of vertical and spectral structure

06 p0842 A72-18043

Soviet book on laser communication statistical theory covering coherent and noncoherent optical signal detection and discrimination, SNR optimal reception, beam scanning, etc

06 p0777 A72-18518

Resin bonded solid lubricant film thickness optimization from statistical analysis of bench and machine element test data

06 p0823 A72-18591

Statistical characteristics of antenna gain threshold as function of link trajectory during radiation pattern shift with respect to fixed orientation

07 p0953 A72-19006

Mathematical expectation of angularly modulated signal in unsteady linear random noise, using Marchenko formula

07 p0939 A72-19020

Atmospheric attenuation due to rain based on links experiment and statistical study of equivalent precipitation for given path length and time percentage

07 p0939 A72-19188

Statistical analysis of eccentricity changes in nearly parabolic comets, showing data samples relation to Bernoulli random variable with two different unknown parameters

07 p1072 A72-19339

Statistical evaluation for forged jet engine parts tensile tests cost reduction, using regression analysis

07 p0995 A72-19484

Conditional distribution density formation for signal-noise mixture based on learning sampling with dependent values

07 p0943 A72-19517

Signal detection in stationary, Markov and other noise background, discussing functional method of statistical and probabilistic representation

07 p0943 A72-19520

Extrapolation procedure for determining small-scale wind shear definition from Rawinsonde vertical wind profiles statistical data for aerospace vehicle design

07 p1085 A72-19687

Axially compressed cylindrical shells with axisymmetric imperfections, analyzing random buckling behavior and failure probability by statistical methods

07 p1089 A72-19689

Statistical analysis of linear systems with additive environmental inputs and behavioral uncertainties, obtaining transfer function matrix, cross covariance matrix and power spectrum

07 p0960 A72-19703

Statistical analysis of magnetic energy-density antenna performance in mobile communication, comparing two-crossed-slot design to three element unit

07 p0957 A72-19801

Book on statistical antenna theory covering radiation patterns and other parameters for large multielement, mirror, and synthetic aperture antennas

07 p0957 A72-19862

Statistical-hydrodynamic description of nonequilibrium gas dynamics of single component and binary mixtures and systems with chemical reactions

07 p0968 A72-19886

Statistical analysis of system component error propagation by digital simulation using Continuous System Modeling program, considering strapped down inertial guidance computer

07 p1033 A72-20347

Laser Doppler velocimeter signals statistical properties, examining bandwidth, counting time and input SNR effects on zero crossing counter output fluctuations rms value

07 p0990 A72-20370

Distributions and average values for proton speed, azimuthal and polar flow directions and proton temperature and density in solar wind from Pioneer data

07 p1063 A72-20380

Strength and strain theory statistical analysis for perfectly brittle and plastic materials, assuming ultimate or elastic limit strain as governing factor

07 p1097 A72-20536

Signal statistical model parameter evaluation by selection of operators in form of dimensionless quantile ratios

08 p1130 A72-20724

Statistical treatment of galaxy clusters shape, using flattening measurement data

08 p1229 A72-20842

Taxonomy for incomplete data problems, developing unified analysis methods based on maximum likelihood estimate

08 p1199 A72-21199

Stationary statistical model for microwave oscillator flicker frequency noise, leading to power spectral density and time domain frequency instability

[ONERA, TP NO. 1085] 08 p1141 A72-21431

Survival rates in USAF accidents during 1965-69, noting visual sighting as primary rescue factor

08 p1109 A72-21564

Statistical analysis of cockpit simulator data on altimetry display for commercial aircraft

08 p1168 A72-21573

Stress rupture data from S glass composite matrix effectiveness tests, noting skewed lifetime distribution in statistical patterns

08 p1192 A72-21683

Planetary and lunar surface relief reconstruction from photographic imagery, discussing statistical morphological characteristics determination from relief

08 p1238 A72-21833

German monograph on computerized statistical analysis of Al alloy fatigue test data, considering welded samples and thin plates

08 p1188 A72-21848

Mean monthly statistical characteristics of wind regime from meteor trail drifts observations

08 p1162 A72-21885

Cloud and precipitation dynamic processes effects on reflected radar signal statistical characteristics

08 p1137 A72-21996

Radio system operational reliability analysis by mathematical methods with use of digital computer, discussing statistical modeling algorithm

08 p1143 A72-22065

Adaptive statistical system with feedback loop for weather analysis and forecasting, examining learning process features

08 p1202 A72-22113

Statistical characteristics of wind elements from vertical-temporal structure of wind field

08 p1202 A72-22118

Statistical analysis of temperature characteristics based on natural orthogonal components expansion for weather forecasting application

08 p1203 A72-22120

Atmospheric surface layer meteorological elements representative values determination as optimal filtration problem, examining data correlation with errors in initial statistical characteristics

08 p1203 A72-22121

Discriminatory analysis application in hydrometeorological forecasts, discussing use of bunch map analysis

08 p1203 A72-22122

Sigma algebra and statistics system for optimal stopping of stochastic processes for continuous time case

09 p1340 A72-22424

Equilibrium statistics of randomly forced two dimensional viscous flow three mode representation constructed by numerical integration of nonlinear equations system

09 p1293 A72-22459

Averaging process in thermodynamic systems energy transformation description

09 p1410 A72-22635

Radar data statistical evaluation, emphasizing near Doppler shift for aircraft radial velocity calculation

09 p1278 A72-22897

Star catalogs comparison and stellar positional differences and motion studies using random field theory

09 p1388 A72-23052

Energetic particle flux measurement on spacecraft based on statistics of overflowing register counting Poisson process

09 p1312 A72-23261

Black and white aerial photographs quantitative evaluation for differentiation and identification of land use patterns by microdensitometry, using statistical methods

09 p1313 A72-23306

One degree of freedom mechanical system with jump-like variable mass, determining displacement and velocity statistical characteristics under random excitation and mass addition

09 p1353 A72-23608

Statistical analysis of piezoelectric transducer voltage-displacement characteristic, determining linearity deviations magnitude

09 p1317 A72-23676

Monte Carlo and convolution methods for statistical analysis of ladder filters, describing programs for determining attenuation probabilistic distribution as function of components dispersions

09 p1289 A72-23679

Probability model of statistical independence relationships among two events and environmental event, examining all combinations of definition statements for reliability analysis

10 p1504 A72-24015

Statistical-analytical cost models for spacecraft development and fabrication, taking into account various technical and management factors

10 p1564 A72-24026

Statistical solution of steady natural turbulent convection at large Grashof numbers

10 p1465 A72-24103

Short period comets origin and orbital evolution, discussing Jupiter perturbations and statistical study

10 p1536 A72-24143

Statistical analysis of MOS integrated circuits from initial data of electrophysical and geometric distribution laws and covariance matrix

10 p1449 A72-24289

Statistical equilibrium analysis of fluorescent Fe I emission in long period variables

10 p1542 A72-24610

Mathematical statistics application to complex systems modeling, considering group method of data handling, simulation and regression methods

10 p1457 A72-24634

Electronic circuits statistical optimization with Monte Carlo procedure, discussing methods and algorithms for accelerating evolutionary modeling

10 p1452 A72-24638

Stellar statistics method for determining interstellar extinction to reddening ratio in dark cloud area

10 p1546 A72-24836

Statistical evaluation of welded airframe component fatigue damage increment during cyclic loading with constant force amplitude

10 p1559 A72-24922

Statistical analysis of entire test based on subsets, discussing problem formulation in probabilistic language

10 p1506 A72-25117

Russian papers on cybernetic systems accuracy and reliability covering error correction schemes, statistical analysis and computer design

11 p1599 A72-25426

Cybernetic system effectiveness analysis with operations research and statistical theory based on stochastic treatment

11 p1608 A72-25428

Russian papers on discrete control systems covering inertialess Markov objects, pulse amplitude and frequency modulation and statistical analysis

11 p1609 A72-25442

Recurrent algorithms for inertialess Markov objects identification based on statistical solutions theory

11 p1609 A72-25443

Approximate statistical analysis of PFM and combined modulation systems, proposing linearization method

11 p1609 A72-25447

Statistical diagnosis of aeronautical systems reliability and maintenance, using Benzecri factorial analysis for data reduction
11 p1639 A72-25817

Laminated reinforced plastics structural design criteria obtained by statistical and deterministic approach
11 p1737 A72-26235

Statistical analysis of errors in altitude readings of phase comparison AM radio altimeters
11 p1633 A72-26303

Synchronous detector technique for statistical properties improvement in phase comparison AM radio altimeter signal
11 p1633 A72-26304

Statistical error analysis of phase comparison FM radio altimeter during signal processing, investigating range finding strength distribution of echo reflectance
11 p1633 A72-26305

Digital analog converter output voltage variation coefficient derivation, obtaining operational error statistical characteristics estimates and elements parameter
11 p1602 A72-26447

Statistical analysis of strain criteria and stochastic relations for Al alloy fatigue life and minimum creep rate at 175-250 C
11 p1663 A72-26800

Statistical approach to atmospheric optics inverse problems solution, considering application to vertical temperature and humidity profiles determination
11 p1683 A72-26888

Variational and statistical methods for adiabatic electron plasma with self consistent field interaction in terms of Lagrange, Hamilton and Liouville formalization
12 p1850 A72-27185

Technological parameters effects on resistance values dispersion of thick film resistors, reviewing stability test performance
12 p1788 A72-27274

Test conduct inaccuracies effect estimation for statistical spread of experimental creep rate and long term strength values
12 p1813 A72-27456

Volume averages of stress and strain changes induced by Poisson ratio variation in boundary value problems of three dimensional classical elastostatics
12 p1884 A72-27566

Statistical analysis of spectrographic plasma temperature measurements, obtaining numerical solution to Abel integral equation
12 p1852 A72-27685

Intergalactic extinction relationship to large galactic clusters from statistical analysis of fourth and fifth Zwicky catalogs
12 p1872 A72-27759

Statistical analysis of solar microwave bursts, examining radiation source development and emission mechanism
12 p1872 A72-27814

Solar activity effects on bismuth chloride hydrolysis tests from statistical results following solar flares
12 p1773 A72-28212

Solid deformable body mean stress determination by statistical summation of stress squares on faces of parallelepiped rotated within Euler angle limits
12 p1887 A72-28233

Parametric approaches to statistical burn-in or debugging problems in aircraft reliability analysis
13 p1985 A72-28363

Mean linear velocity of rotation on solar equator to improve Hart rotatory velocity fluctuation values, giving expressions for statistical reestimation of mean square errors
13 p2035 A72-28441

Statistical model for short wave radio signal fading at oblique signal reflection from ionosphere, determining pulse amplitude and duration distribution laws
13 p1915 A72-28468

Statistical theory of nonuniform turbulent incompressible fluid flow, presenting approximate formulas of nonisotropic two point correlation tensors
13 p1941 A72-28629

Cloud statistics stratification by climatological regime, month and time of day, extending simulation to drop size distributions and liquid water content
13 p1989 A72-28808

Precipitation exceedance rates charts for various risks, using statistical models
13 p1989 A72-28811

Diurnal and annual temperature variations at 30-60 km from statistical analysis of rocketsonde data, obtaining solar radiation errors magnitude
13 p1947 A72-28829

Automatic statistical analyzer for radio meteor echo multiplicity recording in three coordinate /multivariable/ space, including instrument error allowance
13 p1929 A72-29032

Random vibration statistics of lifting rotors with feedback controls, solving response variance matrix by random inputs shaping filters
13 p2057 A72-29096

Analog and digital computers for automatic statistical analysis of unsteady random process recorded data, calculating correlation functions and expectancy
13 p1925 A72-29165

Semiconductor devices series production process control and analysis by statistical procedures, noting computer controlled data acquisition system for silicon diodes production
13 p1965 A72-29166

Redundant and nonredundant self adaptive systems reliability, discussing statistical random process characteristics
13 p1936 A72-29170

Statistical homogeneity criteria for automatic equipment operation reliability, using Poisson flow model with random fluctuations
13 p1965 A72-29173

Statistical activity analysis procedure for random nerve network model, determining representative point trajectory in phase space via similarity matrix
13 p1909 A72-29176

Statistical analysis for single airport ATC digital simulation using Poisson distribution law, calculating optimal number of channels
13 p1996 A72-29179

Neutron cosmic ray spectrograph method of separating recorded data by energies, using statistical analysis of data combinations with different dead times
13 p1957 A72-29248

Statistical energy analysis of sound-structural interaction, considering sound transmission through complex walls and piping systems and fluid filled container vibrations
13 p2005 A72-29556

Random vibration of two multimodal mechanical systems with point coupling, obtaining power flow spectral density by statistical energy analysis
13 p2005 A72-29563

Statistical description of Brownian particle velocity in turbulent flow, using theory of canonical correlations
14 p2093 A72-30240

Averaged atmospheric IR counter radiation values in cumulus clouds, using statistical characteristics
14 p2099 A72-30249

Welded machine component service history effects on residual fatigue life from statistical evaluation of factor experiment
14 p2107 A72-30278

Non-Maxwellian inhomogeneous collisionless plasma equilibrium and stability, proposing statistical thermodynamic model
14 p2137 A72-30394

PCM speech transmission systems, comparing pseudorandomly dithered quantization with fixed level method by intelligibility and subjective appreciation tests and statistical analysis
14 p2087 A72-30942

Aircraft accident statistical projections from human error review, analyzing situational circumstance limitations
14 p2081 A72-31086

Van der Pol and nonlinear parametric oscillators fluctuations due to random noises analyzed by averaging method and discrete Markov processes
14 p2133 A72-31134

Multimode millimeter waveguides and optical fibers, deriving signal transmission distortion from transfer function and corresponding impulse response statistics
15 p2193 A72-31351

Signal distortion minimization for random waveguides with frequency-dependent optimum coupling based on transfer function covariance and impulse response time domain statistics
15 p2194 A72-31352

Linear stochastic-parameter output channel, examining signal quadrature components statistical characteristics
15 p2195 A72-31623

Eole satellite observed meteorological balloon data analysis, obtaining mean zonal velocity, meridional velocity and temperature vs latitude from statistical estimates
15 p2266 A72-31980

Statistical analysis of photocounts of arbitrary spectral profile Gaussian light, discussing two incoherent beams superposition
15 p2277 A72-32231

Statistical evaluation of feedback role in simple movements in terms of Index of Preprogramming
15 p2187 A72-32761

Photoelectric measurement of solar photosphere pole-equator temperature differences, analyzing statistical and systematic errors
15 p2317 A72-32770

[AD-745809] Autocorrelation analysis of Mariner 2 data for solar wind velocity, noting 27 day recurrences
16 p2444 A72-32954

Critique on experiment to measure gravitational constant differences between two elements, discussing errors in statistical analysis
16 p2426 A72-33769

Statistical analysis of position-fixing general theory for systems with Gaussian errors.
17 p2578 A72-34294

Application of statistical linearization techniques to nonlinear multidegree-of-freedom systems.
[ASME PAPER 71-WA/APM-5] 17 p2624 A72-34315

Book - Elements of applied stochastic processes
17 p2575 A72-34624

Statistical estimate of the attainable sidelobe level in phase-switched antenna arrays with a nonlinear initial phase lead
17 p2529 A72-34833

Price adjusted single sampling with linear indifference.
17 p2560 A72-34943

Statistical-hydrodynamic description of nonequilibrium gas dynamics of single component and binary mixtures and systems with chemical reactions
17 p2540 A72-35134

Measures of effectiveness for special signal detectors of simple structure
17 p2516 A72-35222

Image autocorrelation function models and power spectra, obtaining probability distribution, variance and correlation coefficients of image orthogonal transformations
17 p2518 A72-35672

Focused irradiance fluctuations beyond a layer of turbulent atmosphere.
17 p2518 A72-35754

Identification of periodicities in the structure of natural stochastic processes
17 p2534 A72-35783

Statistical models and turbulence: Proceedings of the Symposium, University of California, La Jolla, Calif., July 15-21, 1971.
18 p2676 A72-36001

Self-consistent statistical models for the gravity anomaly, vertical deflections, and undulation of the geoid.
18 p2723 A72-36028

Application of statistical methods to the study of the rigidity of a dielectric
18 p2720 A72-37116

The diurnal effect of the cosmic rays during the period 15 October 1965-30 June 1966. I - Method of analysis and statistical distribution.
18 p2722 A72-37159

Radar cross section fluctuation statistics description by generalized chi-square distribution, discussing target detection probabilities maximum likelihood estimates
19 p2763 A72-37293

A method for generalized statistical studies of discrete information transmission systems
19 p2764 A72-37301

Conditions for the effectiveness of adaptation algorithms based on an empirical Bayesian approach to statistics
19 p2825 A72-37440

Weight estimation methods.
19 p2871 A72-37451

Statistical characteristics of surface pressure pulsations in turbulent boundary layer of incompressible fluid, discussing effects near smooth flat wall
19 p2785 A72-37472

Study of the flow of air traffic and capacity of a control system
19 p2831 A72-37797

Novae and background stars relative proper motions, deriving and tabulating absolute proper motions via statistical transformation
19 p2860 A72-37970

Geophysical signal statistical model parameter evaluation by selection of operators in form of dimensionless quantile ratios
19 p2765 A72-38352

A statistical information theory for extremum search of a function
19 p2827 A72-38576

Statistical synthesis of antenna arrays using phase amplitude distribution equivalent to reference array radiation pattern
20 p2907 A72-39064

Dynamic electromagnetic scattering pattern of flying object, constructing quasi-ergodicity condition to compute standard statistical descriptions for recognition
20 p2903 A72-39071

Dynamic nonlinear system direct statistical analysis by Covariance Analysis Describing Function Technique with linearization, giving illustrative examples
20 p2905 A72-39124

Statistical analysis for best fit of compact X ray object spectra to black body, bremsstrahlung and power law models
20 p2969 A72-39387

Book - Bayesian statistics: A review.
20 p2946 A72-39728

A statistical method for the determination of the rate of changes of period for eclipsing binaries.
20 p2974 A72-39892

Application of statistical methods to studies of the surface properties of polymers 21 p3072 A72-40080

Quantization error of the coefficients in digital filters with N shift sequences 21 p3025 A72-40223

Data acquisition, storage and processing, discussing data reduction by statistical coding, interpolation, prediction and parameter identification 21 p3014 A72-40322

Statistical analysis of information from remote space vehicles 21 p3015 A72-40327

A priori estimation of the quality of a data-compression system from the statistical characteristics of the sensors employed 21 p3024 A72-40328

Performance of antennas in random fields. 21 p3026 A72-40355

Receiver processing for direct-detection optical communication systems. 21 p3017 A72-40859

Quantitative aspects of reliability in process-control systems. 21 p3038 A72-40922

Statistical estimation of the signal-to-noise ratio beyond a linear detector 21 p3022 A72-41073

Independent cascaded multicomponent random variable system gain statistics relationship to individual component based on moment derivation, obtaining curves from variance equation 21 p3022 A72-41087

Statistical analysis of influence coefficients and unbalance forces measurement errors in balancing of rotors 21 p2996 A72-41229

Diffusion from a continuous source in relation to the Eulerian properties of turbulence. 21 p3046 A72-41248

Location estimation for spacecraft landed on Mars surface via statistical techniques application to earth based radio tracking data, taking into account ephemeris biases [AIAA PAPER 72-903] 21 p3082 A72-41554

Orbit prediction for artificial satellites via numerical averaging technique, presenting algorithm for planetary equations solution [AIAA PAPER 72-934] 21 p3112 A72-41572

Weibull distribution government of dispersion of destructive temperature gradients characteristic of fireproof ceramic materials heat resistance 21 p3074 A72-41713

Analysis of noise immunity of two-channel eddy-current flaw detector. 21 p3057 A72-41723

Application of sample quantiles to the compression of teletext transmission and statistical processing of medical information 22 p3150 A72-42221

Statistical characteristics of an optimal detector of randomly fading pulse signals 22 p3154 A72-42229

Parametric method of statistical synthesis with incomplete initial information on signal and noise distribution, discussing signal detection in white noise with unknown spectral density 22 p3154 A72-42230

Statistical synthesis of navigation aids systems with unsteady random interferences, obtaining optimization criterion by least squares method 22 p3202 A72-42232

Very-high-frequency wave propagation by the temperate-latitude sporadic-E layer. 22 p3154 A72-42367

Atmospheric effects on the surface cosmic ray meson intensity recorded in London. 22 p3218 A72-42369

Error sensitivity of statistical models with pattern rearrangement for analysis of interplanetary scintillation in ecliptic plane 22 p3218 A72-42402

Statistical characteristics of storm-associated Pc 5 micropulsations observed at the synchronous equatorial orbit. 22 p3171 A72-42413

Some effects of cognitive similarity on proactive and retroactive interference in short-term memory. 22 p3142 A72-42548

Noncoherent scattering probabilistic formulation in terms of mean intensity averaged over absorption profile and mean scatterings number required for photon escape 22 p3206 A72-42559

An approximation to midcourse correction direction errors. 22 p3203 A72-42870

Statistical method of failure analysis for redundancy forms selection, noting aircraft safety and reliability 22 p3139 A72-42973

Atmospheric optics inverse problem solution, comparing orthogonal functions series expansion and statistical regularization method algorithms 22 p3202 A72-43006

Einstein equations reduction to friction systems in homogeneous cosmological models, investigating Bianchi models isotropization and statistical analysis. 23 p3335 A72-43301

Statistical analysis of Forbush decreases and the preceding increases in cosmic-ray intensity 23 p3328 A72-43354

Stress-rupture of simple S-glass/epoxy composites. 23 p3305 A72-43492

Statistical strength and plasticity criterion for materials in a complex stress-strain state 23 p3349 A72-43953

Analysis of optimal space-time signal discrimination 23 p3266 A72-44217

Statistical analysis of the sound level distribution of aircraft noise as a function of time 23 p3252 A72-44337

Statistical forecasting models for USAF CONUS outbound cargo airlift requirements by averaging and exponential smoothing models 24 p3466 A72-44578

Statistical techniques for severely censored random samples with known and unknown probability distribution functions 24 p3418 A72-44665

Interplanetary objects in review - Statistics of their masses and dynamics. 24 p3435 A72-44688

An assessment of repeated loads on general aviation and transport aircraft. 24 p3366 A72-44736

Statistical analysis of the turbulence near a wall by conditional sampling 24 p3392 A72-45066

Hodgkins disease post-surgery recurrence hazard rate in flying personnel, developing statistical base for decision regarding return to military flying duty 24 p3377 A72-45661

Statistical analysis of comet observations, calculating relationships between comet head angular diameter and heliocentric and geocentric distances and apparent brightness 24 p3448 A72-45687

Stressed state of radial bearings hollow rollers under loads concentrated along generatrix, evaluating test results by statistical analysis 24 p3408 A72-45726

STATISTICAL COMMUNICATION THEORY U COMMUNICATION THEORY STATISTICAL CORRELATION

Student naval aviator selection by multiple correlation technique using noncognitive college and flight background questionnaire to reduce attrition rate 02 p0166 A72-11704

Statistical characteristics of rough sea compared with variable magnetic fields near Crimean coast in Black Sea 02 p0218 A72-11951

Statistical linearization approach to determine approximate instantaneous correlation matrices of nonlinear structure response to nonwhite excitation 02 p0298 A72-12663

Book on random functions and turbulence covering probability theory, random processes and fields, statistical correlation and spectral methods, numerical weather forecasting, etc 05 p0649 A72-16397

F region irregularity contours from correlation analysis of satellite amplitude scintillations, showing axially symmetric field-aligned and north-south elongated planes 08 p1156 A72-21105

Averaged Bogoliubov-derived chains of kinetic theory gas dynamics equations with strong statistical correlation for macroprocess description 08 p1149 A72-21175

Clutter correlated lognormal random variables generation from statistically independent Gaussian random variables for radar simulations 08 p1134 A72-21423

Zaidenberg correlation method for nonlinear systems dynamic properties under random excitation, determining statistically equivalent linearized terms for equations of motion 09 p1353 A72-23607

Statistical estimation method for brittle metals fracture strength, taking into account stress nonuniformities due to dislocation defects 11 p1738 A72-26803

Radio source and radio quiet quasars identifications for statistical correlation with bright galaxies positions 12 p1871 A72-27742

Statistical characteristics of rough sea compared with variable magnetic fields near Crimean coast in Black Sea 13 p1949 A72-29263

Digital computer estimates of random processes spectral density by statistical correlation method, calculating errors in numerical integration techniques 13 p1937 A72-29495

Statistical data processing method for accuracy evaluation of satellite orbits parameters obtained from onboard measurements of two stars angular positions 14 p2151 A72-30454

Joint photon-count probability distribution measurement of electric field amplitude correlation function for random-Gaussian light fields produced by laser beam scattering 15 p2280 A72-31378

Optical pulse wave field longitudinal and transverse statistical correlations during propagation in turbulent atmosphere 15 p2198 A72-32061

Solar activity correlation with filaments disintegration during transit across solar disk, analyzing statistical data 15 p2318 A72-32782

Electronic circuit reliability prediction model with statistical dependence for detailed failure modes 16 p2371 A72-33349

Statistical correlation techniques applied to jet aircraft autoland system dynamic ground tests with simulated engine and aerodynamic characteristics 16 p2420 A72-33641

Data transmission systems with decision feedback in presence of burst noise, calculating statistical relations among received sequences as function of duration and spacing 16 p2372 A72-33799

Statistical correlation of X-band microwave scattering by overdense intermittently turbulent ionized Ar jet with flux fluctuations from electrostatic probe observations [AIAA PAPER 72-674] 16 p2440 A72-34063

Calculation of correlation matrices for linear systems subjected to nonwhite excitation. [ASME PAPER 71-APMW-10] 17 p2625 A72-34316

An application of the generalized Langevin equations to the study of correlations in simple, classical fluids. 17 p2581 A72-35154

Correlation functions and reconstruction error for quantized Gaussian signals transmitted over discrete memoryless channels. 17 p2516 A72-35333

Role of recursive estimation in statistical image enhancement. 18 p2658 A72-36260

Certain results of the statistical processing of a large series of large-scale television images of stars 19 p2860 A72-37957

General transport theory of noise in pn junction-like devices. II - Carrier correlations and fluctuations from high injection. 22 p3160 A72-43081

STATISTICAL DECISION THEORY

Optimal sequential multiple decision procedures for radar receiver using Monte Carlo method 05 p0628 A72-16561

Statistical inferences on two parameter Weibull reliability function from classical, Bayesian and structural probability viewpoint 15 p2264 A72-31800

Comparison of the quality of empirical and optimal adaptation algorithms in multiple-alternative choice problems 19 p2828 A72-38583

Bayesian decision analysis of the hazard rate for a two-parameter Weibull process. 22 p3198 A72-41981

Determining optimum burn-in and replacement times using Bayesian decision theory. 22 p3182 A72-41982

A stochastic automata theoretical approach to dynamic programming. 22 p3199 A72-42633

Bayesian statistical decision theory and reliability-based design. 22 p3240 A72-42967

Estimation and prediction of Gumbel and Frechet distribution parameters, noting statistical decision in tests, sequential analysis and graphical procedures 22 p3199 A72-42968

Estimation, confidence intervals, and incentive plans for sequential three way decision procedures. 24 p3406 A72-44667

STATISTICAL DISTRIBUTIONS

NT PEARSON DISTRIBUTIONS

NT PROBABILITY DISTRIBUTION FUNCTIONS

NT RAYLEIGH DISTRIBUTION

Electrostatic waves in longitudinally magnetized plasmas with random electron charge distribution and applied magnetic field, finding phase characteristics 01 p0106 A72-10128

Log normal random fluctuations of ionospheric electron concentration in F region from vertical sounding and incoherent scatter data 01 p0059 A72-10609

Amorphous semiconductors dielectric properties based on randomly distributed local electron states in disordered solids, crystalline impurities and polymer aggregates 02 p0269 A72-12450

Critique of quasar model of independent random pulse emitting sources conglomeration, noting brightness fluctuations incompatibility 03 p0435 A72-13802

- Statistical distribution of maximum response for reliability-based optimum spacecraft structural design for random excitations from booster shutdown
05 p0724 A72-16103
- Rice exceedance statistics application to atmospheric turbulence, indicating strong nonGaussian second order distributions
[AIAA PAPER 72-136] 05 p0684 A72-16969
- Logic circuit binary signal autocorrelation determination as function of 0 and 1 signals duration distribution considering AND and OR gates
05 p0632 A72-17094
- Diversity reception during radio wave scattering on statistically uneven surface, using geometrical optics method
07 p0944 A72-19566
- Fokker-Planck equations for charged particle dynamics rederived for random fields, finding pitch angle scattering
08 p1227 A72-21385
- Narrow-band pulsed laser radar photocount distribution statistics in thermal background radiation, noting detection performance dependence on signal and noise absolute level and SNR
08 p1134 A72-21420
- Statistical crack length distribution of flaw sizes in steel parts during manufacturing
09 p1328 A72-22920
- Random elastic modulus variability of building materials test pieces under compression and tensile loads
10 p1557 A72-24403
- Statistical bounding approach to fracture analysis of fiber reinforced composite materials tensile strength
10 p1502 A72-24883
- Local limit theorems for sequence of nonidentically distributed independent integral-valued lattice random variables
11 p1676 A72-25356
- Intermolecular collisions distribution on centerline of freely expanding axisymmetrical jet, using ellipsoidal statistical model and simplified transport equations
11 p1615 A72-25557
- Expected value of two dimensional Gaussian random array gain, assuming two dimensional isotropic noise field of single frequency
11 p1604 A72-26040
- Narrow band process signal model for phase and amplitude difference distribution densities of alternating period compensation system output signal
11 p1596 A72-26310
- Ejection injuries from U.S. Navy aircraft, discussing statistical distribution of vertebral, shoulder, arm/hand, knee, leg, head and face injuries
12 p1774 A72-28273
- Nonrandomized distribution-free ranking and selection procedures under subset selection formulation, considering application to reliability problems
13 p1962 A72-28366
- Hot worked Al alloy machine elements mechanical properties scattering, discussing quality control procedures
14 p2114 A72-30275
- Phase distribution randomization in switched antenna array, noting radiation pattern sidelobe compensation application
15 p2209 A72-32666
- Independent random test values effective sample numbers for mean and variance distributions in meteorological and geophysical statistical tests
16 p2385 A72-33382
- Observations of the variability of dissipation rates of turbulent velocity and temperature fields
18 p2678 A72-36022
- Fourth moment of a wave propagating in a random medium
18 p2712 A72-37025
- Error of the statistical method for determining the dependence of the combustion characteristics of particles upon particle size
19 p2879 A72-37363
- Stellar rings and stellar cavities as random phenomena
19 p2866 A72-38492
- Model random medium with two kinds of dielectric layers stacked in arbitrary proportions, calculating electromagnetic wave propagation characteristics by transmission line analogy
19 p2767 A72-38613
- Energy characteristics of radio signals scattered by statistically uneven surface, proposing statistical variables substitution
20 p2900 A72-38892
- Statistically dilute antenna groups with enhanced minimum distance between elements
21 p3028 A72-40504
- Theoretical and experimental investigations, conducted with the aid of a plate containing holes, concerning the simulation of a statistically arranged antenna group
21 p3028 A72-40505
- Prior distributions fitted to observed reliability data.
22 p3182 A72-41980
- Diversity reception during radio wave scattering on statistically uneven surface, using geometrical optics method
22 p3153 A72-42084
- Multiple scattering of bending waves by random inhomogeneities.
22 p3235 A72-42460
- Estimation and prediction of Gumbel and Frechet distribution parameters, noting statistical decision in tests, sequential analysis and graphical procedures
22 p3199 A72-42968
- Investigation of the applicability of different laws of extremal-value statistics to the approximation of empirical distributions of maximum wind velocities
23 p3310 A72-43535
- Statistics of the radiation from astronomical masers.
23 p3337 A72-43872
- Mathematical model for digit summation task search time distribution dependence on size of visual display with randomly arranged three digit numbers
24 p3374 A72-44558
- Propagation of the mutual coherence of optical waves in a random medium.
24 p3424 A72-44711
- Approximate formulae for mixed modulated coherent and partially polarized chaotic light.
24 p3425 A72-44769
- Linear corrector for laser beam intensity distribution transformation into random distribution with rectangular envelope, noting uniform energy distribution result of spatial fluctuations averaging
24 p3411 A72-45608
- STATISTICAL MECHANICS**
- Closure problem in statistical theory of isotropic turbulent velocity field
03 p0342 A72-13900
- Statistical mechanical calculation of thermodynamic properties of interstitial solid solutions involving second nearest neighbor solute atom mutual interactions based on Kirkwood expansions
03 p0459 A72-14252
- Nonlinear oscillations stochastic instability in dynamic systems, discussing nonequilibrium statistical mechanics
03 p0390 A72-14316
- Turbulent particle diffusion statistical mechanical model, using random walk
03 p0344 A72-14331
- Hydrodynamic equations for non-Lagrangian statistical mechanical particle systems with three degrees of freedom under frictional and velocity dependent forces
04 p0512 A72-15202
- Closure approximation in hierarchy stochastic differential operator equations in statistical mechanics
04 p0540 A72-15257
- Lynden-Bell statistical mechanics predictions compared with most and least violently relaxed one dimensional self gravitating systems, using computer experiments
05 p0714 A72-16055
- Statistical group theory of two component associated gas mixtures, noting erroneous virial coefficient
05 p0692 A72-16356
- Statistical mechanics of N-body self gravitating system one dimensional model, using canonical and microcanonical ensembles
06 p0885 A72-18075
- Statistical hypothesis of Van Allen radiation belts, using Vlasov equations for self consistent plasma fields
07 p1055 A72-18805
- Thermodynamic quantities expression in terms of S matrix to formulate questions pertaining to statistical mechanics-particle physics boundary, applying to cosmology
09 p1355 A72-22750
- Perturbation procedure for weakly coupled oscillators in connection with statistical mechanics ergodic problem and nonlinear interaction models
12 p1844 A72-27248
- Turbulent plasma electric field energy density spectrum from statistical mechanics investigation based on canonical formalism for electron plasma
12 p1851 A72-27387
- Relativistic statistical mechanics invariant formula for coherence degree of plane blackbody radiation beam in arbitrary Lorentz frame, noting transformation law of temperature
12 p1846 A72-27741
- Chandrasekhar statistical stellar dynamics assumption generality compared to Chandrasekhar diffusion process, discussing discontinuous model, relaxation time, escape probability and numerical results
12 p1872 A72-27893
- Statistical mechanics of one dimensional model for many body self gravitating system with canonical and microcanonical ensembles, noting isothermal solution of Vlasov equation
12 p1846 A72-27907
- Covariant statistical mechanics equations system for distribution function of relativistic particles in steady external gravitational field, noting Vlasov equation as limiting case
13 p2035 A72-28465
- Statistical physics multiple wave scattering-phenomenological radiation transfer equation relations, using Green function
13 p2002 A72-28512
- Weak homogeneous turbulence analysis by Bogoliubov statistical mechanics theory, deriving kinetic equations for nonlinear wave interaction
15 p2278 A72-32383
- Atmospheric turbulence statistical theory, discussing random flow field characterization by property expressed in ergodic theorem
17 p2537 A72-34273
- Statistical mechanics of magneto-active plasma.
17 p2590 A72-35144
- The two-particle correlation function in nonequilibrium statistical mechanics.
17 p2581 A72-35164
- Two dimensional turbulence model for charge fluctuations statistical mechanics of nonlinear guiding center plasma
18 p2714 A72-36014
- Statistical model of chemical reactions in nonisothermal low pressure plasma.
18 p2715 A72-36567
- Nonlinear oscillations stochastic instability in dynamic systems, discussing nonequilibrium statistical mechanics
19 p2836 A72-38814
- The relativistic Boltzmann equation.
20 p2955 A72-40012
- Finite difference calculus development of method to express thermodynamic limit of statistical-mechanical average as power series in number density, noting advantages and applicability
21 p3087 A72-40562
- Statistical mechanics of light elements at high pressure. II - Hydrogen and helium alloys.
21 p3106 A72-41044
- Stellar-statistical formulation of the problem of setting up an astronomical radial velocity system.
21 p3109 A72-41439
- Predvoditelev critical revision of hydrodynamic and heat transfer theory based on Navier-Stokes and Boltzmann equations, developing statistical system of molecular interactions
22 p3165 A72-41951
- Statistical mechanics of polymerized materials.
22 p3197 A72-42796
- Power law behavior of autocorrelation and memory functions of statistical mechanics as t approaches infinity
23 p3309 A72-43870
- Information theory and statistical mechanics applications to thermodynamics, discussing entropy and superiority of Georgian to Kelvin temperature scale
24 p3465 A72-45372
- Some reflections on the nature of entropy, irreversibility and the second law of thermodynamics.
24 p3465 A72-45628
- STATISTICAL MOMENTS**
- U DISTRIBUTION MOMENTS**
- STATISTICAL PROBABILITY**
- U PROBABILITY THEORY**
- STATISTICAL TESTS**
- NT KOLMOGOROFF-SMIRNOFF TEST
NT MANN-WHITNEY-WILCOXON U TEST
NT RANK TESTS
- Statistical test plans with improved flexibility, application ease and efficiency for maintainability demonstration
10 p1504 A72-23998
- Loose medium deformations and displacements fluctuations verification by statistical tests, noting inception information from autocorrelation and boundary conditions cross correlation functions
10 p1512 A72-24719
- Indirect statistical quality control procedure for piece goods in batch based on image recognition technique for data classification
13 p1965 A72-29175
- Geomagnetic data testing by including monopole term in spherical harmonic reduction
13 p1951 A72-29394
- Ionospheric radio signal reflection fields verified via quantitative statistical reliability criterion
14 p2100 A72-30634
- Independent random test values effective sample numbers for mean and variance distributions in meteorological and geophysical statistical tests
16 p2385 A72-33382
- Bandpass-filtered geophysical and meteorological time series data statistical evaluation by comparison with filtered test series with same variance and autocorrelation function
16 p2363 A72-33383
- Information criterion for optimal planning of reliability acceptance tests maximizing average effect
21 p3038 A72-40714
- A note on a comparison of confidence interval techniques in truncated life tests.
21 p3075 A72-40828

Statistical tests for spectral correlation analysis of continuum VHF radio emission fluctuations from noise storms
21 p3102 A72-41778

Estimation, confidence intervals, and incentive plans for sequential three way decision procedures.
24 p3406 A72-44667

STATISTICAL WEATHER FORECASTING

Weather forecasting, discussing statistical entropy, numerical and statistical methods and computer technology utilization
02 p0254 A72-12777

Statistical methods in meteorology - Conference, Leningrad, September 1969
08 p1202 A72-22112

Adaptive statistical system with feedback loop for weather analysis and forecasting, examining learning process features
08 p1202 A72-22113

Hydrodynamic models and computational schemes optimization in statistical weather forecasting
08 p1202 A72-22114

Probabilistic-statistical method for recognition and short term forecasting of convective clouds, spring floods, hail, thunderstorms and showers
08 p1202 A72-22115

Hydrometeorological parameters spatial-temporal variations analysis and forecasting based on association functions and conditional probability distribution functions
08 p1202 A72-22116

Averaging period parameters determination for weather climatic norms forecasting with minimum mean square error
08 p1202 A72-22117

Statistical characteristics of wind elements from vertical-temporal structure of wind field
08 p1202 A72-22118

Statistical analysis of temperature characteristics based on natural orthogonal components expansion for weather forecasting application
08 p1203 A72-22120

Discriminatory analysis application in hydrometeorological forecasts, discussing use of bunch map analysis
08 p1203 A72-22122

Probability weather forecasts reliability, considering utility and spherical and logarithmic validities
08 p1203 A72-22124

Atmospheric boundary layer pressure field expansion into dual series of natural time dependent components to separate fluctuations within monthly period for weather forecasts
08 p1203 A72-22125

Prognosis algorithm to infer vector predictor by analogy as basis for statistical weather forecasting
08 p1203 A72-22126

Linear statistical forecasting with noncorrelated predictors by multiple regression equations, showing degradation dependence on sampled cross covariances
13 p1995 A72-29591

Geomagnetic pulsations long term statistical forecast, obtaining averaged yearly pearls activity
15 p2222 A72-31426

Monthly mean air temperature anomalies annual forecasts based on Fourier analysis of 1900-1970 statistical data
16 p2418 A72-33381

Method of constructing a forecast chart of H sub 500 anomalies on the basis of several analogs
19 p2828 A72-38000

Local and regional weather forecasting based on multilinear regression technique
21 p3078 A72-40765

Adjustment of the wind field to geopotential data in a primitive equations model.
22 p3200 A72-42502

Climatology of the occurrences of thundery weather over Gauhati Airport.
22 p3202 A72-42887

STATISTICS

Methods for measurement of the state of health
21 p3005 A72-40395

STATOR BLADES

Stator blade design to shield turbofan from pressure disturbances arising in downstream subsonic duct [AIAA PAPER 72-84]
05 p0707 A72-16883

Noise reduction effects of wake interaction between rotor blade rows in axial flow compressor, cancelling velocity defect at stator position [ASME PAPER 72-GT-15]
11 p1569 A72-25614

Supersonic turbine stator and rotor blading design corrected for boundary layer displacement thickness, discussing limitations due to normal shock wave at flow separation [ASME PAPER 72-GT-63]
11 p1571 A72-25653

Lift fan blade interaction discrete frequency noise, discussing potential and viscous interactions relation to rotor-stator spacing
15 p2297 A72-32019

A study of film-cooling effectiveness of some gas-turbine stator surfaces.
17 p2597 A72-34468

Influence of the angle of attack on the performance of high-deflection stator blades
17 p2484 A72-34889

Flow and energy loss distribution in annular stator nozzle cascades with cylindrical blade profiles of different twist, measuring flow exit angle along blade span
23 p3248 A72-43664

STATORS

Noise generated by free flow turbulence incident on rotor or stator in axial flow fans and compressors, noting sound spectrum dependence
13 p0208 A72-29575

Hysteretic motor in steady synchronous operation with nonsinusoidal supply voltage, computing stator winding current based on superposition with two linear equivalent circuits
13 p1900 A72-29975

STEADY FLOW

NT COUETTE FLOW
NT HARTMANN FLOW

Alternating directional implicit numerical solution for three dimensional steady low density hypersonic flow over finite width flat plate [AD-736572]
01 p0049 A72-10230

Nonlinearity effects on two dimensional steady supersonic dissipative flow governed by Navier-Stokes equations, obtaining expressions for flows past thin airfoil and wedge
02 p0203 A72-11976

Steady sonic flow around three dimensional obstacles by pseudo-axisymmetrical flow approach, revealing singular perturbation of lift downstream at infinity
02 p0150 A72-12096

Least squares and point matching techniques compared for solution of two dimensional steady state heat conduction problems with irregularly shaped boundaries [ASME PAPER 71-HT-P]
02 p0302 A72-12318

Conducting fluid steady MHD pipe flow under transverse magnetic field, obtaining mass flow rate
03 p0394 A72-13241

Curved shock waves in steady flow of perfect fluid, confirming Hugoniot relations validity
03 p0341 A72-13685

Time and coordinate dependence of magnetic field for steady symmetric flows of compressible conducting fluid at large Reynolds numbers, investigating self excitation conditions
03 p0398 A72-14001

Steady laminar viscous conducting fluid flow in infinite rectangular channel in crossed electric and magnetic fields, deriving flow rate and potential distribution
03 p0398 A72-14008

Steady flow of viscous incompressible conducting fluid in rectangular channel with sectional walls under longitudinal external magnetic field, deriving velocity distribution
03 p0398 A72-14009

Navier-Stokes equation analysis of three dimensional steady radial expansion of viscous heat-conducting compressible fluid from spherical sonic source into vacuum
03 p0343 A72-14247

Rotational symmetry solutions to differential equations of stationary barotropic or axisymmetric incompressible flow
03 p0344 A72-14345

Steady two dimensional cavity flow past infinite number of airfoils using linearized theory
04 p0461 A72-14460

Plane steady flow of two viscous fluids in contact, presenting normal and tangential pressure
04 p0510 A72-14513

Linear stability of nearly parallel steady plane viscous flows, using method of multiple scales [ONERA, TP NO. 1044]
04 p0511 A72-14969

Boundary value problem for steady parallel axisymmetric irrotational flow of inviscid incompressible fluid past cylinder having common axis with tube
04 p0512 A72-15056

Sound attenuation in lined rectangular ducts with uniform steady flow, considering aircraft engine noise reduction
04 p0565 A72-15267

Navier-Stokes equations solution by finite difference methods for steady incompressible laminar vapor flow in symmetrical and unsymmetrical heat pipes, calculating pressure losses [ASME PAPER 71-WA/HT-15]
05 p0744 A72-15874

Continuous media stationary motion stability using initial boundary value problem of partial differential equations in perturbations [ASME PAPER 71-WA/APM-17]
05 p0647 A72-15963

Steady inviscid diabatic complex lamellar gas flow geometric properties, correlating stream and vortex lines via Beltrami surfaces in Euclidean space
05 p0747 A72-16667

Internal axisymmetrical steady inviscid rotational flow velocity profiles simulation by means of shaped wire gauze screens [AIAA PAPER 72-165]
05 p0650 A72-16830

Characteristic schemes comparison for three dimensional steady isentropic supersonic flow [AIAA PAPER 72-190]
05 p0605 A72-16844

Steady two dimensional symmetric viscous flow past parabolic cylinder in uniform stream, correlating calculated nose skin friction with boundary layer theory
05 p0610 A72-17011

Stationary plasma flow interaction with axisymmetric spatially periodic magnetic field in presence of Hall effect, determining electric currents structure
05 p0701 A72-17244

Steady two dimensional magnetodynamic flow past nonconducting wedge with perpendicular magnetic field at different shock attachment angles
06 p0861 A72-18131

Flow field quantities for nearly free axisymmetric steady molecular gas flow through circular orifice from high pressure region into vacuum
06 p0800 A72-18111

Steady subsonic potential gas flow in multiply connected regions, determining velocity field via boundary value problem solution for quasi-linear elliptic equations set
06 p0801 A72-18122

Cornered axisymmetric blunt body sonic line in steady supersonic flow, showing incomparability with sonic shoulder of sphere
06 p0757 A72-18133

Plane stationary flow of ideal incompressible fluid past large camber profiles of arbitrary shape and thickness, using computerized Fourier expansion
07 p0908 A72-18977

Difference method for numerical integration of Navier-Stokes equations for two dimensional incompressible steady flow along flat thin plate
07 p0908 A72-19177

Book on compressible fluid dynamics covering steady flow, shock waves and self similar motions
07 p0967 A72-19444

Monograph on three dimensional turbulent boundary layers in unsteady incompressible flow covering flow equations, eddy viscosity and mixing length models, etc
07 p0968 A72-19951

Iterative solution of differential equations for steady plane flow with heat and mass transfer at high Reynolds numbers
07 p0971 A72-20094

Perfect fluid two dimensional steady flow equations solution for viscous flow with specified boundary conditions, considering vortex flow
07 p0971 A72-20094

Steady viscous incompressible fluid flow in circular disk with prescribed velocity components at low Reynolds numbers, considering computer tested numerical method
07 p0972 A72-20104

Parabolic differential equation system for boundary layer behavior of steady plane gas flow
08 p1107 A72-20914

Stream functions for steady two dimensional flow field of viscous liquid near circular whirl
08 p1148 A72-20931

Steady axisymmetrical twisted gas flow parameters in channels with geometries similar to turbojet engine units
08 p1149 A72-21311

Inviscid conducting gas steady one-dimensional MHD flow, using three-dimensional phase diagram for differential equations analysis
08 p1214 A72-21644

Steady flow of dual temperature plasma into vacuum from widening nozzle, taking into account electron thermal conductivity and heat exchange between components
08 p1214 A72-21651

German monograph on steady flow past sphere and cylinder near wall, discussing drag, lift and flow visualization
08 p1108 A72-21954

Rotationally symmetrical cylindrical shell loaded by uniform pressure distribution along length, calculating quasi-steady viscoplastic flow under Huber-Mises condition
09 p1399 A72-22694

Book on steady laminar supersonic and hypersonic wakes covering near and far region solutions, boundary layer separation, etc
09 p1261 A72-23025

Geometrical characterization of steady nondissipative compressible fluid flow described by first order partial differential equations system
09 p1295 A72-23366

Steady turbulent flow and heat transfer downstream of circular pipe sudden enlargement, computing streamline and temperature profiles and wall fluxes
09 p1412 A72-23687

Numerical prediction of inert and reacting steady internal two dimensional recirculating flows by finite difference method, including turbulence and combustion models
10 p1561 A72-23866

Steady inviscid irrotational transonic flow in two dimensional symmetric and axially symmetric nozzle throats

Steady compressible fluid flow and plane shock wave propagation in pipe bends, discussing parameter effects and boundary conditions

Statistical solution of steady natural turbulent convection at large Grashof numbers

Steady two dimensional flow of monatomic rarefied gas past semiinfinite beam

Viscous fluid steady nonaxisymmetric flow past rotating sphere, obtaining antitorque moment expressions and resisting force projections

Turbulent diffusion of scalar contaminant passively advected by homogeneous stationary flow, expanding velocity and scalar fields in stochastic Wiener-Hermite functionals

Steady rarefied gas flow around sphere with radial reflection of particles along normals, calculating gas dynamics variables of conservation equation

Interaction solutions of steady crossed field MHD channel flows for perfect, singly ionizing monatomic and thermodynamically unspecified gases

Equations of motion of steady viscous fluid flow in three dimensional boundary layer on walls of axial flow compressors and turbines, obtaining velocity field

Dynamic and thermal laminar compressible boundary layers on flat plate, noting interaction of two quasi-steady flows

[ONERA, TP NO. 1068]

Limiting form of equations for perfect gas steady two dimensional flow under gravity effects

[ONERA, TP NO. 1087]

Asymptotic behavior of velocity profiles in laminar boundary layers of steady incompressible fluid two dimensional flow past rigid wall

Steady three dimensional viscous vortex within circular cylinder with tangential fluid influx from jets on outer surface and efflux through sink on bottom

[AD-741352]

Steady laminar boundary layer generated by vortex over fixed coaxial disk, solving governing equations by numerical integration

Turbulent mixing length velocity, temperature pulsations and viscous sublayer thickness in steady incompressible fluid flow past infinite plate

Random phase approximation for nonlinear theory of MHD nonequilibrium plasma steady turbulent regime, noting ionization level rise by energy dissipation

Calculation method for steady convective heat transfer in single-flow motion of several media, deriving equation system for characteristic directions and compatibility conditions

Steady nonrotating axisymmetric viscous incompressible flows with zero and negative ring circulation flux, studying solutions in three dimensional phase space

Steady flow of compressible heat conducting fluid, discussing effect of small transfer coefficient on isentropic sonic singularity in Laval nozzle

Magnetic and electric field effects on steady state laminar MHD Couette flow of non-Newtonian fluids governed by Prandtl rheological law or Ostwald-de Waele power law

Third order extension of perturbation method to solve Oseen equations for two dimensional steady viscous flow past cylindrical body at low Reynolds number

Plane nonlinear wave propagation in transonic region of two dimensional and axisymmetric steady flows, considering disturbance at arbitrary point

Two dimensional two phase steady supersonic wedge flow patterns analysis based on equations for flow between wedge surface and shock wave

Stationary heat conduction between stagnant binary gas mixture and two constant temperature plane parallel walls for arbitrary Knudsen numbers

Perfect gas steady flow under gravity action, analyzing limiting equations

[ONERA, TP NO. 1087]

Heat transfer and longitudinal temperature distribution at Hartmann-Sprenger tube inlet calculated approximately on basis of boundary layer data in steady compressible flow

Velocity distributions for slow steady rotational motion of non-Newtonian inelastic viscous fluid contained between two concentric spheres, using successive approximations

Isentropic perfect gas steady compressible flow finite element analysis through nonlinear equations linearization based on perturbation theory

Characteristic parameters of stationary supersonic plasma flow in magnetic de Laval nozzle calculated for collisional and collisionless cases, measuring ion saturation currents

Stationary plasma flow interaction with dipole magnetic field to study geophysical phenomena in upper atmosphere

Steady laminar MHD flow of viscous incompressible electrically conducting fluid between long concentric rotating porous cylinders under radial magnetic field

Backward diffusion statistical properties in time for homogeneous unsharped stationary turbulent flow, using Eulerian velocity

Laminar boundary layer separation point in steady two dimensional constant density flow past solid surface, deriving pressure-vorticity gradient relationship

Stability analysis of ideal incompressible liquid steady flow for given distribution, discussing velocity distribution effect on longitudinal cylindrical flow instability

German monograph on plane steady isentropic flow past obtuse apex angle wedge at zero angle of attack and free stream sonic velocity

Hydrodynamic equations for low speed steady external rarefied gas flows past circular cylinder, noting drag and heat transfer coefficients

Nonlocal fluid dynamics continuum theory with equilibrium and constitutive equations derived by generalizing Stokes Laws, noting steady channel and shear flow

Nonequilibrium steady quasi-one dimensional expanding nozzle flow of chemically reacting gas mixture, using time dependent finite difference technique

[AIAA PAPER 72-684]

Supplement to the asymptotic theory of steady turbulent flows with bubbles

Hydrodynamic characteristics of a cambered hydrofoil with a jet flap.

[ASME PAPER 71-APMW-17]

Prediction of the flow and heat transfer in a rectangular wall cavity with turbulent flow.

[ASME PAPER 72-APM-Q]

Continuity, motion and Maxwell equations for steady MHD flow under constant magnetic flux

Theorem for instability of rectilinear vortices in two dimensional steady flow of ideal liquid with or without submerged obstacle

Axisymmetric rotating flow past a circular disk.

Laminar gas flow in narrow channels of constant and variable cross sections in the presence of heat transfer

Inviscid perfect gas supersonic steady irrotational flow past wedge, investigating analytical solution validity in downstream region behind shock

Nusselt number dependence on Rayleigh number for steady convection in porous medium, explaining heat transport abrupt change by breakdown of Darcy law

Boundary layer and inviscid main stream interaction in asymmetric supersonic steady gas flow incident on circular cone at high Reynolds numbers

Steady flow of conducting fluid in MHD ball bearing clearance between two eccentric spheres, deriving load, friction moment and optimum operation mode

On the steady flow between a rotating and a stationary disk with a uniform suction at the stationary disk.

Convergence and accuracy of three finite difference schemes for a two-dimensional conduction and convection problem.

French monograph - An asymptotic theory of the Boltzmann equation and its application to the study of near continuum flows

On a method of computing the plane steady flow around a profile situated between straight parallel lines.

Generating high Reynolds-number flows.

Numerical analysis of three dimensional steady laminar free convection boundary layer due to heated ellipsoid, solving flow equations

Simple proof of fluid line growth in stationary homogeneous turbulence.

A Monte Carlo model of turbulent mixing for the prediction of NO production in steady-flow combustors.

[WSCI PAPER 72-8]

Surface reactions in similar boundary layers.

An asymptotic solution for steady flow above an infinite rotating disc with suction.

Interaction between the droplets of a polydispersed condensate in a nozzle flow

Steady flow past body fixed in uniform flow of dusty gas, obtaining velocity distribution

Hot wire data corrections in low and in high turbulence intensity flows.

Steady capillary-gravitational waves of finite amplitude generated by pressure periodically distributed along the flow surface of a fluid of finite depth.

Steady two dimensional motion during horizontal motion of body at high Richardson number in stratified fluid, considering blocking mechanism

Interaction of a steady plasma flow with a dipole magnetic field in the presence of a radial electric field.

Steady radiating gas flow past a semi-infinite flat plate at a constant temperature for an optically thick case.

Two-dimensional stationary problem with a free boundary for the Navier-Stokes equations

New results concerning the numerical calculation of the sonic flow around a given airfoil section

Stationary spherical vortices in a perfect fluid.

The internal boundary value problem for the Boltzmann equation in the steady state and weakly nonlinear

Noncoaxial rotations of a disk and a fluid at infinity

One dimensional steady conducting gas flow in nonaccelerating coordinate system under magnetic field, calculating pressure, density and temperature variations with boundary shock wave

Steady two-dimensional viscous flow in a jet.

Plane stationary flow of ideal incompressible fluid past large camber profiles of arbitrary shape and thickness, using computerized Fourier expansion

Mach reflection from overexpanded nozzle flows.

STEADY STATE

Wall friction effect on current sheet speed of magnetically driven shock tube, establishing steady state existence

Steady state turbulent solar magnetic fields dynamic evolution, considering weak random magnetic excitation in electrically conducting fluid under varying kinematic conditions

Surface cycle models physical mechanisms, discussing solar activities and nonaxisymmetric steady state solutions

Nonentraining axially symmetric steady state sloping model of severe storm, discussing validity and limitations

Collisional radiative recombination applicability to time dependent electron density decay in helium afterglow before reaching quasi-steady state

Large signal IMPATT diode microwave oscillator lumped model, considering steady state oscillation

Steady state operational characteristics of two component heat pipes, applying mass and energy conservation

vation laws and thermodynamic phase equilibrium relations
[ASME PAPER 71-WA/HT-30] 05 p0745 A72-15883

Thermodynamics near steady state, considering stability criterion
05 p0746 A72-16159

Steady state geostrophic wind vector variation hodographs in planetary baroclinic boundary layer, considering thermal influence linear superposition on internal friction effects
06 p0841 A72-17667

Heat transfer steady state and transient response problems nodal formulation and numerical solution on digital computer
07 p1101 A72-19918

Control system stability with nonlinear feedback in steady equilibrium state
07 p0963 A72-20321

Transients determined for Cs vapor discharge phases, observing current fluctuations between steady states in negative resistance zone above 0.2 torr
07 p1046 A72-20517

Compensated Kalman filter as suboptimal state estimator to eliminate steady state bias errors in use with mismatched asymptotic time-invariant case
08 p1144 A72-20845

Book on physical cosmology development covering universe expansion, steady state, isotropy, Hubble constant, cosmic time scale, mass density, etc
08 p1236 A72-21480

Transverse electromagnetic field and electron velocity vectors during rectangular pulse incidence on ionization front moving at light speed, describing steady state encounter region
08 p1136 A72-21741

Steady state and temperature relaxation of rarefied gas between two plane parallel plates
08 p1211 A72-21871

German monograph on Ranvier node steady state I-V characteristics transition range and control by altered external solutions and morphological effects on nerve fiber
09 p1264 A72-22336

Forbidden band thermal deformation effect on homogeneous steady state stability of semiconductor
09 p1367 A72-22492

Transient characteristics and steady state off-design operation of mixed and unmixed type turbfan engines, noting peculiarities in control characteristics
09 p1374 A72-22626

Micropolar thermoelasticity steady state axisymmetric problem solution from equilibrium equations, considering uniform surface temperature and surface heat doublet cases
09 p1403 A72-22749

Steady state charged cylindrical electron-ion beam with high current in kinetics model framework, discussing densities proportionality and relativistic factor
09 p1360 A72-22951

Current carrier flow parameter fluctuations associated with steady state transport noise in semiconductor devices, considering generation-recombination processes, drift, diffusion and dielectric relaxation
09 p1288 A72-23125

Algorithms for optimal adaptive control of steady motions of single channel discrete extremal systems with independent search, studying quality functional behavior
09 p1291 A72-23437

General structure steady state response under harmonic forcing in internal resonance relation, noting inertial nonlinear effects on autoparametric interactions and energy flow
09 p1408 A72-23462

Steady state model for Venus atmosphere water vapor loss, noting hydrogen and oxygen escape due to dynamic outflow of constituents from upper region
09 p1393 A72-23657

Steady state operation of automatic control system to stabilize random vibration spectra, noting maximum control accuracy at optimum loop gain
10 p1457 A72-24635

Closed and open loop transfer function coefficients relationship for steady state linear system with proportional elements in feedback and parallel paths
10 p1457 A72-24724

Boundary layer model for laminar transient forced convection film boiling on isothermal flat plate, noting one dimensional conduction, intermediate and steady state regions
[AIAA PAPER 72-289] 11 p1741 A72-25227

Steady state plasma interactions with electromagnetic force field in plasma accelerators, showing shock wave formation
[AIAA PAPER 72-413] 11 p1706 A72-26163

First order systems steady state frequency response to general harmonic amplitude modulated input, noting signal attenuation and absence of distortion
12 p1845 A72-27540

Linearized steady motion of gas with mass sources and sinks, determining resonance onset conditions
13 p1893 A72-28731

Instrument to determine steady and unsteady stress state of elastic fluids in viscometric flow, noting rheological measurements in solved polymers
14 p2094 A72-30421

Two dimensional numerical solution of semiconductor steady state transport equations, applying to MOS and bipolar transistors
14 p2142 A72-30847

Nonlinear resonant circuits analysis, noting steady state operation of ferroresonant circuit with staircase response curve and synchronization conditions
14 p2132 A72-31103

Nonlinear processes in oscillatory systems with semiconductor diodes, calculating amplitude and phase characteristics in steady state and transient conditions
14 p2090 A72-31133

Nodal equations derivation for lumped circuit representation of Gunn diode with steadily propagating domain under steady state and transient conditions
15 p2205 A72-31317

Steady state electron mean energy variation between parallel plates in Ar and He calculated by Monte Carlo simulation for comparison
15 p2285 A72-32222

Magnetized plasma discharge steady state problem of finite cylinder positive column in magnetic field, detailing radial and axial solutions
15 p2288 A72-32508

Theory of the dynamic vibration neutralizer with motion-limiting stops.
[ASME PAPER 71-APMW-14] 17 p2625 A72-34317

Regression analysis for steady state N2 inequality in O2 consumption calculations.
17 p2507 A72-34542

Forbidden band thermal deformation effect on homogeneous steady state stability of semiconductor.
17 p2595 A72-34656

Calculation of steady modes of operation of RC circuits with jumpwise varying parameters
17 p2533 A72-34761

Contributions to the study of the steady-state regime of fluidic amplifiers with jet deflection
17 p2497 A72-35122

Spectral factorization in periodically time-varying systems and application to navigation problems.
17 p2578 A72-35492

Numerical simulation studies of two-dimensional turbulence. I - Models of statistically steady turbulence.
17 p2543 A72-35765

Steady state charged cylindrical electron-ion beam with high current in kinetic model framework, discussing densities proportionality and relativistic factor
17 p2593 A72-35880

Integral scales existence as necessary condition for asymptotical independence of stationary process, showing relationship of conditions for central limit and related theorems
18 p2677 A72-36002

State feedback control law for linear multiinput multioutput time-invariant dynamic system under disturbance to obtain output with zero steady state error
18 p2672 A72-36054

Functional relationships between the conventional steady-state error characteristics and the weighting matrices in the quadratic performance index.
18 p2672 A72-36058

Heat transfer from a slowly rotating sphere.
18 p2741 A72-36934

Algorithms for optimal adaptive control of steady motions of single channel discrete extremal systems with independent search, studying quality functional behavior
19 p2782 A72-38520

Simple conduction model for theoretical steady-state heat pipe performance.
20 p2984 A72-39607

Transient and steady state vorticity generated by horizontal temperature gradients.
20 p2987 A72-40016

Propagation of electromagnetic disturbances and the stability of stationary states in media with a nonlinear Ohm's law
21 p3086 A72-41651

Synthesis of linear stationary systems with the aid of proportional elements
22 p3162 A72-42738

Steady state equations of motion, equilibrium shape and stability derivatives of elastic airplanes evaluated with finite element methods.
22 p3138 A72-42845

Interpretation of steady-state surface photovoltage measurements in epitaxial semiconductor layers.
22 p3215 A72-43087

Steady thermoelastic state in an infinite plate with a moving parabolic cut
23 p3345 A72-43586

Mathematical description and calculation of the steady-state regime of a microwave power stabilizer with a semiconductor attenuator
23 p3270 A72-43766

An algorithm to obtain the steady state response of nonlinear periodic systems.
23 p3267 A72-43852

Necessary conditions for steady state in radiation - Matter interaction and the role of entropy.
24 p3461 A72-44806

STEADY STATE CREEP

Coarse grained dispersion strengthened Al alloys, investigating solute solutions effects on steady state creep behavior
01 p0087 A72-11025

Constant stress and compression creep testing in vacuum conditions, describing simple spring loaded apparatus characteristics and performance
01 p0071 A72-11171

Steady creep rates in Ni poly- and single crystals in presence of dislocation stresses
06 p0835 A72-18748

Steady state high temperature niobium creep in torsion under rarefied oxygen infiltration conditions, discussing surface interactions kinetics
07 p1012 A72-19679

Steady creep rate logarithm and creep limit obedience to normal distribution law
07 p1014 A72-19846

Steady state creep model for high activation energy role in interstitial formation and migration in particle strengthened alloys
08 p1185 A72-20992

Discontinuous rigid or creeping fiber reinforced composite materials, predicting steady state creep behavior
09 p1338 A72-23167

Environment and grain size effect on steady state creep and creep rupture properties of Ni-W solid solution
09 p1331 A72-23381

Functional analytical formulation of steady creep processes, using error estimations in solution of equations with monotonic potential operators in Banach spaces
09 p1409 A72-23567

Steady creep and delayed fracture dependence on metal structure and composition, considering strain hardening at small strain rate and elevated temperature
15 p2254 A72-31559

High temperature steady creep of Nb and niobium-aluminum oxide alloys at 850-1400 C
15 p2254 A72-31561

Steady state creep measurements of lead-phosphor bronze discontinuous fiber composites under nonuniform deformation, comparing to fiber and matrix alone
15 p2261 A72-32299

Steady state creep theory for discontinuous fiber composites, considering rigid and creeping fibers and sliding interface
15 p2261 A72-32300

Recovery-work hardening model of steady state creep for Al, assuming equal internal and applied stress
15 p2259 A72-32642

Temperature and stress dependence of steady state creep rate for dispersion strengthened Ag-gallium oxide alloys, noting grain size effect on activation energy
16 p2411 A72-34094

Steady state creep of composite material with discontinuous fibers, determining random function mean and variance for fiber stress distribution
16 p2412 A72-34115

Relations between the experimental parameters describing the steady-state and transient creep
18 p2732 A72-36343

Steady-state creep of shells of revolution in the case of the Tresca criterion
22 p3233 A72-42051

Finite difference and extended Newton methods application to transient and steady state creep deformation in shells of revolution under high temperature and high stress
22 p3235 A72-42482

Materials creep behavior and elevated temperature design.
24 p3453 A72-44553

The creep of dispersion-strengthened Ni-Co alloys.
24 p3413 A72-44923

STEADY STATE FLOW

U EQUILIBRIUM FLOW

STEAM

Zr alloys hydride distribution after oxidation in steam at 550 C, discussing hydrogen uptake
04 p0534 A72-15362

Zr and Zr-Cr alloys corrosion behavior in steam, noting parabolic rate law breakaway point to linear rate
05 p0676 A72-16797

STEAM FLOW

Catapult steam ingestion test of turbofan engines in A-7 aircraft, correlating compressor stall occurrences with temperature increase rate in distorted region
07 p1052 A72-18760

Critical discharge regimes of two phase steam/water mixture flow from nozzles, using counterpressure effect

11 p1619 A72-26674

Steam-condensate mixture boundary layer flow along curved body surface with arbitrary pressure gradient at low Mach number and constant physical properties

16 p2378 A72-33437

STEAM GENERATORS

U BOILERS

STEAM TURBINES

Nonstationary temperature field determination in steam turbine casing-connector nozzle by difference method based on heat balances, comparing results with electric analog studies

02 p0303 A72-12534

Vibration of reciprocating engine crankshafts and steam turbine, alternator and gas turbine rotor shafts supported on hydrodynamic sleeve bearings

08 p1225 A72-22133

Rotor blades setting angle and twist influence on steam turbine wheels vibrational modes and frequency spectra

11 p1732 A72-25537

TEATITE

U TALC

STEEL STRUCTURES

Upset steel cylinders under axial compression loads, determining localized surface stress and strain critical values at fracture

01 p0141 A72-11032

Strain anisotropy effect on thin walled tubular steel samples with combined bending and torsion, constructing matrix and stress vectors

03 p0445 A72-13578

Electron fractographic investigation of fracture properties via removal of metal oxide film accumulated on crack surface during service life of steel structures

09 p1309 A72-22639

Welded steel airframe residual fatigue life tests by nonstationary random loading, applying to jet trainer aircraft landing gear

14 p2107 A72-30277

Ni-Cr-Ti steel aircraft structural element fatigue life calculation based on failure mechanism involving crack propagation

14 p2164 A72-30429

Ultrahigh tensile strength steel pressure chamber fracture behavior in high stress concentration fields

15 p2330 A72-32345

Resistance to brittle fracture of high-strength steels in various structural states

19 p2819 A72-38014

Effect of residual elements on radiation strengthening in iron alloys, pressure vessel steels, and welds.

20 p2937 A72-39289

Experimental investigation of the carrying capacity in bending of steel box-section beams

22 p3232 A72-41870

STEELS

NT AUSTENITIC STAINLESS STEELS

NT BAINITIC STEEL

NT CARBON STEELS

NT CHROMIUM STEELS

NT FERRITIC STAINLESS STEELS

NT HIGH STRENGTH STEELS

NT MARAGING STEELS

NT MARTENSITIC STAINLESS STEELS

NT NICKEL STEELS

NT STAINLESS STEELS

Acoustic emission characteristics from nuclear reactor irradiated steels during tensile and wedge opening load tests

01 p0068 A72-10803

Steel and Ti-Al-V alloy surface integrity during various machining methods, considering microstructures, residual stress profiles and fatigue characteristics

[SME PAPER IQ 71-237] 01 p0076 A72-10972

Hot formed Cr-Ni-Mo and Ni-Mo prealloyed steel powders fatigue and toughness properties, determining hardness effects by varying draw temperature from 400 to 1000 F

02 p0240 A72-11435

Microstructure of prealloyed and premixed specimens of sintered steel

02 p0242 A72-11463

Hardened steel inhibited crack propagation mechanism, observing striation in microstructure on fracture surface

02 p0243 A72-12212

Heat treated carbonized, cyanided, nitrided and boronized steel fatigue strength dependence on static strength, residual stress, brittleness and stress concentration from test data

02 p0244 A72-12242

Alloy steels temper brittleness analysis, using internal friction characteristics as functions of time and temperature

02 p0247 A72-12816

Steel cleanliness conditions for formation and decantation of inclusions due to deoxidation during production up to solidification

03 p0371 A72-13198

Steel castings made in electric furnace with Al additive, observing magnesium and lime aluminates inclusions

03 p0371 A72-13199

Ductility relationship to plasticity characteristics in cylindrical steel samples with short notch under tension

03 p0443 A72-13458

Steels modulus of elasticity dependence on prestressing level produced by transverse and longitudinal tension

03 p0371 A72-13462

Steels gas-powder facing with boron carbide, testing microhardness and wear resistance

03 p0363 A72-13547

Steel coatings produced by plasma jets on experimental machine parts, determining friction wear resistance by successive tests

03 p0363 A72-13548

Testing temperature effect on intergranular fracture propagation in steel sensitive to tempering brittleness

03 p0372 A72-13599

Steels fatigue life tests as function of stress level, confirming Wohler curves mathematical model

03 p0373 A72-13673

Mo and C additives effects on austenite susceptibility to deformation martensite formation and steel resistance to hydroerosion

03 p0375 A72-13941

Melting effect on recrystallization of overheated tempered steel, discussing rectification under conditions favoring formation of silicon-oxygen compounds

03 p0376 A72-14017

Ferritic steel nil-ductility transition temperature data analysis correlating irradiation results with activation fluences and temperature

04 p0547 A72-14430

Shock precompression effect on dynamic fracture strength of steel and Al alloy, investigating crack initiation and growth

04 p0533 A72-14541

Effective plastic strain for Tresca and von Mises materials, investigating hot rolled mild steel specimens

04 p0590 A72-15187

Mean stress and overload effects on mild steel service life, using fatigue damage summation method

04 p0592 A72-15475

Hydrogen generation mechanism during cadmium plating of steel, describing porosity testing technique

04 p0527 A72-15561

Lamellar tearing and testing of steel sheets in direction of short side by Brodeau test

04 p0527 A72-15561

Strain hardened layers effect on wear resistance of 50Kh steel

04 p0534 A72-15653

Fe-Cr-Al and Fe-Cr-Si type ferritic steels, investigating additives effects on ductile-brittle transition temperature

05 p0672 A72-16012

Al and steel plate penetration, perforation and fragmentation under hard steel sphere impact at and above ballistic velocities, investigating velocity and strain histories

05 p0672 A72-16115

Dissolved oxygen effect on structure and toughness of nonalloyed extruded steels, observing austenite recrystallization kinetics retardation after hot plastic deformation

05 p0672 A72-16143

Unstable propagation and brittle fracture arrest in steels from double cantilever beam test under compression

05 p0677 A72-17107

Mechanical, technological and physical properties of steel with and without molybdenum

05 p0679 A72-17204

Ductile fracture development in steel due to microcracks and pores formation

05 p0679 A72-17205

Fine oxide particle inclusions in mild steel weld metal deposited by carbon dioxide shielded metal arc process, using electron microscopy and diffraction pattern photography

06 p0820 A72-17706

Cyclic loading effects on resistance to brittle fracture of low carbon structural steels, using crack with criterion

06 p0831 A72-18353

Plasticity onset and brittle fracture of annealed steel as function of preceding strains

06 p0831 A72-18354

Maximum temperature-holding time effects on plastic deformation and fracture of steel under thermal cyclic loads

06 p0831 A72-18359

Refractory and structural steels and Al alloys, obtaining low cyclic plastic deformation and breaking stress curves

06 p0898 A72-18549

Steel sheet creep, plastic deformation and service life under temperature and stress cycles

06 p0899 A72-18558

Stress distribution during plastic deformation of steel turbine disk from hardness measurements

06 p0900 A72-18670

Ti influence on ductility of normalized low alloy steel, considering crack initiation and propagation

06 p0834 A72-18687

Thermostable and heat resistant steels and alloys vibration loading frequency effects on fatigues at high temperatures

06 p0834 A72-18688

Special steels - Conference, Nantes, France, May 1971

07 p1010 A72-18969

Steel cutting suitability test, determining optimum cutting conditions for pure iron used in magnetic applications

07 p0994 A72-18973

Austenitizing conditions effects on hardness and microstructure of tempered steel, emphasizing martensite structure and grain size changes produced by controlled heat treatment

07 p0995 A72-19486

Ti, Fe, Co, Ni, Pt and steels phase transformation and thermal defect effects on high temperature thermal conductivity

07 p1012 A72-19548

Radioactive molybdenum disulfide lubrication films distribution on nitrated steel and on magnesium pig iron

07 p0996 A72-19775

Strength differential effect on microstructures of steels, using tensile and compressive stress-strain curves

07 p1015 A72-19927

Ductility and fracture of heat resistant steels at high temperatures and unsteady loading, estimating loading cycle effect on plastic strain buildup to failure

07 p1017 A72-20127

Stress-strain behavior of steel under elastic compression at 4.2 K, observing discontinuous twinning

07 p1020 A72-20413

Heat treatment effect on elastic properties of steel clad material for devices in sulfuric acid, discussing structural changes and optimal conditions

07 p1020 A72-20415

Nondestructive ultrasonic determination of defects in structural steel blanks

07 p0991 A72-20423

Special steels - Conference, Nantes, France, May 1971

07 p1021 A72-20482

Physicomechanical properties of steel with oxide, sulfide, silicon, phosphorus and mixed metal-non-metal inclusions

07 p1022 A72-20618

Gamma radiation source energy and activity determination for radiometric flaw detection in steel

08 p1177 A72-21775

Water effect at epoxy resin-steel interface on adhesive bond strength as function of vitrification temperature

08 p1196 A72-21863

Structural changes of nitrated steel diffusion zone, showing alpha solid solution and hard nitride phases mixture

08 p1188 A72-21880

Statistical crack length distribution of flaw sizes in steel parts during manufacturing

09 p1328 A72-22920

Plastic deformation effect on structure and properties of steel sheet under biaxial tension at liquid nitrogen temperature

09 p1330 A72-23187

Wear resistance of steel and Ti alloys in free abrasive gas jet, noting surface microhardness increase effect

09 p1319 A72-23188

Sintering and aging effects on mechanical behavior of low carbon copper steel

10 p1488 A72-24696

Environmental sensitivity effect on crack propagation rates in steels and Al and Ti alloys, discussing corrosion fatigue

10 p1499 A72-24899

Chemical compositions, properties and heat treatment of Ti, Al alloys and steels used in aircraft industry

11 p1652 A72-25286

Thick steel plate diffusion welding in air with dead-weight loading and autogenous surface cleaning

11 p1637 A72-25343

Phase transformations and recrystallization study of Ti-steel bimetal with emission microscope, observing high temperature formation of titanium and vanadium carbides

11 p1654 A72-25493

Hardened steel inhibited crack propagation mechanism, observing striation in microstructure on fracture surface

11 p1656 A72-25710

Crystal grain size effect on fracture initiation in mild steel under triaxial stress, using notch tests at low temperatures

11 p1657 A72-25756

Locati and Prot methods for metal fatigue limits evaluated by axial and rotating bending tests on steel specimens 11 p1657 A72-25824

Upper yield stress effect on elastoplastic behavior of mild steel in bending and torsion, noting relationship to strain rate 11 p1659 A72-25894

Russian book on Nb in ferrous metallurgy covering physicochemical properties, steels, slags, ore reduction and smelting for Al alloys production 11 p1659 A72-26048

Heat treated carbonized, cyanided, nitrided and boronized steels fatigue limit dependence on static strength, residual stress, brittleness and stress concentration 11 p1659 A72-26128

Mechanical, technological and physical properties of steel with and without molybdenum 11 p1660 A72-26139

Ductile fracture development in steel due to microcracks and pores formation 11 p1660 A72-26140

Electrolyte temperature, pH and mixing rate effects on anodic dissolution of steels and brass in electrochemical precision processing, using thermokinetic data processing 11 p1640 A72-26257

Continuous drive friction welding of mild steel, noting burn-off rate relationship to tensile strength 11 p1641 A72-26492

Low carbon ultrafine grain steel tensile behavior, noting critical grain size for stable/unstable plastic flow transition 11 p1661 A72-26651

Diamond burnishing effect on surface quality and fatigue strength of steel, noting work hardening increase and compressive residual stresses buildup in surface layer 11 p1642 A72-26811

Helicopter rotor blade spars shot peening in centrifugal vibrator, optimizing Cr-Mo-Ni steel surfaces work hardening 11 p1642 A72-26820

Powder metallurgy versus melting and casting of high temperature alloys, tool steels and specialty alloys 11 p1646 A72-26869

Plane titanium and niobium carbide precipitation in microalloyed steels during heat treatment above 1300 C, noting eutectic sulfide effect 12 p1827 A72-27102

Ball bearings lubricated with oils and fire-resistant fluids, testing fatigue life relationship to steel quality, fluid film thickness and viscosity 12 p1816 A72-28108

Characteristic friction curves /Mohr circle envelopes/ to describe stressed state region with various stresses produced by slide friction in steel due to indentation 12 p1819 A72-28198

Isotropy postulate corollary verification for strain vectors measurement of annealed steel tubular specimens under combined tension and internal pressure 12 p1887 A72-28232

Low carbon steel prior plastic deformation effects on mechanical hysteresis loop shape 12 p1887 A72-28234

Crack and notch induced stress concentrations effect on steel mechanical properties at 20-293 K, using static and dynamic test methods 12 p1831 A72-28240

Steel components contact fatigue kinetics measurement by emf increase of inductive sensor 12 p1887 A72-28245

Surface finishing effects on steel sensitivity to stress concentration under variable loads, emphasizing diamond smoothing and roller technique 12 p1831 A72-28246

Ultrafine grained microstructures and mechanical properties of alloy steels developed by cold working followed by annealing 13 p1974 A72-28662

Hardened coarse-grained steels recrystallization during fast heating, investigating martensite phase macro- and microstructural changes by X ray analysis 13 p1977 A72-28908

Room temperature uniaxial tension tests for elastic deformation of steel samples, showing quadratic stress-strain function 13 p1977 A72-29008

Velocity field at strain center during steel channel rolling, deriving relations for center contour calculation 13 p1964 A72-29149

Ultrasound reflection from molten core during spot welding of steel alloys as function of geometrical dimensions and configuration and transition zone dimensions 13 p1965 A72-29152

High speed photographic analysis of spot welding galvanized steel, observing three stage process 13 p1958 A72-29421

Steels shafts fatigue failure under cyclic loading and fretting corrosion, indicating fatigue strength increase through surface layer wear resistance augmentation 13 p1979 A72-29476

Borated steels strength under static bending, cyclic flexure and torsion and impact loads, correlating fatigue strength, residual stresses and core properties 13 p1979 A72-29477

Steels structural and microhardness changes by pulsed laser beam induced local heat treatment, noting needleshaped grain refinement 13 p1979 A72-29482

Aviation fuels and additives effect on steel endurance limit at room temperature 13 p1980 A72-29487

Niobium and molybdenum carbide film deposition on steel substrates by open arc welding with partial carbon burnout 14 p2107 A72-30156

Lower oxide mechanism in reduction-oxidation reactions during Ti steels electrosmelting with slag and gas phases 14 p2112 A72-30158

Temperature effects on critical crack opening as fracture toughness criterion for medium strength steel, taking into account local plasticity and propagation resistance 14 p2118 A72-30590

Hot rolled steel bar strain history effect on isotropic and anisotropic plastic behavior, considering additional tension and torsion data 15 p2325 A72-31527

One dimensional wave pulse propagation, attenuation and dispersion in uniaxially reinforced steel-epoxy resin composites 15 p2325 A72-31528

Refractory steels heat resistance improvement by surface saturation with Be and subsequent oxidation in air at 900-1000 C, comparing with aluminized steels 15 p2255 A72-31574

Mechanical properties of high temperature steels and alloys for gas turbine rotors, disks and blades 15 p2256 A72-31703

Mechanical properties and residual stresses in and adjacent to interface of explosively welded Al-Zn-Mg alloy with steel, noting microcracks effect on weld strength 15 p2257 A72-32111

Mossbauer spectroscopy theory and application to steel technology, discussing spectral characteristics of various iron phases and corrosion and stress effects 16 p2405 A72-32824

Deformation modes for deep drawing of extramild steel sheets, noting susceptibility and rupture criteria 16 p2396 A72-32872

Work hardening and anisotropy coefficients effects on deep drawing limit curves for extramild steel, noting rupture strain and deformation trajectories 16 p2396 A72-32873

Charpy impact tests of neutron irradiated nuclear reactor component steels to determine ductile/brittle transition temperature, describing setup and gas heating and cooling procedures 16 p2373 A72-33222

High temperature strength and ductility study of hot working behavior of steels, using hot impact tension tests 16 p2406 A72-33316

C diffusion mobility and coefficients in W-Mo steels gamma and alpha phases, discussing ionization effect on activation energy increase 16 p2408 A72-33538

Precipitation hardening effects on yield strength, toughness and ductile to brittle transition temperature of low alloy steels containing Nb 16 p2409 A72-33809

Error analysis of dynamic yield point measurements based on residual deformation from impact tests of Al alloy and steel specimens 16 p2472 A72-34016

Steels creep behavior relationship to stress-strain curve shape, defining creep resistance as function of strain hardening coefficient 16 p2412 A72-34146

Differences in the creep characteristics at room temperature of steels with and without distinct yield point 17 p2566 A72-34397

Effects of thickness on fatigue crack initiation and growth in notched mild steel specimens. 17 p2627 A72-34747

Strain history effect on isotropic and anisotropic plastic behavior. [SESA PAPER 1940] 17 p2631 A72-34820

Russian book - Plastic deformation of high-alloy steels and alloys 17 p2568 A72-35454

Influence of cerium, lanthanum, neodymium, and boron on the critical points and the linear expansion coefficient of Kh17N2 steel 17 p2569 A72-35523

Phenomenology and engineering significance of creep recovery in heat resistant steels, stressing ductility and microstructural effects 19 p2816 A72-37707

Investigation of the effect of some surface-active media on the variations in strength characteristics of steel U8 in a high strength state 19 p2817 A72-37738

Investigation of the influence of surface treatment purity and procedure on the strength of the Kh18N10T and Kh16N6 steels and the AMG6 alloy at normal and low temperatures 19 p2819 A72-38016

Possibility of using the eddy-current method to measure the local magnetization of an object. 19 p2805 A72-38761

The use of an electrical induction method for determining the physical condition of a ground steel surface. 19 p2805 A72-38762

Relation between the reliability and allowable stress amplitude in fatigue design. 20 p2977 A72-38879

Testing of hydrogen pressure or stress concentration induced crack propagation theory for steels based on decohesion mechanism 20 p2935 A72-39003

Effect of thickness and orientation on fatigue crack growth rate in 4340 steel. 20 p2937 A72-39294

Cyclic stress-strain induced buckling and fatigue failure in cold-rolled steel and tabulating and diagramming mechanical properties 21 p3065 A72-40233

Influence of the cycling frequency on the fatigue and corrosion fatigue of steel samples with bushings 22 p3242 A72-43155

Investigation of the wear resistance carbonized chromium coatings on various brands of steel 22 p3195 A72-43159

Determination of the mechanical properties of steels by short-time rupture in hydrogen at high temperatures and pressures 22 p3195 A72-43160

Heat resistant steels long time strength determination by graph-analytical time-temperature extrapolation 23 p3301 A72-43739

Strain-rupture criteria for simple and complex loads 23 p3349 A72-43954

Cold shortness of 14Kh2NZMA steel 23 p3303 A72-44023

Ultrasonic attenuation and velocity in hot specimens by the momentary contact method with pressure coupling, and some results on steel to 1200 C. 23 p3294 A72-44116

Cumulative damage stochastic models and distributions of strength of steels and graphite. 24 p3412 A72-44673

Ductility relationship to plasticity characteristics in cylindrical steel samples with short notch under tension 24 p3458 A72-44933

Steels modulus of elasticity dependence on prestressing level produced by transverse and longitudinal tension 24 p3413 A72-44937

Cyclic loading effects on resistance to brittle fracture of low carbon structural steels, using crack width criterion 24 p3416 A72-45740

Plasticity onset and brittle fracture of annealed steel as function of preceding strains 24 p3416 A72-45741

Maximum temperature-holding time effects on plastic deformation and fracture of steel under thermal cyclic loads 24 p3416 A72-45746

Ductility and fracture of heat resistant steels at high temperatures and unsteady loading, estimating loading cycle effect on plastic strain buildup to failure 24 p3416 A72-45753

- Stellar atmosphere UV spectral line broadening by electron collision, radiative and classical damping 08 p1237 A72-21750
- Cosmic sources of organic compounds from chemical evolution viewpoint, discussing comets, interstellar space, prestellar nebulae and cool stellar atmospheres 08 p1120 A72-22014
- Astrophysical abundances analysis, discussing assumptions of local thermodynamic equilibrium and microturbulence in stellar atmospheres 09 p1386 A72-22659
- Book on stellar atmospheric physics covering gray and nongray atmospheres, radiation emission and absorption, transfer equation, Eddington approximation, spectral lines formation, etc 10 p1532 A72-23725
- T Tauri type variable stars spectral features relation to evolutionary sequences, noting stellar atmosphere nonthermal equilibrium plasma region effects 10 p1549 A72-25056
- Stellar atmospheric structure physical parameters from model atmosphere calculations, applying method to G and K stars 11 p1717 A72-25904
- Abundance in cold stellar atmospheres, noting effect on atmospheric thermal stratification and energy transfer from molecular spectra 11 p1722 A72-26432
- Variable white dwarf radial pulsation periods explained by nonradial oscillations and gravity modes, considering atmospheric mixing with degenerate core 12 p1868 A72-27260
- Nonlinear differential energy equation of static state stellar atmospheres with radiation and heat conduction terms 13 p2036 A72-28890
- Avrett-Krook temperature correction procedure modified to improve, near surface convergence for blanketed model stellar atmospheres 13 p2040 A72-29406
- Goldberg and Unno method application to microturbulent velocity determination in stellar atmosphere with convection 13 p2047 A72-29732
- Magnetic neutron stars /pulsars/ atmosphere, questioning vacuum approximation method applicability 14 p2160 A72-30887
- Stellar UV radiation spectral energy distribution investigation of stellar composition and atmosphere and

interstellar gas, discussing observation restriction by earth atmosphere absorption

15 p2302 A72-31284

Lower zero age main sequence star models uncertainties, comparing nonmixing and mixing length theory for various composition atmospheres

15 p2314 A72-32367

Radiative stellar envelopes circulation velocity calculation for various cylindrical rotation laws using perturbation method

15 p2314 A72-32371

Stellar and planetary atmosphere dynamics, deriving balance equations for variance analysis of angular momentum

16 p2453 A72-33247

Equations of state and equilibrium for electron gas in strong magnetic field, discussing effects in pulsar crusts and atmospheres

16 p2460 A72-33929

Stellar evolution and rotation data acquisition from photometric analysis of B-F main sequence stars, considering different models for rotating atmospheres

16 p2462 A72-34184

Meridian circulation with rapid differential rotation in radiative stellar envelopes.

17 p2605 A72-34532

Transfer of polarized radiation in a stellar atmosphere.

17 p2605 A72-34533

The limb darkening problem in eclipsing binaries.

17 p2612 A72-35382

Limb darkening for B-type main sequence stars in the infrared.

17 p2612 A72-35383

A model atmosphere analysis of the Ap star HR 465.

18 p2727 A72-36736

The metal-to-hydrogen ratio in F1-F5 stars, as determined by a model-atmosphere analysis of photoelectric observations of a group of weak metal lines.

18 p2727 A72-36737

The measurement of polarized 10-micron radiation from cool stars with circumstellar shells.

19 p2854 A72-37232

Studies of hydrodynamic events in stellar evolution. II - Dynamic instabilities in stellar envelopes.

19 p2854 A72-37234

On circumstellar molecules in the Pleiades.

19 p2856 A72-37508

Astronomical observations supporting stellar atmosphere microturbulence concept, noting Cepheid variables high dispersion spectra, supergiants irregular changes and microturbulence hydrodynamic effect

19 p2857 A72-37525

Energy variation curves for direct flare radiation and reflection from eruptive star atmosphere, discussing color variations

19 p2858 A72-37808

Extent of information that can be obtained from the luminosity loss curves of eclipsing systems with extended atmospheres

19 p2860 A72-37953

Two quantum induced photon-plasmon transition probability for hydrogen atom in processes of nebulas and stellar chromospheres

19 p2837 A72-38058

Thermalization lengths and mean numbers of scatterings for line photons.

20 p2956 A72-39759

On the chemical composition of epsilon Pegasi.

20 p2974 A72-39901

Russian book - Large-scale motions in the convective zones of stars and large planets.

21 p3104 A72-40462

Relaxation oscillations in the envelopes of luminous red giants.

21 p3105 A72-41034

Transfer of resonance-line radiation in differentially expanding atmospheres. II - Analytic solution for the case of coherence in the frame of the fluid.

21 p3106 A72-41038

Oxygen abundances of three population II horizontal-branch stars.

21 p3109 A72-41330

Radiative transfer equations solution for stellar spherical atmosphere by Grant-Hunt method, approximating intensity derivative over angular variable with Legendre polynomials

21 p3109 A72-41433

Chou-Tien nonplane-parallel solution to transfer equation for radiation scattering by free electrons in stellar spherical atmosphere by regional averaging procedure

21 p3109 A72-41434

Mechanical equilibrium equation of nongray stellar matter, approximating electron pressure vs temperature in early stellar atmospheres

21 p3109 A72-41435

Mean coefficient of opacity in stellar atmosphere model calculations

21 p3110 A72-41443

Curve of growth analysis of F star beta Cas and 10 UMa atmospheres for Ca, Sc, Ti, Cr, Mn and Ni-to-Fe abundance ratios

21 p3110 A72-41444

Model atmosphere analysis of the A 31a-O supergiant HD 33579 in the Large Magellanic Cloud.

22 p3225 A72-42386

Cool supergiant stars atmospheric model for chemical composition change effects due to nuclear burning cycle

22 p3227 A72-42556

Theory of radiative heat transfer in polytropic atmospheres

22 p3229 A72-42962

Giant stars iron abundance from narrow band spectrophotometric analysis and model atmospheres, isolating super metal rich stars below H-R diagram subgiant branch

23 p3334 A72-43256

Spectral variabilities of magnetic peculiar A stars associated with atmospheric chemical composition anomalies, using inclined rotator model

23 p3335 A72-43297

The influence of ultraviolet line blanketing on the neutral helium triplet lines in B-type stars.

24 p3438 A72-44834

STELLAR DOPPLER SHIFT

U DOPPLER EFFECT

U EXTRATERRESTRIAL RADIATION

STELLAR EVOLUTION

Book on nuclear reactions in stellar surfaces and relations with stellar evolution covering high energy L elements formation, Li-Be observations and thermonuclear and spallation theories

01 p0122 A72-10002

Isothermally contracting turbulent gas sphere for stellar formation from extension of Chandrasekhar work on Jeans criterion for static turbulent medium

01 p0129 A72-10799

Cepheid variables mass discrepancy from evolution and pulsation theories, emphasizing opacity changes, luminosity values and effective temperature

01 p0133 A72-11128

Spectroscopic He abundance in population II stars from viewpoint of big-bang cosmology, taking into account neutrino emission according to photon-neutrino coupling theory

02 p0281 A72-12303

Dust particle formation in circumstellar space accompanying star formation, discussing necessary and sufficient condition for grain escape by fragmentation

02 p0284 A72-12637

Stellar secular stability during complex roots onset in model evolution, discussing radiative heat transport coefficient effects

03 p0416 A72-13004

He abundances in universe, discussing stellar structure and evolution, He production, variable stars and globular clusters H-R diagrams shape

03 p0418 A72-13112

Dense cloud and protostar molecules from molecular line emission, considering mass effects in stellar evolution

03 p0419 A72-13120

Absolute magnitudes and mass-radius relationship of RR Lyrae stars for stellar evolution calculations

03 p0421 A72-13140

Magellanic Clouds cepheid variables compared to Milky Way cepheids, discussing evolution tracks

03 p0425 A72-13261

Massive star evolution, discussing stellar structure theory uncertainties, young clusters, helium burning and evolutionary tracks

03 p0425 A72-13262

Binary systems formation probability during triple encounters, observing dependence on system/potential energy ratio

03 p0435 A72-13809

Stellar evolution in close binary systems, discussing post main sequence stage, hydrodynamical processes and dwarf binaries

03 p0437 A72-13868

Nuclear reactions in anomalous element abundances production for peculiar A stars, considering surface diffusion and surface and internal nuclear processes

03 p0437 A72-13872

Soviet book on long period variable stars covering spectral data photometric characteristics, spatial and kinematic properties, absorption effect and evolution

03 p0439 A72-14224

One zone model formulation and mathematical behavior for evolution of galaxies, discussing stellar birth rate and end states

04 p0570 A72-14551

Solar model for capture rate in C1 37 neutrino experiment, comparing different stellar evolution programs

04 p0566 A72-14562

Gravitational waves proposed origin, considering black holes, star collapse, white dwarf and neutron star formation and galaxy center neutron star clustering

04 p0576 A72-15074

Metal-rich 1.19 solar mass main sequence star evolution to convection onset in core during He flash

04 p0577 A72-15283

Cyg X-1 type X ray sources evolution, discussing white dwarf and supernovae stages, parent mass and angular momentum

04 p0568 A72-15508

Cosmological evolution theories, discussing big bang theory, galactic evolution, quasars, pulsars, gravitational collapse, stellar evolution, supernovae, black holes, etc

05 p0716 A72-16311

White dwarf magnetic fields decay time scale for dipolar and toroidal configurations

06 p0876 A72-17581

Elemental synthesis and energy sources in stellar evolution, hydrogen, helium and advanced burning stages, p-p cycle, e process and nuclear equilibrium

06 p0876 A72-17585

Model computations for population I stars of 0.6, 0.8 and 1.2 solar masses, considering evolutionary sequences correspondence to planetary nebulae evolution

06 p0882 A72-17999

Stellar evolution, pulsation and atmosphere theories: for globular cluster stars comparison with observations in bulk properties estimation

07 p0171 A72-19332

Galactic cluster M67 blue straggler stars in pseudohorizontal branch, determining stellar mass relative to turnoff point stars and zero-age main sequence

07 p0171 A72-19335

Stellar extinction and genesis with Galaxy, discussing Li role in nucleosynthesis and degenerate star structure theory

07 p0173 A72-19427

Hydrogen-helium stars evolution, noting high surface temperature

07 p0175 A72-19581

Neutron star evolution theories, emphasizing neutrino emission processes and stellar collapse

07 p0180 A72-20056

Elemental nucleosynthesis, considering cosmological, stellar, galactic and solar system evolution and atomic nuclei energetic levels

07 p0183 A72-20466

Population I stars and open cluster age determination methods based on stellar evolution theory, discussing inherent uncertainties effects

07 p0183 A72-20467

Population II stars age determination by main sequence turnoff luminosity and other methods, noting cosmological and galactic evolution implications

07 p0183 A72-20467

Astrophysical helium production by massive pulsationally unstable pure hydrogen stars evolving inhomogeneously with mass loss

07 p0184 A72-20691

Soviet monograph on universal gravitation covering prerelativistic theories, inverse square law, relativistic effects, celestial mechanics, stellar structures and evolution, etc

08 p1231 A72-21025

Pulsar and supernova remnant relative space position based on runaway pulsar hypothesis, discussing pulsar period-luminosity relation from evolutionary standpoint

08 p1233 A72-21186

Unstable binary RW Aur spectrophotometric study with stellar evolution and outer atmosphere implications, relating Balmer continuum to UV excess

08 p1233 A72-21277

Initially stationary axisymmetric disk of stars evolution calculated by gravitational potential solver for various values of velocity dispersion

09 p1383 A72-22460

Main sequence star evolution relation to pulsar formation, discussing stellar core density at carbon ignition with respect to critical density limit

09 p1394 A72-23698

Neutron star properties, formation theories, crust composition and internal structure, examining interior neutron behavior, fermion systems superfluidity, magnetic field effects and stellar dynamics

10 p1533 A72-23890

Cepheid instability strip stellar models pulsation properties compared with delta Scuti stars and AI Velorum variables observation data for stellar evolution studies

10 p1542 A72-24611

Hyades member star BD plus 16.516 deg described as late evolution product of binary system with mass exchange and loss through planetary nebula phase

10 p1543 A72-24618

Cepheid variables evolutionary and blue edge calculations reconciled with observation

10 p1544 A72-24665

Stellar evolution from precarbon-burning contraction to presupernova stage with and without neutrino production by electron neutrino interaction

10 p1545 A72-24825

Main sequence, red giant and white dwarf stars convective envelopes evolution, discussing mixing length theory inadequacy

10 p1545 A72-24826

Spiral galaxy density wave maintenance mechanism from rotating disk star-gas system model description of stellar birth and disintegration effects
10 p1547 A72-24869

Hydrogen gas cloud gravitational contraction and fragmentation in expanding universe, noting cooling and massive stars formation
10 p1547 A72-24870

Total mass content of early type star clusters associated with reflection nebulosities
10 p1548 A72-24966

T Tauri type variable stars spectral features relation to evolutionary sequences, noting stellar atmosphere nonthermal equilibrium plasma region effects
10 p1549 A72-25056

Gas and dust cloud evolution with allowance for dimensional finiteness and stellar evolution into red supergiant after hydrogen depletion
11 p1715 A72-25297

One and two boundary curves systems for Vlasov equation of one dimensional collisionless self gravitating stellar systems evolution with constant phase space density
12 p1874 A72-27912

Boundary curves for collective relaxation in one dimensional collisionless two phase space density self gravitating stellar system evolution, noting velocity dispersions dependence
12 p1875 A72-27913

Stellar gravitational collapse to neutron stars and black holes, discussing gravitational wave emission from Galactic center
12 p1875 A72-27958

Two phase flow model of cloud and star formation by galactic shocks in quasi-steady interstellar gas flow in spiral gravitational field
13 p2040 A72-29404

Thermonuclear detonation and reimplosion of dense stellar cores, studying beta-processes effect on post-detonation evolution
13 p2044 A72-29625

Evolution of extreme population I massive stars from main sequence to He exhaustion phase, discussing various development phases in H-R diagram
14 p2158 A72-30727

Near-solar mass star secular stability during gravitational contraction and main sequence phases, considering static and quasi-static models
14 p2158 A72-30734

Nova Delphini evolution from metallic absorption lines observations before December 1967 maximum, obtaining dispersion variation with wavelength
14 p2159 A72-30741

Adiabatic stellar shells stability in cases of rigid and compressible nucleus
15 p2304 A72-31334

Shell formation during star collapse due to rotational instability, discussing relativistic effects
15 p2305 A72-31337

Book on astronomy covering optical and radio telescopes properties and atmospheres of inner and outer planets, stellar lifetimes and evolution, galaxies, cosmology, etc
15 p2306 A72-31516

Algorithmic calculation for composition changes due to nuclear reactions and convective mixing during stellar evolution
15 p2314 A72-32374

Planetary nebulae nuclei evolution, describing shell ejection mechanism with dependence on progenitor star luminosity
16 p2451 A72-33032

Magnitude redshift relation in flat Brans-Dicke cosmology, discussing gravitational constant effects on stellar evolution and galactic luminosity
16 p2455 A72-33471

Helium stars linear and nonlinear pulsation and evolutionary computations, establishing instability strip with two solar mass models
16 p2458 A72-33720

Stellar magnetic oblique rotator internal moment field construction by perturbation technique estimating energy dissipation and turbulent viscosity
16 p2458 A72-33721

Numerical calculation for axisymmetric gas cloud rotation effects on collapse, noting implications for star formation and fragmentation
16 p2458 A72-33722

Model for low energy galactic cosmic ray effects on young and F star Li abundance and H I region heating
16 p2448 A72-33740

Stellar evolution and rotation data acquisition from photometric analysis of B-F main sequence stars, considering different models for rotating atmospheres
16 p2462 A72-34184

Studies of extremely young clusters. VI - Spectroscopic observations of the ultraviolet-excess stars in the Orion Nebula cluster and NGC 2264.
17 p2605 A72-34530

Collapse calculations for 0.25-10 solar mass spherical protostars, discussing stellar core evolution and temperature distribution in infalling cloud
17 p2606 A72-34674

The reddening, distance modulus, chemical composition and age of the galactic cluster NGC 752.
17 p2607 A72-34675

Studies of hydrodynamic events in stellar evolution. I - Method of computation.
17 p2611 A72-35316

Fundamental data for massive stars compared with theoretical models.
17 p2611 A72-35317

Nonspherical perturbations of relativistic gravitational collapse. I - Scalar and gravitational perturbations. II - Integer-spin, zero-rest-mass fields.
17 p2612 A72-35390

Russian book - Theory of gravitation and the evolution of stars
17 p2613 A72-35452

Formation of neutron star spots and its connection with pulsars. I.
17 p2613 A72-35502

Supergiants internal structure, evolution and spectral characteristics, discussing instability phenomena and luminosity calibration
18 p2723 A72-35995

Astrophysical theories of supernovae outbursts as stellar evolutionary nonstationary phase in terms of thermal instability of degenerated matter or stellar explosion
18 p2725 A72-36399

Evolution of close binary systems with intermediate initial mass ratios.
18 p2728 A72-36741

Experimental nuclear physics and theoretical solar structure and evolution explanations of disagreement between calculated and observed solar neutrino flux
18 p2722 A72-37007

Studies of hydrodynamic events in stellar evolution. II - Dynamic instabilities in stellar envelopes.
19 p2854 A72-37234

Variation of evolved blue/red ratio for supergiants as function of stellar mass, discussing status of astrophysical test for neutrino emission
19 p2854 A72-37235

Hydrostatic oxygen burning in stars. II.
19 p2854 A72-37236

Central galactic plane, interstellar medium and spiral arm conditions for star formation in Milky Way
19 p2855 A72-37249

The colour-magnitude diagram of the globular cluster NGC 6981.
19 p2855 A72-37342

Single body and stellar cluster models of quasars and galactic nuclei stability, noting neutron and collapsing star lifetimes
19 p2862 A72-38052

Unsteady hydrodynamic accretion on a neutron star
19 p2862 A72-38053

Secular stability. I - A Population I star near the main sequence.
19 p2864 A72-38099

Pulsars as stellar population, considering physical models, pulse emission radiation mechanism and use in galaxy studies
19 p2865 A72-38476

Protostars formation through interstellar atomic hydrogen clouds gravitational collapse, deriving critical mass, surface temperatures and luminosities
19 p2865 A72-38478

Star cluster age relation to mass ratios of stars and interstellar hydrogen and dust
19 p2867 A72-38511

The influence of local conditions in the interstellar medium upon star formation.
19 p2868 A72-38699

Hydrodynamic model of white dwarf envelope thermonuclear runaway evolution producing nova outburst, computed for various CNO nuclei initial abundances
20 p2966 A72-38908

Gas density as function of galactic radius according to Jeans unstable criterion for star formation from known galaxy rotation curve and gas sound speed
20 p2966 A72-38917

An estimate of stellar wind mass loss during the red giant phase of evolution.
20 p2967 A72-39187

Stellar energy-loss rates in a convergent theory of weak and electromagnetic interactions.
20 p2972 A72-39868

On the influence of the opacity values on static stellar models. I - Horizontal branch stars.
20 p2973 A72-39879

Finite radial oscillations of uniformly rotating gravitating magnetized fluid cylinder model of star formation dynamics
21 p3109 A72-41331

Curve of growth analysis of F star beta Cas and 10 UMa atmospheres for Ca, Sc, Ti, Cr, Mn and Ni-to-Fe abundance ratios
21 p3110 A72-41444

Self similar procedure derived for gas fall to solid surface in constant gravitational field, applying to initial phase of neutron star matter accretion
21 p3113 A72-41753

Computer-aided numerical experiment of cluster mass increase by accretion in protostar evolution
21 p3113 A72-41754

Dark dust nebulae and bright H II clouds, considering light molecules, stellar birth region, radio and IR astronomy
22 p3220 A72-41995

On circumstellar gas emission among pre-main-sequence stars in Ic Orionis and NGC 2264.
22 p3227 A72-42555

Nucleosynthesis theory for advanced thermonuclear evolution models of massive stars from helium burning through final hydrodynamic stages
22 p3227 A72-42561

Approximation of energy generation and nucleosynthesis during hydrostatic carbon burning in massive stars, noting neutrino-dominated evolution effects
22 p3228 A72-42562

Studies of heavy-element synthesis in the galaxy. I - Separation of r- and s-process abundances.
22 p3228 A72-42563

Unsteady phenomena in the world of stars and galaxies
22 p3230 A72-43153

Numerical models for He stars structural evolution, considering main sequence models of 1-8 solar masses and different carbon enrichments
23 p3334 A72-43258

Mixing between stellar envelope and core in advanced phases of evolution. IV - Effect of super-adiabaticity in convective envelope.
23 p3335 A72-43486

Extended horizontal branch loci.
23 p3337 A72-43830

Galactic evolution - Program and initial results.
23 p3337 A72-43832

Inconsistency of gravitational constant variability in inverse proportion to time from viewpoint of stellar and solar system age, life development and physical three dimensional space
23 p3338 A72-44037

Gravitational emission in the scalar-tensor theory of gravitation
23 p3315 A72-44476

Resonance effects on second order anharmonic pulsational amplitudes for polytropic main sequence evolutionary models, classifying Cepheid-type pulsators
24 p3437 A72-44832

Stellar implosion, gas cloud collapse into white dwarf or neutron star and atomic hydrogen cloud collapse, considering effects of cosmic bodies at high velocities
24 p3439 A72-45017

Solar oblateness and neutrino flux measurement experiments, discussing agreement with solar interior and evolution models
24 p3446 A72-45527

STELLAR FIELDS
U STAR DISTRIBUTION
STELLAR GRAVITATION
Stability theory for a star with a toroidal magnetic field
19 p2863 A72-38062

Double water-bag model stability for plane one dimensional stellar system, computing eigenfrequencies and eigenfunctions
22 p3224 A72-42384

STELLAR INERTIAL NAVIGATION
U CELESTIAL NAVIGATION
U INERTIAL NAVIGATION
STELLAR LUMINOSITY
Stellar intensity effect on angular navigation sighting accuracy attainable between star and lunar limb using Apollo T2 sextant
01 p0097 A72-10566

RR Lyrae variables intermediate band photometry, tabulating magnitudes and color of 125 stars
01 p0133 A72-11129

X ray rocket observations of time variation of SCO X-1 energy spectrum and optical luminosity at 2-20 keV
02 p0281 A72-12307

Supernovae remnants intrinsic luminosity-diameter correlations from soft X ray emission data, taking into account interstellar medium
03 p0408 A72-13008

Pulsar observation data, presenting period histogram, intensity, shape and polarization variations, position distribution, physical nature and spectra
03 p0417 A72-13102

Helium abundance in stellar interiors, considering mass-luminosity relations of Hyades
03 p0419 A72-13114

RR Lyrae stars absolute magnitude determination by statistical parallaxes method
03 p0421 A72-13139

Absolute magnitudes and mass-radius relationship of RR Lyrae stars for stellar evolution calculations
03 p0421 A72-13140

Cepheid variables compared for Milky Way and Small and Large Magellanic Clouds, discussing amplitudes, period-luminosity relations and light curves
03 p0425 A72-13255

Magellanic Clouds bright star intermediate band photometry, discussing interstellar extinction and luminous supergiants

03 p0425 A72-13257

Small Magellanic Cloud NGC 371 region photometric studies for cepheids period-luminosity relations, noting domination by young supergiant stars

03 p0425 A72-13258

Eclipsing variable star EQ Taurus photoelectric brightness variation observations in B and V light

03 p0433 A72-13488

Halos around black holes, showing luminosities caused by synchrotron radiation of magnetized plasma

03 p0435 A72-13803

Telescopic meteors light curves, showing maximum point brightness distribution in visible trajectory with respect to stellar magnitudes

03 p0438 A72-13985

Starlight intensity modulation at discrete radio frequencies due to enhanced ionospheric electron density fluctuations

03 p0438 A72-14096

UBV magnitude measurement for stars in open clusters NGC 6613 and 6716, determining spectral classes, absorption and distances

05 p0712 A72-15768

Stellar populations in galaxies as function of luminosity, investigating spectroscopic and photometric properties

05 p0716 A72-16370

GX3 plus 1 identification by sounding rocket during lunar occultations, discussing magnitude

07 p1070 A72-19123

Disk population F-type star photometric luminosities, motions and metal abundance indices, discussing ultrashort period cepheids

07 p1071 A72-19333

Galactic cluster M67 blue straggler stars in pseudohorizontal branch, determining stellar mass relative to turnoff point stars and zero-age main sequence

07 p1071 A72-19335

Pulsars optical counterpart observation, noting Crab Nebula pulsar visual magnitude

07 p1080 A72-20050

Population II stars age determination by main sequence turnoff luminosity and other methods, noting cosmological and galactic evolution implications

07 p1083 A72-20468

N Her 1963 distance, absolute magnitude, stellar mass and explosion-ejected shell mass, using maximum and relative intensity calculation methods

08 p1229 A72-20840

Type R Corona Borealis variable stars luminosity variations attributed to formation of carbon layer from He nuclear transformation process at stellar core-envelope boundary

08 p1231 A72-21086

Pulsar and supernova remnant relative space position based on runaway pulsar hypothesis, discussing pulsar period-luminosity relation from evolutionary standpoint

08 p1233 A72-21180

Semiregular variable CH Cygni observations from 1967 to 1969 with continuous spectrum variations comparison to monochromatic brightness changes

08 p1233 A72-21278

RR Lyrae variables period-luminosity relations explained by linearized pulsation calculations for quenching of first harmonic

08 p1235 A72-21388

Crab pulsar optical pulse stability comparison to radio frequency output, noting negative results in search for polar precession

08 p1235 A72-21396

Wolf-Rayet stars identification in spiral galaxy M33/NGC 598/ from narrow band interference filter photographs, tabulating apparent magnitudes and emission indexes

09 p1382 A72-22281

Spectral types and magnitudes of O and WC stars of binary gamma Velorum system

09 p1382 A72-22282

Stellar magnitude equation for 400 mm photographic telescope, correcting star coordinates measurements

09 p1311 A72-23060

Visual binary star investigations, considering parallaxes, masses, absolute magnitudes and orbit computation

09 p1390 A72-23502

Precessional corrections, solar motion and galactic rotation determination from proper motions by maximum likelihood method, taking into account stars visual magnitude

09 p1391 A72-23535

Stellar brightness variations of T Cep during January 1969-November 1971, considering visual estimates and period length observations

10 p1542 A72-24571

Extragalactic supernovae X ray luminosity upper limits from OSO 3 data, estimating total energies

10 p1544 A72-24667

Visual observations of eclipsing period elements of nova-like variable V Sagittae for estimate of total magnitude of uneclipsed binary

10 p1545 A72-24829

Close binary stars system model for totally eclipsing AW UMa light curves and line profiles, noting very low mass ratio

10 p1550 A72-25195

Stellar physical parameters computed from multicolor photometric data on extraatmospheric magnitudes by maximum likelihood method

11 p1715 A72-25296

Measurement of light pressure-force on Echo 1 satellite based on satellite surface reflection and stellar magnitude as function of phase angle

11 p1718 A72-25939

Close binary stars photometric measurement with electronic camera, noting magnitude difference determination from recorded images

12 p1866 A72-27203

Ap stars with variable periods from magnetic and photometric data analysis

12 p1868 A72-27221

Starry sky energetic simulator design, analyzing comparative brightness of stars

13 p1945 A72-28494

Luminosity variation of star in circular orbit around extreme Kerr black hole due to Doppler effects and gravitational field light focusing

13 p2041 A72-29416

Nonoriented astronomical satellite attitude determination from onboard measurements of geomagnetic field and stellar luminosity

14 p2151 A72-30460

White dwarf background radiation and optical emission variations due to thermal bremsstrahlung from stellar corona

14 p2147 A72-30554

Color photoelectric light pulsations curve of RU Cam variable star during October 1969-August 1970, noting constant mean luminosity and color

14 p2158 A72-30729

Pulsars distance computation, considering period-luminosity relationship and uncertainties inherent in dispersion measure /DM/ method

14 p2159 A72-30738

Fuor luminosity phenomena due to thermal corpuscular radiation emitting energy sources

15 p2304 A72-31330

Photometric characteristics of two types of eruptive binary stars differing in hot spot brightness

15 p2305 A72-31340

Planetary nebulae nuclei evolution, describing shell ejection mechanism with dependence on progenitor star luminosity

16 p2451 A72-33032

Local population II stars density upper limit in terms of mass-luminosity ratio based on U, B and V photometric observations

17 p2604 A72-34442

Occultations of stars by Jupiter

17 p2607 A72-34751

A recalibration of the absolute magnitudes of supergiants.

17 p2609 A72-35115

The limb darkening problem in eclipsing binaries.

17 p2612 A72-35382

Supergiants internal structure, evolution and spectral characteristics, discussing instability phenomena and luminosity calibration

18 p2723 A72-35995

Photometric study of the open cluster NGC 2232.

18 p2728 A72-36742

Consequences of the Stromgren's theorem for radiative envelope stars.

18 p2728 A72-36760

The type II supernova 1969 I in NGC 1058.

18 p2728 A72-36763

Underluminosity and magnetic fields in beta Lyrae.

18 p2729 A72-36982

Luminosities and motions of the F-type stars. II - Metal-deficient stars.

19 p2855 A72-37238

Kinematics of faint M stars near the north galactic pole, and the mass density in the solar neighbourhood.

19 p2855 A72-37341

The association of X-ray sources with bright stars.

19 p2856 A72-37507

Limiting magnitudes of stars in visual telescopic observations /Ground and extraatmospheric locations of instrument and observer/

19 p2859 A72-37907

Early star absolute magnitude from equivalent H gamma and delta line widths and Balmer hydrogen series line

19 p2859 A72-37908

Extent of information that can be obtained from the luminosity loss curves of eclipsing systems with extended atmospheres

19 p2860 A72-37953

Colorimetric and spectrophotometric gradient systems comparison for bright stars used in automatic telescope pointing control, discussing interstellar absorption

19 p2860 A72-37955

Minimum perceivable stellar magnitudes in visual observations by naked eye and telescope, discussing image contrast and angular scale

19 p2860 A72-37961

Declinations of bright and weak stars determined separately from observations in the upper and lower culminations by the Struve-Ertel vertical circle during 1955-1961

19 p2861 A72-37981

Absolute magnitudes and color indexes of red giant concentration centers on a color-luminosity diagram

19 p2863 A72-38069

Radial density distribution and luminosity functions for stars in alpha Persei cluster

19 p2863 A72-38070

The kinematics of open star clusters

19 p2865 A72-38488

Photoelectric photometry of close visual binaries

19 p2866 A72-38499

H and K emission intensity and line width dependence on stars age and luminosity, discussing dwarf stars and giants

19 p2866 A72-38503

Interferometer detection of radio sources near pulsing extar Hercules X-1 during low X ray luminosity period

20 p2963 A72-38918

On the influence of the opacity values on static stellar models. I - Horizontal branch stars.

20 p2973 A72-39879

Structure and motions in the Carina spiral feature.

20 p2973 A72-39880

A study of the interstellar extinction in the Carina-Centaurus region.

20 p2973 A72-39881

Photoelectric light curve of Nova Vulpeculae 1968 N. 1.

20 p2973 A72-39883

Secondary fluctuations in the light curve of epsilon Aur.

20 p2974 A72-39898

Photoelectric observations of the 1971-eclipse of 32 Cyg.

20 p2974 A72-39900

Cosmological model radiation pressure and density calculation by red shift-stellar magnitude ratios from galactic observations

21 p3109 A72-41441

Bright red giants of the globular clusters M 3, M 5, and M 13

21 p3113 A72-41756

Interactions between stars and local dust formations

21 p3113 A72-41758

Stratification of the emission in the envelope of a Wolf-Rayet type eclipsing binary V444 Cyg

21 p3113 A72-41759

Eclipsed binary brightness curve determination by least squares method, using weighted gravity center point observations

21 p3113 A72-41760

Red variables in globular clusters, in the galactic centre and in the solar neighbourhood.

22 p3222 A72-42135

Brightness and polarization structure of four supernova remnants 3C58, IC443, W28, and W44 at 2.8 centimeter wavelength.

22 p3224 A72-42382

The peculiar O6f star HD 148937 and the symmetrically surrounding nebulae.

22 p3227 A72-42557

Physical characteristics of type I supernova envelopes during the initial expansion phase. II - Development of type I supernova spectra after maximum light.

23 p3333 A72-43228

A spectroscopic and photometric study of the pulsating R Coronae Borealis type variable, RY Sagittarii.

23 p3334 A72-43255

Identification of four novae and a super-nova in Palomar Sky Atlas.

23 p3341 A72-44474

Luminosity variation in the one-zone Cepheid model.

24 p3438 A72-44837

Investigation of the variable stars WR-96, GR-29, and WR-96 /2/

24 p3448 A72-45682

Photographic observations of variable stars in the proximity of NGC 6830

24 p3448 A72-45683

STELLAR MAGNETIC FIELDS

NT SOLAR MAGNETIC FIELD

Quasar model proposal as giant pulsar rejected discussing mass, radius, magnetic field strength, luminosity and gamma radiation

01 p0134 A72-11144

Pulsar magnetosphere axisymmetric and vacuum oblique rotator models, emphasizing electromagnetic field properties

01 p0134 A72-11159

Magnetic field role in Ap stars abundance peculiarities model, discussing rotational circulation, convection, accretion and mass loss effects on surface

03 p0416 A72-13010

Pulsars formation rate and connection with supernovae and cosmic rays, discussing stellar magnetic field strength

03 p0421 A72-13134

Electromagnetic pulsar models features and predictions, using rotating neutron stars with strong dipolar magnetic fields 03 p0437 A72-13873

Neutron star and white dwarf strong magnetic field generation mechanism involving thermodynamic equilibrium states of electron gas 05 p0723 A72-17162

White dwarf magnetic fields decay time scale for dipolar and toroidal configurations 06 p0876 A72-17581

X ray pulsations mechanism in Cyg X-1 related to high magnetic fields produced by flare-like events 06 p0873 A72-17636

Pulsar model based on neutron star rotation with skew magnetic field, considering radiated particle acceleration responsible for high energy activity in supernova remnants 07 p1080 A72-20057

Pulsar braking index and period-pulse width distribution calculations within proposed model leading to neutron star surface magnetic field strength estimates 08 p1235 A72-21389

Magnetic star theory, postulating stellar magnetic flux as slowly decaying relic of flux in prestar gas, considering dissipation processes and rotation 09 p1387 A72-22754

Long time behavior of neutron star magnetic fields, noting pulsar evidence for large internal fields in main sequence stars 09 p1389 A72-23393

Magnetic field generation problem in rotating relativistic star for barotropic medium 09 p1391 A72-23537

Neutron star properties, formation theories, crust composition and internal structure, examining interior neutron behavior, fermion systems superfluidity, magnetic field effects and stellar dynamics 10 p1533 A72-23890

Pulsar radiation mechanism study from magnetosphere structure model, taking into account neutron star evaporated gas accumulation in gravitation-centrifugal force balance region 10 p1544 A72-24672

Turbulent plasma dynamo mechanisms of magnetic field origin in astrophysics, noting Steenbeck and Parker theories 14 p2162 A72-31150

Flare mechanism of pulsar radiation near magnetic poles of rotating neutron stars 15 p2298 A72-31627

Pulsar rotating electromagnetic field vectors classification for magnetosphere models 16 p2450 A72-32866

Stellar magnetic oblique rotator internal motion field construction by perturbation technique estimating energy dissipation and turbulent viscosity 16 p2458 A72-33721

The stability of a self-gravitating, nonrotating gas layer with stellar, magnetic, and cosmic-ray components. I. 17 p2611 A72-35313

Underluminosity and magnetic fields in beta Lyræ. 18 p2729 A72-36982

Stability theory for a star with a toroidal magnetic field 19 p2863 A72-38062

Neutron star matter properties and model calculations, investigating magnetic field decay 19 p2865 A72-38482

Line formation in the presence of magnetic fields; Proceedings of the Conference, Boulder, Colo., August 30-September 2, 1971. 20 p2970 A72-39752

Stellar emission and absorption line spectra formation in presence of magnetic field interpreted by radiative transfer equation solution, considering dwarf stars observation 20 p2956 A72-39753

Line spectra and continuum polarization in magnetic white dwarfs. 20 p2971 A72-39760

Magnetic-field variations in 78 Virginis, beta Coronæ Borealis, and 73 Draconis. 21 p3106 A72-41036

Hamiltonian analysis of charged particle motion in the pulsar rotating magnetic field. 21 p3111 A72-41472

Neutron star model for magnetic field and superfluidity effects on cooling during pulsar stage 22 p3228 A72-42565

STELLAR MASS

NT STELLAR GRAVITATION

Cepheid variables mass discrepancy from evolution and pulsation theories, emphasizing opacity changes, luminosity values and effective temperature 01 p0133 A72-11128

Helium abundance in stellar interiors, considering mass-luminosity relations of Hyades 03 p0419 A72-13114

Dense cloud and protostar molecules from molecular line emission, considering mass effects in stellar evolution 03 p0419 A72-13120

Absolute magnitudes and mass-radius relationship of RR Lyræ stars for stellar evolution calculations 03 p0421 A72-13140

Linear nonadiabatic pulsation constants for fundamental mode and first two harmonics of stellar models including Cepheids, observing mass scattering 04 p0579 A72-15319

Model computations for population I stars of 0.6, 0.8 and 1.2 solar masses, considering evolutionary sequences correspondence to planetary nebulae evolution 06 p0882 A72-17999

Close binary system average gravity and effective temperature at Roche limit for 90 deg phase and both conjunctions, taking into account mass ratios and orbital inclination 06 p0882 A72-18002

Stellar velocity distribution functions in nonrotating clusters, considering encounter multiplicity effects and dissipation increase from masses dispersion 06 p0883 A72-18024

Microscopic calculations for nuclear forces, compressibility of neutron matter and maximum mass of neutron stars based on solid state model at high densities 06 p0891 A72-18507

Isolated pulsar or neutron star upper mass limit based on consideration of rotational energy by ejection of low energy cosmic rays or photons 06 p0891 A72-18508

Stellar evolution, pulsation and atmosphere theories for globular cluster stars comparison with observation in bulk properties estimation 07 p1071 A72-19332

Galactic cluster M67 blue straggler stars in pseudohorizontal branch, determining stellar mass relative to turnoff point stars and zero-age main sequence 07 p1071 A72-19335

N Her 1963 distance, absolute magnitude, stellar mass and explosion-ejected shell mass, using maximum and relative intensity calculation methods 08 p1229 A72-20840

Gravitational system dynamics, discussing massive-light star mixtures with collisions and systems with equal mass objects 08 p1231 A72-21121

Synchro-Compton theory for variable compact components in extragalactic radio sources, suggesting stellar mass object collapse as energy source 08 p1233 A72-21181

Visual binary star investigations, considering parallaxes, masses, absolute magnitudes and orbit computation 09 p1390 A72-23502

Main sequence star evolution relation to pulsar formation, discussing stellar core density at carbon ignition with respect to critical density limit 09 p1394 A72-23698

Hyades member star BD plus 16.516 deg described as late evolution product of binary system with mass exchange and loss through planetary nebula phase 10 p1543 A72-24618

Total mass content of early type star clusters associated with reflection nebulosities 10 p1548 A72-24966

Stellar velocity distribution functions in nonrotating clusters, considering encounter multiplicity effects and dissipation increase from masses dispersion 11 p1719 A72-25960

Quasi-stationary spherical system structure model for stars of different masses with isotropic velocity distribution 14 p2149 A72-30212

X ray emitting component Centaurus X-3 mass limit in close eclipsing binary system with regard to Roche lobe principle 14 p2156 A72-30569

Near-solar mass star secular stability during gravitational contraction and main sequence phases, considering static and quasi-static models 14 p2158 A72-30734

Mass exchange and thermal time scales for shell source burning binary components with deep outer convective layers, interpreting numerical results from analytical model 14 p2159 A72-30739

Massive stars velocity distribution function in clusters, determining escape rate and energy dissipation 15 p2305 A72-31339

Opacity corrections of main sequence stellar models of 2.25 solar masses in terms of Cox, Carson and Watson formulas 16 p2452 A72-33130

Local population II stars density upper limit in terms of mass-luminosity ratio based on U, B and V photometric observations 17 p2604 A72-34442

Vibrational stability of supermassive stars stabilized dynamically by a uniform or differential rotation 17 p2613 A72-35461

State equation for superdense stars treated as perfect degenerate tachyon gas, noting dynamic stability for arbitrarily large central densities 18 p2726 A72-36715

Evolution of close binary systems with intermediate initial mass ratios. 18 p2728 A72-36741

Variation of evolved blue/red ratio for supergiants as function of stellar mass, discussing status of astrophysical test for neutrino emission 19 p2854 A72-37235

Determination of the spectrophotometric temperature, mean radius and mass of the star beta Cep 19 p2860 A72-37954

Star cluster age relation to mass ratios of stars and interstellar hydrogen and dust 19 p2867 A72-38511

The influence of local conditions in the interstellar medium upon star formation. 19 p2868 A72-38699

Kinetic equations for ultradense matter neutronization, noting stellar configuration of given mass with variable volume 21 p3086 A72-40096

Two phase stellar structure with polytropic equations of state for shell and core, calculating configuration mass, radius and energy 21 p3102 A72-40098

Computer-aided numerical experiment of cluster mass increase by accretion in protostar evolution 21 p3113 A72-41754

Effective temperatures of massive stars as a function of chemical composition and mass. 22 p3227 A72-42560

Nucleosynthesis theory for advanced thermonuclear evolution models of massive stars from helium burning through final hydrodynamic stages 22 p3227 A72-42561

Approximation of energy generation and nucleosynthesis during hydrostatic carbon burning in massive stars, noting neutrino-dominated evolution effects 22 p3228 A72-42562

Quasi-stationary spherical system structure model for stars of different masses with isotropic velocity distribution 23 p3334 A72-43242

Numerical models for He stars structural evolution, considering main sequence models of 1-8 solar masses and different carbon enrichments 23 p3334 A72-43258

STELLAR MASS EJECTION

Galactic wind formation in elliptical galaxies by stellar ejected gas heating by supernovae, discussing thermally unsteady cores 02 p0279 A72-12189

Wolf-Rayet type stars emission line variations from outer convective zone opening and matter ejection 03 p0439 A72-14243

Ejection behavior of relativistic particle magnetized clouds in radio galaxies central parts, noting interaction with interstellar medium 06 p0891 A72-18503

Astrophysical helium production by massive pulsationally unstable pure hydrogen stars evolving inhomogeneously with mass loss 07 p1084 A72-20691

Nova outbursts hydrodynamic processes, studying mass loss mechanism based on direct shock wave ejection and pulsational instability 09 p1382 A72-22283

Galactic nucleus evolutionary processes, considering mass ejection from newly formed massive stars, gas concentration toward center, kinetic energy exchange and stellar collisions 10 p1535 A72-23907

Monodirectional jet mass ejection from black holes, developing hypothetical model based on squeezed toothpaste analogy 10 p1535 A72-23910

Low mass neutron star source of pulsed X radiation in binary Centaurus X-3 ejected during low energy supernova explosion 14 p2156 A72-30570

Model for hot stars mass outflow due to gas acceleration by radiation absorption in UV resonance lines 15 p2305 A72-31341

Nitrogen existence in galactic cosmic ray sources, considering formation from CNO cycle hydrogen and He burning and ejection from normal stars 16 p2448 A72-33739

The association of X-ray sources with bright stars. 19 p2856 A72-37507

A preliminary model for the shell ionisation of the nova RS Ophiuchi. 19 p2866 A72-38504

An estimate of stellar wind mass loss during the red giant phase of evolution. 20 p2967 A72-39187

A statistical method for the determination of the rate of changes of period for eclipsing binaries. 20 p2974 A72-39892

Physical properties of interstellar matter surrounding binary stars from astronomical spectroscopy, discussing eruptions and photometric changes 20 p2975 A72-40069

Relaxation oscillations in the envelopes of luminous red giants. 21 p3105 A72-41034

The dynamical effects of stellar mass loss on diffuse nebulae. 22 p3224 A72-42380

STELLAR MOTIONS

Source motion effects on Doppler period variations of high velocity pulsars, considering first and second time derivatives 02 p0281 A72-12309

Globular cluster NGC 6838 membership from relative proper motions 03 p0415 A72-13001

Milky Way Galaxy spiral structure determination, presenting arms anatomy, gas and star kinetics and radio astronomy data 03 p0417 A72-13104

Relative stellar orbit determination in clusters NGC 5460, 5617, 6067, 6405 and 6494, presenting gravitational potential, orbital elements and anomalous period 03 p0434 A72-13495

Stellar orbits in galactic symmetry plane, using gravitational potential theories 03 p0434 A72-13496

Precession from proper motions of stars with respect to galaxies, discussing correction for systematic errors 04 p0575 A72-15027

Stellar radial velocities observation with photoelectric spectrometer, discussing catalog errors 04 p0577 A72-15280

Galactic cluster lifetimes compared with star cluster model evaporation times, discussing general galactic and interstellar clouds tidal fields effects 05 p0713 A72-16051

Collisionless stellar dynamics, considering Lin wave interactions for orbital theory 05 p0713 A72-16053

Plasma physics collective phenomena enhancing effect on relaxation processes, emphasizing relevance to stellar dynamics [AD-739801] 05 p0714 A72-16059

Vlasov equation stability properties of collisionless plasma and stellar gas, removing energy variation difficulties with multiple water bag model 05 p0694 A72-16060

Four phase space density collisionless one dimensional stellar system evolution in time by following motion of boundary curves 06 p0876 A72-17577

Stellar motion in asymmetric galaxies with three degrees of freedom, using four dimensional surface of section mapping and stochastic measurement 07 p1034 A72-19072

Disk population F-type star photometric luminosities, motions and metal abundance indices, discussing ultrashort period cepheids 07 p1071 A72-19333

Orbital elements from radial velocity measurements for single line K giant binary star 4 Ursae Minoris 07 p1071 A72-19337

K3-M2 dwarf space motions in solar neighborhood analyzed for sun motion 07 p1073 A72-19347

Stellar dynamical and density wave theories for spiral pattern persistence in Galaxy with differential rotation 07 p1074 A72-19430

Soviet book on compact binary stellar systems with globular components covering disk darkening, eclipsing, absolute dimensions and masses, etc 08 p1229 A72-20910

Generalized many body problem of interacting finite material points motion in isolated stellar systems 08 p1237 A72-21642

Soviet papers on astronomical studies covering coordinate systems motion and stellar and celestial body position determination in solar system 09 p1388 A72-23051

Star catalogs comparison and stellar positional differences and motion studies using random field theory 09 p1388 A72-23052

Star declinations from simultaneous observations at upper and lower culminations 09 p1388 A72-23064

Markov processes in stellar dynamics, discussing relaxation and evaporation times and star velocity distribution for galactic cluster models 09 p1390 A72-23504

Membership probabilities for open cluster IC 4665 based on relative proper motions 09 p1391 A72-23531

Precessional corrections, solar motion and galactic rotation determination from proper motions by maximum likelihood method, taking into account stars visual magnitude 09 p1391 A72-23535

Cassiopeia region galactic structure study via objective prism, cataloging stars radial velocities and distances 09 p1391 A72-23539

Large Magellanic Cloud star membership, comparing Sanduleak catalog based on objective-prism spectroscopy with Fehrenbach-Duflo catalog based on radial velocities 09 p1392 A72-23547

Large Magellanic Cloud spiral structure and motion through interstellar gas, determining old and young stars spatial distribution near major spiral arm 10 p1544 A72-24662

Peculiar A stars in open cluster Tr 2 region from objective prism plate searches, showing membership by photometrical characteristics and proper motions 10 p1545 A72-24828

Secondary component of eclipsing binary beta Lyrae as massive main sequence star in rapid nonuniform motion, refuting black hole suggestion 11 p1717 A72-25869

Triple stellar system evolution and disintegration, discussing energy partitioning and initial velocity effects on stability 12 p1865 A72-27095

Vertex deviation of stellar samples in terms of reflection and galactic potential perturbation 12 p1867 A72-27212

Probability and collisional relaxation in stellar systems, discussing gravitational polarization, collective interactions and spatial inhomogeneity 12 p1872 A72-27891

Polarization and dynamical friction drags on star in uniform infinite media and flat rotation sheet 12 p1872 A72-27892

Chandrasekhar statistical stellar dynamics assumption generality compared to Chandrasekhar diffusion process, discussing discontinuous model, relaxation time, escape probability and numerical results 12 p1872 A72-27893

Galactic disk systems relaxation time due to particle encounters, discussing validity of Boltzmann-Vlasov equation 12 p1872 A72-27894

Galactic tidal field and multiple encounters role in stellar escape from star clusters, noting escape rates and kinetic energy involved 12 p1873 A72-27898

Binary evolution in star cluster models from numerical methods of direct integration, noting domination by heavy binary and double star formation and disruption 12 p1873 A72-27899

Runaway stars trajectories stability tested from clusters study, noting preservation of energy, velocity and position and reproducibility 12 p1873 A72-27900

Massless test star velocity vector deflection in stellar field from numerical integration on relaxation times 12 p1873 A72-27901

Small perturbations in collisionless stellar dynamics, discussing linear modes for flat axisymmetric galaxy and effects introduced by nonlinear theory of spiral structure 12 p1874 A72-27904

Instabilities initiation in spiral arm formation and stellar cluster evolution, noting analogy to hose-pipe instability in plasma physics 12 p1874 A72-27905

Nonsymmetrical stellar motion in galaxies, finding number of isolating integrals in systems with three degrees of freedom from four dimensional mapping 12 p1874 A72-27911

Relaxation processes enhancement by collective particle collisions effects in plasma, stressing application to stellar dynamics 12 p1853 A72-27915

Stability properties for collisionless plasma and encounterless self gravitational stellar gas described by Vlasov equations 12 p1875 A72-27916

Monte Carlo scheme for dynamical evolution of spherical star clusters, considering stellar dense core, spurious relaxation and escape 12 p1875 A72-27919

Computer models for collisionless stellar systems equations of motion, obtaining force from smoothed gravitational field 12 p1875 A72-27920

Luminosity variation of star in circular orbit around extreme Kerr black hole due to Doppler effects and gravitational field light focusing 13 p2041 A72-29416

Quasi-stationary spherical system structure model for stars of different masses with isotropic velocity distribution 14 p2149 A72-30212

Galactic astronomy - Conference, State University of New York, Stony Brook, June-July 1968, covering Galactic structure, spiral shape theories, star migration, etc 14 p2152 A72-30486

Spectroscopic binary orbital elements calculated by FORTRAN IV computer programs, considering period, radial velocity Fourier coefficients and element improvement by least squares method 14 p2159 A72-30736

Field stars near NGC 2168 /M 35/ cluster, segregating main sequence stars by proper motion dispersions with allowance for interstellar extinction 14 p2159 A72-30742

Dynamic behavior of three masses moving under mutual gravitational attraction examined by numerical experiments for binary star formation via third star hyperbolic escape 14 p2160 A72-30877

Circumzenithal instrument for latitude and longitude determination and star transits observation through almucantar 15 p2238 A72-32122

Water bag model in cylindrical rotating two dimensional rod stellar system, showing kinetic energy minimum correspondence to collisionless Boltzmann equation 15 p2315 A72-32717

Stellar velocity dispersion in elliptical galaxy NGC 7332 from coude spectrum obtained by SEC vidicon TV camera and telescope 16 p2454 A72-33453

Singularity of noncircular cross section zero velocity torus circumscribing area with three dimensional orbit of stationary stellar system star 16 p2460 A72-34014

Random gravitational encounters and the evolution of spherical systems. IV - Isolated systems of identical stars. 17 p2605 A72-34528

The equilibria and oscillations of a family of uniformly rotating stellar disks. 17 p2605 A72-34529

The rotation of close binaries 18 p2725 A72-36474

Contribution of Danjon's astrolabe to the study of proper motions 18 p2726 A72-36727

Evolution of close binary systems with intermediate initial mass ratios. 18 p2728 A72-36741

Luminosities and motions of the F-type stars. II - Metal-deficient stars. 19 p2855 A72-37238

Kinematics of faint M stars near the north galactic pole, and the mass density in the solar neighbourhood. 19 p2855 A72-37341

On the optical search for Centaurus X-3. 19 p2856 A72-37506

Least squares method for Y Cyg spectroscopic elements improvement based on radial velocity measurements, noting nonexistence of gamma velocity variability 19 p2858 A72-37809

Double system HD 175514. III - Analysis of 1968 observations 19 p2858 A72-37816

Table for reduction of stellar radial velocities to the center of the sun 19 p2859 A72-37909

Comparison of IDS Catalog double stars having determined individual motions of their components 19 p2859 A72-37917

Catalog of individual motions of stars in the open star cluster NGC 6866 and vicinity 19 p2860 A72-37918

Statistical investigations of motions and distances of planetary nebulae 19 p2860 A72-37969

Novae and background stars relative proper motions, deriving and tabulating absolute proper motions via statistical transformation 19 p2860 A72-37970

Orientation of astrophotographs in observations and measurements 19 p2802 A72-37972

Determination of the aberration constant and the coefficients of short-period nutation terms from observations by the Pulkovo polar tube during the period from 1953 to 1964 19 p2861 A72-37976

Effects of nuclear reactions on the stability of degenerate stars. 19 p2864 A72-38100

The kinematics of open star clusters 19 p2865 A72-38488

Models concerning the kinematics of star clusters 19 p2866 A72-38489

Initial results of a PM study in the Hydra ring 19 p2866 A72-38493

Structure and motions in the Carina spiral feature. 20 p2973 A72-39880

Stellar evaporation in globular clusters passing through galactic plane, considering gravitational perturbation increase of total energy within system 21 p3107 A72-41269

Stellar-statistical formulation of the problem of setting up an astronomical radial velocity system. 21 p3109 A72-41439

The kinematics of semi-regular red variables in the solar neighbourhood. 21 p3111 A72-41473

Bright red giants of the globular clusters M 3, M 5, and M 13 21 p3113 A72-41756

- Homogeneous stellar system with purely gravitational interactions, predicting oscillatory relaxation time 22 p3207 A72-42853
- Investigation of type-A star condensations in the Perseus and Cassiopeia constellations 22 p3229 A72-42951
- Quasi-stationary spherical system structure model for stars of different masses with isotropic velocity distribution 23 p3334 A72-43242
- Iterative solution for adiabatic radial pulsation in massive main sequence star, noting transition to non-linearity via Eddington stability integral extension 24 p3438 A72-44833
- Proper motions of 122 eclipsing variables 24 p3448 A72-45688
- ### STELLAR OCCULTATION
- Jupiter atmospheric hydrogen-helium mixing ratio from binary star beta Sco occultation by planet in May 1971 03 p0416 A72-13009
- Lunar limb structure from occultation traces from point source stars, constructing model with levels and slopes 03 p0420 A72-13129
- Occultation curves for optical and radio lunar occultation analysis of radio sources, considering detection and measurement of binary systems 03 p0420 A72-13130
- Seeing effects on light curve of stellar occultation by moon, calculating limitation on angular resolution 03 p0420 A72-13131
- Filters and color effects on lunar occultation of stars and appropriate deconvolution procedures 03 p0420 A72-13132
- Jupiter equatorial radius and oblateness at atmospheric level from timings of 13-14 May 1971 occultations of beta Scorpii 04 p0571 A72-14615
- Jovian atmosphere effect on photometric observations of beta Sco C occultation by Jupiter on 13 May 1971 06 p0886 A72-18153
- GX3 plus 1 identification by sounding rocket during lunar occultations, discussing magnitude 07 p1070 A72-19123
- Telescope observations of occultations of stars by outer planets, natural satellites and asteroids 09 p1387 A72-22977
- Beta Scorpii occultation by Jupiter, obtaining light curves, atmospheric scale height and stratification 10 p1548 A72-24968
- Photoelectric observation of beta Scorpii occultation by Jovian satellite Io, noting Fresnel diffraction effects 10 p1548 A72-24969
- Occultation of beta Scorpii by Jupiter and Io to determine Jovian equatorial radius and oblateness 10 p1548 A72-24970
- Lunar occultations of IRC plus 10216 for IR radiation distribution, deducing model of late type carbon star surrounded by thermally reemitting dust shell 11 p1721 A72-26123
- Flash symmetry observed during fading and brightening of beta Scorpii A in occultation by Jupiter 12 p1868 A72-27297
- Jupiter occultations of multiple star beta Scorpii and Io close approach to beta sub 2 Sco 12 p1871 A72-27757
- Occultations of stars by Jupiter 17 p2607 A72-34751
- Density of the solar corona from occultations of NP 0532. 19 p2855 A72-37242
- Occultation of beta Scorpii by Jupiter on May 13, 1971. 19 p2859 A72-37890
- Faraday rotation of linearly polarized radio waves from the Crab Nebula by the solar corona. 21 p3109 A72-41327
- The occultation of beta Sco by Jupiter. 24 p3436 A72-44699
- The determination of the diameter of Io from its occultation of beta Scorpii C on May 14, 1971. 24 p3436 A72-44700
- Observation of the occultation of beta Sco C by Io. 24 p3436 A72-44702
- Upper limits for an atmosphere on Io. 24 p3436 A72-44703
- ### STELLAR RADIATION
- #### NT STELLAR WINDS
- Centaurus A NGC 5128 nucleus IR radiation measurement, suggesting small nonstellar core superposed on extended reddened stellar component 01 p0132 A72-11091
- Galactic IR astronomy, discussing findings on emission from H II regions of Orion Nebula and late and early type stars 02 p0276 A72-11643
- Stearable vhf/uhf receiving antennas stellar calibration error analysis, obtaining worst-case uncertainty of 0.4 db by monitoring antenna gain-to-noise temperature ratio 02 p0175 A72-12161
- Interferometric photoelectric scans of interstellar Ca I 4226 line for stars with interstellar Ca II K-lines, discussing deduced electron densities 02 p0280 A72-12197
- B and Be type stars intrinsic polarization, considering UVB spectra and effects on observed polarization 02 p0283 A72-12628
- Reflection nebulae genetic relationship to illuminating stars from catalogs based on Palomar Observatory Sky Survey 02 p0284 A72-12639
- Diffuse reflection of point source /flare/ light emission for cold dwarf star semiinfinite plane parallel atmosphere, calculating polarization 02 p0285 A72-12831
- Electromagnetic emission from pulsar with magnetic force tube on surface of magnetosphere treated as rotating magnetic multipole 02 p0285 A72-12833
- Galactic disk component of diffuse X radiation from unresolved red dwarf flare stars 03 p0408 A72-12993
- Stellar X ray emission polarization measurement using Thomson scattering polarimeter [AD-736550] 03 p0353 A72-13041
- Monochromatic radio emission from decilight years distant stars, discussing search experiment by low noise multichannel receivers 03 p0436 A72-13827
- Pulsar model, discussing polar radiation diagram formation with source motion around neutron star 04 p0573 A72-14903
- Circular polarization change with wavelength in white dwarf Grw plus 70 deg 8247 04 p0580 A72-15367
- Astrophysics of interstellar medium, discussing direct and indirect observations including 21 cm H lines and starlight extinction and polarization 04 p0581 A72-15622
- D-2B satellite mission, describing attitude, orbit and experiments on zodiacal light, stellar radiation and anisolar data 04 p0583 A72-15689
- Young cluster NGC 2264 stellar radiation flux measurements, suggesting surrounding circumstellar shells producing observable IR excesses 05 p0720 A72-16716
- Interstellar extinction curves for stellar far UV radiation, discussing required multicomponent interstellar dust model 05 p0720 A72-16717
- Isolated pulsar or neutron star upper mass limit based on consideration of rotational energy by ejection of low energy cosmic rays or photons 06 p0891 A72-18508
- X ray power density spectrum observation of pulsars, detecting Crab Nebulae pulsar radiation 07 p1080 A72-20051
- Annual variations of calibration factors of star pyranometers for copper-constantan and nichrome-constantan thermocouples 07 p0991 A72-20450
- Cyclotron magnetoacoustic wave generation by planets and binary stars in circular orbits, deriving interstellar gas density variations 08 p1231 A72-21122
- Wolf-Rayet stars identification in spiral galaxy M33 (NGC 598) from narrow band interference filter photographs, tabulating apparent magnitudes and emission indexes 09 p1382 A72-22281
- Hydrogen cloud structure of interstellar medium, assuming UV star Stromgren sphere radiation effects 09 p1390 A72-23526
- Cygnus Loop supernova remnant X ray emission structure from sounding rocket spectral data, showing thermal emission mechanism 09 p1378 A72-23699
- High density models for ambient gas of eta Carinae star from X ray observations 10 p1530 A72-24947
- Stellar OH radical emission amplification by maser effect raising low energy molecules to high energy by pumping 14 p2110 A72-30578
- Stellar radiation and gravitational effects on neutral atoms and dust grains at large distances for various spectral type stars in schematic evolutionary galaxy 14 p2158 A72-30735
- Stellar UV radiation spectral energy distribution investigation of stellar composition and atmosphere and interstellar gas, discussing observation restriction by earth atmosphere absorption 15 p2302 A72-31284
- Fuor luminosity phenomena due to thermal corpuscular radiation emitting energy sources 15 p2304 A72-31330
- B type main sequence star absolute energy flux envelope from ground based and OAO 2 observations, comparing with model atmosphere prediction 15 p2311 A72-31997
- Report to COSPAR on Netherlands space research covering solar and stellar radiation, cosmic gamma and X rays, photometry and satellite geodesy 15 p2338 A72-32010
- Eclipsing binary WZ Sge observation for light curves with 3-sec time resolution, noting amplitude variation similarity to other cataclysmic variables 15 p2314 A72-32368
- Pulsar pulse broadening due to multiple scattering by interstellar medium, finding exponential decay time constant relation to rms broadening of angular size 16 p2457 A72-33686
- Thermal X ray sources associated with rotating collapsed stars, discussing Scorpio X1 plasma shell heating mechanism 16 p2460 A72-33924
- Pulsars radiation mechanism relationship to magnetospheric conditions, considering optical, X ray and gamma radiation 16 p2460 A72-33928
- Stellar X ray emission flux calculation for UV Ceti flares, using similarities between solar and stellar flares 16 p2450 A72-34161
- Soft X-rays from Cygnus X-2 and from Cygnus X-1 in eclipse/. 17 p2600 A72-35297
- Consequences of the Stromgren's theorem for radiative envelope stars. 18 p2728 A72-36760
- Radiative opacity and calculation of stellar models 18 p2728 A72-36766
- The measurement of polarized 10-micron radiation from cool stars with circumstellar shells. 19 p2854 A72-37232
- Energy variation curves for direct flare radiation and reflection from eruptive star atmosphere, discussing color variations 19 p2858 A72-37808
- Unsteady hydrodynamic accretion on a neutron star 19 p2862 A72-38053
- Nuclear energy sources in overdense celestial bodies 19 p2862 A72-38061
- Design and testing of a nine-channel photometer 19 p2804 A72-38500
- A preliminary model for the shell ionization of the nova RS Ophiuchi. 19 p2866 A72-38504
- Non-thermal bremsstrahlung of fast electrons and flare of stars. 20 p2974 A72-39894
- Stratification of the emission in the envelope of a Wolf-Rayet type eclipsing binary V444 Cyg 21 p3113 A72-41759
- Double star components light aberration dependence on relative velocity of source and observer, considering two reference systems 22 p3225 A72-42458
- Calculation of stellar and diffuse radiation for a plane-parallel semiinfinite model of the Galaxy 23 p3338 A72-44027
- Book - Dimensional analysis and group theory in astrophysics. 23 p3341 A72-44500
- ### STELLAR REFRACTION
- #### U ATMOSPHERIC REFRACTION
- #### U STELLAR RADIATION
- ### STELLAR ROTATION
- #### NT SOLAR ROTATION
- Pulsar nature and radiation mechanism, examining rotating neutron stars structure and atmospheric dynamics 01 p0131 A72-10973
- Variational solutions of nonlinear free boundary integrodifferential Euler equations for rotating star models 02 p0252 A72-12540
- Rotating star global axisymmetric dynamic stability, deriving local criteria by variational principle 03 p0417 A72-13021
- Pulsar theory, discussing rotating neutron star principle, kinetic energy, structure, atmosphere, radiation mechanics and supernovae remnants 03 p0417 A72-13103
- Rotating relativistic stellar models, covering coordinate systems injection energy, convection, red shift, external gravitational waves and black holes 03 p0426 A72-13269
- Electromagnetic pulsar models features and predictions, using rotating neutron stars with strong dipolar magnetic fields 03 p0437 A72-13873
- Relaxation time estimation for electron velocity relative to dilute vortex core array in rotating neutron superfluid, applying to pulsar slowdown rate 04 p0571 A72-14590
- Slowly rotating F, G and early K field stars data, computing Li abundance and isotope ratio 04 p0578 A72-15316
- Cyg X-1 type X ray sources evolution, discussing white dwarf and supernovae stages, parent mass and angular momentum 04 p0568 A72-15508
- Tesseral equilibrium shapes of rotating neutron stars emitting gravitational radiation pulses 05 p0719 A72-16602

Stationary stars rigid and differential rotation angular velocity limits, showing analogous conditions in general relativity

06 p0882 A72-18001

Pulsar dynamics and electrodynamic for power derivation from rotational energy, discussing toroidal magnetic field induced nonhydrostatic stress in neutron star

07 p1068 A72-19001

Pulsar rotation and dispersion from polarization and pulse arrival time observations, calculating magnetic field components in path to pulsars

07 p1072 A72-19343

Variational principle in equilibrium and stability theory of rotating bodies under magnetic and thermal fields, explaining spiral branch number in galaxies

07 p1077 A72-19806

Pulsars suggested as rotating neutron stars based on collapsed star magnetic field strength, mass-radius relation and radio flux emission

07 p1080 A72-20055

Pulsar model based on neutron star rotation with skew magnetic field, considering radiated particle acceleration responsible for high energy activity in supernova remnants

07 p1080 A72-20057

Magnetosphere theory of pulsar electrodynamic, discussing uniform inductor with iron sphere having uniform magnetization parallel to rotation axis

07 p1080 A72-20058

White dwarfs rotation parameters relation to angular velocity within general relativity compared to analogous calculations in Newtonian theory

08 p1234 A72-21284

Stability solutions of collective oscillations of spherical star cluster rotating in near circular orbits in self consistent field

08 p1239 A72-22180

Black body X ray sources creation due to neutron stars rotational energy dissipation by strain hysteresis in crust

09 p1382 A72-22284

Spiral density waves in galactic model with differentially rotating interstellar gas and stars, deriving dispersion equation by frequency to wave numbers relation

09 p1384 A72-22517

Landau instability effect on density waves propagation in self gravitating disk of differentially rotating and nonrotating stars populations, noting radial flow of matter

09 p1384 A72-22518

Quasar rotation and pulsation periods within pulsar models, postulating supermassive stars /one million-one billion solar masses/ as energy sources

09 p1385 A72-22536

Rapid rotation effect on weak and intermediate strength early type stellar radiation spectral absorption lines

09 p1390 A72-23527

Gravity darkening effects on rapidly rotating B stars He I and Mg II spectral lines

09 p1391 A72-23530

Magnetic field generation problem in rotating relativistic star for barotropic medium

09 p1391 A72-23537

Binary stars convective zones reaction to periodic gravitational fluctuations due to stellar revolutions asynchronism, using incompressible fluid plane layer model

10 p1543 A72-24631

Mu Cephei light polarization explanation, deriving spatial orientation of rotational axis and rotation period

10 p1546 A72-24832

Relativistic counterpart of Poincare condition for angular velocity of rigidly rotating star, discussing equilibrium disturbance effects

10 p1549 A72-25058

Pulsar speed increase mechanism as metastable flow state transition in neutron star superfluid core

11 p1724 A72-26705

Structural and integral parameters for rotating stellar configurations within Newton gravitation theory, giving equations for gravitational potential, outer surface geometry and multipole moments

13 p2035 A72-28677

Rotating neutron stars stability and radial pulsations by energy method, allowing for relativistic effects

15 p2304 A72-31335

Rotating white dwarfs and neutron stars quasi-radial pulsations frequencies, discussing central densities critical values

15 p2304 A72-31336

Shell formation during star collapse due to rotational instability, discussing relativistic effects

15 p2305 A72-31337

Flare mechanism of pulsar radiation near magnetic poles of rotating neutron stars

15 p2298 A72-31627

Radiative stellar envelopes circulation velocity calculation for various cylindrical rotation laws using perturbation method

15 p2314 A72-32371

Stellar magnetic oblique rotator internal motion field construction by perturbation technique estimating energy dissipation and turbulent viscosity

16 p2458 A72-33721

Stellar MHD, discussing strongly magnetic stars identification and slow rotation origin based on oblique rotator model

16 p2460 A72-33923

Thermal X ray sources associated with rotating collapsed stars, discussing Scorpio X1 plasma shell heating mechanism

16 p2460 A72-33924

Stellar evolution and rotation data acquisition from photometric analysis of B-F main sequence stars, considering different models for rotating atmospheres

16 p2462 A72-34184

Meridian circulation with rapid differential rotation in radiative stellar envelopes.

17 p2605 A72-34532

Field variations of perfect fluid in axisymmetric stationary universe within general relativity theory concept, noting energy extremal properties for rotating stars

17 p2607 A72-34921

Vibrational stability of supermassive stars stabilized dynamically by a uniform or differential rotation

17 p2613 A72-35461

Variational principle in equilibrium and stability theory of rotating bodies under magnetic and thermal fields, explaining spiral branch number in galaxies

17 p2617 A72-35730

Fluid dynamics of convective stellar envelopes.

17 p2618 A72-35933

Stability solutions of collective oscillations of spherical star cluster rotating in near circular orbits in self consistent field

18 p2724 A72-36236

The rotation of close binaries

18 p2725 A72-36474

Rotational velocities of Ap stars.

19 p2855 A72-37237

Linear pulsations and stability of differentially rotating stellar models. I - Newtonian analysis. II - General relativistic analysis.

19 p2855 A72-37247

Density wave detection by local hydrogen gas and young stars radial velocities comparison with Lin theory of galactic spiral structure

19 p2866 A72-38494

Coude spectra, abundance ratios and radial and rotational velocities of He rich stars, using microphotometer equivalent width tracings

19 p2866 A72-38502

Slowly rotating relativistic stars. VI - Stability of the quasi-radial modes.

20 p2966 A72-38909

Tidal perturbation of the non-radial oscillations of a star.

20 p2974 A72-39895

Russian book - Large-scale motions in the convective zones of stars and large planets.

21 p3104 A72-40462

VLF electromagnetic radiation frequency observation for pulsar pulsation or rotation period

21 p3111 A72-41485

Differential rotation of polytropic stellar models by structural equilibrium equations, disproving Porfiriev theory

21 p3114 A72-41775

Spectral variabilities of magnetic peculiar A stars associated with atmospheric chemical composition anomalies, using inclined rotator model

23 p3335 A72-43297

Slowly rotating axisymmetric star gravitational collapse derivation from general relativistic hydrodynamic and gravitational field equations formulated under Bondi-Sachs coordinate condition

23 p3335 A72-43488

Transfer equations for stellar systems

23 p3338 A72-44035

Accretion disc models for compact X-ray sources.

24 p3435 A72-44828

STELLAR SPECTRA

NT SOLAR SPECTRA

Empirical model with near IR spectra from expanding circumstellar envelope, normal pulsating atmosphere, shock front and relaxation layers and expanding radiative cooling layer

01 p0128 A72-10791

Spectral analyses of Mira-type variable stars near light maximum, discussing empirical curve of growth, Doppler velocity, damping constant and electron pressures

01 p0129 A72-10792

CH Cygni spectrum analysis in activity phase, discussing blue continuum, emission and UV absorption lines, radial velocity and stratification effects

01 p0131 A72-11008

Calibrations consistency of UBVY beta and GNMKFM photometries of binary stars with G or K giants and A or F main sequence components

01 p0132 A72-11014

IR radiation variability from circumstellar grains around carbon-rich supergiant R Coronae Borealis, noting spectrum similarity to black bodies

01 p0121 A72-11093

IR point source Becklin star spectrum consistent with highly reddened early-type supergiant with weak absorption masked by low resolution

01 p0133 A72-11094

He emission line star G61-29, discussing spectral features and proper motion limits on maximum distance

01 p0133 A72-11095

Pulse widths formed by relativistic beaming pulsars effect on emission spectra

01 p0133 A72-11130

Eta Carinae model with IR spectrum details described by compact H II region photoionized by hot massive star radiation

02 p0277 A72-11688

Soviet book on cool carbon stars covering spectral features, atmospheric composition and temperatures

02 p0281 A72-12296

Periodicities from power spectrum analysis of light curve of RR Tauri variable

02 p0281 A72-12302

X ray rocket observations of time variation of SCORPUS X-1 energy spectrum and optical luminosity at 2-20 keV

02 p0281 A72-12307

Line spectrum of Of star zeta Puppis at 3150-8600 A, comparing absorption spectrum to 9 Sgr

03 p0416 A72-13014

High resolution UV stellar spectroscopy in star stabilized Skylark rocket vehicle, using Cassegrain echelle optics and image intensification

03 p0354 A72-13056

Pulsar observation data, presenting period histogram, intensity, shape and polarization variations, position distribution, physical nature and spectra

03 p0417 A72-13102

Space observation of stars and interstellar medium, considering stellar energy distributions and line spectra, interstellar absorption lines, galactic nebulae and X ray sources

03 p0420 A72-13122

Magellanic Clouds supergiant stars intrinsic colors, observing in five spectral bands to separate from Galactic foreground stars

03 p0425 A72-13260

Eclipsing variable star EQ Taurus photoelectric brightness variation observations in B and V light

03 p0433 A72-13488

Red, blue and color anomalous rare carbon stars properties determination from comparative analysis of R-N and C classifications

03 p0433 A72-13490

Differential line shifts in spectrum of supergiant beta Ori attributed to radial spreading of stellar atmosphere

03 p0436 A72-13810

Linear polarization of pulsar PSR 22 18 plus 47 radio emission pulses, attributing periodic fine structure of spectrum to rotation of polarization plane in interstellar medium

03 p0436 A72-13824

Soviet book on long period variable stars covering spectral data photometric characteristics, spatial and kinematic properties, absorption effect and evolution

03 p0439 A72-14224

Wolf-Rayet type stars emission line variations from outer convective zone opening and matter ejection

03 p0439 A72-14243

Abundance ratios in quasar PKS 0237-23 from absorption spectrum measurements and explosive nucleosynthesis calculations

04 p0570 A72-14526

Curve of line width correlation application to alpha Orionis OH lines, determining atmospheric turbulence and thermal velocities

04 p0571 A72-14558

Astrogenic and planetogenic environments characteristics examination for stellar spectral classes effect on intelligent life evolutionary pace and existence probability

04 p0573 A72-14887

F and early G dwarf stars atmospheric models and line data, deriving temperatures, abundances and gravities

04 p0577 A72-15282

Early type supergiant far UV spectrum observations, showing broad absorption feature near 1720 A

04 p0578 A72-15315

Slowly rotating F, G and early K field stars data, computing Li abundance and isotope ratio

04 p0578 A72-15316

Photometric standard star 29 Piscium abundance analysis with flux constant hydrogen line blanketed model atmospheres

04 p0578 A72-15317

Pulsar CP 0328 wideband rf spectrum long term periodicity, considering origin during propagation through interstellar medium

04 p0580 A72-15369

- X ray and gamma astronomy, discussing old and blue stars, supernova remnants, radio galaxies, quasars and pulsars 04 p0582 A72-15687
- Digital data reduction techniques for stellar spectrograms, discussing digital noise smoothing for SNR improvement 05 p0632 A72-15762
- UBV magnitude measurement for stars in open clusters NGC 6613 and 6716, determining spectral classes, absorption and distances 05 p0712 A72-15768
- Interstellar dust distribution, nature and physicochemical and dynamic evolution, discussing star and galaxy observation, light diffusion, star reddening and IR sources 06 p0882 A72-17995
- Flare spectra of AD Leo during strong burst, comparing Balmer discontinuity and line widths with UV Cet stars 06 p0883 A72-18020
- Temperature scale for classifying spectra of peculiar and metallic line stars 06 p0883 A72-18021
- Early type stars photoelectric spectra obtained with Mariner 9 UV spectrometer, obtaining resonant line features and spectral energy distribution 06 p0890 A72-18347
- Radio sources sky survey with radio telescope, discussing 5C1 and 5C2 spectral distributions 07 p1069 A72-19074
- MHz IR/OH sources, discussing M type Mira variables or M supergiants photospheric temperature and dust shell structure 07 p1069 A72-19075
- Southern globular clusters (NGC 6362 and NGC 6752) photometric standards, stellar photographic and color-magnitude diagrams 07 p1069 A72-19076
- F and G dwarf stars synthetic spectra and colors computation from chemical abundance, Doppler broadening velocity and damping constant 07 p1071 A72-19181
- Classification-dispersion spectrograms of early decline of Nova Serpentis 1970, discussing diffuse enhanced absorption system behavior 07 p1071 A72-19338
- Astronomical IR spectroscopy of Alpha Ori, discussing OH line formation, LTE, rms turbulence velocity and abundance 07 p1072 A72-19345
- Zeta Orionis spectra at 922-1453 A from rocket spectroscopy, matching lines with stellar atmosphere models 07 p1072 A72-19346
- High temperature black body model based on induction heating of graphite crucible, noting application to stellar energy spectral distribution determination 07 p0991 A72-20404
- Zeta Puppis visual line spectrum discrepancy from non-LTE stellar atmospheres models, necessitating hydrostatic equilibrium deviations consideration for temperature derivation 08 p1232 A72-21178
- Semiregular variable CH Cygni observations from 1967 to 1969 with continuous spectrum variations comparison to monochromatic brightness changes 08 p1233 A72-21278
- Local interstellar hydrogen survey from OAO-2 observations of Lyman alpha absorption at 1216 A for B2 or earlier stars 08 p1235 A72-21392
- Stellar atmosphere UV spectral line broadening by electron collision, radiative and classical damping 08 p1237 A72-21750
- Non-LTE atmospheric model calculations for H, He I and II spectra of O stars, discussing He abundances 08 p1239 A72-21949
- Spectral types and magnitudes of O and WC stars of binary gamma Velorum system 09 p1382 A72-22282
- Long period Cepheids in galactic spherical component, confirming two groups according to spectral characteristics 09 p1384 A72-22514
- Rapid rotation effect on weak and intermediate strength early type stellar radiation spectral absorption lines 09 p1390 A72-23527
- Gravity darkening effects on rapidly rotating B stars He I and Mg II spectral lines 09 p1391 A72-23530
- Cygnus Loop supernova remnant X ray emission structure from sounding rocket spectral data, showing thermal emission mechanism 09 p1378 A72-23699
- Galactic nuclei evolution and stellar content models from nearby stars spectral synthesis 10 p1533 A72-23895
- UBVr colors of supergiants as function of radiation pressure, sphericity, microturbulence and effective temperatures 10 p1542 A72-24609
- Statistical equilibrium analysis of fluorescent Fe I emission in long period variables 10 p1542 A72-24610
- Ca II K line profiles in front of distant OB stars, using pressure scanned Fabry-Perot interferometer and coude spectrograph 10 p1542 A72-24616
- Interferometric photoelectric scans of interstellar Ca K lines in stellar spectra, noting interstellar Na lines presence 10 p1544 A72-24663
- Photoelectric UVB photometry for galactic cluster NGC 7039 region stars, discussing MK spectral classifications and peculiar A stars 10 p1545 A72-24827
- Stellar absorption spectral line fineness indication for cold interstellar molecular clouds between observer and star 10 p1546 A72-24848
- Stellar spectra differential analysis from solar curve of growth for Fe I with revised gf-scale, noting van der Waals broadening and microturbulence 10 p1547 A72-24868
- Simultaneous observations of radio flares from beta Persei on 25-25 January 1972 at 2.8, 3.7 and 11.1 cm, noting spectral characteristics difference from quasi-steady component 10 p1547 A72-24945
- Photoelectric scans of M supergiant alpha Ori and carbon stars from 3400 to 11,000 A, obtaining dominant spectral features 10 p1548 A72-24967
- R Coronae Borealis type variable stars spectral, IR and polarimetric studies, outlining common features and hypotheses for phenomenon explanation 10 p1549 A72-25055
- T Tauri type variable stars spectral features relation to evolutionary sequences, noting stellar atmosphere nonthermal equilibrium plasma region effects 10 p1549 A72-25056
- WR hot stars CIII, NIV and OV emission spectra structure associated with excitation of 2pn and pd ion configurations 10 p1549 A72-25169
- Short period RR Lyrae variables, presenting light curves in UVB system 10 p1550 A72-25198
- Paschen beta emission line equivalent width variation in IR spectra of omicron Ceti 11 p1716 A72-25679
- Lick observatory image-dissector scanner for faint astronomical spectra, describing design and performance of system based on individual photon pulse counting and memory storage 11 p1631 A72-25691
- Flare spectra of AD Leonis during strong burst, comparing Balmer discontinuity and line widths with UV Cet stars 11 p1718 A72-25956
- Temperature scale for classifying spectra of peculiar and metallic line stars 11 p1718 A72-25957
- Abundance in cold stellar atmospheres, noting effect on atmospheric thermal stratification and energy transfer from molecular spectra 11 p1722 A72-26432
- HD 4180 shell H lines width variations comparison with Be stars, noting thirty year period emission decrease followed by outer shell absorption 12 p1867 A72-27213
- Diatomic carbon negative ion search in HD 201626 and solar spectra, noting rotational lines coincidence with absorption features 13 p2038 A72-29010
- High resolution observations of UV stellar spectra by ESRO-borne spectrophotometer, emphasizing Mg II lines 14 p2150 A72-30370
- Quasar color indices and redshift correlation, using catalog data on U, B and V colors 14 p2150 A72-30371
- Model for hot stars mass outflow due to gas acceleration by radiation absorption in UV resonance lines 15 p2305 A72-31341
- UV stellar spectra observation with orbiting stellar spectrophotometer aboard ESRO TDIA satellite, noting Mg II lines 15 p2308 A72-31927
- Cosmic background radiation temperature from interstellar CN band R branch absorption line in star zeta Ophiuchi spectrum 15 p2313 A72-32309
- Alpha Lyra and beta Cen spectrograms by Orion observatory onboard Salyut space station, noting veiled and overexposed photographic films 15 p2316 A72-32742
- Early B stars with normal helium abundances and small rotational velocities, deducing gravity from H lines and ESW stark broadening 15 p2316 A72-32751
- K2 III star Arcturus UV chromospheric emission line spectrum observation with rocket-borne spectrometer, identifying hydrogen L alpha and O I 16 p2453 A72-33136
- Emission line star WRA 795 as optical counterpart of Cen X-3 occulting binary system 16 p2456 A72-33474
- Pulsars 0950 plus 08 and 1133 plus 16 flux density spectra measurements at 1.4-5.0 GHz, noting equivalent continuum break 16 p2456 A72-33477
- Spectral characteristics of hot stars with emission lines, discussing Ba, Of, P Cygni, Wolf-Rayet and B type supergiant stars 16 p2462 A72-34183
- Carbon 12/13 isotope ratio measurement for interstellar ionized CH molecules toward stars with strong interstellar lines 17 p2604 A72-34524
- A recalibration of the absolute magnitudes of supergiants. 17 p2609 A72-35115
- Discoveries on southern objective-prism plates. III - Three new hydrogen-deficient stars and a bright B-type subdwarf. 17 p2609 A72-35116
- Minimum-light spectra of nine M-type variable stars. 17 p2610 A72-35118
- Narrow-band photoelectric photometry of the peculiar Wolf-Rayet eclipsing binary CV Serpentis. 17 p2617 A72-35732
- The helium abundance in thirty-three main sequence B stars. 18 p2726 A72-36726
- Changes in the spectrum of the star Be HD 217050 18 p2727 A72-36733
- Pm existence evidence for HR 465 from analysis of Pm II spectral line data 18 p2727 A72-36738
- Rotational velocities of Ap stars. 19 p2855 A72-37237
- Luminosities and motions of the F-type stars. II - Metal-deficient stars. 19 p2855 A72-37238
- The colour-magnitude diagram of the globular cluster NGC 7099. 19 p2855 A72-37343
- The primary spectrum of the eclipsing binary LR Centauri. 19 p2856 A72-37505
- Early data from the ultraviolet sky-scan telescope in the TDI satellite. 19 p2857 A72-37524
- Astronomical observations supporting stellar atmosphere microturbulence concept, noting Cepheid variables high dispersion spectra, supergiants irregular changes and microturbulence hydrodynamic effect 19 p2857 A72-37525
- Spectrophotometric investigation of Ap stars. I - Two-dimensional quantitative spectral classification 19 p2858 A72-37813
- Spectrographic and photometric observations of supergiants and foreground stars, in the direction of the Large Magellanic Cloud. 19 p2858 A72-37855
- Early star absolute magnitude from equivalent H gamma and delta line widths and Balmer hydrogen series line 19 p2859 A72-37908
- Standard iron wavelengths for determining the radial velocities of stars 19 p2859 A72-37910
- Study of the spectrally variable silicon Ap star 56 Ari 19 p2862 A72-38055
- Secular stability. I - A Population I star near the main sequence. 19 p2864 A72-38099
- Coude spectra, abundance ratios and radial and rotational velocities of He rich stars, using microphotometer equivalent width tracings 19 p2866 A72-38502
- Balloon-borne UV spectrophotometer observation of Mg II resonance doublet at 2795 and 2802 A in stellar spectra, comparing to Ca II line widths 20 p2965 A72-38907
- Hot star with broad H lines with weak variable central emission, noting Ca II and He I 20 p2966 A72-38920
- Photometric and power spectrum observation of peculiar blue variable star, showing low amplitude high frequency luminosity oscillations, hydrogen deficiency and degeneracy 20 p2966 A72-38921
- Line formation in the presence of magnetic fields; Proceedings of the Conference, Boulder, Colo., August 30-September 2, 1971. 20 p2970 A72-39752
- Stellar emission and absorption line spectra formation in presence of magnetic field interpreted by radiative transfer equation solution, considering dwarf stars observation 20 p2956 A72-39753
- Stellar multilevel spectral line formation solution by preconditioning procedure based on core frequency transfer determination by local saturation approximation 20 p2954 A72-39758

Line spectra and continuum polarization in magnetic white dwarfs.

20 p2971 A72-39760

On the chemical composition of epsilon Pegasi.

20 p2974 A72-39901

Pulsating variables in the Pleiades cluster.

21 p3105 A72-41032

Interstellar lines in the ultraviolet spectrum of zeta Ophiuchi.

21 p3105 A72-41035

Magnetic-field variations in 78 Virginis, beta Coronae Borealis, and 73 Draconis.

21 p3106 A72-41036

Oxygen abundances of three population II horizontal-branch stars.

21 p3109 A72-41330

The spectrum of N Del 67 and some remarks on chemical composition of the novae envelopes.

21 p3109 A72-41436

Curve of growth analysis of F star beta Cas and 10 UMa atmospheres for Ca, Sc, Ti, Cr, Mn and Ni-to-Fe abundance ratios

21 p3110 A72-41444

Spectrum of P Cygni in 1968-1969.

21 p3110 A72-41445

Frequency correlation measurement of pulsar spectral fine structure due to radio emission scattering by interstellar plasma

21 p3101 A72-41752

A spectral study of the nebula NGC 7635 and the star BD +60.2522 deg

21 p3113 A72-41755

Stratification of the emission in the envelope of a Wolf-Rayet type eclipsing binary V444 Cyg

21 p3113 A72-41759

Effect of a random magnetic field on the absorption line characteristics of stars

21 p3113 A72-41761

Red variables in globular clusters, in the galactic centre and in the solar neighbourhood.

22 p3222 A72-42135

Transuranium elements in HD 25354.

22 p3224 A72-42381

The peculiar O6f star HD 148937 and the symmetrically surrounding nebulae.

22 p3227 A72-42557

Internal dust effects on nebulae structure and spectrum, solving radiation transfer equation for spherical models with nonisotropic scattering

22 p3227 A72-42558

Spectrophotometric study of the cometary nebula NGC 2261

22 p3229 A72-42961

Physical characteristics of type I supernova envelopes during the initial expansion phase. II - Development of type I supernova spectra after maximum light.

23 p3333 A72-43228

Type II supernova spectral intensity minima due to blueshifted absorption lines of hydrogen and Fe II based on observed and synthetic spectra wavelength comparison

23 p3334 A72-43257

Spectral variabilities of magnetic peculiar A stars associated with atmospheric chemical composition anomalies, using inclined rotator model

23 p3335 A72-43297

The analysis of the small Magellanic Cloud supergiant HD 7583.

23 p3336 A72-43555

Ultraviolet absorption lines in the spectrum of Vega.

23 p3337 A72-43826

Infrared photometry of Northern Wolf-Rayet stars.

23 p3337 A72-43827

Spectrometric zonal standards - Selection of stars and methodology of their study

23 p3338 A72-44031

The influence of ultraviolet line blanketing on the neutral helium triplet lines in B-type stars.

24 p3438 A72-44834

A further high-resolution search for Fe XXV line emission from Scorpius X-1.

24 p3438 A72-44838

Orbiting telescopes improved angular resolution and access to UV spectra as advantages in determining stellar composition, mass, luminosity and distance

24 p3446 A72-45531

Spectral classification of stars with respect to non-broadened low-dispersion spectra. III - Classification method and criteria

24 p3447 A72-45678

Spectral classification of stars with respect to non-broadened low-dispersion spectra. IV - Catalog of spectra of faint stars about the NGC 2129 cluster

24 p3447 A72-45679

Stellar spectra analysis from measured truncated equivalent spectral line widths, calculating curves of growth for given truncations, source functions and absorption coefficients

24 p3447 A72-45680

Titanium oxide molecular spectrum band intensities measurement for vibrational temperature of M supergiant stars, noting atomic absorption effect on measurement accuracy

24 p3448 A72-45681

STELLAR SPECTROPHOTOMETRY

UBV photometric studies of eclipsing variable R Canis Majoris confirming primary component as F1V star, discussing ordinary semidetached system possibility

01 p0129 A72-10793

Early O and Of spectroscopic and photometric data, evaluating atmospheric properties, surface gravities and temperature scales

01 p0131 A72-11009

RR Lyrae variables intermediate band photometry, tabulating magnitudes and color of 125 stars

01 p0133 A72-11129

Six color photometry of F-G supergiants in Large Magellanic Cloud, noting color similarity with galactic stars

03 p0416 A72-13019

Magellanic Clouds bright star intermediate band photometry, discussing interstellar extinction and luminous supergiants

03 p0425 A72-13257

Interstellar absorption in Perseus OB 2 association direction from UVBY-beta photometry of early type stars in four fields

03 p0438 A72-13875

Solar chromospheric flare spectrophotometric data on 8 July 1966, presenting line spectra, ground state and populations in excited energy levels

03 p0413 A72-14242

Eclipsing variable system AW Peg spectrophotometric data, examining spectral line geometries and intensities and atmospheric conditions

03 p0439 A72-14244

Stellar radial velocities observation with photoelectric spectrometer, discussing catalog errors

04 p0577 A72-15280

Photoelectric measurements of Ca K line of southern/equatorial A stars, discussing abundance variation

05 p0712 A72-15796

Photoelectric photometry of Ca K-line for A stars of population I clusters

05 p0712 A72-15797

Photoelectric observations in different colors of eclipsing variable TX Cancri, presenting tables

05 p0723 A72-17199

UV spectrophotometry of late-type giant star /Arc-turus/ from Aerobee rocket, identifying Mg II doublet resonance line for stellar chromosphere

06 p0881 A72-17893

Observed light curve amplitude phase relations in Ap magnetic star UVB system, using oblique rotator model

06 p0882 A72-18008

Computer program for photometric orbital elements determination of eclipsing binary stars

06 p0883 A72-18022

Disk population F-type star photometric luminosities, motions and metal abundance indices, discussing ultrashort period cepheids

07 p1071 A72-19333

UBV photometry for stars near quasars and N and Seyfert galaxies, noting suitability as secondary photoelectric standards or photographic sequences for monitoring programs

07 p1071 A72-19336

M supergiants in Carina arm, discussing photometric studies at 4-18 microns, interstellar extinction uncertainties and spatial distribution

07 p1072 A72-19344

Fabry lens application in stellar photometry, describing technique of image construction on photomultiplier tube cathode

07 p0985 A72-19419

Unstable binary RW Aur spectrophotometric study with stellar evolution and outer atmosphere implications, relating Balmer continuum to UV excess

08 p1233 A72-21277

Spaceborne Uvicorn/Telescope astronomical observatory for stellar UV TV pictures, discussing system design requirements

08 p1170 A72-21958

Metal lines and dwarf stars study by photoelectric photometry based on narrow passbands

10 p1538 A72-24230

OB star distribution in Puppis from UVB and H beta photometry, noting correlation with hydrogen concentration

10 p1542 A72-24615

Spectrophotographic analysis of K-type supergiant epsilon Pegasi for effective temperature, surface gravity and heavy and light element abundances

10 p1543 A72-24621

Blue white dwarf HL Tau-76 rapid variations, suggesting underlying driving mechanism from high speed three color photometric observations

10 p1549 A72-25193

Stellar photometric classification by comparing color indices to indices of standard stars with UPX-YZVS system, outlining computer method

11 p1715 A72-25294

Computed and observed color indices of intermediate band UPX-YZVS and wideband UVB photometric systems, evaluating response curve validity for parameter determination

11 p1715 A72-25295

V 1057 Cyg photometry and polarimetry, considering model with two circumstellar shells stellar flux absorption and reradiation

11 p1716 A72-25678

Calibration model for UV stellar photometer using secondary electron conduction /SEC/ vidicon

11 p1631 A72-25684

Computer program for photometric orbital elements determination of eclipsing binary stars

11 p1718 A72-25958

Russian book on eclipsing binary stars covering limb darkening law, photometric eclipsing phases, computer applications and models

11 p1720 A72-26046

Spectrophotometry of nebulosity associated Ae and Be stars, discussing age, circumstellar dust shells geometry and red stellar objects

11 p1720 A72-26114

Omega Velorum revelation as beta Canis Majoris type variable stars from photoelectric and spectrographic observations

12 p1867 A72-27207

UBV photometric properties and probability of discovery in blue light of detached close binaries models

12 p1867 A72-27214

Regional observation of atmospheric spectral transmittance by Bouguer and high/low star methods

13 p2044 A72-29650

High resolution observations of UV stellar spectra by ESO-borne spectrophotometer, emphasizing Mg II lines

14 p2150 A72-30370

Stellar photometric observations in Magellanic Clouds, presenting photoelectric sequences in UVB system, interstellar reddening and extinction data

14 p2159 A72-30737

UV stellar spectra observation with orbiting stellar spectrophotometer aboard ESO TD1A satellite, noting Mg II lines

15 p2308 A72-31927

Photoelectric photometry of binary VV Pup with 3-sec time resolution, suggesting qualitative model from eclipses identification

15 p2314 A72-32369

Sequential three color photometry of dwarf cepheid DY Pegasi, noting smooth color variation with phase

15 p2314 A72-32370

Stellar evolution and rotation data acquisition from photometric analysis of B-F main sequence stars, considering different models for rotating atmospheres

16 p2462 A72-34184

Optical observations of the supernova in NGC 5253.

18 p2726 A72-36648

Photometric study of the open cluster NGC 2232.

18 p2728 A72-36742

Near-infrared photometry of Mira variables.

18 p2729 A72-37018

The colour-magnitude diagram of the globular cluster NGC 6981.

19 p2855 A72-37342

The colour-magnitude diagram of the globular cluster NGC 7099.

19 p2855 A72-37343

Rocket-borne Cassegrain optic stellar electrophotometer for early star observations in 1300-2000 A region

19 p2796 A72-37585

Double system HD 175514. III - Analysis of 1968 observations

19 p2858 A72-37810

Spectrophotometric study of eclipsing-variable system components. I

19 p2858 A72-37811

Spectrophotometric investigation of Ap stars. I - Two-dimensional quantitative spectral classification

19 p2858 A72-37813

Determination of the spectrophotometric temperature, mean radius and mass of the star beta Cep

19 p2860 A72-37954

Colorimetric and spectrophotometric gradient systems comparison for bright stars used in automatic telescope pointing control, discussing interstellar absorption

19 p2860 A72-37955

Coude spectra, abundance ratios and radial and rotational velocities of He rich stars, using microphotometer equivalent width tracings

19 p2866 A72-38502

Photometric and power spectrum observation of peculiar blue variable star, showing low amplitude high frequency luminosity oscillations, hydrogen deficiency and degeneracy

20 p2966 A72-38921

A study of the interstellar extinction in the Carina-Centaurus region.

20 p2973 A72-39881

Physical properties of interstellar matter surrounding binary stars from astronomical spectroscopy, discussing eruptions and photometric changes

20 p2975 A72-40069

Variation of the spectrophotometric temperature from the center of the disk to the limb of stars of the spectral classes B and A

21 p3102 A72-40094

- Pressure-scanned echelle grating plus Fabry-Perot stellar spectrophotometer. 21 p3053 A72-40609
- Spectrophotometry of the Wolf-Rayet type stars HD 195765, HD 192163, and HD 192103 21 p3109 A72-41437
- Photometry of RR Lyrae variables in the globular cluster NGC 6981. 21 p3111 A72-41475
- A more accurate determination of the structural features of the instability strip of classical Cepheids from Gascoigne's photoelectric data in the Small Magellanic Cloud 21 p3113 A72-41757
- Observation procedures in high resolution spectrophotometry of solar chromospheric spectral fine structures 22 p3221 A72-42031
- Spectrophotometric study of the cometary nebula NGC 2261 22 p3229 A72-42961
- A spectroscopic and photometric study of the pulsating R Coronae Borealis type variable, RY Sagittarii. 23 p3334 A72-43255
- Giant stars iron abundance from narrow band spectrophotometric analysis and model atmospheres, isolating super metal rich stars below H-R diagram subgiant branch 23 p3334 A72-43256
- Stellar and Uranus photometric measurements for solar J/B-V/ and [U-B]/ color indices determination, using K and H delta lines and G band filters 23 p3337 A72-43615
- Infrared photometry of Northern Wolf-Rayet stars. 23 p3337 A72-43827
- Photometric elements of coparcular unstable AH Vir eclipsing binary at 4400 and 5600 Å, comparing stellar gas stream and solar chromosphere densities 23 p3338 A72-44028
- Spectral line identification computer program determining wavelength and equivalent line width for photometric measurements 23 p3267 A72-44029
- Characteristic curve formulas of cosmic objects and stellar focal images for photometric measurement processing on computer 23 p3267 A72-44030
- Spectrometric zonal standards - Selection of stars and methodology of their study 23 p3338 A72-44031
- Spectrometer for absolute stellar spectrometry 23 p3290 A72-44039
- Individual reddening laws of O-type stars. I - Computation method, first results 24 p3437 A72-44829
- ### STELLAR STRUCTURE
- Pulsar nature and radiation mechanism, examining rotating neutron stars structure and atmospheric dynamics 01 p0131 A72-10973
- Helium abundance in stellar interiors, considering mass-luminosity relations of Hyades 03 p0419 A72-13114
- Neutron star surface structure and cooling calculations for pulsar cosmic ray production through surface material acceleration 03 p0421 A72-13136
- Massive star evolution, discussing stellar structure theory uncertainties, young clusters, helium burning and evolutionary tracks 03 p0425 A72-13262
- Loop structure of Monoceros supernova remnant, predicting thermal soft X ray point source as cooling neutron star 07 p1073 A72-19421
- Energy transport within stellar structure, discussing radiative transfer and opacity relationship to mean free path of radiation 07 p1078 A72-19924
- Stellar structure calculation by real gas equation of state, considering He abundances and solar lines of ionizable metal atoms 07 p1078 A72-19925
- Neutron star properties, formation theories, crust composition and internal structure, examining interior neutron behavior, fermion systems superfluidity, magnetic field effects and stellar dynamics 10 p1533 A72-23890
- Structure of lower main sequence stars, considering ionization equilibrium in outer convection zone 10 p1546 A72-24835
- Stellar physical parameters computed from multicolor photometric data on extraatmospheric magnitudes by maximum likelihood method 11 p1715 A72-25296
- Cold static superdense model for white dwarf and neutron stars, using relativity theory and variational principles for stellar structure in hydrostatic equilibrium 11 p1715 A72-25528
- Pulsar speed increase mechanism as metastable flow state transition in neutron star superfluid core 11 p1724 A72-26705
- Thermonuclear detonation and reimplosion of dense stellar cores, studying beta-processes effect on post-detonation evolution 13 p2044 A72-29625
- Adiabatic stellar shells stability in cases of rigid and compressible nucleus 15 p2304 A72-31334
- Diffusion effects on stellar surface chemical composition, emphasizing solar atmosphere conditions 15 p2305 A72-31342
- Fluid dynamics of convective stellar envelopes. 17 p2618 A72-35933
- Supergiants internal structure, evolution and spectral characteristics, discussing instability phenomena and luminosity calibration 18 p2723 A72-35995
- Examples of multiple solutions for equilibrium stars with helium cores. 20 p2973 A72-39878
- On the influence of the opacity values on static stellar models. I - Horizontal branch stars. 20 p2973 A72-39879
- Local Vogt-Russell theorem confirmation by linear approximation for stellar structure nonlinear differential equations, discussing equilibrium model local uniqueness and stellar stability 20 p2973 A72-39888
- Two phase stellar structure with polytropic equations of state for shell and core, calculating configuration mass, radius and energy 21 p3102 A72-40098
- Numerical models for He stars structural evolution, considering main sequence models of 1-8 solar masses and different carbon enrichments 23 p3334 A72-43258
- Mixing between stellar envelope and core in advanced phases of evolution. IV - Effect of superadiabaticity in convective envelope. 23 p3335 A72-43486

- ### U GEOLOGICAL FAULTS
- ### STEP FUNCTIONS
- Soviet book on theory of differential equations with deviating argument covering step methods, existence and uniqueness theorems, solutions stability, approximations, etc 02 p0252 A72-12124
- Avalanche pulse generator with pretrigger output for reflection coefficient and step function response measurements 02 p0195 A72-12605
- Flow separation of turbulent boundary layer ahead of inward-projecting normal step predicted by rotational flow analysis via iterative solution [ASME PAPER 71-WA/FE-32] 05 p0599 A72-15924
- Semiinfinite circular fluid transmission line transient response to step function [ASME PAPER 71-WA/FE-10] 05 p0646 A72-15932
- Metastable Fe-Cr-Ni austenitic stainless steels, demonstrating step phenomenon at elastic limit 05 p0672 A72-16011
- Linear multivariable control system state observation by sampling with arbitrary but fixed distribution of sampling instants, emphasizing dual control by step functions 07 p0961 A72-19707
- Variational solutions to linear integral equations and extremal functions in physical gas dynamics problems, using stepwise constant trial functions 08 p1150 A72-21620
- Convergence of random number sums of independent infinitesimal multidimensional stochastic step processes to generalized Poisson processes 09 p1340 A72-22423
- Static deflection effect on nonlinear spring mass system step function response, considering approximate calculation of oscillation period 11 p1688 A72-26372
- Ideal low pass filter with fastest monotonic step response to permit no signal transmission outside prescribed frequency band 11 p1605 A72-26469
- Quantization background noise during hologram approximation by step function, discussing effect on diffraction field forming reconstructed image 13 p1959 A72-29684
- Approximate periodic solutions of second order nonlinear differential equations via step function 15 p2262 A72-31553
- Signal transmission through LSI logic circuit chains, discussing time delay measurement by step function testing 15 p2211 A72-31846
- An approximate analysis of non-linear non-conservative systems subjected to step function excitation. 17 p2582 A72-35412
- Snap-off diodes for avalanche generators step pulse output rise time steepening, describing circuit diagram and time-volt-ampere characteristics 21 p3035 A72-41650
- Dynamic buckling of axially stiffened imperfect cylinders under axial impulse. 24 p3453 A72-44602
- ### STEPS
- Turbulent shear layer flow in reattachment region downstream of backward facing step and non-monotonic return to ordinary boundary layer state, noting eddy length scale decrease 10 p1468 A72-24467
- ### STEREOCHEMISTRY
- Diastereomeric S-prolyl dipeptide derivatives adaptation of gas chromatographic quantitative estimation of R- and S-leucine enantiomers 11 p1590 A72-26366
- The steric analysis of aliphatic amines with two asymmetric centres by gas-liquid chromatography of diastereoisomeric amides. 17 p2510 A72-34337
- ### STEREOGRAPHY
- ### U STEREOPHOTOGRAPHY
- ### STEREOPHOTOGRAPHY
- Air pollution circulation patterns remote sensing, describing multispectral stereo image pairs digital cross correlation [AIAA PAPER 71-1106] 01 p0067 A72-10551
- Camera slit lamp apparatus design for anterior eye diagnosis in two dimensional and stereoscopic photography and ophthalmic application 04 p0478 A72-14725
- Photogrammetric coordinate relation of points on lunar surface and stereo panoramas of scanning photographs by Luna 9 and 13 orbiters 05 p0660 A72-15832
- Pinhole, fly-eye and holographic stereogram methods, examining resolution relationships, horizontal and vertical parallax and aberrations 05 p0663 A72-16673
- Block triangulation of arbitrary terrain without point transfer, using stereo comparator 06 p0806 A72-17755

Planicart stereoplotter for map compilation and revision in photogrammetry

06 p0815 A72-17756

AS-11A stereoplotter computerized adaptation to stereo-modeling of SLAR terrain mapping

06 p0818 A72-18330

Random bias holographic technique for imaging three dimensional objects, using laser, one mirror, one diffuser and photographic plate
[AD-743777]

07 p0982 A72-19036

Semiautomatic stereophotographic processing of cosmic ray shower particle interaction data from Wilson chamber

07 p0988 A72-19865

Drobyshv stereograph corrector operation for aerial photographs processing with transformed beam of stereoprojector

09 p1308 A72-22483

Aerial stereopair photograph orientation for geodetic coordinate adjustment in terms of collinearity, coplanarity and scaling

09 p1308 A72-22486

Measurement accuracy and reliability of photogrammetric methods in stereoscopic height determinations of wooded areas

09 p1312 A72-23284

Topographical stereo map plotting apparatus with auxiliary device for orthophoto production, describing design for combined photointerpretation-cartographic applications

09 p1313 A72-23309

Visual and automatic stereometric image analysis, citing minimum measurable contrast thresholds for various devices

10 p1478 A72-23826

Viking Lander imaging experiments with stereoscopic camera system to study Martian surface and atmospheric morphology, composition and evolution

10 p1540 A72-24382

Zeiss /Jena/ stereoplanigraph design and operation to obtain purely optical projection for object reconstruction, discussing human operator replacement by objective electro-optical system

16 p2394 A72-33870

Epipolar scanning to convert image correlation from two dimensional to one dimensional task for application to photogrammetric automation

18 p2691 A72-36492

Nonholographic coherent optical correlation for automatic stereoperception.

18 p2691 A72-36493

Stereoplotting instrument concept based on image data selection independence from object space model reconstruction

18 p2691 A72-36498

A new computer-assisted stereocomparator.

18 p2664 A72-36499

The measurement of three-dimensional body movements by the use of photogrammetry.

20 p2898 A72-39806

Russian book - Stereophotogrammetric processing methods for photographs made from a mobile basis.

22 p3175 A72-42025

High resolution lunar surface stereophotographs from pairing overlapping Lunar Orbiter photographs

22 p3230 A72-43195

Scanning electron microscope stereophotographic picture synthesis from sequential holographic recording of three dimensional objects

23 p3290 A72-43904

STEREOSCOPIC PHOTOGRAPHY

U STEREOPHOTOGRAPHY

STEREOSCOPIC VISION

Neuronal mechanisms of binocular vision and space perception from tests on cats and men, discussing neurophysiological models of stereopsis

01 p0012 A72-10479

Stereopsis spring coupled magnetic dipole model of binocular stereoscopic depth perception in man

01 p0012 A72-10480

Stereoscopic depth movement perception sensitivity compared to monocular movement

02 p0169 A72-12209

Oculomotor cue-based distance perception, discussing glasses adaptation-caused accommodation and convergence changes in stereoscopic depth perception

06 p0765 A72-17414

Stereoscopic projection screens for three dimensional image display, discussing classification by diffusing properties, surface types and applications

06 p0814 A72-17440

Stereoscopic acuity for photometrically matched background wavelengths at scotopic and photopic levels, plotting variable depth error as function of retinal illuminance

10 p1425 A72-24269

Visual latencies measurement as function of stimulus luminance and adaptation state by stereoscopic null method, characterizing relationship by inverse power function

13 p1911 A72-29968

Russian book - Eye movements as the basis of spatial vision and as a model of behavior

17 p2509 A72-35459

On the apparent orbit of the Pulfrich pendulum.

18 p2653 A72-36608

Viewing stereoscopically through binocular optical systems.

21 p3054 A72-40728

On a long-term temporal aspect of stereoscopic depth sensation.

23 p3258 A72-44381

STEREOSCOPY

NT STEREOPHOTOGRAPHY

STERILIZATION

NT CHEMICAL STERILIZATION

NT SPACECRAFT STERILIZATION

Planetary quarantine microbial contamination control, considering clean room concept and microbiological barrier techniques

01 p0019 A72-10821

Spore survival in dry heat sterilization as function of water activity, indicating entropy-molecular stability relationship

04 p0475 A72-15259

Probability for spore sterilization by aerodynamic heating, considering straight line and decaying circular orbital Mars entry trajectories

16 p2461 A72-34165

STERILIZATION EFFECTS

NT CHEMICAL EFFECTS

NT CORROSION

NT DECONTAMINATION

NT DEGRADATION

NT THERMAL DEGRADATION

STERNS

U AFTERBODIES

STERNUM

Chin-sternum-heart syndrome from partial parachute failure, with close reference to atrial endocardial and myocardial lacerations

02 p0167 A72-11711

STEROIDS

NT ALDOSTERONE

NT CHOLESTEROL

NT CORTICOSTEROIDS

NT CORTISONE

NT PENICILLIN

Tobacco tissue cultures with Apollo 12 lunar material, determining endogenous sterols and fatty acids concentrations by gas chromatography and mass spectrometry

07 p0920 A72-19850

STIFF STRUCTURES

U RIGID STRUCTURES

STIFFENING

Anisotropic plate with hole stiffened at edge by thin isotropic ring, calculating thermal stress distribution

03 p0450 A72-14113

Pressurized vessel bottoms weakened by central hole with edge stiffened by elastic ring, determining stress-strain state and stress concentration

03 p0451 A72-14120

Elastic stiffener bonded to elastic half plane with different mechanical properties, reducing governing integral equation to infinite system of linear algebraic equations

[ASME PAPER 71-APM-TT] 04 p0589 A72-15182

Doubly symmetric oval ring with stiffeners pair parallel to major or minor axis, investigating stress behavior under radial load

[ASME PAPER 71-WA/DE-14] 05 p0732 A72-15941

Graphite reinforced epoxy stiffeners for variable geometry fuel tank to meet light weight requirement, discussing billet fabrication, assembly and installation

08 p1176 A72-21688

An experimental buckling study of skin-corrugated ring-stiffened curved panels.

[SESA PAPER 1993A] 17 p2630 A72-34818

STIFFNESS

Algorithms for mass and stiffness matrices synthesis from experimental vibration modes applied to cantilever beam

[SAE PAPER 710787] 01 p0137 A72-10278

Unidirectional fiber array reinforced composites with improved longitudinal tensile strength and stiffness compared with structural metals

[SME PAPER EM 71-283] 01 p0092 A72-10966

Torsional stiffness /shear modulus/ of glass fiber reinforced plastic tubes as function of filament winding angle

01 p0141 A72-10999

Finite element method extension using computer program for solving problems of elastic bodies in contact with stiffness method advantages

01 p0141 A72-11047

Thin walled prismatic structural members under uneven axial moment distribution, formulating force deflection equations for torsional-flexural behavior

01 p0141 A72-11049

Stiffness matrix method application to finite deformation theory, noting convergence through use of iterative interpolation in numerical calculations

02 p0298 A72-12667

Bending stress analysis of rectangular plate with variable stiffness applied to marine propeller blade

02 p0298 A72-12673

Complex structures mass and stiffness matrices reduction by automatic condensation, calculating lowest eigenfrequencies and eigenmodes of substitute systems

[DGLR PAPER 71-108] 02 p0299 A72-12721

Ti alloys for airframe shell construction based on room temperature strength, stiffness and densities comparison with Al alloys, stainless steel and Be data

03 p0373 A72-13615

Fiber flexural stiffness determination from bending moment and deflection relation, using bend test

03 p0365 A72-14300

Multipurpose optimal design of elastic structures with piecewise uniform cross section for load states and prescribed stiffness by energy methods

[AD-743418] 03 p0455 A72-14386

Plastic deformation and elastic stiffness of refractory metals, discussing impurities, alloying, temperature, work hardening, strain rate and texture effects

06 p0822 A72-18519

Book on matrix structural analysis covering matrix algebra concepts, direct stiffness matrix methods, lifting surface, nonlinear truss and structural partitioning analysis, etc

07 p1092 A72-19908

Transfer matrix and dynamic stiffness techniques application to critical speed analysis in rotating machinery

08 p1224 A72-22128

Predictor-corrector method for stiff linear differential equations, considering truncation error estimation and system stability

11 p1675 A72-25272

Distributed elastic system discrete model mass, stiffness and damping matrices derivation from dynamic test response data

[AIAA PAPER 72-346] 11 p1728 A72-25375

Stiffness, stress and deformation analysis of discretely attached corrugated shear webs, using minimum potential energy and calculus of variations methods

[AIAA PAPER 72-351] 11 p1728 A72-25380

Thermoplastic polypropylene sandwich molds stiffness variation with time, noting three point bending and creep tests

11 p1673 A72-25550

Composite materials fabrication, emphasizing high strength/stiffness to weight ratio as critical performance requirements

12 p1815 A72-28082

Brittle continuous and crazed anodic oxide coating-effect on Al filament stiffness, comparing with Dow analysis

13 p1974 A72-28666

Infinite plane plates sound radiation due to bending waves interactions with density and stiffness fluctuations in material

13 p2004 A72-29094

Crystalline polymers behavior as multiphase composite solid, calculating supermolecular structures effects on stiffness properties

14 p2163 A72-30181

Stability of compressed elastic rod with continuously varying stiffness, deriving solution via influence function

14 p2166 A72-30691

Finite element displacement field with internal equilibrium application to nine degrees of freedom triangular bending element stiffness matrix calculation

14 p2168 A72-30930

Compressive strength and stiffness improvement for crystalline thermoplastic polymers via solid glass sphere reinforcement

16 p2414 A72-33370

Bending of skew plates of variable rigidity.

17 p2626 A72-34329

Monograph - The finite-element method in plate bending analysis

17 p2634 A72-35547

Contribution to the theoretical calculation of sandwich structures with tube core

18 p2736 A72-36939

Buckling of elastic bars with varying stiffness and nonideal boundary conditions.

21 p3118 A72-40932

Cylindrical shells of optimal torsional stiffness

22 p3233 A72-42112

Simple thickness modes for laminated composite materials.

22 p3235 A72-42465

Iteration process convergence improvement based on stiffness change expression as linear combination of two matrices in structural reanalysis

22 p3235 A72-42602

Elastic stiffness and ductility of refractory materials of long service life, noting creep diagrams and tensile strength

23 p3301 A72-43959

A method of computing numerically integrated stiffness matrices.

24 p3457 A72-44878

Wave propagation in a thin hollow cone by a finite element method.

24 p3458 A72-44886

STIGMATISM
Field compensated Michelson spectrometer systems, discussing tolerances, usefulness, resolution luminosity products, stigmatism and astigmatism 09 p1313 A72-23328

STILBENE
Stilbene scintillator detector for gamma ray spectrometry in energy range 0.5-5 MeV, separating gamma rays from neutrons by pulse shape discrimination technique 03 p0408 A72-13031

STIMULANT
NT CENTRAL NERVOUS SYSTEM STIMULANTS
NT NORADRENALINE
NT NOREPINEPHRINE
Work capacity evaluation from fatigue, biological rhythm, tissue respiration and oxygen consumption studies, discussing pharmacological stimulation effects 14 p2078 A72-30376

STIMULATED EMISSION
Laser produced spark plasma, calculating threshold conditions for onset of stimulated scattering process and self focusing 04 p0559 A72-15346
Stimulated Raman emission in glass fiber optical waveguides with low threshold broadband gain, permitting construction of wideband amplifiers and oscillators 07 p0953 A72-18876
Stimulated emission cross section, loss coefficient and terminal level lifetime of high power Nd-phosphorus oxychloride liquid lasers 07 p1004 A72-19226
He-Ne laser discharge gap oscillation modes observation, noting applied magnetic field, gas parameters and cathode type effects on stimulated emission 07 p1008 A72-20510
Continuous laser action in Nd-yttrium aluminum oxide rod, determining terminal state loss coefficient in stimulated emission 08 p1217 A72-21322
Spectral density curves for intensity fluctuations of stimulated emission from low and ultralow frequency gas lasers as function of thermal oscillation, mode interference and beat effects 08 p1182 A72-21379
Stimulated emission and spectroscopic properties of activated ferroelectric crystal laser, noting Stark effect 09 p1323 A72-22981
Flashlamp and laser pumped cresyl violet laser emission characteristics between 620 and 710 nm, noting self mode locking in 3 component solution 09 p1324 A72-23048
Four-photon parametric frequency selection within broad stimulated emission lines during coherent light interaction, considering dye solution laser pumping 11 p1648 A72-26335
Spectroscopic and stimulated emissive properties of neodymium ions in potassium yttrium tungstate crystals at 77 and 300 K 11 p1701 A72-26362
Stimulated laser emission in vacuum UV by liquid Xe excitation with electron beam, determining threshold current density, radiation divergence and line half width 12 p1820 A72-27582
Laser emission intensity enhancement based on stimulated Brillouin scattering effect by raising pumping level, energy density and pulse duration 12 p1821 A72-27587
Stimulated luminescence in activated Nd glass by pulsed laser radiation at 1060 nm wavelength 13 p1969 A72-29519
Temporal, energetic and spectral properties of stimulated emission from Cr doped ruby laser irradiated by Co 60 gamma rays 13 p1969 A72-29613
Resonance scattering and direct photoelectron excitation contribution to molecular nitrogen first positive bands emission in day airglow from rocket measurements 13 p1953 A72-29808
Angular distribution of first Stokes component for stimulated combinational scattering investigated under various excitation conditions 13 p1972 A72-29982
Stimulated Compton scattering of laser radiation by electron plasma, determining electrons diffusion coefficient and velocity distribution function 13 p1972 A72-29987
Co 60 gamma radiation effect on stimulated ruby laser emission delay time, pulse duration, energy curve and intensity 13 p1972 A72-30005
Molecular nitrogen pulsed laser wavelength measurements, observing IR bands, stimulated emission lines and population inversion mechanisms 15 p2249 A72-32151
Stimulated emission in molecular iodine vapor phase laser optically pumped by Q switched Nd-YAG laser second harmonics 15 p2251 A72-32538

Visible and UV stimulated emission in plasma of direct pinch discharge on Ar II and III ions, discussing application possibility to plasma diagnostics 16 p2400 A72-33297
Pumping current pulse duration effect on lasing threshold of injection lasers with diffusion junctions and heterojunctions in GaAs-AlAs system 16 p2404 A72-33986
Nd-glass laser interaction with singly stimulated two-photon emission and anti-Stokes Raman scattering from metastable state He, calculating cross sections 17 p2565 A72-35831
Dependence of emission on work function variation in metals under tension 18 p2699 A72-36350
Optical polarization effects in a gas laser 18 p2697 A72-36487
Sideband growth in nonlinear Landau wave-particle interaction 19 p2838 A72-37327
Properties of stimulated neodymium laser emission under the action of Co 60 gamma emission 19 p2812 A72-38214
Influence of the refractive index nonlinearity on the dynamics of emission from semiconductor lasers 20 p2932 A72-39504
Frequency-tunable stimulated IR parametric fluorescence produced by barium sodium niobate crystal pumped with picosecond pulses from frequency-doubled mode locked Nd-glass laser 20 p2933 A72-39560
Stimulated thermal scattering of picosecond laser pulses 21 p3063 A72-40779
High-intensity X-ray spectra and stimulated emission from laser plasmas 22 p3210 A72-41990
Co 60 gamma radiation effect on stimulated ruby laser emission delay time, pulse duration, energy curve and intensity 22 p3186 A72-42731
Stimulated emission with pumping by a pulsed electron beam formed in a direct discharge 23 p3295 A72-43319
Stimulated emission in vacuum far ultraviolet during rapid heating of the plasma electrons by ultrashort light pulses 23 p3322 A72-44466
Mass spectra stimulated by O+ and Ar+ interacting with a surface 24 p3378 A72-45312

Elements of a theory of CW gasdynamic quantum generators. 23 p3297 A72-44225

STIMULATION
NT AUDITORY STIMULI
NT SENSORY STIMULATION
Biological systems activity in controlling extremal problems of nervous and muscular systems, noting external stimulation minimization 19 p2761 A72-38577
Patterns of spontaneous and reflexly-induced activity in phrenic and intercostal motoneurons. 21 p3003 A72-41462

STIMULI
Maximum aerobic power response and oxygen consumption to training stimulus intensity, duration and frequency, using bicycle ergometer exercise 07 p0916 A72-18965
Pain perception anatomical and neurophysiological mechanism, discussing human response to mechanical, thermal and chemical pain inducing stimuli 22 p3146 A72-42780

STIRLING CYCLE
Mechanical seal for airborne Stirling cycle cryogenic refrigerator, noting He cross leaks and sealing faces galling and blistering [ASLE PREPRINT 72AM 16] 13 p1964 A72-28973

STOCHASTIC PROCESSES
NT MARKOV CHAINS
NT MARKOV PROCESSES

STOCHASTIC PROCESSES
NT RANDOM PROCESSES
NT RANDOM WALK
Linear stochastic-parameter output channel, examining signal quadrature components statistical characteristics 01 p0024 A72-10199
Stochastic differential equations vector solution by two-time method, applying to random harmonic oscillators and wave propagation in random media [AD-733125] 01 p0093 A72-10510
Estimation and control relations separation for discrete time stochastic systems, considering assumptions on linearity, criteria, information pattern, constraints and noise distributions 01 p0047 A72-11306
Stochastic linear-quadratic-Gaussian problem role in optimal closed loop control system design, emphasizing philosophy, modeling and problem formulation [AD-738763] 02 p0198 A72-12801
Linear and quadratic programming procedures in optimal control problems of stochastic and deterministic system design 02 p0198 A72-12807
Discrete-time linear quadratic stochastic control system with perfect measurements of state, obtaining optimal solution by dynamic programming 02 p0198 A72-12808
Bibliography on linear-quadratic-Gaussian problems covering quadratic criteria, state estimation, stochastic control, computations and applications 02 p0198 A72-12813
Describing function method for nonlinear systems under stochastic input, considering statistical optimizations/linearization and self oscillation under noise 03 p0337 A72-13074
Weak solutions of degenerate partial differential equation of dynamic programming, investigating relation to value function of stochastic optimal control problem 03 p0382 A72-13701
Plate under projectile impact, calculating motion response due to random initial velocity distribution over surface by stochastic model 03 p0447 A72-13852
Finite memory uncertain stochastic controller, developing optimal and suboptimal algorithms 03 p0329 A72-14181
Closure schemes and retention of third moments in stochastic dynamic equations for numerical weather prediction, discussing imperfect forcing effects and kinetic energy relations 03 p0385 A72-14230
Nonlinear stochastic systems stability conditions description by Volterra integral equation, applying to distributed parameter feedback control system with nonlinear amplifier of random gain 04 p0504 A72-14663
Stochastic signal method for measuring dynamic viscoelastic properties of isometric frog sartorius muscle at rest and contraction, using white noise vibrations 04 p0480 A72-15221
Closure approximation in hierarchy stochastic differential operator equations in statistical mechanics 04 p0540 A72-15257
Adaptive control algorithm with disturbance prediction for solution of deterministic and stochastic optimization problems of linear equation of state and quadratic performance criteria 05 p0639 A72-15759
Stochastic aerodynamic heating of shallow shell in supersonic turbulent flow by Monte Carlo method 05 p0599 A72-15845
Complex systems stochastic survivability estimates dependence on delay depth and initial conditions of interaction 05 p0640 A72-16204
Missile trajectory stochastic optimal control systems with fuel constraint by mean path deviation optimization 05 p0725 A72-16452
Optimal closed loop control of stochastic nonlinear systems by expanded cost function applied to reduced terminal error atmospheric entry problem 05 p0685 A72-16462
MHD Couette flow stochastic processes optimal control synthesis by dynamic programming 05 p0653 A72-17131
Optimal control synthesis for linear stochastic systems with random piecewise-continuous coefficients as function of time 05 p0683 A72-17139
Optimal control of systems described by stochastic differential equations with delayed argument, using Kozhevnikov mean principle 05 p0683 A72-17140
Optimal control algorithm for nonlinear stochastic systems ensuring probability-wise stability and minimum error, using Liapunov theory and dynamic programming 05 p0691 A72-17141

Minimal energy stochastic controller design for electrically driven vehicles, using dynamic programming

06 p0795 A72-17304

Adaptive control for linear discrete time stochastic systems with unknown gain parameters, considering open loop feedback optimal control using quadratic performance index

[AD-739126] 06 p0791 A72-17305

Parameter adaptive self organizing control of linear discrete time systems, presenting stochastic approximation algorithms for feedback systems identification

06 p0791 A72-17306

Optimally sensitive closed loop control synthesis for systems containing uncertain time varying parameters, applying to stochastic systems

06 p0792 A72-17309

Nonlinear stochastic systems analysis by extended Volterra-functional method for first and higher order linear plants with constant or time varying parameters

06 p0838 A72-17376

Stochastic dynamic equations for atmospheric prediction and numerical weather forecasting, using barotropic model

06 p0841 A72-17633

Discrete stochastic differential games with quadratic payoff function, deriving deterministic, randomized and game optimal control strategies

06 p0793 A72-17956

GERT simulation program as stochastic network analysis technique for modeling policies and processes in performance tests and checkout

06 p0780 A72-17977

GERTS II simulation program for graphically modeling and analyzing complex stochastic systems, discussing applications to assembly line, project management, conveyor and inventory systems

06 p0780 A72-17978

Suboptimal stochastic control strategies class based on game theory and optimin principle, investigating completeness in closed discrete-time systems

06 p0794 A72-18167

Stochastic differential equations for a posteriori probability distribution in problems of Markov process parameter estimation, adaptive filtering and signal detection

06 p0794 A72-18301

Stochastic optimal control for operations of plants with pure lag and two point estimate of performance index investigating systems stability

06 p0795 A72-18662

Stellar motion in asymmetric galaxies with three degrees of freedom, using four dimensional surface of section mapping and stochastic measurement

07 p1034 A72-19072

Minimax terminal state estimator existence and structure for linear discrete system, applying to stochastic pursuit evasion games of LQ/G variety

07 p1027 A72-19283

Signal design for coherent M-ary communication systems by stochastic gradient algorithm for minimizing error rate

07 p0959 A72-19285

Stochastic approximation algorithm with nonstationary regression function for signal parameter estimation, considering convergence, mean square error bound and applications

07 p1027 A72-19291

Dynamic programming for optimal stochastic control problem with Gaussian shot noise involving parabolic or elliptic differential equation in unbounded domain, discussing iterative solution and quasi-linearization

07 p1027 A72-19292

Failure analysis probability for structures excited by randomly varying dynamic loads, comparing Gaussian and filtered Poisson processes

07 p1093 A72-19948

Stochastic simulation model for space shuttle fleet operations, using closed loop queueing system approach

07 p0965 A72-20330

Computer simulation of empirical confidence limits for variance spectra, applying to Gaussian random noise data stochastic model

07 p0951 A72-20360

Diffusion and stochastic variations of galactic cosmic rays in solar wind

07 p1066 A72-20648

Nonlinear filter dynamics for stochastic optimal control for quadratic cost functional, evaluating performance

08 p1145 A72-20866

Algorithm for asymptotic power series for Poisson process residence time function generation in band with delaying screen

08 p1198 A72-20998

Stochastic rule for optimum moment of preventive maintenance of redundant technological systems, predicting system reliability

08 p1180 A72-22056

Convergence of random number sums of independent infinitesimal multidimensional stochastic step processes to generalized Poisson processes

09 p1340 A72-22423

Sigma algebra and statistics system for optimal stopping of stochastic processes for continuous time case

09 p1340 A72-22424

Stochastic approximation for identification of element with second order lag, noting convergence with optimum parameter

09 p1291 A72-23371

Positive to quasi-stochastic matrix reduction by similar variation method, determining largest characteristic number and eigenvector

09 p1343 A72-23490

Monotonicity theorems for functionals and transformations in stochastic models of queueing, reliability and optimality problems

09 p1343 A72-23565

Interplanetary spacecraft midcourse guidance stochastic control, deriving algorithm for computing optimum velocity correction and execution time with allowance for correction-dependent errors

10 p1508 A72-23778

Adaptive filter techniques application to maneuvering reentry vehicle tracking, using Wald sequential test, decision theory and stochastic approximation

10 p1509 A72-23779

Differential geometric methods to extend linear system theory to nonlinear classes, considering differential equations, controllability, optimal control, stochastic processes and bilinear system problems

10 p1503 A72-23788

Quadratic cost, nonlinear optimal adaptive stochastic control of linear plant and measurement models excited by white Gaussian noise and with unknown parameters

10 p1455 A72-23792

Stochastic model for eye movements during fixation on stationary target

10 p1429 A72-23795

Linear least squares estimation of Stratonovich-Kalman-Bucy formulas by innovations method

10 p1503 A72-23801

Stochastic projected gradient algorithm to maximize SNR subject under linear or nonlinear constraints, applying to detector antenna array processing

10 p1456 A72-23808

Stochastic nonlinear system one-step optimal dual control instead of separation control policy for performance improvement

10 p1456 A72-23810

Optimal closed loop control of discrete stochastic nonlinear systems, considering guidance and navigation for space and terrestrial vehicles

10 p1456 A72-23811

Stochastic models of human performance effectiveness functions reliability and correctability from error data generated by tracking and vigilance tasks

10 p1429 A72-24001

Optimal closed loop control of discrete stochastic nonlinear systems, obtaining solution by cost function in power series around deterministic trajectory

10 p1457 A72-24499

Equivalence conditions for optimal control problems for stochastic and deterministic plants in cases of nonrandomized strategies

10 p1457 A72-24637

Stochastic optimization of airborne laser seeker system design parameters to maximize target acquisition probability through regression analysis of data from computerized model

10 p1437 A72-24682

Statistical linearization of stochastic differential equations for optimal terms in mean square distance

10 p1506 A72-24993

Stochastic control theory application to flight problem, discussing aircraft identification and adaptive control over wide environmental range

10 p1458 A72-25146

Cybernetic system effectiveness analysis with operations research and statistical theory based on stochastic treatment

11 p1608 A72-25428

Complex square stochastic matrix spectral inverse, examining nonzero eigenvalues on unit circle

11 p1677 A72-26152

McShane belated stochastic integral existence theorem with quasi-martingale process for sample continuity assumption

11 p1678 A72-26156

Random Fredholm and Volterra integral equations applied to stochastic systems, investigating absolute stability concept

11 p1679 A72-26780

Statistical analysis of strain criteria and stochastic relations for Al alloy fatigue life and minimum creep rate at 175-250 C

11 p1663 A72-26800

Stochastic dynamic prediction of meteorological fields in deterministic and indeterminate atmosphere

12 p1838 A72-27020

Inverted pendulum subjected to small amplitude sinusoidal periodic and stochastic base motion, determining stability boundaries by averaging method

12 p1844 A72-27247

Stochastic time varying patterns classification by Kalman filter, discussing optimum dichotomizer with supervised learning

12 p1790 A72-27498

Nonlinear stochastic partial differential equations solution by graph technique, calculating correlation function and phase change spectrum in phase locked circuit

12 p1837 A72-27575

Optimal allocation of tasks and resources, using asymptotic properties of stochastic approximation method

12 p1837 A72-27823

Reliability and stochastic stability theory relationships for multidimensional and continuous systems

13 p1985 A72-28486

Popov frequency criterion analog for stochastic nonlinear continuous systems with random parameters and disturbances, investigating stability

13 p1935 A72-28608

Sinusoidal signal and stationary quasi-white Gaussian noise mixture effects on stochastic phase locked AFC system operation, noting phase error probability density function

13 p1921 A72-29285

Stochastic differential equations for a posteriori probability distribution in problems of Markov process parameter estimation, adaptive filtering and signal detection

13 p1937 A72-29441

Stochastic aerodynamic heating of shallow shell in supersonic turbulent flow by Monte Carlo method

15 p2178 A72-31264

Stochastic atmospheric density fluctuations effect on circular-orbiting satellite roll-yaw oscillations stability

15 p2319 A72-31457

Hierarchical system of helicopter service terminals, calculating passenger lots for single and multiloop arrangements under given stochastic input conditions

15 p2337 A72-31498

Linear stochastic-parameter output channel, examining signal quadrature components statistical characteristics

15 p2195 A72-31623

Stochastic signal reflection by passive element, synthesizing optimal echo-signal detector for space diversity reception

15 p2197 A72-31877

Generator for data transmission lines stochastic noise bursts simulation with statistically independent burst durations and intervals

15 p2201 A72-32475

Automated problem solving in continuous stochastic processes, using nonergodic representation of Gaussian process with continuous spectral density

15 p2204 A72-32588

Group perturbation method for accuracy analysis of nonlinear stochastic automatic control systems, noting computer time reduction

16 p2371 A72-33091

Nonlinear vibration damper system subject to forced vibrations considered as stochastic processes in form of white noise and stationary and ergodic processes

16 p2467 A72-33144

Digital phase locked loop realization for near-optimum demodulation of continuous-time FM signal using stochastic estimation theory

16 p2362 A72-33213

Application of statistical linearization techniques to nonlinear multidegree-of-freedom systems. [ASME PAPER 71-WA/APM-5]

17 p2624 A72-34315

Book - Elements of applied stochastic processes

17 p2575 A72-34624

Application of a limit theorem to solutions of a stochastic differential equation.

17 p2575 A72-34866

Regional Conference on Control Theory, University of Maryland, Baltimore, Md., August 23-27, 1971, Proceedings.

17 p2533 A72-34948

Discrete-time demodulation of continuous-time signals.

17 p2516 A72-35332

Numerical solution of an optimal control problem with a probability criterion.

17 p2534 A72-35531

Identification of periodicities in the structure of natural stochastic processes

17 p2534 A72-35783

Stochastic electrodynamics based on zero electromagnetic field motion, deriving Schroedinger equation and electromagnetic model of gravitation

17 p2584 A72-35912

Approximations yielding closed equations for isotropic turbulence compared to laboratory and computer experiments, emphasizing Langevin type model equation for velocity

18 p2677 A72-36008

Nonlinear functional homogeneous chaos expansions for stationary stochastic processes in turbulence theory

18 p2678 A72-36011

Dynamo instability and feedback in a stochastically driven system. 18 p2678 A72-36013

Stochastic optimal path selection via N discrete points set, discussing probability distributions and computer requirements 18 p2672 A72-36055

Hybrid processing of empirical functions in mechanics 18 p2710 A72-36423

A stochastic bioburden model for spacecraft sterilization. 18 p2652 A72-36442

Reliability of simulations of asymptotically steady and strictly ergodic stochastic processes 18 p2704 A72-36467

Adaptive nonlinear optimization of the signal-to-noise ratio of an array subject to a constraint. 18 p2660 A72-36507

Optimal control laws for stochastic problems involving intentional errors, caution and probing 18 p2674 A72-36825

Optimal minimal-order observers for discrete-time systems - A unified theory. 18 p2674 A72-37099

Linear stochastic system optimal measurement strategy and matched Kalman type filter computation via transformation into deterministic control problem 18 p2674 A72-37100

Optimal terminal rendezvous as a stochastic differential game problem. 19 p2869 A72-37284

Sufficient conditions for two stage stochastic optimal control difference approximation by finite dimensional extremum problem sequences 19 p2777 A72-37318

Infinite systems of stochastic differential equations arising in optimal nonlinear filtering theory 19 p2824 A72-37323

Certain properties of continuous stochastic approximation procedures 19 p2824 A72-37325

Stochastic analogs of finite-converging learning algorithms for recognition systems 19 p2769 A72-37421

Dynamic programming technique for simultaneous measurement and dynamic control optimization for stochastic systems 19 p2779 A72-38233

Pontryagin Minimum Principle application to stochastic optimal control problems formulated around linear systems with Gaussian noise and general cost criteria 19 p2779 A72-38234

A circle criterion for nonlinear stochastic feedback systems. 19 p2779 A72-38235

Optimal decentralized control of two coupled linear stochastic systems, introducing fake plant white noise for weak coupling effects compensation 19 p2779 A72-38236

Linear control system design with parameter uncertainties, using stochastic control approach based on minimization of state vector-dependent quadratic performance index expected value 19 p2780 A72-38239

Suboptimal stochastic control of a class of linear distributed parameter regulators. 19 p2780 A72-38243

On-line identification of multivariable stochastic feedback systems. 19 p2781 A72-38270

Nonlinear oscillations stochastic instability in dynamic systems, discussing nonequilibrium statistical mechanics 19 p2836 A72-38814

Fourier transformation relating autocorrelation to spectral density of power bounded and energy bounded functions, discussing unsteady stochastic processes 20 p2953 A72-39552

Book - Fundamentals of pattern recognition. 20 p2905 A72-39575

An advanced stochastic model for threshold crossing studies of rotor blade vibrations. 20 p2885 A72-39622

Optimization of controlled plants sequence with stochastic process described by partial differential equations, noting hydropneumatic system of liquid fuel jet engine 20 p2947 A72-39903

State vector moments of nonlinear mechanical systems under stochastic excitation, using Fokker-Planck equation for transition probability and differential equations derivation 21 p3084 A72-40679

Optimal risk equation and solution existence and uniqueness of dual control problems with unknown parameter and additive disturbances 21 p3038 A72-40706

Receiver processing for direct-detection optical communication systems. 21 p3017 A72-40859

Transit time heating in stochastic electromagnetic fields. 21 p3092 A72-41222

Characterization and algorithm for optimal solution of stochastic linear programming to minimize cost 21 p3075 A72-41234

Necessary conditions for continuous parameter stochastic optimization problems. 22 p3198 A72-41932

Stochastic and deterministic relationships between random variables, noting correlation coefficient as measure of regression lines representation accuracy 22 p3178 A72-42449

A stochastic automata theoretical approach to dynamic programming. 22 p3199 A72-42633

Applicability bounds for the equation describing the mean field in a discrete scattering medium with allowance for the correlation of the scatterers 22 p3155 A72-42660

Control and estimation separation in stochastic optimization, discussing Wonham observer matrix reversibility and replacement in closed and closed-open loop systems 22 p3163 A72-42740

Response of linear and nonlinear continuous structures subject to random excitation and the problem of high-level excursions. 22 p3241 A72-42970

German monograph - Stability conditions for a linear homogeneous ordinary differential equation of second order with stochastic parameter excitation. 22 p3199 A72-43055

Particle distribution function evolution effect on turbulent plasma heating by wave interaction, considering stochastic heating of ions 23 p3318 A72-43314

Infinite-time reachability of state-space regions by using feedback control. 23 p3274 A72-43538

Control of jump parameter systems with discontinuous state trajectories. 23 p3275 A72-43547

Empirical support for a stochastic model of evolution. 23 p3254 A72-43565

Output-feedback control law for randomly distributed multivariable system. 23 p3275 A72-43608

Stochastic models for block triangulation by bundle approach, comparing theoretical accuracies obtained from different block adjustment methods 23 p3284 A72-43631

Stochastically optimal terminal control system synthesis for loss function dependence on finite phase coordinates of dynamic system, considering soft landing of flight vehicle 23 p3275 A72-43781

Optimal control of stochastic systems with continuous and discontinuous random disturbances, obtaining problem solution conditions for linear system via dynamic programming 23 p3276 A72-43782

Asilomar Conference on Circuits and Systems, 5th, Pacific Grove, Calif., November 8-10, 1971, Record. 23 p3276 A72-43851

Reduced order observers design for optimal control of linear discrete time stochastic systems, considering velocity-aided tracking filter 23 p3276 A72-43856

Ultrasonic holography in large phase disturbance. 23 p3290 A72-43950

Stochastic coder electronic circuit for random numbers conversion into electrical voltages and vice versa, noting compactness and low cost 23 p3273 A72-44460

Logical groupings of preventive maintenance and replacement policies for stochastically failing items to reduce cost under continuous surveillance 24 p3406 A72-44653

Cumulative damage stochastic models and distributions of strength of steels and graphite. 24 p3412 A72-44673

STOICHIOMETRY

Oxygen content and stoichiometry effects on metal carbides grain growth in liquid phase sintering, discussing carbide-metal interface solution reaction as rate controlling mechanism 02 p0240 A72-11434

Stoichiometry effect on high temperature creep in oxides, relating impurities, point defects concentration and diffusion 09 p1335 A72-22397

Flame structure studies of stabilizing region of near stoichiometric laminar burner methane-air flame 09 p1411 A72-23147

Ignition and incandivity of laser irradiated single micron size Mg particles suspended in stoichiometric methane air mixture 10 p1564 A72-25140

Ni-Mn alloy phase transformation characteristics from neutron diffraction and small angle scattering studies, showing ordered nearly stoichiometric metastable phase for entire temperature range 13 p1976 A72-28903

Chalcogenide semiconductor compounds of b-sub-group transition elements, discussing binary system diagrams, stoichiometric composition and electrical properties 15 p2290 A72-31193

STOKES FLOW

Slow motion in shear flow of doublet of two spheres in contact, using Stokes equations solution 04 p0511 A72-14860

Corrugated cylinder steady rotation in incompressible viscous fluid based on linear or Stokes approximation 09 p1293 A72-22411

Quasi-steady creeping flow in small arrays of spherical, oblate and prolate ellipsoid and circular cylinder lung models, obtaining Stokes equations solutions 10 p1431 A72-24469

Hydrodynamic field generated by sphere motion along viscous fluid filled cylinder axis beyond Stokes regime 10 p1470 A72-24852

Stokes flow about slender particle with nonuniform cross section under distributed force, obtaining solution to integral equation for twisted particle by perturbation scheme 12 p1798 A72-27834

Three dimensional viscous flow near corner, constructing Stokes slow-flow solution 13 p1944 A72-30031

Boundary value problem approximate solution for Stokes flow of unbounded viscous Newtonian fluid past single body, applying algorithm to spheroidal shapes 19 p2784 A72-37369

Stokes fluids nonlinearity effects on turbulent flow with lateral shear in terms of stress and deformation tensors 19 p2785 A72-37470

Unsteady heat transfer and temperature for Stokesian flow about a sphere. [ASME PAPER 72-HT-C] 20 p2983 A72-39482

Note on the symmetries of certain material tensors for a particle in Stokes flow. 21 p3044 A72-40113

STOKES LAW

Real time complete Stokes vector scanning photoelectric polarimeter with 16 cm aperture for measuring visible radiation of solar disk, corona, moon and planets 03 p0356 A72-13279

Calibration of polarimetric measurements in terms of magnetic fields, using Stokes parameters without line formation dependence 03 p0427 A72-13280

Telescopic phase retardation effect on Zeeman triplet Fe of polar sunspot umbrae in Stokes parameter measurements 03 p0357 A72-13288

Lunar gravitational potential determination from Stokes and selenocentric constant 03 p0440 A72-14326

Elliptical polarization and depolarization coefficients for monochromatic radio waves reflected from F 2 ionosphere using Stokes parameters 05 p0656 A72-16241

Nonlocal fluid dynamics continuum theory with equilibrium and constitutive equations derived by generalizing Stokes Laws, noting steady channel and shear flow 16 p2379 A72-33832

The treatment of the Stokes parameters and measurement of magnetic field. 20 p2970 A72-39755

STOKES THEOREM [VECTOR CALCULUS]

Null electromagnetic field propagation in general relativity, applying to Stokes parameters definitions for monochromatic light 02 p0259 A72-12178

Radiation propagation in optically thin anisotropic noncrystalline media, obtaining explicit formulas for Stokes parameters of transmitted and scattered radiation 12 p1865 A72-27052

Photoelastic analysis with Stokes vector and new methods for the determination of characteristic parameters in three dimensional photoelasticity. 23 p3354 A72-44255

Radiation propagation in optically thin anisotropic noncrystalline media, obtaining explicit formulas for Stokes parameters of transmitted and scattered radiation 24 p3425 A72-45705

STOL AIRCRAFT

U SHORT TAKEOFF AIRCRAFT

STONES [ROCKS]

U ROCKS

STONY METEORITES

NT ACHONDRITES

NT AUSTRALITES

NT BEDIASITES

NT BRUDERHEIM METEORITE

NT CARBONACEOUS METEORITES

NT CHONDRITES

NT ORGUEIL METEORITE

NT TEKITTES

- NT TUNGUSK METEORITE**
Terrestrial stony meteorites age determination from C 14 content
09 p1386 A72-22661
- Pavel stony meteorite microspectral analysis to obtain metallic elements weight percentages in chondrites, matrix and core, using laser source for local vaporization and excitation
14 p2159 A72-30785
- Transition element distribution in stony meteorites and in terrestrial and lunar rocks.
17 p2619 A72-35936
- The isotopic composition and elemental abundance of gallium in meteorites and in terrestrial samples.
18 p2723 A72-36061
- Elemental abundances in stone meteorites.
19 p2858 A72-37863
- Non-destructive activation analysis of some elements in stony meteorites by proton- and bremsstrahlen-irradiation.
20 p2899 A72-39833
- Falls of meteorites in Germany: Temporal distribution of the falls and deductions with regard to their origin - Hypotheses concerning the origin of the meteorites as well as further falls and findings in Germany
22 p3227 A72-42542

STOPPING

- Sigma algebra and statistics system for optimal stopping of stochastic processes for continuous time case
09 p1340 A72-22424

STOPPING POWER

- The influence of molecular binding on the stopping power of alpha particles in hydrocarbons.
18 p2655 A72-37193

STORABLE PROPELLANTS

- NT AIRCRAFT FUELS**
- STORAGE BATTERIES**
NT NICKEL CADMIUM BATTERIES
NT SILVER CADMIUM BATTERIES
Battery separator materials requirements derived from in-cell environment and battery mission, evaluating present technology for R and D area concentration
03 p0313 A72-14235
- Rechargeable high energy density battery with Al and Cl electrodes and molten aluminum chloride-alkali chloride eutectic electrolyte
16 p2352 A72-33896

STORAGE STABILITY

- Nitrate ester propellants self ignition hazard and ballistic stability, describing heat generation test at various temperatures for long term storage
14 p2144 A72-30754
- Propellant powders safe life prediction based on short-time tests, discussing aging effects on chemical stability after 7-11 years air conditioned storage
14 p2144 A72-30756
- Cast double base propellant rocket motors safe storage and service life assessment, examining environmental storage conditions and accelerated temperature effects
14 p2144 A72-30758
- Gamma radiation effects on composite propellants stability, investigating polyurethane, polybutadiene, silicone and polyisoprene binders mechanical properties
14 p2144 A72-30760
- Composite and double base solid propellant rocket motors storage, considering ingredients and materials compatibility and ignition temperatures effects on spontaneous inflammation potential
14 p2144 A72-30761
- Solid rocket propellants storage life analysis and prediction by mathematical modeling of physical-chemical failure generating processes
14 p2145 A72-30762
- Insulation and bonding materials effects on double base solid propellants stability, using vacuum reactivity testing technique
14 p2145 A72-30766

STORAGE TANKS

- ELDO launch vehicle cryogenic tanks fabrication, discussing Al alloy selection and mechanical properties at low temperatures, manufacturing processes and thermal insulation
09 p1318 A72-22690
- Determination of the optimal parameters of high-pressure cryogenic fluid storage systems.
20 p2962 A72-39358
- The long fluid storage bag - A contact problem for a closed membrane.
20 p2980 A72-39691

NT TROPICAL STORMS
Soviet book on calms and storms in upper atmosphere covering energy variations, auroras, geomagnetic storms, weather forecasting, etc
03 p0350 A72-13967
- Nonentraining axially symmetric steady state sloping model of severe storm, discussing validity and limitations
03 p0384 A72-14147
- Storm effects on SST operations, discussing wave initiation at storm top and tropospheric propagation
04 p0542 A72-14683
- Storm forecasts by meteorological satellites, describing TV monitoring of cyclones and hurricanes
05 p0683 A72-15978
- Broadbeam S band radar application to quantitative analysis of severe storms, calculating liquid water content
06 p0843 A72-18442
- Supercell, multicell and sheared severe hailstorms structure and motion observation by radar echoes, noting propagation characteristics
09 p1345 A72-22447
- ESSA satellite observation of meridional circulation, noting roles of subsidence sinks, storm depressions and melting fronts
10 p1506 A72-24059
- Radar echo maximum intensity display by digital comparator with shift register video signals storage in National Severe Storms Laboratory
11 p1591 A72-25762
- Martian storm of 1971, describing development, decline, structure and photographic data
12 p1870 A72-27425
- Heat and momentum transfer properties and storm propagation speed under steady convective overturning in shear, considering cumulonimbus convection scale of atmospheric motion
12 p1840 A72-27704
- Gravity waves on leeward side of Continental Divide in Colorado, noting generation by winds and storms
14 p2128 A72-30343
- Cloud liquid water content measurement via digital radar system, presenting two dimensional display of storm system characteristics
21 p3077 A72-40250
- Further study of the severe storm with a rotating updraft configuration.
21 p3077 A72-40466

STRAIGHT WINGS**U RECTANGULAR WINGS****STRAIN AGING****U PRECIPITATION HARDENING****STRAIN DISTRIBUTION****U STRESS CONCENTRATION****STRAIN ENERGY METHODS**

- Ductile tensile cracking macroscopic simulation with perforated pure Al specimens, determining fracture energy as function of hole size and pattern
01 p0086 A72-10987
- Finite inflation of toroidal shell with edges bonded to rigid rim, using Runge-Kutta method to solve differential equations based on Mooney strain energy function
[ASME PAPER 71-WA/APM-20]
- Cyclic loading failure criteria based on plastic deformation energy concepts, considering material load carrying capacity
05 p0733 A72-15960
- Penny shaped interface crack between elastic layer and half space, calculating stress intensity factors and strain energy release rate for aluminum-epoxy combination
06 p0899 A72-18650

- Computation procedure for crystal lattice electrostatic strain energy derivatives
09 p1398 A72-22530
- Finite element generalization of plate displacement functions to shell analysis, using strain energy tensor concept
09 p1372 A72-23228
- Large deflection of variable thickness square plate under uniform load, using strain energy method
10 p1560 A72-25187
- Book on thermal stress analysis covering equivalent thermal loads, bars, beams and rings extensional and bending deformation, shells, strain energy methods, etc
11 p1737 A72-26588
- Strain energy calculation for stability analysis of cylindrical and conical sandwich shells, using Euler-Poisson equations
11 p1739 A72-26925

- Small amplitude plane wave speed variation with pressure for Na and K at absolute zero temperature, using crystal strain energy formulation
12 p1885 A72-27975
- 13 p2006 A72-29675

- Cylindrical shell rectangular finite element from generalized independent strain functions and corresponding displacement functions
14 p2169 A72-31174

- Book on structural analysis covering statically indeterminate structures, force and displacement methods, flexibility and stiffness matrices, strain energy, virtual work, energy theorems, etc
15 p2325 A72-31517

- Strain energy methods for stability of finitely deformed elastic membranes under conservative loading
16 p2465 A72-33002

- Strain energy method for finite deformation of solid and tubular cylinders of incompressible isotropic elastic material, noting torsional and tensile tests on natural rubber
16 p2468 A72-33198

- Strain energy release rate for radial cracks emanating from a pin loaded hole.
17 p2623 A72-34254

- On strain energy and constitutive relations for alkali metals.
18 p2703 A72-37087

- On a method of analysis of the strain energy changes taking place during the rotatory bending fatigue test of carbon steels and an effect of the pearlite patches to these changes.
20 p2935 A72-38881

- The stress intensity factors of a radial crack in a finite rotating elastic disc.
21 p3124 A72-41397

- On the effect of the form of the strain energy function on the solution of a boundary-value problem in finite elasticity.
22 p3236 A72-42606

- Crack propagation speed measurements with wedge loaded double cantilever beam of PMMA, calculating stress intensity, strain energy release rate and kinetic energy
23 p3346 A72-43709

- Nonlinear elastic torsion analysis for aerospace materials.
23 p3354 A72-44251

- Mixed-displacement finite-element analysis with particular application using plane-stress triangles.
24 p3455 A72-44789

STRAIN FATIGUE**U FATIGUE [MATERIALS]****STRAIN GAGES**

- Strain gage and manganin pressure gage instrumentation for magnetic driven flyer plate facility [MDAC-WD-1700]
02 p0223 A72-11502
- Strain gage tests on three dimensional composites for reentry vehicle structural design evaluation
02 p0287 A72-11506
- Moment sensors for strain gaged beam systems analysis, noting application to bending moments determination
02 p0287 A72-11510
- Contactless optical strain measurement based on speckle pattern change of diffusely reflected laser light
02 p0225 A72-11755
- Strain gage measurements of stress intensity factor for crack propagation in fatigue cracked thin metal sheets
03 p0444 A72-13542
- Strain gage system for low amplitude strain measurement, discussing SNR and installation technique
04 p0523 A72-15495
- High precision strain gage dynamometers design and testing at ONERA Modane test center, discussing accuracy limitation due to hysteresis and creep effects [ONERA, TP NO. 995]
05 p0642 A72-15859
- Principle stress errors in biaxial stress fields expressed in terms of transverse sensitivity, stress and Poisson ratios of material during strain gage calibration
06 p0895 A72-17798
- Residual stress measurements in metals by annular photoelastic gages, obtaining relationship to fringe orders
06 p0818 A72-18317
- Elastic constants measurement using vibrating wire strain gages on diametrically loaded circular disk and ring specimens
06 p0818 A72-18325
- Bridge circuit to minimize parasitic electrical disturbances in resistance strain gage measurements of dynamic stresses in impact tests
06 p0819 A72-18672
- X ray and resistance strain gage techniques for bar and metal plate simultaneous residual stress determination
07 p0993 A72-20606
- High temperature strain measurement accuracy improvement by gage spot welding
08 p1163 A72-20920
- Nuclear radiation effects on ceramic cemented strain gages and polyimide encapsulated epoxy bonded gages
08 p1164 A72-20922

- Two terminal semiconductor strain tensor based on evaporated piezoelectric layer for modulation of forward I-V characteristics of thin film diode
08 p1164 A72-20925
- Acoustic wave detection in strain transducer consisting of silicon insulated gate field effect transistor with piezoelectric film incorporated in insulator region
08 p1168 A72-21556
- Static strain measurement errors due to nonstationary thermal conditions in semiconductor resistance gages
09 p1310 A72-22739
- Vibration string static strain gage for high temperature operation, proposing relations for measurement error calculation
09 p1310 A72-22741
- Temperature dependence and error compensation of Si strain sensors, using coupled dc generators
09 p1316 A72-23649
- Ultrahigh strain rate measurement via diffraction gratings directly impressed into test material surface, recording outputs by high speed cameras or photoelectric techniques
10 p1487 A72-24573
- Embedded strain gage technique for subsurface tensile testing of boron-epoxy composites
11 p1671 A72-25467
- Perforated plates plastic deformation, stresses and strains near holes, using strain gage data in biaxial tensile tests
11 p1733 A72-25540
- Flow measurement instrumentation for turbomachine rotors, noting telemetry type data transmission system with strain gage pressure transducers for turbocompressor
[ASME PAPER 72-GT-55] 11 p1630 A72-25646
- Crack initiation detecting and recording instrument with optical strain gages for double shear fatigue tests of aircraft fasteners
11 p1632 A72-25823
- Bonded strain gage type load cell design, construction and application, explaining methods to achieve high accuracy
12 p1806 A72-27315
- Local heating effect of electrical resistance gages measuring strain across thickness of plane photoelastic Araldite models
12 p1807 A72-27316
- Semiconductor strain gage design and environmental performance for flight control systems
12 p1812 A72-27962
- Computer program to reduce automated multiaxial testing strain gage and applied loads data from tubular or flat specimens including fiber composites
12 p1787 A72-27999
- Computer algorithm for plates and shells internal forces and moments and stress-strain state determination from strain gage data
13 p2058 A72-29144
- Methane absorption stabilized 30 meter laser strain meter with Fabry-Perot geometry for earth tide, nuclear explosion and free earth oscillation observation
14 p2109 A72-30323
- Composite materials stress analysis techniques, discussing strain gages, photoelastic coatings more and holographic applications
[ASME PAPER 72-DE-6] 14 p2167 A72-30861
- Forces and strain rates measurement in elastic elements of dynamic systems under impact, discussing test equipment and strain gage transducers
16 p2395 A72-33964
- Fatigue life gages use in combination with strain multipliers in field applications with random ergodic cyclic strains
17 p2554 A72-34822
- Photoelasticity, holography, moire and strain gage methods in European experimental mechanics research
18 p2733 A72-36357
- Some uncommon electric transducers for the measurement of mechanical quantities.
18 p2690 A72-36369
- High-stability capacitance strain gauge for use at extreme temperatures.
18 p2693 A72-37210
- Strain distribution in and around strain gages.
19 p2870 A72-37225
- Gage-length errors in the resolution of dispersive stress waves.
19 p2800 A72-37729
- Investigation of resistance strain gauges based on zinc telluride and cadmium telluride semiconductor films
19 p2845 A72-38206
- Electro-optical noncontracting torque sensor, using slit diffraction pattern technique
21 p3051 A72-40231
- A ten-inch extensometer measuring small low-frequency strains.
21 p3052 A72-40234
- Electric model of bridging losses and optimal insulation layer thickness for small size resistance strain gages
21 p3056 A72-41367
- An advanced strain level counter for monitoring aircraft fatigue.
22 p3179 A72-42688
- Strain multiplier with S-N fatigue life gages, discussing design and performance
22 p3179 A72-42708
- Strain gage resistor with BiTeSb compound semiconductor film vacuum deposited on dielectric substrate, noting high sensitivity and operation without amplifiers
23 p3287 A72-43348
- Measurement of small strain amplitudes in internal friction experiments by means of a laser interferometer.
24 p3402 A72-44947
- High accuracy contactless torque-measuring shaft with strain gage as sensor, describing circuit wiring
24 p3403 A72-45296
- STRAIN HARDENING**
- Metals mechanical behavior, considering plastic deformability, strain hardening, cohesion and engineering performance prediction
01 p0086 A72-10985
- Circularly symmetrical disks with circular hole and loaded by pressure at edges, calculating linear and power-law strain hardening
02 p0297 A72-12535
- Gamma prime precipitate hardened Ni base alloys, attributing strengthening mechanism to coherency strains and precipitates antiphase boundary energy
02 p0247 A72-12817
- Microinhomogeneous elastoplastic cyclically strain hardenable material under symmetric loading, calculating stress-strain relationship
03 p0443 A72-13453
- Slip line field for plane strain extrusion of strain hardening material, calculating shear stress
03 p0363 A72-13708
- Doubly connected strain-hardened thin plate, calculating stress concentration and stress-strain state by variational principle of least additional potential energy
03 p0451 A72-14122
- Yield point elongated and strain hardened rectangular plates, calculating plastic coefficients in geometrically nonlinear bending problem
04 p0588 A72-15057
- Strain hardening for steel strength increase to 300 kg/sq mm by sequentially combined mechanical and thermal processing, involving plastic deformation, quenching and aging
04 p0527 A72-15454
- Strain hardened layers effect on wear resistance of 50Kh steel
04 p0534 A72-15653
- Ni-NiNb intermetallic unidirectional eutectic alloy crystal structure and high temperature behavior, considering mechanical twinning relationship to strain hardening and ductility
05 p0677 A72-17108
- Stress concentrations at circular holes and inclusions in elastoplastic strain hardening plate under tension and shear
06 p0897 A72-18316
- Deformation stresses and strains in quasi-static low cycle fracture of stabilizing, softening and strain hardening materials
06 p0831 A72-18352
- Hardening mechanisms of interaction between superlattice dislocations and point defects in Ni-Al intermetallic compound mechanical properties strain rate and temperature dependence
06 p0832 A72-18420
- Failure analysis of plastic materials susceptible to cyclic strain hardening under thermal load, considering residual stress concentration
06 p0898 A72-18547
- Load bearing capacity of shells of revolution, applying viscoplastic strain hardenable material model
06 p0899 A72-18656
- Aging creep theory application to anisotropic strain hardenable metals
06 p0900 A72-18680
- Plastic deformation, creep rupture strength, endurance limit and service life of prestressed strain hardenable material
06 p0900 A72-18681
- Aging effect on brittleness and hardening of Fe-Ni-Mn alloy at various temperatures
07 p1016 A72-19939
- Perturbation solution to nonlinear nonuniform torsion of thin walled open elastic beams with strain hardening dependent on torque-rotation behavior
07 p1096 A72-20431
- Strain rate effects on strain hardening of duralumin, copper and lead, noting yield stress sensitivity to deformation induced temperature changes
07 p0998 A72-20527
- Strain hardening law for rigid incompressible material with plastic properties independent of mean normal stress
08 p1248 A72-21820
- Soviet monograph on thermoplastic hardening of high strength martensitic steels and Ti alloys by ordering dislocation structure
09 p1327 A72-22520
- Explosive strain hardening of hard metal-ceramic alloy, presenting photographs of carbide and cobalt phases structural changes after impact loading
09 p1337 A72-22892
- Fracture strength relation to austenite stability in steels with plastic deformation caused by strain induced austenite-martensite transformation
10 p1499 A72-24894
- Creep and low cycle fatigue dynamic behavior, noting stress concentration time dependence, strain hardening and local plastic deformations in dead annealed Al thin walled tubes
11 p1658 A72-25829
- Creep characteristics of weakly strain-hardenable alloy under variable tensile load and temperature conditions
11 p1663 A72-26808
- Reversible stress effects in theory of plastic flow in strain hardened metals at high temperatures
12 p1879 A72-27159
- Acceleration waves propagation in elastic-plastic strain hardening rate independent solids, obtaining solution for discontinuity change in strength in homogeneously prestressed medium
12 p1846 A72-27729
- Large deflection calculation of circular and annular strain hardenable rigid plastic plates under axisymmetric load, using Kirchhoff-Love hypothesis and Tresca flow condition
14 p2165 A72-30440
- Combined heat treatment and machining effects on Mg-Nd alloys structure and mechanical properties, noting strain hardening mechanism
14 p2125 A72-31042
- Material constants for strain hardened polycrystalline metals calculated from mathematical model for plastic deformation
15 p2322 A72-31361
- Viscoelastic model for constitutive nonlinear creep law with combined strain and time hardening assumptions, evaluating material parameters for Al alloys
15 p2254 A72-31554
- Steady creep and delayed fracture dependence on metal structure and composition, considering strain hardening at small strain rate and elevated temperature
15 p2254 A72-31559
- Stress-strain relations for inelastic deformation of anisotropic strain hardenable shells of revolution under arbitrary plasticity conditions
15 p2332 A72-32678
- Constitutive equations for metallic creep analysis based on simultaneous strain hardening and crack propagation processes, calculating creep rupture time
16 p2408 A72-33589
- Composition effect on strain-transformation and precipitation hardening of beta Ti alloys at 800-1100 F
16 p2410 A72-33813
- Approximate method for reactions redistribution and displacements in statically indeterminate structures, using strain hardening hypothesis and creep power law
16 p2473 A72-34119
- Steels creep behavior relationship to stress-strain curve shape, defining creep resistance as function of strain hardening coefficient
16 p2412 A72-34146
- Strengthening mechanism in metals during creep under variable stress for dislocation network structure studies
16 p2475 A72-34164
- Geometric instabilities in isotropic plastic solids under increasing uniaxial compression.
[ASME PAPER 72-APM-28] 17 p2624 A72-34310
- Mathematical models for metallic plastic strain hardening under cyclic loads, introducing internal state parameters
17 p2632 A72-35111
- Application of an analog computer to the calculation of partially plasticized rotating circular disks prepared from strain-hardenable materials
18 p2735 A72-36421
- The structure and properties of thermomechanically treated beta-III titanium.
18 p2700 A72-36586
- The application of a dislocation model to the strain and temperature dependence of the strain hardening exponent n in the Ludwik-Hollomon relation between stress and strain in mild steels.
18 p2701 A72-36589
- Plane stress rupture criterion for age hardening materials during plastic deformation, calculating resistance to shear and torsion of solid and hollow round bars
19 p2818 A72-38009
- Study of the structural stability and mechanical properties of molybdenum subjected to the prolonged action of temperature and stress
19 p2818 A72-38013
- Plastic flow and strain hardening theories for short time tensile creep in high temperature metal formation, applying to Al alloys
21 p3125 A72-41510

Ti based beta alloy strain hardening and failure characteristics, emphasizing initial deformation phase and microdefect onset and development

21 p3071 A72-41716

Strain hardening of maraging steels in liquid nitrogen

22 p3187 A72-41867

Cyclic hardening of Al-Zn single crystals at constant plastic strain amplitude, observing similarity between fatigue hardening and work hardening

22 p3189 A72-42439

Influence of the degree of strain-hardening and roughness of friction surfaces on wear rate and carrying capacity

22 p3183 A72-43157

Strain hardening effect of Ni, Mn and Mo in Cr steel after high temperature annealing

23 p3301 A72-43742

Microinhomogeneous elastoplastic cyclically strain hardenable material under symmetric loading, calculating stress-strain relationship

24 p3458 A72-44928

Deformation stresses and strains in quasi-static low cycle fracture of stabilizing, softening and strain hardening materials

24 p3460 A72-45739

STRAIN RATE

Ground test determination of design data for low supersonic high density air deployable deceleration systems, considering high strain rate effects on parachute materials

01 p0005 A72-10313

Eutectic Ni-Cr alloy temperature effects on deformation rate on plasticity, noting superplasticity point

02 p0244 A72-12243

Yield stress effects at high strain rate on finite crack unsteady motion

03 p0446 A72-13705

Portevin-Le Chatelier effect in Al-Mg single crystals during tensile tests, investigating strain rate influence on stress

03 p0378 A72-14257

Infinite elastic-plastic beam impact by semiinfinite elastic rod, computing strain-time profiles

04 p0583 A72-14447

Substitutional dynamic strain aging effects on Fe-Nb alloys mechanical properties, attributing ductility reduction to work hardening and strain rate effects

04 p0534 A72-15576

Near tip strain criterion validity for ductile crack growth on specimen surface

05 p0673 A72-16307

Test conditions, specimen batch and method effects on accuracy of rapid fatigue limit tests with increasing stress amplitude

05 p0741 A72-17085

Dynamic strain aging significance in titanium, observing reduction of temperature and strain rate effects on stress-strain curves shapes

06 p0830 A72-18054

Low temperature slip discontinuity and strength of pure Al crystals as function of strain rate

06 p0831 A72-18355

Anomalous temperature-strain rate dependence of Ni-Al intermetallic compound mechanical properties from plastic deformation mechanism

06 p0832 A72-18417

Solid solution yield strengthening and weakening of V-Ti alloys, investigating strain rate sensitivity temperature dependence as indication of two deformation mechanisms

07 p1021 A72-20434

Strain rate effects on strain hardening of duralumin, copper and lead, noting yield stress sensitivity to deformation induced temperature changes

07 p0998 A72-20527

Temperature dependence of strain rate sensitivity in low temperature deformation processes, considering inherent lattice conditions and impurity atoms effects

07 p1022 A72-20573

Fiberglass reinforced plastics creep characteristics under high strain rate loading-unloading conditions

08 p1195 A72-21855

Viscoplasticity techniques application to deforming portion strain and strain rate fields of axisymmetric Al alloy extrusion with various flow patterns

08 p1250 A72-22194

High temperature alloy deformation superplasticity and formability relation with microstructure, fine structure and load requirements for hot working with high strain rate

08 p1250 A72-22200

Fracture toughness tests on Al-Cu alloy plate, noting insensitivity to strain rate

09 p1328 A72-22913

Time and cycles to failure diagrams for strain rate and hold periods effects on high temperature metal creep fatigue in design analysis

09 p1407 A72-23199

Fatigue indicators with analytic or visual notched and cracked coupons techniques and strain multipliers for welded structures

09 p1316 A72-23620

Equivalent stress and plastic strain rates, based on shear stress hypothesis for theory of anisotropic plasticity of plastic materials under combined stress

10 p1553 A72-23745

Transient strain in axially impacted hollow non-homogeneous cone with axially varying modulus of elasticity and density

10 p1555 A72-24195

Ultrahigh strain rate measurement via diffraction gratings directly impressed into test material surface, recording outputs by high speed cameras or photoelectric techniques

10 p1487 A72-24573

Torsion testing machine for hot metal workability tests at constant strain rate

11 p1639 A72-25820

Temperature and strain rate effects on superplasticity of Ni-Cr eutectic alloy

11 p1659 A72-26129

Residual stresses and stress relaxation determination in electrochemical galvanic coating with automatic strain curve plotter

11 p1613 A72-26264

Alpha Zr tensile properties tests noting strain aging effects on strain rate, work hardening and ductility anomalies

11 p1661 A72-26595

Electron microscope observed dislocation splitting in bent thin tantalum carbide sheet, analyzing results in terms of strain rate law and carbon diffusion model

11 p1669 A72-26948

Mathematical model for dynamic yield point dependence in strain rate based on similarity and dimensionality theories and Weierstrass theorem

13 p2054 A72-28458

Strain rate controlling mechanisms of superplastic deformation at various stresses and temperatures, considering vacancy and dislocation creep and grain boundary sliding

13 p1974 A72-28657

Temperature and strain rate dependence of austenitic stainless steel fracture by low cycle fatigue at high temperatures, studying striations with scanning electron microscopes

13 p1979 A72-29449

Strain work per unit time for static and dynamic pressing processes, taking into account inertial forces

13 p1966 A72-29466

Closed form solutions for one dimensional nonlinear waves in strain rate-sensitive elastoplastic material, describing dispersed wave motion behind propagating shock front

14 p2164 A72-30298

Low and medium strain rates and temperature effects on bcc structure polycrystalline Nd and Mo, determining mechanical properties of yield and flow

14 p2114 A72-30367

Plastic deformation in metals and highly crystalline polymers as function of shear strain, strain rate, frequency and vibrational amplitude

15 p2328 A72-31840

Mechanical vibrations effect on flow stress and strain rate from tensile and creep tests as function of amplitude

15 p2257 A72-31841

Mobile dislocation density and strain rate sensitivity of bcc Fe-Ni alloys from deformation onset to high temperature plateau

15 p2258 A72-32639

Elastic-viscoplastic solution for deformation of impulsively loaded strain rate sensitive steel rings

16 p2464 A72-32916

Strain rate history effects on stress incremental wave front propagation in elastic bars, considering Taylor-Karman-Rakhmatulin theory

16 p2466 A72-33103

Test equipment for high strain rates in shear with torsional split Hopkins pressure bar

16 p2373 A72-33196

Stress-strain diagrams for constant strain rates in shear of Ti from torsion test machine, deriving constitutive equation for dynamic overstress

16 p2405 A72-33197

Stress-strain curve correction for triaxial stress state and strain rate at arbitrary temperatures, describing instrument for continuous test specimen profile measurement

16 p2469 A72-33232

Al-Mg solid solution creep at 570-800 K, discussing creep rate controlling mechanism due to Mg atoms interactions with dislocations

16 p2407 A72-33442

Strain rate and temperature effects on supersaturated Al-Cu-Mg solid solution mechanical properties, considering ultimate tensile strength and hardening

16 p2407 A72-33443

Forces and strain rates measurement in elastic elements of dynamic systems under impact, discussing test equipment and strain gage transducers

16 p2395 A72-33964

Heteroplastic materials creep characteristics from constant strain rate isothermal traction tests, deriving deformation functions for material behavior beyond elastic range

16 p2412 A72-34120

On uniqueness in ideally elastoplastic problems in case of nonassociated flow rules.

[ASME PAPER 72-APM-33] 17 p2628 A72-34786

An analysis of the split Hopkinson bar technique for strain-rate-dependent material behavior.

[ASME PAPER 72-APM-26] 17 p2628 A72-34792

The dynamic stress-strain behavior in torsion of 1100-O aluminum subjected to a sharp increase in strain rate.

[ASME PAPER 72-APM-6] 17 p2629 A72-34808

Strain rate, stress concentration and temperature effects on hydrogen environment embrittlement of metals

19 p2816 A72-37640

High strain rate and thermal instability torsional impact machines for metal dynamic testing, using shear pin mode control

21 p3039 A72-40229

Simple structures behavior under constant loads, considering low stress levels and creep rupture mechanism with internal damage affecting strain rate.

21 p3117 A72-40673

Effect of the structure of carbon steels on their dynamic properties during dynamic loading

21 p3067 A72-40923

Temperature and strain rate dependences of low cycle fatigue life at high temperatures of austenitic stainless steel, examining crack behavior and stress-strain relations

21 p3069 A72-41010

Dependence of changes in the electronic dissipation-braking force during superconducting transition on the stresses, temperature, and strain rate

23 p3312 A72-43315

Limiting equilibrium of shallow conical shells of variable thickness

23 p3348 A72-43787

Shear-strain-rate effects in a high-strength aluminum alloy.

23 p3302 A72-43983

Characterization of four polymeric materials at strain rates from 0.0001 to 1000 per sec.

24 p3417 A72-44612

Photoelastic verification of a mechanical model for the flow of a granular material.

24 p3460 A72-45697

Low temperature slip discontinuity and strength of pure Al crystals as function of strain rate

24 p3416 A72-45742

STRAIN SOFTENING

U PLASTIC DEFORMATION

STRANDS

Al and Zr single thin strands burning rates at various total oxygen pressures, comparing photographic observation to computations

16 p2479 A72-34001

STRAPDOWN INERTIAL GUIDANCE

Delta and Thor/Agenda satellite launch vehicles, discussing costs, performance and mission planning based on booster design flexibility, incorporating computer programmed strapdown inertial guidance

01 p0136 A72-10952

Quantization errors effect on recursive filter design for strapdown inertial navigation systems, developing suboptimal linear minimum variance

08 p1144 A72-20848

Strapdown inertial guidance and navigation systems: state of art, discussing recent developments in computers, sensors and systems technology

08 p1204 A72-21088

A simplified analysis of the computational requirements for strapdown attitude reference.

[AIAA PAPER 72-827] 20 p2951 A72-39099

Maximum likelihood failure detection for redundant inertial instruments.

[AIAA PAPER 72-864] 20 p2923 A72-39133

STRAPS

A crack stopper concept for filamentary composite laminates.

23 p3305 A72-43498

STRATA

NT SUBSTRATES

STRATEGY

Optimal air defense strategy with budgetary constraints, considering artillery, airborne interceptor and mobile surface to air missile effectiveness against penetrating enemy

03 p0459 A72-14197

Discrete stochastic differential games with quadratic payoff function, deriving deterministic, randomized and game optimal control strategies

06 p0793 A72-17956

Suboptimal stochastic control strategies class based on game theory and optimin principle, investigating completeness in closed discrete-time systems

06 p0794 A72-18167

Game theory application to time optimal control strategy for independent operations set

06 p0794 A72-18168

Optimal strategies for decision chain with controllable connections and finite number of states and decisions, deriving existence theorem

07 p1028 A72-19904

Operator, task level and workload effects on operative strategy, showing controllers methods modification in ATC center 09 p1270 A72-23130

Landing sequence strategy variations for individual ATC operators, indicating dependence on flight progress data variation, existing maneuvering conditions and controller personality traits 09 p1271 A72-23131

Differential games with deviation from encounter, considering strategies for continuous, programmed and discontinuous controlled motion onto given set 10 p1511 A72-24426

Optimality and strategy efficiency in Gaussian elimination on sparse matrix, using graphical method 11 p1678 A72-26496

Multistage pursuit-evasion game on circle, constructing player optimal strategies via measure theory 12 p1836 A72-27511

Differential games extremal strategies with player control action subject to integral constraints 13 p2002 A72-28712

Position differential games of extremal stable evasion strategies for swerving motions with absorption in time 13 p2004 A72-29470

Tracker recovery strategy during temporary target obscuration in pursuit tracking task, analyzing control stick movements 13 p1911 A72-29820

Orbit determination strategy, detailing optimization criterion correlation with measurement errors 15 p2307 A72-31817

On behavior strategy solutions in two-person zero-sum finite extended games with imperfect information. I - A method for determination of minimally complex behavior strategy solutions. 17 p2574 A72-34343

Phase locked loop model based on AGC circuitry, devising optimum control strategies 17 p2532 A72-34419

Second order differential guidance game, formulating strategy for optimal feedback control 18 p2673 A72-36660

Optimal strategies conditions for game problems in conflict controlled system, discussing minimax technique and Bellman equation solution 20 p2947 A72-40028

Differential games extremal strategies with player control action subject to integral constraints 22 p3198 A72-42090

Maneuver strategies for multi-planet missions. [AIAA PAPER 72-914] 24 p3443 A72-45431

STRATHS

U VALLEYS

STRATIFICATION

NT ATMOSPHERIC STRATIFICATION

Blast wave propagation in uniform or gravitationally stratified media, using Brinkley-Kirkwood shock propagation theory 10 p1471 A72-25069

STRATIFIED FLOW

Equilibrium shear flow of stratified brine in cyclically continuous rectangular tank, discussing stable density region erosion by turbulent layers, Richardson numbers, transition layer and entrainment 01 p0051 A72-11228

Linear spin-down of stratified rotating Boussinesq fluid in circular cylinder as function of Prandtl number, noting solar interior problem 01 p0051 A72-11231

Barotropic stability of stratified shear flow to non-geostrophic disturbances by linear analysis 04 p0541 A72-14453

Stratified fluid motion between two parallel infinite disks rotating with different angular velocities 04 p0511 A72-14857

Disk pump driven fluid layer device for density stratified water channel flow measurements, using hydrogen bubble technique 04 p0509 A72-15118

Exact linear dielectric operator for stratified plasma streams with velocity gradients for diagnostics with electromagnetic waves 06 p0861 A72-17748

Turbulence effects in stratified shearing flow, determining relationship between measured mass flux and overall Richardson number 06 p0798 A72-17762

Thermal and momentum diffusivity measurements in turbulent stratified flow, obtaining velocity and temperature profiles [AIAA PAPER 72-80] 07 p0966 A72-18950

Atmospheric kinetic and temperature energy spectral balances in thermally stratified turbulent flow without shear 07 p0980 A72-20454

Similarity theory for turbulently stratified fluid with horizontal and vertical dimensionalities analysis, discussing Karman constant dependence 07 p1031 A72-20698

Turbulence generated by moving obstacle in tank of stably stratified fluid, measuring velocity and concen-

tration fluctuations with hot-film and electrode conductivity probes 09 p1293 A72-22308

Equations of motion for discrete structure fluid, discussing equilibrium pressure and fluid-wall interaction effects 09 p1296 A72-23691

Linear initial value problem of partially mixed cylindrical wave in uniformly stratified fluid, obtaining exact solutions for density and velocity distributions 10 p1466 A72-24299

Inviscid parallel stratified shear flow stability to two dimensional disturbances, solving Taylor-Goldstein stability equation for eigenvalues by computerized numerical integration 10 p1466 A72-24329

Blood flow stratification effect on alveolar gas exchange in liquid filled lungs in dogs from Xe 133 concentration measurements 10 p1425 A72-24481

Smoke trail motions in winds with constant shear, considering potential, vorticity and stratified flows [AD-742738] 10 p1475 A72-24748

Columnar disturbance strengths upstream of obstacle in uniformly stratified or rotating flows relative to validity of Long hypothesis 10 p1470 A72-25063

Drazin method application to thermal stratification effects on unbounded jets and shear layers stability characteristics 11 p1615 A72-25552

Stability of free shear layer in wind tunnel two layered temperature differentiated air flow against small periodic disturbances, noting critical Richardson number 11 p1619 A72-26638

Modified gas dynamic functions of total momentum of plane boundary layer for arbitrarily oriented control surfaces and for stratified flows with potential layer 11 p1574 A72-26973

Atmospheric models for critical flux Richardson number prediction for turbulence maintenance in stratified flows 12 p1840 A72-27702

CAT forecasting based on fluid mechanics experimental studies of stratified shear flows stability and meteorological analyses of aircraft CAT encounters 13 p1994 A72-28866

Prandtl number effect on stratified free shear layer stability, comparing critical Richardson number to linear inviscid theory result 13 p1942 A72-29111

Clear air turbulence nonlinear generation mechanism based on finite amplitude periodic waves in stratified shear flow critical layers, considering buoyancy, viscosity and heat conduction effects 14 p2127 A72-30226

Atmospheric motions prediction with numerical model based on discrete stratified fluid free oscillations 15 p2266 A72-32720

Initial value problem for compressible viscous heat-conducting fluid flows with basic rotation and density stratification in gravitational field 16 p2377 A72-33337

Perturbation methods for density stratified viscous flow past flat plate, using boundary layer and low Reynolds number approximations [AIAA PAPER 72-646] 16 p2381 A72-34086

Finite amplitude disturbances in the flow 8019 of inviscid rotating and stratified fluids over obstacles. 18 p2679 A72-36383

Calculation of airflow over an arbitrary ridge including diabatic heating and cooling. 18 p2706 A72-36629

A theoretical solution of the Lockhart and Martinelli flow model for calculating two-phase flow pressure drop and hold-up. 19 p2787 A72-38392

The enhancement of heat transfer by waves in stratified gas-liquid flow. 19 p2787 A72-38398

Dynamics of stratified liquids in the presence of space charge. 19 p2788 A72-38432

Propagation of Alfvén-gravitational waves in a stratified perfectly conducting flow with transverse magnetic field. 19 p2843 A72-38791

Similarity theory for turbulence in stratified fluid from horizontal and vertical dimensional analysis approach, discussing Karman constant dependence 20 p2948 A72-39013

Rotating fluids density stratification effect on characteristic features of homogeneous Taylor column, noting flow patterns 21 p2989 A72-40652

Steady two dimensional motion during horizontal motion of body at high Richardson number in stratified fluid, considering blocking mechanism 21 p2990 A72-40653

Turbulent boundary layer calculation behind surface cusp, taking into account external flow turbulence and thermal stratification 24 p3390 A72-45008

Tidal waves of a two-layer liquid in a cylindrical basin of revolution rotating about its axis 24 p3392 A72-45073

STRATIGRAPHY

Regional stratigraphy and fabric distribution of volcanic ash flow sheets in northwestern Mogollon Plateau by flow direction technique 15 p2223 A72-31578

Instrumental neutron activation analysis of igneous rock abundances in petrogenic and stratigraphic problems, applying to Colombia River basalts and Apollo 11 rock samples 20 p2899 A72-39829

STRATOCUMULUS CLOUDS

Cumulus and stratocumulus ice crystal and nuclei concentrations, drop size distributions, glaciation differences and enhancement mechanisms 07 p1030 A72-19101

STRATOPAUSE

Methane concentration of air sample from stratopause measured by gas chromatography, discussing sample integrity, analysis method and results 12 p1802 A72-27505

STRATOSCOPE TELESCOPES

High resolution imagery with the large space telescope. 24 p3404 A72-45537

STRATOSCOPE 1 TELESCOPE

U STRATOSCOPE TELESCOPES

STRATOSCOPE 2 TELESCOPE

U STRATOSCOPE TELESCOPES

STRATOSPHERE

Stratospheric aerosol boiling point measurement with photoelectric particle counter, observing sulfate radical as major constituent 01 p0059 A72-10833

Stratospheric CAT relationships to baroclinic zones and Richardson number examined from aircraft observed cross sections data 01 p0096 A72-11282

Mt. Agung volcanic eruption dust effects on monthly-mean lower stratospheric temperatures for tropical stations 01 p0096 A72-11284

Tropospheric processes effects on Northern Hemisphere stratospheric meridional transformations in geopotential field and air circulation 02 p0253 A72-11732

Photochemical models of aeronomic formation and dissociation of hydrogen and ozone in mesosphere and stratosphere 03 p0346 A72-13377

Dynamic modeling of stratospheric and mesospheric circulation and thermal structure 03 p0346 A72-13382

Associative attachment and gas-to-particle conversion mechanisms in positive and negative ion formation up to 50 km 03 p0347 A72-13390

Submillimeter wave stratospheric emission spectra measurement by aircraft- or balloon-borne phase modulated Fourier spectrometry, noting SNR and small errors 03 p0348 A72-13399

Meteorological elements, upper ionospheric data and solar radio emission intensities during winter stratospheric temperature rises 03 p0383 A72-13477

Stratospheric water vapor concentration annual variability from regression analysis of monthly measurements initiated as IQSY program 03 p0385 A72-14148

Air exchange between stratosphere and troposphere from cosmic ray produced radionuclides and fallout comparison with weather development 03 p0351 A72-14359

Stratospheric circulation and air temperature horizontal and vertical distribution, discussing CAT at supersonic transport heights 04 p0541 A72-14676

Water vapor injection into stratosphere by thunderstorms from IR radiometric inference measurements on NASA jet laboratory 04 p0544 A72-15358

French monograph on atmospheric ozone utilization as tracer for troposphere-stratosphere exchanges covering investigations at various locations 05 p0654 A72-15799

Solar effects contradictory relationships with earth atmosphere, discussing geomagnetic disturbance, annual variations, stratospheric transport and high energy particles 05 p0656 A72-16233

Stratospheric rocket sounding on global scale for studies of atmospheric circulation in equatorial zone, polar regions and hemispheres 06 p0840 A72-17620

Quasi-biennial modulation of kinetic energy transfer in stratosphere, comparing with hemispheric energy, eddy transports and tropical zonal wind and temperature 06 p0841 A72-17632

Specific moisture contents in stratosphere over European Soviet Union from balloon measurements 06 p0806 A72-17734

Balloon measurements of lower stratosphere ion conductivity, noting deviation from predicted values based on Thompson ion-ion recombination theory

06 p0808 A72-18094

Ozone content and vertical distribution variations as causes of winter stratospheric warmings in Northern Hemisphere

07 p0973 A72-18861

Atmospheric ozone photochemistry, discussing pure oxygen and moist atmospheres, NO mechanism, tracer applications, stratospheric dynamics and Umkehr observations

07 p0979 A72-20228

Solar modulation of cosmic ray intensity in stratosphere, examining relationship to sunspots group number and heliographic latitudes over 11 year period

07 p1063 A72-20641

Solar cosmic ray flare recording in stratosphere in Murmansk and Antarctic regions during February-April 1969

07 p1066 A72-20649

Mesospheric temperature and wind profiles during stratospheric warming from rocket grenade experiments

08 p1160 A72-21533

Ground based Raman laser backscatter measurement of stratospheric water vapor content, noting 1 ppm accuracy

08 p1161 A72-21825

Nimbus 4 satellite-borne selective chopper radiometer design characteristics, obtaining maps of stratospheric warmings in both hemispheres

08 p1173 A72-22168

Meteorological synoptic analysis of stratospheric planetary wave interaction with lower ionosphere in terms of wind, temperature and ionospheric electron density profiles

09 p1297 A72-22375

Vertical macroturbulence diffusion coefficient and Na 2 and Be 7 flux from stratosphere to troposphere estimated using ground level measurements and two layer model

09 p1376 A72-22416

Horizontal temperature variations relation to stratospheric CAT based on U-2 flight data

09 p1344 A72-22438

Three parameter prognosis model for geopotential vertical profile in troposphere and stratosphere, describing vortex and heat influx in quasi-geostrophic and adiabatic approximations

09 p1297 A72-22549

Stratospheric ozone photochemistry through nitrogen oxides and hydrogen compounds reactions, noting controlling effect of water vapor

09 p1298 A72-22674

Horizontal ozone distribution in middle stratospheric macrosynoptic situations, considering anticyclonic side and jet stream delta region

09 p1301 A72-23194

Balloon sounding observations of lower stratosphere secondary cosmic radiation bursts due to solar activity

10 p1529 A72-24069

Vertical air density gradient in stratosphere as function of altitude

10 p1472 A72-24489

Calibration technique for meteorological superpressure balloon hygrometers designed for horizontal sounding of troposphere and stratosphere

10 p1484 A72-25087

Autumnal stratospheric temperature variations in northern and southern hemispheres from Nimbus 3 IR spectrometer

11 p1680 A72-25761

Stratospheric methane measurements over North America from solar absorption spectra observed from aircraft

11 p1622 A72-25911

Vertical distribution of nitric acid vapor concentration in lower stratosphere from balloon sounding

11 p1622 A72-26086

Meteorological elements, upper ionospheric data and solar radio emission intensities during winter stratomesospheric temperature rises

11 p1682 A72-26247

Stratosphere geopotential height and temperature data observed at Northern Hemisphere radiosonde stations comparison with objectively analyzed data

11 p1682 A72-26474

Numerical model of global scale propagating waves in equatorial stratosphere generated by tropospheric heat sources for Kelvin and Rossby-gravity modes

12 p1839 A72-27029

Coincidence effects of ionospheric extraterrestrial radiation focusing on ionospheric changes and stratospheric warmings

12 p1804 A72-27804

Upper troposphere-lower stratosphere geostrophic wind deviation from rawinsonde and pressure-height data in El Paso-White Sands area, using finite difference method

13 p1988 A72-28447

Transient planetary Rossby waves dynamics in winter stratosphere forced from below, using quasi-geostrophic midlatitude beta plane approximations

13 p1988 A72-28550

Satellite radiance data for altitude and amplitude monitoring of stratospheric warming, comparing with rocketsonde and radiosonde observations

13 p1991 A72-28823

Satellite radiance data to determine stratospheric layer thickness, comparing empirical regression equations to mean weighted temperatures

13 p1991 A72-28824

Mesosphere and stratosphere density and temperature variability with seasons and altitude

13 p1947 A72-28830

Rocket sounding of ozone diurnal variations in upper stratosphere and lower mesosphere

13 p1947 A72-28831

Upper atmosphere water vapor sources and sinks, discussing Hadley cell circulation, convective storm, stratospheric-tropospheric interchange, methane oxidation and volcanic activity

13 p1948 A72-28835

Residence time of water vapor and aerosols in troposphere and lower stratosphere, noting application to air pollution buildup by aircraft

13 p1991 A72-28836

Estimated peak regional concentration of SST exhaust in stratosphere from expected flight operation levels

13 p1991 A72-28837

Stratospheric subsonic and supersonic aircraft emission estimation for water vapor and nitrogen oxides

13 p1991 A72-28838

Stratospheric aerosols physical properties and chemical composition, discussing various measuring techniques and results

13 p1991 A72-28839

Lower stratospheric turbulence and horizontal temperature gradients from RB-57F aircraft meteorological measurements

13 p1993 A72-28864

Synoptic meteorological parameters vs CAT encountered in stratosphere by XB-70 airplane, presenting frequency distributions and probability tables

13 p1994 A72-28867

Stratospheric meteorological characteristics effects on Concorde supersonic flight performance, fuel consumption, dynamic behavior and passenger comfort

13 p1994 A72-28876

SST water vapor and nitrogen oxides exhausts effect on stratospheric composition, developing nonequilibrium photochemical model

13 p1994 A72-28878

Semiannual equatorial wind oscillations in upper stratosphere and lower mesosphere dependence on temperature variations in high and middle latitudes

14 p2099 A72-30259

Balloon flight tracking by Nimbus D satellite to sound tropical stratosphere air motions, noting northward drift maximum in Northern Hemisphere winter

14 p2128 A72-30350

Monthly mean pattern variations for equatorial stratospheric easterly and westerly winds, noting continuity of low latitude regimes

14 p2129 A72-30806

Wind tunnel tests for correction of temperature profile data in stratosphere and lower mesosphere obtained from SKUA rocket sounding

14 p2105 A72-30807

Submillimeter isotropic background limits of stratosphere emission spectrum, using aircraft-borne Michelson interferometer and Rollin far IR detector

15 p2265 A72-31626

Temperature and density data deviation from stratosphere and mesosphere mean season model values at high latitudes

15 p2225 A72-31907

Stratospheric particles analysis by X ray detector on scanning electron microscope, comparing results with data on volcanic particles and cosmic dust

15 p2227 A72-31958

Electrical conductivity in mesosphere and upper stratosphere from rocket sounding by blunt probe technique, suggesting electron density profiles dependence on dissociative recombination variations

15 p2228 A72-31972

Bibliography on SST upper atmosphere environment, listing references to stratospheric structure, composition and physical dynamics, chemical reactions with pollutants, transport properties, etc

16 p2386 A72-33797

Climatic changes due to stratospheric perturbation by propulsion effluents of high altitude aircraft flights [AIAA PAPER 72-658]

16 p2388 A72-34076

SST contrasts stratospheric dispersion by aircraft wake, atmospheric turbulence and exhaust gases temperature induced buoyancy

16 p2388 A72-34084

X-ray bremsstrahlung in the stratosphere and the auroral activity of January 21 and February 3, 1969

18 p2722 A72-36863

Wind patterns at meteor altitudes 75-105 kilometers/above College, Alaska, associated with mid-winter stratospheric warmings.

18 p2689 A72-36962

Numerical prediction of the diffusion of exhaust products of supersonic aircraft in the stratosphere

19 p2748 A72-37824

Features of zonal circulation in the stratosphere and lower mesosphere of the equatorial region during the period of increasing solar activity /1967-1968/

19 p2790 A72-37999

Stratospheric winds and winter warmings in the Southern Hemisphere.

20 p2948 A72-39862

Stratosphere circulation variation in autumns preceding cold winters

20 p2949 A72-39947

Stratospheric winds over Leba rocket sounding station in spring and autumn, 1970.

21 p3049 A72-41500

Stratospheric general circulation patterns from geographical, vertical and annual distribution for Northern Hemisphere temperatures, geopotential heights and winds

21 p3078 A72-41611

Air motions in the tropical stratosphere deduced from satellite tracking of horizontally floating balloons.

21 p3078 A72-41612

Fine structure of temperature stratification in the troposphere and stratosphere

21 p3079 A72-41799

An updated theory for the quasi-biennial cycle of the tropical stratosphere.

22 p3201 A72-42503

Equatorial stratospheric waves induced by diabatic heat sources.

22 p3201 A72-42508

Stratospheric concentration of radioactive carbon from 1961-62 nuclear tests by balloon measurements over European U.S.S.R. territory during 1967-69

23 p3286 A72-44492

On the instability of a three-layer atmosphere with an isentropic stratosphere.

24 p3399 A72-45484

STRATOSPHERE RADIATION

Balloon-borne radiometer-sonde measurement of stratospheric downward emission in absorption spectral region of water vapor rotational band

07 p0982 A72-19105

Stratospheric cosmic ray short period variations at 30 km by spectral density method

07 p1066 A72-20653

High resolution observation of stratospheric submillimeter thermal emission spectrum by helium-cooled InSb electron bolometer on board Comet 2E aircraft

10 p1476 A72-25023

Regression technique for determining temperature profiles in upper stratosphere from satellite measured radiances, noting accuracy

13 p1990 A72-28822

Stratospheric model for bremsstrahlung X ray relation emission to auroral electron flux, considering photon energy release in scintillation counters

17 p2551 A72-35872

Regression technique for determining temperature profiles in the upper stratosphere from satellite-measured radiances.

21 p3052 A72-40249

Seasonal, nonseasonal and synoptic global variations in stratosphere temperature from satellite-measured radiances, discussing latitudinal warming-cooling relationships

21 p3048 A72-40253

STREAM FUNCTIONS [FLUIDS]

Uniqueness of turbomachinery flow calculations using streamline curvature and matrix through-flow methods

03 p0308 A72-13648

Plasma layer growth and equilibrium magnetic fields for astron configurations, solving stream function by finite difference methods

07 p1042 A72-19512

Nonuniform plane parallel plasma streams instability with/without magnetic field, comparing with conducting fluid

07 p1042 A72-19618

Navier-Stokes equation numerical solution methods, expressing boundary conditions by separate equations for vorticity and stream function

07 p0970 A72-20077

Stream functions for steady two dimensional flow field of viscous liquid near circular whirl

08 p1148 A72-20937

Resonant frequencies of viscous liquid in rectangular tank calculated from stream functions, assuming two dimensional oscillations and laminar flow

09 p1295 A72-23074

Turbulent boundary layer characteristics of rotating helical blade in annulus contained fluid, calculating boundary layer growth and streamline angles via momentum integral equations

10 p1466 A72-24296

Mass flow and current distribution in magnetic MPD accelerator thruster plumes calculated from meridional flow stream function equation

11 p1696 A72-26224

Subsonic and supersonic flow around nonaxisymmetric fuselages, deriving streamlines differential equations based on camber line distribution of source, dipole and quadrupole singularities

11 p1573 A72-26578

Streamlines and fluid diffusion determination for axisymmetric irrotational and rotational flows in ducted propellers, noting conformal mapping of arbitrarily shaped domain onto rectangle 12 p1751 A72-27168

Stream surfaces of three dimensional sub and supersonic irrotational gas flows in variable cross section channels and nozzles 13 p1895 A72-30004

Direct integral method to calculate subsonic and supersonic regions in planar and axisymmetric hyper-sonic flow, using stream function for velocity and density [DFVLR-SONDDR-202] 16 p2343 A72-33421

Flow pattern of two impinging circular jets. 17 p2540 A72-35233

Determination of the stream function of a perturbation associated with a plane jet 18 p2680 A72-36470

Slow motion in a two-dimensional semi-infinite channel with moving walls. 18 p2683 A72-37044

Flow of a non-Newtonian fluid in a tube with sinusoidal deformation. 21 p3044 A72-40192

Stewartson transformation correlating three dimensional compressible boundary layer growth on impulsive moving body, assuming small cross flow 21 p3047 A72-41782

Stream surfaces of three dimensional sub and supersonic irrotational gas flows in variable cross section channels and nozzles 22 p3135 A72-42727

Behavior of the lines of flow in the proximity of the stagnation points of blunt bodies 22 p3136 A72-42905

STREAMLINE FLOW
U LAMINAR FLOW
STREAMLINED BODIES
NT FAIRINGS
Acoustical field from streamlined body of revolution moving in homogeneous gaseous medium past seminfinit rigid screen, using Wiener-Hopf method for diffraction radiation 03 p0340 A72-12916

Critical streamline length in axisymmetric and plane ideal gas flows past conical bodies as function of Mach number and form parameter 06 p0755 A72-17677

STREAMLINING
Multiplicity theorem for aligned steady MHD flows of inviscid perfectly conducting gas, assuming constant density along streamline 19 p2840 A72-37405

Streamline and fieldline geometry with applications to MHD flow kinematic properties, discussing field and momentum relations decomposition in terms of sound velocity 23 p3322 A72-44270

STREAMS
NT GAS STREAMS
Axial and tangential velocity distributions within trailing line vortex to large distance downstreams of generating wing extended from available data [AD-743599] 01 p0001 A72-11135

STRENGTH
Strength and plasticity characteristics of hardened multilayer structural steels, investigating layer thickness effect 07 p1013 A72-19746

STRENGTH OF MATERIALS
U MECHANICAL PROPERTIES
STRESS (BIOLOGY)
Sex differences of chronic effect of environmental stress on blood pressure and information processing in rats, observing neurotic hypertonic blood pressure irregularity 07 p0925 A72-20660

Lipid composition of growing and starving cells of *Arthrobacter crystallopoietes*. 17 p2505 A72-35835

STRESS (PHYSIOLOGY)
NT ACCELERATION STRESSES (PHYSIOLOGY)
NT CENTRIFUGING STRESS
Shock-induced fighting effect on pituitary adrenocorticotrophic hormone ACTH and adrenocortical steroids plasma concentration in rats, relating psychological stress to physiological function 05 p0617 A72-16080

Adrenocortical steroids during acute exposure to environmental stresses, noting effects of injected cortisol removal, uptake and release 06 p0763 A72-17874

Hemodynamic response to running exercise stress for aeronautics personnel selection, determining systolic ejection variation measurement and cardiac frequency increase 07 p0927 A72-19242

Isolation stress effect on excretory products in unrestrained chimpanzee, suggesting Ca to P excretion ratio as physiological stress indicator [AD-739467] 07 p0921 A72-20179

Isolation stress effect on micturition circadian rhythm and diuresis occurrence in unrestrained chimpanzee under entrained and free running conditions [AD-739468] 07 p0921 A72-20180

Isolation stress effect on circadian rhythmic patterns of EEG activity during sleep-wake and sleep cycles in unrestrained chimpanzee [AD-739469] 07 p0921 A72-20181

Human performance and exhaustion predictive model from responses to exercise and environmental stresses, considering circulation, thermal regulation, work load and oxygen pressure effects 07 p0934 A72-20358

Light-dark cycles and physiological stress stimuli effects on circadian rhythm in rat blood serum serotonin levels 08 p1115 A72-21081

Behavioral inaction under stress conditions similar to survivable aircraft accident, tabulating hesitation statistics 08 p1109 A72-21570

Human blood serum 11-oxy corticosteroid content after maximum stress exercise, noting heart rate and blood pressure changes 09 p1266 A72-22878

Time series analysis of physiological and work study data in ATC tasks, using heart rate as strain indicator 09 p1271 A72-23137

Elastic lung shaped model for distribution analysis of weight induced stresses, strains and surface pressures in lung 10 p1425 A72-24479

Food deprivation stress effects on urinary excretion values in unrestrained chimpanzees 10 p1426 A72-24822

Electromyogram and myogram responses in phasic stretch reflex under prestrain conditions as index of fusimotor activity level in normal humans 11 p1588 A72-26632

Physiological index changes in parachutists of various ages, considering plasma recalcification, blood prothrombin, heparin time, fibrinolytic activity, pressure and heart beat 11 p1590 A72-26988

Human cardiovascular function change as indication of hypoxic circulatory stress, using noninvasive cardiographic measurements of cardiac electromechanical time intervals 12 p1769 A72-27470

Hemodynamic response to physical exercise stress in dogs with angiotensin-induced acute arterial hypertension 12 p1764 A72-28216

Physiological and subjective responses of physically fit young men to combined exercise-carbon dioxide stress tests 12 p1767 A72-28311

Underwater tests of instrument system for combined skin temperature and direct heat flow measurement in thermally stressful environments 12 p1768 A72-28334

Parotid fluid 17-hydroxycorticosteroid level relation to hyperthermia stress at various heat levels during thermal environmental testing 12 p1768 A72-28335

Human visual accommodation biorhythm and reactions under hard physical work and visual stress 13 p1909 A72-28749

Russian book on functional morphology under extremal space flight conditions covering overloads, hypoxia and hyperoxia effects on organism and cellular structure and metabolism 14 p2077 A72-30996

Noise and vibration stress combined effects on human mental performance as function of time of day, taking into account circadian rhythm factor 14 p2081 A72-31083

Heat chamber treadmill work-induced thermal stress effects on reaction time to foveally and peripherally presented visual stimuli 14 p2078 A72-31154

Monograph on hot environments stress covering heat exchange at skin surface, clothing effect, body temperature regulation and sweating control 15 p2185 A72-31515

Heat, noise and vibration stress combined effects on skin and rectal temperature, heart rate, weight loss and biochemical urinalysis [AD-746083] 17 p2508 A72-34551

Comparison of physical, biophysical and physiological methods of evaluating the thermal stress associated with wearing protective clothing. 20 p2898 A72-39808

Human tryptophan and tyrosine metabolism - Effects of acute exposure to cold stress. 21 p2997 A72-40417

Prediction of vegetative reactions in the case of stress and extreme effects upon the organism 22 p3149 A72-42069

Effects of externally imposed mechanical resistance on breathing dense gas at exercise - Mechanics of breathing. 22 p3150 A72-42489

Heat acclimatization by exercise-induced elevation of body temperature. 22 p3151 A72-42741

Nervous mechanisms of the acoustic stress reaction 22 p3148 A72-43169

Nervous-emotional stress as a problem of modern work physiology 22 p3148 A72-43170

Calcium metabolism under stress and in repose. 23 p3254 A72-43389

STRESS [PSYCHOLOGY]
Vibration space analysis for human voice characteristics change during unintended speech under experimental psychological stresses and actual emergency situations 01 p0017 A72-10213

Phenamine and aminazine effects on subthreshold sound perception and adrenoreactive excitability of unstable subjects under emotional stress 04 p0476 A72-15586

Shock-induced fighting effect on pituitary adrenocorticotrophic hormone ACTH and adrenocortical steroids plasma concentration in rats, relating psychological stress to physiological function 05 p0617 A72-16080

Time shortage as stress factor affecting mental activity of operator in man-flying vehicle system, discussing control signal handling efficiency 05 p0622 A72-16638

Aeromedical diagnostics for aircraft pilot hearing sense tests, considering cockpit environment and stress-produced impairments in central nervous system 05 p0623 A72-16781

Emotional aspects of pilot performance under high stress in emergency situations, discussing psychophysiological training methods 05 p0623 A72-17098

Human immediate memory adaptation to speed stress, discussing response time and performance accuracy relationship to stimuli complexity and input speed 06 p0766 A72-17716

Evoked cortical potentials changes from emotional visual word stimuli stress under amylid anticholinesterase drug influence 08 p1116 A72-21194

ATC operator stress factor evaluation from information theory analysis of radio telecommunication information content 09 p1271 A72-23134

Ergonomic simulators for testing individual mental working capacity, using stress-strain and fatigue relation 09 p1272 A72-23140

Camera shake under stress of tracking moving targets viewed briefly in poor light, considering blur in horizontal and vertical dimension 10 p1483 A72-24986

Increase in skeletal muscle performance during emotional stress in man. 17 p2500 A72-34942

Psychic adaptation of man to a long-duration stay in space 22 p3149 A72-41988

The function of external respiration in mental activity 22 p3150 A72-42284

Nervous mechanisms of the acoustic stress reaction 22 p3148 A72-43169

Nervous-emotional stress as a problem of modern work physiology 22 p3148 A72-43170

STRESS ANALYSIS
NT PHOTOGRAPHIC MEASUREMENT
NT SCHWARTZ METHOD
NT X RAY STRESS ANALYSIS
Structural sandwich panel design, establishing simple stress and deflection formulas under transverse loading based on tests evaluating balsa as laminate core 01 p0138 A72-10723

Stress effects on TiNi compound martensitic transformation, investigating deformation as function of composition and heat treatment 01 p0087 A72-11023

Constant stress and compression creep testing in vacuum conditions, describing simple spring loaded apparatus characteristics and performance 01 p0071 A72-11171

Fiber reinforced composite rotating disks stress-strain state calculation, discussing steady state closed solutions and approximate methods 01 p0142 A72-11175

Analytical and graphical calculations of stress concentration coefficients and stress gradients in machine parts with recesses and finite depth cuts 01 p0144 A72-11377

Analytic yield surface in work hardening including stress in transition range after load change /Bauschinger effect/ 01 p0144 A72-11388

Dislocations forces during sintering of loose and cold-pressed metal powders, using photoelasticity for

stress estimation and electron microscopy for defects structure

02 p0232 A72-11430

Structural analysis of cable stayed bridge scale model with fractional and full loading, showing system linear behavior with small displacements and real nonlinearities, respectively

[SESA PAPER 1896] 02 p0199 A72-11515

Stress and failure analysis of glass-epoxy composite plate with circular hole under uniaxial tension by finite element method

[SESA PAPER 1942] 02 p0248 A72-11517

Isothermal uniaxial stress analysis of material consistent with linear law of heredity theory, determining viscoelastic relaxation function

02 p0290 A72-11621

Deformation, stress and singularity in cylindrical shells under concentrated circumferential loads, comparing with two dimensional elasticity and plate bending

02 p0291 A72-11662

Stress analysis for transverse deformation of fiber reinforced composites

02 p0249 A72-11991

Composite rotating sphere with concentric inhomogeneity of elastic constants and outer boundary free from tractions, calculating stress by digital computer

02 p0259 A72-12180

Elastic quadrant shaped disk loaded on horizontal and vertical edges, determining stress values at arbitrary points

02 p0259 A72-12235

Finite element technique for stress analysis of rotating bodies under axially symmetric stresses

02 p0293 A72-12343

Nonlinear deflections and radial surface stresses in thin elastic circular glass plates with coaxial rings

02 p0249 A72-12418

Inhomogeneous microstructure elastoplastic medium, examining strain and work in plastic deformation

02 p0293 A72-12427

Contact stress between half plane and elastic cover plate, reducing problem to Prandtl type integrodifferential equation with Hilbert kernel

02 p0294 A72-12433

Stress analysis of pressurized ribbed cylindrical shell with intersecting reinforced circular hole under internal pressure

[ASME PAPER 71-PVP-8] 02 p0294 A72-12470

Plastic collapse limit analysis for combined edge and pressure loading on circular cylindrical shells for Tresca yield condition

[ASME PAPER 71-PVP-22] 02 p0295 A72-12474

Improved finite difference solutions for stress in thin cylindrical shells, using Donnell assumptions

[ASME PAPER 71-PVP-24] 02 p0295 A72-12475

Elastic equilibrium in circular conical orthotropic shells of linearly variable thickness, investigating stresses under arbitrary loads

02 p0297 A72-12615

Finite element formulation for nonlinear large deflection elastic analysis of displacements and stresses in thin plate structures

02 p0298 A72-12657

Bending stress analysis of rectangular plate with variable stiffness applied to marine propeller blade

02 p0298 A72-12673

Bending stresses in composite shell at conical interface between metal and fiberglass reinforced plastic portions under internal pressure

02 p0298 A72-12683

Pressure vessels with cracks, formulating stress analysis for safety factors

03 p0443 A72-13452

Nonstationary thermoelastic stress determination in hollow cylinder walls under convective heat transfer

03 p0443 A72-13459

Mechanical response of Al and Cu under complex strain histories conditions, using endochronic theory of viscoplasticity without yield surface

03 p0444 A72-13504

Stresses due to initial elastic deformations in orthotropic thin plate strip, expressing Dirac function by Fourier series and integral

03 p0444 A72-13505

Strain anisotropy effect on thin walled tubular steel samples with combined bending and torsion, constructing matrix and stress vectors

03 p0445 A72-13578

Displacement equations for rotating cylinder of revolution with stress on boundary corresponding to centrifugal force

03 p0445 A72-13625

Yield stress effects at high strain rate on finite crack unsteady motion

03 p0446 A72-13705

Disk shaped frame corner stress under external load, using complex variables and conformal mapping

03 p0448 A72-13886

Axisymmetric Reissner-Sagoci problem in linear micropolar elasticity for stress and displacement under load applied by rigid circular disk

03 p0448 A72-13890

Elastic-plastic stress-strain analysis of beams with uniform cross section under combined loadings by finite element method

03 p0449 A72-13975

Creep rupture test program for Al alloys, circumventing parametric methods limitations by extrapolation procedure with graphical extension of isostress curves

03 p0378 A72-14174

Statistical methods of stress and reliability analyses of elastic systems under random external loads

03 p0453 A72-14206

Biharmonic stress and displacement potentials for two dimensional boundary problems in elasticity theory, using Galerkin method

03 p0453 A72-14207

Mathematical plasticity theory of stress-strain relations under complex loading, including broken line trajectories

03 p0453 A72-14211

Rheological relations of moment-stress plasticity for steady and cyclic loads, using small elastoplastic strains

03 p0453 A72-14212

Iteration method error estimates for thin elastic shell basic stressed state and simple fringe effect relation to boundary stressed state

04 p0586 A72-15012

Thermoviscoelastic stress analysis for hollow circular cylinder with reinforcing interlayer under pressure, axial tension and nonstationary temperature field

04 p0587 A72-15016

Convergence of iterative schemes for calculating stress state of thin shells with allowance for nonlinear terms in differential equilibrium equations

04 p0587 A72-15048

Elastic strip stresses and displacements, using eigenfunctions with coefficients determined by variational principles

[ASME PAPER 71-APMW-24] 04 p0589 A72-15181

Papers on aerospace structure by N. J. Hoff covering aircraft framework, stress analysis, structural stability, shell theories, bending, buckling, monocoque and sandwich structures, etc

04 p0591 A72-15238

Uniaxial stress effect on monocrytalline niobium stannide superconducting transition temperature, considering crystal structure

04 p0562 A72-15293

Mean stress and overload effects on mild steel service life, using fatigue damage summation method

04 p0592 A72-15475

Stress and strain approximate analysis for thin elastic shells by rational derivation of two dimensional differential and constitutive equations

[AD-745612] 04 p0592 A72-15506

Safe stressing of high strength and locally nonbrittle solid bodies, testing hard polymers at room temperature

04 p0593 A72-15656

Non-Newtonian real fluids flow characteristics, determining stress-deformation relationship by tensor analysis, with application to lubrication theory

04 p0528 A72-15742

Boundary collocation method for estimating stress intensity factors for through-thickness interior crack in finite rectangular plate

[ASME PAPER 71-MET-L] 05 p0732 A72-15794

Compounded rotating disks stress-strain analysis from equilibrium and compatibility equations and boundary condition, comparing results with photoelastic and finite difference approximation

05 p0732 A72-15804

Ni alloy stress rupture data correlation and extrapolation from computerized evaluations of time-temperature parameters relative abilities

[ASME PAPER 71-WA/MET-4] 05 p0670 A72-15905

Elastic analysis of circular cylinders with stress singularities from boundary discontinuities, mixed displacement and axial load conditions

[ASME PAPER 71-WA/APM-18]

05 p0733 A72-15962

Shell bending and Timoshenko-type theory to solve stresses of semiinfinite elastic circular cylindrical shells produced by radial pressure pulses

[ASME PAPER 71-WA/APM-16]

05 p0733 A72-15964

Elastic stress field in hollow circular cylindrical anisotropic body under surface tractions expressed as Fourier series

[ASME PAPER 71-WA/APM-13]

05 p0734 A72-15967

Transient stress analysis for sudden twisting of penny-shaped crack in infinite elastic body under torsion, using integral transform

[ASME PAPER 71-WA/APM-10]

05 p0734 A72-15969

Turbine casing components stresses in presence of creep, demonstrating calculation method validity for thick-walled structures by elastoplastic analogy

05 p0734 A72-15985

X ray topography of natural diamond, showing impurity platelet distribution, slip depth, temperature and stress conditions after plastic deformation

05 p0702 A72-16020

Approximate maximum shock stress analysis for curved bar bending vibration due to longitudinal impact by disregarding elements inertia with regard to axial motion

05 p0737 A72-16285

Disk stretching under tensile stresses, determining stress at arbitrary point in half band form connected with quadrant

05 p0737 A72-16294

Asymmetric micropolar elasticity plane problem, solving equilibrium equations with Fourier transformation for displacements, rotation and stresses

05 p0737 A72-16296

Optical interference technique for experimental stress analysis of cracked structures, obtaining crack shape relationship to stress intensity factor

05 p0666 A72-16321

Plastic stress and strain intensity factors for cracked plates in tensile fields

05 p0737 A72-16323

Stress analysis of radial flow impeller disk due to centrifugal force in steady state of high speed rotation by matrix finite element method

05 p0741 A72-16996

Strength analysis of hyperboloidal electric wire joint designs, expressing stress as function of contact loads

05 p0616 A72-17059

Semiempirical stress analysis of cantilevered thin walled cylinder, obtaining local stresses via strain gages

[SAE PAPER 720285] 06 p0893 A72-17324

Stress and displacement solutions to elastic deformation of homogeneous and composite anisotropic near cylindrical bodies, using Almansi algorithm

06 p0894 A72-17688

Axisymmetric stress analysis in various weld configurations of stub end high pressure pipe connections, using finite element method

06 p0820 A72-17709

Photothermoelastic analysis of shrinkage stresses near discontinuity in fiber composite material, relating matrix cracking to fiber packing

06 p0835 A72-17800

Interferometric holography application to photoelastic stress analysis of opaque anisotropic composite plates under static and dynamic transverse and in-plane loads

06 p0898 A72-18349

Diffused failure model as basis for plotting delayed fracture curves in space of principal stresses

06 p0898 A72-18532

Brittle strength characteristics of construction materials with cracks calculated by graphical analysis procedure, considering state of limiting equilibrium

06 p0899 A72-18560

Transverse strains in solid body due to volumetric stresses counteraction to external load stresses

06 p0899 A72-18566

Semiconductor device IC encapsulation, thermal design, stress analysis, testing and applications

06 p0791 A72-18577

Resolved shear stress formula for shafts under simultaneous tangential bending and torsion acting at dangerous points of cross section

06 p0899 A72-18643

Two- and three dimensional photoelastic experiments evaluation to obtain principal stresses differences

07 p1088 A72-19171

Flexure analysis of isotropic Reissner flat plate, bonded by adhesive layer, deriving stress distribution equations in general tensor form

[AIAA PAPER 71-148] 07 p1089 A72-19688

Plane harmonic waves propagation in stressed polycrystalline bodies with slight orthotropy in unstressed state, substantiating theory for initial stress determination by ultrasonic technique

07 p1090 A72-19753

Experimental determination of torsional stresses in rod from moire patterns, describing facility and procedure

07 p1091 A72-19762

Stress analysis of infinite plate with parallel cracks under symmetrical edge loads

07 p1092 A72-19781

Approximate stress calculation in friction pulley shells of multipulley hoisting machines, using method of initial parameters

07 p1094 A72-20134

Method of images solution for stress systems in rectangular plate under general self equilibrant edge tractions

07 p1095 A72-20244

NASTRAN/NASA structural analysis program for computer stress analysis based on finite element method, noting vibration, acoustics, transient motion and random response applications

08 p1138 A72-21325

Book on plasticity theory covering stress and strain as basic concepts of continuum mechanics, differential equations of motion, plastic flow, yield criteria, elastic-plastic equilibrium, plane strain, etc

08 p1244 A72-21477

- Plastics optimal reinforcement in given stressed state by determining shortest path from stress point to strength region 08 p1244 A72-21502
- Uniaxially stressed elastic /soft/ shells with fold formation during compressive strain, formulating equilibrium and boundary conditions for uniaxial region 08 p1247 A72-21812
- Perforated flexible polymer plates stressed state problem with boundary conditions and viscoelastic and creep properties effects 08 p1248 A72-21861
- Stress-deformation effects on gasket joint of metal seals at high pressures 08 p1178 A72-21933
- Secondary normal stresses in fixed flange zone of thin walled nonlinearly elastic pipe under bending moment and torsion 08 p1249 A72-22096
- German monograph on bending theory extension for stress analysis of disks and cylindrical shells 09 p1397 A72-22333
- Somigliani dislocations effect in infinite elastic cylinder, determining stresses in form of eigenfunctions expansions 09 p1398 A72-22491
- Stress analysis of isotropic linearly elastic square plate of constant thickness loaded by concentrated forces at edges 09 p1399 A72-22698
- Thermal stress-strain state analysis of nonlinear elastic medium by small parameter method 09 p1400 A72-22717
- Two dimensional thermoelasticity problem with nonstationary temperature field and external boundary forces, using algorithm to evaluate stress-strain state of welded plates 09 p1401 A72-22725
- Infinite elastic solid deformation in antiplane strain mode, discussing corresponding strain model with continuous distribution of slipping edge dislocations 09 p1405 A72-22919
- Microelastic stress mechanics of thinly laminated orthotropic multilayered plates, taking into account skin effect 09 p1405 A72-22994
- Papers on design for high temperature environments covering structural fatigue, creep interaction and ratchetting deformation and inelastic stress analysis 09 p1406 A72-23196
- Mathematical model and inelastic stress analysis for metal creep-fatigue interaction and progressive deformation in breeder reactors operation 09 p1407 A72-23200
- Influence coefficients for circumferential stress resultants in thin conical shell elements without edges interaction 10 p1555 A72-24192
- Metal creep under multiaxial stress states, proposing technique for numerical stress analysis data collection [SMRT PAPER L 1/3] 10 p1556 A72-24395
- Green function for stress components in circumferentially loaded circular disk, noting conformal mapping for arbitrary shape 10 p1557 A72-24717
- Green function for stress components in straight edge loaded half plane disk, noting conformal mapping for arbitrary shape 10 p1558 A72-24718
- Carbon steel fatigue crack propagation rate dependence on strength and stress history, discussing conditions for crack nonpropagation 10 p1499 A72-24889
- Flugge equations for circular cylindrical shells buckling under compression, considering Donnell theory limits, stress determination and boundary conditions 10 p1560 A72-25025
- Thermal stresses and displacements in elastic medium containing parallel circular cracks, using perturbation technique 10 p1560 A72-25045
- Photothermoelastic analysis of temperature and rupture stress in cryogenic tanker structures, using steel and plastic ship models [AIAA PAPER 72-344] 11 p1728 A72-25373
- Stiffness, stress and deformation analysis of discretely attached corrugated shear webs, using minimum potential energy and calculus of variations methods [AIAA PAPER 72-351] 11 p1728 A72-25380
- Finite element structural analysis for local buckling stresses in flat plates, panels and thin walled columns, deriving elastic and geometric stiffness matrices [AIAA PAPER 72-354] 11 p1729 A72-25383
- Stress analysis of short beam bending of graphite fiber reinforced epoxy composites 11 p1671 A72-25464
- Anisotropic graphite composite laminates cutouts stress analysis by finite element method, predicting structural reinforcement behavior 11 p1672 A72-25475
- Fiberglass-graphite reinforcement of unidirectional epoxy laminates, examining longitudinal composite fracture stress and strain and tensile and compressive stiffness 11 p1672 A72-25485
- Perforated plates plastic deformation, stresses and strains near holes, using strain gage data in biaxial tensile tests 11 p1733 A72-25540
- Torsional stress analysis of rectangular beam composed of two elastic materials, using complex variable and conformal mapping 11 p1733 A72-25544
- Computerized analysis of prismatic rectangular plate assemblies natural frequencies and initial buckling stresses 11 p1734 A72-25731
- Bending stress in oxygen presaturated Nb during oxidation, cooling, dissolution and annealing, using thin film model 11 p1658 A72-25853
- Upper yield stress effect on elastoplastic behavior of mild steel in bending and torsion, noting relationship to strain rate 11 p1659 A72-25894
- Book on turbulence covering Reynolds stresses, kinetic theory of gases, vorticity dynamics and mixing length models 11 p1616 A72-25925
- Thermoelastic stress and displacement in thin finite rod due to distributed time dependent heat sources 11 p1736 A72-25991
- Infinite elastic thick plate with loads symmetrical to axis of revolution and middle plane, analyzing stress functions, Fourier-Bessel expansion and photoelastic experiment 11 p1626 A72-26427
- Plastic materials adaptability to solid and hollow turbine blades, deriving thermally and mechanically induced stresses 11 p1738 A72-26799
- Plastic percentage reduction of area and elongation for circular cylindrical sample in tensile deformation, proposing stress analysis method for metallic sleeves under low cycle loads 11 p1738 A72-26810
- Conventional and explosive compacting effect on density distribution in green briquettes, investigating normal and shear stresses 11 p1643 A72-26830
- Book on thermal stress analysis covering equivalent thermal loads, bars, beams and rings extensional and bending deformation, shells, strain energy methods, etc 11 p1739 A72-26925
- Finite difference method for bending stresses calculation in rotating disks subjected to irregularly distributed temperature, deriving digital computer program algorithm 11 p1712 A72-26976
- Glass sample mechanical strength testing, considering abrasion process, concentric ring stress calculation and laser light scattering techniques 12 p1832 A72-27007
- Bending of unbounded plate coupled to elastic isotropic half space with vertical and horizontal springs, calculating contact stresses by double Fourier transforms 12 p1878 A72-27082
- Stress-strain state approximation for isotropic strip with circular hole, noting method adaptability to computer computations 12 p1880 A72-27232
- Stress-strain state determination for closed cracked cylindrical shell, using Fredholm integral equations 12 p1880 A72-27236
- X ray determination of thermal microstresses in metal specimens surfaces 12 p1807 A72-27447
- Plastic deformation resistance nonuniformity in Al alloys, determining stresses 12 p1829 A72-27457
- Materials selection for models used in thermal stress studies by restrained shrinkage method with emphasis on polyurethanes 12 p1813 A72-27460
- Algebraic equations for displacement and stress vectors at faces and interfaces of elastic multilayered cylinders and infinite wedges, using matrix method 12 p1884 A72-27565
- Volume averages of stress and strain changes induced by Poisson ratio variation in boundary value problems of three dimensional classical elastostatics 12 p1884 A72-27566
- Fiber composites plastic flow and fracture, using plane strain model for analysis 12 p1884 A72-27730
- Cadmium sulfide solar cells stress analysis in relation to degradation caused by fabrication technology, discussing barrier layer formation process 12 p1757 A72-28020
- Transparent materials study by interferometric methods, emphasizing holographic bench advantages for stress analysis and aerodynamic flows observation [ONERA, TP NO. 1037] 12 p1812 A72-28048
- Solid deformable body mean stress determination by statistical summation of stress squares on faces of parallelepiped rotated within Euler angle limits 12 p1887 A72-28233
- Stress calculation in inflexible overlapping cemented joint of orthotropic layers, taking into account joining geometry and elastic properties anisotropy 13 p1962 A72-28396
- Internal pressure induced stresses, displacements and time-variable plasticity radii for thick walled fiber reinforced cylinder with hereditary elastic binder interlayers 13 p2055 A72-28557
- Plane stressed state of elastic rectangular plate solved by method of summary representations 13 p2057 A72-29067
- Series solution for coaxial spherical cavity effect on torsional stress of finite length elastic circular cylinder 13 p2059 A72-29491
- Stress levels and fatigue in aircraft structures subjected to jet noise, noting stress calculation for skin panels and control surfaces 13 p1898 A72-29579
- Small transport aircraft horizontal tail surfaces flow characteristics determination for stress calculation during flight in turbulent atmosphere 14 p2071 A72-30284
- Shear strains and elastic anisotropy of transversely isotropic cylindrical shell with circular hole under uniform internal pressure, using shallow shell equations 14 p2165 A72-30438
- Stress analysis of thick walled hollow viscoelastic circular cylinder enclosed in elastic shell and subjected to nonlinear creep conditions, noting temperature effects 14 p2165 A72-30439
- Average stress and strain across thickness of liquid filled cylindrical elastic thin walled shell with rigid bottom under axial impact loads 14 p2166 A72-30698
- Composite materials stress analysis techniques, discussing strain gages, photoelastic coatings moire and holographic applications [ASME PAPER 72-DE-6] 14 p2167 A72-30861
- Higher order differential equations solutions for viscoelastic stress-strain functional relationships, recommending Runge-Kutta integration technique 14 p2168 A72-30929
- Creep deformation transition theory in spherical shells, using generalized strain measure for asymptotic solution 14 p2169 A72-30999
- Stress analysis and deflection equation for uniformly loaded and heated two layer clamped rectangular plate 15 p2322 A72-31362
- Stress analysis of two coaxially conjugated elastic isotropic cylinders under compression loads in terms of Fourier-Bessel series 15 p2323 A72-31447
- Nonlinear Cosserat continuum theory of elasticity, discussing kinematics and stressed state as functions of angular velocity, acceleration, volume forces and moments 15 p2274 A72-31476
- Approximate values for elastic body stresses and displacements based on finite element method and virtual displacements and minimum potential energy principles equivalence 15 p2323 A72-31477
- Stress analysis of boron fiber-reinforced and isotropic Al panels under identical loading conditions 15 p2323 A72-31479
- Numerical calculation of stresses and displacements in variable radius bodies of revolution under axially symmetric torsional load, using Fredholm type integral equation 15 p2324 A72-31480
- Strain analysis of thin metallic films on low modulus structural substrate by light intensity measurement 15 p2325 A72-31526
- Viscoplastic flow of inhomogeneous shells of revolution obeying Tresca condition, noting plastic deformation velocity relation to stresses 15 p2325 A72-31605
- Deformation and stress in shells with discontinuous wall thickness variations, noting cylinder with ribs under internal pressure 15 p2326 A72-31705
- Rough surface elastic bodies stress calculation, using asymptotic method of boundary conditions 15 p2327 A72-31736
- Structural components design from fiber composites, noting computer programs for structural and stress analysis 15 p2328 A72-32128
- Constant stress effect on propagation velocity of elastic waves in three dimensional body, considering earth crust and earthquake prediction applications 15 p2329 A72-32284
- Thermal stresses in plane elasticity for doubly connected regions, considering temperature distribution, stress state problem formulation and nonconcentric annulus 15 p2329 A72-32287

Higher moments of Reynolds stress fluctuations and velocity components in turbulent boundary layer, obtaining probability density distributions

15 p2218 A72-32401

Large amplitude deflections and induced stresses in uniformly pressure loaded circular plate on elastic foundation, using von Karman coupled nonlinear partial differential equations

15 p2331 A72-32558

Structural averaging of stresses in finite element method hybrid stress model, using additional equilibrium equations

15 p2332 A72-32597

Stress and displacement solution to Lamé problem for multilayer spherical vessels and cylindrical tubes in nonlinear elasticity theory

15 p2333 A72-32679

Thermoelastic stress analysis for hollow cylinder heated along helix, calculating stress function for given surface temperature distribution

15 p2333 A72-32687

Speckle pattern method of laser holography for structural vibration and surface strain study, noting real time operation

16 p2388 A72-32821

Plane stress solution for thin walled cantilever beam with end load extended for beam width effects in composite orthotropic beam bending

16 p2463 A72-32841

Holography application to photoelastic stress analysis, showing information content correspondence to angles of incidence for different model regions

16 p2389 A72-32905

Thermoelastic stress bounds in fiber reinforced composite beams of arbitrary cross section, examining conditions for applicability of elementary beam theory

16 p2464 A72-32915

Membrane and bending stress analysis for thin circular cylindrical shells with elliptic hole

16 p2464 A72-32918

Linearly elastic, transversely isotropic multilayer system, presenting stress and stability problem for two dimensional strain states

16 p2466 A72-33022

Stresses induced by torsional vibration in twisted composite cylindrical shell of cylindrically anisotropic materials for high and low frequencies

16 p2466 A72-33102

Two dimensional fibrous medium model for strain and stress analysis of structural plate formed by three dimensional grid of rods

16 p2467 A72-33115

Stress analysis for brittle body with thermoinsulated crack under mechanical load and temperature field, noting limiting equilibrium equation

16 p2469 A72-33272

Stress analysis for circular disk with diametral crack under symmetric and antisymmetric loads, solving integral equations via factorization

16 p2469 A72-33273

Cosserat couple stresses theory application to time varying concentrated forces induced displacements in infinite elastic space

16 p2469 A72-33385

Analytical solution of stress distribution and load endurance of perforated square plate supported at corners, comparing with photoelastic observations

16 p2470 A72-33410

Stress analysis in circular disk loaded along circumference, noting results identity for stress presentation by Fourier series, Poisson integral and Green function

16 p2470 A72-33593

Elastic sandwich plates analysis with core layer as orthotropic Cosserat surface supporting force and moment stresses

16 p2471 A72-33787

Book on mathematical methods for viscoelasticity problems covering shear stress, viscometric flow, stress analysis, Fourier and Laplace transforms, momentum, equilibrium and constitutive equations, etc

16 p2427 A72-33975

Components creep-rupture life prediction for multiaxial stress from uniaxial test data, discussing crack initiation and propagation phases stress states

16 p2412 A72-34114

Plane-strain compression of rigid plastic material between flat platens, approximating frictional boundary conditions by entrapped viscous fluid lubricant

16 p2428 A72-34171

Permanent traction and torsion strains effect on ratio between pure compression and pure traction yield points of Al alloy

16 p2412 A72-34179

Exact analysis of a thick sandwich conical shell by forward integration

[ASME PAPER 71-APMW-20] 17 p2624 A72-34312

Design and testing a high fuel volume fraction, externally finned, thermionic emitter

17 p2495 A72-34586

Somigliani dislocations effect in infinite elastic cylinder, determining stresses in form of eigenfunctions expansions

17 p2626 A72-34654

Stress and parametric change analysis for failure mode identification and reliability screen tests of LSI

circuits, noting MOS inverter operation and RAM mechanization

17 p2528 A72-34706

Physical determination of fields of displacements and their derivatives in continuous media

[ASME PAPER 72-APM-15] 17 p2629 A72-34801

Stress analysis of axisymmetric solids with asymmetric properties

17 p2632 A72-35227

Elastic behavior of multilayered bidirectional composites

17 p2632 A72-35234

Constitutive equations to characterize rubberlike nonlinear viscoelastic materials under finite deformation stress, obtaining numerical solutions via finite difference technique

17 p2633 A72-35401

Russian book on aircraft design covering flight conditions, structure and control characteristics, production and stress analysis

17 p2492 A72-35448

Russian book - Determination of stresses in the plastic region from the hardness distribution

18 p2732 A72-36300

An approach to the analysis of the nonlinear deformation and fatigue response of components subjected to complex service load histories

18 p2733 A72-36355

Techniques in photoelastic analysis of pressure vessels

18 p2690 A72-36363

A method of analysis for compressible viscoelastic solids

18 p2736 A72-36936

Wave propagation in half plane consisting of two joined elastic quarter planes under in-plane disturbances normal to free surface, obtaining stresses at interface

18 p2738 A72-37069

Effect of fiber end, fiber orientation and spacing in composite materials

18 p2738 A72-37086

The stress boundary value problem for plane strain deformations of an ideal fibre-reinforced material

19 p2870 A72-37371

German monograph - A contribution to the clarification of the carrying characteristics of closed isotropic circular cylindrical shells

19 p2871 A72-37478

German monograph - Finite elements according to a theory of the second order on the basis of an extended variational principle with an application to the stability and stress computation of simple symmetrical I-beams under consideration of the deformation of the cross-section

19 p2871 A72-37479

Anisotropic circular cylinder stress analysis under uniaxial load, calculating elastic deformation

19 p2872 A72-37536

Holographic strain analysis using spline functions

19 p2797 A72-37611

German monograph - Computation of the stress condition in homogeneous anisotropic discs with the aid of an integral equation method

19 p2873 A72-37660

Essential factors in reliability prediction and stress analysis of structural component with wide load and temperature variations

19 p2874 A72-37710

A photoelastic material with variable modulus of elasticity

19 p2822 A72-37731

Elasto-visco-plastic constitutive equations for quasi-static structures calculations

[ONERA, TP NO. 1089] 19 p2875 A72-37763

Stress calculations for lifetime prediction in turbine blades

[ONERA, TP NO. 1097] 19 p2875 A72-37770

Regularities in the deformation and failure of commercial iron in a complex stress state under low-temperature conditions

19 p2818 A72-38005

Applicability of the small parameter method to the estimation of stresses in nonhomogeneous elastic media

19 p2876 A72-38153

Stress analysis of shell junctions fabricated by the filament-winding method

19 p2877 A72-38169

Post-critical deformations of a cylindrical shell subject to the action of external pressure and a temperature field

19 p2878 A72-38472

Electric relay spring design for miniaturization, deriving relation between length and thickness to minimize fiber stress under constant contacting force

19 p2775 A72-38617

Computerized finite element three dimensional stress analysis, taking into account mechanical and thermal stresses

19 p2878 A72-38649

Polarization optical method for analyzing local stress concentrations in structural members

19 p2805 A72-38768

An analytical approach to the non propagating crack problem using the finite element method

20 p2977 A72-38882

On the fatigue crack propagation in polymeric materials

20 p2943 A72-38886

Brittle lacquer of air-drying type, investigating coating ingredients and plasticizers effect on strain sensitivity for various temperature and humidity levels

20 p2920 A72-38890

The temperature dependence of the friction stress for basal dislocations in beryllium in the range 300-500 K

20 p2935 A72-39191

Stress induced martensitic transformation relation ship to shape memory effect compared with superelasticity, transformation plasticity and reversible linear change

21 p3065 A72-40091

Electrical modeling of the plane problem of elasticity theory in terms of stresses

21 p3116 A72-40164

Three-dimensional photoelastic and finite-element analysis of a propellant grain

21 p3052 A72-40237

Central band-type wide angle camera shutter design, noting stress examination in machine parts by optical method

21 p3052 A72-40306

Dependence of linear elasticity solutions on the elastic constants. II - Dependence on the shear modulus in elastostatics

21 p3119 A72-41106

Non-Hertzian contact stresses in a smoothly cradled heavy cylinder

21 p3119 A72-41108

The vertical stress distribution due to parabolic strip load and uniform load over an ellipse in the interior of a semi-infinite solid

21 p3121 A72-41243

Six dimensional vector space of stresses in elastic piecewise linear material divided into separate regions having different linear stress-strain relation

21 p3122 A72-41345

Determination of the limits of applicability of a continuous model when calculating a discrete polar lattice disk

21 p3122 A72-41346

Determination of stresses along the symmetry axis in the isometric problem on the basis of an elastooptical image of isochromes

21 p3122 A72-41347

Stress differentiation procedure for screen technique studies in dynamic photoelasticity, giving expressions for elastic modulus and Poisson coefficient

21 p3123 A72-41363

Optimal compression of constant-thickness media in a plane stress state

21 p3123 A72-41391

Russian book - Design principles in aircraft construction

22 p3136 A72-42074

Stress analysis in two dimensional bending process using the photo-rheological stress analysis

22 p3183 A72-42483

The oriented elastic continuum as a model for the magnetoelastic body

22 p3206 A72-42525

Large deflections of flat arbitrary membranes

22 p3235 A72-42604

Stresses in a circular cylindrical shell with arbitrary holes

22 p3238 A72-42837

Effects of non-homogeneity on the stresses in a rotating cylinder

22 p3240 A72-42877

German monograph - Heat stresses in circular plates subject to finite deflections

22 p3241 A72-43058

Stress-strain state induced by local physicochemical transformations in a layer

22 p3242 A72-43164

Fracture mechanics of composites

23 p3345 A72-43509

Construction of the solution of a two-dimensional mixed boundary value problem for an arbitrary doubly connected region

23 p3345 A72-43629

A finite element stress analysis of a crack in a bi-material plate

23 p3346 A72-43707

Crack propagation speed measurements with wedge loaded double cantilever beam of PMMA, calculating stress intensity, strain energy release rate and kinetic energy

23 p3346 A72-43709

Stress state of arbitrary contour body of revolution under torsion using finite difference method

23 p3347 A72-43744

Thermoviscoelastic problem for semiinfinite plate, determining temperature field and stresses permitting heat propagation

23 p3347 A72-43749

- Inelastic transverse strain coefficient and Poisson ratio dependences on plastic and brittle properties
23 p3348 A72-43752
- Statistical strength and plasticity criterion for materials in a complex stress-strain state
23 p3349 A72-43953
- Investigation of the strength of construction materials for various principal-stress relations
23 p3349 A72-43955
- Improved method for determining shear stresses and checking the strength of circular cylinders in transverse bending
23 p3349 A72-43968
- Stability and vibration of transversely isotropic beams under initial stress.
23 p3350 A72-44057
- The accuracy of Donnell's theory for very high harmonic loading on closed cylinders.
23 p3350 A72-44059
- Line spring analysis model for long part-through surface cracks in walls of plate or shell structures, formulating constitutive laws
23 p3353 A72-44234
- Mixed-displacement finite-element analysis with particular application using plane-stress triangles.
24 p3455 A72-44789
- A sandwich plate with a part-through and a debonding crack.
24 p3456 A72-44813
- Torsion analysis of prismatic bars of different cross sections based on dipolar stress theory, applying to anisotropic media
24 p3457 A72-44872
- Elasto-plastic stress analysis - A generalization for various constitutive relations including strain softening.
24 p3457 A72-44880
- Pressure vessels with cracks, formulating stress analysis for safety factors
24 p3458 A72-44927
- Nonstationary thermoelastic stress determination in hollow cylinder walls under convective heat transfer
24 p3458 A72-44934
- Pure antiplane stress and equilibrium of isotropic elastic beams, considering suspended cylinders
24 p3459 A72-44989
- Double hierarchy in repeated cascade theory of turbulence.
24 p3390 A72-44997
- Turbine casing components stresses in presence of creep, demonstrating calculation method validity for thick-walled structures by elastoplastic analogy
24 p3460 A72-45727
- Method for applying a fatigue crack to impact test specimens made from tough materials.
24 p3417 A72-45765

STRESS CALCULATIONS
U STRESS ANALYSIS
STRESS CONCENTRATION

- Griffith crack stress intensity factor and crack face displacement in elastic solid, detailing symmetrical, antisymmetrical and point body force distributions
01 p0136 A72-10185
- Hydrogen partial molar volume in metal-hydrogen two component systems under externally applied uniform hydrostatic stress field, using thermodynamic analysis
01 p0083 A72-10205
- Flow in turbulent trailing vortex, considering circulation profiles and Reynolds stress distribution
[AD-740436] 01 p0049 A72-10232
- Finite element analysis of creep due to stress and strain in double edge notched plates and round bars
01 p0138 A72-10519
- Aluminum stiffening structural sections selectively reinforced with boron/epoxy composite materials, discussing mechanical properties, cost effectiveness and stress distribution
01 p0139 A72-10737
- Initial crack effect on slender column compression load carrying capacity, deflection and stress intensity factor
01 p0140 A72-10989
- Plane strain analysis of two bonded semiinfinite elastic media with different thermomechanical properties and cracks, calculating stress factors and maximum stress angles
01 p0140 A72-10990
- Stress intensity factors for circular crack near surface of semiinfinite solid, considering pure beam bending and approximate thickness effect for plate deep surface flaw
01 p0140 A72-10991
- Trapezoidal isoparametric and triangular singularity elements for crack tip elastic stress intensity factor for mesh having small number of degrees of freedom
01 p0140 A72-10992
- Two-layered plane strain elastic cylinder with cracked inner bore under internal pressure loading, obtaining stress intensity factors by finite element method
01 p0141 A72-10994

- Maraging and Ni steels stress corrosion cracking rates dependence on stress intensity factor, discussing measurements in salt and distilled water
01 p0086 A72-10995
- Clearance, friction and load effects on turbine blade root fastening stress distribution, comparing finite element method with photoelastic experimental results
01 p0141 A72-11048
- Experimental development of homogeneous field of plane stresses gripped in biaxial traction, considering convex models under constraint
01 p0142 A72-11176
- Turbomachine blade frequency disalignment effects on resonant vibrations and stress distribution, using wheel model and computer solution
01 p0143 A72-11367
- Analytical and graphical calculations of stress concentration coefficients and stress gradients in machine parts with recesses and finite depth cuts
01 p0144 A72-11377
- Solid body surface strain field optical determination, using diffraction gratings
[SESA PAPER 1751] 02 p0199 A72-11512
- Stress tensor asymmetry effects on stress concentration at curvilinear holes in elastic plates under tension
02 p0289 A72-11611
- Stress concentration factors for fiber and matrix in axially loaded unidirectional composite with discontinuous fiber, using linearly elastic finite element analysis
02 p0292 A72-11987
- Elastoplastic problem of stress concentration in orthotropic plate with circular hole under balanced biaxial tension of infinity
02 p0293 A72-12428
- Digital computer programmed numerical calculation based on admittance method for torsional forced vibration spectra of masses and stress distribution in transmission system
02 p0271 A72-12435
- Stress concentration in shallow cylindrical shell with circular hole under axial tension, torsion and internal pressure loading
02 p0295 A72-12472
- [ASME PAPER 71-PVP-9] High strength steels stress corrosion crack propagation velocity relationship to crack tip stress intensity
02 p0295 A72-12482
- Stress and velocity distributions in homogeneous viscoelastic rigid body, deriving uniqueness theorems and minimum principles for limits problem
02 p0297 A72-12596
- Truncated conical shell buckling under combined torsion and internal pressure load, discussing prebuckling stress conditions
02 p0298 A72-12666
- Stress distribution for anisotropic elastic plate containing two or more arbitrary elliptical holes
02 p0298 A72-12674
- Stress distribution analysis of femoral neck, using three dimensional photoelastic model
03 p0318 A72-12952
- Crack notched three point loaded bend specimens plain strain fracture toughness determination, showing relation between elastic work and stress intensity factor
03 p0442 A72-12960
- Stress concentration coefficients calculation at sharp cracks and notches for rods in tension, compression and combined bending and torsion
03 p0443 A72-13457
- Double forces distribution over elastic body surface from Lamé equation describing static defects, discussing Kupradse potential and sources corresponding to plane dislocations and cracks
03 p0444 A72-13501
- Stresses due to initial elastic deformations in orthotropic thin plate strip, expressing Dirac function by Fourier series and integral
03 p0444 A72-13505
- Thermal stress concentration at circular heat-insulated hole in plate with elastoplastic strains, assuming temperature independent mechanical properties
03 p0445 A72-13575
- Crack propagation rates during bending fatigue tests on flat hardened steel as function of stress intensity and plasticity area
03 p0445 A72-13593
- Steels fatigue life tests as function of stress level, confirming Wohler curves mathematical model
03 p0373 A72-13673
- Fracture mechanics of interfacial cracks between two bonded dissimilar anisotropic elastic half spaces, presenting two dimensional analysis of stress fields
03 p0446 A72-13707
- Glass fabric reinforced composite materials stress distribution under longitudinal loading, using finite element method with two dimensional model
03 p0381 A72-13720
- Stress concentration around reinforced curvilinear hole in elastic infinite plate, discussing ring reinforcement rigidity effects
03 p0447 A72-13730

- Stressed state of reinforced physically nonlinear rods under torsion, using theory of functions of complex variables
03 p0447 A72-13731
- Temperature field analysis in locally heated cylindrical shell for stressed state production with lowest elastic energy
03 p0456 A72-13733
- Elastoplastic stress distribution in thin spherical metallic shells with cylindrical branch pipe under internal pressure
03 p0448 A72-13905
- Stress distribution at contour of connected region in plane elasticity solved for half plane and circle
03 p0449 A72-13909
- Soviet papers on stress concentration near holes in plate and shell structures
03 p0449 A72-14101
- Asymptotic methods for complex mixed problems of elasticity related to stress concentration in plates with cracks or inclusions
03 p0449 A72-14102
- Stress concentration around circular and elliptical holes in isotropic three layer spherical shells with rigid and lightweight fillers
03 p0449 A72-14104
- Approximate solution for stress concentration near oval shaped hole in nonlinearly elastic plate, using small parameter and boundary perturbation methods
03 p0449 A72-14105
- Stress concentration near free hole in circular thick compressed plate, using plane elasticity theory
03 p0450 A72-14107
- Stress concentration at eccentric holes and effect on strength of full size rotating turbine disks
03 p0450 A72-14108
- Edge temperature effects on contact stress concentration in anisotropic plate with elliptic hole under mixed boundary conditions of thermoelasticity
03 p0450 A72-14109
- Stress concentration and stability of plates and shells weakened by holes
03 p0450 A72-14110
- Stress concentration at hole in plates after stability loss, using branching and small parameter method
03 p0450 A72-14111
- Elastic plate with two collinear thermally insulated cracks, calculating steady temperature field and stresses for uniform heat flux at infinity
03 p0450 A72-14112
- Anisotropic plate with hole stiffened at edge by thin isotropic ring, calculating thermal stress distribution
03 p0450 A72-14113
- Stress concentration of isotropic rotating multiply connected circular and elliptical plates weakened by two circular holes
03 p0450 A72-14114
- Pressurized vessel bottoms weakened by central hole with edge stiffened by elastic ring, determining stress-strain state and stress concentration
03 p0451 A72-14120
- Stress concentration at circular holes in polyurethane plates under plane compression wave, obtaining interference fringes
03 p0451 A72-14121
- Doubly connected strain-hardened thin plate, calculating stress concentration and stress-strain state by variational principle of least additional potential energy
03 p0451 A72-14122
- Transversely isotropic plates with elastic circular insert, calculating stress concentration at holes under bending
03 p0451 A72-14123
- Diffusion saturation effects on thermal stress concentration in plate with circular hole under edge heating and lateral surface heat transfer
03 p0451 A72-14124
- Cylindrical shafts with deep circumferential grooves, determining effective stress concentration under axial tension or bending
03 p0451 A72-14125
- Time effects on stress concentration around circular and elliptical holes in infinite plate with nonlinear creep
03 p0451 A72-14126
- Stress concentration around circular hole in infinite semibrittle plate under omnidirectional tension at infinity or pressure at hole contour
03 p0452 A72-14127
- Cylindrical shaft with circumferential groove, obtaining approximate solution for stress concentration at groove contour under torsion
03 p0452 A72-14130
- Variable-modulus isotropic material finite elastic deformation, deriving two dimensional stress concentration by dual series expansion
03 p0452 A72-14132
- Stress concentration at circular, elliptical, square, rectangular and triangular holes in isotropic plates stiffened by discontinuous elements under uniaxial tension
03 p0452 A72-14133

Thermal stress concentration at heat insulated holes in orthotropic plate, assuming external-load free contour

03 p0452 A72-14134

Stress concentration at hypotrochoid hole in cylindrical shell under internal pressure and axial tensile stresses

03 p0453 A72-14138

Dynamic stress concentration at circular hole generated by plane bending wave propagation in thin plate, analyzing dependence on vibration frequency

03 p0453 A72-14139

Stress-strain state of shallow shell with crack along principal curvature line, discussing membrane stresses in plates and spherical shells

03 p0453 A72-14140

Cyclic deformation and fatigue testing equipment and techniques for biaxial stress, stress concentration and pure bending

03 p0339 A72-14168

Stress concentration problems in two and three dimensional elastoplasticity, using Ilyushin small deformation theory

03 p0453 A72-14213

Stress channelling in transversely isotropic elastic composites, comparing classical theory with ideal fiber reinforced composite plane deformation theory

03 p0455 A72-14385

Generalized epicycloid properties application to fracture mechanics, considering stress fields of constrained plastic zones around cracks in thin elastic plate

03 p0455 A72-14388

Stress intensity and plane dilatational wave diffraction in elastic material with finite crack

04 p0583 A72-14459

Unitary stress state and deformations in rotating axisymmetric disk, using function applicable to axisymmetric pipes

04 p0584 A72-14471

Variable thickness plate under cylindrical bending, considering stress concentration around circular hole

04 p0586 A72-14991

Forced vibrations of elastic plate with infinite series of identical circular holes, discussing elastic wave diffraction and stresses at/near holes

04 p0587 A72-15017

Nonlinear elastoplastic deformations of flexible shells of revolution, calculating stress concentration at circular hole in spherical shell

04 p0588 A72-15049

Stress distribution at hole in multilayer anisotropic shells of composite glass-plastic or cermet material

04 p0588 A72-15052

Nonlinear hereditary elasticity theory boundary value problem solution using complex potentials in successive approximation algorithm for stress concentration and nonlinear creep analysis

04 p0588 A72-15059

Stress concentration around elliptic hole in infinitely long circular cylindrical shell under torsional loads

04 p0589 A72-15122

Perturbation solution for stress concentration around elliptic hole in cylindrical shell under torsional loading

04 p0589 A72-15123

Magnitude and distribution of stresses produced by external energy sources in thick plate

04 p0593 A72-15657

Elastic equilibrium of circular conical orthotropic shells with linearly varying thickness, determining real and complex roots of stress state characteristic equation

04 p0594 A72-15710

Magnetic stress anisotropy field in plated cylindrical Permalloy films, determining relationships to circumferential composition variation, geometry and easy-axis dispersion

04 p0564 A72-15717

Fatigue strength optimization of bonded double strap metal joints, attributing stress concentration to plastic relaxation

[ASME PAPER 71-MET-Q] 05 p0731 A72-15791

Mechanical behavior of uniaxially loaded multilayered oriented fiber cylindrical composites, observing tensile transverse stresses

[ASME PAPER 71-MET-Q] 05 p0732 A72-15792

Boundary collocation method for estimating stress intensity factors for through-thickness interior crack in finite rectangular plate

[ASME PAPER 71-MET-L] 05 p0732 A72-15794

Doubly symmetric oval ring with stiffeners pair parallel to major or minor axis, investigating stress behavior under radial load

[ASME PAPER 71-WA/DE-14] 05 p0732 A72-15941

Distortional energy theory for predicting failure of orthotropic materials exposed to three dimensional stress state

[ASME PAPER 71-WA/DE-13] 05 p0732 A72-15942

Stressed state of radial bearings hollow rollers under loads concentrated along generatrix, evaluating test results by statistical analysis

05 p0665 A72-15984

Stress state of variable thickness long elastic shallow shell in bending and torsion, applying equations to large turbine blades

05 p0735 A72-15986

Gas turbine wheel design analysis, presenting procedures for estimating revolution rates, blade numbers and component configurations effects on wheel weight for prescribed stresses

05 p0735 A72-15995

Load or compression eccentricity effect on buckling and postbuckling behavior of flat plates, presenting stress distribution curves

05 p0737 A72-16116

Dimpling behavior of metal plate with mode I edge crack, relating flaw depth, applied stress level and crack tip plastic zone

05 p0673 A72-16305

Mass concept for moving crack, relating stress concentrations of elastic field with crack inertia

05 p0673 A72-16306

Stress intensity factors for pair of coplanar Griffith cracks subject to asymmetrical surface tractions

05 p0737 A72-16320

High temperature low cycle fatigue of Cr-Mo-V steel, observing crack growth rate correlation with crack tip stress

05 p0673 A72-16321

Optical interference technique for experimental stress analysis of cracked structures, obtaining crack shape relationship to stress intensity factor

05 p0666 A72-16322

Plastic stress and strain intensity factors for cracked plates in tensile fields

05 p0737 A72-16323

Geometric displacements and space-time derivatives determining velocity and strain fields in solids under deformation

05 p0738 A72-16529

Power parameter determination in rotary swaging of thin conical shells, discussing radial contact stresses

05 p0666 A72-16628

Nb-O and Nb-N alloys, investigating oxygen and nitrogen solute-hardening effects on room temperature flow stress

05 p0675 A72-16729

Unidirectional carbon fiber composites effects and use of stress envelopes in aircraft structure design

05 p0681 A72-16997

Plastic flow stress around dislocations on Ni-Al intermetallic cube and octahedral cross slip systems

05 p0678 A72-17118

Complex potentials for nonlinear elasticity, creep and small elastoplastic deformations, applying to stress concentration at curvilinear hole in infinite plane

05 p0742 A72-17183

Dynamic overstressing and annealing effects on fatigue life of convoluted metal bellows, using dynamic model and strain gage measurements

05 p0742 A72-17245

Stress fields around moving weld arc on Al sheet from isotherm map, calculating compressive and tensile stresses from heat induced material expansion

06 p0820 A72-17705

Critical review on data accuracy of maximum principal elastic stresses and deflections of thin initially-flat square isotropic plates under uniform normal pressure

06 p0894 A72-17796

Principle stress errors in biaxial stress fields expressed in terms of transverse sensitivity, stress and Poisson ratios of material during strain gage calibration

06 p0895 A72-17798

Fatigue crack formation speed relationship to stress intensity factor, investigating crack propagation by fracture mechanics methods

06 p0895 A72-17810

Fiber pull-out from elastic matrix, calculating shear stress and load distribution dependence on elastic properties and fiber length

06 p0897 A72-18152

Stress concentrations at circular holes and inclusions in elastoplastic strain hardening plate under tension and shear

06 p0897 A72-18316

Singular solutions for nonaxially symmetric shallow shells under concentrated normal or thermal loading

06 p0897 A72-18319

Shear and direct stresses on fuselage model cross section due to concentrated radial loads on frame comparing measurement with prediction by matrix force analysis

06 p0898 A72-18322

FORTAN programs for calculating principal stresses, strains and directions from rosette readings

06 p0781 A72-18324

Low frequency biaxial load effect on stress concentration factors for circular and elliptical holes in Plexiglas plates

06 p0898 A72-18350

Fatigue life and creep tests of refractory materials under programmed thermal cycling for different stress levels

06 p0831 A72-18351

Single fiber reinforced plate initial stress distribution due to linear expansion coefficients difference between matrix and fiber, using optical polarization

06 p0836 A72-18557

Temperature stress distribution in infinite plate with time varying heat transfer coefficient

06 p0899 A72-18565

Metal strip with circular hole under tension, calculating plastic strain and stress concentration coefficients

06 p0899 A72-18567

Stress and temperature fields in cooled gas turbine blades with allowance for elasticity, plasticity and creep

06 p0899 A72-18628

Cyclic bending stress distribution in fir tree turbine blade root for arbitrary loading phase

06 p0899 A72-18629

Rib reinforced cylindrical shells deformation under local load, examining stress-strain distribution

06 p0899 A72-18641

Heat resistant metals long time creep prediction at low stresses or temperatures

06 p0834 A72-18668

Stress distribution during plastic deformation of steel turbine disk from hardness measurements

06 p0900 A72-18670

Stress and deflection distribution for circular and elliptical toroidal shells under internal pressure from first order differential equations solutions

07 p1088 A72-19118

Finite element method application to fracture mechanics problems of stress concentration and intensity factors and elastoplastic response to cyclic loading

07 p1088 A72-19130

Moving heat source model of temperature profile and thermal stress propagation for laser drilled holes in alumina ceramic material

07 p0994 A72-19211

Stress redistribution in statically indeterminate structures under creep, discussing effects on time to brittle fracture and service life determinations

07 p1088 A72-19259

Moment stresses and deflections of rigidly clamped hinged and simply supported square elastic plates beyond elastic limit, deriving equilibrium and strain compatibility equations

07 p1091 A72-19759

Rupture strength of disk with surface crack under concentrated loads, applying integral equation to stressed state

07 p1092 A72-19777

Elastoplastic stressed state of thin cylindrical shells with circular hole, using small strain theory

07 p1092 A72-19896

High temperature tensile tests of Mo with helical and circular V grooves, discussing stress concentration sensitivity relations for grooved and smooth samples

07 p1018 A72-20141

Impurities and crystal lattice role in metal brittleness, discussing stress concentration and relaxation, crack initiation and plastic deformation

07 p1018 A72-20145

Stressed state of isotropic nonlinear plate with doubly periodic system of curvilinear holes

07 p1094 A72-20208

Stressed state approximate determination for isotropic slab with randomly positioned circular holes

07 p1094 A72-20210

Stressed state of infinite isotropic plate weakened by curvilinear hole with elastic plug, using asymptotic integration method

07 p1094 A72-20212

Stressed state of isotropic plate with curvilinear holes under tension, using computer techniques

07 p1094 A72-20215

Three dimensional stressed state of isotropic plate with elliptical holes under tension, solving boundary value problems

07 p1095 A72-20216

Maximum stress concentration in two dimensional elasticity theory for half plane and circle as function of contour distribution, using Cauchy-Buniakovskii inequality in Banach space

07 p1095 A72-20325

Strength and strain theory statistical analysis for perfectly brittle and plastic materials, assuming ultimate or elastic limit strain as governing factor

07 p1097 A72-20536

Numerical analysis of passing screw dislocation arrays under stress for computerized work hardening model

07 p1097 A72-20556

Metals cold working mechanics about stress state and yield points, proposing theoretical model for mechanism and applications in extrusion molding, drawing and hollow forging

07 p0999 A72-20599

P-analytical functions application to strength analysis of zero moment shells of revolution with positive Gaussian curvature under concentrated loads

08 p1242 A72-20905

- Longitudinal plane harmonic elastic wave scattering and stress concentration at rough circular hole boundary in thin isotropic plate
08 p1243 A72-21230
- Membrane and bending moment stresses distribution at elliptical hole in circular cylindrical shell, solving boundary value problems
08 p1243 A72-21234
- Stress concentration and elastohedriary values at curvilinear hole in fiberglass reinforced plastic plate under bending moment
08 p1243 A72-21237
- Stress concentration near elliptic and square orifices in plates with nonlinear viscoelastic hereditary creep properties
08 p1244 A72-21242
- Prestressed glass reinforced composites mechanical behavior, taking into account manufacture induced residual stress concentrations
08 p1192 A72-21674
- Plane stability of isotropic plate with straight line series of holes reinforced by complex elements or multicomponent rings, determining stress concentrations
08 p1246 A72-21710
- Glass fiber reinforced polymer composite model for tensile stress: distribution in matrix and fibers and at bond interface
08 p1194 A72-21753
- Dynamic radial vibrations and stresses in thick circular annulus of nonisotropic elastic material, using Hankel transform
08 p1246 A72-21793
- Successive approximations method for stress concentration problem at hole in cylindrical shell
08 p1247 A72-21818
- Radial and axial residual stress components in glass fiber reinforced polyethylene, comparing with adhesion strength obtained by shear method
08 p1196 A72-21862
- Notch length effect on stress concentration in polymethyl methacrylate sample from tensile, impact and bending tests
08 p1196 A72-21867
- Quenched aluminum oxide rod residual stress profile from strain and heat transfer rates measurements and temperature distribution calculation
08 p1196 A72-21918
- Stress distribution near corner point in interface section of body with two prismatic components, noting state singularity investigation reduction to transcendental equation solution
08 p1249 A72-21944
- Plastic deformation friction fracturing, stress concentration, free surface changes and load displacement analysis with upper bound, slip line and finite element methods
08 p1250 A72-22197
- Interaction between two noncoplanar parallel staggered elastic cracks with narrow spacing, calculating stress intensity required for crack propagation
09 p1397 A72-22250
- Fractography of high boron ceramics under ballistic impact, suggesting macroscopic and microscopic textures relationship to stress states and microstructure
09 p1334 A72-22391
- Penny shaped interface crack between elastic layer and half space, calculating stress intensity factors and strain energy release rate for aluminum-epoxy combination
09 p1398 A72-22530
- Stress intensity factor of crack near inclusion in infinite elastic plane, using numerical methods
09 p1398 A72-22531
- Photoelastic measurement of stress concentration in three dimensional fiber reinforced brittle plastic matrix under uniaxial tension
[PI PAPER 1] 09 p1398 A72-22538
- Numerical solution of integral equations for dislocation densities and stress singularities associated with cracks and pile ups in bimetallic media
09 p1398 A72-22622
- Potential equations and singularities methods comparison for two dimensional flow field cascades and stress distribution elasticity theories
09 p1260 A72-22627
- Temperature and thermal stress distribution in cylinder of finite length for mixed heating conditions
09 p1400 A72-22707
- Thermal stress distribution in orthotropic cylindrical shell weakened by circular hole, obtaining general solution by small parameter method
09 p1400 A72-22715
- Thermal stressed state determination for open thin walled cylindrical shells, using method of integral relations
09 p1400 A72-22716
- Elastoplastic stressed state of multilayer cylinder during loading, unloading and cyclic loading processes
09 p1401 A72-22721
- Micropolar elasticity plane problem singular solution based on stress equations and elastic potentials methods, discussing thermal stress concentration
09 p1402 A72-22743
- Stress and couple stress fields near antiplane shear crack tip, determining eigenfunctions to satisfy field equations and boundary conditions
09 p1402 A72-22744
- Crack propagation in elastic layer under antiplane state of deformation for arbitrarily distributed shear forces on crack surface
09 p1404 A72-22766
- Impact detonation mechanism in ammonium perchlorate mixtures with inflammable additions, determining critical detonation triggering stresses
09 p1373 A72-22890
- Central crack in plane orthotropic rectangular sheet under tension, showing stress intensity factors dependence on geometric and elastic constants
09 p1404 A72-22915
- Circumferential crack in cylindrical shell under torsion, presenting membrane and bending components of stress intensity factor ratio
09 p1404 A72-22918
- Rotationally symmetric stress and strain distribution in anisotropic elastic shells of revolution
[AD-745622] 09 p1405 A72-22944
- One dimensional shock wave propagation in inhomogeneous elastic materials, showing wave amplitude behavior dependence on critical jump in strain gradient
09 p1405 A72-22990
- Plane elastostatic problem of stress concentration near flat interface inclusion in bonded dissimilar materials
09 p1405 A72-22997
- Two dimensional creeping flow in fiber reinforced composite under uniform tension, discussing matrix shear stress and fiber direct stress distributions
09 p1338 A72-23168
- Carbon fiber reinforced plastic toughness from strain concentration and plastic flow observation near crack tip by moire technique
09 p1339 A72-23170
- Stress concentration in elastic composite reinforced by two dimensional continuous parallel fiber array with one broken fiber
09 p1339 A72-23172
- Tractions at interface between fiber and matrix in fiber reinforced composites, considering axially symmetric deformations and stress fields
09 p1339 A72-23173
- Stressed state of circular elastic plate with press-fitted equiaxial disk
09 p1406 A72-23181
- Optical simulation of plastic strain distribution with models prepared from organic glass, investigating birefringence effect
09 p1406 A72-23182
- Stress distribution determination for long isotropic elastic cylinder with strip crack on diametral plane by complex variable technique and Fredholm equation solution
09 p1409 A72-23574
- Rotational, centrifugal and Coriolis force effects on turbulent boundary layer development, discussing changes in structure and shear stress distribution
10 p1464 A72-23870
- Light beams diffraction patterns of thin plexiglass plate for load induced thickness variations, noting crack opening and edge sliding modes stress intensity factors
[ASME PAPER 71-APM-QQ] 10 p1553 A72-24178
- Plane harmonic compression waves scattering by circular holes in thin elastic plate, calculating dynamic stresses concentration
10 p1554 A72-24179
- Dynamic stress concentration around elliptical discontinuities in elastic medium, considering rigid and empty cavity scatterers for compression and vertically polarized shear incident waves
[ASME PAPER 72-APM-D] 10 p1554 A72-24180
- Stress intensity factor for circular crack embedded in finite thickness solid under uniform tension, noting semielliptical surface flaw in brittle material
[ASME PAPER 71-APMW-6] 10 p1554 A72-24183
- Stress distribution in general relativity on oriented compact Riemann manifold
10 p1511 A72-24206
- Autoradiographic study of stress intensity factor influence on hydrogen distribution at crack tips in Ti-Al-V alloy, using tritium doped salt water as corrosive medium
[ONERA, TP NO. 1052] 10 p1496 A72-24234
- Stress distribution determination by shear stress difference method in curvilinear orthogonal coordinate systems
10 p1557 A72-24405
- Partial differential equation for thin walled circular cylindrical shells, deriving solutions for displacement and stresses in terms of surface coordinates low degree polynomials
10 p1557 A72-24560
- Optimum thickness variation in annular strip/curved beam/ under bending moment at constant stress based on Mises-Hencky yield criterion
10 p1558 A72-24847
- Crack arrest in transversely loaded elastic plates from fracture mechanics combined with stress intensity factor for tensile and compression loads
10 p1499 A72-24890
- Variational methods for approximate solutions to Fredholm integral equations describing stress intensity factors and plastic regions of Dugdale cracks
[AD-744365] 10 p1558 A72-24892
- Mathematical model for supersonic crack propagation in cubic lattice, deriving velocity-applied stress relation
10 p1558 A72-24895
- Crack shape and plastic energy dissipation rate relation to plate thickness and applied stress for penny-shaped crack in elastic plate
10 p1559 A72-24896
- Photoelastic investigation of star shaped models for loading direction influence on shear stress distribution at notch tip region in uniform tensile field
10 p1559 A72-24897
- Approximate stress intensity factor for corner flaw emanating from quarter infinite solid edge, based on Smith solution for semicircular flaw
10 p1559 A72-24898
- Rough surfaces thermal contact resistance in vacuum for normal height distribution, discussing bolted joint nonuniform stress distribution effect
[AIAA PAPER 72-281] 11 p1741 A72-25221
- Elastic constants and bond stress distribution for discontinuous fiber-reinforced three dimensional composite subjected to uniaxial tension
[AIAA PAPER 72-397] 11 p1731 A72-25418
- Elastic finite element analysis for stress distribution in gripped thin walled tubular anisotropic three dimensional composite specimens
11 p1731 A72-25457
- Stress concentrations around circular openings and failure criteria for orthotropic and anisotropic composite laminated plates subjected to uniaxial, biaxial and shear loading
11 p1732 A72-25474
- Fatigue crack initiation and growth in filament reinforced Al alloys, noting interface crack tip stress distribution effects
11 p1654 A72-25480
- Elastic glass and Thorne fiber/epoxy matrix composite material creep tests, determining creep rate dependence on specimen geometry and stress state
11 p1672 A72-25481
- Moment stress-strain state of two layer circular cylindrical shells under creep conditions
11 p1733 A72-25542
- Bending of rectangular cross section cantilever beam with cylinder reinforced circular opening, calculating interface stress distribution as function of thickness and elasticity moduli ratio
11 p1733 A72-25545
- Pressure loaded shallow spherical shells with reinforced circular holes, noting stress concentration increase due to reinforcement bead eccentricity
11 p1734 A72-25736
- Specimen preparation effects on fracture strength measurements, noting critical stress intensity factor for single edge notch and compact tension high strength steel samples
11 p1657 A72-25825
- Creep and low cycle fatigue dynamic behavior, noting stress concentration time dependence, strain hardening and local plastic deformations in dead annealed Al thin walled tubes
11 p1658 A72-25829
- Constrained zones and stress intensity factors in cracked thin elastic plates under combined tensile and shear loads
11 p1735 A72-25893
- Low temperature tensile strength and plasticity of Ti alloys with zirconium, investigating sensitivity to stress concentrations
11 p1660 A72-26138
- Axisymmetric stress field in infinite homogeneous isotropic elastic solid with crack surrounding cylindrical cavity, solving elastic equilibrium equations
11 p1738 A72-26720
- Mellin transforms for finite elastic disk radial crack stress intensity factor and energy formulae in terms of Fredholm equation solution, considering constant loading case
11 p1738 A72-26724
- Statistical estimation method for brittle metals fracture strength, taking into account stress nonuniformities due to dislocation defects
11 p1738 A72-26803
- Ti alloys fatigue strength, stress concentration sensitivity and grain sizes effects at normal and high temperature under cyclic loads
11 p1663 A72-26821
- Hyperboloidal profile circular disk stress distribution induced by thermal pulse nonuniform temperature field
11 p1739 A72-26979
- Thermal stress distribution in orthotropic plates with variable heat transfer coefficient, using Fourier and Laplace transforms
12 p1878 A72-27084

Equilibrium equations of infinite strip with circular hole, using plane multiply connected domain method for stress field

12 p1878 A72-27087

Fatigue failure criteria under combined stress conditions, considering complex form, thin and thick walled cylinders as test specimens

12 p1828 A72-27317

Stress concentration in infinite elastic isotropic disk with circular hole under internal tensile loading

12 p1882 A72-27320

Green function for stress distribution in plane shaped disk with edge loaded circular hole, noting conformal mapping for arbitrary shape

12 p1883 A72-27391

Stress intensity factor of Griffith crack in elastic solid opened by thin symmetric wedge, using triple integral equations

12 p1883 A72-27558

Micromechanics of deformed continua, discussing atomic structure effects on stress concentrations in composite materials, framed structures and grids

12 p1884 A72-27640

Flow rate limits increase and near homogeneous stress concentration in active hot extrusion of Al alloys

12 p1814 A72-27644

Stress distribution in circular cylindrical shell weakened by two identical holes on common generatrix

12 p1886 A72-27984

Circular cylindrical shell under distributed edge load along circular hole contour, calculating stress concentration by trigonometric series solution for shallow shell equation

12 p1886 A72-28130

Characteristic friction curves /Mohr circle envelopes/ to describe stressed state region with various stresses produced by slide friction in steel due to indentation

12 p1819 A72-28198

Elastoplastic deformation effects on load bearing capacity of samples with stress concentrators under alternating cyclic loading, obtaining nomograms by digital computer

12 p1887 A72-28228

Cylindrical samples with deep circular hyperbolic notch, investigating cyclic inelastic strain induced stress redistribution effects on load bearing capacity

12 p1830 A72-28229

Engineering formula relating crack tip stress intensity coefficient to mechanical properties and structural element size

12 p1887 A72-28236

Crack and notch induced stress concentrations effect on steel mechanical properties at 20-293 K, using static and dynamic test methods

12 p1831 A72-28240

Thermal stresses near pole of spherical reservoir during cooling, using thermoelastic equations of shell of revolution

12 p1887 A72-28242

Surface finishing effects on steel sensitivity to stress concentration under variable loads, emphasizing diamond smoothing and roller technique

12 p1831 A72-28246

Stress-strain concentrations near circular holes in fiberglass reinforced plastic plates under various types of load as function of hole diameter/plate width ratio, anisotropy and load

13 p1983 A72-28560

Microcuts as equivalent mechanical stress concentrators for breakdown energy estimation in flat polymethyl methacrylate glass specimens under impact bending loads

13 p1983 A72-28563

Finite circular cylindrical shell under uniform pressure on outer rim, comparing stresses and displacements

13 p2055 A72-28624

High temperature constant load creep tests on pure powder metallurgy W and tungsten-thoria alloy, discussing stress dependence

13 p1975 A72-28665

Singular moment stress homogeneous solutions of plane problem with seminfinitesimal cut in elasticity theory

13 p2056 A72-28773

Thermal stress distribution determination in isotropic plate with rigid circular insert, using small parameter technique

13 p2056 A72-28913

Tangential stresses, rigidity characteristics and stress functions of prismatic grooved circular shafts, showing summary representations and integral transformations methods interrelationship

13 p2057 A72-29062

Plane stressed state of elastic rectangular plate solved by method of summary representations

13 p2057 A72-29067

Plane plastic deformation during single pass rolling of corrugated metal sheet, determining stress-strain fields for first and second phases

13 p1964 A72-29148

Velocity field at strain center during steel channel rolling, deriving relations for center contour calculation

13 p1964 A72-29149

Notch stress concentration in disk with elastic core under tension, using finite element method

13 p2060 A72-29600

Iron content and stress level effect on flaking corrosion of Al alloy sheets, describing experimental technique

13 p1980 A72-29826

Three dimensional axisymmetric problem for stressed state of elastic homogeneous cylindrical orthotropic bodies of revolution, using method based on small parameters

13 p2062 A72-29948

Modified finite element method application to plane elastic area elementary triangles strained and stressed state description by polynomial algebraic expressions and harmonic functions

14 p2163 A72-30188

Stress distribution variations and wave propagation in viscoelastic rod of finite length under impact

14 p2163 A72-30191

Aircraft landing gear stress spectrum and design data during ground loading on airport runways, using linearized theory for model investigation

14 p2071 A72-30283

Hypervelocity impact parameters calculated from shock wave equations of motion, discussing viscosity effect on velocity and stress distributions

14 p2164 A72-30297

Boundary value problems in dynamics of Cosserat infinite elastic medium with finite crack, noting couple stresses effect on dynamic stress concentration

14 p2164 A72-30299

Instrument to determine steady and unsteady stress state of elastic fluids in viscometric flow, noting rheological measurements in solved polymers

14 p2094 A72-30421

Temperature effects on critical crack opening as fracture toughness criterion for medium strength steel, taking into account local plasticity and propagation resistance

14 p2118 A72-30590

Mill annealed Ti alloy fatigue at 600 F and room temperature, noting critical local stress for slip bands formation and cracking

14 p2120 A72-30611

Anisotropic plate with doubly periodic system of elastic ring stiffened elliptic holes, calculating stresses at holes due to tensile forces applied at infinity

14 p2165 A72-30685

Axisymmetric ductile rotating shaft failure modes, considering fatigue, buckling and impact stress factors [ASME PAPER 72-DE-40]

14 p2167 A72-30873

Optical anisotropy effects in birefringent materials by reflected shadow method and extension of theory for constrained zones around cracked plates under plane stress

14 p2167 A72-30903

Stress concentration in symmetrical U-notched plates, comparing data with Baratta, Neal, Neuber and Heywood formulas

14 p2167 A72-30904

Finite element method with compliance equations determining energy release rates and stress intensity factors for complex crack configurations and loadings

14 p2168 A72-30908

Shear stress distribution and local heat flux at surface of axisymmetric bodies for laminar and turbulent boundary layer flows

14 p2071 A72-31163

Elastic crack tip stress fields, considering weight function

15 p2322 A72-31347

Elastic body stress concentration problem formulation as singular integral operator eigenvalue problem for half space

15 p2323 A72-31478

Metal hardening level evaluation on basis of volume dislocation structure from stress field of dislocation loops

15 p2254 A72-31562

Elastoplastic stress concentration near elliptic hole in plate loaded in smallest axis direction

15 p2325 A72-31606

Numerical solution of singular integral equations system for stress concentration in elastic plane with curvilinear crack

15 p2327 A72-31735

Zero moment stress effect on modal density spectrum of fluctuating thin cylindrical shells and cylindrical panels

15 p2327 A72-31737

Tangential force distribution at fiber surface in composite material under tensile stress without displacement at fiber axis

15 p2260 A72-31743

Mechanical vibrations effect on flow stress and strain rate from tensile and creep tests as function of amplitude

15 p2257 A72-31841

Elastic shell initial stress effects on dynamic response in all free vibration modes, considering: transverse shear and normal strains

15 p2328 A72-32021

Stress concentrations in cylindrical shells with cutouts under uniformly distributed axial tensile load, presenting exact solution of differential equation

15 p2328 A72-32138

Singularities of cylindrical shell under concentrated: twisting couple, investigating axial and circumferential deformations and shear stress distribution

15 p2329 A72-32139

Deep drawing of circular mild steel and aluminum sheets with polyurethane or rubber rings, examining strain distribution, shape and surface roughness

15 p2244 A72-32145

Debonded laminar composite torsional stress intensification analysis near circular shaped imperfection based on Hankel transform and dual integral equations solution

15 p2261 A72-32247

Displacement and stress field for elastic solid containing cruciform crack with unequal length arms

15 p2330 A72-32292

Nonlinear thermoelasticity theory in terms of continuum mechanics terminology, assessing strain gradients and couple stresses effects on stress distribution

15 p2330 A72-32293

Ultrahigh tensile strength steel pressure chamber fracture behavior in high stress concentration fields

15 p2330 A72-32345

Surface stress solution for elastic half space weakened by spherical cut under internal pressure

15 p2333 A72-32681

Rigidity effect of reinforcing rings on stressed state of physically nonlinear perforated elastic plates

15 p2333 A72-32683

Differential equations for stress-strain state of circular cylindrical shell with circular holes resting on elastic base under external pressure

15 p2333 A72-32686

Fully developed turbulent air flow through concentric annuli, measuring inner wall shear stress distribution by zero-shear position location and sliding sleeves technique

16 p2375 A72-32875

Analog simulation method for highly redundant structure optimization based on reproducing structural mechanical behavior in stabilized stress states

16 p2463 A72-32894

Nonlinear stress-strain-curvature problem application to noncircular cylindrical membrane shell under lateral pressure

16 p2464 A72-32917

Linear theory for spirally sinusoidal stress distributions in elastic helicoidal shells applied to pure bending problem

16 p2465 A72-33000

Stress and heat flux constitutive equations dependence on observer reference frame, considering field equation for temperature of gas at rest

16 p2478 A72-33526

Dynamic stress field solution to plane strain crack propagation in elastic body under general loading at constant and nonlinear extension rate

16 p2470 A72-33612

German papers on crack propagation in metal sheets, resonant vibration of cylindrical shells and stress concentration in plastic plates

16 p2470 A72-33676

Stress concentration in elastic layer with circular slot analyzed by reducing mixed boundary value problem to initial condition problem via invariant imbedding

16 p2471 A72-33827

Stored energy function for multiaxial stress state in rubberlike materials from tensile data based on Valanis-Landel theory

16 p2472 A72-33838

Creep tests on Cr martensite stainless steel, showing inapplicability of Garofalo equation for stress dependence of secondary creep rate during variable stress experiment

16 p2412 A72-34112

Steady state creep of composite material with discontinuous fibers, determining random function mean and variance for fiber stress distribution

16 p2412 A72-34115

Energy theorems for creep constitutive relationships, discussing total deformation of body composed of elastic-creeping material with allowance for stress redistribution effects

16 p2473 A72-34118

Temperature and stress fields generated by pulsating internal pressure in viscoelastic hollow sphere with temperature dependent material properties, using iterative numerical procedure

16 p2473 A72-34122

Numerical procedure for spherical and cylindrical shells creep behavior, taking into account stress redistribution due to interaction between elastic and creep strains

16 p2473 A72-34125

Heat generation in oscillating torsional spring modeled by viscoelastic hollow cylinder subjected to sinusoidal shear stresses, calculating stress and temperature distribution and displacement 17 p2635 A72-34232

Buekner formulation combined with finite element method for arbitrary shaped cracked bodies stress intensity factors in framework of linear fracture mechanics 17 p2623 A72-34253

Crack opening displacement and the rate of fatigue crack growth. 17 p2565 A72-34255

On the extension of an infinite elastic plate containing an axisymmetric hole. [ASME PAPER 72-APM-G] 17 p2624 A72-34313

A comparison of flow and deformation theories in a radially stressed annular plate. [ASME PAPER 72-APM-44] 17 p2627 A72-34781

Conservation laws related to energy release rates associated with cavity or crack rotation and expansion, discussing plastic stress distribution around cracks [ASME PAPER 72-APM-22] 17 p2580 A72-34795

Effect of end attachment on the strength of fiber reinforced composite cylinders. [SESA PAPER 1994A] 17 p2630 A72-34817

The evaluation of the stress intensity factors for cracks subjected to tension, torsion, and flexure by an efficient numerical technique. [ASME PAPER 72-MAT-B] 17 p2631 A72-34966

A comparison of numerical methods for determining stress intensity factors. 17 p2631 A72-34973

Thin spherical shells in equilibrium with displacement and stress fields, satisfying virtual work, kinematic and static requirements 17 p2633 A72-35351

Eigenfunction technique development to incorporate stress singularities at circumference of end planes into problem of solid cylinder compression between rough rigid stamps 17 p2633 A72-35403

Shear stresses distribution in isothermal incompressible turbulent boundary layer with positive pressure gradient by diffusers in open jet wind tunnel 17 p2544 A72-35931

Creep of different molybdenum alloys at high temperature and under strong stresses 18 p2698 A72-36144

Strain measure determined plastic stress concentrations around discontinuities in flat plates compared with incremental theory 18 p2733 A72-36359

Mechanical structure and component stress measurement by reinforced concrete, microconcrete, elastic and plastic models 18 p2733 A72-36370

Photoelastic investigation of a Hertzian contact with shallow grooves in the contact area. 18 p2734 A72-36374

Photoelastic study of stress concentration in rectangular panels with inserts. 18 p2734 A72-36376

Thickness-punch size ratio effects on stress state response of elastic plates and beams in flat contact under symmetric loads due to rigid punches 18 p2734 A72-36378

Stress state and velocity fluctuations in a perturbed boundary layer 18 p2680 A72-36464

Similarity solutions to nonlinear equations of motion of n dislocations group in slip plane under stress 18 p2719 A72-36745

Thermo-elastic interactions in an infinite elastic solid due to a concentrated transient heat source. 18 p2735 A72-36754

Analysis of a partially cracked panel. 18 p2735 A72-36771

Bending of rectangular plates of linearly varying thickness 18 p2736 A72-36991

Infinite plate with a supported reinforced circular hole. 18 p2738 A72-37071

Experimental determination of viscoelastic characteristics 18 p2740 A72-37211

Stress distribution and displacements in adhesive bonded lap-jointed aerospace structures, presenting approximate solution 18 p2740 A72-37214

Point-loaded discs and blocks applicable to tensile testing of brittle materials. 19 p2870 A72-37223

Asymmetric collinear internal cracks interaction evaluation by measuring diameter variation and shape distortion of caustic surface impinged upon by retarded laser radiation 19 p2870 A72-37224

Strain distribution in and around strain gauges. 19 p2870 A72-37225

A note on the low frequency diffraction of elastic waves by a Griffith crack. 19 p2870 A72-37414

Some results of an experimental study of stress distribution at monofilament tips 19 p2822 A72-37529

Estimation of the accuracy of the method of measuring the bending of strips in order to determine residual stresses. 19 p2806 A72-37574

Strain rate, stress concentration and temperature effects on hydrogen environment embrittlement of metals 19 p2816 A72-37640

Creep rupture under stress concentration. 19 p2874 A72-37702

Stress criterion for creep rupture in tubes under combined axial load and internal pressure, deriving stress concentration from high temperature tests 19 p2874 A72-37715

Stress redistribution caused by creep in a thick walled circular cylinder under axial and thermal loading. 19 p2874 A72-37716

Crack toughness - Physical and technological significance 19 p2875 A72-37854

Elastic impact on a three-layer plate in the presence of concentrated masses and nonlinear restraints 19 p2877 A72-38159

Solution manifolds for dynamic elasticity equations corresponding to the action of a concentrated load 19 p2878 A72-38213

Effect of stress amplitude and number of vibration cycles on the damping decrement in metals 19 p2878 A72-38217

Polarization optical method for analyzing local stress concentrations in structural members. 19 p2805 A72-38768

Relation between the reliability and allowable stress amplitude in fatigue design. 20 p2977 A72-38879

Features of deformation and stress distribution in a laminated plastic 20 p2944 A72-38948

Testing of hydrogen pressure or stress concentration induced crack propagation theory for steels based on decohesion mechanism 20 p2935 A72-39003

Factors affecting acoustic emission response from materials. 20 p2924 A72-39279

Use of acoustic emission for the detection of weld and stress corrosion cracking. 20 p2925 A72-39283

The unit stress state in a cylindrical tank with a flat bottom and a partly cantilevered shell 20 p2979 A72-39594

Characteristics of the thermal and stressed states of cooled shell-type blades 20 p2963 A72-39911

Stress intensity factors for transversely loaded elastic plates and their application to predictions of crack arrest. 20 p2981 A72-39956

Elastic analysis for a radial crack in a circular ring. 20 p2981 A72-39959

Study of fatigue crack initiation from flaws using fracture mechanics theory. 20 p2981 A72-39961

Crack arrest and crack initiation in a titanium alloy. 20 p2942 A72-39962

Photoelastic determination of mixed mode stress intensity factors. 20 p2981 A72-39963

Stress concentration around circular crack on interface between two bonded dissimilar isotropic elastic half spaces 20 p2982 A72-40020

A method for directly determining surface strain fields using diffraction gratings. 21 p3052 A72-40236

Applicability of the Euler approach to investigate the strain stability of anisotropic nonlinearly elastic bodies under finite subcritical strains. 21 p3116 A72-40273

Singular moment stresses in homogeneous solutions of plane problem with semiinfinite cut within elasticity theory 21 p3116 A72-40274

Russian book - Plates strengthened by composite rings and elastic cover pieces. 21 p3116 A72-40385

Stresses in a perforated, continuously loaded cantilever beam. 21 p3117 A72-40453

Axisymmetric impact of compactible rods subjected to finite deformations. 21 p3117 A72-40455

Crack tip vicinity stress generated by plane transient tension-stress wave diffraction, examining ductility effects on fracture modes 21 p3117 A72-40672

Simple structures behavior under constant loads, considering low stress levels and creep rupture mechanism with internal damage affecting strain rate 21 p3117 A72-40673

Complex stress-intensity factors at bifurcated cracks. 21 p3117 A72-40675

The effect of couple-stresses on stress concentration of a ring inclusion. 21 p3117 A72-40681

Dynamic stress concentration of notched strips. 21 p3117 A72-40715

Stresses around one hole or two holes subjected to internal pressures in semi-infinite or infinite medium. 21 p3118 A72-40717

A study of stress around non-central holes in a rotating tapered disc. 21 p3118 A72-40775

Singular stress concentration at sharp edge of wedge in contact with half plane in elastostatics 21 p3119 A72-41104

A hyperboloidal notch in a transversely isotropic material under pure shear. 21 p3119 A72-41105

Influence of discontinuity stresses on main propellant tankage of a space shuttle orbiter. [ICAS PAPER 72-10] 21 p3120 A72-41135

Fatigue strength of overloaded stiffeners in cracked panels, evaluating stress intensity factor and overload coefficients for fatigue crack propagation via finite element method [ICAS PAPER 72-40] 21 p3120 A72-41165

A measurement of the surface strain distribution by optical differentiation method. 21 p3056 A72-41239

The vertical stress distribution due to parabolic strip load and uniform load over an ellipse in the interior of a semi-infinite solid. 21 p3121 A72-41243

A consistent approach for treating distributed loading in the matrix force method. 21 p3122 A72-41261

Bent plates and shells equations and rupture modes, characterizing cracks and stress intensity 21 p3122 A72-41338

Regime factor and stress concentration parameter for sudden heating of solid cylinders and disks, noting thermal stability criterion with allowance for statistical strength 21 p3123 A72-41361

The stress gradient as a cause for the manifestation of the scale effect in brittle fracture of materials. 21 p3123 A72-41364

Stress distribution at crack tips in elastic plate loaded by two concentrated opposite forces perpendicular to crack 21 p3123 A72-41389

Stresses in bonded materials with a crack perpendicular to the interface. 21 p3124 A72-41396

The stress intensity factors of a radial crack in a finite rotating elastic disc. 21 p3124 A72-41397

Stress distribution in a cylindrical shell with reinforced holes 21 p3126 A72-41542

Stress concentration around curvilinear holes in plates according to Reissner's theory 21 p3126 A72-41543

Equilibrium equations for given stress concentration in circular and annular plates under tensile loads with different yield points in tension and compression 21 p3126 A72-41545

Influence of stress raisers in the form of circular holes on the endurance in symmetric bending of AMg6BM aluminum-alloy sheet 21 p3071 A72-41704

Calculation of the stress concentration at the joint between a cylindrical casing and a branch pipe for internal pressure 21 p3127 A72-41710

Crack tip stress field alteration via elastic pulses for changing crack trajectory or fracturing process termination, using polarization optical method 21 p3061 A72-41824

Approximate calculation of the temperature stresses in the thermal impact zone 22 p3232 A72-41871

Estimation of the effect of stress concentration in nonstationary loading regimes 22 p3232 A72-41922

On the application of the mixed finite element methods to the stress concentration problems of cylindrical shells with a circular cutout or a crack. 22 p3232 A72-41942

Stress-strain state of an isotropic half-plane with an elliptic hole, deformed by concentrated loads 22 p3233 A72-42057

Stress-strain state at holes in plates in the case of asymmetric buckling modes 22 p3233 A72-42059

Stress concentration at an elliptic hole in an elastoplastic body 22 p3233 A72-42060

Photoelastic study of stress concentration in perforated composite pipes under external pressure 22 p3233 A72-42064

Surface distortion and strain fields visualization by grating produced diffraction patterns, discussing different detection techniques

22 p3234 A72-42391

Magnetic tension induced stress balance in plasma sheet, considering pressure gradient along geomagnetic tail axis, plasma flow kinetic energy and pressure anisotropy

22 p3211 A72-42408

Stress amplitude and hysteresis loop width changes in alpha Ti during cyclic work softening-work hardening with constant strain amplitude

22 p3189 A72-42438

Stress analysis in two dimensional bending process using the photo-rheological stress analysis.

22 p3183 A72-42483

Numerical solution of bending stresses in elastic cantilever plates under surface and edge loads, noting boundary layer, load concentration and sweep back effects

22 p3236 A72-42609

Versatile stretching of a disc shaped as a plane with elliptic aperture.

22 p3236 A72-42627

The stretching of a disc shaped as a semi-infinite plate with half-elliptic edge sector.

22 p3236 A72-42628

Stress concentration around holes in plates and shells.

22 p3238 A72-42834

Brittle fracture under dynamic loading conditions.

22 p3239 A72-42848

A simple formula for the maximum stress in a twisted angle or channel.

22 p3240 A72-42894

Reinforcement of structural materials by long strong fibres.

22 p3241 A72-43026

Book - Effect of notches on low-cycle fatigue: A literature survey.

22 p3242 A72-43145

Plane problem of elasticity theory for known normal and tangential stress tensor components at boundary of simply connected region, calculating stress concentration

23 p3344 A72-43353

Stress concentration around a circular hole in an elastoplastic medium under the action of a temperature field and omnidirectional tension

23 p3344 A72-43418

Combined mode crack extension in adhesive joints.

23 p3305 A72-43493

Boundary value problems for concentrated forces acting inside semiinfinite anisotropic plate under plane stress, investigating failure modes of unidirectional composites

23 p3344 A72-43495

Glass fracture mechanics, discussing microcrack stress concentration, Griffith theory, statistical failure theories, static fatigue and strength measurements

23 p3305 A72-43502

Edge and screw dislocations induced stress fields in isotropic medium, using Kauderer nonlinear elasticity theory

23 p3345 A72-43622

Experimental analysis of the stress distribution in the vicinity of a nonwelded rigid circular inclusion in the interior of a plate stressed in monoxal tension

23 p3346 A72-43691

Plane elastostatic analysis of V grooved rectangular plates notch angle and specimen geometry effects on stress intensity factors and fracture toughness measurements

23 p3346 A72-43703

Stresses around an axial crack in a pressurized cylindrical shell.

23 p3346 A72-43705

A finite element stress analysis of a crack in a bi-material plate.

23 p3346 A72-43707

A note on the twisting deformation of a non-homogeneous shaft containing a circular crack.

23 p3346 A72-43708

Load distribution in a single-edge-notch tensile specimen.

23 p3306 A72-43710

Path independent integrals to predict onset of crack instability in an elastic plastic material.

23 p3346 A72-43711

Al alloy sheet panel tests for cracks emanating from stress concentration areas at holes or cutout edge

23 p3347 A72-43713

Fiber reinforced metallic matrix composite under creep, discussing rigidity, stress distribution, rupture strength and failure time

23 p3306 A72-43727

Refractory materials heat resistance criteria, taking into account hollow cylinder thermal stress distribution

23 p3306 A72-43738

Stress state of arbitrary contour body of revolution under torsion using finite difference method

23 p3347 A72-43744

Disk fillets stressed state, determining concentration coefficient and bearing capacity effect

23 p3347 A72-43747

Thermal and mechanical stresses concentration near peripheral notches on ring-shaped graphite, noting notch sensitivity relationship to tip curvature and graphite grain size

23 p3306 A72-43755

Stress function for thermal shock in plate with cylindrical heat source, noting thermal stress concentration in optical materials under electromagnetic radiation

23 p3348 A72-43792

Numerical determination of the stress concentration around a hole in a circular cylindrical shell

23 p3348 A72-43799

Approximate stress-strain state determination in plate weakened by arbitrarily oriented rectilinear cracks and circular holes in elasticity theory

23 p3349 A72-43801

Photoelastic analysis of cardiovascular-magnitude stress pattern produced by flow through gelatin-agar walled channels for analysis of mechanical stresses on blood vessel walls

23 p3260 A72-43936

Stress distribution at defects in the form of rigid sharply-angled inclusions

23 p3349 A72-43952

Photothermoelastic study of stress concentrations in a plate with internal heating.

23 p3349 A72-43986

Determination of the stressed state in a welded joint in plastic deformation

23 p3293 A72-44019

The torsion of a circular cylinder containing a symmetric array of edge cracks.

23 p3350 A72-44048

Variational analysis of sandwich beams under static loads, presenting shear deformation and normal stress distributions

[ASME PAPER 72-APM-R] 23 p3350 A72-44055

On the solution of plane, orthotropic elasticity problems by an integral method.

[ASME PAPER 72-APM-BB] 23 p3350 A72-44056

Transfer matrix approach for determining stresses and displacements in elastostatics of laminated composites

[ASCE PREPRINT 1674] 23 p3351 A72-44105

Stress-strain characterization of part-through crack in plate under tension in terms of stress intensity factor

23 p3352 A72-44227

Stress intensity factors for embedded elliptical crack in semiinfinite solid and for semielliptical surface crack in plate under tension and/or bending

23 p3353 A72-44231

The elastic analysis of the part-circular surface flaw problem by the alternating method.

23 p3353 A72-44232

Numerical evaluation of elastic stress intensity factors by the boundary-integral equation method.

23 p3353 A72-44233

Three-dimensional finite element analysis for fracture mechanics.

23 p3353 A72-44235

Stress distribution in a homogeneous elastic sphere containing a penny shaped crack of prescribed shape.

23 p3354 A72-44268

Thermoelastic contact problem of an elastic layer resting on an elastic foundation.

23 p3354 A72-44269

Stress distributions in a semi-infinite plate with a row of circular holes.

23 p3355 A72-44398

Stress concentration of a cylindrical shell with one or two circular holes.

23 p3355 A72-44399

Mean stress effects on fatigue crack propagation rate from tests at various temperatures, assuming initial, tensile and shear modes and final propagation stages

24 p3454 A72-44627

Polymer fatigue failure mechanism examination on constant deflection type testing machine, investigating applied stress and temperature effects on crack propagation rate

24 p3455 A72-44631

Optimum design of joints - The stress severity factor concept.

24 p3455 A72-44728

Orthotropic photoelasticity methods application to concentrated force on half plane edge and to stress distribution on elliptical hole boundary in tensile strip

24 p3455 A72-44790

Plane-stress fracture toughness testing using a crack-line-loaded specimen.

24 p3456 A72-44810

Crack growth resistance in plane-stress fracture testing.

24 p3456 A72-44811

A sandwich plate with a part-through and a debonding crack.

24 p3456 A72-44813

Linear fracture mechanics in orthotropic materials.

24 p3457 A72-44818

Stress concentration coefficients calculation at sharp cracks and notches for engine parts in tension, compression and combined bending and torsion

24 p3458 A72-44932

Analogy between body force and inelastic strain gradient in all crystal systems.

24 p3459 A72-45247

The effect of shear on a penny-shaped crack at the interface of an elastic half-space and a rigid foundation.

24 p3459 A72-45250

The stress distribution near the tip of an array of screw dislocations piled-up against an inclusion.

24 p3460 A72-45694

Stressed state of radial bearings hollow rollers under loads concentrated along generatrix, evaluating test results by statistical analysis

24 p3408 A72-45726

Stress state of variable thickness long elastic shallow shell in bending and torsion, applying equations to large turbine blades

24 p3460 A72-45728

Gas turbine wheel design analysis, presenting procedures for estimating revolution rates, blade numbers and component configurations effects on wheel weight for prescribed stresses

24 p3460 A72-45737

Fatigue life and creep tests of refractory materials under programmed thermal cycling for different stress levels

24 p3416 A72-45738

High temperature tensile tests of Mo with helical and circular V grooves, discussing stress concentration sensitivity relations for grooved and smooth samples

24 p3417 A72-45766

The influence of static stresses on the dissipation of energy due to forced oscillations.

24 p3461 A72-45767

STRESS CORROSION

Monograph on stress corrosion failure, covering threshold stresses, fracture mechanics, electrochemical processes, hydrogen embrittlement, corrosives, various steels and alloys, environmental effects, etc

01 p0082 A72-10166

Corrosion and stress corrosion cracking prevention on space shuttle by materials selection

01 p0085 A72-10775

Electrochemical potential microstructure and stress intensity factor effect on aqueous stress corrosion crack propagation rate in high strength Ti alloy

01 p0085 A72-10776

Maraging and Ni steels stress corrosion cracking rates dependence on stress intensity factor, discussing measurements in salt and distilled water

01 p0086 A72-10995

Stress corrosion cracking of Cr-Ni austenitic stainless steel with Mo and Cu additions in boiling sulfuric medium

01 p0089 A72-11181

Stress corrosion crack initiation and propagation characteristics computerized simulation validity

02 p0295 A72-12480

Hydrogen diffusivity and solubility in alpha-Ti alloys, considering absorption effect on stress corrosion cracking

02 p0244 A72-12481

High strength steels stress corrosion crack propagation velocity relationship to crack tip stress intensity

02 p0295 A72-12482

Corrosion fatigue cyclic crack growth rate above and below environmental threshold stress in steels as function of frequency and potentials, indicating hydrogen embrittlement

03 p0377 A72-14172

Maraging steel laminates stress corrosion cracking behavior, showing composite base plate and weld structure influence on crack propagation reduction

04 p0534 A72-15569

Ti-Al-Mo-V alloy sustained load stress corrosion crack growth in salt and distilled water environments

04 p0534 A72-15570

Grain boundary region constituents corrosion behavior and solution chemistry within stress corrosion cracks in Al alloys observed from pH changes

04 p0535 A72-15733

Stress corrosion crack tip electrochemical reactions simulation on Ti and alloy surfaces, using modified rotating disk apparatus with pH measurement

04 p0536 A72-15739

Crackline loaded edge crack stress corrosion specimen, investigating crack initiation and propagation

05 p0673 A72-16324

Stress corrosion crack growth in air melted and vacuum arc remelted nickel maraging steel, using stress wave analysis technique

05 p0674 A72-16327

Critique of microstructure effect on strength, toughness and stress corrosion cracking susceptibility of metastable beta titanium alloy, discussing recrystallization conditions

05 p0679 A72-17122

High Cr ferritic steels intergranular and stress corrosion properties and resistance to sea water, organic and inorganic acids and acid mixtures

07 p0995 A72-19572

Prestressing effect on stress corrosion resistance of fatigue precracked high strength steels

07 p1016 A72-19941

Lower confidence bound for reliability and specifications for nonnormally distributed stress corrosion test data, using Weibull statistical distribution

08 p1189 A72-22102

Alloy composition, specimen stressing and surface conditions effects on stress corrosion cracking

08 p1189 A72-22106

Soviet book on corrosion cracking of carbon steels covering chemical composition, structure, mechanical properties, anode and cathode processes role and adsorption losses

08 p1190 A72-22163

Stress corrosion of uranium carbide ceramics in atmospheric environments containing water

09 p1335 A72-22399

Ion and laser microprobes for concentration measurements of hot salt stress corrosion produced hydrogen on Ti alloy on microscopic scale

09 p1276 A72-23477

German monograph on transition elements Cr, Mn and Zr influence on Al-Zn-Mg alloys stress corrosion covering electron microscope studies and loop-bending tests

10 p1493 A72-23769

Impurities effects on stress corrosion and work hardening induced dislocation structures in stainless steels, considering stacking fault energy relationship

10 p1496 A72-24231

Electrochemical and stress corrosion tests of Ti-Ni alloys in acidic chloride solutions at ambient and elevated temperatures [NACE PAPER 30]

10 p1497 A72-24321

Tensile ligament instability model for stress corrosion crack propagation velocity in austenitized steel tempered at 750 F

10 p1499 A72-24888

Hexagonal metals stress corrosion cracking fractographs interpretation, noting striations as prominent feature of transgranular fractures

11 p1652 A72-25288

Stress corrosion crack paths in Al-Zn-Mg alloys, showing normal coincidence with grain boundaries

11 p1652 A72-25289

Aerospace vehicle high tensile strength fasteners stress corrosion cracking and hydrogen embrittlement [AIAA PAPER 72-385]

11 p1653 A72-25407

Al alloys hand forgings fracture strength and stress corrosion characteristics from precracked specimens bending tests in air and sea water

11 p1658 A72-25833

Metal stress corrosion crack propagation rate theory based on film rupture mechanism

11 p1735 A72-25852

Stress corrosion cracking mechanism of low carbon steels to explain transcrystalline brittle mechanical cracks development along grain boundaries

11 p1666 A72-26923

Fractographic study of stress corrosion fractures of low carbon steels with electron microscope

11 p1666 A72-26924

Microstructural effects on high strength Mg, Al and Ti alloys stress corrosion crack growth in aqueous environments, discussing correlations relative to composition and preferred orientation

11 p1668 A72-26946

Al-Zn-Mg alloy tear resistance relationship to stress corrosion cracking from tear, tensile and corrosion tests

12 p1830 A72-27750

Ti alloys hot salt stress corrosion cracking mechanism, discussing cold deformation and heat treatment effects, tensile tests, hydrogen analysis and microscope investigation

14 p2117 A72-30535

Chemical and mechanical properties relationship to stress corrosion in high strength Al-Cu and Al-Zn-Mg alloys, emphasizing grain boundaries cleavage energy

14 p2117 A72-30536

Heat treatment and grain size effects on stress corrosion resistance and life duration of maraging steels, investigating crack initiation and propagation

14 p2117 A72-30539

Heat treatment hardening effect on stress corrosion resistance of ultrahigh maraging and stainless steels, emphasizing hydrogen embrittlement

14 p2117 A72-30540

Anodic salt-chromate stress corrosion resistance test of Al-Zn-Mg alloys, noting time reduction and correlation with natural environment exposures

14 p2117 A72-30541

Microstructural changes relationship to corrosion susceptibility in ternary Al alloy obtained from stress corrosion cracking tests and electron metallography, noting precipitate-free region

14 p2118 A72-30542

Stress corrosion crack initiation and propagation for Ti alloy in sodium chloride solutions, noting anodic dissolution

15 p2253 A72-31295

Ti alloy initial H content effect on resistance to hot salt stress corrosion embrittlement and cracking, discussing annealing treatment influence

15 p2253 A72-31296

Ti-Al-V foil stress corrosion methanol cracking resistance improved by treatment with pentanedione, suggesting metal ions removal from protective film

15 p2253 A72-31297

Ti alloys hot salt stress corrosion during turbine engine operation, noting effects of alloy processing conditions, surface properties and cyclic exposures

15 p2297 A72-32136

Catalytic dissociation, hydrogen embrittlement, and stress corrosion cracking.

17 p2566 A72-34256

Critical species in the transgranular stress corrosion cracking of titanium alloys in aqueous solutions.

17 p2567 A72-34733

Austenitic steel stress corrosion prevention at high temperatures and pressures, investigating inhibitor adsorption properties from capacitance measurements and polarization curves

17 p2568 A72-35474

Interface morphology development during stress corrosion cracking. I - Via surface diffusion.

18 p2700 A72-36583

Active corrosion in aqueous solutions, discussing reactions, adsorption, intergranular attack, pitting, crevice corrosion and stress corrosion cracking

19 p2815 A72-37446

Cathodic protection and hydrogen in stress corrosion cracking.

19 p2817 A72-37765

Stress corrosion cracking of 18% Cr ferritic stainless steels.

19 p2820 A72-38300

Effect of additions of Cu and Zr on stress corrosion cracking of Al-Mg alloys.

19 p2820 A72-38370

A study of the mechanical behaviors of austenitic stainless steels in the process of stress corrosion testing.

19 p2820 A72-38372

The role of metal dissolution in the process of stress corrosion cracking of austenitic stainless steel.

19 p2821 A72-38374

Interpreting electron fractographs of stress corrosion in aluminum alloys.

19 p2821 A72-38387

Effects of small amounts of additional elements on stress corrosion cracking of Al-Zn-Mg alloys. VI.

19 p2821 A72-38555

Use of acoustic emission for the detection of weld and stress corrosion cracking.

20 p2925 A72-39283

Electrochemical protection potential of metals and alloys in pitting, intergranular corrosion and stress corrosion cracking in presence of chlorides

21 p3065 A72-40087

Designing to avoid stress-corrosion and/or fatigue failures.

[AICHE PAPER 15C]

21 p3116 A72-40125

Stress-corrosion cracking of high strength steels and titanium alloys.

21 p3067 A72-40849

Analytical fracture mechanics application to stress corrosion cracking test methods for examining crack growth kinetics and time-to-failure

21 p3067 A72-40913

Brittle striation formation role in corrosion fatigue crack propagation mechanism in Al-Zn-Mg alloy from test in NaCl solution under reversed anodic-cathodic current

22 p3193 A72-43033

Differentiating stress corrosion cracking from hydrogen cracking of ferritic 18-8 stainless steels.

22 p3195 A72-43127

The effect of some electrolytes on the stress corrosion cracking of AISI 4340 steel.

22 p3195 A72-43128

Influence of the cycling frequency on the fatigue and corrosion fatigue of steel samples with bushings

22 p3242 A72-43155

STRESS CYCLES

Metal crystals dislocations movements and interactions with dislocation dipole under applied cyclic stresses for various configurations and starting conditions, using numerical methods

01 p0113 A72-10208

Tensile and fatigue tests on steel, brass and aluminum with starter cracks, showing relation of strength and ductility to crack propagation and stress cycles

01 p0083 A72-10392

Combined bending/torque fatigue test machines design, operation, calibration and results, developing probabilistic S-N diagram from cycles-to-failure data statistical analysis

02 p0199 A72-11514

Automatic recording of cyclic creep and strain curves for metals under low cycle static tension

03 p0444 A72-13468

Fatigue failure under cyclic stress, analyzing surface and temperature effects

03 p0372 A72-13588

Optimal cyclic fatigue strength of low C steel from critical deformation rate during thermomechanical treatment

03 p0372 A72-13597

Fatigue cracks nucleation in steel bearings subjected to cyclic contact stresses

03 p0377 A72-14020

Structural inhomogeneities effect on fatigue phenomenon in rolling motion, discussing stress cycles preceding active surface degradation

04 p0526 A72-14473

Cyclic strain accumulation induced creep behavior prediction via plasticity model, considering non-homogeneous stress states

[ASME PAPER 71-APM-NN]

04 p0589 A72-15179

Vibrations effect on corrosion rate by experimental method, comparing reaction kinetics on two specimens with and without alternating stresses

04 p0591 A72-15237

Dislocation substructure in fatigued Al and Ni polycrystals surface layer and interior due to high and low stress cycling, discussing stacking fault energy influence

04 p0534 A72-15577

Rotating shaft fatigue under variable stress cycles, determining safety, bending and torque coefficients

04 p0594 A72-15750

Elastoplastic creep analysis for cylindrical pressure vessel structural response during cyclic thermal shock, internal pressure and extended high temperature loading [ASME PAPER 71-WA/PVP-12]

05 p0732 A72-15911

Crack growth dependence on applied high stress level cycle number, showing fatigue life inversely proportional to stress exponential function

05 p0673 A72-16304

High temperature low cycle fatigue of Cr-Mo-V steel, observing crack growth rate correlation with crack tip stress

05 p0673 A72-16321

Plastic zone formation and fatigue crack propagation rate during high cyclic bending of metals

05 p0674 A72-16326

Microvolume decohesion hypothesis for crystal lattice defects explaining metal fatigue under variable stresses

06 p0829 A72-17743

Hardened and tempered Ni-Cr-Mo steel, testing rest periods caused fatigue life increase in terms of cycles to failure

06 p0895 A72-17802

Fatigue damage factor and failure probabilities in structural design for multilevel repetitive cyclic stresses

06 p0896 A72-17965

Deformation stresses and strains in quasi-static low cycle fracture of stabilizing, softening and strain hardening materials

06 p0831 A72-18352

Steel sheet creep, plastic deformation and service life under temperature and stress cycles

06 p0899 A72-18558

High temperature fatigue test assembly for symmetric tension compression cycles at 10 kHz with specimen heating in resistance furnace

06 p0797 A72-18568

Small elastoplastic cyclic strain effects on internal friction and energy dissipation in metals during vibrations

06 p0834 A72-18679

Stress variation effect on strength values obtained by low cycle fatigue tests involving bending with rotation

07 p1014 A72-19847

Ni based superrefractory alloy high temperature fatigue tests, studying creep as function of stress load and frequency and temperature

07 p1022 A72-20487

Epoxy and polyester resin fatigue fracture tests for cyclic stress and moisture effects

08 p1192 A72-21680

Mechanical surface strengthening effect on small cycle fatigue life of Ti alloy weakened by stress raiser

08 p1186 A72-21725

German monograph on fracture formation and behavior in Ni maraging steel under repeated stress alternations, considering Al and Ti effects on steel strength

08 p1190 A72-22172

Structural model application to construction material alternate stress description at elevated temperatures

09 p1401 A72-22727

Creep ratchetting deformation and rupture damage from thermal transient stress cycle and constant membrane force under high temperature metal creep conditions

09 p1406 A72-23197

Polycrystalline Mo fatigue behavior under cyclic stresses, discussing grain size effect on fatigue life and relationship between cycle dependent yield and French damage line

11 p1658 A72-25830

Cylindrical samples with deep circular hyperbolic notch, investigating cyclic inelastic strain induced stress redistribution effects on load bearing capacity

12 p1830 A72-28229

Microcrack initiation and propagation in ductile metals at low cycle and ultrasonic frequencies, investigating fatigue fracture mechanism by scanning electron microscope

15 p2256 A72-31838

Acoustic emission from carbon fiber-epoxy composite during continuous tensile stress cycling

16 p2413 A72-32868

Cyclic compressive fatigue cracking tests of prenotched fiber reinforced epoxy materials at low stress

16 p2414 A72-33319

Deformation substructures in stainless steels under low cycle high strain fatigue tests evaluation for application as fuel cladding for fast breeder reactors

16 p2411 A72-33825

Understressing and coxing cycles effect on deeply notched carbon steel fatigue behavior, emphasizing crack initiation and breakdown

16 p2472 A72-33947

Rheological model for creep under intermittent square wave stress pulses, taking into account time dependent dislocation density

16 p2412 A72-34113

Strengthening mechanism in metals during creep under variable stress for dislocation network structure studies

16 p2475 A72-34164

Fatigue crack initiation and propagation in welded structures, considering low and high cyclic stresses, microstructure and environment effects

17 p2635 A72-35919

Creep damage role in governing elevated temperature strain cycling fatigue lives of heat resistant stainless steel and cobalt alloy

19 p2817 A72-37712

A certain generalization of the hysteresis loop contour equations to the case of an asymmetric cycle

19 p2876 A72-38003

Stress dependent cyclic creep rupture tests of Ti and Co-base alloys and stainless steel at 1300 F

20 p2938 A72-39305

Dynamic strength of tangentially wound toothed blade roots

20 p2979 A72-39586

Cyclic stress-strain induced buckling and fatigue failure in cold-rolled steel and tabulating and diagramming mechanical properties

21 p3065 A72-40233

A study on the correlation between thermal fatigue and low-cycle fatigue at elevated temperatures.

21 p3119 A72-41008

Low carbon steel S-N diagram for stresses ranging to fatigue limit, noting cyclic creep, macroplastic cyclic stress and fatigue failure

21 p3122 A72-41353

Thermoplastics fatigue life dependence on stress with allowance for heating laws, noting heat accumulation effect on thermal failure

22 p3196 A72-42164

Dislocation pile-ups in periodic internal stresses.

22 p3214 A72-42316

Effect of cyclic stress wave form on corrosion fatigue crack propagation in Al-Zn-Mg alloys.

22 p3194 A72-43043

Low cycle fatigue under biaxial strain controlled conditions.

23 p3354 A72-44259

A comparison of the axial and reversed-torsional strain cycling low-cycle fatigue strength of several structural materials.

23 p3304 A72-44397

The stress-strain relation in the low-cycle fatigue of metallic materials under rotating-beam bending.

24 p3454 A72-44626

The cyclic plastic strain and cumulative fatigue damage - Fatigue damage caused by the stress below the fatigue limit.

24 p3454 A72-44628

The fatigue strength under varying mean stress.

24 p3455 A72-44629

Automatic recording of cyclic creep and strain curves for metals under low cycle static tension

24 p3458 A72-44943

Deformation stresses and strains in quasi-static low cycle fracture of stabilizing, softening and strain hardening materials

24 p3460 A72-45739

Cyclic loading effects on resistance to brittle fracture of low carbon structural steels, using crack width criterion

24 p3416 A72-45740

STRESS FUNCTIONS

Elastic incompressible isotropic transparent media, deriving photoelastic effect relationship to stress function

01 p0089 A72-10123

Hydrogen chemical permeation through iron and steel as function of compressive and tensile stress

01 p0083 A72-10206

Finite plasticity incremental and total strain theories for nonproportionate loading of circular steel and Al alloy torsion-tension members assuming von Mises yield

[SESA PAPER 1901]

02 p0288 A72-11519

Isothermal uniaxial stress analysis of material consistent with linear law of heredity theory, determining viscoelastic relaxation function

02 p0290 A72-11621

Fatigue breakdown and energy dissipation dependence on stress during bending of cylindrical steel and iron specimens

03 p0372 A72-13589

Shallow spherical shell natural vibration frequencies, deflection and stress function, discussing effects of internal pressure, dimensions and material properties

03 p0453 A72-14209

McNamee-Gibson displacement potential functions generalization to problems for compressible pore fluid in theory of consolidation or thermoelasticity

03 p0455 A72-14389

Effective plastic strain for Tresca and von Mises materials, investigating hot rolled mild steel specimens

04 p0590 A72-15187

Continuous linear elastic systems characteristic vibrations differential operator eigenvalues lower bounds calculation, obtaining Green integral operator first invariant upper bound via stress function

04 p0540 A72-15706

Thermal stresses in thin symmetrically heated disk with time and temperature dependent mechanical properties, deriving integrodifferential equation defining stress function

05 p0740 A72-16624

Dual stress, strain and displacement formulations of linear finite element elasticity, showing Finzi stress function applicability

07 p1087 A72-18780

Stress functions for anisotropic elastic body with uniformly propagating circumferential crack, considering axially orthotropic cylinder

10 p1553 A72-23744

Von Mises yield criterion extended to thin walled circular cylinder plastic torsional straining, noting variations of anisotropic parameters and yield stresses with shear strain

[ASME PAPER 71-MET-Y]

11 p1735 A72-25877

Hybrid cylindrical shell finite element, determining natural frequencies from equilibrium equations, stress functions stress-strain relationships and boundary force transfer matrices

12 p1882 A72-27339

Stress boundary value problems for infinite wedges in linear elasticity theory solved by Mellin transforms

12 p1883 A72-27561

Thick rectangular plate stress functions under linear tensile forces application to longitudinal edges and resultant forces application to transverse edges

13 p2055 A72-28735

Tangential stresses, rigidity characteristics and stress functions of prismatic grooved circular shafts, showing summary representations and integral transformations methods interrelationship

13 p2057 A72-29062

Tangential displacements of spherical and circular cylindrical shallow shells calculated from stress function

13 p2059 A72-29490

Stress function method for calculating stress-strain state in homogeneous shallow spherical shell under arbitrary load

15 p2324 A72-31485

Schaefer stress representation for elastokinetics of linearly elastic isotropic homogeneous body under small deformations and torsions

15 p2324 A72-31486

Thermoelastic stress analysis for hollow cylinder heated along helix, calculating stress function for given surface temperature distribution

15 p2333 A72-32687

On the two-dimensional deformation of a semi-infinite porous elastic medium.

16 p2736 A72-36929

Thermal stability of skewed plates

19 p2871 A72-37430

Plate bending analysis with hybrid triangular and rectangular finite elements, deriving stiffness matrix via optimized stress functions

20 p2979 A72-39556

Stress functions in three-dimensional elastodynamics.

21 p3117 A72-40677

Constant strength shells theory generalization from axially symmetric to nonsymmetric case, using Von Mises yield condition

21 p3117 A72-40680

Non-linear elastic constitutive equations.

21 p3125 A72-41514

Weight minimization for elastic circular plates of variable thickness under uniformly distributed load with given stress function conditions

22 p3232 A72-41896

Glassy materials rheological behavior description in terms of stress function, discussing molecular processes transformation range thermodynamics

22 p3196 A72-42791

Stress-strain state induced by local physicochemical transformations in a layer

22 p3242 A72-43164

Stress function for thermal shock in plate with cylindrical heat source, noting thermal stress concentration in optical materials under electromagnetic radiation

23 p3348 A72-43792

Elastic and plastic deformations in torsional moment loaded rod, noting successive approximation for stress functions

23 p3348 A72-43794

Two-dimensional problem of elasticity theory for an anisotropic inhomogeneous wedge

24 p3459 A72-45263

Castigliano variational theorem for algebraic equation solution of thermal stresses determination in elastic parallelepiped, using Maxwell stress functions as cosine binomial series

24 p3459 A72-45267

STRESS MEASUREMENT

NT X RAY STRESS MEASUREMENT

Airport apron surface pavement strain measurements under field loading conditions, considering static and dynamic loads with finite element method

01 p0047 A72-10192

Tensometric damage detection in rolling contact bearings from bending stress spectrum, using Si strain and wire strain gages

01 p0078 A72-11379

Strain gage measurements of stress intensity factor for crack propagation in fatigue cracked thin metal sheets

03 p0444 A72-13542

Griffith crack propagation in polymethyl methacrylate, examining stress changes by photoelastic method

03 p0380 A72-13719

Flow stress measurements in disordered and partially ordered Ni-Ta alloy single crystals, correlating with ordered phase volume fraction and domain size

04 p0534 A72-15272

Strain gage system for low amplitude strain measurement, discussing SNR and installation technique

04 p0523 A72-15495

Turbulence intensities and shear stress measurements in wake of thin flat plate by rotating single hot-wire anemometer

04 p0524 A72-15498

Stress measurement at surface of polycrystalline bodies by nondestructive X ray diffractometry method

04 p0525 A72-15553

Test conditions, specimen batch and method effects on accuracy of rapid fatigue limit tests with increasing stress amplitude

05 p0741 A72-17085

Principle stress errors in biaxial stress fields expressed in terms of transverse sensitivity, stress and Poisson ratios of material during strain gage calibration

06 p0895 A72-17798

Residual stress measurements in metals by annular photoelastic gages, obtaining relationship to fringe orders

06 p0818 A72-18317

Elastic-plastic strain measurement on flat steel surfaces by moire gratings, using electroluminescent source and crossing jig

06 p0818 A72-18323

Single fiber reinforced plate initial stress distribution due to linear expansion coefficients difference between matrix and fiber, using optical polarization

06 p0836 A72-18557

Bridge circuit to minimize parasitic electrical disturbances in resistance strain gage measurements of dynamic stresses in impact tests

06 p0819 A72-18672

Stress relaxation measurement assembly for polymer film and fiber samples under tensile stresses at 213-573 K

07 p0986 A72-19779

Automatic photoelectric device for measuring internal stresses and deformations of photographic films

07 p0988 A72-19861

Internal strain measurement in solid elastomeric materials by radioactive implant method using pinhole camera or multichannel collimator

07 p0992 A72-20583

Strain measurements by holographic interferometry, considering data input to computer by digitization of video signals

08 p1163 A72-20917

High temperature strain measurement accuracy improvement by gage spot welding

08 p1163 A72-20920

Thermal stress measurement and thermoelastic behavior of carbon-carbon-materials for reentry nose

STRESS DISTRIBUTION

U STRESS CONCENTRATION

cones, describing gage mounting, temperature compensation and data recording
08 p1164 A72-20921

Basal and prismatic crystal dislocations in Be, measuring critical resolved shear stress dependence on temperature at 300-500 K
08 p1185 A72-20991

Automated mechanical system for solid propellant sheet stretch tests in two directions as function of time
08 p1147 A72-21331

Plastic flow properties and stress measurement for metal working conditions with flat ring compression specimens and interfacial friction consideration
08 p1250 A72-22196

X ray method characteristics in thermal interphase microstresses determination, considering spherical silicon inclusion surrounded by concentric Al matrix envelope
09 p1309 A72-22638

Photothermoelasticity method for determining thermal stresses
09 p1402 A72-22737

Static strain measurement errors due to nonstationary thermal conditions in semiconductor resistance gages
09 p1310 A72-22739

Semiconductor IC transducers for electrical readout of optical radiation, mechanical stress and magnetic field strength
10 p1448 A72-24282

Stress distribution determination by shear stress difference method in curvilinear orthogonal coordinate systems
10 p1557 A72-24405

Elastic r-value variation in Ti sheet from direct measurement of width and thickness strains
11 p1659 A72-25895

Isotropy postulate corollary verification for strain vectors measurement of annealed steel tubular specimens under combined tension and internal pressure
12 p1887 A72-28232

Physical operation principles of semiconductor sensors using deformation potential for mechanical stress detection and measurement
14 p2104 A72-30445

Case bonded solid rocket propellants mechanical strength characteristics determination by photoelastic stress measurements or viscoelastic calculation
14 p2145 A72-30765

Holographic interferometry for strain measurements in bodies, obtaining frozen interference fringes for stressed plane mechanical component via double exposure
14 p2105 A72-30840

Embedded piezoelectric quartz crystal transducer with Hopkinson pressure bar to measure internal dynamic stress
15 p2240 A72-32433

Stresses in a welded diaphragm due to boundary contraction and normal uniform pressure.
[SESA PAPER 1811]
17 p2631 A72-34821

Two-phase crystal structure microdeformation measurement by combined holographic interferometry and X ray diffraction
18 p2690 A72-36358

Mechanical structure and component stress measurement by reinforced concrete, microconcrete, elastic and plastic models
18 p2733 A72-36370

Program-controlled machine for the investigation of mechanical properties of materials under a complex stress.
19 p2795 A72-37575

Holographic strain measurement on a tensile specimen.
19 p2798 A72-37615

Ceramic coatings measure the complex stresses in gas-turbine blades.
19 p2875 A72-37732

The effect of wire length and separation on X-array hot-wire anemometer measurements.
19 p2801 A72-37903

Stress sensitive device based on anisotropic conductivity of multivalley semiconductor under uniaxial stress
20 p2961 A72-39713

Pressure dependence of electrical characteristics of semiconductor sensors using deformation potential for mechanical stress detection and measurement
21 p3056 A72-41109

A measurement of the surface strain distribution by optical differentiation method.
21 p3056 A72-41239

Measurements of Reynolds shear stress fluctuations in a turbulent boundary layer.
21 p3047 A72-41638

Chemical etchants and etching procedure for decorating areas of residual tensile elastic surface stresses in ultrahigh strength steels without aging
22 p3183 A72-43045

Experimental investigation of displacements and stresses in a rod during impact loading
23 p3348 A72-43795

Full-field surface-strain and displacement analysis of three-dimensional objects by speckle interferometry.
23 p3349 A72-43984

Unsteady flow field near wall and Reynolds stress measurement in turbulent boundary layer, using conditional sampling technique with digital computer
23 p3282 A72-44304

The structure of turbulent flows adjacent to walls.
24 p3390 A72-45001

STRESS PROPAGATION

Longitudinal stress pulse amplification during propagation along tapered elastic bars in direction of decreasing cross section
[SESA PAPER 1894]
02 p0287 A72-11504

Initially sharp cylindrical pressure pulse propagation and stress wave attenuation in linear elastic fiber reinforced composites
[AIAA PAPER 72-394]
11 p1730 A72-25415

Longitudinal propagation of elastic disturbance in conical rod, discussing Young modulus, material density and periodic and impulsive stress
11 p1737 A72-26589

Geometrically nonlinear structure elastic stress propagation, deformation and dynamic response under impact, using finite element matrix displacement method and computer programs
12 p1879 A72-27189

Fourier transform approximate inversion solution for transient pulse propagation from spherical cavity with surface under impulsive pressure in viscoelastic medium
12 p1844 A72-27196

Stress wave propagation and fracture in composites, discussing micromechanical and homogeneous-continuum theories
13 p2060 A72-29692

Transient stress pulses propagation in obliquely laminated composites, comparing analytically predicted waveforms with experimental results
13 p2060 A72-29693

Interacting continua theory for stress wave propagation in composites with microstructural stress and displacement fields, discussing elastic and viscoelastic materials behavior
13 p2060 A72-29695

Longitudinal impact of cylindrical shells with discontinuous cross-sectional area.
[ASME PAPER 72-APM-24]
17 p2628 A72-34793

Reflection of pulses at the interface between an elastic rod and an elastic half-space.
23 p3314 A72-44119

STRESS RATIO

Cyclic stress ratio effects on stainless steel fatigue crack propagation at 1000 F, using linear elastic fracture mechanics
12 p1829 A72-27663

STRESS RELAXATION

Rheological properties and architecture of arterial walls, using stress relaxation and stress-strain hysteresis tests on dog aorta, iliac and femoral strips
01 p0010 A72-10184

Stress relaxation resistance at elevated temperatures after reloading as function of internal and effective stress
01 p0138 A72-10520

Isothermal uniaxial stress analysis of material consistent with linear law of heredity theory, determining viscoelastic relaxation function
02 p0290 A72-11621

Quenching effects on thoria-dispersed Ni sheet plastic stress relaxation and room temperature mechanical properties
02 p0247 A72-12822

Screw connections high temperature behavior, discussing creep induced tension relaxation and cyclic loads long term tolerance
03 p0363 A72-13375

Thermodynamic and dissipative restrictions on isothermal stress relaxation functions in linear viscoelasticity
04 p0583 A72-14462

Distensibility and stress relaxation characteristics of capacitance and resistance vessels of isolated rabbit ear as function of basal tone
04 p0473 A72-15124

Cylindrical shell under internal pressure, detailing axial thermal stresses relaxation
06 p0900 A72-18669

Rutile creep resistant substructure recovery at 1000-1040 C, discussing stress relaxation mechanism due to dislocation walls or subgrain boundaries migration
07 p1023 A72-18800

Increased microplastic deformation resistance, relaxation stability and aging of beryllium by cyclic heat treatment
07 p1013 A72-19740

Stress relaxation measurement assembly for polymer film and fiber samples under tensile stresses at 213-573 K
07 p0986 A72-19779

Refractory alloys softening under stress relaxation conditions at high temperatures, noting plastic strain hardening effect absence
07 p1018 A72-20138

Polyurethane O ring seals for high pressure applications, discussing stress relaxation /creep/ behavior, resilience and tear and abrasion resistance
08 p1173 A72-21023

Nonlinear viscoelastic body model for stress relaxation of amorphous linear polymers below vitrification temperature for various deformations, temperatures and deformation speeds
08 p1194 A72-21751

Stress and thermal relaxation effects in viscoelastic behavior of turbulent flows of liquids and gases
10 p1464 A72-23867

Dimensional stability and micromechanical properties of materials for use in OAO, investigating residual stresses, creep properties and stress relaxation
[AIAA PAPER 72-325]
11 p1653 A72-25362

Residual stresses and stress relaxation determination in electrochemical galvanic coating with automatic strain curve plotter
11 p1613 A72-26264

Dynamic relaxation critical damping estimation in terms of mass dependent load vector concept involving vibration and Rayleigh principle
12 p1844 A72-27197

Quenched beryllium bronze alloy plastic deformation effects on anomalous and ordinary stress relaxation processes
12 p1828 A72-27292

Stress relaxation in anelastic materials, calculating spectra, complex modulus of elasticity and internal friction
12 p1883 A72-27541

Gamma irradiation effects on epoxy-diane resin creep and stress relaxation properties indicated by loaded specimens birefringence patterns
13 p1984 A72-29481

Strain release method for investigating thermally activated microflow mechanisms in solids, discussing technique for activation energy and relaxation strength measurements
16 p2372 A72-32822

Bauschinger effect analysis based on yield theory, noting effects of stress relaxation and isotropic hardening
16 p2471 A72-33786

Graph-analytic technique to plot Cr steel stress relaxation curve from primary and isochronous creep diagrams
16 p2472 A72-33848

Second order deformation theory for axially held strut during thermal cycling at creep relaxation temperature, using galerkin method with assumed sine wave
16 p2473 A72-34124

Load cycle frequency and time characteristic effects on plastics fatigue behavior, considering relaxation, retardation and internal damping induced heating effects
16 p2416 A72-34145

Grain-boundary relaxations in an Fe-Ni-Cr alloy.
18 p2700 A72-36588

Temperature-time superposition applied to the relaxation properties of a glass fiber reinforced plastic and its binder
19 p2822 A72-37543

Combined stress creep of non-linear viscoelastic material.
19 p2822 A72-37714

Modified Gilman equation relating dislocation velocity to applied effective stress shown in agreement with stress relaxation experiments on Ti
22 p3189 A72-42436

A comparison of single-integral non-linear viscoelasticity theories.
24 p3460 A72-45695

Refractory alloys softening under stress relaxation conditions at high temperatures, noting plastic strain hardening effect absence
24 p3416 A72-45763

STRESS RELIEVING

Ti-Al-V room temperature creep, considering tensile and torsional loading, plastic deformation, stress relief and design limitations
03 p0377 A72-14171

Transverse strains in solid body due to volumetric stresses counteraction to external load stresses
06 p0899 A72-18566

Aircraft light alloy integral construction for stress concentration and fatigue failure avoidance, describing continuous casting process, stress relieving and ultrasonic flaw testing procedures
07 p0995 A72-19725

Heat treated Al alloy forgings stress relief by cold deformation between quench and age, examining effect on tensile properties and residual stresses
[ASM PAPER W 72-53,1]
12 p1817 A72-28165

Stress relieving heat treatment for service failure prevention of stressed austenitic stainless steel components of high temperatures, noting cracking regulation by oxidation mechanism
14 p2117 A72-30538

Flow-stress recovery of nickel-aluminum alloys.
23 p3299 A72-43563

Recovery of high temperature deformed Ni-Al alloys.
23 p3300 A72-43564

STRESS RUPTURE STRENGTH

U CREEP RUPTURE STRENGTH

STRESS TENSORS

- Stress tensor asymmetry effects on stress concentration at curvilinear holes in elastic plates under tension 02 p0289 A72-11611
- Elastoplastic deformation in medium with initial dislocations and temperature field, expressing kinetic stress and distortion tensors by Hamiltonian derivatives 02 p0290 A72-11630
- Polarization and stress tensor characteristics as function of interaction between mechanical, thermal and electromagnetic processes in elastic isotropic dielectrics 03 p0390 A72-14103
- Infinite elastic isotropic multiply connected plate, determining stress-strain state by asymmetric stress tensors and moment stresses 03 p0451 A72-14119
- First approximation of linear elastic shell theory using split constitutive equation of stress tensor 03 p0454 A72-14341
- Continuous bodies incremental deformation and stability under initial stress, discussing relationships for elasticity constants and material stress tensors [ASME PAPER 71-WA/APM-9] 05 p0734 A72-15970
- Subgroup structure of symmetry group G of stress tensor for stored energy function in hyperelasticity 06 p0893 A72-17302
- Isotropic and anisotropic materials strength criteria and boundary surfaces in invariant stress tensor spaces 06 p0898 A72-18553
- Flexure analysis of isotropic Reissner flat plates bonded by adhesive layer, deriving stress distribution equations in general tensor form [AIAA PAPER 71-148] 07 p1089 A72-19688
- Thirteen moment closed system of approximate integral equations for rarefied gases density, velocity, temperature, stress tensor and thermal flux vector 09 p1259 A72-22425
- Boltzmann equation solution in terms of irreducible spherical tensors and Talmi coefficients, calculating stress tensor for fully ionized plasma in strong magnetic field 09 p1341 A72-22681
- Anisotropic plate theory for perfectly plastic flow, expressing yield condition in terms of mixed stress-anisotropy tensors 09 p1403 A72-22765
- Book on tensor analysis and continuum mechanics covering strain, permutation and stress tensors, vector and tensor comparison, application to elasticity and shell theory, etc 09 p1406 A72-23000
- Turbulent flow time averaged description by Navier-Stokes equations, determining Reynolds number dependent stress tensor coefficients 11 p1615 A72-25722
- Elastic inhomogeneous continuum stability dependence on internal stress tensors field and boundary conditions, noting application to composite materials 12 p1843 A72-27171
- Turbulence model based on transport equations for Reynolds stress tensor and energy dissipation rate, deriving simplified version for boundary layer flows 12 p1798 A72-27830
- Almansi strain tensor comparison with Lamé elastostatics equations, noting distinction between strained and unstrained state 15 p2330 A72-32291
- Depolarized light scattering spectra splitting in nonassociated liquids, noting viscoelastic theory with allowance for antisymmetric part of microscopic stress tensor 16 p2428 A72-32950
- Nonlinear thermoelasticity theory extension via entropy production inequality theorem, deriving expressions for stress tensor and heat conduction vector 16 p2465 A72-32980
- First and second order shock discontinuity waves propagation in thermoelastic incompressible solids, deriving Piola-Kirchhoff stress tensor via Clausius-Duhem relation 16 p2423 A72-33109
- Non-analytic character of the shear-tensor distribution function in incompressible turbulence. 18 p2678 A72-36012
- Propagation mechanism of tensor wave in solid elastic body due to impact. 18 p2734 A72-36377
- Microinhomogeneous elastic media with moduli tensor as coordinate random function, investigating stress and strain tensors 18 p2735 A72-36668
- Stokes fluids nonlinear effects on turbulent flow with lateral shear in terms of stress and deformation tensors 19 p2785 A72-37470
- Extension of the Curie principle and constitutive relations for fluids with antisymmetric stress. 22 p3166 A72-42311

Plane problem of elasticity theory for known normal and tangential stress tensor components at boundary of simply connected region, calculating stress concentration 23 p3344 A72-43353

A new variational principle for finite elastic displacements. 23 p3350 A72-44047

Photoelastic verification of a mechanical model for the flow of a granular material. 24 p3460 A72-45697

STRESS WAVES

- Electromagnetic plane stress wave generation by capacitor bank for transient loading of photoelastic models along straight and curved boundaries [SESA PAPER 1907A] 02 p0199 A72-11503
- Beams and plates resting on elastic base with loads moving along line or strip, calculating wave processes based on half space dynamic model 02 p0290 A72-11629
- Stress waves propagation in woven-fabric composites, obtaining dynamic moduli and vibration damping coefficients by resonance technique [AD-736006] 02 p0291 A72-11984
- Finite amplitude stress wave propagation behind shock in unidirectionally reinforced fiber matrix composites under impact loads 04 p0585 A72-14534
- Discrete variable approach for stress wave propagation in axisymmetric layered elastic-plastic solids 04 p0593 A72-15626
- Error bounds on elastic-plastic strain wave measurements, considering one dimensional wave propagation in seminfinitesimal bar [ASME PAPER 71-MET-W] 05 p0731 A72-15789
- Combined stress wave propagation in thin wall prestressed tube under longitudinal and torsional impact loading 06 p0898 A72-18321
- Composite elastic beams equations under initial stress, investigating flexural wave propagation and structural stability 07 p1090 A72-19733
- Brittle fracture dynamics, deriving motion equations and stability conditions of surface cracks under stress waves from energy balance and angular momentum conservation law 09 p1404 A72-22916
- Stress wave reflection and transmission at interfaces between homogeneous isotropic linear elastic materials 09 p1353 A72-23501
- Photoelastic studies of plane stress fields in plate induced by moving loads at subsonic, transonic and supersonic speeds 10 p1553 A72-23746
- Stress wave surfaces in graphite fiber-epoxy matrix anisotropic plates under transverse impact forces, using Mindlin approximation theory 10 p1555 A72-24255
- Two dimensionally reinforced quartz-phenolic composite material dynamic fracture behavior under stress wave loading in uniaxial strain, noting spallation threshold time dependence 11 p1669 A72-25291
- Initially sharp cylindrical pressure pulse propagation and stress wave attenuation in linear elastic fiber reinforced composites [AIAA PAPER 72-394] 11 p1730 A72-25415
- Laser-interferometer instrumentation for shock stress wave measurements in solids, using velocity and displacement techniques 12 p1808 A72-27638
- Stress wave propagation and fracture in composites, discussing micromechanical and homogeneous-continuum theories 13 p2060 A72-29692
- Interacting continua theory for stress wave propagation in composites with microstructural stress and displacement fields, discussing elastic and viscoelastic materials behavior 13 p2060 A72-29695
- One dimensional wave equation for stress wave propagating at variable velocity for case of monotone decreasing rate 15 p2327 A72-31738
- High amplitude ultrasonic stress waves effect on metals elastic and plastic deformation characteristics, verifying model for sound waves-lattice structure interactions 15 p2328 A72-31842
- Strain rate history effects on stress incremental wave front propagation in elastic bars, considering Taylor-Karman-Rakhmatulin theory 16 p2466 A72-33103
- Metal fracture by electron pulse generated stress waves, noting intergranular fracture mechanism 16 p2472 A72-33845
- A lattice model for stress wave propagation in composite materials. [ASME PAPER 72-APM-52] 17 p2627 A72-34778
- An analysis of the split Hopkinson bar technique for strain-rate-dependent material behavior. [ASME PAPER 72-APM-26] 17 p2628 A72-34792

Stress pulse attenuation in cloth-laminate quartz phenolic. 17 p2571 A72-35284

Stress wave propagation observation in rigid high modulus epoxy polymer by slow motion photography, noting photoelastic properties and viscosity effect 18 p2734 A72-36380

Gage-length errors in the resolution of dispersive stress waves. 19 p2800 A72-37729

Strongly coupled stress waves in heterogeneous plates. 20 p2980 A72-39616

Crack tip vicinity stress generated by plane transient tension-stress wave diffraction, examining ductility effects on fracture modes 21 p3117 A72-40672

Use of stress wave emission for nondestructive testing of materials and articles. 21 p3061 A72-41720

STRESS-STRAIN DIAGRAMS

- Solid rectangular beams under bending tests, obtaining tension-compression stress-strain curves 01 p0141 A72-11002
- Static and dynamic load measurements for stress-strain behavior and load-time characteristics of aerodynamic decelerator canopy fabrics, using metal foil strain gages 02 p0287 A72-11507
- Tube and hollow sphere revolving in thermal flux under surface pressure load, obtaining stress-strain state and random temperature dependences of creep 02 p0289 A72-11618
- Creep theory by rheonomic body interpretation as controlled system with unknown vectors at input and output, obtaining stress-strain curves for experimental verification 02 p0289 A72-11620
- Stress-strain characteristics of stochastically reinforced materials of high rigidity orthotropic elastic layers alternating with isotropic elastic or viscoelastic layers 02 p0248 A72-11623
- Nonlinear viscoelasticity theory, considering simplified stress-strain functional relationships with respect to time based on isotropy postulate 02 p0290 A72-11624
- Ultrasonic measurement of orthotropic laminated composites elastic moduli, describing stress-strain response [AD-736007] 02 p0249 A72-11994
- Deformable stainless steels empirical diagram for structural state estimation from chemical composition, considering various austenite, martensite and ferrite combinations 02 p0243 A72-12241
- Yield relationship to coupling of plastic waves, obtaining stress-strain diagrams 02 p0297 A72-12613
- Highly elastic cylindrical layer reinforced with anisotropic shell, deriving stress-strain state and nonlinear elastic stability 02 p0299 A72-12687
- Straight beams and rectangular frames stress-strain calculation under pulsed loading, taking into account shock waves finite propagation velocity and internal damping 02 p0300 A72-12855
- Cumulative damage in metal fatigue, suggesting unified theory applicable to stress or strain controlled conditions 03 p0442 A72-12922
- Microinhomogeneous elastoplastic cyclically strain hardenable material under symmetric loading, calculating stress-strain relationship 03 p0443 A72-13453
- One dimensional heat insulated structure under dynamic loads, showing thermoviscoelastic effects on spontaneous heating and stress-strain state 03 p0444 A72-13460
- Stress-strain state determination for plane orthotropic bodies by optical polarization method, discussing numerical methods for stress and strain tensor components 03 p0445 A72-13580
- Elastic-plastic stress-strain analysis of beams with uniform cross section under combined loadings by finite element method 03 p0449 A72-13975
- Stress-strain state of shallow shells of positive Gaussian curvature loaded by arbitrary concentrated force 03 p0450 A72-14106
- Circular disk with external radial cracks, obtaining limiting equilibrium stress-strain state through singular integral equation solution 03 p0451 A72-14115
- Elastic plates with moduli of elasticity variable in tension and compression, deriving plane stress-strain relations 03 p0451 A72-14118
- Infinite elastic isotropic multiply connected plate, determining stress-strain state by asymmetric stress tensors and moment stresses 03 p0451 A72-14119

Pressurized vessel bottoms weakened by central hole with edge stiffened by elastic ring, determining stress-strain state and stress concentration 03 p0451 A72-14120

Doubly connected strain-hardened thin plate, calculating stress concentration and stress-strain state by variational principle of least additional potential energy 03 p0451 A72-14122

Stress-strain state of transverse isotropic plate with hole under bending and torsional moments 03 p0452 A72-14136

Stress-strain state of shallow shell with crack along principal curvature line, discussing membrane stresses in plates and spherical shells 03 p0453 A72-14140

Anisotropic media elastoplastic behavior, developing plastic deformation theory from stress-strain relationships for linearly elastic media 03 p0454 A72-14216

Biharmonic problem of displacements in plane theory of elasticity, analyzing stress-strain state by iterative solution in series form 03 p0454 A72-14312

Stress-strain increment relations for materials with different compression and tension resistance under orthogonal loading 04 p0586 A72-15007

Stress-strain tensor component relations for isotropic elastic bodies with different tension and compression resistance 04 p0586 A72-15008

Stress-strain state of thin ellipsoidal shell with central stiffened hole, using small elastoplastic deformation theory 04 p0588 A72-15050

Optimal temperature field s and stress-strain state in orthotropic conical and cylindrical shells subject to local heating 04 p0588 A72-15051

Circular conical orthotropic shells of linearly variable thickness loaded by distributed and concentrated forces and moments, analyzing stress-strain state by numerical methods 04 p0594 A72-15749

Griffith fracture theory application to thermal crack propagation, computing stress-strain field and critical temperature [ASME PAPER 71-MET-N] 05 p0731 A72-15790

Compounded rotating disks stress-strain analysis from equilibrium and compatibility equations and boundary condition, comparing results with photoelastic and finite difference approximation 05 p0732 A72-15804

Metal powder materials at high loading rates, obtaining stress state diagram from Cauchy problem solution with inertia components in equilibrium equations 05 p0672 A72-16088

Stress-strain characteristics of nylon-polyurethane coated fabric under biaxial tension and shear forces 05 p0736 A72-16108

Age hardened Al-Cu single crystal anisotropy from stress-strain curves, using plane strain compression tests [AD-743602] 05 p0677 A72-17106

Large deformations of incompressible isotropic materials with parabolic stress-strain relations, deriving constitutive equation from strain energy function 06 p0848 A72-17919

Dynamic strain aging significance in titanium, observing reduction of temperature and strain rate effects on stress-strain curves shapes 06 p0830 A72-18054

Fiber reinforced materials mechanical properties, showing strength dependence on stress-strain behavior of fibers and binders and fiber volumetric proportions 06 p0835 A72-18252

FORTAN programs for calculating principal stresses, strains and directions from rosette readings 06 p0781 A72-18324

Temperature induced bending of thin freely supported rectangular plate, obtaining stress-strain state 06 p0899 A72-18564

Stress-strain diagrams of heat resistant alloys at high temperatures, describing test facility 06 p0834 A72-18684

Axisymmetric deformation of infinite cylindrical shell under stress-strain state arising from internal pressure in statistically inhomogeneous Winklerian medium 07 p1088 A72-19258

Stainless steels with improved formability developed through assessment of stress-strain curve slope and plastic strain rate 07 p1011 A72-19477

Stress-strain state determination in elastic range by net point method and matrix filtering 07 p1091 A72-19754

Stress-strain state of homogeneous isotropic medium bounded by noncanonical surfaces of revolution, using perturbation method 07 p1091 A72-19755

Stress-strain state of thin walled spherical shell in contact with internal rigid sphere, determining contact area size 07 p1091 A72-19756

Acoustic loads effect on carrying capacity and vibration stability of longitudinally stiffened cylindrical metal panels, investigating fatigue strength and stress-strain state 07 p1091 A72-19760

Material anisotropy effect on stress-strain state and limiting load in plane plastic deformation 07 p1091 A72-19764

Stress-strain state in elastic plane with small radial cracks and circular hole under hydrostatic tension 07 p1091 A72-19765

Stress-strain state relationship to crack development morphology in elastic strain region of austenitic steel sample under cyclic bending 07 p1013 A72-19769

Strength differential effect on microstructures of steels, using tensile and compressive stress-strain curves 07 p1015 A72-19927

Elasticity theory axisymmetric problem for hollow cone, analyzing stress-strain state and boundary value problem by asymptotic methods 07 p1093 A72-19980

Stress-strain state in tension of orthogonally stiffened fiberglass-reinforced plastic with cracks in transversely stiffened layers 07 p1094 A72-20128

Test facility for graphites fracture under thermal stresses, considering stress-strain relations calculation method for annular samples 07 p1024 A72-20137

Stress-strain state of unclamped thin elastic zero curvature shell under three component surface load and tangential boundary forces 07 p1095 A72-20313

Computerized dynamic simulation with graphic display of crystal plastic dislocation movement among random obstacles, emphasizing stress-strain, strain rate and thermal activation mechanisms 07 p1095 A72-20338

Stress-strain behavior of steel under elastic compression at 4.2 K, observing discontinuous twinning 07 p1020 A72-20413

Plastic stress-strain anisotropy of metals under forming for mild steel, austenitic stainless steel and Mg, showing nonconformability with Hill criterion 07 p1020 A72-20432

Axisymmetric elasticity theory problems for stress-strain state of space with spherical incision, obtaining solutions with p-analytic functions 08 p1242 A72-20960

Al single crystals relationship between stress, strain and dislocation density ring elevated temperature creep by direct observation of etch pits 08 p1185 A72-20990

Metallic matrix stress-strain properties from phenomenological model based on idealized behavior of system components, noting dependence on fiber volume content 08 p1185 A72-21183

Rheological model of reticular polymers and glass fiber reinforced plastics based on stress-strain relationship during damped creep elastic deformation 08 p1191 A72-21499

Green matrix computation algorithm extensible to spherical and toroidal closed shells of revolution for stress-strain state determination 08 p1246 A72-21672

Cicala formulas generalization and plasticity theory for deformation strain anisotropy, sliding and elastic strains influence on shear stress 08 p1246 A72-21806

Elasticity theory method for nonlinear stress-strain relationships in thin anisotropic shells, discussing fiberglass reinforced cylindrical shell 08 p1247 A72-21810

Boron and carbon fiber reinforced plastics anisotropic stress-strain properties, considering fiber misalignments curvature and low shear resistance effects 08 p1196 A72-21857

Copper, zinc and aluminum mechanical properties comparison by cyclic and steady state compressive load tests, noting stress-strain curve relationship to strain rate 08 p1188 A72-21921

Ceramic materials stress-strain behavior dependence on microstructural factors, discussing point defects, pore size and grain boundaries 09 p1334 A72-22392

Axisymmetric grid plate bending and torsion under normal forces and moment vectors loads, determining stress-strain state from finite difference equations 09 p1398 A72-22692

Grid plates of complex structure, determining stress-strain state by asymptotic solution of boundary value problem for sixth order differential equations 09 p1398 A72-22693

Stress-strain state of circular three layer laminar plates freely supported at circumference and loaded at edge 09 p1399 A72-22694

Stress-strain state produced by asymmetric physical and thermal loads in thin orthotropic viscoelastic shells of revolution 09 p1399 A72-22702

Heat conduction, stress-strain state and thermoelasticity of massive bodies of revolution under nonuniform heating 09 p1400 A72-22709

Stress-strain state of shallow shells of revolution for large displacements, reducing determination to system of nonlinear differential equations 09 p1400 A72-22714

Thermal stress-strain state analysis of nonlinear elastic medium by small parameter method 09 p1400 A72-22717

Stress-strain state of circular conical shell of linearly variable thickness within small elastoplastic deformation theory, assuming specific convective heat transfer at surface 09 p1401 A72-22722

Solid cylinder stress-strain state under thermal and mechanical loads, obtaining analytical solutions via flow theory based on Von Mises yield condition 09 p1401 A72-22723

Computer algorithm for thermoplastic stress-strain state of thin shells of revolution based on plastic flow theory, taking into account loading history 09 p1401 A72-22724

Stresses, strains and moments interrelationship in axisymmetrically loaded circular cylindrical shell under unsteady creep conditions 09 p1401 A72-22729

Stress-strain curve determination for shear of twisted conical elastic bar, using torque and angle distribution 09 p1404 A72-22774

Energy balance criterion application to crack growth under cyclic fatigue loading, considering stress-strain behavior of plastic deformation energy 09 p1404 A72-22911

Single and multiple fractures in brittle matrix fibrous composites, discussing fracture energetics, stress-strain curves and hysteresis effects 09 p1338 A72-23164

Stress-strain characteristics of metal ductile filaments with elastic brittle coatings, noting strengthening effect on anodic oxide coated aluminum 09 p1330 A72-23379

Book on plastic analysis and plate, shell and disk theories and design covering stress-strain concepts, laws and theorems 10 p1553 A72-23749

Axially homogeneous stress and strain in anisotropic thin walled cylindrical shells, considering pure bending, stretching and twisting [ASME PAPER 71-APMW-4] 10 p1554 A72-24181

Charpy impact strength data for unidirectional graphite, boron and glass-resin composites tested in fiber direction, noting tensile stress-strain characteristics importance 11 p1672 A72-25471

Off axis and transverse tensile properties of boron reinforced Al alloys, correlating metallurgical structures with stress-strain curves and fractographic studies 11 p1654 A72-25479

Rigidly connected rectangular plates stress-strain calculation with finite difference method 11 p1733 A72-25538

Fatigue life cumulative damage prediction procedure for engineering metals subjected to complicated stress-strain histories, noting errors in average mean stress method 11 p1658 A72-25831

Constitutive equations for bimodulus elastic materials, postulating rheological model based on anisotropy stress-strain laws 11 p1736 A72-25984

Two coordinate oscillograph recording device with automatic reversing for stress-strain tests under static and cyclic loads 11 p1637 A72-26814

Three dimensional nonlinearly elastic anisotropic body with arbitrary elastic potential examined for large initial deformations, considering stress-strain state 12 p1877 A72-27077

Stress-strain state and temperature distribution in transversely isotropic layer under mixed heat transfer conditions 12 p1878 A72-27085

Reversible stress effects in theory of plastic flow in strain hardened metals at high temperatures 12 p1879 A72-27159

Variable shear modulus circular isotropic plate torsion by rigid circular stamp, obtaining stresses and displacements by Fourier analysis 12 p1881 A72-27319

Energy method for boundary conditions of beam vibrations under linear viscoelastic stress-strain law,

deriving uniqueness, boundedness and stability theorems

12 p1885 A72-27848

Uniqueness theorem for solution to boundary value problem in anisotropic viscoelasticity, considering stress-strain relation in nonlinear Volterra equation form

12 p1886 A72-27983

Unloading wave propagation in semiinfinite elastoplastic cylindrical rod for concave stress-strain diagram with no initial linear segment

13 p2053 A72-28388

Stress-strain state in pure bending for infinite elastic strip with circular central hole, using integral Fourier transforms

13 p2053 A72-28390

Deformation limits in thin and thick walled metal blanks axisymmetric drawing process, determining stress-strain state based on prescribed velocity field

13 p1963 A72-28743

Room temperature uniaxial tension tests for elastic deformation of steel samples, showing quadratic stress-strain function

13 p1977 A72-29008

Computer algorithm for plates and shells internal forces and moments and stress-strain state determination from strain gage data

13 p2058 A72-29144

Stress-strain state of elastic rectangular plate under arbitrary edge forces on displacements

13 p2058 A72-29458

Rheological stress-strain relations in nonlinear viscoelasticity theory, calculating relaxation parameters for isotropic viscoelastic circular cylinder

13 p2059 A72-29493

Variational problem solution for solid strained body with nonlinear stress-strain relation, applying finite element method

14 p2130 A72-30189

Aircraft engine components fatigue life assessment under small cycle temperature conditions, including temperature field and stress-strain determination in critical spot

14 p2145 A72-30279

Disks with inclined face, investigating effects of joint between hub and disk face on stress-strain state

14 p2164 A72-30430

Tubular materials plane stress-strain test facility for combined axial load and internal pressure effects, describing principal components

14 p2092 A72-30442

Stress-strain state of complex configured thin walled shell, deriving computer algorithm via tensor analysis and finite difference scheme

14 p2165 A72-30686

Point heat source induced thermal stresses in elliptic plate with circular holes, determining stress-strain field by two dimensional elasticity theory

14 p2166 A72-30689

Constitutive equations for incremental stress-strain relations in elastoplastic media, noting plane stress and strain in isotropic materials

14 p2131 A72-30715

Higher order differential equations solutions for viscoelastic stress-strain functional relationships, recommending Runge-Kutta integration technique

14 p2168 A72-30929

Crystal lattice and dislocation anharmonicities interdependence and stress-strain correlation in presence of interaction between ultrasonic waves of different frequencies

14 p2169 A72-30959

Stress function method for calculating stress-strain state in homogeneous shallow spherical shell under arbitrary load

15 p2324 A72-31485

Stress-strain state of spherical body in centrally symmetric temperature field, noting elastoplastic interface and continuity conditions

15 p2327 A72-31742

Temperature effects on stress-strain diagram, tensile strength and creep properties of fiber-epoxy resin composites

15 p2260 A72-32137

Displacement and stress field for elastic solid containing cruciform crack with unequal length arms

15 p2330 A72-32292

Plasticity, elastic relaxation and stress-strain relation characterization for Schofield-Scott Blair media, using nonequilibrium thermodynamics method

15 p2331 A72-32482

Stress-strain relations for inelastic deformation of anisotropic strain hardenable shells of revolution under arbitrary plasticity conditions

15 p2332 A72-32678

Plastic deformation and limiting strain curves of Ti alloys in plane stressed state, comparing with yield and rupture conditions

15 p2259 A72-32684

Metal specimens yield point in adiabatic tension determined by thermoelectric method from temperature-stress and stress-strain diagrams

15 p2259 A72-32690

Stress-strain diagrams for constant strain rates in shear of Ti from torsion test machine, deriving constitutive equation for dynamic overstress

16 p2405 A72-33197

Stress-strain curve correction for triaxial stress state and strain rate at arbitrary temperatures, describing instrument for continuous test specimen profile measurement

16 p2469 A72-33232

Stress-strain diagrams for orthotropic glass fiber reinforced plastic plates with circular hole under uniaxial tensile load

16 p2471 A72-33681

Prestrained and annealed elastic materials stress-strain relationship calculation in plastic range, compared with tensile and compression load tests results

16 p2472 A72-33948

Steels creep behavior relationship to stress-strain curve shape, defining creep resistance as function of strain hardening coefficient

16 p2412 A72-34146

Model with lamellae and tie molecules disordered alignments to explain relation between stress-strain behavior and bond fracture in highly oriented polymer fibers

17 p2569 A72-34258

Approximate method for composite materials effective elastic moduli determination from uniform stress-strain field or as second derivative of average strain energy

17 p2625 A72-34322

An analysis of the split Hopkinson bar technique for strain-rate-dependent material behavior.

[ASME PAPER 72-APM-26] 17 p2628 A72-34792

The dynamic stress-strain behavior in torsion of 1100-O aluminum subjected to a sharp increase in strain rate.

[ASME PAPER 72-APM-6] 17 p2629 A72-34808

Strain history effect on isotropic and anisotropic plastic behavior.

[SESA PAPER 1940] 17 p2631 A72-34820

Strain measure determined plastic stress concentrations around discontinuities in flat plates compared with incremental theory

18 p2733 A72-36359

An optical method for the determination of constrained zones at crack-tips.

18 p2733 A72-36368

Direct and indirect creep modelling technique in photoelasticity.

18 p2734 A72-36379

The application of a dislocation model to the strain and temperature dependence of the strain hardening exponent n in the Ludwik-Hollomon relation between stress and strain in mild steels.

18 p2701 A72-36589

A non-linear integral-type theory of inelasticity for transversely isotropic materials.

18 p2738 A72-37075

The matrix fatigue behaviour of fibre composites subjected to repeated tensile loads - Application to B/AI 6061 composites.

20 p2936 A72-39208

The low strain tensile behavior of U-7.5 wt pct Nb-2.5 wt pct Zr.

20 p2938 A72-39303

Elasticity theory axisymmetric problem for hollow cones analyzing stress-strain state and boundary value problem by asymptotic methods

20 p2982 A72-40036

On the stress-strain curve of polyethylene filled with randomly oriented glass fibers.

21 p3073 A72-40721

Stress-strain state of thin circular perforated Cu plate under uniform tensile load, showing applicability of small elastoplastic finite deformation theory

21 p3122 A72-41351

Epoxy-thiocol binder viscoelastic deformation under short and long term loads, noting stress-strain linearity limit

21 p3073 A72-41360

Strain curves of VT-6C and VT-14 titanium alloys in the temperature range between 20 and 400 C

21 p3070 A72-41362

Yielding and fracture of D16T alloy at low temperatures under conditions of complex stress-strain state

21 p3071 A72-41706

Allowance for the hysteresis behavior of a continuous medium in a complex state of stress under conditions of simple cyclic loading

21 p3127 A72-41711

Elastic isotropic plates stability for nonlinear stress-strain relations, noting effect of deformation tensor invariant on critical load magnitude

22 p2324 A72-42275

Stress-strain diagrams and fracture characteristics of fiber-reinforced aluminum alloys

22 p3189 A72-42300

A general program for computer plotting of Mohr's circle.

22 p3156 A72-42608

Some recent experimental investigations in stress-wave propagation and fracture.

22 p2327 A72-42768

Reinforcement of structural materials by long strong fibres.

22 p3241 A72-43026

Book - Effect of notches on low-cycle fatigue: A literature survey.

22 p3242 A72-43145

Analysis of the mechanisms of yield-stress variation during compacting of metal-ceramic materials by rolling

23 p3298 A72-43278

Finite element method optimization of orthotropic layered shells of revolution under mechanical and thermal loadings, considering stress-strain relationships

[SAWE PAPER 939] 23 p3344 A72-43479

Pointwise displacement errors in linear shell theory resulting from errors in the stress-strain relations.

23 p3347 A72-43720

Fibers-matrix force interaction effects in metal composites, analyzing stress-strain state of reinforced plate

23 p3306 A72-43728

Diffusive metal coatings stress-strain state effect on composite Mo material strength, ductility and creep characteristics

23 p3306 A72-43732

Ribbed cylindrical shells modeling method for stress-strain state and stability

23 p3347 A72-43745

Shear-strain-rate effects in a high-strength aluminum alloy.

23 p3302 A72-43983

Determination of the stressed state in a welded joint in plastic deformation

23 p3293 A72-44019

A note on buckling of spherical caps with initial asymmetric imperfections.

23 p3351 A72-44060

Triangular element for multilayer sandwich plates.

23 p3351 A72-44108

Equivalent linear solution for transient free vibration of beams with strain dependent, frequency independent stress-strain hysteresis loop with sharp corners

23 p3352 A72-44120

Stress-strain characterization of part-through crack in plate under tension in terms of stress intensity factor

23 p3352 A72-44227

Nonlinear elastic torsion analysis for aerospace materials.

23 p3354 A72-44251

Reissner-Sagoci problem for semiinfinite elastic solid stress and displacement determination, discussing generalization to nonhomogeneous media with circular part under axisymmetric twisting

23 p3314 A72-44266

The stress-strain relation in the low-cycle fatigue of metallic materials under rotating-beam bending.

24 p3454 A72-44626

The fatigue strength under varying mean stress.

24 p3455 A72-44629

Stress-strain diagrams from high and low temperature tests of Y alloy rods, noting temperature effects on plastic deformation

24 p3413 A72-44724

Development and present-day state of the fatigue-damage theories.

24 p3457 A72-44873

Microinhomogeneous elastoplastic cyclically strain hardenable material under symmetric loading, calculating stress-strain relationship

24 p3458 A72-44928

One dimensional heat insulated structure under dynamic loads, showing thermoviscoelastic effects on spontaneous heating and stress-strain state

24 p3458 A72-44935

Some extremal properties and energy theorems for inelastic materials and their relationship to the deformation theory of plasticity.

24 p3460 A72-45692

On dual energy theorems for a class of elastoplastic problems due to G. Maier.

24 p3460 A72-45693

A power-law model for the multiple-integral theory of non-linear viscoelasticity.

24 p3460 A72-45696

Photoelastic verification of a mechanical model for the flow of a granular material.

24 p3460 A72-45697

Stress-strain state in tension of orthogonally stiffened fiberglass-reinforced plastic with cracks in transversely stiffened layers

24 p3460 A72-45754

Graphites fracture under thermal stresses, considering stress-strain relations calculation method for annular samples

24 p3418 A72-45762

STRESS-STRAIN DISTRIBUTION
U STRESS CONCENTRATION
STRESS-STRAIN RELATIONSHIPS
U STRESS-STRAIN DIAGRAMS

STRESS-STRAIN-TIME RELATIONS

Small dilatation and short time approximate constitutive equations for compressible nonlinear viscoelastic materials, using multiple integrals and kernel functions

01 p0137 A72-10319

Creep behavior during and immediately after loading of Nimonic 90 and H 46 Cr steel under various stresses, temperatures and rates

06 p0829 A72-17801

Viscoplasticity theory thermodynamic foundations, considering stress/strain states time and deformation path dependence

06 p0896 A72-17963

Machine metals fatigue life, creep theory and stress and strain kinetics in severe environments, formulating physical equations

08 p1246 A72-21805

Workability tests from material deformation stress determination and fracture strain rate relation for forging, extrusion and rolling limits predictions

08 p1190 A72-22198

Motion and stable equilibrium position of horizontal rotor with nonlinear elastic and internal damping properties, discussing stress-strain-time relations of shaft filaments

09 p1409 A72-23613

Dislocation velocity-stress relationship in plastically deformed Al at room temperature, noting entropy term in Gibbs free energy equation

11 p1661 A72-26652

Plastic strains and crack growth in Al alloy under static and repeated static loading

13 p1977 A72-28915

Hot rolled steel bar strain history effect on isotropic and anisotropic plastic behavior, considering additional tension and torsion data

15 p2325 A72-31527

Relations between the experimental parameters describing the steady-state and transient creep.

18 p2732 A72-36343

A model of a nonlinear viscoelastic medium allowing for the effects of cumulative damage

19 p2871 A72-37528

Mathematical relationships for primary, secondary and tertiary creep and their use in extrapolation of tensile creep data.

19 p2874 A72-37708

The modulus of elasticity of plastic materials at stress times between .001 and 10,000,000 seconds

22 p3197 A72-42859

Investigation of the thermal fatigue of Kh18N10T steel under complex stress-strain state conditions

23 p3301 A72-43956

STRESSED-SKIN STRUCTURES

Iteration method error estimates for thin elastic shell basic stressed state and simple fringe effect relation to boundary stressed state

04 p0586 A72-15012

STRESSES

AXIAL STRESS

COMBINED STRESS

CRITICAL LOADING

RESIDUAL STRESS

SHEAR STRESS

TENSILE STRESS

THERMAL STRESSES

TORSIONAL STRESS

TRIAXIAL STRESSES

VIBRATIONAL STRESS

STRETCHING

Finite stretching of isotropic incompressible annular plate with inner edge rigid inclusion, noting edge zone thickness variation due to transverse normal strain

02 p0296 A72-12528

Neo-Hookean material circular plate under finite axisymmetric stretching, showing approximately constant deformed thickness

04 p0590 A72-15196

Disk stretching under tensile stresses, determining stress at arbitrary point in half band form connected with quadrant

05 p0737 A72-16294

Automated mechanical system for solid propellant heat stress tests in two directions as function of time

08 p1147 A72-21331

Heat stretching-induced changes effect on strength,orption and structural properties of polyformaldehyde fibers, noting structural orientation enhancement and porosity growth

08 p1194 A72-21757

Repeated stretching effect on triaxetic fibers thermal destruction in vacuum after hot air or steam heat-setting

08 p1194 A72-21759

Axially homogeneous stress and strain in anisotropic thin walled cylindrical shells, considering pure bending, stretching and twisting

ASME PAPER 71-APMW-4) 10 p1554 A72-24181

Versatile stretching of a disc shaped as a plane with elliptic aperture.

22 p2326 A72-42627

The stretching of a disc shaped as a semi-infinite plate with half-elliptic edge sector.

22 p2326 A72-42628

Exponential type equation for carbon steel stretched sample necking profile curve

23 p3348 A72-43753

STRIATION

Moving striations in tapered gaseous discharge tube, noting frequency dependence on tube radius

11 p1698 A72-26644

Brittle striation formation role in corrosion fatigue crack propagation mechanism in Al-Zn-Mg alloy from test in NaCl solution under reversed anodic-cathodic current

22 p3193 A72-43033

STRINGERS

Variable cross section elastic stringer end loaded longitudinal force transmission to stiffened elastic plate

03 p0444 A72-13465

Small deflection theory for dynamic elastic buckling of stringer-stiffened cylindrical shells under axial impact, discussing optimum stiffener geometry

05 p0742 A72-17248

DC 10 aircraft wing stringers fabrication and processing, discussing stress relieving and stretch form contouring techniques, aging and tempering processes and flaw detection

[ASM PAPER W 72-31,3] 12 p1817 A72-28161

On the diffusion of a load from a semi-infinite stringer bonded to a sheet.

22 p3238 A72-42833

Variable cross section elastic stringer end loaded longitudinal force transmission to stiffened elastic plate

24 p3458 A72-44940

Welding airframe structures in titanium using tensile loading to overcome distortion.

24 p3407 A72-45000

STRINGS

Parametric and adaptive non-parametric system identification procedures in boundary value problem of string on elastic foundation, considering various approximation methods

07 p1096 A72-20349

Nonlinear traveling string transverse oscillations frequency, using Panavko direct linearization method

11 p1688 A72-26324

Inhomogeneous strings oscillations determination in nonstationary inverse boundary value problems with integral equations

11 p1689 A72-26381

Random deflection function for taut string on elastic foundation subject to random loads, using invariant imbedding method and Fokker-Planck equations

15 p2273 A72-31311

Asymptotic solutions of inhomogeneous initial boundary value problems for weakly nonlinear partial differential equations.

17 p2574 A72-34342

Determination of the unloading boundary in transverse impact of an elastic-plastic string.

[ASME PAPER 72-APM-12] 17 p2629 A72-34804

STRIP

Equilibrium equations of infinite strip with circular hole, using plane multiply connected domain method for stress field

12 p1878 A72-27087

Estimation of the accuracy of the method of measuring the bending of strips in order to determine residual stresses.

19 p2806 A72-37574

STRIP TRANSMISSION LINES

Mixed boundary value problem of Laplace equation solution by dual trigonometric series equations approach, applying to microstrip transmission line capacitance determination

01 p0093 A72-10508

Self admittance and radiation conductance characteristics of stripline feed slots in waveguide walls

01 p0029 A72-10683

Hybrid microwave integrated circuits, discussing distributed circuits with strip transmission lines and lumped element circuits with inductors and capacitors

01 p0045 A72-10698

Microstrip double down-converter receiver in civil satellite earth stations for reduced interface problems, increased reliability and minimum initial cost

03 p0334 A72-14074

Mathematical model for reciprocal and nonreciprocal magneto-optical effects in magnetized ferrite-filled microstrip transmission lines

04 p0502 A72-15434

Microwave antennas, feed systems, strip transmission lines and test instrumentation, examining radiation patterns, design and polarization characteristics

05 p0635 A72-16330

TEM modes characteristics in shielded stripline with four internal strips, tabulating characteristic impedances at different line parameters

05 p0636 A72-16339

Bandwidth properties and design of shielded asymmetrical striplines filled by dielectric

05 p0636 A72-16340

Coaxial and stripline wideband microwave hybrid ring junctions equivalent to Magic Tees with improved electrical properties

05 p0636 A72-16344

Microwires and microstrips fabrication from high strength deformation resistant aluminum alloys

05 p0680 A72-17207

Microwave thin film microstrip IC tunnel diode amplifiers for broadband high performance receivers, discussing design, construction and performance

06 p0786 A72-18374

GaAs IMPATT diode with plated heat sink for microstrip circuit applications, exemplifying X band oscillator experiment

06 p0787 A72-18385

Dielectric substrate layer surface wave parasitic resonance effects on microstripline waveguide conductor

07 p0958 A72-18855

Digital loaded-line phase shifters for phased array antennas, discussing lossy microstrips effects and P-I-N diode switching shortcomings in design requirements

07 p0954 A72-19048

Schwartz method application to stripline fields and impedance calculations for different cross sections and internal conductor dimensions

08 p1133 A72-21370

Coupled line microstrip circuit for high power and efficiency L and S band TRAPATT diode oscillators

10 p1450 A72-24307

VHF and UHF radio transmitters with strip transmission lines, discussing transistor power amplifier design

10 p1441 A72-25116

Microwires and microstrips fabrication from high strength deformation resistant Al alloys

11 p1660 A72-26142

Microstrip propagation and loss filling factor design formulas for magnetic substrates

11 p1599 A72-26991

Stacked TRAPATT diodes oscillator with microstripline circuit to obtain 1 kw peak power at 1 GHz

12 p1788 A72-27163

Microstrip transmission lines analysis by integral equations approach, assuming TEM mode

12 p1782 A72-27492

Distributed base resistance effect on stripline geometry transistor input characteristic, using equivalent circuit with pseudo-junction having high saturation current

13 p1930 A72-29059

Waveguide model for calculating microstrip discontinuities and T-junctions wave impedances, using orthogonal series procedure

15 p2201 A72-32470

Nonideal component parts effect on behavior of digital microstrip closed circuit X band phase shifter, presenting detailed network analysis

15 p2201 A72-32471

High efficiency and power S-band pulsed oscillator using avalanche diode and microstrip circuit

16 p2369 A72-33759

Microwave integrated circuits.

17 p2527 A72-34570

Determination of the dielectric constants of microwave-striplines

17 p2530 A72-35429

S-band high power microstrip switches with p-i-n diodes for spacecraft radio systems

19 p2770 A72-37257

Microwave filters in antenna circuit feeder systems of space vehicles

21 p3026 A72-40318

Wave equation for infinitely long slotted screen in elliptic cylindric coordinates, noting radiation pattern for phased antenna array of metallized hyperbolic striplines

21 p3028 A72-40507

Computation of single-conductor and symmetric and asymmetric two-conductor stripline characteristics by the relaxation method.

21 p3036 A72-41831

Synthesis method for phase and loss optimized single-stage reflection type phase shifters, determining transformation coefficient

23 p3268 A72-43439

Microstrip matching networks synthesis for microwave integrated circuits, calculating passband of configurations with lumped and distributed elements

23 p3269 A72-43445

STROBOSCOPES

Stroboscopic measurement of elastic untwisting angles of axial compressor rotor vanes under centrifugal and aerodynamic forces

01 p0143 A72-11371

Visual persistence and perceptual moment hypotheses for time-dependent visual illusion from viewing moving stroboscopically illuminated object

05 p0621 A72-16150

Double frequency stroboscopic method for absolute calibration of vibration transducers, analyzing errors

06 p0815 A72-17766

The non-stroboscopic visualisation of vibration patterns by the real time-time averaged hologram interferometry.

20 p2921 A72-39028

STRONTIUM

NT STRONTIUM ISOTOPES

Sunlight resonance scattering by spherically symmetric optically thick artificial Sr clouds, comparing photometric data with computed theoretical isophotes, line profiles and irradiances
09 p1297 A72-22579

Eu and Sr distribution between coexisting feldspars in acidic rocks, using mass spectroscopic isotope dilution method
10 p1472 A72-24166

Electron impact effects on Ba I, Ba II and Sr I selected spectral line Doppler widths calculated for laser-generated plasmas for chemical release simulation
21 p3092 A72-40821

STRONTIUM COMPOUNDS

NT STRONTIUM TITANATES
NT STRONTIUM ZIRCONATES
Cation self diffusion coefficients in potassium oxide-strontium oxide-silicon dioxide glass, using radioactive tracers and sequential etching technique
13 p1912 A72-28625

High refractory gadolinium oxide-strontium oxide system phase diagram and transition temperature by X ray and differential thermal analyses
13 p1984 A72-30109

Phase diagram, isomorphism and temperature dependence of hexagonal, monoclinic and triclinic modifications of Sr-Ba polycrystalline aluminosilicates
21 p3072 A72-40382

Diffusion in the system K₂O-SrO-SiO₂. IV - Mobility model, electrostatic effects, and multicomponent diffusion.
21 p3097 A72-40935

Electron paramagnetic resonance hyperfine spectral observation of double quantum transitions of Ti positive ions in strontium chloride single cubic crystal host
24 p3378 A72-45311

STRONTIUM ISOTOPES

Southern Great Basin upper Cenozoic high Sr⁸⁷/Sr⁸⁶ and Sr/Rb ratio basalt initial composition, showing mantle material derivation
05 p0655 A72-16043

Pb and Sr isotopic composition measurements on eclogites from South Africa
05 p0658 A72-16551

Sr isotope data indication of Glass Mountain rhyolite lava as part of parent silicic magma
11 p1623 A72-26240

Apollo 12 and 14 lunar soils K, Rb and Sr isotopic composition evaluation, noting microbreccia as major nonbasaltic constituent
11 p1723 A72-26497

STRONTIUM TITANATES

Polarization characteristics of ferroelectric barium strontium titanates in solid solution at 4-100 K
10 p1527 A72-24984

STRONTIUM ZIRCONATES

High temperature creep behavior of sintered polycrystalline strontium zirconate as function of temperature, stress, grain size and strain level, using pure bending test method
10 p1497 A72-24275

STRUCTURAL ANALYSIS

NT BERNSTEIN ENERGY PRINCIPLE
NT DYNAMIC STRUCTURAL ANALYSIS
NT ENERGY METHODS
NT EQUILIBRIUM METHODS
NT FLUTTER ANALYSIS
NT MATRIX METHODS
NT STRAIN ENERGY METHODS
Laminated orthotropic plates and shallow shells structural analysis using finite element program
01 p0140 A72-10984

Moment sensors for strain gaged beam systems analysis, noting application to bending moments determination
02 p0287 A72-11510

Structural analysis of cable stayed bridge scale model with fractional and full loading, showing system linear behavior with small displacements and real nonlinearities, respectively
[SESA PAPER 1896] 02 p0199 A72-11515

Soviet papers on strength and plasticity covering elasticity, creep, polymer mechanics, plates and shells, dynamic and high temperature stability, thermoelasticity, soil and free flowing media
02 p0288 A72-11601

Minimum weight beams and frames calculation for random loads taking into account material carrying capacity
02 p0291 A72-11727

Rheomobility and structural creep, correlating mobile, rigid, elastic, viscous and plastic models
02 p0297 A72-12612

Finite element formulation for nonlinear large deflection elastic analysis of displacements and stresses in thin plate structures
02 p0298 A72-12657

Complex structures mass and stiffness matrices reduction by automatic condensation, calculating lowest eigenfrequencies and eigenmodes of substitute systems
[DGLR PAPER 71-108] 02 p0299 A72-12721

Nonlinear thermoviscoelasticity problem exact solution expressed as product of two functions, formulating conditions
03 p0445 A72-13576

Breakdown of three dimensional brittle medium weakened by concentric systems of interconnected circular cracks, using Fredholm integral equations
03 p0447 A72-13732

Book on automated structural analysis covering computer oriented problem solving methods for trusses, plane and space frame es, curved beams, etc
04 p0591 A72-15270

Nonhomogeneous elastic structure with quasi-periodic coefficients, deriving mechanical model by continuum spectral theory
04 p0594 A72-15745

Ring finite elements use in analysis of shells of revolution under axisymmetric loads
[ASME PAPER 71-WA/HT-22] 05 p0732 A72-15880

Asymptotic two dimensional theory of shell structures, comparing with axiomatic formulation
05 p0738 A72-16349

Fatigue limit amplitude diagram schemes and formulas
05 p0740 A72-16625

Static perturbation technique functional form for postbuckling equilibrium path analysis by asymptotic approximation, noting relationship to Koiter method
05 p0742 A72-17244

Free flexural wave propagation in doubly periodic structures, obtaining natural frequencies
06 p0894 A72-17764

Large elastic deformation problems analysis by incremental finite element technique, using variational principles
07 p1087 A72-18782

Stress redistribution in statically indeterminate structures under creep, discussing effects on time to brittle fracture and service life determinations
07 p1088 A72-19259

Iterative and direct modification procedures for structural analysis matrix displacement method, discussing computer program implementation
07 p1089 A72-19329

Book on matrix structural analysis covering matrix algebra concepts, direct stiffness matrix methods, lifting surface, nonlinear truss and structural partitioning analysis, etc
07 p1092 A72-19908

Bounds for impulsively loaded plastic structures, considering fixed end beam with uniform velocity distribution
07 p1093 A72-19947

Limit analysis of ductile fiber reinforced structures, obtaining critical load of composite sandwich ring
07 p1093 A72-19950

Elastic equilibrium of infinite wedge with apical asymmetric notch, reducing to Hilbert problem fo; holomorphic vectors
07 p1093 A72-19976

Mechanical properties and structural strength evaluation methods for metallic materials at low temperatures, describing hydraulic and pneumatic testing facilities
07 p1017 A72-20130

Monte Carlo digital simulation of probabilistic buckling behavior of indeterminate structure under initial stresses due to random geometric lack-of-fit
07 p1095 A72-20348

Axisymmetric elasticity theory problems for stress-strain state of space with spherical incision, obtaining solutions with p-analytic functions
08 p1242 A72-20960

NASTRAN/NASA structural analysis/ program for computer stress analysis based on finite element method, noting vibration, acoustics, transient motion and random response applications
08 p1138 A72-21325

Heavy falling body elastic impact against circular plate center analyzed by Timoshenko type wave equation
08 p1247 A72-21814

Consistent finite element method to analyze random response of complex structures based on standard modal approach
08 p1248 A72-21823

Building structures response to transient pressures caused by sonic booms, discussing three dimensional loading effects, air cavity coupling and nonlinearities influence
08 p1249 A72-21908

Nonlinear beam and plate analysis, obtaining smooth elastic-plastic transition through modified Richard moment-rotation equation application
08 p1249 A72-21923

Nonlinear programming analysis of free vibration of simply supported beam
08 p1249 A72-22136

Structural model application to construction material alternate stress description at elevated temperatures
09 p1401 A72-22727

Mathematical modeling for structural analysis and design from viewpoint of methodology, physical principles, simulation, optimization, constraints and control theory
[SMRT PAPER M 2/3] 10 p1556 A72-24399

Heat conduction and thermoelasticity in solids, discussing thermomechanical coupling, structural stresses and thermal stresses and deformations
[SMRT PAPER L 1/1] 10 p1556 A72-24394

Solid body elastic deformation potential energy and structure calculation on computer by finite element method and calculus of variations
10 p1559 A72-24924

Nonlinear structural analysis of circular plates and shells of revolution with geometric and inelastic material nonlinearities, using direct stiffness method
[AIAA PAPER 72-353] 11 p1729 A72-25383

Finite element structural analysis for local buckling stresses in flat plates, panels and thin walled columns, deriving elastic and geometric stiffness matrices
[AIAA PAPER 72-354] 11 p1729 A72-25383

Viking conical aeroshell structural prototype design, analysis and testing, comparing buckling failure data with theoretical predictions
[AIAA PAPER 72-370] 11 p1725 A72-25395

Two dimensional elastoplastic finite element analysis of structural members under cyclic thermal-mechanical loadings
[ASME PAPER 72-GT-1] 11 p1734 A72-25604

Computerized analysis of prismatic rectangular plate assemblies natural frequencies and initial buckling stresses
11 p1734 A72-25731

Control theory application to nonlinear elastic analysis of trusses, partitioning structure into statically determinate stages
11 p1736 A72-25989

Multilevel structural analysis for multilayered fiber-epoxy and metal matrix composites, using FORTRAN IV
11 p1601 A72-26033

Probability minimization and detection of errors in computerized analysis of civil engineering frameworks, noting graphical output advantages
12 p1786 A72-27190

Stress-strain state approximation for isotropic strip with circular hole, noting method adaptability to computer computations
12 p1880 A72-27232

Long term high temperature test machine to record structural changes of materials
12 p1795 A72-27464

Polymer testing machine for simultaneous structural and mechanical properties measurement of specimens subjected to uniaxial tensile loads for broad temperature range
12 p1795 A72-27464

Stokes-Helmholtz decomposition role in displacement potentials derivation in elasticity
12 p1884 A72-27564

Interactive computer graphics technique for structural analysis, aiding engineering decisions by CRT graphical and numerical information display
12 p1787 A72-27864

Engineering formula relating crack tip stress intensity coefficient to mechanical properties and structural element size
12 p1887 A72-28236

Russian monograph on three dimensional deformable bodies stability covering linearized equations for subcritical deformations and strength analysis of low shear rigidity structures
12 p1888 A72-28337

Structural approach to elastic stability in buckling problems, simplifying deformation concepts and loading condition definition
13 p2054 A72-28474

Structural evaluations and dynamic testing of solar electric propulsion components, surveying power conditioning panel modal frequencies by holographic interferometry technique
[AIAA PAPER 72-442] 13 p1899 A72-28941

Axisymmetric geometry and load finite element structural analysis of isotropic elastic materials for parametric and optimization studies
13 p2062 A72-29875

Finite element method for nonlinear analysis of nuclear reactor structures, noting elasticity, viscoelasticity and elastoplasticity problems
[SMRT PAPER M 2/2] 14 p2166 A72-30724

Sandwich beams structural optimization for given deflection by iterative finite element procedure
14 p2168 A72-30927

Nonlinear creep failure of imperfect sandwich structures under time variable loading, considering rod and cylindrical shell
15 p2324 A72-31490

Book on structural analysis covering statically indeterminate structures, force and displacement methods, flexibility and stiffness matrices, strain energy, virtual work, energy theorems, etc
15 p2325 A72-31517

Structural mechanics computer programs compendium covering subject oriented information according to structure type, load environment and analytical models
15 p2328 A72-31771

- FORTRAN IV program for small structure analysis with maximum 10 deg of indeterminacy
15 p2328 A72-31772
- Structural components design from fiber composites, noting computer programs for structural and stress analysis
15 p2328 A72-32128
- Structural averaging of stresses in finite element method hybrid stress model, using additional equilibrium equations
15 p2332 A72-32597
- Analog simulation method for highly redundant structure optimization based on reproducing structure mechanical behavior in stabilized stress states
16 p2463 A72-32899
- Optimal plane elastic trusses under alternative loads, designing for smallest total volume of bars with upper stress bound
16 p2466 A72-33017
- Cost-saving techniques in helicopter structural test methods, suggesting system simulation, component replacement time calculation and computer techniques
16 p2373 A72-33221
- Nonlinear theory of two dimensional and three dimensional discrete elastic Cosserat media, noting application to reinforced shells and lattice type structures
16 p2425 A72-33592
- Sandwich structures buckling calculation by transfer matrices with allowance for cross section shearing
16 p2471 A72-33680
- Unified description of structures behavior subject to elastic, creep and plastic deformations
16 p2473 A72-34117
- Approximate method for reactions redistribution and displacements in statically indeterminate structures, using strain hardening hypothesis and creep power law
16 p2473 A72-34119
- Three dimensional elastoviscoplastic theory for complex structures static-dynamic creep deformation under time varying stress and temperature fields, generalizing Odqvist-Hoff law
16 p2473 A72-34121
- Bending of skew plates of variable rigidity.
17 p2626 A72-34329
- Finite element analysis of elastoplastic structures with temperature dependent mechanical properties
17 p2631 A72-34947
- Flexure of micropolar elastic beams.
17 p2631 A72-35056
- Elastoplastic structural analysis from design viewpoint, discussing load limits and stability estimates based on large deformation assumption
17 p2632 A72-35113
- Monograph - The finite-element method in plate bending analysis
17 p2634 A72-35547
- Steady state response of nonlinear beam under periodic loading, using finite element techniques for nonlinear differential equation
18 p2732 A72-36078
- Coordinate transformation for perturbation analysis of elastic structural system imperfections influence on elastic buckling
18 p2732 A72-36079
- Analytical foundations of experimental mechanics - Trends in analytical mechanics.
18 p2732 A72-36354
- Clamped flat skew plates stability under inplane stresses in terms of oblique components, calculating elastic buckling coefficients via energy method
18 p2736 A72-36931
- Integral equation method for solution of boundary value problems of structural mechanics. I - Ordinary differential equations. II - Elliptic partial differential equations.
18 p2739 A72-37169
- Finite element models with rigid displacement for nonrigid structure analysis, noting curved beam and shells
18 p2739 A72-37173
- Stress distribution and displacements in adhesive bonded lap-jointed aerospace structures, presenting approximate solution
18 p2740 A72-37214
- Structures and materials performance under creep and plastic deformation, discussing energy theorems implications
19 p2874 A72-37705
- Essential factors in reliability prediction and stress analysis of structural component with wide load and temperature variations
19 p2874 A72-37710
- Elasto-visco-plastic constitutive equations for quasi-static structures calculations.
[ONERA, TP NO. 1089]
19 p2875 A72-37763
- Experimental investigation of flexural vibration damping in supported square plates with coatings
19 p2876 A72-38004
- Mixed boundary value problem in the theory of elasticity for a half-space with circular lines of separation between boundary conditions
19 p2876 A72-38152
- Applicability of the small parameter method to the estimation of stresses in nonhomogeneous elastic media
19 p2876 A72-38153
- Zero-moment reinforced axisymmetric shells
19 p2876 A72-38155
- Plane bending problems in the theory of elasticity for nonhomogeneous solids
19 p2877 A72-38162
- Polarization optical method for analyzing local stress concentrations in structural members.
19 p2805 A72-38768
- Plate bending analysis with hybrid triangular and rectangular finite elements, deriving stiffness matrix via optimized stress functions
20 p2979 A72-39556
- Iterative solution of nonlinear structural problems, using convergence criteria based on displacement quantities
20 p2946 A72-39625
- An equivalent grid framework for skew plates in flexure.
20 p2980 A72-39689
- Elastic analysis for a radial crack in a circular ring.
20 p2981 A72-39959
- Simulation of physically nonlinear multispin beams
21 p3116 A72-40180
- Simple structures behavior under constant loads, considering low stress levels and creep rupture mechanism with internal damage affecting strain rate
21 p3117 A72-40673
- Geometrical non-linear analysis of structures by finite elements.
21 p3120 A72-41204
- Boundary value problems of lattice plates statics for transversally loaded homogeneous strip, noting elastically supported continuous plates
21 p3123 A72-41394
- Theoretical and experimental investigation of the relationship between plastic and creep deformation of structures.
21 p3124 A72-41509
- Method of calculating rotating disk of complex profile
21 p3127 A72-41701
- Estimation of the effect of stress concentration in nonstationary loading regimes
22 p3232 A72-41922
- Limit analysis and plastic design of structural elements of complex shape.
22 p3235 A72-42577
- Iteration process convergence improvement based on stiffness change expression as linear combination of two matrices in structural reanalysis
22 p3235 A72-42602
- Book - Contributions to the theory of aircraft structures.
22 p3238 A72-42826
- Multilayer shells structural analysis via equilibrium equations transformation into system of equivalent equations
22 p3238 A72-42836
- Buckling of integrally stiffened cylindrical shells - A review of experiment and theory.
22 p3239 A72-42846
- Structural stability of anisotropic plates and structures, developing method based on data for corresponding isotropic problem
22 p3239 A72-42847
- Book - Thermal structural analysis programs: A survey and evaluation.
22 p3241 A72-43046
- Longitudinal compression of a three-layer plate with initial deflection and a physical nonlinearity of the middle layer / the filler/
23 p3346 A72-43673
- Lower and upper bounds for the lowest characteristic value of the elastically supported membrane
23 p3347 A72-43717
- Vibration characteristics of cylindrical shells with several axially equispaced constraints.
23 p3355 A72-44371
- Triangular facet finite element application in thin cylindrical shell analysis by displacement method
24 p3456 A72-44792
- Mechanical properties and structural strength evaluation methods for metallic materials at low temperatures, describing hydraulic and pneumatic testing facilities
24 p3416 A72-45756
- High speed radial thrust multipoint ball bearing design, discussing contact resistance, ball motion, ring deflection and centrifugal force effect on performance and service life
01 p0078 A72-11378
- Two stage resonant slow wave structure synthesis for microwave device applications, deriving conditions for required dispersion and coupling impedance characteristics
02 p0190 A72-11574
- Optimal design of elastic beams under alternative loads and constraints on generalized compliance and bending stiffness
02 p0291 A72-11962
- Aircraft design interactive computer graphics technique, using human decision input response to computer output information
02 p0300 A72-12733
- Complex determinate and indeterminate structures weight minimization subject to design constraints relative to size, allowable stress, natural frequencies, etc
03 p0446 A72-13703
- Optimal shape calculation for partially elastic and elastoplastic column under conservative load based on static stability criterion
03 p0447 A72-13851
- Multipurpose optimal design of elastic structures with piecewise uniform cross section for load states and prescribed stiffness by energy methods
03 p0455 A72-14386
- Elastoplastic circular plates optimum shakedown design under cyclic loading
04 p0585 A72-14613
- Carbon fiber reinforced composites properties and design limitations relative to elastic anisotropy in pump and fan applications
04 p0536 A72-14744
- Carbon fiber resin composite characteristics for airframe component design, comparing with metal materials
04 p0537 A72-14746
- Glass fiber reinforced plastic composites design, strain limitation and creep fatigue properties for large structures
04 p0537 A72-14749
- Random search method application to optimal design of closed circular cylindrical shells under axial compressive loading
04 p0587 A72-15020
- Optimal design of solid and three layer rods with prescribed natural frequencies for longitudinal and transverse vibrations, using minimum mass criterion
04 p0587 A72-15047
- ALSEP structural/thermal/ design, outlining package hardware configuration, passive thermal protection and materials selection procedures
04 p0508 A72-15093
- Sandwich beam design, deriving linear programming formulation suitable for computer treatment
04 p0590 A72-15191
- Statically indeterminate and determinate elastic beams optimal design for maximum-minimum deflection under distributed load
04 p0590 A72-15192
- Minimum weight design of perfectly plastic continuous sandwich beams with two equal spans for movable loads
04 p0593 A72-15647
- Composite multilayer fibrous shell structural design optimization, using nonlinear mathematical programming methods
05 p0733 A72-15943
- [ASME PAPER 71-WA/DE-12]
05 p0733 A72-15943
- Statistical distribution of maximum response for reliability-based optimum spacecraft structural design for random excitations from booster shutdown
05 p0724 A72-16103
- Automatic plastic minimum weight design of structural frames comparing with linear programming techniques
05 p0737 A72-16117
- Optimal design of statically determinate sandwich beams for given deflection at specified cross section
05 p0737 A72-16119
- OAO space telescope of 120 inches aperture, discussing structural design, geometric configuration and stabilization and pointing control system
05 p0663 A72-16800
- [AIAA PAPER 72-201]
05 p0663 A72-16800
- S-3A Viking land based antisubmarine warfare maritime and reconnaissance aircraft, describing flight controls, structural design, underslung podded engines and operational equipment
06 p0758 A72-17583
- Fatigue damage factor and failure probabilities in structural design for multilevel repetitive cyclic stresses
06 p0896 A72-17965
- Quasi-linearized solution to nonlinear Volterra equations in design of structures under creep deformations
06 p0897 A72-18318
- Structural design primal and dual linear programming problem decomposition into sum and difference problems with form of original equation
07 p1026 A72-18810

Minimum weight design of elastic sandwich beam with segmentwise constant stiffness under displacement and stress constraints, using iterative solution and finite element analysis [AD-745488] 07 p1092 A72-19825

Thin walled box beam optimal design, noting cross section areas and dimensions with permissible walls and flanges safety and stability 08 p1243 A72-21240

Automated minimum weight design of ring and stringer stiffened conical shells, using membrane theory for prebuckling analysis 08 p1245 A72-21599

Optimal design of anisotropic composite material annular plates by numerical method 08 p1246 A72-21673

German monograph on optimal design of gyroscope using spherical static gas bearing 08 p1173 A72-22174

Titanium-boron-epoxy composite materials selection and fracture mechanics criteria for B-1 bomber structural design 09 p1317 A72-22477

Optimization of load-carrying elastic lattice structures designed on prescribed surface 09 p1402 A72-22746

Papers on design for high temperature environments covering structural fatigue, creep interaction and ratchetting deformation and inelastic stress analysis 09 p1406 A72-23196

Time and cycles to failure diagrams for strain rate and hold periods effects on high temperature metal creep fatigue in design analysis 09 p1407 A72-23199

Design information for machinery to incorporate welding positions and joints, fatigue mechanisms, loads, combined stresses and plate and cast materials properties 09 p1409 A72-23621

Book on plastic analysis and plate, shell and disk theories and design covering stress-strain concepts, laws and theorems 10 p1553 A72-23749

Mathematical modeling for structural analysis and design from viewpoint of methodology, physical principles, simulation, optimization, constraints and control theory [SMRT PAPER M 2/3] 10 p1556 A72-24393

Structural design systematology of statics and dynamics numerical approximate procedures based on variational principles and differential equations [SMRT PAPER M 7/4] 10 p1505 A72-24397

Literature review of structural safety, treating load, strength, dynamic structural and structural reliability analyses and design aspects 10 p1560 A72-25174

Sounding rocket heat pipe experiment in zero gravity, testing spiral and pedestal arteries and plain groove designs [AIAA PAPER 72-259] 11 p1739 A72-25204

Short time stress rupture test data correlation for design, using computerized time-temperature parametric methods [AIAA PAPER 72-327] 11 p1653 A72-25363

Transport aircraft fuselage computerized design, determining optimal structural distribution for strength and displacement constraints [AIAA PAPER 72-330] 11 p1727 A72-25366

Computerized structural design of aerospace vehicle, stressing automated routines for finite element models generation [AIAA PAPER 72-332] 11 p1727 A72-25367

Viking conical aeroshell structural prototype design, analysis and testing, comparing buckling failure data with theoretical predictions [AIAA PAPER 72-370] 11 p1725 A72-25395

Space shuttle orbiter vehicle structural design configurations development and evaluation with respect to overall system weight and program cost [AIAA PAPER 72-373] 11 p1726 A72-25397

Boron-epoxy composite design for aircraft structures, discussing materials variations, strength prediction inadequacies and full scale tests 11 p1670 A72-25454

Asymmetric three layer beam design for elastic impact, proposing functional equation integration by computer method 11 p1732 A72-25531

Flight vehicle structures optimum design for random vibration environment, presenting formulation as nonlinear programming problem 11 p1736 A72-26003

Laminated reinforced plastics structural design criteria obtained by statistical and deterministic approach 11 p1737 A72-26235

Acrylics and polycarbonates properties in aircraft transparencies design, emphasizing cost and optical, mechanical, thermal and chemical properties 12 p1832 A72-27009

Prager-Shield theory for optimal plastic design extended to multicomponent cost functions and load conditions, applying to fiber reinforced plate 12 p1881 A72-27243

Fatigue failure information in structural design, considering low cycle, cumulative damage and time dependent conditions 12 p1884 A72-27641

Structural design, performance and costs of rigid or semirigid solar panels for geostationary satellites power supplies 12 p1758 A72-28034

Optimal design of elastic structures, emphasizing stability and response under applied static and dynamic loads 13 p2054 A72-28487

Dimensional chains calculation in differential method of manufacturing complex precision elements of casings 13 p1962 A72-28740

Hailstone impact simulator for aircraft damage prediction in testing prospective structural designs 13 p1938 A72-28855

A-4 Skyhawk horizontal stabilizer experimental graphite-epoxy composite construction, describing design, manufacturing and testing techniques [AIAA PAPER 72-358] 13 p2056 A72-28954

Optimal design of thin walled minimum weight aircraft shell structures, using linear programming 13 p2058 A72-29143

Fiber glass reinforced plastic structure design based on anisotropy, calculating optimum angle between reinforcement and horizontal axis 13 p2058 A72-29463

Aircraft structures design and development with composite materials, considering materials characteristics relations to structural components dynamic response 13 p2060 A72-29691

Minimum weight elastic structure designs under dynamic loads with constraints on stress displacements and natural oscillation frequencies 13 p2062 A72-30009

Aircraft landing gears structural systems design, taking into account different design criteria imposed by various national impact load norms 13 p1898 A72-30025

Structural design and electrical drive mechanism of helicopter hoist for rescue operations 13 p1912 A72-30097

Minimum weight hinged and unhinged cantilever truss design as variational problem, using dynamic programming method 14 p2166 A72-30690

Navy program for composites technology development in aircraft structures, discussing design, reliability and cost [ASME PAPER 72-DE-3] 14 p2073 A72-30860

High modulus composites structural design applications, considering fatigue performance vs cost [ASME PAPER 72-DE-24] 14 p2167 A72-30866

Control design for dynamic/vibratory loading of high speed rotating machinery, discussing rotor, bearing span and support stiffness and coupling centering [ASME PAPER 72-DE-39] 14 p2167 A72-30872

Optimal plastic design of doubly symmetric closed ring and frame structures of idealized sandwich section under uniform internal pressure 15 p2322 A72-31346

Composite materials for engineering component and structure design, considering mechanical properties and cost-effective performance 15 p2260 A72-31443

Coupled flexural longitudinal vibrations of circular arc girder with symmetrical cross section, discussing optimal design 15 p2324 A72-31487

Arctic environment surface effect vehicle design, considering structures, drag, lift, propulsive power and range 15 p2181 A72-32125

Structural components design from fiber composites, noting computer programs for structural and stress analysis 15 p2328 A72-32128

Structural design optimization procedure based on sequence of linearizations with iterative convergence through series of least critical intermediate solutions in hyperspace 15 p2331 A72-32551

Buckling strain effects on critical stresses in design of longitudinally corrugated shells for axial compression 15 p2333 A72-32680

Structural design optimization by geometric programming, illustrating computerized technique on two bar truss and ship bulkhead problem 16 p2366 A72-32913

Optimal plane elastic trusses under alternative loads, designing for smallest total volume of bars with upper stress bound 16 p2466 A72-33017

Thin walled elastic structures optimization by overall and local buckling coincidence, discussing compression column design 16 p2468 A72-33200

Exact differential equation derived for optimal design of straight nonprismatic column subject to creep buckling 16 p2474 A72-34132

Time and temperature independent permissible deformation limits as basis for dimensioning of cyclically and multiaxially stressed plastics structural components 16 p2416 A72-34147

Elastic-plastic systems under dynamic loadings, discussing compounded shakedown load solution by zero work and direct search methods [ASME PAPER 71-APMW-27] 17 p2624 A72-34309

A computer system for structural design 17 p2522 A72-34743

Elastoplastic structural analysis from design viewpoint, discussing load limits and stability estimates based on large deformation assumption 17 p2632 A72-35113

Multilevel hierarchical structural design optimization, proposing component by component ascent method of dynamic programming 17 p2533 A72-35171

Composite materials technology utilization in structural design, considering stiffness, strength, weight, fatigue properties, adhesive joining and structural reliability 17 p2633 A72-35283

Invariant imbedding and optimum beam design with displacement constraints. 17 p2634 A72-35406

A finite element approach to optimal design of plastic structures in plane stress. 18 p2739 A72-37165

Natural frequencies and dynamic response constraints in optimal structural design, considering mathematical programming aspects 18 p2739 A72-37167

Active controls - Changing the rules of structural design. 19 p2748 A72-37681

Book - Advances in creep design 19 p2874 A72-37701

A rational approach to creep design. 19 p2874 A72-37706

Mathematical relationships for primary, secondary and tertiary creep and their use in extrapolation of tensile creep data. 19 p2874 A72-37707

A flutter optimization program for aircraft structural design. [AIAA PAPER 72-795] 19 p2876 A72-38116

Designing aircraft structure for resistance and tolerance to battle damage. [AIAA PAPER 72-773] 19 p2752 A72-38138

Structural development of the L-1011 Tri-Star. [AIAA PAPER 72-776] 19 p2876 A72-38139

Polymoment homogeneous solution characteristics in the theory of elasticity for design calculations 20 p2979 A72-39587

The carrying capacity of frames under the influence of concentrated forces 20 p2981 A72-39919

Determination of the limits of applicability of a continuous model when calculating a discrete polar lattice disk 21 p3122 A72-41344

Influence of deviations in the shape of the base surface on the precision of turbine blade machining operations 22 p3182 A72-41863

Russian book - Design principles in aircraft construction. 22 p3136 A72-42074

Minimum weight elastic structure designs under dynamic loads with nonlinear constraints on stress displacements and natural oscillation frequencies 22 p3236 A72-42737

Wing flutter prevention in SST structural design, using finite element model and lifting surface aerodynamic theory 22 p3237 A72-42760

Aircraft structural design loads definition by mission analysis criteria, taking into account gust loads via power spectral density method 22 p3138 A72-42828

The influence of production imperfections on design of optimum structures. 22 p3239 A72-42841

Optimum design of circular sandwich plates. 22 p3239 A72-42843

Dangerous structural failure characteristics due to idealized design optimization, discussing shell buckling instabilities 22 p3240 A72-42895

Bayesian statistical decision theory and reliability-based design. 22 p3240 A72-42967

Structural design optimization via area ratio method, developing shape factor design charts [SAWE PAPER 937] 23 p3344 A72-43477

Minimum weight structural design, generalizing method for deriving sufficient optimality conditions

with examples for specified maximum deflection and critical nonconservative loading parameters

23 p3347 A72-43719

Equipment assembly design optimization by operational versions determination and criteria evaluation for optimal conditions, noting rotary wing design

23 p3294 A72-44024

Optimal design of indeterminate truss using geometric programming.

23 p3354 A72-44256

Dynamic programming and the optimum design of rotating disks.

23 p3356 A72-44550

Optimum design of joints - The stress severity factor concept.

24 p3455 A72-44728

Design and certification for executive type aircraft.

24 p3366 A72-44730

Fatigue design and test program for the American SST.

24 p3367 A72-44741

Plastic design of regular orthotropic grids with two adjacent edges fixed, free, or hinged.

24 p3456 A72-44794

Utilization of advanced composite materials for spacecraft and space shuttle applications.

24 p3417 A72-45153

STRUCTURAL DESIGN CRITERIA

Linear physical and nonlinear geometric formulation of design problem for prestressed rubber parts based on elasticity theory in terms of assembly requirements

19 p2871 A72-37428

STRUCTURAL DYNAMICS

U DYNAMIC STRUCTURAL ANALYSIS

STRUCTURAL ENGINEERING

Structural mechanics in reactor technology - Conference, Berlin, Germany, September 1971

10 p1556 A72-24392

Elastoplastic computation of thin cylindrical shells under cyclic loading

23 p3348 A72-43786

STRUCTURAL FAILURE

Monograph on stress corrosion failure, covering threshold stresses, fracture mechanics, electrochemical processes, hydrogen embrittlement, corrosidents, various steels and alloys, environmental effects, etc

01 p0082 A72-10166

Nylon parachute materials failure mechanics, considering friction, light, chemical and thermal effects

01 p0005 A72-10316

Factorial design model of materials fatigue failure under narrow band random vibrations

01 p0140 A72-10942

Tensometric damage detection in rolling contact bearings from bending stress spectrum, using Si strain and wire strain gages

01 p0078 A72-11379

Local buckling and collapse of thin walled lipped channel beams under critical end moments

01 p0144 A72-11396

Boeing 707 rapid decompression at 25,000 feet, noting rivet hole fatigue damage

02 p0167 A72-11715

Plastic collapse limit analysis for combined edge and pressure loading on circular cylindrical shells for Tresca yield condition

[ASME PAPER 71-PVP-22]

02 p0295 A72-12474

Quenched and tempered high strength and maraging steels delayed failure properties from notched-tensile sustained-load tests in distilled water

02 p0246 A72-12560

Mechanical breakdown prediction of loaded fiberglass reinforced plastic by seismoacoustic technique, investigating load effects on seismoacoustic emission

02 p0250 A72-12679

Mechanical breakdown characteristics of polymethyl methacrylate and polystyrene samples exposed to picosecond pulses emitted by Q switched laser

02 p0250 A72-12680

Fatigue breakdown and energy dissipation dependence on stress during bending of cylindrical steel and iron specimens

03 p0372 A72-13589

S-glass fiber bundles and composites under quasi-static loads, investigating strength characteristics and failure mechanism

04 p0592 A72-15474

Fatigue damage factor and failure probabilities in structural design for multilevel repetitive cyclic stresses

06 p0896 A72-17965

Deformation kinetics and failure of refractory Nb and Mo base alloys in plastic state under low cyclic fatigue

06 p0833 A72-18631

Cyclic loading failure criteria based on plastic deformation energy concepts, considering material load carrying capacity

06 p0899 A72-18650

Fractographic analysis of failure kinetics and crack formation in Al alloys, showing microfatigue intrusions and extrusions for various initial stress levels

06 p0834 A72-18653

Compression strength theory for monodirectional reinforced homogeneous anisotropic and piecewise homogeneous composite materials, using microvolume stability loss failure mechanism

06 p0838 A72-18655

Safety factor distribution function for plastic collapse of structure with random resistance members, discussing variance-expected value ratio

09 p1406 A72-23075

Sonic boom effects on structures, discussing ground motion, direct excitation by shock waves and damages

09 p1304 A72-23318

Summary of 1971 Stockholm workshop on sonic boom effects, discussing humans, animals and structure exposure and interdisciplinary aspects

09 p1273 A72-23324

Satellite long life assurance, investigating shuttle era spacecraft program cost relationship to mean time to failure

[AIAA PAPER 72-225]

10 p1551 A72-24436

Fatigue failure modes of composite materials, considering fiber breakage, delamination, matrix cracking, interface debonding and void growth

11 p1670 A72-25461

General aviation aircraft structural safety studied with 1547 accident histories, noting IFR and turbulent weather conditions predominance

[SAE PAPER 720308]

11 p1575 A72-25572

Computer program for bifurcation buckling analysis of shells under collapse load, using strain energy methods and two dimensional finite difference grid

11 p1736 A72-25980

Fatigue failure criteria under combined stress conditions, considering complex form, thin and thick walled cylinders as test specimens

12 p1828 A72-27317

Fatigue failure tests of low carbon Mn steel, analyzing structural damage under cyclic loads in relation to temperature curve

12 p1829 A72-27458

Collapse loads of symmetrically tapered cantilever beams under uniformly distributed end shear, considering optimum tapering angle for minimum weight

13 p2059 A72-29596

Dynamically similar wind tunnel models for transonic aeroelastic studies of aircraft failures or structural damage and flutter margins

[ONERA, TP NO. 1082]

13 p1939 A72-29672

Ni-Cr-Ti steel aircraft structural element fatigue life calculation based on failure mechanism involving crack propagation

14 p2164 A72-30429

Thermal shock produced edge effect, analyzing brittle material heat resistance and failure, using thermoelastic heated cylinder

14 p2165 A72-30437

Cast Al alloys tendency to brittle failure in percussive bending tests estimated from force strain oscillograms

14 p2124 A72-31035

Debonded laminar composite torsional stress intensification analysis near circular shaped imperfection based on Hankel transform and dual integral equations solution

15 p2261 A72-32247

Aerodynamic noise and structural fatigue failure research and test facility, concerning supersonic jet and V/STOL aircraft

16 p2342 A72-32900

Structural failure probability distribution for threshold stress crossings in random vibration, using Poisson approximation

16 p2468 A72-33227

Compressed initially bent Shanley column analyzed for geometric imperfection coupling and material behavior effects on critical time to creep collapse

16 p2474 A72-34131

Achieving fail safe design in rotors.

[AHS PREPRINT 673]

17 p2491 A72-34513

Russian book on metal fatigue and inelasticity covering structural inhomogeneities, static and dynamic loading, failure mechanisms, deformation, temperature effects and test methods

17 p2566 A72-34649

A fracture mechanics analysis of adhesive failure in a single lap shear joint.

[SESA PAPER 1990A]

17 p2630 A72-34815

Analysis of a partially cracked panel.

18 p2735 A72-36771

Numerical solution for the mean first-passage-time for snap-through of shells.

18 p2737 A72-37061

Investigation of the snap-through of rigidly clamped shallow spherical shells under the action of a dynamic stepped load

19 p2877 A72-38163

Statistical failure characteristics and probability evaluation of the static strength of structural components made of composite polymer materials

20 p2943 A72-38942

STRUCTURAL MEMBERS

The broad range detection of incipient failure using the acoustic emission phenomena.

20 p2925 A72-39286

Longitudinal tensile failure of unidirectional fibrous composites.

20 p2944 A72-39789

Fatigue damage of aluminum alloy at high temperature.

21 p3066 A72-40716

Transverse shear effect on thin shells collapse load, considering influence on Shaprio yield surfaces

21 p3121 A72-41213

Perfectly plastic media under the action of multiparameter loads

21 p3123 A72-41393

Facility for studying the failure of structural elements in a supersonic high-temperature flow containing a controlled number of abrasive particles

21 p3043 A72-41717

Limit analysis and plastic design of structural elements of complex shape.

22 p3235 A72-42577

Transport aircraft wing compression panel failure in bending test due to stringer interruptions, analyzing structural deficiency via column and beam bending theories

22 p3183 A72-42827

Aircraft structural safety criteria based on acceptable failure probability, determining critical load levels

22 p3138 A72-42829

Fatigue strength and fail-safe aspects of lug joint in aircraft structures, considering tension-compression load, fretting corrosion, prestress and residual stress

22 p3239 A72-42851

Dangerous structural failure characteristics due to idealized design optimization, discussing shell buckling instabilities

22 p3240 A72-42895

Best linear invariant estimation of Weibull parameters - Samples censored by time and truncated distributions.

22 p3199 A72-42969

Detection of structural deterioration and associated airline maintenance problems.

[SAWE PAPER 918]

23 p3293 A72-43465

Failure and crack formation in gas turbine engine compressor disks under variable stresses from fatigue tests, considering safety factors

23 p3347 A72-43736

The surface flaw in aircraft structures and related fracture mechanics analysis problems.

23 p3352 A72-44228

Polymer fatigue failure mechanism examination on constant deflection type testing machine, investigating applied stress and temperature effects on crack propagation rate

24 p3455 A72-44631

STRUCTURAL FATIGUE

U FATIGUE [MATERIALS]

STRUCTURAL FOUNDATIONS

U FOUNDATIONS

STRUCTURAL INFLUENCE COEFFICIENTS

Determination of influence coefficients for composite structures by holographic interferometry.

19 p2873 A72-37614

Inelastic transverse strain coefficient and Poisson ratio dependences on plastic and brittle properties

23 p3348 A72-43752

Aluminum stiffening structural sections selectively reinforced with boron/epoxy composite materials, discussing mechanical properties, cost effectiveness and stress distribution

01 p0139 A72-10737

Temperature and loading conditions effects on structural element service life, showing partial healing process of microdefects

03 p0443 A72-13454

Soviet book on structural shape effects of machine parts on durability, covering production, gear transmissions shafts, axles, threaded joints, etc

03 p0364 A72-13966

Hybrid representation for structural component by vibration modes with free or fixed connection points and boundary conditions selection to optimize accuracy

05 p0736 A72-16084

Interaction surfaces for structural members under combined axial, shear force and bending moment, investigating shear effect on yielding of arches

07 p1090 A72-19730

Boron and carbon fiber reinforced plastics applications in aircraft and engine structural components, discussing dynamic and impact damping properties compared to conventional materials

13 p1982 A72-28555

Aircraft structures design and development with composite materials, considering materials characteristics relations to structural components dynamic response

13 p2060 A72-29691

Temperature distribution of structural element with heat shield and metallic layer, determining ablation process for thermal flux at surface

14 p2170 A72-30593

Time and temperature independent permissible deformation limits as basis for dimensioning of cyclically and multiaxially stressed plastics structural components

16 p2416 A72-34147

Linear physical and nonlinear geometric formulation of design problem for prestressed rubber parts based on elasticity theory in terms of assembly requirements

19 p2871 A72-37428

Polarization optical method for analyzing local stress concentrations in structural members.

19 p2805 A72-38768

Temperature and loading conditions effects on structural element service life, showing partial healing process of microdefects

24 p3458 A72-44929

STRUCTURAL RELIABILITY

Nonlinear boundary value problem of creep for isotropic bodies with random mechanical properties under random loads, calculating structural component reliability and service life

02 p0289 A72-11619

Statistical methods of stress and reliability analyses of elastic systems under random external loads

03 p0453 A72-14206

Composite materials durability and strength estimations, using reliability theory for failure rate characteristic

05 p0680 A72-15991

Thin walled box beam optimal design, noting cross section areas and dimensions with permissible walls and flanges safety and stability

08 p1243 A72-21240

Wilga 3 aircraft structure service life from structural fatigue theory and tests, emphasizing operational load distribution measurement

08 p1110 A72-21634

Literature review of structural safety, treating load, strength, dynamic structural and structural reliability analyses and design aspects

10 p1560 A72-25174

Flexible solar cell array module design technique, discussing electric welding procedure and equipment parameters effects on breaking strength and reliability

12 p1758 A72-28036

Reliability analysis of automatic systems with structural changes accumulated during operation, noting service life determination and damage prevention

13 p1936 A72-29169

Minimum weight reliable beams and frames calculation for random loads, using one degree of freedom system to obtain closed form solution

14 p2164 A72-30237

Computer algorithms and programs contribution to aircraft structure operational reliability and fatigue life calculation

14 p2164 A72-30288

Space Shuttle Orbiter onboard ultrasonic system for structural integrity tests and assessment, noting limitation factors due to configuration and vehicle launch noise effects

15 p2256 A72-31698

Composite materials technology utilization in structural design, considering stiffness, strength, weight, fatigue properties, adhesive joining and structural reliability

17 p2633 A72-35283

Aircraft engine lifetime and turbine blade reliability

20 p2963 A72-39916

Experimental investigation of the elastic characteristics of composite bearings in turbine machinery

for the purpose of increasing their efficiency and reliability during nonlinear vibrations of the rotor

22 p3181 A72-41860

ICAO structural airworthiness requirements relation to air transportation safety, considering maneuver and gust loads in terms of limit load concept

22 p3138 A72-42830

International Conference on Structural Safety and Reliability, Washington, D.C., April 9-11, 1969, Proceedings.

22 p3240 A72-42966

Bayesian statistical decision theory and reliability-based design.

22 p3240 A72-42967

Response of linear and nonlinear continuous structures subject to random excitation and the problem of high-level excursions.

22 p3241 A72-42970

Reliability analysis in the estimation of transport-type aircraft fatigue performance.

22 p3241 A72-42971

Testing procedures for the design and life estimation of fatigue-sensitive structures.

22 p3241 A72-42974

Optimal fleet reliability under fatigue and chance overload in service.

24 p3365 A72-44656

Life prediction of expulsion bladders through fatigue test and fold strain analysis.

24 p3455 A72-44672

Reliability analysis based on time to the first failure.

24 p3455 A72-44727

Structural fatigue cost penalties in airline operations, considering inspection, maintenance and carrying capacity reduction

24 p3367 A72-44743

Composite materials durability and strength estimations, using reliability theory for failure rate characteristic

24 p3418 A72-45733

STRUCTURAL RIGIDITY

U STRUCTURAL STABILITY

STRUCTURAL STABILITY

NT SHELL STABILITY

Michelson interferometers with large interference fields for plasma diagnostics emphasizing structural rigidity, monochromatic light pulse power, instruments vibrations resistance, etc

02 p0223 A72-11402

Alumina dispersions structural stability in Fe and Ni based alloys metal matrices

02 p0241 A72-11445

Three dimensional problems in stability, elasticity and plasticity theory for isotropic, anisotropic and inhomogeneous bodies, noting applications to machine construction, civil engineering, geophysics, etc

02 p0288 A72-11602

Edge effect equations for stability, vibration and deflection of asymmetric three layer circular plate and cylindrical shell with filler

02 p0288 A72-11605

Flexible viscoelastic orthotropic plates and shells obeying linear heredity relations, solving stability and bending problems by Laplace transform

02 p0290 A72-11625

Elastic stability of body under conservative loads, deriving energy criterion with thermodynamic laws

02 p0292 A72-12003

Aeroelastic stability of flat anisotropic sandwich plates in supersonic compressible fluid flow

02 p0297 A72-12614

Square orthotropic and isotropic plates stability with square hole under uniformly distributed load

02 p0299 A72-12685

Three layer plates elastoplastic stability, describing breakdown conditions by five differential equations with five unknown variables

02 p0299 A72-12690

Elasticity tensor formulas for wave propagation, vibration and stability of deformed isotropic solids

03 p0448 A72-13887

Stress concentration and stability of plates and shells weakened by holes

03 p0450 A72-14110

Stress concentration at hole in plates after stability loss, using branching and small parameter method

03 p0450 A72-14111

Potential energy principle in equilibrium stability problems for flexible extendable thread, using Liapunov method

03 p0390 A72-14208

Elastoplastic stability of structural rods in unloadable systems, considering load carrying capacity increase by critical state onset delay

03 p0454 A72-14214

Three layer plates stability with light fillers, noting filler thickness effect on approximate solutions accuracy

03 p0454 A72-14377

Cracked rectangular plates vibration and stability, computing eigenvalues, natural frequencies and moment distribution

04 p0583 A72-14448

Point contact Josephson junctions arrangement for millimeter and submillimeter region, showing mechanical stability

04 p0561 A72-14919

Shear stress and stability of composite elastic double layer with plane circular crack under torsion

04 p0588 A72-15054

Time delay effect on stability of viscoelastic cantilever column under retarded follower load

04 p0590 A72-15186

Papers on aerospace structure by N. J. Hoff covering aircraft framework, stress analysis, structural stability, shell theories, bending, buckling, monocoque and sandwich structures, etc

04 p0591 A72-15238

Open resonators stability analysis, describing integral equations eigenfunctions and eigenvalues short wave asymptotic expansions

04 p0502 A72-15435

Vibration and stability of rectangular plates with mixed edge conditions, reducing dual series equations to homogeneous Fredholm integral equations [ASME PAPER 71-WA/APM-21]

05 p0733 A72-15959

Continuous bodies incremental deformation and stability under initial stress, discussing relationships for elasticity constants and material stress tensors [ASME PAPER 71-WA/APM-9]

05 p0734 A72-15970

Elastically supported cantilever stability with continuous lateral restraint under uniform distributed axial load, developing boundary conditions

05 p0737 A72-16118

Structural stabilization of austenitic steels with manganese, maintaining toughness and sensitivity to martensitic transformation by hammer hardening

05 p0673 A72-16145

Structural stabilization of austenitic steels with manganese, noting chemical purity and cleanliness conditions

05 p0673 A72-16146

Transverse vibrations stability of launching rocket body, allowing for propellant sloshing and body elastic deformation

05 p0731 A72-17187

Vertical shaft stability on elastic sliding bearings, considering passage through self oscillation zone

06 p0894 A72-17683

Dispersion strengthened Co alloys structural stability, tensile and creep rupture strengths and hot corrosion properties

06 p0829 A72-17829

Uniformly curved fluid conveying tube free vibration and stability, showing flow velocity, fluid pressure and Coriolis force effects on natural frequency

06 p0821 A72-17853

Mathematical modeling of discrete nonconservative dynamic elastic systems for finite sensitivity, using Liapunov stability

06 p0840 A72-18320

Convergence conditions for Galerkin method, applying to boundary value problems of structural stability and critical buckling loads

07 p1025 A72-18798

Elastic stability of laminated circular plate with rectangular anisotropy under in-plane compression forces along edge

07 p1090 A72-19693

Composite elastic beams equations under initial stress, investigating flexural wave propagation and structural stability

07 p1090 A72-19733

Critical stability and supercritical equilibrium behavior of compressed viscoelastic rod

07 p1091 A72-19761

Stability loss of circular annular plate under compression, determining critical loads with inner edge free and outer edge hinged or clamped

07 p1092 A72-19900

Quasi-static stability of sandwich plates hinged over edge in finite difference formulation

07 p1094 A72-20213

Elastic rods and rings stability under compression beyond elasticity limit, determining equilibrium branching characteristics near bifurcation point

07 p1095 A72-20314

Gravitational field simulation by centrifugal force for structural stability and self weight buckling studies

07 p1096 A72-20428

Local stability of thin walled isotropic elastic cylinder, deriving characteristic equations for critical load calculation

08 p1242 A72-20969

Rational parameters and reinforcement of stiffened laminar plates with instability tendencies under compression loads

08 p1243 A72-21236

Thin walled box beam optimal design, noting cross section areas and dimensions with permissible walls and flanges safety and stability

08 p1243 A72-21240

Critical compressive stresses leading to instability of layer fastened to elastic half space

08 p1244 A72-21368

Elastic stability of nonlinearly elastic anisotropic body analyzed via variational principles in three dimensional theory 08 p1246 A72-21707

Plane stability of isotropic plate with straight line series of holes reinforced by complex elements or multicomponent rings, determining stress concentrations 08 p1246 A72-21710

Elastic rectangular plate instability in pure bending along two perpendicular directions solved by Karman nonlinear equation reduction to partial differential equations integration 08 p1247 A72-21817

Quadrilateral four node nonconforming plate bending finite elements for structural vibration and stability analysis 08 p1250 A72-22142

Necking instability in rectangular elastoplastic plate under biaxial tension, obtaining condition for equilibrium bifurcation by variational method 09 p1398 A72-22532

A-15 superconducting films preparation computer-aided method, noting alloying effects and crystal structure stability determinations applications 09 p1368 A72-22559

Mathematical thermodynamic theory for plastic deformation induced internal structure changes in rheological material, describing homogeneous response by temperature and deformation gradients 09 p1403 A72-22761

Hamiltonian used as Liapunov function in stability evaluation of one dimensional continuous system loaded with polygenic forces 09 p1406 A72-23077

Parametric instability of flat rectangular plates under periodic or shear sinusoidal in-plane boundary loads 09 p1408 A72-23463

Parametric dynamic stability equations and boundary conditions for thin walled open cross section beam under axial load, taking into account longitudinal deformation effect [ASME PAPER 71-APM-LL] 10 p1554 A72-24184

Upper bounds on lumped and continuous dynamic systems motion under loads and perturbations, discussing structure stability conditions [ASME PAPER 71-APMW-3] 10 p1554 A72-24188

Simply supported skew plates stability under combined loading, noting wing and tail design applications for high speed aircraft and missiles 10 p1555 A72-24196

Gradient iterative techniques application to finite element vibration and stability analysis of skew plates 10 p1558 A72-24878

Critical compressive buckling and stability of straight beams under axial and transverse loads calculated by three unknowns methods 10 p1560 A72-25121

Hypersonic nonlinear aerodynamic loading effect on panel flutter, examining stability for various initial conditions [AIAA PAPER 72-345] 11 p1728 A72-25374

Viking conical aeroshell structural prototype design, analysis and testing, comparing buckling failure data with theoretical predictions [AIAA PAPER 72-370] 11 p1725 A72-25395

Prestressed circular ring snap-through under continuously distributed or discrete torsional loads, determining critical torque by asymptotic solution 11 p1734 A72-25721

Alloying addition effects on structural stability and particle-matrix cohesion in metal-alumina composites 11 p1665 A72-26864

Linear programming simplex method for static load limit of circular arch 11 p1739 A72-26921

Elastic inhomogeneous continuum stability dependence on internal stress tensors field and boundary conditions, noting application to composite materials 12 p1843 A72-27171

Plane unstable deformation and stability loss of incompressible laminated composites under highly elastic strains 12 p1880 A72-27229

Linearized thermal viscoelasticity theory for stability, large strain and wave propagation problems, taking into account heat generating effects 12 p1880 A72-27233

Symmetric discrete elastic conservative structural systems stability boundary estimation through reduction to linear equation recursive solution, using perturbation method 12 p1880 A72-27242

Structural effects of meridian imperfections in symmetrically loaded elastic thin shell of revolution 12 p1881 A72-27255

Ultimate safe load estimates for stability of isotropic elastic materials 12 p1883 A72-27563

Structural system dynamic instability regions determination by finite element and conjugate gradient methods 12 p1884 A72-27847

Russian monograph on three dimensional deformable bodies stability covering linearized equations for subcritical deformations and strength analysis of low shear rigidity structures 12 p1888 A72-28337

Axisymmetric stability of spherical cap rigidly clamped at contour of shells of revolution, using variational difference method for uniformly distributed external pressure 13 p2053 A72-28393

Rods resistance to thermal shock under coupled thermoelasticity conditions, calculating critical thermal flux during thermodynamic compression waves propagation 13 p2053 A72-28399

Equilibrium state stability in elastic conservative system, relating system postbuckling behavior to critical branching point 13 p2054 A72-28478

Structural approach to elastic stability in buckling problems, simplifying deformation concepts and loading condition definition 13 p2054 A72-28479

Creep stability of bars and thin plates and shells for given loading force, considering instability criteria 13 p2054 A72-28481

Optimal design of elastic structures, emphasizing stability and response under applied static and dynamic loads 13 p2054 A72-28487

Heated three layer plate with load-carrying layers of different materials, thicknesses and temperatures, calculating stability under uniaxial tension 13 p2055 A72-28736

Critical force instability analysis for rectangular plates with mixed boundary conditions, using deflection forms in Fourier series 14 p2165 A72-30575

Stability of compressed elastic rod with continuously varying stiffness, deriving solution via influence function 14 p2166 A72-30691

Finite element method application to dynamic stability of thin plates and shells, noting nuclear reactor structural analysis [SMRT PAPER M 2/1] 14 p2166 A72-30723

Structural systems stability and natural frequency analysis eigenvalue problems solution by Sturm sequence method, using finite element technique 14 p2168 A72-30931

Optimal geometrical and physical properties of sandwich plates with rigid cores under compressive load, discussing critical stress and structural stability 15 p2322 A72-31359

Stability analysis of thin walled circular cylindrical shell under shearing force action to one end, calculating buckling modes 15 p2324 A72-31483

Unsymmetrical coupled columns stability under nonconservative lateral and end loading, using finite element method 15 p2331 A72-32557

Analog simulation method for highly redundant structure optimization based on reproducing structure mechanical behavior in stabilized stress states 16 p2463 A72-32899

Strain energy methods for stability of finitely deformed elastic membranes under conservative loading 16 p2465 A72-33002

Linearly elastic, transversely isotropic multilayer system, presenting stress and stability problem for two dimensional strain states 16 p2466 A72-33022

Stable bifurcation mode prior to instability in thick walled cylindrical viscoplastic pressure vessel under internal hydrostatic pressure 16 p2474 A72-34129

Stability analysis of a pinned-end beam undergoing non-linear free vibration. 17 p2623 A72-34236

Stability of a beam on an elastic foundation subjected to a follower force. 17 p2626 A72-34331

The elastic stability of two-parameter nonconservative systems. [ASME PAPER 72-APM-43] 17 p2627 A72-34782

Elastoplastic structural analysis from design viewpoint, discussing load limits and stability estimates based on large deformation assumption 17 p2632 A72-35113

Local potential concept based variational method for eigenvalue problems of disturbance damping or amplification in stability analysis 17 p2583 A72-35641

Stability of a dome rigidly clamped over its edge under uniform external pressure 17 p2635 A72-35806

Clamped flat skew plates stability under inplane stresses in terms of oblique components, calculating elastic buckling coefficients via energy method 18 p2736 A72-36931

Some properties pertaining to the stability of circulatory systems. 18 p2737 A72-37060

Elastic stability of folded plate structures of triangular cross-section. 18 p2738 A72-37073

German monograph - Finite elements according to a theory of the second order on the basis of an extended variational principle with an application to the stability and stress computation of simple symmetrical I-beams under consideration of the deformation of the cross-section 19 p2871 A72-37479

Study of the structural stability and mechanical properties of molybdenum subjected to the prolonged action of temperature and stress 19 p2818 A72-38013

Characteristics of the thermal and stressed states of cooled shell-type blades 20 p2963 A72-39911

Experimental investigation of the stability of compressed heated three-layer plates beyond the proportional limit 20 p2981 A72-39920

Applicability of the Euler approach to investigate the strain stability of anisotropic nonlinearly elastic bodies under finite subcritical strains. 21 p3116 A72-40273

On the growth kinetics of Laves phase precipitates in Fe-Ti alloys at elevated temperatures. 21 p3069 A72-41011

Elastic isotropic material mechanical and thermal constitutive equations restrictions investigation to ensure local stability under perturbations of deformation gradient and temperature field 21 p3120 A72-41203

The post-flutter oscillations of discrete symmetric structural systems with circulatory loading. 21 p3120 A72-41207

Simply supported column dynamic stability under axial periodic load, discussing external viscous damping effect 21 p3121 A72-41242

Calculating the stability of centrally compressed thin-walled bars with various profiles 21 p3126 A72-41549

Model studies of plate and shell stability 22 p3233 A72-42055

Investigation of the stability and vibrations of beams of variable rigidity by the method of bilateral estimates 22 p3234 A72-42147

Stability of elastoplastic rod under external conservative and nonconservative forces, discussing nonconservative component effect and critical load magnitude 22 p3234 A72-42149

Elastic isotropic plates stability for nonlinear stress-strain relations, noting effect of deformation tensor invariant on critical load magnitude 22 p3234 A72-42275

Structons /close-neighbor arrangements/ stability and characteristics in anhydrous borate crystals and glasses containing bridging and nonbridging or tribonded oxygens 22 p3197 A72-42795

Structural stability of anisotropic plates and structures, developing method based on data for corresponding isotropic problem 22 p3239 A72-42847

Material properties, metallurgy, production technology and operational factors effects on machinery structural strength 23 p3347 A72-43733

Gas turbine blades of cast ZhS6K heat resistant alloy, investigating structural strength from fatigue test data 23 p3347 A72-43734

Stability and vibration of transversely isotropic beams under initial stress. 23 p3350 A72-44057

Stability of orthotropic stiffened composite plates. 23 p3352 A72-44109

Liapunov method extension to dynamically loaded elastically end-restrained columns stability and frames forced vibration boundedness problems [ASCE PREPRINT 1639] 23 p3352 A72-44110

Stability of an elastoplastic rod of varying resistance to tension and compression with allowance for the initial stresses 23 p3352 A72-44162

The use of bar buckling eigenfunctions in the stability analysis of clamped skew plates. 23 p3355 A72-44456

STRUCTURAL STRAIN

Al and steel plate penetration, perforation and fragmentation under hard steel sphere impact at and above ballistic velocities, investigating velocity and strain histories 05 p0672 A72-16115

Thermoelastic characteristics and crystal phase distribution effect on microstructural stresses and thermal expansion of polycrystalline refractory materials 07 p1018 A72-20133

WC powder milling and sintering, investigating strain and dislocation density effects on behavior by scanning electron microscope 08 p1176 A72-21440

Static and dynamic analysis of legged planetary instrument landers, taking into account structural flexibility, elastic-plastic gear load characteristics and soil properties

[AIAA PAPER 72-371] 11 p1725 A72-25396
Strain work per unit time for static and dynamic pressing processes, taking into account inertial forces

13 p1966 A72-29466

Two dimensional fibrous medium model for strain and stress analysis of structural plate formed by three dimensional grid of rods

16 p2467 A72-33115

Creep in structures - Conference, Goteborg, Sweden, August 1970

16 p2411 A72-34110

Strain-rupture criteria for simple and complex loads

23 p3349 A72-43954

Life prediction of expulsion bladders through fatigue test and fold strain analysis.

24 p3455 A72-44672

Undercarriage loadings of three aircraft - Porter PC-6, Venom DH-112 and Mirage IIIS.

24 p3367 A72-44738

Thermoelastic characteristics and crystal phase distribution effect on microstructural stresses and thermal expansion of polycrystalline refractory materials

24 p3416 A72-45759

STRUCTURAL VIBRATION

NT PANEL FLUTTER

NT SELF INDUCED VIBRATION

NT SUBSONIC FLUTTER

NT SUPERSONIC FLUTTER

NT TORSIONAL VIBRATION

NT TRANSONIC FLUTTER

Perturbed vibrational motion in isotropic elastic solid, using nonlinear Truesdell equations

01 p0101 A72-10039

Finite element method for determining transient response of box-type structure to traveling sonic pressure wave

01 p0136 A72-10219

Curved beam finite elements comparison for structural vibration problems, obtaining ring natural frequencies

01 p0136 A72-10222

Direct-iterative eigensolution technique for simultaneous determination of structural system lowest frequencies and modal patterns, using reduced generalized coordinates and Stodola-Vianello method [SAE PAPER 710784]

01 p0137 A72-10275

Initial interaction phase between thin shallow conical shell vibrating axisymmetrically and ideal incompressible fluid, determining hydrodynamic pressure effects

01 p0050 A72-10574

Transient response of Al cylindrical shells to longitudinal impact, indicating wave front propagation at plate velocity

[SESA PAPER 1885] 02 p0287 A72-11505

Edge effect equations for stability, vibration and deflection of asymmetric three layer circular plate and cylindrical shell with filler

02 p0288 A72-11605

Thick orthotropic off-axis laminated plates vibration equations solution, presenting natural frequencies spectra and modal functions

02 p0249 A72-11988

Vibration and buckling analysis of doubly curved composite monocoque plates and shells of positive and negative Gaussian curvature, examining stacking sequence effect

02 p0292 A72-11990

Unpredicted structural vibration in Comet and Electra aircraft, Graf Zeppelin dirigible, missile antennas, etc

02 p0292 A72-12002

Papers on noise and vibration control covering acoustics in free space, outdoors, small enclosures and rooms, measurement, analysis and design problems

02 p0258 A72-12100

Springs fracture and vibration in injection pumps by analog model

02 p0236 A72-12437

Two finite conducting cylinders radial vibrations in E polarized electromagnetic wave, detailing pressure distribution and resonance effects

02 p0262 A72-12877

Finite element discrete model for large aspect ratio wing transverse vibrations, using inhomogeneous elements with various stiffness-length relations

03 p0442 A72-13189

Fluid filled fiber reinforced spherical shells extensional vibrations, evaluating equivalent elastic orthotropic compliance constants, natural frequencies and mode shapes

03 p0443 A72-13403

French book on thin elastic structures vibration, describing antivibrational devices and rotating machines balancing

03 p0445 A72-13682

Two dimensional boundary value problem in elasticity for rectangular prism vibrations, considering dynamic stress and frequency characteristics

03 p0449 A72-13908

Linear nongyroscopic conservative system stability from modified Lagrange equations of motion, using pseudo degree of freedom concepts and vibration method

03 p0362 A72-14394

Cracked rectangular plates vibration and stability, computing eigenvalues, natural frequencies and moment distribution

04 p0583 A72-14448

Free vibration and buckling of orthotropic skew plates with different edge conditions, using Ritz variational method

04 p0584 A72-14508

Natural vibration frequencies calculation of straight bars with stepwise variable cross sections by iterative technique based on method of three unknowns

04 p0584 A72-14522

Three dimensional analysis for free vibrations of simply supported viscoelastic rectangular plates

04 p0585 A72-14841

Rectangular plates nonlinear vibrations under combined static and vibrational loads, using Bubnov-Galerkin method on Karman type nonlinear differential equations

04 p0588 A72-15061

Fundamental frequency calculation method for bars and plates with arbitrary fixity of rotations, discussing buckling and vibration with realistic boundary conditions

04 p0591 A72-15275

Step-by-step perturbation method for calculating vibration modes of aerospace structure

[ONERA, TP NO. 968] 04 p0592 A72-15552

Natural frequencies and vibration mode shapes of simply supported symmetric trapezoidal plates

04 p0592 A72-15564

Integral equation for lowest natural frequency of vibrating beams, using eigenfunction theory

04 p0593 A72-15565

Vibration and stability of rectangular plates with mixed edge conditions, reducing dual series equations to homogeneous Fredholm integral equations [ASME PAPER 71-WA/JP-21]

05 p0733 A72-15959

Alloying, thermal and mechanical treatment effects on Mg alloys damping properties under elastic vibrations, showing test results consistency with materials microdeformation theory

05 p0671 A72-15987

Aerospace vehicle noise induced structural vibration, presenting propellers, turbojet engine exhausts and sonic boom waves

05 p0739 A72-16597

Thermoelastic effect on flutter and vibration of built up delta wings with solid, stiffened and honeycomb/corrugated sandwich skins

[AIAA PAPER 72-174] 05 p0740 A72-16834

Flexible elastic plate nonlinear vibration response and noise transmission from turbulent boundary layer by Monte Carlo technique, discussing subsonic and supersonic flow regions

[AIAA PAPER 72-199] 05 p0651 A72-16850

Coriolis force effect on axially symmetric body oscillating slowly along axis in rotating viscous fluid

05 p0610 A72-17081

Longitudinal vibrations stability of launching rocket body, allowing for propellant sloshing, body dynamic deformation and motor dynamics

05 p0731 A72-17186

Transverse vibrations stability of launching rocket body, allowing for propellant sloshing and body elastic deformation

05 p0731 A72-17187

Environment acoustic resonant frequencies effect on flat steel plate vibration under direct and air flow vortex shedding excitations

06 p0894 A72-17768

Scaling laws for vibrating beams and plates, stressing shear and rotatory inertia effects

06 p0894 A72-17769

Algorithm for selective computation of large structural modifications effect on eigenmodes of linear structure

06 p0895 A72-17848

Aerospace structures harmonic vibration tests, discussing structures natural frequency spectrum, mode isolation, eigenmodes and inertial characteristics

06 p0896 A72-17948

Dynamic matrix analysis of vibrating three dimensional frame structures, comparing discrete and continuous mass systems

06 p0897 A72-17971

Spectral properties of differential displacement equations system describing natural vibrations of shell of revolution with m waves along parallel

06 p0897 A72-17990

Test facility for vibrations damping study of structural elements in water flow based on frequency and amplitude measurement at various flow conditions

06 p0796 A72-18364

Energy dissipation of vibrating structures in complex stress state, using generalized stresses and strains as coordinates

06 p0900 A72-18677

Shallow axially symmetrical spherical shell flexural vibrations, obtaining equations iterative solution

06 p0901 A72-18705

Nonlinear solid body system rotating and oscillating parts effect on spatial vibration stability, deriving excitation-natural frequencies relationship

06 p0850 A72-18711

Mixed boundary value problem of partial differential equations describing nonlinear viscoelastic vibration of clamped rods, examining asymptotic solution stability

06 p0901 A72-18716

Random vibrations in rectangular plate clamped on opposite sides by load, determining natural oscillation frequencies by Ritz technique

06 p0901 A72-18719

Numerical approximation of Pochhammer-Chree longitudinal vibration modes in elastic cylinders by quadratic spline functions

07 p1087 A72-18797

Oscillations and acoustic emission by interacting elastic shells in connecting medium, using quadratures with Green function

07 p1034 A72-18922

Natural frequencies and vibration modes of simply supported tapered skew rhombic plates, considering thickness and skew angle effects

07 p1088 A72-19116

Aircraft design for acceptable vibration level, discussing flight vibration and runway response

07 p0928 A72-19269

Periodically supported beams acoustically induced vibration response based on equivalent structural wavelength definition

[ASA PAPER E 14] 07 p1089 A72-19330

Vibration characteristics of simply supported unsymmetric trapezoidal plates

07 p1089 A72-19644

Equivaluminal vibration modes of multipolar elastic plate with traction free faces

07 p1089 A72-19644

Hovercraft noise and vibration source and reduction for improved crew and passenger comfort

07 p0912 A72-19644

Acoustic loads effect on carrying capacity and vibration stability of longitudinally stiffened cylindrical metal panels, investigating fatigue strength and stress-strain state

07 p1091 A72-19766

Random vibrational stress and displacement spectra for linear complex mechanical dissipative systems with strong resistance and finite degrees of freedom

07 p1091 A72-19763

Free vibration determination method for thin rectangular plate with arbitrary boundary conditions and thickness variations

07 p1092 A72-19857

Energy dissipation associated with transverse vibrations of sandwich metallic samples with damping coatings

07 p1094 A72-20135

Magnetoelastic vibrations of thin conducting plate in magnetic field, solving electrodynamic equations

07 p1095 A72-20315

Symmetrically loaded uniform thin circular ring natural vibration frequencies in radial and axial flexural modes, comparing experimental data with values predicted by group theory

07 p1096 A72-20499

Pinned-free beam response to transient support excitation, using pinned-pinned beam modal parameters

07 p1096 A72-20526

External pressure effects on cantilever rotating shaft vibration, determining critical whirling speed as function of pressure and area distribution by energy method

07 p1096 A72-20528

Vibrations causes and degrees of freedom relationship in rotor machines at critical velocities, determining rotor imbalance from amplitude characteristics

08 p1243 A72-21232

Nonlinear large amplitude vibration of beams for various support conditions, using finite element matrix displacement method

08 p1245 A72-21262

Dynamic radial vibrations and stresses in thick circular annulus of nonisotropic elastic material, using Hankel transform

08 p1246 A72-21793

Orthotropic circular cylindrical elastic shell vibration mode shape analysis by Vlasov equations, using asymptotic method

08 p1247 A72-21813

Variable wall thickness influence on axisymmetric vibrations frequencies and reduced masses of cylindrical elastic shell filled with ideal incompressible fluid

08 p1247 A72-21813

Concorde sonic boom measurement, discussing structural vibrational response 08 p1111 A72-21911

Vibrations in rotating systems - Conference, London, February 1972 08 p1224 A72-22127

Vibrational characteristics dependence on structural flexibility in gimbal bearings and supporting structure of two axis free gyroscopes and single axis rate gyroscopes 08 p1173 A72-22129

Vibration modes of bladed turbine wheel, formulating mathematical model 08 p1224 A72-22132

Vibration of reciprocating engine crankshafts and steam turbine, alternator and gas turbine rotor shafts supported on hydrodynamic sleeve bearings 08 p1225 A72-22133

Frequency dependent condensation method for vibration problems in structural dynamics, presenting results for spring-mass system with six degrees of freedom 08 p1250 A72-22143

Fundamental vibrations of long circular cylinder made of micropolar elastic solid, discussing dispersion equations 09 p1398 A72-22620

Two independent damping systems impact vibration analysis from solution of equations of motion by Laplace transformation 09 p1399 A72-22695

Damping coefficient increase in welded bodies under uniform stress and compression, torsion and bending vibration 09 p1406 A72-23076

Nonlinear dynamic motion response analysis of flight vehicles typified by continuously changing vibration damping and frequency 09 p1262 A72-23452

Nonlinear vibrations of thin circular cylindrical shells under arbitrary boundary and loading conditions 09 p1407 A72-23456

Runway unevenness and landing gear characteristics effects on SST vibration during taxiing, taking off and landing 09 p1263 A72-23459

General structure steady state response under harmonic forcing in internal resonance relation, noting inertial nonlinearity effects on autoparametric interactions and energy flow 09 p1408 A72-23462

Transfer matrix method application to rocket vehicles structural dynamics, incorporating axial and aerodynamic lift forces in vibrational analysis 09 p1397 A72-23499

Vibration frequencies of slender beams and circular plates with boundary stiffness and damping [ASA PAPER E 5] 09 p1408 A72-23525

Numerical computation of bilateral bounds for arbitrary vectorial and tensorial field quantities of elastic bodies eigen vibration states, applying to thin rectangular plate 09 p1409 A72-23566

Nonlinear random radial vibration of elastic cylindrical shell under load, using stochastic linearization and correlation analysis 09 p1409 A72-23606

Long wave trains of gravitational waves from vibrating black hole, stressing hole dynamical entity 09 p1394 A72-23697

Maximum dynamic to static deflection ratio for thermally induced vibrations of elastic beams and plates, considering damping and axial load effects [ASME PAPER 71-APM-UU] 10 p1554 A72-24185

Vibration of infinite thin plate coupled with acoustic field in surrounding fluid, using Fourier transformation 10 p1511 A72-24223

Radial vibrations of isotropic homogeneous sphere and cylinder bonded to thin nonhomogeneous casting outside 10 p1557 A72-24406

Nonuniform vortex flow of compressible gas past cascade of plates, noting monochromatic pressure waves at harmonics of plate vibration frequency 10 p1418 A72-24538

Longitudinal vibrations of composite rod under concentrated impact forces at junctions between prismatic sections 10 p1557 A72-24627

Book on continuous elements dynamics covering membrane, torsional, string and elastic beam vibration, four pole techniques, periodic forced motion and surface waves 10 p1557 A72-24674

Dynamic contact problems of die or bandage on elastic layer surface or cylinder, analyzing vibrationally induced elastic waves 10 p1558 A72-24779

Gradient iterative techniques application to finite element vibration and stability analysis of skew plates 10 p1558 A72-24878

Hydrodynamic forces in sinusoidal vibrations of disk in water channel with toroidal vorticity wake pattern, applying results to flapping wing mechanics 10 p1471 A72-25129

Cylindrical shell vibrations in incompressible inviscid fluid near free interface, calculating natural frequencies with Fourier transforms 10 p1471 A72-25130

Free in-plane vibrations of hinged and fixed uniform circular arches, discussing natural frequencies and flexural and extensional vibration modes 10 p1560 A72-25186

Variational equations of motion for three layered laminated sandwich beam vibrations, assuming small elastic deformations and axial and bending motion [AIAA PAPER 72-399] 11 p1731 A72-25420

Vibration characteristics of unidirectional filamentary boron-epoxy composite panels, obtaining nodal patterns, natural frequencies and damping coefficients 11 p1732 A72-25477

Elastic body transverse impact against vibrating rectangular plate with allowance for rotatory inertia and shearing forces, using wave equation 11 p1732 A72-25532

Longitudinal and transverse vibrations and transient response of elastically coupled nonlinear mechanical system 11 p1732 A72-25534

Static loading and monoharmonic excitation influence on transverse vibrations of eccentrically prestressed metallic beam 11 p1732 A72-25535

Aerodynamic damping of turbomachine blade vibrations under varied conditions of stagger angle, pressure ratio and relative velocity, using pure bending mode excitation 11 p1568 A72-25611

Linear maximization of turbine disk natural vibration frequencies combination, solving optimal control problem via Pontryagin maximum principle 11 p1734 A72-25727

Flexural vibration of rectangular orthotropic plates with clamped, simply supported and/or free edges, presenting solution method for coupled characteristic equation pairs 11 p1735 A72-25737

Vibration of simply supported rectangular plate with unidirectional linear thickness variation, using perturbation technique for eigenvalue problem derived by Galerkin method 11 p1735 A72-25739

Matrix displacement method for nonuniform beam vibration problems, using internal nodes concept 11 p1735 A72-25740

Flight vehicle structures optimum design for random vibration environment, presenting formulation as nonlinear programming problem 11 p1736 A72-26003

Proper vibration frequencies of thin imbedded plate obtained by layer potentials method 11 p1737 A72-26477

Rayleigh problem in presence of magnetic field, discussing transpiration effects on MHD flow near oscillating flat plate 11 p1696 A72-26542

Turbine blade alloys vibrational fatigue and creep properties under high and low frequency axisymmetric loads at room and elevated temperatures 11 p1662 A72-26798

Shallow isotropic and orthotropic shells vibration, investigating dynamic rigidity for concentrated mass 12 p1878 A72-27079

Finite element method application to variable thickness circular and annular plates free transverse vibration 12 p1879 A72-27191

Approximate theory for high frequency elastic plate vibrations in terms of thickness mode expansion 12 p1881 A72-27251

Ring stiffened truncated cone shells vibration mode tests, describing air and electrodynamic shakers and mobile noncontacting displacement sensitive sensor system 12 p1882 A72-27340

Vibration of free and fluid loaded uniform or rib reinforced cylindrical shells, solving equations of motion for natural frequencies 12 p1882 A72-27341

Energy method for boundary conditions of beam vibrations under linear viscoelastic stress-strain law, deriving uniqueness, boundedness and stability theorems 12 p1885 A72-27848

Finite difference approximation and Fourier analysis to determine mechanical system eigenfrequency, studying string and membrane vibration 13 p2000 A72-28417

Finite element method for calculating vibrations of thin rectangular plate with four degrees of freedom 13 p2000 A72-28466

Compressor blade vibration indicator measurement by positioning one inductive sensor by rotor blades and another by toothed gear on rotor shaft 13 p1956 A72-28784

Shallow spherical shells axisymmetric vibrations under time varying loads, discussing transverse shear and rotatory inertia effects in terms of Fourier-Bessel series 13 p2056 A72-28880

Thermoelastic vibrations of simply supported rectangular plate produced by temperatures prescribed on faces, obtaining solution in trigonometric series form 13 p2056 A72-28888

Vibrations and plane wave propagation in laminated elastic plates and cylinders, noting finite element method for conical shells [AIAA PAPER 72-406] 13 p2056 A72-28959

Finite element method for in-plane free vibrations of shear wall type structures, noting rectangular plate elements with six degrees of freedom per node 13 p2057 A72-29092

Random vibration statistics of lifting rotors with feedback controls, solving response variance matrix by random inputs shaping filters 13 p2057 A72-29096

Oscillations and acoustic emission by interacting elastic shells in connecting medium, using quadratures with Green function 13 p2004 A72-29208

Frequency converter dynamics, considering transverse vibrations of mechanical system composed of string with centrally lumped mass 13 p1932 A72-29457

Statistical energy analysis of sound-structural interaction, considering sound transmission through complex walls and piping systems and fluid filled container vibrations 13 p2005 A72-29556

Noise and vibration control in industrial and aerospace environments, discussing materials and techniques for structural vibration damping 13 p2059 A72-29557

Sound generation by finite rectangular plate vibrations, deriving radiated power as function of aspect ratio and vibration pattern 13 p2005 A72-29564

Spectral properties of differential displacement equations system describing natural vibrations of shell of revolution with m waves along parallel 14 p1263 A72-30217

Dynamic contact problems of stamps bands oscillation on elastic layer surface or cylinder, analyzing vibrationally induced elastic waves 14 p1263 A72-30223

Gravitational stabilization systems parameters determination for minimum amplitude of satellite eccentric vibrations 14 p1262 A72-30457

Oscillations of spacecraft with on-off attitude control under constant perturbation moment, calculating energy expenditures for desired orientation maintenance 14 p1262 A72-30459

Shallow rectangular shell vibrations induced by moving band load, deriving frequency equation and load critical speed 14 p1266 A72-30688

Nonlinear equilibrium, stability and vibration equations of shallow sandwich shells with isotropic outer layer and rigid compressible filler obtained by variational method 14 p1266 A72-30700

Aileron vibration pressure measurement in plane-parallel transonic flow, evaluating damping characteristics with allowance for shock motion caused nonlinear effects 14 p2071 A72-31026

Variational principle based Pian hybrid finite element procedure for static cylindrical shell analysis extended to plate and shell vibration 14 p1269 A72-31149

Equations of motion and free vibration for trusswork structures under nonperiodic dynamic loads, calculating longitudinal and transverse end forces 15 p2322 A72-31360

Distributed parameter system approximation by system with finite freedom degrees number, solving stability and vibration of elastic shells for eigenvalue densening case 15 p2327 A72-31739

Thermal shock induced thermoelastic vibrations of rectangular plate calculated by Ritz averaging method 15 p2333 A72-32689

Speckle pattern method of laser holography for structural vibration and surface strain study, noting real time operation 16 p2388 A72-32821

First mode ultraharmonics in nonlinear beam vibration with various boundary conditions and structural properties 16 p2463 A72-32845

Vibrational frequency density analysis of thin spherical and cylindrical shells of revolution, using asymptotic integration method 16 p2464 A72-32935

Natural frequency of free beam-like vibration of coupled fluid/structural system of cylindrical rod submerged in ideal fluid enclosed by cylindrical shell 16 p2465 A72-32985

Nondestructive vibration analysis of mechanical structures, using digital computer technique for sound wave spectrum analysis 16 p2397 A72-33220

Vibrational diagnostics of operational conditions of machines for wear, design faults and efficiency evaluation 16 p2425 A72-33408

Natural frequencies and vibration modes of free glider, using symmetrical matrix to replace three dimensional structure by approximate model 16 p2348 A72-33409

Vibration analysis of cylindrical panels 17 p2623 A72-34230

Stability analysis of a pinned-end beam undergoing non-linear free vibration. 17 p2623 A72-34236

Theory of the dynamic vibration neutralizer with motion-limiting stops. [ASME PAPER 71-APMW-14] 17 p2625 A72-34317

Vibration perturbation of slender rotating beam with end masses, using method of matched asymptotic expansions [ASME PAPER 72-APM-B] 17 p2625 A72-34318

Natural bending frequency comparable to rotational frequency in rotating cantilever beam. 17 p2625 A72-34324

Transverse vibration frequencies and mode shapes of clamped or supported orthotropic plates by energy method, using Rayleigh-Ritz technique 17 p2626 A72-34327

Stability of a beam on an elastic foundation subjected to a follower force. 17 p2626 A72-34331

Helicopters vibration reduction through fuselage nodalization, discussing analysis method and dynamic scale model and full scale flight test results [AHS PREPRINT 611] 17 p2489 A72-34487

An energy technique for use in the vibration testing of complex structures. 17 p2626 A72-34720

Nonlinear vibrations of a hinged beam including nonlinear inertia effects. [ASME PAPER 72-APM-51] 17 p2627 A72-34779

Structural system response to white noise excitation, deriving integral equation for first passage time-density function via Markov process model [ASME PAPER 72-APM-11] 17 p2629 A72-34805

Contactless parameter measurements of a vibrating bar. 17 p2554 A72-35148

Nonlinear panel response from a turbulent boundary layer. 17 p2632 A72-35228

Buckling and vibration analysis for stiffened orthotropic shells of revolution. 17 p2632 A72-35242

Equation for nonlinear vibrations of shells. 17 p2633 A72-35246

A method for selection of significant terms in the assumed solution in a Rayleigh-Ritz analysis. 17 p2634 A72-35408

A comparison of approximate methods for solving non-conservative problems of elastic stability. 17 p2634 A72-35410

Structural mode vibration control system design for B-1 aircraft to improve ride during atmospheric turbulence and terrain following 17 p2493 A72-35563

Elastic vibrations in roller bearings. I - The rotating mass is balanced with respect to its own rotation axis 17 p2561 A72-35894

Bending and vibration of multilayered sandwich plates, presenting static and dynamic analysis method 17 p2635 A72-35976

Equipment vibration isolation principles, discussing damping, viscoelastic materials and shock absorbers 18 p2731 A72-35992

Vibration technology: Balancing flexible rotors; Conference, Technische Universitaet Berlin, Berlin, West Germany, March 23, 24, 1970, Summaries 18 p2731 A72-36064

Flat beam linear vibration analysis from mode measurement and moire technique, applying to prototype turbine compressor blade 18 p2734 A72-36375

Sonic boom duration effects on thin circular elastic plate transient axisymmetric vibration via Hankel and Laplace transforms 18 p2734 A72-36409

Spheroids with surface vibration at specified normal velocity distributions, calculating acoustic radiation by Green function approach 18 p2710 A72-36412

Ritz method for truncated conical shell vibrations investigation, assuming deflection expanded in exponential power series 18 p2735 A72-36694

Nonuniformly thick combined cylindrical shell vibrations, studying radial displacement, bending moment and shearing force 18 p2735 A72-36695

On axisymmetric vibration in a transversely isotropic finite cylindrical shell acted upon by a magnetic field. 18 p2711 A72-36755

The radiation of sound from vibrating composite membranes. 18 p2711 A72-36757

Higher vibration modes by matrix iteration. 18 p2736 A72-36772

Hydromagnetic boundary layer flow around an oscillating axisymmetric body. 18 p2683 A72-36932

Plate vibrations and layer potentials 18 p2736 A72-37001

Vibration of an infinite thin plate coupled with a fluid 18 p2736 A72-37002

Bounds on the extremal eigenvalues of the finite element stiffness and mass matrices and their spectral condition number. 18 p2705 A72-37202

Vibration of a stiffened ring considered as a cyclic structure. 18 p2739 A72-37205

Timoshenko finite element beam theory application to flexural vibration problems, considering shear deformation and rotary inertia effects 18 p2740 A72-37206

Experimental determination of viscoelastic characteristics 18 p2740 A72-37211

Determination of the parameters of motion of a container and its load with allowance for their interaction during internal vibrational finishing operations 19 p2824 A72-37426

Calculation of the nonlinear viscoelastic oscillations of a vibronic protective layer 19 p2872 A72-37537

Method of stationary phase for analysis of fringe functions in hologram interferometry. 19 p2796 A72-37582

Applications of holography to vibrations of segmented shells. 19 p2873 A72-37617

Use of a projected-ruling moire method for vibration and deflection measurements of three-dimensional structures. 19 p2799 A72-37629

A stand for quality control of the vibrational characteristics of 'ultraquiet' radial ball bearings 19 p2807 A72-37663

Vibrations of elastically connected ring systems. 19 p2873 A72-37692

Three-dimensional vibrations of orthotropic cylinders. 19 p2873 A72-37693

A certain generalization of the hysteresis loop contour equations to the case of an asymmetric cycle 19 p2876 A72-38003

Free vibrations of multilayer sandwich plates in the presence of in-plane loads. 19 p2876 A72-38020

A flutter optimization program for aircraft structural design. [AIAA PAPER 72-795] 19 p2876 A72-38111

Oscillations, statics and transfer matrices of composite shells of revolution contacting elastic bases, using initial parameters method 19 p2876 A72-38156

Theory for transverse vibrations of beams during elastoplastic deformations 19 p2877 A72-38179

Dynamic characteristics of composite laminates. 20 p2979 A72-39558

An advanced stochastic model for threshold crossing studies of rotor blade vibrations. 20 p2885 A72-39622

Determination of the natural frequencies of cylindrical shells of variable thickness 20 p2980 A72-39906

Vibrations of a concentrated mass on a ring coupled to a thin shell 20 p2981 A72-39908

Simulation of torsional vibrations of rods without concentrated masses 21 p3116 A72-40167

Some problems in the mathematical simulation of blade vibrations in turbomachines 21 p3116 A72-40169

A ten-inch extensometer measuring small low-frequency strains. 21 p3052 A72-40234

Stability and non-stationary vibration of columns under periodic loads. 21 p3116 A72-40336

Russian book - Mechanics of deformable one-dimensional bodies of variable length. 21 p3116 A72-40387

Application of methods in perturbation theory to the calculation of the natural vibrations of rod systems 21 p3119 A72-41097

Randomly coupled flexural and longitudinal vibrations of plates. 21 p3120 A72-41111

A new method of calculating the natural vibrations of a free aeroplane. [ICAS PAPER 72-05] 21 p3120 A72-41130

The post-flutter oscillations of discrete symmetric structural systems with circulatory loading. 21 p3120 A72-41207

Vibration of trapezoidal cantilever plates with partial root chord support. 21 p3121 A72-41225

Free vibrations of a system with a generalized piecewise-continuous characteristic 21 p3122 A72-41349

Non-stationary random vibration of non-linear structures. 21 p3125 A72-41517

Application of a method using slowly changing parameters for the approximate calculation of transverse vibrations of rods 21 p3126 A72-41550

Hydrodynamic forces acting on rigid disk and circular membrane vibrating in ideal incompressible fluid, noting dependence on phase shift between vibration modes 21 p3126 A72-41552

Satellite vibration-rotation motions studied via canonical transformations. [AIAA PAPER 72-919] 21 p3115 A72-41564

Inhomogeneous beam torsional vibration modes and frequencies calculation by initial parameters method, replacing beam by series connected oscillators 22 p3232 A72-41865

Cylindrical shells vibration under external forces with allowance for internal and external friction, obtaining harmonic influence functions in series form 22 p3233 A72-42056

Machine vibration diagnostics and damping, emphasizing filter lattice foundation structures, probability analysis and Bayes formula application 22 p3182 A72-42127

A method and equipment for the investigation of spatial vibrations in rotating reductor unit components 22 p3182 A72-42129

New methods of measuring the parameters of multidimensional vibrations of linear mechanical systems. 22 p3176 A72-42130

Viscoelastic and active vibration isolators for foundation isolation of polyharmonic vibrational effects of operating machines 22 p3182 A72-42131

Machine elements vibration parameters from dynamic model of planetary gears, noting energy spectrum, correlation and amplitude distribution functions 22 p3182 A72-42132

Electronic analyzer of structural vibration frequency characteristics and mutual spectra, considering bandpass filter and automatic frequency spectra recorder 22 p3176 A72-42134

Investigation of the stability and vibrations of beams of variable rigidity by the method of bilateral estimates 22 p3234 A72-42147

Pontryagin maximum principle for fundamental frequency variation limits of longitudinal vibrations of variable cross section rod 22 p3234 A72-42148

Chladni's patterns for random vibration of a plate. 22 p3236 A72-42758

Extensional vibration of a certain type of composite circular plate with a central hole. 22 p3240 A72-42879

Rotatory vibration of a thick spherical shell of isotropic non-homogeneous elastic material. 22 p3240 A72-42880

Torsional vibration of an orthotropic cylindrical shell. 22 p3240 A72-42881

Vibrations of circular plates of variable thickness under an inplane force. 22 p3240 A72-42908

Vibration measurements of an airplane fuselage structure. I - Turbulent boundary layer excitation. II - Jet noise excitation. 22 p3139 A72-42912

Procedures for simple resonance testing of sailplanes 22 p3139 A72-42920

Method of measuring modal characteristics of a structure subjected to a random excitation 22 p3242 A72-43095

Bearing supports elasticity effect on pendulum vibration of rigid rotating shaft with disk, noting vibrational frequencies relation to resonant frequencies 23 p3293 A72-43668

Spline transformation of independent variable for free transverse vibration of elastic bars with piecewise constant rigidity, calculating resonant frequencies 23 p3348 A72-43793

High-frequency fatigue testing facility, U-20P, with programmed control of the sample's vibration amplitude 23 p3278 A72-43970

- Free vibrations of an arbitrary structure in terms of component modes.
[ASME PAPER 72-APM-T] 23 p3350 A72-44054
Stability and vibration of transversely isotropic beams under initial stress. 23 p3350 A72-44057
- Thermomechanical coupling effects in the longitudinal oscillations of a viscoelastic cylinder. 23 p3352 A72-44122
- The vortex street in the wake of a vibrating cylinder. 23 p3281 A72-44302
- Non-linear flexural vibration of orthotropic skew plates. 23 p3355 A72-44375
- Effects of transport velocity of wake vortex on aerofoil oscillations. 23 p3249 A72-44494
- Vibration frequencies and modes determination for clamped rectangular plates of orthotropic material, using weighted residual technique and polynomial approximation 24 p3455 A72-44683
- Multi-node elements model of isoparametric thin shell vibration for turbine blade application 24 p3457 A72-44881
- Vibration of simply supported cylindrical shells with longitudinal stiffeners. 24 p3457 A72-44882
- On the use of a coordinate transformation for analysis of axisymmetric vibration of polar orthotropic annular plates. 24 p3457 A72-44883
- Buckling and lateral vibration of rectangular plates subject to inplane loads - A Ritz approach. 24 p3458 A72-44887
- Hydraulic duct transfer function determination for prediction of liquid-fuel engine space launcher LF vibrations, investigating incompressible flow rate modulation by deformable walls 24 p3392 A72-45117
- The calculation of elastic tanks partially filled with liquids for prediction of the Pogo effect 24 p3392 A72-45152
- Unsteady longitudinal viscoelastic vibrations of a rod of variable thickness at small values of time 24 p3459 A72-45265
- Aerodynamic characteristics of turbine blade cascades in unsteady incompressible and compressible fluid flow, considering axial flow turbine blades vibration 24 p3364 A72-45524
- Alloying, thermal and mechanical treatment effects on Mg alloys damping properties under elastic vibrations, showing test results consistency with materials microdeformation theory 24 p3415 A72-45729
- Energy dissipation associated with transverse vibrations of sandwich metallic samples with damping coatings 24 p3461 A72-45760
- ### STRUCTURAL WEIGHT
- Atmospheric temperature and pressure altitude effects on runway lengths and aircraft takeoff weights [ASCE PREPRINT 1242] 01 p0047 A72-10193
- Composite materials application for space shuttle structures, relating structural weight to payloads 01 p0090 A72-10727
- Composite space shuttle booster and orbiter engine support structures design and analysis, stressing weight savings 01 p0139 A72-10740
- Space shuttle oriented polyimide reinforced Ti matrix composites properties, noting weight saving 01 p0139 A72-10785
- Minimum weight web-core sandwich panels under axial compression loads, presenting numerical results for boron-epoxy and graphite-epoxy composites 01 p0142 A72-11131
- Minimum weight beams and frames calculation for random loads taking into account material carrying capacity 02 p0291 A72-11727
- Complex determinate and indeterminate structures weight minimization subject to design constraints relative to size, allowable stress, natural frequencies, etc 03 p0446 A72-13703
- Upper and lower bounds for expected value and variance of minimum material weight necessary for random resistance structure able to support assigned loads 04 p0593 A72-15648
- Gas turbine wheel design analysis, presenting procedures for estimating revolution rates, blade numbers and component configurations effects on wheel weight for prescribed stresses 05 p0735 A72-15995
- Automatic plastic minimum weight design of structural frames comparing with linear programming techniques 05 p0737 A72-16117
- Atmospheric rendezvous concept to increase space transportation system efficiency and flexibility, discussing structural weight savings [AIAA PAPER 72-134] 05 p0730 A72-16889
- Column axial load carrying capacity optimization vs structural weight, using finite element displacement method for buckling load, mode shape and strain energy density [AIAA PAPER 72-141] 05 p0740 A72-16894
- Carbon fiber laminates for helicopter components weight reduction 05 p0681 A72-16999
- Rotary wing aircraft first flight and envelope expansion at design gross weight 06 p0759 A72-18493
- Minimum weight design of elastic sandwich beam with segmentwise constant stiffness under displacement and stress constraints, using iterative solution and finite element analysis [AD-745488] 07 p1092 A72-19825
- Wing structural weight estimation for civil aircraft preliminary deriving generalized formula based on wing root bending moment for specified flight condition 09 p1262 A72-22909
- Space shuttle orbiter vehicle structural design configurations development and evaluation with respect to overall system weight and program cost [AIAA PAPER 72-373] 11 p1276 A72-25397
- Selective reinforcement with high strength boron filament to achieve cost effectiveness and weight savings for composite structures [AIAA PAPER 72-396] 11 p1731 A72-25417
- Supercritical thick wing for structural weight reduction and increased cruise speeds flight tested on Navy T2-C aircraft [SAE PAPER 720320] 11 p1576 A72-25583
- Computer calculation of minimum weight ribbed plates under axial compression by random search method and linear programming 12 p1878 A72-27083
- Structural weight optimization with piecewise concave cost functionals defined on set in Euclidean space for anisotropic cylindrical shells 12 p1881 A72-27254
- Optimal weight and load capacity of ellipsoidal cylindrical shell of revolution of constant thickness with central circular hole under uniform internal pressure 12 p1885 A72-27977
- British thin Si solar cells for large flexible lightweight arrays, considering radiation resistance, specific mass, area, contact material and antireflection coatings 12 p1756 A72-28004
- Composite materials fabrication, emphasizing high strength/stiffness to weight ratio as critical performance requirements 12 p1815 A72-28082
- Carbon-carbon composite material for high performance aircraft braking systems, noting weight savings and thermal characteristics improvements 12 p1835 A72-28093
- General Dynamics model 401 air superiority single engine fighter design stressing light weight structure and maneuverability at high speeds and angles of attack 13 p1896 A72-28575
- Optimal design of thin walled minimum weight aircraft shell structures, using linear programming 13 p2058 A72-29143
- Minimum weight elastic structure designs under dynamic loads with constraints on stress displacements and natural oscillation frequencies 13 p2062 A72-30009
- Minimum weight reliable beams and frames calculation for random loads, using one degree of freedom system to obtain closed form solution 14 p2164 A72-30237
- Computerized optimal design by nonlinear programming for minimum weight elastic plates crossed with rigid ribs for vibrational loading to meet natural frequencies condition 14 p2165 A72-30576
- Minimum weight hinged and unhinged cantilever truss design as variational problem, using dynamic programming method 14 p2166 A72-30690
- Minimum weight phase change thermal control device for planetary descent probes, discussing test over various heat loads [AIAA PAPER 72-287] 14 p2171 A72-30826
- Weight minimization for simple structures with single natural frequency constraint, solving nonlinear two point boundary value problem by variational and numerical methods 16 p2463 A72-32834
- Relationship between static pressure error /position error/ and measurable flight parameters for different aircraft weights and configurations 16 p2393 A72-33637
- Electrostatic ion thruster and hydrazine monopropellant systems for communication satellites, noting weight savings 17 p2596 A72-34265
- Weight estimation methods. 19 p2871 A72-37451
- Flow and circulation diagrams formed by events involved in optimum aircraft design configuration and structural weight selection, outlining calculation methods 19 p2748 A72-37452
- Fast method for aircraft rebalance. 19 p2748 A72-37453
- Synthesis of optimal cylindrical reinforced-plastic shells under external pressure and axial compression 19 p2872 A72-37534
- Graphite-epoxy composites application to commercial transports for weight and cost reduction 19 p2873 A72-37680
- Active controls - Changing the rules of structural design. 19 p2748 A72-37681
- Aerodynamic design and development of the Lockheed S-3A Viking. [AIAA PAPER 72-746] 19 p2751 A72-38122
- B-52 test vehicle flight demonstration program for control configured vehicles /CCV/ technology concepts validation, noting gross weight reduction [AIAA PAPER 72-747] 19 p2751 A72-38123
- Weight saving, vibration proofing and heat dissipating techniques in avionics packaging, considering B-1 bomber electronic multiplexing system example 20 p2909 A72-39768
- Selection of optimal parameters of waffle structures from the condition of minimum weight 20 p2980 A72-39905
- Calculation of rib-reinforced minimum-weight cylindrical shells under external pressure by the random search method 21 p3119 A72-41099
- Aircraft structures weight reduction through fiber-matrix composite materials, discussing anisotropic elastic and failure behavior of composite light shell structures [ICAS PAPER 72-38] 21 p3120 A72-41163
- Minimum weight design of circular plates with limited thickness. 21 p3125 A72-41515
- Influence of elastic constants on the stability margins and weight characteristics of fiberglass-reinforced shells 22 p3196 A72-41864
- Weight minimization for elastic circular plates of variable thickness under uniformly distributed load with given stress function conditions 22 p3232 A72-41896
- Cylindrical shells of optimal torsional stiffness 22 p3233 A72-42112
- Minimum weight elastic structure designs under dynamic loads with nonlinear constraints on stress displacements and natural oscillation frequencies 22 p3236 A72-42737
- The influence of production imperfections on design of optimum structures. 22 p3239 A72-42841
- Aeroelastic optimization of a panel in high Mach number supersonic flow. 23 p3343 A72-43327
- High strength bimetallic rivets produced by inertia welding Al-Ti alloy shank with pure Ti tail, noting weight and cost reduction for aerospace vehicle production [SAWE PAPER 902] 23 p2393 A72-43452
- Engine selection for specific aircraft design and mission, considering bypass and pressure ratios and turbine temperature effects on performance and weight [SAWE PAPER 910] 23 p2350 A72-43457
- Helicopter design figure of merit weight ratios definition in terms of rotor thrust coefficient, substituting pure airframe structure weight for conventionally used empty weight [SAWE PAPER 916] 23 p2350 A72-43463
- Airline operational weighing and balancing of 747 aircraft, discussing accuracy and calibration procedures for electronic load cells, mobile platform scales and onboard aircraft weighing systems [SAWE PAPER 917] 23 p2351 A72-43464
- Empty weight and cruise performance of very large subsonic jet transports. [SAWE PAPER 919] 23 p2351 A72-43466
- Moment sampling method as selfvalidating aircraft weight and balance accounting procedure [SAWE PAPER 920] 23 p2351 A72-43467
- Aerospace vehicle passive thermal protection systems heat shield and bulk insulation estimation by weight prediction in conceptual phases of design [SAWE PAPER 934] 23 p3356 A72-43474
- Aircraft hydraulic secondary power system weight estimation, presenting components loads and weights breakdown in tables and charts [SAWE PAPER 935] 23 p2352 A72-43475
- Aircraft design structural weight estimation based on post-design analysis of production aircraft, discussing weight factors application to new designs [SAWE PAPER 936] 23 p2351 A72-43476
- Minimum weight structural design, generalizing method for deriving sufficient optimality conditions with examples for specified maximum deflection and critical nonconservative loading parameters 23 p3347 A72-43719

Dynamic programming and the optimum design of rotating disks.

23 p3356 A72-44550

Boron-aluminum structural component for Shuttle.

24 p3458 A72-44890

Gas turbine wheel design analysis, presenting procedures for estimating revolution rates, blade numbers and component configurations effects on wheel weight for prescribed stresses

24 p3460 A72-45737

STRUTS

Boron-epoxy tubular struts for one third scale space shuttle booster thrust truss structure, discussing design, analysis, fabrication, weight, test and quality control

01 p0138 A72-10735

Spanwise velocity distribution effect on drag measurement of short struts in two dimensional turbulent airstreams

10 p1417 A72-23881

Second order deformation theory for axially held strut during thermal cycling at creep relaxation temperature, using galerkin method with assumed sine wave

16 p2473 A72-34124

STUDENTS

SkyLab project participation by students to stimulate interest in science and technology, giving winning experiment proposals

24 p3467 A72-45158

STUDS [STRUCTURAL MEMBERS]

Pneumatic machine for microfriction stud welding of dissimilar metals

09 p1320 A72-23631

STURM-LIOUVILLE OPERATOR

U STURM-LIOUVILLE THEORY

Sufficient criteria for MHD stability derived from lowest eigenvalue bounds of Sturm-Liouville problem.

04 p0557 A72-15168

Recursive algorithm for numerical solution of Sturm-Liouville problem with periodic boundary conditions

11 p1679 A72-26958

Eigenvalue equation, orthogonality theorem and wear eigenfunction expansion for boundary value coupling of second order Sturm-Liouville systems

15 p2262 A72-31588

Book - Riccati differential equations

17 p2577 A72-35798

Asymptotic behavior of the eigenvalues and eigenfunctions of the Sturm-Liouville operator with a complex-valued polynomial potential.

22 p3198 A72-41854

Direct methods of qualitative spectral analysis for the singular Sturm-Liouville equation with an unrestricted operator potential

23 p3308 A72-43578

STYRENE

NT POLYSTYRENE

Glass styrene acrylonitrile bead filled composites tensile behavior, discussing relationship between yield stress, filler content, strain rate and temperature

11 p1673 A72-25487

SUBCARRIER WAVES

U CARRIER WAVES

SUBCIRCUITS

U CIRCUITS

SUBCONTRACTS

Reliable component procurement for Symphonie satellite, discussing parts list, specifications and subcontract monitoring and inspection

18 p2670 A72-37124

SUBCOOLING

U SUPERCOOLING

SUBCRITICAL FLOW

Wake instabilities and vortices spacing, position and strength behind slender cylindrical bodies at large incidence with subcritical cross flow Reynolds numbers

05 p0610 A72-17010

High intensity free stream turbulence effects on flow past circular cylinder at subcritical Reynolds numbers, measuring unsteady lift and drag

11 p1573 A72-26640

Pneumatic amplifiers with controlled pressure during subcritical and supercritical flow, considering jet-resonant choke, conical and membrane systems

11 p1578 A72-26783

Incompressible laminar subcritical flow with separated wake past symmetric two dimensional bluff body, calculating upstream pressure distribution and separation point

12 p1751 A72-27172

Spanwise correlation measurement of vortex shedding behind circular cylinder in subcritical Reynolds number region

16 p2379 A72-33658

SUBDWARF STARS

Growth analysis curve of halo subdwarf Groombridge 1830 relative to sun, noting metal abundance

15 p2314 A72-32373

Discoveries on southern objective-prism plates. III - Three new hydrogen-deficient stars and a bright B-type subdwarf.

17 p2609 A72-35116

Extended horizontal branch loci.

23 p3337 A72-43830

SUBGRAVITY

U REDUCED GRAVITY

SUBGROUPS

Uniform Markov processes properties in Hilbert space, examining operator subgroups

12 p1836 A72-27071

Heisenberg antiferromagnet with noncollinear sublattices and linear dislocation, considering coupled spin wave states and density

13 p2023 A72-29910

SUBHARMONIC GENERATORS

Subharmonic oscillations excited by horizontal vibrations of mathematical pendulum suspension

07 p1036 A72-20323

Subharmonically injected phase locked microwave IMPATT oscillator

09 p1285 A72-22894

Calculation of transient processes in a capacitance parametron by the phase approximation method

23 p3312 A72-43351

SUBLATTICES

U LATTICES [MATHEMATICS]

U SUBGROUPS

SUBLAYERS

U SUBSTRATES

SUBLIMATION

Constituents, processing, fabrication and structure effects on artificial graphitic materials ablation performance in sublimation regime from high temperature tests

[ALAA PAPER 72-298] 11 p1742 A72-25235

Cylindrical diode characteristics with sublimed electrode surfaces.

17 p2527 A72-34607

Carbon and graphite sublimation in inert gas flow at 2800-3000 K, determining rate dependence on temperature under kinetic and diffusive conditions

18 p2704 A72-37186

SUBMARINES

Optimal stochastic /Kalman/ filters application to integrated air and submarine navigation systems, discussing measurement errors modeling as bias and colored noise

02 p0256 A72-12050

Incore thermionic reactor application to meet European TV broadcasting satellite and submarine and underwater laboratory power requirements

18 p2644 A72-36166

Polaris submarine-weapon system autonomous organization and management technique based on team combining Navy and civilian contractors in close working relationship

23 p3358 A72-44358

SUBMERGED BODIES

NT DIVING [UNDERWATER]

Fluid immersed body velocity fluctuations due to irregular molecular impacts

01 p0001 A72-10234

Variable volume spherical cavity motion in ideal liquid near plane surface

02 p0202 A72-11586

Trajectory and flow properties of submerged heated effluents discharging into moving waterway

[ALAA PAPER 72-79] 05 p0659 A72-16912

Thermally induced convection flow characteristics in separated or wake formation regions over heated cylindrical surface submerged in water

07 p1100 A72-19630

Forced heat convection from sphere immersed in inviscid fluid stream at small Peclet number, using matched asymptotic expansions

11 p1747 A72-26669

An integro-differential equation approach to acoustic scattering from fluid-immersed elastic bodies.

21 p3083 A72-40102

Periodic wave of oscillating and stationary two dimensional bodies immersed in uniform incompressible stream, investigating semiinfinite vortex trails relationship to oscillating airfoils

21 p2989 A72-40651

SUBMERGING

Prolonged water immersion effects on renal function and plasma volume in trained and untrained subjects, noting deleterious effect on orthostatic tolerance and work capacity

10 p1428 A72-23738

Space maintainability experiment aboard submersible during 30 day drift mission, noting application to SkyLab manpower distribution

[ALAA PAPER 72-232] 10 p1431 A72-24442

Multihour immersion effects on blood plasma protein and electrolyte concentration in trained and untrained subjects

12 p1770 A72-27480

Human spinal segment functional state before voluntary movement during water immersion, using H-reflex for spinal cord motoneuron excitability evaluation

14 p2073 A72-30255

Hemodynamic changes in man during immersion with the head above water.

17 p2507 A72-34543

Regional lung function in man during immersion with the head above water.

19 p2758 A72-38701

Pulmonary air-trapping induced by water immersion.

19 p2759 A72-38711

Comparison of the vectors of the ventricular depolarization and repolarization of man during immersion in a standing position

24 p3372 A72-44924

SUBMILLIMETER WAVES

Millimeter and submillimeter microwave spectrometric studies of high temperature plasmas and noise emission, discussing instrumentation and absolute measurements

02 p0223 A72-11405

Mm and sub mm wave generation by semiconductor devices, showing power vs frequency plots for IMPATT, Gunn and LSA oscillator diodes

02 p0268 A72-11694

Mountaintop high resolution spectral observations of diffuse isotropic submillimeter atmospheric and sky emission

02 p0274 A72-12194

Submillimeter wave stratospheric emission spectra measurement by aircraft- or balloon-borne phase modulated Fourier spectrometry, noting SNR and small errors

03 p0348 A72-13399

Point contact Josephson junctions arrangement for millimeter and submillimeter region, showing mechanical stability

04 p0561 A72-14919

Submillimeter waves - Conference, New York, March-April 1970

04 p0532 A72-15590

Submillimeter waves development, discussing materials research, lasers, semiconductor and electron tube sources, system components and applications in space communication, imagery, metrology and sensing

04 p0550 A72-15591

Millimeter and submillimeter wave applications, considering environment remote sensing, radar communication, tracking and imagery, wideband communication, plasma diagnostics and spectroscopy

04 p0550 A72-15592

Submillimeter wave sulfur dioxide molecular laser, investigating lasing lines, plasma decay and relaxation line interactions and signal temporal behavior

04 p0532 A72-15595

Submillimeter wavelength HCN laser stabilization describing AFC and phase locking

04 p0532 A72-15596

Millimeter and submillimeter wave molecular beam masers amplification principles and Doppler and collisional broadening elimination capability

04 p0532 A72-15597

Electron tube with Fabry-Perot cavity resonator with grooved and smooth mirrors for millimeter and submillimeter wave generation

04 p0503 A72-15598

Anisotropic effects use in passive semiconductor magnetoplasma for submillimeter isolators and circulators development, describing transmission devices based on Faraday rotation

04 p0563 A72-15600

Pyroelectric detector noise equivalent power limitation factors, discussing heterodyne systems and pulsed submillimeter lasers detection

04 p0551 A72-15602

Near sea level atmospheric effects on submillimeter radiation absorption in terms of dielectric coefficient theory

04 p0551 A72-15606

Atmospheric molecular and aerosol absorption effects on submillimeter radio wave propagation using laser, BWT and liquid He receiver-transmitter devices

04 p0551 A72-15607

Visible displays of millimeter and submillimeter wave images for all-weather ground surveillance, discussing image conversion

04 p0494 A72-15612

Electromagnetic radiation modulators in millimeter and submillimeter wave range using gas-discharge plasma magneto-optical effects in alternating magnetic field

05 p0625 A72-15826

Conical cavity resonator design for submillimeter wave electron beam devices, investigating mode and resonant frequency dependence on cavity size

05 p0632 A72-16364

Nb-Nb point-contact Josephson junctions response to submillimeter radiation from HCN and DCN lasers

07 p0992 A72-20551

Millimeter and submillimeter band frequency conversion in nonlinear bulk n-InSb semiconductor at liquid helium temperature

08 p1140 A72-21060

Superheterodyne radiometers for millimeter and submillimeter waves, using Mach-Zehnder interferometer frequency mixer for parasitic signal suppression

08 p1140 A72-21265

Ruby use for submillimeter range optically pumped quantum paramagnetic amplifier
08 p1183 A72-21770

Atmospheric water vapor submillimeter absorption lines in high resolution radiation transmission measurements with Froome type plasma metal junction device
10 p1472 A72-24175

High resolution observation of stratospheric submillimeter thermal emission spectrum by helium-cooled InSb electron bolometer on board Comet 2E aircraft
10 p1476 A72-25023

Submillimeter plane waves formation by quasi-optical line and diverging lens with phase front adjustment
11 p1598 A72-26719

Millimeter and submillimeter radiation produced by diffraction phenomena during charged particle passage near periodic structures, discussing physical properties and oscillator development
14 p2088 A72-30598

Difference-frequency mixing of pulsed carbon dioxide lasers with non-phase-matched GaAs for submillimeter wave generation
15 p2290 A72-31384

Submillimeter isotropic background limits of stratosphere emission spectrum, using aircraft-borne Michelson interferometer and Rollin far IR detector
15 p2265 A72-31626

Submillimeter plane monochromatic waves propagation in ground layer of turbulent atmosphere, deriving received signals levels fluctuations
15 p2195 A72-31653

Oxygen molecule parameters from frequency data in microwave, submillimeter and IR spectroscopy
15 p2283 A72-32654

Composite quasi-optical-broad waveguide transmission lines for millimeter and submillimeter waves with spectrum phase correction
18 p2664 A72-36106

A two-element telescope of high collecting efficiency for sub-millimetre astronomy.
21 p3055 A72-40825

Conceptual possibilities of studies of moisture content in the atmosphere from thermal radio emission in the submillimeter wavelength range
21 p3078 A72-41798

Electromagnetic radiation modulators in millimeter and submillimeter wave range using gas-discharge plasma magneto-optical effects in alternating magnetic field
23 p3319 A72-43434

Galactic submillimeter background radiation energy density limit, taking into account recalibrated gamma ray flux measurements agreement with cosmic ray-interstellar matter interactions
23 p3329 A72-43942

SUBMINIATURIZATION
Subminiature TV camera using hybrid packaging techniques and digital circuitry for full EIA composite video output format and 450 TV/RH resolution capability
09 p1316 A72-23599

SUBREFLECTORS
Rayleigh distance for reflection from curved surfaces in Cassegrain subreflector geometrical optics design
04 p0499 A72-15207

Conical reflector microwave antenna design including subreflector with horn feed, presenting ray and physical optics analysis for radiation patterns
07 p0957 A72-19786

SUBROUTINES
FORTRAN subroutines for plate bending and plane stress elements stiffness and geometric matrices generation, taking into account anisotropic properties and linear thickness variations
18 p2739 A72-37166

Standardized programming routine operations independent of problem and language for controlling computer program design, discussing advantages and applications
23 p3267 A72-43991

SUBSETS (MATHEMATICS)
U SET THEORY
SUBSONIC AIRCRAFT
Flight test procedures for subsonic transport aircraft pitot static pressure system, recommending trailing cone calibration method
[SAE ARP 921] 01 p0064 A72-10389

Unsolved aerodynamic problems in sub- and transonic civil and military aircraft design, considering flow problems during transonic flight, takeoff and landing
[DGLR PAPER 71-105] 02 p0153 A72-12745

U.S.S.R. high-subsonic freight transport jet aircraft IL-76 for arctic areas, Siberia and Far East, noting independence of large airports availability
03 p0310 A72-13471

Steady and oscillatory subsonic aerodynamic loads prediction based on Doublet-Lattice method and method of images, determining chord and spanwise loading on lifting surfaces
[AIAA PAPER 72-26] 05 p0607 A72-16917

NASA aerodynamic technology program, emphasizing airframe and engine development for next generation subsonic CTOL jet transport requirements
[SAE PAPER 720319] 11 p1575 A72-25582

NASA quiet engine program, discussing noise reduction technology for subsonic civil transport aircraft propulsion system
[ASME PAPER 72-GT-96] 11 p1705 A72-25667

Subsonic jet noise directivity prediction from acoustic pressure measurements
11 p1706 A72-26041

Stratospheric subsonic and supersonic aircraft emission estimation for water vapor and nitrogen oxides
13 p1991 A72-28838

Vortex-lattice method for subsonic aircraft aerodynamic coefficients calculation, verifying results with airbus lifting surface wind tunnel test data
15 p2178 A72-31401

Advanced subsonic transport technology.
19 p2748 A72-37677

Numerical study of the characteristic magnitudes of turbulence on the far sound field radiated by a subsonic jet
[ONERA, TP NO. 1058] 19 p2786 A72-37761

An exploratory study of flying qualities of very large subsonic transport aircraft in landing approach
[ICAS PAPER 72-07] 21 p2995 A72-41132

NASA Quiet Engine program R and D on conventional takeoff and landing subsonic cruise aircraft engine noise
[ICAS PAPER 72-48] 21 p3100 A72-41173

Empty weight and cruise performance of very large subsonic jet transports.
[SAWE PAPER 919] 23 p3251 A72-43466

A systems analysis of subsonic versus supersonic jet travel.
24 p3466 A72-44580

SUBSONIC FLOW
Subsonic linearized theory for symmetrical cranked wings at zero incidence, presenting corrected formulas for streamwise and spanwise perturbation velocity components due to wing thickness
01 p0001 A72-11154

Electron thermal boundary layer effects on Langmuir probe measurements in subsonic cold plasma flow
01 p0071 A72-11191

Book on pressure probe methods for wind speed and direction covering incompressible and subsonic compressible flow pressures, temperature, etc
01 p0072 A72-11273

Straight line computer solution of Chaplygin equation, with application to high subsonic gas flow incident on airfoil with local supersonic zone
02 p0149 A72-11581

Near pressure field within subsonic circular turbulent cold jet potential cone, noting peak in power spectra
02 p0150 A72-11974

Compressible gas subsonic or transonic flow in front of obstacle, determining stagnation pressure with thermal relaxation time by numerical and wind tunnel methods
02 p0151 A72-12097

Skin friction measurement in nonisobaric subsonic flow with pressure gradient over airfoil section by surface impact probes
02 p0151 A72-12275

Low subsonic region unsteady interference effects on harmonically oscillating wing-tailplane model with variable sweep wing
[DGLR PAPER 71-081] 02 p0152 A72-12709

Base pressure determination for subsonic isothermal central and peripheral jets of incompressible fluid discharging into subsonic slipstream
03 p0342 A72-13912

Mass blocking of subsonic isentropic swirling flow through convergent axisymmetric nozzle, considering radial velocity component effect on vorticity
03 p0342 A72-13957

Flow calculations for subsonic and transonic portions of ring nozzles and plane curvilinear channels
05 p0601 A72-16226

Thin wing harmonic oscillation in subsonic flow, developing analytical form of kernel function in generalized Possio integral equation
05 p0603 A72-16707

Computerized analytical model of two dimensional multicomponent airfoil in viscous subsonic flow
[AIAA PAPER 72-2] 05 p0606 A72-16861

Mean velocity and turbulent fluctuation distributions for sub- and supersonic jets in convergent nozzles, obtaining sound power spectra
[AIAA PAPER 72-157] 05 p0651 A72-16872

Stator blade design to shield turbofan from pressure disturbances arising in downstream subsonic duct
[AIAA PAPER 72-84] 05 p0707 A72-16883

Subsonic and transonic compressible potential flow over nonlifting hovering helicopter rotor blades, calculating flow field by three-dimensional nonlinear relaxation scheme
[AIAA PAPER 72-39] 05 p0607 A72-16901

Subsonic oscillating surface theory for wings with partial span controls, noting computer program rapidity
[AIAA PAPER 72-61] 05 p0608 A72-16931

Steady subsonic potential gas flow in multiply connected regions, determining velocity field via boundary value problem solution for quasi-linear elliptic equations set
06 p0801 A72-18123

Cascading turbomachine blades vibration measurement in subsonic and sonic high temperature gas flows, describing test facility
06 p0797 A72-18689

Subsonic three dimensional potential flow computational method lifting aerodynamic configurations analysis and design
[AIAA PAPER 72-188] 07 p0907 A72-18958

Two dimensional subsonic flow behind symmetrical blade cascade, taking into account initial flow turbulence
07 p0909 A72-20078

Interference induced unsteady aerodynamic forces on tandem airfoils in subsonic flow, using two dimensional model
07 p0910 A72-20101

Durando model overprediction of deflected jet vortex strength in subsonic cross flow
08 p1151 A72-21631

Sound refraction by sinusoidal point source in subsonic jet flow, obtaining solution by finite difference method for comparison with ray tracing results
08 p1152 A72-21894

Supersonic and subsonic jet flows coexistence in constant section duct, analyzing pressure on walls and in fluid and schlieren visualization
[ONERA, TP NO. 976] 09 p1294 A72-22813

Mixed subsonic-supersonic flows solution for choked isentropic flow in convergent-divergent nozzle, comparing results with series solution
10 p1561 A72-23721

German monograph on gas dynamic properties of turbulent subsonic compressible flow of ideal gas at insulator walls in MHD generator
10 p1517 A72-23771

Pressure recovery calculation for subsonic adiabatic air flow through diffusers with tail pipes, assuming turbulent inlet boundary layer
10 p1415 A72-23855

Numerical prediction of subsonic and supersonic flow through convergent-divergent nozzle
10 p1416 A72-23874

Iron rotational hysteresis effect in cold magnetic balance wind tunnel system for spinning aircraft configurations and subsonic flow regimes
10 p1462 A72-24776

Subsonic unsteady aerodynamic pressures on blades of compressor wheel rotating freely in air stream
[ONERA, TP NO. 1077] 10 p1420 A72-24854

Hodograph method involving conformal mapping for turbomachine blade subsonic flow profile calculation
[ASME PAPER 72-GT-41] 11 p1570 A72-25635

Subsonic and supersonic flow around nonaxisymmetric fuselages, deriving streamlines differential equations based on camber line distribution of source, dipole and quadrupole singularities
[DFVLR-SONDDR-189] 11 p1573 A72-26578

Nonstationary interaction flow field between subsonic and composite jet on flat plate with vortex formation and reverse currents, using finite difference technique
12 p1799 A72-28168

Vorticity and energy transfer equations for subsonic jet impingement on flat plate, noting turbulent jet effect on friction factor
12 p1799 A72-28171

Wind tunnel investigation of pressure perturbations on plane surface due to gas jet injected from surface into subsonic air drift flow
13 p1894 A72-29637

Subsonic flow in separation zones of three dimensional turbulent boundary layer forming in front of cylindrical projections, rectangular parallelepipeds and shields
13 p1895 A72-29881

Unstable discharge regime of nonisothermal axisymmetric subsonic turbulent jet in acoustic field with local perturbations
13 p1943 A72-29883

Stream surfaces of three dimensional sub and supersonic irrotational gas flows in variable cross section channels and nozzles
13 p1895 A72-30004

Turbulent boundary layer separation zone subsonic flow before two dimensional rectangular step, examining flow pattern and static pressure distribution
14 p2096 A72-31020

Convective heat transfer of sphere in rarefied gas subsonic flow, comparing calculation with measurement
14 p2071 A72-31023

Air and carbon dioxide intensive injection effects on turbulent boundary layer of subsonic channel air flow
14 p2097 A72-31159

Axisymmetric convergent cone profile synthesis to transform parallel flow at inlet to uniform sonic flow at outlet, examining solution convergence

15 p2177 A72-31206

Local subsonic flow region in transonic free flow past airfoil profile, transforming flow differential equations into linear Beltrami equations system via Chaplygin transformation

15 p2178 A72-31473

Subsonic and supersonic steady two dimensional compressible turbulent boundary layer flow past wavy wall, presenting wall pressure and temperature distributions

16 p2341 A72-32828

Inverse Laval problem of three dimensional subsonic and supersonic flows in nozzles and ducts of variable cross section in terms of asymptotic series

16 p2342 A72-32930

Direct integral method to calculate subsonic and supersonic regions in planar and axisymmetric hyper-sonic flow, using stream function for velocity and density

[DFVLR-SONDDR-202] 16 p2343 A72-33421

Subsonic, transonic, and supersonic nozzle flow by the inverse technique.

17 p2483 A72-34206

A new theoretical model for representing jet penetration into a subsonic stream

17 p2538 A72-34888

Acoustic power spectrum of a subsonic jet

17 p2541 A72-35544

Expansion solution for subsonic compressible flow.

18 p2679 A72-36124

Near flow field and aerodynamic loading in subsonic and supersonic flow over body-wing configuration, surveying numerical, kernel function and image methods

18 p2641 A72-36390

Measurement of pressure fluctuations within subsonic turbulent jets.

18 p2681 A72-36575

Jet aircraft noise sources in subsonic and supersonic exhaust mixing process, suppressing noise via turbofan exhaust speed reduction

19 p2849 A72-38380

Downwash distribution at surface of rectangular planform wings with prescribed subsonic aerodynamic loading for various aspect ratios

19 p2747 A72-38809

Evaluation of the downwash integral for rectangular planforms by the BAC subsonic lifting-surface method.

19 p2747 A72-38810

Space correlations of the fluctuating pressure in subsonic turbulent jets.

20 p2913 A72-39555

The effect of entrance configuration on local heat-transfer coefficients in subsonic diffusers.

[ASME PAPER 72-HT-34] 20 p2986 A72-39670

Experimental study of heat transfer in a subsonic jet impinging normally on a plane baffle.

21 p3128 A72-40949

Two-dimensional subsonic linearized theory of the unsteady flow through a blade-row with small steady pitch and camber angle.

[ICAS PAPER 72-12] 21 p2990 A72-41137

The characteristics of a cylindrical probe at high subsonic speeds. I - The case of zero inclination angle.

22 p3135 A72-42484

Stream surfaces of three dimensional sub and supersonic irrotational gas flows in variable cross section channels and nozzles

22 p3135 A72-42727

Calculation of a profile or of a cascade of profiles for a velocity distribution given as a function of potential

22 p3136 A72-43096

Analysis and correlation of data on pressure fluctuations in separated flow.

23 p3247 A72-43331

Modified Newton-Kantorovich variational method for calculating flows in subsonic and transonic portions of circular nozzles, noting savings in computer time

23 p3248 A72-43659

Pressure at the trailing edge and losses in turbine bladings with air injection into the blade wake

23 p3248 A72-43661

Problems of interference between oscillating surfaces in subsonic flow

23 p3248 A72-43809

Extension of the Prandtl-Glauert similarity rule to loss including cascade flow.

24 p3363 A72-45352

Some experiences with the solution of potential flow in the plane cascade on the computer.

24 p3393 A72-45365

Iterative methods for the aerodynamic calculation of thin wings in a subsonic flow

24 p3363 A72-45378

Pressure, temperature, current density, and potential difference fluctuations in subsonic flow of combustion products plasma, noting steadiness, ergodicity and distribution functions

24 p3429 A72-45502

SUBSONIC FLUTTER

Dynamic aspects of Fokker F-28 aircraft design.

22 p3138 A72-42831

SUBSONIC SPEED

High subsonic velocity aerodynamics boundary problem, transforming compressible flow to incompressible

03 p0307 A72-13238

Propulsion twin spool power plant design and dimensioning with selective high pressure cut-off for supersonic aircraft with part of flight in subsonic range [DFVLR-SONDDR-169]

03 p0406 A72-13608

Cross flow effect on lifting fan noise at subsonic blade tip speeds, analyzing radiation pattern change due to inlet flow distortion

[AIAA PAPER 72-128] 05 p0608 A72-16921

Compressible boundary layer stability at subsonic speeds, using orthogonalization calculation method

09 p1293 A72-22409

Photoelastic studies of plane stress fields in plate induced by moving loads at subsonic, transonic and supersonic speeds

10 p1553 A72-23746

Subsonic powered nacelle wind tunnel model for investigation of geometric variables effect on pressure drag

[ASME PAPER 72-GT-14] 11 p1568 A72-25613

Propulsion system design for military VTOL aircraft, emphasizing subsonic cruise to maximum thrust ratio and exhaust downwash characteristics

[ASME PAPER 72-GT-73] 11 p1704 A72-25655

Fluid jets formation in collisions between metal plates for large angles at subsonic velocities

13 p1963 A72-28771

Data correlation of jet noise total sound power and peak sideline overall sound pressure level for subsonic and supersonic convergent exhaust nozzles

[AIAA PAPER 72-643] 16 p2381 A72-34089

Variable sweep wings aerodynamic characteristics in subsonic, transonic and supersonic flight, considering lift, drag, stability and control

18 p2643 A72-36976

Shock front radius of subsonic radiation front driven by plasma fireball during final stages of decaying laser spark

20 p2934 A72-39844

Fluid jets formation region in subsonic collisions between metal plates at large angles

21 p3059 A72-40262

SUBSONIC WIND TUNNELS

Two dimensional wedge shaped body base heat transfer to separated nonreattaching flow region in subsonic wind tunnel

[ASME PAPER 71-HT-D] 02 p0152 A72-12314

Subsonic wind tunnel investigation of aircraft wake far field structure, measuring trailing vortex decay by yawhead pressure probe

[AIAA PAPER 72-40] 05 p0607 A72-16902

Homogeneous compressible turbulence field with large amplitude and density fluctuations generated in subsonic wind tunnel by rapid mixing of hot and cold air streams

[AIAA PAPER 72-119] 05 p0652 A72-16980

Temperature distribution and heat transfer coefficients in turbulent separated flow region downstream of rearward step in subsonic wind tunnel, using Mach-Zehnder interferometer

15 p2333 A72-31204

Subsonic wind tunnel for pulsed flows with speed modulation as periodic function of time

16 p2372 A72-32898

A new method for the evaluation of slotted wind tunnel interference parameters applicable to subsonic oscillatory tests.

21 p3043 A72-41642

SUBSTITUTES

Substitutional-interstitial interactions in bcc alloys.

18 p2699 A72-36396

SUBSTITUTION

U SUBSTITUTES

SUBSTRATES

GaAs, Si and alumina performance as substrates in integrated microwave circuits

01 p0046 A72-10700

Si MOSFET substrate resistivity effect on surface state noise spectra

06 p0783 A72-17609

Thin film materials and fabrication methods, discussing substrate requirements, surface properties, chemical stability, thermal conductivity and preparation of various resistors and capacitors

06 p0790 A72-18572

Cartridge system for substrate heating to 500 C in vacuum chamber during metals or semiconductor vapor deposition, describing carbon block-high intensity quartz lamp assembly

07 p0984 A72-19325

Reactivity evaporated titanium nitride resistors for thin film microcircuits, discussing nitrogen gas pressure and substrate temperature effects on electrical properties during evaporation

09 p1286 A72-22902

Microstrip propagation and loss filling factor design formulas for magnetic substrates

11 p1599 A72-26991

Chemical vapor deposition of boron on carbon monofilament substrate to eliminate fracture and boron damage and achieve good strength

12 p1834 A72-28085

Single crystal disk substrate design with electron bombardment heating for LEED and Auger electron spectroscopy studies in ultrahigh vacuum

17 p2553 A72-34642

Thermal analysis of high performance devices mounted on dielectric substrates.

17 p2527 A72-34677

Controlled self heating effect in semiconducting barium titanate positive temperature coefficient resistor substrate heater for planar Si devices

17 p2527 A72-34680

Substrate utilization and glycolysis in the heart.

17 p2501 A72-34977

Production of prototype hybrid micro-electronic modules using thin film substrates.

20 p2908 A72-39493

The relationship between the thick film conductor and substrate and its influence on conductor properties.

20 p2908 A72-39494

A comparison of manufacturing techniques for hybrid microwave circuits.

20 p2908 A72-39496

The computation of dynamic equilibrium temperature distributions on substrates having a temperature-dependent thermal conductivity.

20 p2908 A72-39499

SUBTRACTION

Real time analog video magnetogram, describing differential photometer for electronic subtraction technique

03 p0357 A72-13286

SUBTRACTORS

U ADDING CIRCUITS

SUBTROPICAL REGIONS

U TEMPERATE REGIONS

U TROPICAL REGIONS

SUBZERO TEMPERATURE

Peripheral thermoregulation in arctic canines, showing subzero bath-immersed foot temperature maintenance above tissue freezing point

08 p1120 A72-22019

SUCCINIMIDES

Zinc dithiophosphate and bisphenol effects on surface activation of additive compositions with succinimide base in lubricant applications

07 p1023 A72-19903

SUCROSE

Influence of hyperosmolality on left ventricular stiffness.

17 p2499 A72-34727

SUCTION

Two dimensional unsteady incompressible boundary layer near forward stagnation point of infinite plane wall with uniform suction or injection, obtaining iterative solution

01 p0050 A72-11106

Velocity profiles of turbulent boundary layers with injection or suction through porous walls as function of momentum thickness by Truckenbrodt method

02 p2022 A72-11663

Incompressible boundary layer theory development: to include second order curvature effects, determining suction velocity to maintain constant displacement thickness on sphere

02 p0204 A72-12104

Two dimensional viscoelastic fluid flow past infinite plate with time dependent suction and constant and periodic free stream velocity

03 p0341 A72-13630

Boundary layer suction intensity and slot location effects on performance of curvilinear annular diffuser for various Mach and Reynolds numbers

03 p0308 A72-13736

Velocity and shear stress in laminar boundary layer flow on flat plate with narrow suction slot

04 p0461 A72-14461

Free convection flow along infinite vertical flat plate under periodically varying suction and with fluctuating plate temperature, analyzing mean velocity and temperature profiles

05 p0747 A72-16668

Laminar-turbulent incompressible boundary layer transition prevention by suction slots on bodies of revolution, determining optimal suction power/slot distance conditions by variational methods

07 p0968 A72-19737

Laminar boundary layer instability to longitudinal vortices onset due to homogeneous suction from slightly concave permeable wall, determining Goertler parameter and wavenumber critical values

10 p1470 A72-25064

Uniform suction effect at stationary plate on longitudinal and transverse velocities of plane Couette flow between parallel plates

13 p1941 A72-28884

Navier-Stokes equation for rotating liquid axial flow past porous plate, noting velocity distribution for suction and thinning effect for blowing

13 p1942 A72-29127

Steady asymptotic suction profiles in free convection laminar boundary layer flows on heated vertical circular cylinder 14 p2096 A72-31070

Navier-Stokes equation for unsteady asymptotic suction flow over flat plate, plotting velocity distribution profiles 15 p2178 A72-31406

Blowing and suction effects on free convection boundary layer on semiinfinite vertical flat plate, taking into account temperature difference between plate and fluid 16 p2477 A72-33429

Blowing and suction effects on heat transfer and friction coefficients of transpired turbulent boundary layer, presenting theoretical models and experimental results 16 p2378 A72-33431

Lateral pressure gradient and suction effects on laminar incompressible boundary layer separation on curved surfaces predicted by generalized tow-layer flow model [AIAA PAPER 72-698] 16 p2380 A72-34045

Viscous dissipation effects on unsteady free convective flow past an infinite, vertical porous plate with constant suction. 17 p2637 A72-35047

Flow over infinite wedge with mass transfer by boundary suction or injection, solving nonlinear boundary layer equations by parametric differentiation method 17 p2485 A72-35230

Self-similar separation flows in a laminar magnetohydrodynamic boundary layer during injection and suction 18 p2716 A72-36886

On the steady flow between a rotating and a stationary disk with a uniform suction at the stationary disk. 18 p2683 A72-36994

Heat transfer at reattachment of a compressible flow over a backward facing step with a suction slot. 20 p2885 A72-39626

An asymptotic solution for steady flow above an infinite rotating disc with suction. 20 p2886 A72-40015

Experimental friction factors for turbulent flow with suction in a porous tube. 21 p3047 A72-41618

Magnetic field and suction effects on unsteady MHD free convection flow of conductive fluid around nonconductive porous flat plate 21 p3095 A72-41787

Rectangular wind tunnel study of suction effect on velocity profiles and characteristics of turbulent boundary layer 24 p3390 A72-45005

Velocity profiles of plane turbulent flow of incompressible fluid on porous surface in presence of suction 24 p3390 A72-45007

Vortex control on an inclined body of revolution. 24 p3362 A72-45335

SUD AVIATION AIRCRAFT
NT CONCORDE AIRCRAFT
SUDDEN ENHANCEMENT OF ATMOSPHERICS
Sudden enhancement and decrease of elf atmospherics, investigating diurnal variations for frequencies 03 p0321 A72-13090

Observation of very-low-frequency whistler-mode waves in the region of the radiation-belt slot. 17 p2517 A72-35598

SUDDEN IONOSPHERIC DISTURBANCES
Magnetospheric substorm model for auroral activity sudden increase and ionospheric current development explanation by shock wave excitation in magnetospheric tail neutral layer 02 p0217 A72-11927

Solar flare EUV flashes from sudden ionospheric frequency deviation observations 03 p0407 A72-12946

Ionospheric effects of X ray flare on 8 July 1968, estimating ionizing radiation spectral characteristics from SID observation 03 p0407 A72-12986

Statistical analysis of low latitude F 2 layer disturbances associated with sudden commencement type geomagnetic storms, investigating critical frequencies 04 p0516 A72-14937

Sudden ionospheric disturbance occurrence probability with solar X-ray flares, noting relaxation time 06 p0874 A72-18086

Ionospheric effects of solar flares, considering flare spectrum below 10 A, flare X-rays relationship to sudden ionospheric disturbances and electron density profiles 06 p0874 A72-18087

Ionospheric effects of solar flares, relating sudden ionospheric disturbances with solar X-rays, radio bursts, H alpha emissions and cosmic rays 07 p1062 A72-20037

Sudden ionospheric perturbation effect on D region vertical distribution profiles, finding sixfold electron concentration increase at 75-80 km 08 p1154 A72-20729

Ionospheric disturbances and prediction dependence on solar and geophysical activities, discussing SID, pca, auroral absorption and F 2 region 11 p1623 A72-26267

SID coincident with solar photon burst, showing vertical variations of electron concentration 11 p1713 A72-26269

Magnetospheric substorm model for auroral activity sudden increase and ionospheric current development explanation by shock wave excitation in magnetospheric tail neutral layer 13 p1948 A72-29239

Experimental evidences for a transient ion layer formation in connection with sudden ionospheric disturbances in the height range 20-50 km. 17 p2545 A72-34630

Correlation of solar radio bursts and sudden increases of the total electron content /SITEC/ of the ionosphere. 17 p2598 A72-34698

Sudden ionospheric disturbance effect on D region vertical distribution profiles, finding sixfold electron concentration increase at 75-80 km 19 p2791 A72-38357

Ionospheric D region, a sensitive detector of hard X-rays of solar subflares. 19 p2852 A72-38628

Satellite measurements of solar X-ray flux and their use for interpretation of sudden ionospheric disturbances. 22 p3219 A72-42884

The effective recombination coefficient in the ionospheric D region 23 p3283 A72-43364

Quadruple conjugate pair observations of the sudden commencement absorption event on June 17, 1965. 23 p3286 A72-44526

Preconditions for the triggering of polar magnetic substorms by storm sudden commencements. 23 p3286 A72-44531

SUGARS
NT GLUCOSE
NT SUCROSE
Cyanogen induced phosphorylation of sugars in aqueous solution, discussing system prebiotic plausibility 04 p0483 A72-14771

Intercalation complexes of Lewis bases and layered tantalum and niobium disulfide superconductors, noting critical temperatures 01 p0113 A72-10018

Titaniums sulfide initiation of pitting corrosion of Ti stabilized corrosion resistant Cr-Ni-Ti steels 03 p0379 A72-14367

Ni corrosion by hydrogen sulfide, determining nickel sulfide scale chemical composition and crystallographic orientation by electron and X ray diffraction 06 p0828 A72-17606

Hopping electroconductivity of n-type GaS single crystals, observing frequency dependence 06 p0866 A72-18181

Lubricating mixtures of mineral oil with inorganic phosphates, hydroxides and sulfides, discussing lubrication mechanism and physical properties 06 p0837 A72-18603

IR emission of oxygen reaction with carbon oxysulfide, investigating molecular vibrational transitions 10 p1510 A72-24133

Stainless steels sensitivity to pitting corrosion under sulfides action, measuring rupture potential 11 p1661 A72-26648

Thermal stability of sulphides of some metals in iron-base cermets 23 p3298 A72-43285

Temperature and polarization dependence of arsenic sulfide single crystals and thin films intrinsic absorption edge, determining forbidden bandwidth and transitions types 23 p3324 A72-43688

SULFUR
NT SULFUR ISOTOPES
Fe-S segregation role in early chemical and physical history, giving model of early lunar differentiation 03 p0439 A72-14274

Sequential sulfidation and oxidation effects on sulfur self propagation in Ni-Cr alloy 05 p0677 A72-17110

JP-5 fuel sulfur content effect on aircraft engine turbine blades hot corrosion under marine environmental conditions 07 p1010 A72-18752

Dielectric sulfur activated liquids for high productivity electroerosion machining of steels and metallic carbides, comparing with petroleum 08 p1174 A72-21034

Ti-Ce-S alloys phase equilibria with isothermal cross section, discussing eutectic alloys anomalous structure and cerium monosulfide preparation method 08 p1187 A72-21784

Graphite morphology in metallic materials from scanning electron micrographs, discussing sulfur contents effect in tempered cast iron 10 p1500 A72-23825

Sulfur alloyed CdTe single crystals IR absorption spectrum, noting temperature effects 13 p2023 A72-29918

The kinetics of the reaction between oxygen and sulfur on a Ni/111/ surface. 24 p3378 A72-44951

SULFUR CHLORIDES
Fluorescence and absorption spectra from oxygen sulfur dichloride photodissociation in vacuum UV, discussing So formation 11 p1590 A72-26012

SULFUR COMPOUNDS
NT AMMONIUM SULFATES
NT CADMIUM SULFIDES
NT CARBON DISULFIDE
NT COPPER SULFIDES
NT DISULFIDES
NT HYDROGEN SULFIDE
NT LEAD SULFIDES
NT MOLYBDENUM DISULFIDES
NT POLYSULFIDES
NT SULFATES
NT SULFIDES
NT SULFUR CHLORIDES
NT SULFUR FLUORIDES
NT SULFUR OXIDES
NT SULFURIC ACID
NT TROILITE
NT WURTZITE
NT ZINC SULFIDES
NT ZINCBLLENDE
Lubricating action of sulfur-containing additives and chlorine compounds in lubricants and cermet materials, noting effects of iron compounds formation in contact region 07 p0996 A72-19967

Dielectric dispersion in SrS1 filamentary single crystals as function of Curie temperature in lf and shf range 09 p1367 A72-22422

Flame photometric detection of small concentrations of sulfur compounds in ambient air, describing spectrum scanning detector, rotating interference filter and correlation detector 10 p1480 A72-24101

Ni plating by chemical reduction method in boron hydride solution, deducing stabilizing effect of sulfur compounds and Pb salts from catalyst poisoning theory 11 p1641 A72-26265

Antioxidative and antiwear action of S-containing and S-free phosphoric acid ester additives in lubricating oils

12 p1835 A72-28201

Osarsite, a new osmium-ruthenium sulfarsenide from California.

22 p3172 A72-42450

SULFUR FLUORIDES

Airborne gas chromatograph for real time diffusion analyses, describing flight test results with sulfur hexafluoride plumes

09 p1307 A72-22451

Cardiorespiratory response to breathing dense sulfur fluoride-oxygen mixture under physical exercise conditions

12 p1767 A72-28314

Hypersonic sound attenuation and velocity dispersion in sulfur fluoride near critical point determined by light scattering measurement

16 p2422 A72-32946

SULFUR ISOTOPES

Apollo 12 lunar rocks and fines sulfur concentrations and isotope ratios measurement

10 p1538 A72-24168

SULFUR OXIDES

Remote sensing of regional vertical air column pollutants, discussing sulfur dioxide and nitrogen dioxide measurements by correlation spectrometer [AIAA PAPER 71-1060]

01 p0057 A72-10529

Submillimeter wave sulfur dioxide molecular laser, investigating lasing lines, plasma decay and relaxation, line interactions and signal temporal behavior

04 p0532 A72-15595

Population inversion production in sulfur dioxide molecular laser

06 p0827 A72-18459

Sulfur dioxide and carbon dioxide interaction with clean silver surface at ultrahigh vacuum, using Auger electron spectroscopy and work function measurement

13 p1912 A72-28684

Carbon dioxide power laser effects on IR spectra of HCl-ethylene and sulfur dioxide-ethylene mixtures, focusing with Ge lens

13 p1971 A72-29870

Oscillator strength for sulfur monoxide transition band systems calculated from radiative lifetime with Franck-Condon factors

20 p2966 A72-38916

SULFURIC ACID

Heat treatment effect on elastic properties of steel clad material for devices in sulfuric acid, discussing structural changes and optimal conditions

07 p1020 A72-20415

SUMMARIES

NT ABSTRACTS

SUMMER

Shielding and semitransparent sporadic E layer fine structure characteristics from summer observations data analysis

02 p0222 A72-12523

Tropical east-west atmospheric circulation geometrical, thermal and intensity characteristics during northern summer

03 p0384 A72-14143

Latitudinal distribution of electron temperature in F 2 layer during summer daytime period of low solar activity from electron density profile geometrical parameters

05 p0656 A72-16248

Tropical upper tropospheric motion field during Northern Hemisphere summer, computing energy exchange between zonal flow and eddies

06 p0842 A72-18437

Quarter thickness variation and particle temperature dependence on height and frequency in summer daytime F region

08 p1155 A72-20815

Sporadic E layer critical frequency relationship to ionospheric wind direction for midlatitudes in summer period

10 p1472 A72-24079

Slant path radar attenuation events due to rain during summers at 10 GHz, obtaining statistics on frequency of occurrence, extent in azimuth and duration

15 p2200 A72-32103

Summer upper mesosphere and lower thermosphere positive ion composition at high latitudes from Nike Cajon rocket soundings

16 p2383 A72-32966

A diagnostic study of the vorticity balance at 200 mb in the tropics during the Northern summer.

22 p3201 A72-42507

Noctilucent clouds in daytime - Circumpolar particulate layers near the summer mesopause.

22 p3173 A72-42515

SUMS

Summability and absolute convergence of Fourier series in large, proving theorems on boundedness of trigonometric polynomials integral norms sequence

03 p0382 A72-13947

Infinite series summation in terms of rapidly convergent definite integrals

05 p0682 A72-15808

Best approximation estimates for function of many variables by sums of two functions of smaller number of variables

08 p1199 A72-21299

Convergence of random number sums of independent infinitesimal multidimensional stochastic step processes to generalized Poisson processes

09 p1340 A72-22423

An algorithm in arithmetic with a floating point to increase the accuracy of a sum

17 p2575 A72-34906

Necessary and sufficient conditions for space linear operator factorization, noting summation operators theory

18 p2704 A72-36462

SUN

Radio observations of filaments in absorption against solar disk during 11 September 1969 and 7 March 1970 eclipses

03 p0415 A72-12939

K3-M2 dwarf space motions in solar neighborhood analyzed for sun motion

07 p1073 A72-19347

Precessional corrections, solar motion and galactic rotation determination from proper motions by maximum likelihood method, taking into account stars visual magnitude

09 p1391 A72-23535

Contact time determinations during 9 May 1970 Mercury passage across solar disk

14 p2153 A72-30498

Quiet and active models for solar structure and processes in terms of elementary physical concepts

15 p2302 A72-31276

Temporal properties of Ca II K line profile in solar disk nonmagnetic regions, noting time sequences of spectrograms and spectroheliograms

15 p2317 A72-32773

Faculae and the solar oblateness.

19 p2855 A72-37240

Contact time determinations during 9 May 1970 Mercury passage across solar disk

19 p2864 A72-38327

Solar silver abundance from spectral scans for Ag 3280.7 and 3382.9 A resonance lines, using spectral synthesis method, model atmosphere and limb darkening observations

22 p3221 A72-42028

A non imaging approach to solar oblateness measurements.

22 p3222 A72-42046

Observation error in time determination of solar limb contact with optical instrument hair, noting effect on accuracy of time and longitude measurement

24 p3438 A72-44859

Application of the restricted hyperbolic three-body problem to a star-sun-comet system.

24 p3442 A72-45234

SUN SENSORS

U SOLAR SENSORS

SUNLIGHT

Multiple scattering polarization of sunlight reflected by terrestrial water clouds as function of particle shape and size, using doubling method

03 p0384 A72-14145

Jupiter and Venus cloudy atmosphere reflected sunlight circular polarization measurement, noting sense variations with phase angle and location on disk

03 p0439 A72-14150

Sunlight resonance scattering by spherically symmetric optically thick artificial Sr clouds, comparing photometric data with computed theoretical isophotes, line profiles and irradiances

09 p1297 A72-22579

Sun vicinity skylight polarization influence on polarimetric K corona observations, discussing inaccuracy sources

09 p1392 A72-23544

Solar cell calibration in uncollimated sunlight, obtaining standards for solar simulator intensity

12 p1759 A72-28042

Lunar albedo and temperature distribution from simultaneous photoelectric and far IR brightness temperature measurements of sunlit lunar surface

22 p3226 A72-42536

SUNRISE

D region ion and electron density rocket measurement during sunrise, discussing negative ion electron affinity and ion production functions

03 p0347 A72-13397

Nighttime and sunrise period ionospheric electron density profiles with respect to time after sunset and solar zenith angle

08 p1226 A72-21102

Nocturnal F region electrodynamic drift at conjugate point sunrise time, discussing dynamo electrostatic field normal component change as cause of ionosphere vertical movement

09 p1297 A72-22576

Atmospheric electricity, turbulence and pseudosunrise effect during solar eclipse, analyzing space charge density and power spectra decay

12 p1800 A72-27140

Solar activity effects on integrated ion production rates at sunrise using atmospheric model

15 p2301 A72-32266

An investigation of the ionospheric D region at sunrise. I - Time variations of ozone, metastable molecular oxygen, and atomic oxygen. II - Estimation of some photodetachment rates. III - Time variations of negative-ion and electron densities.

18 p2656 A72-36295

Possibility of estimating an energetic particle stream in the ionospheric D region at sunrise and under daytime conditions

18 p2688 A72-36858

On the source of sunrise effects in the low ionosphere.

19 p2792 A72-38627

Sunrise and sunset period of helio-geophysical processes in terms of optical, X ray, corpuscular and radio characteristics of solar activity

19 p2868 A72-38637

Solar control over the evolution of F2-layer after sunrise.

24 p3395 A72-44822

Sunrise effects on the latitudinal variations of topside ionospheric densities and scale heights.

24 p3399 A72-45552

SUNSET

Sunrise and sunset period of helio-geophysical processes in terms of optical, X ray, corpuscular and radio characteristics of solar activity

19 p2868 A72-38637

SUNSPOT CYCLE

Lindauer electron density profile for maximum F layer over sunspot cycle using frequency dependent radio ground echo in satellite ionograms

01 p0054 A72-10421

F 1 layer appearance and critical frequencies average daily variations at Tsumeb, Southwest Africa, as function of sunspot cycle phase

01 p0055 A72-10428

Sunspot cycle 1958/70 effects on D region ionospheric absorption and stratospheric temperature measured by radiosonde

03 p0345 A72-12978

Sunspot cycles effect on F region drifts and irregularities from observations at Ibadan during 1966/67, noting seasonal and diurnal variations

06 p0806 A72-17643

Thin solar convection zone relation to sunspot cycle, noting magneto-kinematical model

06 p0886 A72-18099

Sunspots penumbral and umbral areas ratio in eleven year solar activity cycle, noting larger umbras at second maximum

07 p1082 A72-20295

Geomagnetic activity annual variations from daily international magnetic character figures analysis by time series numerical filter method, discussing sunspot cycle effect

09 p1298 A72-22584

Magnetic disturbances recurrence relationship to even- and odd-numbered sunspot cycles, noting existence of 22-year solar cycle

12 p1803 A72-27773

Ionospheric absorption measurements during sunspot cycle at fixed frequencies, noting monthly and seasonal variations

12 p1804 A72-27782

Sunspot cycle 21 behavior prediction, explaining solar activity forecasting based on 80 year cycle

13 p2046 A72-29727

Cycle 20 solar flare and sunspot distribution along heliographic longitude, using isoline analysis method

14 p2152 A72-30482

Ionospheric radio waves absorption and stratosphere temperature variations with respect to season and sunspot cycles, examining 1963-5 winter anomaly

15 p2195 A72-31555

Solar activity centers characteristics cyclic variations in decreasing and increasing parts of sunspot activity cycles, discussing latitude-longitude distribution

19 p2851 A72-37906

The sunspot cycle and solar and lunar daily variations in H.

22 p3228 A72-42882

SUNSPOTS

Steady motion effect on sunspot magnetic field stability related to force-free configurations and solar flare origin

01 p0118 A72-10083

Feautrier numerical solutions to transfer equation of polarized continuum radiation from sunspot in chromosphere

01 p0101 A72-10096

Midlatitude D layer observations during sunspot minimum, emphasizing atmospheric ionization and ozonospheric parameters

01 p0055 A72-10433

Solar flares forecasting based on group total sunspot area, largest spot area and spots number observations

01 p0118 A72-10570

Topological features of force free magnetic field near bipolar sunspots, considering chromospheric fibrils and filaments in H alpha lines

03 p0415 A72-12932

Telescopic phase retardation effect on Zeeman triplet Fe of polar sunspot umbrae in Stokes parameter measurements

03 p0357 A72-13288

Magnetic splitting of lines dependence on Paschen-Back effect for Li resonance doublet in sunspots
03 p0427 A72-13293

Sunspot and active region magnetic fields and thermodynamic structure from umbral and penumbral models, discussing magnetic fine structure
03 p0427 A72-13296

Magnetic field and turbulence in sunspots, studying local variations of saturation and Doppler broadening
03 p0428 A72-13297

Fine structure of magnetic field distribution in umbra and penumbra of sunspots
03 p0428 A72-13299

Spatial distribution of total magnetic vector and of electric currents in unipolar sunspot
03 p0428 A72-13300

Magnetic field strengths from umbral spectral lines in sunspots
03 p0428 A72-13301

Sunspot magnetic field evolution in time and space from four-camera spectral scanning method, obtaining magnetic flux and radial velocity field
03 p0428 A72-13303

High energy electrons behavior and sunspot magnetic fields in solar flares, using hard X ray and microwave radio burst balloon observations
03 p0410 A72-13323

Equatorial-western shifts of flare positions related to field maximum in sunspot groups
03 p0411 A72-13329

Fine structure features of sunspot magnetic fields and umbral dots, showing magnetic and thermal or mechanical forces interaction
03 p0430 A72-13334

Solar magnetic field distribution in sunspots surface layers, considering photospheric three dimensional magnetohydrostatic model
03 p0431 A72-13337

Solar magnetic field origin in fine structure elements of photosphere and sunspots
03 p0431 A72-13340

Solar magnetic fields small scale structure with emphasis on photospheric measurements, discussing sunspots fields
03 p0437 A72-13869

Radio astronomical observation of two local sources associated with unipolar sunspot group 275 and bipolar group 282, investigating emission directivity and brightness temperature
04 p0572 A72-14636

Ionospheric radio absorption, observing diurnal and seasonal variations and sunspot numbers and solar flares effects
04 p0518 A72-14966

Solar activity asymmetry on two hemispheres in 1959-1969, considering spots, faculae, prominences and corona
05 p0718 A72-16511

Toroidal magnetic ring development and interaction with poloidal magnetic field, considering relationships to sunspots bright rings and spicules dynamics
05 p0719 A72-16512

Magneto-optical effects on circular polarization in sunspots within Fe I 6302.5 Å line
05 p0719 A72-16514

Water molecules absorption lines in sunspots umbral near IR spectrum, noting improved spectrometric apparatus
05 p0719 A72-16515

Sunspot magnetic field strength rapid variation, discussing spot group development and flare activity
05 p0722 A72-17155

Statistical analysis of sunspot activity, forecasting solar cycle events
05 p0723 A72-17176

Electron content measurement for low latitude station obtained at sunspot maximum by Syncom 3, observing seasonal variation and winter anomaly effect
06 p0874 A72-18089

Magnetic vector directions determination in sunspots by fringe technique with corrections for instrumental polarization in line spectrum
06 p0889 A72-18326

Solar photosphere active regions and large scale flow patterns from Greenwich sunspot statistics
07 p1068 A72-18886

Sunspot umbra spectrophotometric scans with spatial cancellation techniques, finding 4200 K umbral temperature with 0.60 photosphere contrast
07 p1069 A72-19081

Solar MgH isotopic abundance ratios and photospheric lines, correcting previous overestimation for sunspot spectra analyses
07 p1071 A72-19179

Type 4 solar burst spectral characteristics relationship to flare class and magnetic field configuration in spot group
07 p1077 A72-19814

Local structure of solar magnetic fields in sunspots as complexes of microspots
07 p1079 A72-20008

Solar active regions properties observation, noting correlation with magnetic field, flares, sunspots, magnetic knots, pores, umbral flashes, etc
07 p1079 A72-20009

Long term variations in height of solar activity maxima and sunspot numbers during 11 year cycle
07 p1079 A72-20016

Solar surges /plasma ejections/ relation to spot groups and flares, correlating various observational data
07 p1063 A72-20294

Solar modulation of cosmic ray intensity in stratosphere, examining relationship to sunspots group number and heliographic latitudes over 11 year period
07 p1065 A72-20641

Transverse magnetic field measurement over sunspot in chromosphere, noting fan-shaped field line divergence
08 p1232 A72-21135

Solar general magnetic field nature, origin, fine structure and temporal variations, evaluating sunspots and active plage areas as field sources
09 p1387 A72-22752

Sunspot group number and average lifetimes in solar activity cycle
09 p1390 A72-23397

Solar rotation as function of heliographic altitude from measurements of Fe and H lines, sunspots and magnetic field in photosphere
10 p1541 A72-24569

Sunspots contact region charged particles acceleration by plasma flow induced electric field, noting Fermi type mechanism
11 p1695 A72-26107

Magnetically unaffected Fe I line profiles in sunspots from high resolution photographic spectra observation
12 p1867 A72-27205

Magnetic field gradient in sunspot umbrae from magnetically split line profiles
12 p1867 A72-27206

Solar magnetic field variation during solar rotation from sunspot observations, noting similarity to magnetic stars and behavior as quadrupole magnetic rotation
12 p1871 A72-27746

Solar activity relation to geophysical phenomena, discussing atmospheric circulation and climatic variation cyclicity and sunspot corpuscular fluxes
12 p1842 A72-28207

New and old sunspot groups proper motions in large scale flow of solar photosphere investigated as function of age, noting angular momentum transport direction
13 p2036 A72-28834

Sunspots, Doppler shifts, geophysical changes and statistical evaluation of diffuse objects motion in sun, discussing solar magnetic fields and 22 year cycle
13 p2044 A72-29701

Bright point intensity distribution on CN spectroheliogram of sunspot penumbra on 4 July 1970
13 p2045 A72-29710

Umbral model effect on Li abundance determination from sunspot spectra
13 p2045 A72-29711

Sunspot energy deficit relation to model depth, deriving facular model with two dimensional radiative transfer analysis
13 p2045 A72-29712

Photographic records of sunspot umbrae showing bright penumbral filament penetration
13 p2045 A72-29713

Eighty year cycle representation deduced from yearly means of sunspot relative numbers without use of averaging or smoothing method
13 p2046 A72-29728

Crossover and magneto-optical effects of line splitting in sunspot spectra, considering instrumental circular polarization
13 p2047 A72-29738

Sunspot magnetic field depth variations model, using configuration conditioned by Schlueter-Temesvary similarity law
13 p2048 A72-29740

Alfven wave transmission in sunspot umbral magnetic flux tube, noting standing progressive waves and energy dissipation in facular regions
13 p2049 A72-29937

Sunspot formation due to magnetic flux concentration in active region and formation of invisible pores with suppressed granular motion
14 p2148 A72-30205

Cycle 20 solar flare and sunspot distribution along heliographic longitude, using isoline analysis method
14 p2152 A72-30482

Solar proton flare prediction, examining diurnal rotation of axis connecting two stable spots and change in horizontal gradient of spots magnetic field
14 p2147 A72-30649

Sunspot umbral TiO gamma system photoelectric spectra examination for less abundant stable Ti isotopes
15 p2314 A72-32372

Tabulation of diatomic molecular lines observed in sunspot spectra with rotation branch, quantum number and vibration band
15 p2316 A72-32750

Large sunspot umbra high resolution spectrogram obtained by beam splitter with monochromatic polarization optics, noting blends near Zeeman lines
15 p2317 A72-32775

Eleven year period solar photospheric magnetic field evolution, comparing latitudinal variation with sunspots, faculae and prominences distribution and green-line corona intensity
15 p2317 A72-32778

Sunspot area east-west asymmetry dependence on location in chromospheric facula or plage, considering solar atmosphere optical and geometric depth changes
15 p2318 A72-32787

Photoelectric observations of Fraunhofer ionized metal lines in sunspot spectrum relating to umbral dots
16 p2458 A72-33687

Note on the characteristics of sunspot groups which produce solar proton flares.
17 p2608 A72-35087

The identification of the 1-0 and 2-1 bands of HCl in the infrared sunspot spectrum.
17 p2611 A72-35299

On the temporal distribution of type IV burst-active centres over the solar cycle /Research note/.
17 p2602 A72-35715

Type 3 solar burst spectral characteristics relationship to flare class and magnetic field configuration in spot group
17 p2618 A72-35739

Sunspot control of ionospheric absorption.
18 p2686 A72-36231

A working model for sunspot umbrae.
18 p2727 A72-36740

Nature of the 80-90 year cycle of solar activity
19 p2860 A72-37952

Correlation of polarization in type III solar radio bursts at frequencies of 23.5 and 30 MHz
19 p2851 A72-38065

Geomagnetic activity index Ap variation spectral data analysis, noting correlation to sunspot number variation
19 p2793 A72-38747

He abundance relationship to solar wind bulk speed and temperature from Explorers 34 and 43 observations, noting dependence on sunspot number
19 p2853 A72-38749

Eu, La and Sm in sunspot spectra.
20 p2973 A72-39884

Coexisting weak and strong opposite-polarity magnetic field regions as cause of sunspot umbra Zeeman spectra pi-component splitting
21 p3108 A72-41283

Photoelectrically observed diatomic carbon absorption lines in sunspot spectra for two energy bands
21 p3108 A72-41284

Diatomic carbon lines search in sunspot umbras spectrum from solar telescope observations
21 p3108 A72-41285

Sunspot temperature increase stimulation of supergranule motion leading to spot decay and magnetic field diurnal fluctuation development
21 p3114 A72-41762

Observations of the horizontal velocity field surrounding sunspots.
22 p3221 A72-42033

The great solar flares of August, 1972.
22 p3219 A72-42984

Sunspot formation due to magnetic flux concentration in active region and formation of invisible pores with suppressed granular motion
23 p3333 A72-43235

Sunspots and solar granulation recording and imaging with 64-element array of PbS IR detector for obtaining high SNR and resolution
23 p3288 A72-43883

SUPERALLOYS
U HEAT RESISTANT ALLOYS
SUPERCAVITATING FLOW
Integrodifferential equation for rigid tunnel walls effect on supercavitating flow past thin jet flapped airfoil, noting lift coefficient derivatives
10 p1469 A72-24562

The lift coefficient of a supercavitating jet-flapped foil in a free jet.
21 p2992 A72-41236

SUPERCAVITATION
U SUPERCAVITATING FLOW
SUPERCONDUCTING MAGNETS
Cu clad Nb-Ti wire wound superconducting solenoids with large fields at 1.6-5.2 K
10 p1446 A72-23762

Superconducting magnetic suspension and balance facility of superersonic wind tunnel for dynamic stability studies
10 p1460 A72-24757

Electrical loss measurements in superconducting magnets at 60 Hz for Nb-Sn ribbon and Nb-Ti cable and multifilament coils
10 p1460 A72-24760

Data acquisition and reduction for model aerodynamics in superconducting magnetic suspension and balance of superersonic wind tunnel facility
10 p1461 A72-24766

Superconducting magnetic suspension systems safety aspects, discussing relief valves for He boil-off, flowmeters, cryostat temperature monitors, power supply diodes and safety interlocks 10 p1462 A72-24774

Antimatter search in primary cosmic rays by balloon-borne superconducting magnetic spectrometer capable of direct matter-antimatter separation 12 p1863 A72-27296

Simplified theory for optimizing the design of a heat shield in an isochorically operated toroidal dewar. 19 p2805 A72-38843

SUPERCONDUCTIVITY

High conductivity superfluid region in cryogenic liquid helium 4 bath with temperature gradient in equilibrium with saturating vapor 01 p0101 A72-10040

Semiconducting crystal superconductivity in laser field by interaction between electron conduction band and light induced polarization 02 p0269 A72-12883

NbN thin film stabilization by metal overlays with reduction in ac losses, discussing superconducting reversibility to normal transition 04 p0560 A72-14542

Superconductivity - Conference, Stanford, California, August 1969 04 p0562 A72-15291

Nb-Ti alloy critical current density increase dependence on temperature, discussing evidence supporting rigidly pinned vortex lattice model 04 p0562 A72-15292

Uniaxial stress effect on monocrystalline niobium stannide superconducting transition temperature, considering crystal structure 04 p0562 A72-15293

NbN film superconducting properties measured as function of thickness, discussing transition temperature, critical current and magnetic field 04 p0562 A72-15294

Critical supercurrents in heat treated and cold worked Nb-Ti wires, proposing pinning model based on enhancement of Ginzburg-Landau parameter in cell walls 08 p1186 A72-21594

Phase diagrams, superconducting properties and annealing critical temperature of Nb-Al-Ge alloys, establishing four phase peritectic equilibria 08 p1218 A72-21778

Josephson effect /superconducting weak link/ devices for low frequency magnetic field sensing, noting applications in magnetocardiography and absolute noise thermometry 08 p1218 A72-21919

Superconductivity in d- and f-band transition metals - Conference, University of Rochester, New York, October 1971 09 p1367 A72-22551

Maximum superconducting transition temperature estimation, discussing optimum resonant frequency for attractive interaction, umklapp electron scattering and lattice instabilities 09 p1367 A72-22553

Ta, Nb and La superconductivity, investigating surface contamination effects on electron tunneling characteristics 09 p1367 A72-22554

Electron phonon coupling in tight-binding approximation for phonon frequency renormalization and transition metal superconductivity coupling constant computation 09 p1368 A72-22555

BCS theory for transition metals and alloys superconductivity, discussing electron phonon coupling, transition temperatures and Cooper pair fluctuations 09 p1368 A72-22556

La superconductivity pressure dependence based on valency considerations, noting actinides metals and alloys localized magnetism explanation by simple model 09 p1368 A72-22557

Transition metal superconducting thin films and rf cavity surface protective coverings, investigating properties by low energy electron diffraction and Auger spectroscopy 09 p1368 A72-22560

Superconductivity observation in Na, K and Rb intercalates of molybdenum disulfide comparing transition temperatures 09 p1368 A72-22561

Phonon dispersion curves from inelastic neutron scattering for actinide and transition metals carbides, noting superconducting properties 09 p1369 A72-22564

NbN family high transition temperature values application to phonon spectrum prediction based on superconductivity microscopic theory 09 p1369 A72-22565

Electron phonon coupling and IR optical constants relationship to superconductivity in transition metals 09 p1369 A72-22566

Magnetic phenomena effects on superconductivity in simple and transition metals and dilute rare earth alloys 11 p1701 A72-26025

Superconductive behavior of cold-worked sintered Nb wires, examining effects of aluminum oxide addition on residual resistivity, magnetization behavior and critical current density 11 p1662 A72-26742

Transition temperature and other superconducting properties of annealed Nb-Al-Ge thin films 12 p1853 A72-27038

Broadband superconducting quantum microwave magnetometer design, operation and performance 12 p1812 A72-28219

Analog simulation of Josephson superconducting junctions dc characteristics for two mixed microwave frequencies, discussing signal detection sensitivity improvement 13 p2021 A72-28648

Parametric regeneration in Josephson superconducting point contacts for combination frequency signal amplification and conversion in microwave application 13 p1932 A72-29298

Critical superconductivity currents measurement in niobium based U shaped and coiled wires within steady magnetic field 13 p2007 A72-30013

Metallurgical and superconducting properties of beta-tungsten structure niobium aluminide with high critical temperature 14 p2119 A72-30607

Hydrogen impregnated Ta superconducting to normal transition and M-H curves, discussing effect on impure surface layer superconducting properties 15 p2293 A72-32242

Superconductivity, temperature and tunneling effects in low carrier density semiconductor systems /tin, germanium and indium tellurides, lanthanum triselenide and strontium titanium oxide/ 15 p2293 A72-32325

In-Ti alloys electron phonon interaction and superconductivity electron tunneling examined by sum rule and mass defect theory 15 p2295 A72-32543

Ti-Mo binary solid solution, investigating superconducting transition temperature, lattice instability and electron-to-atom ratio by calorimetric measurements 15 p2295 A72-32544

Superconductivity. 17 p2594 A72-34565

Dependence of critical supercurrent on normal layer thickness in S-N-S structures. 19 p2846 A72-38631

Stabilization of a superconducting modification of beryllium by an aluminum admixture 20 p2960 A72-39407

Phenomenological models of the electron-phonon interaction and the superconductivity criterion of metals 21 p3098 A72-41688

Critical superconductivity currents measurement in niobium based U shaped and coiled wires within steady magnetic field 22 p3190 A72-42735

Characteristics of superconducting niobium-tin alloys obtained by the vacuum evaporation method 22 p3192 A72-43013

Superconducting transition temperature increase in Nb-Al-Si alloys as function of composition under tetragonal lattice crystallization 22 p3192 A72-43020

Effect of an alternating current on the steady characteristics of Josephson point contacts 22 p3208 A72-43109

Magnetic flux penetration into superconducting thin films. 23 p3323 A72-43271

Dependence of changes in the electronic dislocation-braking force during superconducting transition on the stresses, temperature, and strain rate 23 p3312 A72-43315

Model of degenerate semiconductor near semiconducting phase transformation, noting superconducting state at low temperatures with corresponding impurity concentrations 23 p3323 A72-43317

Laplace equation for homogeneous magnetic field perturbation by superconducting elliptical cylinder and by two parallel circular cylinders 23 p3313 A72-43779

Properties of a superconducting point contact contained in a resonator 23 p3324 A72-44221

SUPERCONDUCTORS

Intercalation complexes of Lewis bases and layered tantalum and niobium disulfide superconductors, noting critical temperatures 01 p0113 A72-10018

Electron microscopy and diffraction analysis of lattice imperfections of layered superconducting transition metal dichalcogenide intercalation complexes 01 p0113 A72-10019

High transition temperature alloys, layered intermetallic and organic superconductors development and properties 01 p0113 A72-10163

Dc and ac Josephson effects in bulk granular superconductor, presenting junction I-V characteristics 02 p0268 A72-11477

Dynamic equations for nonequilibrium stationary state superconductors with electron-phonon and electron-electron inelastic collisions 03 p0401 A72-13089

Propagation modes attenuation and phase shift of electromagnetic plane wave in superconducting coaxial cylindrical waveguide 03 p0321 A72-13170

Strong coupling superconductors transition temperature derivation from Coulomb pseudopotential and Einstein-type phonon spectrum 03 p0402 A72-13672

Longitudinal ultrasonic sound attenuation in superconducting Mo-Re alloys as function of temperature, magnetic field and frequency, using evaporated thin film CdS transducers 04 p0562 A72-15299

Flux lines interaction with dislocations in twisted superconducting niobium single crystals, measuring flux gradient and dislocation arrangement 06 p0830 A72-18055

State density singularities elimination in inhomogeneous superconductors by electron interactions nonuniformities, resulting in tunnel junction current-voltage characteristic fluctuation 07 p1047 A72-18915

Superconducting magnetic spectrometer for cosmic ray nuclei spectrum analysis, describing design, calibration and operation 07 p0983 A72-19315

Abrikosov and Mendelsohn models of nonideal superconductors of second kind in transverse magnetic field, discussing Landau-Ginzburg parameters and critical current density 07 p1049 A72-20153

Critical temperature dependence of Nb-Al-Ge superconducting alloys on composition and heat treatment, discussing phase boundaries and electron state densities 07 p1049 A72-20154

Precipitation hardening of quenched superconducting Nb-Al alloys, examining polycrystalline and single crystal samples and intermetallic phases 07 p1050 A72-20155

Precipitates dispersion and fluxoid pinning /critical current density/ in superconducting Nb-Hf alloy during aging, using transmission electron microscopy 07 p1020 A72-20417

Lattice expansion of metal chalcogenide superconducting organometallic structures with aromatic or aliphatic Lewis bases sandwiched into van der Waals gap 08 p1216 A72-21244

Quasi-particle decay rates by electron-electron scattering in superconductors, noting effect on states tunneling density 08 p1217 A72-21599

Superconducting quantum flux sensors for measuring magnetic fields and susceptibility, voltage and resistance 09 p1308 A72-22466

Transition metal superconductors transition temperatures survey, considering d-band solid solution alloys and intermetallics and ferromagnetic element compounds 09 p1367 A72-22559

Spin excitation effects in superconductors, noting impurity concentration effects on transition temperature and thermodynamic properties 09 p1368 A72-22558

A-15 superconducting films preparation computer-aided method, noting alloying effects and crystal structure stability determinations applications 09 p1368 A72-22559

Pressure effects on transition temperature and electronic structure of narrow band superconductors 09 p1368 A72-22562

Transition temperature pressure dependence determination for d- and f-band superconductor metals, alloys and compounds 09 p1368 A72-22563

Nb-Al-Ge alloy superconductor deposits structure, transition temperature and critical current densities after preparation by triode sputtering and heat treatment 09 p1369 A72-22795

Pinning force of vortex lines and microstructural inhomogeneities in superconductors, using magnetization and critical current measurements 09 p1369 A72-22796

Magnetic induction distribution in second species superconductor cylindrical samples after limited flux jumps, proposing instability propagation model 09 p1369 A72-22797

Inhomogeneous superconductors and proximity effects, calculating conditions for vortex lattice pinning energy as increasing function of magnetic field and temperature 09 p1370 A72-22798

- Josephson dc and ac effects in plane junctions with thin semiconducting film barrier of evaporated material between two superconductors 09 p1370 A72-22800
- Short and long term frequency stability improvement in X band klystron oscillator stabilized by high Q superconducting cavity 10 p1449 A72-24303
- Superconducting levitron machine for trapped hot plasma stability and confinement studies in vacuum, discussing construction and coil performance 10 p1460 A72-24759
- Superconducting coil design for magnetic suspension of supersonic wind tunnel balance 10 p1460 A72-24759
- Abrikosov vortex lattice in superconductors, calculating resonance linewidth and vacancy formation energy 11 p1699 A72-25718
- Strip and line source antennas quality factor, examining relationship to superconductivity ratio 13 p1916 A72-28535
- Friction force electron component for superconducting dynamic dislocation at various temperatures and propagation rates 13 p2021 A72-28901
- Nb superconducting resonant cavities application to linear accelerator and RF particle separator structures in GHz region for wall energy loss reduction 13 p1922 A72-29348
- Dynamic equations for superconductors with electron-phonon and electron-electron inelastic collisions, investigating nonequilibrium stationary states 13 p2022 A72-29438
- Two fluid model application to microbridges between superconductors, investigating superconducting particles number time variation possibility 13 p2023 A72-29789
- Joule heating power density in NbZr superconductor hollow cylinder, estimating temperature changes and instability locations 13 p2023 A72-29855
- German monograph on superconductors transition temperature calculation by iteration method using phonon spectrum approximation 14 p2143 A72-30947
- Superconducting to normal transition field as function of temperature for Ta with thin surface layer variable density impurities 15 p2293 A72-32241
- One electron and Josephson tunneling in superconductors in terms of energy level concepts 15 p2293 A72-32236
- Multifilamentary superconducting Nb-Sn composite wires in ductile metal matrix, determining transition temperature and critical current density 15 p2294 A72-32534
- Thin film superconductors conductivity evaluation above transition temperature through renormalization of impurity-scattering vertex by pair fluctuation effect inclusion 15 p2295 A72-32540
- Emitted phonon spectrum effects on detected signal response in superconducting Sn diodes, noting deviation from linearity 15 p2209 A72-32541
- Two band model explanation of Hall effect in dirty type-II transition metal superconductors near upper critical field, noting interband impurity scattering role 15 p2295 A72-32542
- Heat capacity data analysis for solid solutions of superconducting Nb-Ti system, investigating electronic structure 15 p2296 A72-32692
- Flux quantization in superconductors demonstrated by magnetometer probe measurement of magnetic field trapped in thin In film holes 16 p2441 A72-33225
- Hard superconductors cylindrical samples irreversible magnetization and size effect calculation, comparing results with experiment on Nb-Ti alloy specimens 16 p2441 A72-33523
- Experiments on the phase contrast transfer functions of a superconducting lens 17 p2594 A72-34284
- Superconducting-cavity-stabilised oscillator of high stability. 17 p2530 A72-35386
- Measurements of ultrasonic velocities using a digital averaging technique. 18 p2691 A72-36401
- Anisotropy and strong-coupling effects on the critical-magnetic-field curve of elemental superconductors. 18 p2719 A72-36710
- Voltages induced in superconductors in the absence of transport currents. 18 p2719 A72-36744
- The effect of dislocation tangles on superconducting properties. 18 p2719 A72-36746
- Superconducting energy gaps and transition temperatures of disordered cadmium and zinc films. 19 p2844 A72-37690
- State density singularities elimination in inhomogeneous superconductors by electron interactions nonuniformities, resulting in tunnel junction I-V characteristic fluctuation 20 p2960 A72-39385
- Flux vortices and transport currents in type II superconductors. 20 p2961 A72-39809
- Interactions between dislocations or flux lines moving through hardened crystal, discussing distribution functions method applications to diffuse and localized obstacles 20 p2962 A72-39994
- Electrodynamical analysis of superconducting vortices interaction with cylindrical cavities [pinning], calculating critical currents in type II superconductors in external magnetic field 21 p3096 A72-40416
- Force free fields in type II superconductors. 21 p3096 A72-40573
- Extension of Eliashberg's theory to type-II superconductors. 21 p3097 A72-40574
- Tunneling generation, relaxation, and tunneling detection of hole-electron imbalance in superconductors. 21 p3097 A72-40774
- Phase precipitation structure of superconducting Nb-Ti alloys after cold working and low temperature annealing 21 p3067 A72-40951
- Fabrication studies of Nb3Al superconductors. 21 p3097 A72-41182
- Two band superconductor state density vs energy, noting energy spectrum extremal points 21 p3098 A72-41697
- Ultrasonic evidence against multiple energy gaps in superconducting niobium. 22 p3190 A72-42476
- Superconducting alloys of niobium and vanadium 22 p3191 A72-42808
- Plotting of composition vs property curves for superconducting systems with a digital computer by the method of simplex arrays 22 p3191 A72-42813
- Niobium superconductive tunnel diode integrated circuit arrays. 22 p3161 A72-43090
- Specific-heat and magnetic measurements in superconducting Ta-Nb alloys. 23 p3323 A72-43273
- Thermal conductivity in the two-band model of superconducting transition metals containing nonmagnetic impurities. 23 p3323 A72-43274
- Equilibrium equations for vortex lines with allowance for interaction with boundary of ideal superconductor, calculating extremum values of magnetic field 23 p3312 A72-43316
- Influence of hydraulic extrusion on the composition and properties of the Nb3Sn compound 23 p3323 A72-43597
- Thermal conductivity of superconducting layer in intermediate stage with Andreev electron excitation trajectories in magnetic field, using Green function and impurity distribution technique 23 p3325 A72-44486
- Thermal conductivity in dirty transition-metal superconductors near the upper critical field. 24 p3432 A72-45675
- SUPERCOOLING**
- BiTe crystal critical growth rate calculation based on theory for diffusional supercooling of melt with excess Te 08 p1217 A72-21338
- Supercooled water drops freezing by contact nucleation with AgI and silicate particles, determining effective temperature in updraft wind tunnel experiments 09 p1345 A72-22445
- Supercooled cloud water droplets in free fall shattered by shock waves measuring ice crystal formation probability 09 p1345 A72-22446
- Crystallization discontinuity and layer thickness in welded joints as function of overcooling and isotherm shape 13 p1963 A72-28922
- Subcooling and acceleration effects on nucleate boiling heat flux, comparing heat transfer prediction models with experimental measurements 16 p2477 A72-33433
- Mathematical formulation of ice crystal formation and propagation mechanism in seeded supercooled convective clouds 23 p3311 A72-43722
- SUPERCRITICAL FLOW**
- Supercritical stationary states of dissipative hydromagnetic rotating Couette flow between electrically insulating cylinders within axial magnetic field. 04 p0554 A72-14405
- Pneumatic amplifiers with controlled pressure during subcritical and supercritical flow, considering jet-resonant choke, conical and membrane systems 11 p1578 A72-26783
- Supercritical aerodynamics technology, noting lifting surface cross sectional profile and structural weight reduction 19 p2746 A72-37678
- SUPERCRITICAL PRESSURES**
- Anisotropic shell supercritical deformation, deriving formula for lower critical load for shallow orthotropic spherical segment under external pressure 03 p0447 A72-13729
- Heat transfer in rectangular annular channel during external heating under supercritical pressure, discussing thermal flux, mass flow rates and enthalpy 03 p0457 A72-14152
- Supercritical pressure turbulent forced fluid heat transfer mechanism hypothesis, explaining anomalous transfer improvements and deteriorations 04 p0511 A72-14641
- Supercritical deformation, bulging and instability of spherical edge clamped shell under external pressure, applying variational principle 05 p0742 A72-17210
- Cs and Hg vapors compressibility factor in supercritical range as function of density, considering charged particles and atoms polarization interactions in ionized metal vapors 07 p1040 A72-18943
- Supercritical deformation, bulging and instability of spherical edge clamped shell under external pressure, applying variational principle 11 p1727 A72-25341
- Supercritical pressure convergent nozzle performance prediction by time dependent method of characteristics solution to mixed flow problem, adapting Moretti-Abbott technique [AIAA PAPER 72-680] 16 p2346 A72-34061
- Combustion of liquid propellants under supercritical conditions 17 p2637 A72-34946
- Experimental study of conditions for heat transfer deterioration in a turbulent carbon dioxide flow under supercritical pressure 18 p2742 A72-37185
- A thermal stratification model of a cryogenic tank at supercritical pressures. 19 p2883 A72-38845
- Determination of the optimal parameters of high-pressure cryogenic fluid storage systems. 20 p2962 A72-39358
- A theoretical model for the combustion of droplets in super-critical conditions and gas pockets. 24 p3463 A72-45050
- SUPERCRITICAL WINGS**
- Supercritical thick wing for structural weight reduction and increased cruise speeds flight tested on Navy T2-C aircraft 11 p1576 A72-25583
- [SAE PAPER 720320] Book - A theory of supercritical wing sections, with computer programs and examples. 21 p2993 A72-41534
- SUPERFLUID FLOW**
- U SUPERFLUIDITY**
- SUPERFLUIDITY**
- High conductivity superfluid region in cryogenic liquid helium 4 bath with temperature gradient in equilibrium with saturating vapor 01 p0101 A72-10040
- Relaxation time estimation for electron velocity relative to dilute vortex core array in rotating neutron superfluid, applying to pulsar slowdown rate 04 p0571 A72-14590
- Neutron star properties, formation theories, crust composition and internal structure, examining interior neutron behavior, fermion systems superfluidity, magnetic field effects and stellar dynamics 10 p1533 A72-23890
- Pulsar speed increase mechanism as metastable flow state transition in neutron star superfluid core 11 p1724 A72-26705
- Temperature oscillations associated with surface gravity waves at two fluid model compressible vapor-incompressible superfluid interface 12 p1845 A72-27386
- Temperature and pressure requirements for producing superfluid liquid molecular hydrogen, noting use of solid deuterium or Ne walls to prevent hydrogen solidification 16 p2422 A72-32911
- Two fluid model for qualitative interpretation of turbulent intermittency, noting governing equations analogy to Landau equations for superfluidity 19 p2787 A72-38428
- Heat transfer with the helium II superfluid film. 19 p2883 A72-38839
- Breakdown of superfluidity for cylinders in saturated liquid helium II. 19 p2836 A72-38840
- Thermohydrodynamic conditions at the peak flux of horizontal heaters in superfluid liquid helium II at zero net mass flow. 20 p2984 A72-39647
- Neutron star model for magnetic field and superfluidity effects on cooling during pulsar stage 22 p3228 A72-42565
- Reflection and transformation of sound waves in a superfluid liquid at a solid boundary 22 p3207 A72-42956

SUPERGIANT STARS

Six color photometry of F-G supergiants in Large Magellanic Cloud, noting color similarity with galactic stars

03 p0416 A72-13019

Magellanic Clouds hot supergiants color-magnitude arrays from spectroscopic and photometric measurements

03 p0424 A72-13253

Magellanic Clouds neutral hydrogen distribution, concentrations and velocity structure, noting H II correlation with supergiant stars

03 p0425 A72-13256

Magellanic Clouds bright star intermediate band photometry, discussing interstellar extinction and luminous supergiants

03 p0425 A72-13257

Small Magellanic Cloud NGC 371 region photometric studies for cepheids period-luminosity relations, noting domination by young supergiant stars

03 p0425 A72-13258

Magellanic Clouds supergiant stars intrinsic colors, observing in five spectral bands to separate from Galactic foreground stars

03 p0425 A72-13260

Early type supergiant far UV spectrum observations, showing broad absorption feature near 1720 Å

04 p0578 A72-15315

MHz IR/OH sources, discussing M type Mira variables or M supergiants photospheric temperature and dust shell structure

07 p1069 A72-19075

Model atmosphere and spectral analysis for two early B-type supergiant stars, deducing stellar mass and evolutionary phase

07 p1070 A72-19085

M supergiants in Carina arm, discussing photometric studies at 4-18 microns, interstellar extinction uncertainties and spatial distribution

07 p1072 A72-19344

Astronomical IR spectroscopy of Alpha Ori, discussing OH line formation, LTE, rms turbulence velocity and abundance

07 p1072 A72-19345

Quasar rotation and pulsation periods within pulsar models, postulating supermassive stars /one million-one billion solar masses/ as energy sources

09 p1385 A72-22536

UBVr colors of supergiants as function of radiation pressure, sphericity, microturbulence and effective temperatures

10 p1542 A72-24609

Spectrographic analysis of K-type supergiant epsilon Pegasi for effective temperature, surface gravity and heavy and light element abundances

10 p1543 A72-24621

Photoelectric scans of M supergiant alpha Ori and carbon stars from 3400 to 11,000 Å, obtaining dominant spectral features

10 p1548 A72-24967

Fowler quasars and exploding galaxies model tested by hydrodynamic equations numerical solution for premain sequence contraction and relativistic collapse of nonrotating supermassive star

12 p1866 A72-27202

Stellar photometric observations in Magellanic Clouds, presenting photoelectric sequences in UVB system, interstellar reddening and extinction data

14 p2159 A72-30737

Massive red supergiants radial pulsations from adiabatic theory application to convective envelope models based on mixing length theory and H-He ionization zones

14 p2159 A72-30743

Binary nature of the B supergiant in the error box of the Vela X-ray source.

17 p2604 A72-34521

A recalibration of the absolute magnitudes of supergiants.

17 p2609 A72-35115

Vibrational stability of supermassive stars stabilized dynamically by a uniform or differential rotation

17 p2613 A72-35461

Supergiants internal structure, evolution and spectral characteristics, discussing instability phenomena and luminosity calibration

18 p2723 A72-35995

Variation of evolved blue/red ratio for supergiants as function of stellar mass, discussing status of astrophysical test for neutrino emission

19 p2854 A72-37235

Astronomical observations supporting stellar atmosphere microturbulence concept, noting Cepheid variables high dispersion spectra, supergiants irregular changes and microturbulence hydrodynamic effect

19 p2857 A72-37525

Spectrographic and photometric observations of supergiants and foreground stars, in the direction of the Large Magellanic Cloud.

19 p2858 A72-37855

Structure and motions in the Carina spiral feature.

20 p2973 A72-39880

On the chemical composition of epsilon Pegasi.

20 p2974 A72-39901

Cool supergiant stars atmospheric model for chemical composition change effects due to nuclear burning cycle

22 p3227 A72-42556

Mixing between stellar envelope and core in advanced phases of evolution. IV - Effect of superadiabaticity in convective envelope.

23 p3335 A72-43486

The analysis of the small Magellanic Cloud supergiant HD 7583.

23 p3336 A72-43555

Titanium oxide molecular spectrum band intensities measurement for vibrational temperature of M supergiant stars, noting atomic absorption effect on measurement accuracy

24 p3448 A72-45681

SUPERHARMONICS

Electromagnetic potentials excited by dipole oscillator moving in homogeneous uniformly drifting medium, analyzing frequency spectrum and finite dimensions effect on higher harmonics

08 p1135 A72-21736

Geopotential harmonics of fifteenth order obtained from decaying satellite orbits analysis

15 p2311 A72-32001

ADP or KDP crystal induced second harmonic emission from Ar laser resonator, noting crystal temperature effects on primary/secondary radiation phase synchronism

16 p2400 A72-33281

Langmuir probe dc and second harmonic characteristics measuring system, describing switching circuitry

16 p2392 A72-33608

The superharmonic functions in the axiomatics of M. Brelot associated with a degenerate elliptical operator

24 p3418 A72-44825

SUPERHEATING

Superheating in Zr-oxygen combustion system during autoignition period

08 p1128 A72-21219

Binary system molar energy diagram plotting, covering superheated, saturation and liquid phase regions

08 p1255 A72-22170

Convective heat exchange of metastable liquid during suspension of boiling

19 p2881 A72-38037

Observation of superheat instability in a fully ionized current-carrying plasma.

20 p2958 A72-39854

SUPERHETERODYNE RECEIVERS

Three frequency IR laser signal heterodyne detection with 40-MHz if narrow-band reception, measuring SNR

05 p0669 A72-16607

High sensitivity wideband heterodyne receiver system for spaceborne and ground-based IR laser communications

07 p0940 A72-19238

High resolution stabilized superheterodyne microwave interferometer, noting noise figure and dynamic range

07 p0993 A72-20590

Superheterodyne radiometers for millimeter and submillimeter waves, using Mach-Zehnder interferometer frequency mixer for parasitic signal suppression

08 p1140 A72-21265

Reciprocity theorem for antenna directivity pattern measurement of optical superheterodyne receiver for carbon dioxide laser radiation

08 p1140 A72-21376

Laser communication lines in atmospheric ground layer, comparing SNR for direct-reception and superheterodyne video systems

15 p2247 A72-31887

Use of selective RC amplifiers in the radio-frequency amplifier stages of superheterodyne radio receivers

23 p3271 A72-43775

SUPERHIGH FREQUENCIES

Centimeter waves fading due to interference from tropospheric multipath propagation

01 p0027 A72-10412

Shf electromagnetic radiation interaction with solid body plasma, explaining wave propagation in solid state plasma waveguides

02 p0170 A72-11561

X band gallium arsenide field effect transistor, noting applications for radar receivers, microwave communication links and electronic countermeasures

02 p0193 A72-12184

Parametric excitation of hf and lf plasma oscillations by modulated shf field dependent on field strength at carrier frequency

03 p0394 A72-13086

High latitude scintillation effects on vhf and S band polar orbiting satellite transmissions, examining ionospheric irregularities

04 p0487 A72-14952

Broadbeam S band radar application to quantitative analysis of severe storms, calculating liquid water content

06 p0843 A72-18442

GaAs IMPATT diodes technology and performance at C, X and K band frequencies

06 p0788 A72-18466

Harmonic power extraction from series-stacked high efficiency avalanche diodes at superhigh frequencies on simple microstrip circuits

06 p0788 A72-18468

Low noise GaAs Schottky barrier FET for X and Ku bands applications

07 p0955 A72-19257

Hf and shf power transistor gain, efficiency and electrical characteristics for wideband linear amplifiers

08 p1139 A72-21051

Operational and equivalent circuit characteristics of low noise hf and shf transistors in wideband amplifiers

08 p1139 A72-21052

Viking Mars Orbiter and Lander radio and radars science experiments, noting surface tracking, dual frequency S and X band data and communications system

10 p1539 A72-24380

Tunnel diode amplifier for 8 GHz band, considering gain, bandwidth, noise factor and stability characteristics

12 p1790 A72-27533

Parametric excitation of HF and LF plasma oscillations by AM SHF field, noting dependence on field strength at carrier frequency

13 p2015 A72-29436

High reliability long life grid pulsed L band traveling wave tube with integral solenoid focusing for high power radar use

14 p2089 A72-31046

Dielectric waveguide X band telemetry system for remote power and multiplexing applications in noisy electromagnetic pulse environment

14 p2087 A72-31047

Prototype local oscillator for X band communication satellite, discussing electrical and mechanical characteristics and temperature and noise measurements

15 p2204 A72-31182

SHF signal propagation through troposphere at low elevation angles, comparing fading measurements in winter and summer

15 p2194 A72-31550

Pit shielded antenna measurements for communications satellite earth stations in 4 and 6 GHz bands, considering position range and erosion effects

15 p2196 A72-31794

Venus brightness temperature and phase dependence at 2.7 cm wavelength during 1968-1970

15 p2311 A72-32085

Nonideal component parts effect on behavior of digital microstrip closed circuit X band phase shifter presenting detailed network analysis

15 p2201 A72-32471

Electron beam modulation by SHF noise signal in a plasma-beam system

15 p2289 A72-32698

An X-band paramp with 0.85 dB noise figure /uncooled/ and 500 MHz bandwidth.

19 p2770 A72-37258

Spectral densities of radio emission fluxes from discrete radio sources at the 3.5-cm /8550 MHz/ wavelength

19 p2850 A72-37804

Limitations of technological state-of-the-art with satellite and space communications above 10 GHz.

19 p2765 A72-37940

SHF signal power influence on detector current, noting signal dependence on virtual cathode potential and signal power

19 p2774 A72-38410

Utilization of frequency bands allocated to satellite broadcasting for regional or domestic systems.

21 p3018 A72-40875

High resolution observations of 3C390.3 at 2.7 and 5 GHz.

21 p3111 A72-41471

Quasi-linear theory for the low-frequency instability of a plasma placed in a weak SHF electric field

23 p3321 A72-44172

X-band silicon double-drift IMPATT diodes using multiple epitaxy.

23 p3273 A72-44334

SUPERIMPOSITION [MATHEMATICS]

U SUPERPOSITION [MATHEMATICS]

SUPERMAGNETS

U HIGH FIELD MAGNETS

SUPERNOVAE

Supernova Vela X and local remnants as origin of below 1000 GeV cosmic electrons, deducing existence at 10 to 15 GeV from muon poor showers

01 p0119 A72-10853

Second decrease in Vela Pulsar period, noting time span between discontinuities and supernova remnant Vela X

02 p0277 A72-11904

High velocity interstellar Ca II near Vela pulsar 0833-45, discussing absorption line association with Vela X, Y, Z supernova remnant complex

02 p0279 A72-12191

Polycyclic hydrocarbon molecules formation in cool stars atmospheres and gases ejected by supernovae and Seyfert galaxies, discussing Platt particles origin 02 p0284 A72-12634

Supernovae remnants intrinsic luminosity-diameter correlations from soft X ray emission data, taking into account interstellar medium 03 p0408 A72-13008

Pulsar theory, discussing rotating neutron star principle, kinetic energy, structure, atmosphere, radiation mechanics and supernovae remnants 03 p0417 A72-13103

Pulsars formation rate and connection with supernovae and cosmic rays, discussing stellar magnetic field strength 03 p0421 A72-13134

Papers on Magellanic Clouds covering properties, observational and theoretical approaches, supernovae remnants, color-magnitude diagrams, globular clusters, etc 03 p0424 A72-13251

Explosive p-process nucleosynthesis limiting conditions in supernova envelopes, using proton capture and neutron photodisintegration rates 04 p0579 A72-15318

X ray and gamma astronomy, discussing old and blue stars, supernova remnants, radio galaxies, quasars and pulsars 04 p0582 A72-15687

Distance estimation for supernova remnants and H I regions from H I absorption measurements 05 p0712 A72-15770

Radio emitting giant loops in the Galaxy, considering supernova radiation induced nebulae model to explain spectral and polarization properties 06 p0876 A72-17649

Galactic evolution model, tracing stellar and supernova nucleosynthesis influence on interstellar gas composition 06 p0886 A72-18082

Cosmological red shift and galactic evolution effects on line features in X ray background due to young pulsars in supernova remnants 06 p0891 A72-18509

Interstellar matter cooling and recombination after supernova ionization, comparing X ray and cosmic ray heating mechanisms 07 p1070 A72-19083

Loop structure of Monoceros supernova remnant, predicting thermal soft X ray point source as cooling neutron star 07 p1073 A72-19421

Radio emission of Lupus region believed to contain supernova of 1006 A.D., noting strong polarization 07 p1076 A72-19607

Pulsar model based on neutron star rotation with skew magnetic field, considering radiated particle acceleration responsible for high energy activity in supernova remnants 07 p1080 A72-20057

Pulsar and supernova remnant relative space position based on runaway pulsar hypothesis, discussing pulsar period-luminosity relation from evolutionary standpoint 08 p1233 A72-21180

Hard X radiation source in Vela X supernova remnant direction detected during balloon flight on 25 November 1970 09 p1383 A72-22290

Cygnus Loop supernova remnant X ray emission structure from sounding rocket spectral data, showing thermal emission mechanism 09 p1378 A72-23699

Galactic and universal theories of cosmic ray source mechanisms, energy requirements, particle composition, propagation through interstellar matter and acceleration in supernovae remnants 10 p1533 A72-23889

Si burning in stellar explosions, discussing initial composition and neutron enrichment 10 p1544 A72-24666

Extragalactic supernovae X ray luminosity upper limits from OSO 3 data, estimating total energies 10 p1544 A72-24667

Stellar evolution from precarbon-burning contraction to presupernova stage with and without neutrino production by electron neutrino interaction 10 p1545 A72-24825

High sensitivity search for X rays from supernova remnants in Aquila 11 p1713 A72-26121

Relativistic shock propagation and search for electromagnetic pulses from supernovae, plotting kinetic energy factor vs external mass fraction 11 p1721 A72-26126

Soft X ray emission from supernova remnants, considering maximum linear diameter dependence on remnant distance from galactic plane 12 p1863 A72-27222

Expanding elliptical H I ring with major and minor axes of 1300 and 560 pc from type III supernova in solar neighborhood 13 p2048 A72-29831

Pulsar PSR 1154-62 association with nearby galactic radio source having supernova remnant shell structure and spectrum characteristics 14 p2150 A72-30369

Low mass neutron star source of pulsed X radiation in binary Centaurus X-3 ejected during low energy supernova explosion 14 p2156 A72-30570

Low energy X ray astronomical observation, considering hot plasma existence in old supernova remnants 14 p2157 A72-30676

Galactic supernova remnants radio frequency absorption line observations, deriving distances, radio luminosity function and distribution 14 p2158 A72-30726

Supernovae produced fluorescence pulses search in upper atmosphere by automatic coincident light receivers 15 p2313 A72-32233

Uhuru observed galactic X ray sources related to binary systems or supernova remnants, noting galaxy clusters 16 p2454 A72-33362

Supernova explosion mechanism and quantitative game for galactic chemical evolution, discussing relationship to cosmic rays 16 p2459 A72-33744

Neutron star acceleration of He, Fe and supernova debris into cosmic ray flux throughout Galaxy, discussing magnetic and superfluidity effects 16 p2448 A72-33745

Radio observations of two supernova remnants, HB21 and IC443, at 4170 MHz. 17 p2613 A72-35500

Gamma radiation production through interaction between high energy particles emitted by pulsar originating in supernova core and gas in supernova envelope 18 p2721 A72-36088

Astrophysical theories of supernovae outbursts as stellar evolutionary nonstationary phase in terms of thermal instability of degenerated matter or stellar explosion 18 p2725 A72-36399

Optical observations of the supernova in NGC 5253. 18 p2726 A72-36648

Observations of six supernovae. 18 p2728 A72-36762

The type II supernova 1969I in NGC 1058. 18 p2728 A72-36763

Extragalactic origin of the transient X-ray sources. 19 p2856 A72-37502

Unsteady hydrodynamic accretion on a neutron star 19 p2862 A72-38053

Study of a faint nebula identified as the HB-21 radio source 19 p2862 A72-38054

Observational evidence against supernovae being the source of the universal X-ray background. 20 p2965 A72-38906

Energy spectrum and composition of pulsar-accelerated cosmic rays. 20 p2964 A72-39343

Emission and absorption line spectra of type I supernovae after luminosity maximum interpreted by heating and ionization mechanisms in shell and intensity computation 20 p2973 A72-39886

Convection and diffusion transport equation of galactic cosmic ray electrons with energy loss and absorption allowance for supernova compressed halo models 22 p3217 A72-42210

Brightness and polarization structure of four supernova remnants 3C58, IC443, W28, and W44 at 2.8 centimeter wavelength. 22 p3224 A72-42382

Gum nebula origin as ionized hydrogen cloud from prehistorical supernova explosion, discussing different ionization mechanisms 22 p3227 A72-42543

Polarized radio emission from five supernova remnants. 22 p3229 A72-42994

Polarization measurements of the supernova in M101. 23 p3333 A72-43227

Physical characteristics of type I supernova envelopes during the initial expansion phase. II - Development of type I supernova spectra after maximum light. 23 p3333 A72-43228

Type II supernova spectral intensity minima due to blueshifted absorption lines of hydrogen and Fe II based on observed and synthetic spectra wavelength comparison 23 p3334 A72-43257

A study of galactic supernova remnants. II - Supernova rate, galactic radio emission and pulsars. 23 p3337 A72-43829

Identification of four novae and a super-nova in Palomar Sky Atlas. 23 p3341 A72-44474

Low energy X-ray survey from the Crab Nebula to Cygnus. 24 p3435 A72-44842

SUPERPOSITION [MATHEMATICS]

Continuity of probability distribution functions obtained by superposition 04 p0540 A72-15260

Superposable and self-superposable MGD flows from nonlinear differential equations, considering entropy, flow velocity and magnetic field strength 05 p0694 A72-16030

Variated states superimposed on finite elements in discrete elasticity, noting small oscillations superposition on arbitrary motion of elastic system 12 p1845 A72-27393

Hysteretic motor in steady synchronous operation with nonsinusoidal supply voltage, computing stator winding current based on superposition with two linear equivalent circuits 13 p1900 A72-29975

Superposition principle in test particle method for reducing plasma cloud kinetic theory to determination of conditional probability function involving Vlasov equation 17 p2591 A72-35163

Superposition method for potential distribution in plane tetrode field with unipotential and bipotential grids, noting electro-optical effect in cylindrical lenses 19 p2776 A72-38667

Absolute accuracy of the pulse-echo overlap method and the pulse-superposition method for ultrasonic velocity. 23 p3313 A72-44114

Study of a viscous flow in rotating centrifugal impellers. 24 p3363 A72-45368

SUPERSATURATION

Supersaturated semiconductor solid solutions decay kinetic equations and time constants, noting free current carriers effect 04 p0561 A72-15081

Vacancy supersaturation effect on enhanced precipitation by high flux electron irradiation in stainless steel 07 p1033 A72-20410

Precipitation effect on microstructure, coercive force, resistivity and cell formation changes in heterogeneous decomposition of supersaturated solid solutions and aging alloys 08 p1218 A72-21777

Al-Zn alloy supersaturated solid solution decomposition during aging, studying single crystal lattice characteristics via X ray diffusive scattering techniques 13 p1976 A72-28902

Surface energy effect on alloy structure formation, analyzing crystal growth and formation from supersaturated solutions 15 p2253 A72-31221

Different forms of elimination of quenching lacunae in supersaturation in the case of aging of two alloys, Al-Cu and Al-Mg-Si 22 p3190 A72-42444

SUPERSONIC AIRCRAFT

NT CONCORDE AIRCRAFT

NT JAGUAR AIRCRAFT

NT SUPERSONIC COMMERCIAL AIR TRANSPORT

NT SUPERSONIC TRANSPORTS

B-1 strategic supersonic bomber design, emphasizing variable sweep wing, landing gear, control and instrumentation 02 p0154 A72-12226

Unsolved aerodynamic problems in sub- and transonic civil and military aircraft design, considering flow problems during transonic flight, takeoff and landing [DGLR PAPER 71-105] 02 p0153 A72-12745

Detection of atmospheric gravity waves produced by focusing of shock front generated by supersonic aircraft, calculating flight trajectories 03 p0345 A72-12984

Supersonic Tu 144 aircraft design, discussing engine and aerodynamic characteristics, stabilization and control, propulsion, wing structure, landing gear and operation 03 p0310 A72-13473

Propulsion twin spool power plant design and dimensioning with selective high pressure cut-off for supersonic aircraft with part of flight in subsonic range [DFVLR-SONDDR-169] 03 p0406 A72-13608

Ramjet engine propulsion systems for large aircraft above Mach number 2.5 04 p0565 A72-14450

Convergent-divergent nozzles thrust model measurement on supersonic aircraft afterbody [ONERA, TP NO. 978] 05 p0642 A72-15856

Booms generated on ground by supersonic aircraft flying at high altitude through stratified atmosphere 08 p1149 A72-21019

SR-71 aircraft ejection seat, obtaining ejection survival rate from case histories 08 p1112 A72-21562

Sonic booms generation theory and prediction methods for supersonic aircraft during nonaccelerated flight in quiet atmosphere

Automated optimization for preliminary design of supersonic aircraft wings, noting flutter, stresses and resonant frequency as dynamic constraints [AIAA PAPER 72-333]

Case report of rapid decompression in supersonic trainer aircraft pressurized cabin, discussing physical and blast effects, pressurization safety, decompression sickness and hypoxia

Air bleeding location to cool turbojet engine turbine of supersonic aircraft, presenting graphs

Stratospheric subsonic and supersonic aircraft emission estimation for water vapor and nitrogen oxides

Supersonic jet noise and sonic boom sources, propagation and reduction, considering airport community disturbances, aircraft cabin noise and fatigue problems

Maximum overpressures of supersonic aircraft maneuvering-produced sonic booms occurring at geometrical acoustic ray focus points/caustic cusps/

Sonic boom alleviation by flow field alteration near supersonic aircraft, considering finite rise times, reduced overpressures and shock pressure rises [AIAA PAPER 72-653]

Silicon carbide rotating rectifier alternator with solid lubricated bearings for high altitude environments, noting applicability to supersonic aircraft

Numerical prediction of the diffusion of exhaust products of supersonic aircraft in the stratosphere

Optimum turns to a specified track for a supersonic aircraft.

Flow separation at the edges of some types of tail sections used in supersonic aircraft and in rocket technology

Fuels, lubricating oils and hydraulic fluids for supersonic aircraft, discussing chemical properties, propellant combustion efficiency and production

Supersonic aircraft wing form influence on sonic boom, discussing supersonic wind tunnel tests for noise reduction

Analysis of a lateral-directional airframe/propulsion system interaction of a Mach 3 cruise aircraft. [AIAA PAPER 72-961]

Supersonic aircraft focused sonic boom suppression by slowing down during turning flight, obtaining conditions for focus cut-off at ground by atmospheric refraction

Electrical discharge-produced explosions aboard supertankers during cleaning operation and electrostatic charging of supersonic aircraft during passage through heavy rain, noting water drop disintegration

SUPERSONIC AIRFOILS

Analytical method of characteristics to determine front shock and sonic boom due to flat delta wing with supersonic leading edges [DFVLR-SONDDR-205]

SUPERSONIC BOUNDARY LAYERS

High velocity boundary layer problems for space shuttle, investigating free interaction with detachment, shock wave, penetration, air bubbles in circulation and adherence conditions

Noise generation from turbulent supersonic shear layers, including low supersonic and transonic ranges for jet noise applications

Jet interaction induced supersonic turbulent boundary layer separation, obtaining flat plate pressure measurements and jet plume shadowgraphs

Velocity profile shapes computation in supersonic compressible turbulent boundary layers with adverse pressure gradients, discussing data and theory discrepancy, curvature, and three dimensional effects

Supersonic turbulent boundary layer interaction with compression corner, noting static pressure distributions, flow visualization and schlieren photographs [AIAA PAPER 72-114]

Laminar near wake solutions for slender ablating cone under supersonic atmospheric entry conditions including boundary layer reactions [AIAA PAPER 72-116]

Similarity method solution of differential equations of motion for supersonic laminar boundary near symmetry plane of cone at angle of incidence

Wind tunnel investigation of adiabatic compressible turbulent boundary layer in adverse and favorable pressure gradients at supersonic speed

Adverse pressure gradients effect on two dimensional supersonic turbulent boundary layer, measuring axial distribution of pressure, temperature, mass flow, turbulence intensity and wall shear [AIAA PAPER 72-311]

Supersonic axisymmetric turbulent boundary layer characteristics over circular cone, predicting blowing effect on separation

Impact probe displacement effects in supersonic turbulent boundary layer in terms of Mach number profiles

Turbulent separating and reattaching supersonic boundary layer flows in two dimensional compression corner, noting Reynolds number effect on separated shear layer length

Recovery factors on porous surface within gas screen region in supersonic turbulent boundary layer for various air injection rates

Subsonic and supersonic steady two dimensional compressible turbulent boundary layer flow past wavy wall, presenting wall pressure and temperature distributions

Supersonic interaction effects on boundary layer flow structure in intersecting wedge corner at high Reynolds numbers from surface pressure measurements and oil flow visualization

Numerical solution to stabilization temperatures of supersonic boundary layer under intense surface cooling without constraints on disturbance wave number and Reynolds number

Binary diffusion of a jet embedded in a boundary layer.

Cooled supersonic turbulent boundary layer separated by a forward facing step.

Numerical and asymptotic methods for solving the problem of complete boundary-layer stabilization

Spin induced boundary layer distortion on rotating cone at supersonic speeds via spark shadowgraphs, correlating Magnus and normal force measurements with boundary layer configurations [AIAA PAPER 72-967]

Velocity distribution in the turbulent boundary layer of a supersonic gas flow

Three dimensional shock wave configurations in front of cylindrical body on supersonic wing or of fluid jet injected into main supersonic flow, examining high pressure gradient regions

Turbulent supersonic boundary layer flow in the neighborhood of a 90 deg corner.

SUPERSONIC COMBUSTION

Supersonic diffusion flame in duct configuration to study mixing with combustion of two parallel methane and air flows

Thermal nozzle combustion effects on supersonic flow of chemically reacting gas in thermodynamic equilibrium

Hydrogen fueled supersonic burning combustor testing, determining wall static pressure, hydrogen radial distribution, Pitot pressure and Mach number at combustor exit

Supersonic combustion of liquid fuels, hydrogen and propane, discussing initiation and stabilization in supersonic flow

Thermal nozzle combustion effects on supersonic flow of chemically reacting gas in thermodynamic equilibrium

Supersonic combustion research facility design for studying air-fuel mixing processes, shock wave induced temperature and pressure increments and flame holding devices

Two component reaction kinetics model for numerical analysis of combustion during two- and three dimensional supersonic steady flow of hydrogen-air fuel mixtures

Burning of carbon particles in a supersonic chemically active gas flow

Effect of the temperature on the burn-out of hydrogen diffusion flames in a supersonic flow in a closed channel

Supersonic and hypersonic combustion processes three dimensional characteristics, comparing wind tunnel test data with boundary layer equations numerical integration results [ICAS PAPER 72-21]

Two-dimensional supersonic flow with flame sheets.

Heat addition to supersonic flow by shock induced combustion studied by spherical and conical projectiles shot into explosive gas mixtures

Two-phase detonations with bimodal drop distributions.

Supersonic combustion photochemical initiation feasibility, measuring quantum yields and induction times in hydrogen, oxygen and chlorine mixtures

SUPERSONIC COMBUSTION RAMJET ENGINES

The S4MA hypersonic wind tunnel - Its use for tests of ramjet engines with supersonic combustion of hydrogen

Experiments on methods for improved fuel ignition in scramjet combustion systems. [ICAS PAPER 72-15]

Theoretical and experimental study of a dual-mode ramjet/flight range from Mach 3.5 to 7 [ICAS PAPER 72-24]

Swirling base injection for supersonic combustion ramjets.

SUPERSONIC COMBUSTION RAMJET MISSILE

U RAMJET MISSILES

U SUPERSONIC COMBUSTION RAMJET ENGINES

A systems analysis of subsonic versus supersonic jet travel.

SUPERSONIC COMPRESSORS

Performance similarity of supersonic axial compressors with gas mixtures of different thermodynamic properties, verifying validity of critical Mach number of rotation [ONERA, TP NO. 966]

Hypersonic air inlet of revolution with mixed supersonic compression, analyzing shock-boundary layer interaction process [ONERA, TP NO. 977]

Supersonic axial flow shock-in-rotor type compressor performance tests, discussing factors responsible for low efficiency

Flow visualization in supersonic axial compressor by short exposure schlieren photography of shock wave patterns in rotating annular cascade of compressor blades [ONERA, TP NO. 1026]

Radial velocity distribution at supersonic compressor inlet from duct-cowl and wall pressure measurements [ONERA, TP NO. 975]

Flow data reduction validity for supersonic axial compressors, presenting experimental results for rotating supersonic cascade [ASME PAPER 72-GT-100]

Experimental study of flows in supersonic compressors [ICAS PAPER 72-11]

Jet pumps for compressible fluids at supersonic velocities.

SUPERSONIC DIFFUSERS

Russian book on theory of ramjet and rocket ramjet engines covering supersonic diffuser operational principles and design, nozzle, combustion chamber and ejector

Axisymmetric jet stretcher diffuser performance for ramjet engine inlet configurations, testing at angles of attack and supersonic flow velocities [AIAA PAPER 72-1024]

SUPERSONIC DRAG

Supersonic wind tunnel investigation of drag characteristics of clustered booster configuration in longitudinal flow at Mach 1.5 to 4.0 [DGLR PAPER 71-120]

Minimum drag bodies of revolution in supersonic flow obtained by combining steepest descent method with integral flow model

Experimental results regarding drag in supersonic flow without lift in the case of flight bodies with three in front pointed bodies [DFVLR-SONDDR-215]

SUPERSONIC FLIGHT

Slender projectile supersonic flight in fluid with nonequilibrium transformations, comparing theoretical shock decay angle with Wegener-Klikoff measurements

Book on heat and mass transfer, covering research results over 1953-1969 on supersonic aircraft and mis-

slies cooling problems, rarefied gas dynamics boundary layer flow, etc 05 p0747 A72-16399

Supersonic transition flight mode of reusable two stage space shuttle booster for orbiter launching, comparing with subsonic and high lift to drag designs [AIAA PAPER 72-133] 07 p1084 A72-18963

Liquid fuel elastic rocket motion stability in supersonic flight, using vibration and thrust vector control equations for dynamic properties description 08 p1241 A72-21633

Pitching moments effect on phugoid and height mode stability of aircraft in supersonic flight 09 p1263 A72-23622

Stratospheric meteorological characteristics effects on Concorde supersonic flight performance, fuel consumption, dynamic behavior and passenger comfort 13 p1994 A72-28876

Mathematical model for flow field inside raindrop under aerodynamic transient stresses before impingement at stagnation point of blunt body in supersonic flight 13 p1942 A72-29224

Variable sweep wings aerodynamic characteristics in subsonic, transonic and supersonic flight, considering lift, drag, stability and control 18 p2643 A72-36976

Computer program for automated design of long haul transport aircraft, discussing cost effectiveness of composite materials for aircraft structure [AIAA PAPER 72-794] 19 p2750 A72-38121

German monograph - Pressure variation along a plane slender wedge and along a slender cone of revolution at decelerated flight in the supersonic range near sonic velocity. 22 p3136 A72-43074

Supersonic aircraft energy turns. 23 p3252 A72-44196

Raindrop breakup in the shock layer of a high-speed vehicle. 24 p3395 A72-45780

SUPERSONIC FLOW

Pt coated W hot-wire anemothermometers sensitivities in supersonic turbulent flow at low Reynolds numbers [ONERA, TP NO. 1024] 01 p0064 A72-10037

Discrete ionospheric model of supersonic two dimensional low density plasma flow past large bodies, using quasi-neutrality condition 01 p0001 A72-10588

Difference schemes for continuous computation of supersonic steady gas flows with internal compression shock waves 02 p0150 A72-11737

Supersonic oxygen molecules nozzle beam reactive scattering on barium atoms, detailing exothermic reaction energy in barium oxide formation 02 p0170 A72-11912

Nonlinearity effects on two dimensional steady supersonic dissipative flow governed by Navier-Stokes equations, obtaining expressions for flows past thin airfoil and wedge 02 p0203 A72-11976

Supersonic and hypersonic flows with attached shock waves over delta wing at angle of attack, deriving unified theory for flow field 02 p0150 A72-12030

Circular cone in supersonic flow, obtaining self similar solution for effect of angle of attack on laminar boundary layer by finite difference method 02 p0150 A72-12095

Shock wave impact at flat/spherical end surface of cylindrical body in supersonic nitrogen flow, using pulsed ruby laser for shadow photography 02 p0151 A72-12280

Low density monatomic gas supersonic spherical source flow, presenting departure from translational equilibrium 02 p0205 A72-12359

Aeroelastic stability of flat anisotropic sandwich plates in supersonic compressible fluid flow 02 p0297 A72-12614

Turbulent supersonic separated flow field analysis and pressure measurements for two dimensional and axisymmetric internal and external flow models [DGLR PAPER 71-076] 02 p0152 A72-12710

Closed boundary layer separation regions in super- and hypersonic flow, deriving mathematical model for neutral stability curves calculation 02 p0153 A72-12715

Residence time of foreign gas introduced within wake recirculation region behind slender body in axisymmetric supersonic laminar/turbulent flow [AD-733525] 03 p0308 A72-13633

Local stagnation temperature measurement in supersonic flow, using hot-wire anemothermometer 03 p0309 A72-13789

Interaction forces of gas jet injected into supersonic stream, examining data from thrust vector control gas injection tests 03 p0342 A72-13958

Plane shock wave and blunt body interaction in supersonic gas flow in two-diaphragm shock tube 04 p0461 A72-14639

Unsteady supersonic flow disturbance by slender bodies in strong contact discontinuities in shock tube studies 04 p0462 A72-15507

Symmetrically deformed delta wing in supersonic flow, considering leading edge flow separation induced vortices effects on downwash, pressure distribution and aerodynamic characteristics 04 p0463 A72-15741

Stochastic aerodynamic heating of shallow shell in supersonic turbulent flow by Monte Carlo method 05 p0599 A72-15845

Suspended compression shock construction near supersonic point in plane nonuniform ideal gas flow by hodograph technique 05 p0600 A72-16213

Surface pressure approximation formula for inclined circular cone in supersonic flow 05 p0603 A72-16547

Finite difference integration based on theoretical model analysis of three dimensional turbulent boundary layer on sharp cone at angle of attack in supersonic flow [AIAA PAPER 72-187] 05 p0650 A72-16842

Three dimensional supersonic flow about space shuttle, comparing method-of-characteristics and shock-capturing computations [AIAA PAPER 72-191] 05 p0729 A72-16845

Characteristic schemes comparison for three dimensional steady isentropic supersonic flow [AIAA PAPER 72-190] 05 p0605 A72-16846

Numerical analysis of three dimensional inviscid supersonic flow field about complex vehicle geometry, using finite difference technique and Rankine-Hugoniot relations [AIAA PAPER 72-192] 05 p0606 A72-16847

Supersonic interaction in streamwise corner of intersecting wedges, including pitot traverse, surface pressure and oil flow visualization measurements [AIAA PAPER 72-6] 05 p0606 A72-16862

Nonlinear effects of inviscid supersonic flow field surrounding bodies in coning motion, using shock capturing finite difference technique [AIAA PAPER 72-27] 05 p0607 A72-16918

Optimal airfoil profile for minimum drag in supersonic linearized gas flow with allowance for random fabrication errors and surface melting and sublimation at high temperatures 05 p0610 A72-17136

Shock wave shape and strength alteration by radioisotope emissions from body surface in supersonic airstream 05 p0654 A72-17226

Plane supersonic ionizing shock wave in magnetic field under small wave plane perturbation from equilibrium position, calculating stability from linearized equations 06 p0798 A72-17678

Inviscid solar wind equations supersonic solutions existence domain from critical point boundary conditions 06 p0881 A72-17894

Water vapor condensation in centered rarefaction wave arising in supersonic flow around apex of obtuse angle 06 p0799 A72-17911

Three dimensional velocity field excitation by thin airfoil vibrations in supersonic flow, deriving function in semispase to satisfy boundary constrained wave equation 06 p0756 A72-18111

Numerical solution of supersonic flow past blunt bodies with large mass injection, deriving finite difference equations 06 p0756 A72-18114

Ideal gas flow past blunt body in supersonic stream, discussing sonic lines, characteristics and Mach number 06 p0756 A72-18119

Supersonic flow patterns near yawed obstacles around flat plate sharp leading edge with high pressure regions in reversed separated flow zone 06 p0756 A72-18122

Lax finite difference scheme application to transonic two dimensional Laval nozzle and supersonic blunt body flow with detached shock wave, considering inviscid thermally nonconducting 06 p0756 A72-18126

V-shaped wings supersonic characteristics at 0-15 deg angles of attack, investigating flow structure between wings by pitot tube rake 06 p0757 A72-18129

Cornered axisymmetric blunt body sonic line in steady supersonic flow, showing incomparability with sonic shoulder of sphere 06 p0757 A72-18138

Supersonic near wake flow around blunt and sharp cones with trailing edge turbulent boundary layer 06 p0757 A72-18141

Forced nonlinear oscillations of finite plate in plane supersonic gas flow, considering elastic forces and resonant characteristics deformation 06 p0901 A72-18708

Supersonic hydrogen plasma flow in collapsing postsunset upper ionosphere, noting nonvanishing temperature gradient effect on critical point location 07 p0974 A72-18899

Transitional and turbulent heat transfer measurements on yawed blunt cone nosetip in supersonic air flow at various angles of attack [AIAA PAPER 72-212] 07 p0964 A72-18960

Plate surface temperature during aerodynamic heating in supersonic gas flow, using linearized Pohlhausen method 07 p0909 A72-18991

Contact discontinuity motion past slender body of revolution in shock tube, solving unsteady supersonic flow problem by method of integral transformation 07 p0909 A72-20072

Laser holographic imagery of plane and three dimensional objects for supersonic field representation of standing wave in isotropic liquid 08 p1165 A72-21078

High power visible output gas dynamic lasers, discussing supersonic flow generation 08 p1182 A72-21337

Body drag measurement in low density supersonic gas stream in various Knudsen number ranges 08 p1166 A72-21409

Two dimensional two step difference scheme for shock wave interaction with cylinder in supersonic flow 08 p1150 A72-21443

Evaporation and combustion of liquids injected into high temperature supersonic flow, considering interrelation with pressure variations 08 p1253 A72-21454

Supersonic plasma flow in narrow rectangular channel and free incompressible inviscid conducting liquid jet motion within pulsating transverse magnetic field 08 p1214 A72-21652

Stagnation conditions of magnetoradiative supersonic flow through shock waves for temperature dependent specific heat parameter 08 p1255 A72-21795

Supersonic flow through stationary and rotating cascades, using method of characteristics 09 p1260 A72-22630

Book on ideal and real compressible fluid dynamics covering supersonic flow past airfoils and shock wave interaction with laminar boundary layer 09 p1295 A72-23045

Taylor series truncation method for steady supersonic inviscid gas flow past nonaxisymmetric conical bodies 09 p1295 A72-23498

Schlieren optics for visualization and differentiation of density gradients with color and brightness distinctions, applying to supersonic flow through tandem grid 09 p1316 A72-23669

Mixed subsonic-supersonic flows solution for choked isentropic flow in convergent-divergent nozzle, comparing results with series solution 10 p1561 A72-23721

Flat face cylinders in rarefied supersonic gas flow, investigating perturbed region evolution based on pitot tube method 10 p1415 A72-23751

Mach number distribution along critical streamline in compressed layer in front of cylinder in supersonic flow 10 p1415 A72-23752

Numerical prediction of subsonic and supersonic flow through convergent-divergent nozzle 10 p1416 A72-23874

Pseudoviscous method application to computation of supersonic flow of inviscid ideal gas through two dimensional or annular axisymmetric ducts 10 p1417 A72-23876

Numerical solution for super-Alfvénic supersonic aligned MGD flow over cone with attached shock wave, obtaining surface pressure coefficients, current and vorticity distributions 10 p1418 A72-24463

Pitot tube pressure measurements in supersonic gas flow, calculating free molecular conditions limits 10 p1419 A72-24548

Supersonic flow around thin cruciform wing with antisymmetrical angle of attack distribution and horizontal plane with leading edge, considering flow separation at edges 10 p1420 A72-25118

Linearized method of characteristics application to supersonic flow past oscillating flat plate cascades with supersonic leading edge locus [AIAA PAPER 72-377] 11 p1730 A72-25401

Unsteady aerodynamic loadings of flexible aircraft with nonplanar wings and wing-tail surfaces in supersonic flow 11 p1574 A72-25402

Two dimensional cascades supersonic exit flow field, using Oswatitsch method of characteristics and conservation laws [ASME PAPER 72-GT-49] 11 p1570 A72-25641

Shock wave impact at flat/spherical end surface of cylindrical body in supersonic nitrogen flow, using pulsed ruby laser for shadow photography 11 p1571 A72-25702

Three dimensional laminar boundary layer on slender circular cone at angle of attack in supersonic flow, determining separated flow region via finite difference method

11 p1572 A72-25818

Electrically excited carbon dioxide-nitrogen laser using high repetition rate discharge pulses from pin electrode array transverse to supersonic flow

11 p1647 A72-26147

Subsonic and supersonic flow around nonaxisymmetric fuselages, deriving streamlines differential equations based on camber line distribution of source, dipole and quadrupole singularities

[DFVLR-SONDDR-189]

11 p1573 A72-26578

Method of characteristics for three dimensional supersonic flow of guiding center plasma, noting application to solar wind-moon interaction

11 p1573 A72-26601

Holographic interferometer and fringe analyzer with laser sources, discussing design and application to supersonic flow imaging in wind tunnel

12 p1809 A72-27760

Shadowgraph photography method for supersonic air flow pattern around porous cone in uniform injection, noting pressure distribution dependence

12 p1752 A72-27986

Surface temperature distribution for porous plate in supersonic flow with gas injection into turbulent boundary layer

13 p1893 A72-28917

Vibrational relaxation mechanism in supersonic flows of chemically reacting carbon dioxide-nitrogen mixture, using numerical integration

13 p1913 A72-29502

Wind tunnel investigation of supersonic air flow behavior on rotatable right dihedral formed by two plane plates with sharp edges

13 p1894 A72-29636

Friction drag and heat transfer on long blunt-nosed cylinder in supersonic flow, determining location of transition zone as function of Mach number

13 p1895 A72-29642

Stream surfaces of three dimensional sub and supersonic irrotational gas flows in variable cross section channels and nozzles

13 p1895 A72-30004

Minimum drag bodies of revolution in supersonic flow obtained by combining steepest descent method with integral flow model

14 p2069 A72-30231

Kinetic freezing effects of supersonic gas flow with solid particles into vacuum, analyzing continuous to collisionless transition flow for Maxwell molecules

14 p2094 A72-30295

Initial dihedral wing-body interaction for supersonic leading edges, determining expansion of velocity potential on root chord

14 p2069 A72-30365

Laminar to turbulent boundary layer transition in supersonic flow over flat plate investigated in supersonic wind tunnels, noting unit Reynolds number effect

14 p2069 A72-31004

Two dimensional two phase steady supersonic wedge flow patterns analysis based on equations for flow between wedge surface and shock wave

14 p2070 A72-31011

Ideal gas axisymmetric flow created in supersonic flow interaction with blunt body with strong blowing at surface, obtaining boundary layer approximate solution

14 p2070 A72-31012

Supersonic ideal gas flow in corner formed by intersecting plates, using direct computation method for nonequilibrium flows with detached shock waves

14 p2071 A72-31021

Shock wave interaction with supersonic moving plate, calculating plate lift as function of time

14 p2071 A72-31024

Heat transfer distribution in supersonic arc plasma constrictor of variable cross sectional area ducts, including pressure and compression shock front effects

14 p2141 A72-31071

Stochastic aerodynamic heating of shallow shell in supersonic turbulent flow by Monte Carlo method

15 p2178 A72-31264

Ideal gas supersonic axial flow past circular cylinder, solving Navier-Stokes equations by Van Dyke matched asymptotic expansions method

15 p2178 A72-31463

Isoenergetic and irrotational planar supersonic cascade ideal gas flow computation by analytic method of characteristics

15 p2178 A72-31466

Approximate model of weak shock wave interaction with laminar MHD boundary layers for perfectly conducting supersonic streams

15 p2284 A72-31633

Characteristic parameters of stationary supersonic plasma flow in magnetic de Laval nozzle calculated for collisional and collisionless cases, measuring ion saturation currents

15 p2285 A72-32268

Numerical results of carbon dioxide-nitrogen-water gas dynamic laser comparison with arc-driven supersonic laser in gas dynamic mode

15 p2250 A72-32517

Supersonic interaction effects on boundary layer flow structure in intersecting wedge corner at high Reynolds numbers from surface pressure measurements and oil flow visualization

16 p2341 A72-32830

Probst-Gold viscoelastic model of supersonic flow induced surface cross-hatching assessment against Dowell studies on plates and shells flutter

16 p2463 A72-32838

Fast numerical solution for supersonic flow past flat-faced blunt body by integration from stagnation point, noting computing time on CDC 6600

16 p2341 A72-32840

Linearized supersonic flow past harmonically vibrating cylindrical body, solving boundary value problem by cylindrical integral transformation

16 p2342 A72-32878

Inverse Laval problem of three dimensional subsonic and supersonic flows in nozzles and ducts of variable cross section in terms of asymptotic series

16 p2342 A72-32930

Crococo-Lee theory extension to flow behavior prediction for two dimensional supersonic turbulent near wake behind bluff body during recompression

16 p2343 A72-33402

Direct integral method to calculate subsonic and supersonic regions in planar and axisymmetric hyperbolic flow, using stream function for velocity and density

16 p2343 A72-33421

German monograph on supersonic flow past blunt sharp edged cones, comparing Van Dyke and method of characteristics results with schlieren photos and shadowgraphs

16 p2343 A72-33505

Coordinate perturbation and multiple scale techniques application to supersonic flow field around two dimensional wing and oscillations in closed tube

16 p2379 A72-33576

Faraday ring currents induction by radial magnetic field in low pressure plasma supersonic ring channel flow driven by inductive hydrodynamic shock tube

16 p2437 A72-33749

Supersonic vortex boundary layer flow velocity profiles behind flat plate indentation for Mach numbers 1.7-3.0 and Reynolds numbers to 40,000,000

16 p2380 A72-33857

Flat plate leading edge blunting and wall cooling effects on supersonic laminar flow ramp-induced separation

16 p2344 A72-34032

Supersonic flow aerodynamic window for high power laser beam extraction through nonabsorbing gas medium while supporting pressure difference between cavity and ambient atmosphere

16 p2404 A72-34036

Finite difference method computation of multishocked three dimensional wing-body supersonic flow fields with real gas effects, applying to delta winged space shuttle

16 p2345 A72-34042

Magnetogasdynamic heat transfer to hemispherical body in supersonic low density plasma, noting magnetic field effects on heat flux

16 p2346 A72-34056

Flow distribution for inviscid nonconducting uniform supersonic stream past unyawed semiinfinite circular cone with attached shock wave

17 p2483 A72-34325

Solution of the two-dimensional, unsteady, compressible Navier-Stokes equations using a second-order accurate numerical scheme

17 p2538 A72-34646

Development of transition in the wake of a cylinder perpendicular to a supersonic flow

17 p2484 A72-34769

Numerical calculation of the supersonic flow of a viscous fluid about a parabolic obstacle

17 p2484 A72-34887

Plate surface temperature during aerodynamic heating in supersonic gas flow, using linearized Pohlhausen method

17 p2485 A72-35139

Unified area rule for hypersonic and supersonic wing-bodies

17 p2485 A72-35251

Velocity distribution and Mach number in a supersonic molecular beam of plane symmetry

17 p2486 A72-35423

Turbulence model equations for calculation of supersonic and hypersonic flows, representing Reynolds stresses and turbulent heat flux vector in terms of eddy viscosity

17 p2543 A72-35639

Inviscid perfect gas supersonic steady irrotational flow past wedge, investigating analytical solution validity in downstream region behind shock

17 p2544 A72-35900

Particle motion behind oblique shock wave in two phase supersonic wedge flow, deriving expressions for particle trajectories and velocity equalization time

17 p2487 A72-35926

Spectroscopic determination of the rotational temperature in a rarefied supersonic flow in glowing-discharge excited nitrogen

17 p2544 A72-35928

Inert and reactive gas injection in near wake behind blunt bodies in supersonic flow, considering influence on base pressure and temperature

17 p2487 A72-35930

Fluid jets and droplets deformation in transverse supersonic two phase gas flow

17 p2544 A72-35932

Near flow field and aerodynamic loading in subsonic and supersonic flow over body-wing configuration, surveying numerical, kernel function and image methods

18 p2641 A72-36390

Boundary layer and inviscid main stream interaction in asymmetric supersonic steady gas flow incident on circular cone at high Reynolds numbers

18 p2641 A72-36662

A contribution to the gas dynamics of oblique shocks with change of total enthalpy

18 p2682 A72-36725

A through-type counting method for two-dimensional and spatial supersonic flows. II

18 p2642 A72-36810

Weak waves, characteristics, and the problem of flows past slender profiles in electrohydrodynamics

18 p2716 A72-36896

Calculation of spatial ideal gas flows without a symmetry plane

18 p2642 A72-36901

Experimental investigation of the flow past a cylinder with a flat nose

19 p2745 A72-37397

Generating high Reynolds-number flows

19 p2787 A72-38222

Jet aircraft noise sources in subsonic and supersonic exhaust mixing process, suppressing noise via turbofan exhaust speed reduction

19 p2849 A72-38380

A method of straight-through calculation for two-dimensional and three-dimensional supersonic flows. I

19 p2747 A72-38852

Flow separation at the edges of some types of tail sections used in supersonic aircraft and in rocket technology

20 p2885 A72-39597

Decay of a diamond shock pattern

20 p2913 A72-39606

Influence of viscosity on the characteristics of compressor blades for supersonic flow conditions

20 p2963 A72-39917

Unsteady aerodynamic and aeroelastic effects in turbomachine blade cascades supersonic flow, discussing trends in fan and compressor technology

21 p3118 A72-40969

Heat transfer in separated regions in supersonic and hypersonic flows

21 p2991 A72-41139

Computation of three-dimensional non-equilibrium supersonic flows

21 p2992 A72-41162

The possibility of producing plasma regions at thermonuclear fusion conditions in a supersonic flow by means of high power electron beam

21 p3092 A72-41224

On the conditions for the appearance of the Mach effect in the reflection of an oblique shock wave in supersonic flow

21 p3046 A72-41339

Base mounted cylinders effect on near wake of axisymmetric blunt base in supersonic flow

21 p2993 A72-41594

Three-dimensional supersonic flows at large distances from a body of finite volume

21 p2994 A72-41661

Experimental determination of the vibrational temperature of a supersonic gas flow

22 p3242 A72-41879

A new stagnation pressure probe having a high pressure recovery in supersonic flow

22 p3179 A72-42687

Stream surfaces of three dimensional sub and supersonic irrotational gas flows in variable cross section channels and nozzles

22 p3135 A72-42727

Supersonic flow past a suddenly set plate

22 p3136 A72-42906

Aeroelastic optimization of a panel in high Mach number supersonic flow

23 p3343 A72-43327

Three dimensional supersonic flow past bodies with a smooth generatrix

23 p3248 A72-43651

Velocity distribution in the turbulent boundary layer of a supersonic gas flow

23 p3249 A72-44084

Heat addition to supersonic flow by shock induced combustion studied by spherical and conical projectiles shot into explosive gas mixtures

24 p3360 A72-45038

Conical caret wings supersonic characteristics, examining flow transition from weak to strong attached shock waves

24 p3361 A72-45114

Effect of a line energy source at the boundary of a supersonic flow.

24 p3361 A72-45187

Experimental research on the wave resistance of a thin spindle with an annular shield in a supersonic axial flow

24 p3364 A72-45393

Gas dynamics and shock wave physics of supersonic flow in two phase media, noting evaporation, condensation and phase transformations

24 p3364 A72-45525

SUPERSONIC FLOW INLETS

U SUPERSONIC INLETS

SUPERSONIC FLUTTER

Orthotropy orientation effect on supersonic flutter of infinite-length thin heterogeneous circular cylindrical structures in axisymmetric gas flow

04 p0584 A72-14520

Minimum weight panel designs subject to supersonic flutter constraint, approximating governing differential equations by difference equations

05 p0741 A72-16908

Automated optimization for preliminary design of supersonic aircraft wings, noting flutter, stresses and resonant frequency as dynamic constraints

[AIAA PAPER 72-333] 11 p1727 A72-25368

Supersonic flutter of plane, rectangular, anisotropic, heterogeneous structures

24 p3459 A72-45440

SUPERSONIC HEAT TRANSFER

Plate surface temperature during aerodynamic heating in supersonic gas flow, using linearized Pohlhausen method

07 p0909 A72-19891

Flow field model of convective heat transfer along reattachment surface in planar supersonic turbulent flow

[ASME PAPER 71-HT-W] 08 p1251 A72-20876

Surface patterns from ablating, melting and flowing materials in supersonic flow of wind tunnel, rocket motor and flight test environments, comparing with theory

[AIAA PAPER 72-313] 11 p1743 A72-25247

Plate surface temperature during aerodynamic heating in supersonic gas flow, using linearized Pohlhausen method

17 p2485 A72-35139

Heat transfer at reattachment of a compressible flow over a backward facing step with a suction slot.

20 p2885 A72-39626

SUPERSONIC INLETS

Mach 2.65 axisymmetric mixed-compression inlet system diffuser and boundary layer bleed system performance estimates confirmed by tests

[AIAA PAPER 72-45] 05 p0609 A72-16959

Combined viscous-inviscid analytical procedure for predicting boundary layer effects on supersonic inlet flow field

[AIAA PAPER 72-44] 05 p0609 A72-16975

Radial velocity distribution at supersonic compressor inlet from duct-cowl and wall pressure measurements

[ONERA, TP NO. 975] 09 p1260 A72-22812

Application of quadratic optimization to supersonic inlet control.

23 p3251 A72-44195

Experiment of supersonic air intake buzz.

23 p3249 A72-44496

Supersonic aircraft engine inlet performance in terms of pressure recovery, discussing oblique shock wave formation ahead of entrance to improve efficiency

24 p3360 A72-44991

SUPERSONIC JET FLOW

Sonic line neighborhood of uniform axisymmetric supersonic air jet impinging on perpendicular flat plate, measuring shock shapes and surface pressures

01 p0002 A72-11398

High speed jet noise source physical properties interpretation by theory and scale-model experiments for supersonic transport aircraft noise suppression problem

02 p0154 A72-11973

Induction heated low density supersonic free plasma jet diagnosis, determining velocities and heavy particle temperatures

02 p0265 A72-12361

Method of characteristics calculations of inviscid free jet flow with low specific heat ratios for perfect gas at 1.10 Mach number

03 p0309 A72-13926

Mean velocity and turbulent fluctuation distributions for sub- and supersonic jets in convergent nozzles, obtaining sound power spectra

[AIAA PAPER 72-157] 05 p0651 A72-16872

Gas density distributions in argon and carbon dioxide supersonic jets with low angular divergence in vacuum, using Laval supersonic nozzle

07 p0973 A72-20512

Boundary configuration of supersonic underexpanded jet discharging into stationary medium

09 p1259 A72-22410

Supersonic and subsonic jet flows coexistence in constant section duct, analyzing pressure on walls and in fluid and schlieren visualization

[ONERA, TP NO. 976] 09 p1294 A72-22813

Pressure, temperature and nozzle size effects on molecular cluster formation in expanding supersonic jets of rare gases, nitrogen and carbon dioxide

09 p1294 A72-22853

Charged to neutral particle transformation capacity of wide aperture recharge target formed by supersonic gas jets in magnetic trap with annular nozzle

09 p1363 A72-23224

Cryogenic techniques for high vacuum differential pumping with low conductivity cooled channels and supersonic jet target

09 p1364 A72-23225

Supersonic Ar, He and molecular nitrogen jets, determining electron temperature and concentration and atomic state population in shock waves region by spectroscopic measurement

10 p1517 A72-23837

Supersonic axisymmetric turbulent jet density fluctuations measurement by single beam schlieren system, using preheater to reduce jet static/ambient temperature difference

10 p1466 A72-24292

Aerodynamic noise generation mechanism of ideally expanded supersonic jet based on large scale flow instabilities, deriving mathematical model

10 p1418 A72-24331

Fast iodine ions charge exchange in dense carbon dioxide supersonic jet, determining electron capture cross sections by least squares method

10 p1516 A72-25036

Russian monograph on self oscillatory noise generation during gas jet ejection covering single, parallel, supersonic, flat and cylindrical jets stability

11 p1617 A72-26066

Optimization of high temperature supersonic gas jets for metal powders production by melts atomization, discussing excess air ratio effect on gas parameters

13 p2025 A72-29133

Holographic interferometry of Mach wave field generation by supersonic turbulent jet, noting visible conical wave front from core edge

13 p1898 A72-29580

Supersonic jet exhaust noise radiation from turbulent shear layer instability waves, noting acoustic energy flux dependence on streamwise distance

13 p2028 A72-29581

Reichardt mixing model for turbulent boundary layer calculation in wall flow, noting supersonic and nonisothermal jet flow

14 p2095 A72-31002

Noise measurements during shock free and underexpanded operation modes of supersonic cold model jet at moderate exit Mach number

15 p2179 A72-32017

Supersonic molecular jet improvement via expansion chamber residual gas pressure reduction and nozzle stagnation pressure increase

16 p2429 A72-33053

Perturbations effects on plane symmetry supersonic molecular beam intensity as function of nozzle-skimmer geometry and nozzle pressures

16 p2430 A72-33062

Acoustic attenuation and thrust loss incurred by shrouded multi-tube supersonic jet noise suppressor

[AIAA PAPER 72-642] 16 p2381 A72-34090

Supersonic jet noise mechanisms and scaling laws, studying acoustic fields for rectangular and axisymmetric nozzle configurations

[AIAA PAPER 72-641] 16 p2381 A72-34091

Combustion driven resonance tubes.

17 p2597 A72-34974

Effect on supersonic jet noise of nozzle plenum pressure fluctuations.

17 p2597 A72-35243

Method of characteristics application to supersonic jet and nozzle gas flow with allowance for equilibrium and nonequilibrium condensation

17 p2544 A72-35929

Acoustic efficiency of supersonic annular jets

21 p3045 A72-41098

Discrete component of the noise spectrum of a supersonic annular jet

21 p3045 A72-41100

Wall porosity and angle of attack effects on jet stretcher flow field for supersonic engine inlet testing, using three dimensional method of characteristics

[AIAA PAPER 72-1025] 21 p3042 A72-41603

Experimental and design investigation of a supersonic wall jet in a supersonic slipstream

22 p3133 A72-42254

Numerical integration of three dimensional flow equations for supersonic jets of ideal gas exhausted from elliptical and rectangular nozzles

22 p3133 A72-42264

Problem of uniform-jet flow around an airfoil

22 p3133 A72-42271

Diffusion of a filament of gas injected into a supersonic free jet.

23 p3280 A72-43947

Formation of a jet of shock-heated gas outflowing into evacuated space.

24 p3391 A72-45046

SUPERSONIC NOZZLES

Carbon dioxide-nitrogen-water or He mixtures expansion through supersonic nozzles, showing population inversion of vibrational energy levels

04 p0513 A72-15337

Laser action in carbon monoxide vibrational-rotational bands produced by electrical excitation of carbon monoxide-nitrogen-oxygen-helium mixtures following expansion in supersonic nozzle

07 p1001 A72-19047

Pressure, temperature and nozzle size effects on molecular cluster formation in expanding supersonic jets of rare gases, nitrogen and carbon dioxide

09 p1294 A72-22853

Boundary layer turbulence development by gas flow interaction with arc plasma in supersonic nozzle, causing light emission fluctuations

[AIAA PAPER 72-415] 11 p1617 A72-26165

Electrothermal thruster supersonic convergent-divergent nozzle performance with lithium vapor propellant, predicting exhaust velocity by isentropic flow equations

[AIAA PAPER 72-453] 11 p1708 A72-26189

Laser emission from pulsed transverse electric discharge in supersonic nozzle downstream region gas dynamic cooled mixture

15 p2245 A72-31385

Three dimensional supersonic nozzle exhaust flow field numerical analysis based on reference plane characteristics, deriving difference equations for three coordinate systems

[AIAA PAPER 72-704] 16 p2344 A72-34040

Data correlation of jet noise total sound power and peak sideline overall sound pressure level for subsonic and supersonic convergent exhaust nozzles

[AIAA PAPER 72-643] 16 p2381 A72-34089

Influence of contraction section shape and inlet flow direction on supersonic nozzle flow and performance.

17 p2483 A72-34204

Subsonic, transonic, and supersonic nozzle flow by the inverse technique.

17 p2483 A72-34206

Calculations of the turbulent boundary layer in supersonic nozzles.

17 p2485 A72-35237

Method of characteristics application to supersonic jet and nozzle gas flow with allowance for equilibrium and nonequilibrium condensation

17 p2544 A72-35929

Nozzle beam-mass spectrometer system for studying one-atmosphere flames.

[WSCI PAPER 72-9] 20 p2921 A72-38975

Viscous non-adiabatic laminar flow through a supersonic nozzle - Experimental results and numerical calculations.

[ASME PAPER 72-HT-49] 20 p2985 A72-39662

Study of a reactive nozzle flow associated with solid gas-phase interaction.

24 p3433 A72-45063

The transient processes in hybrid solid propellant combustion chamber throttled by supersonic nozzle.

24 p3434 A72-45198

SUPERSONIC PRESSURE DISTRIBUTION

U PRESSURE DISTRIBUTION

U SUPERSONIC FLOW

SUPERSONIC SPEEDS

Supersonic ribbon parachute testing by transonic wind tunnel, rocket sled and water channel simulator

01 p0004 A72-10305

Ground test determination of design data for low supersonic high density air deployable deceleration systems, considering high strain rate effects on parachute materials

01 p0005 A72-10313

Frictional electrification from supersonic particle impact, determining particle charge and concentration, body intercepting area and velocity variations with speed

02 p0261 A72-12555

Flow field due to diffraction of shock wave at wedge moving at supersonic speed

05 p0600 A72-16212

Nonsymmetrical aerodynamic damping moments on 10 deg cone at supersonic speeds and large angles of attack, comparing Newtonian theory prediction with wind tunnel test results

[AIAA PAPER 72-29] 05 p0609 A72-16947

Plane oblique shock wave diffraction on wedge moving in homogeneous gas flow at supersonic speed, reducing boundary value problem to Hilbert problem

07 p0910 A72-20317

Photoelastic studies of plane stress fields in plate induced by moving loads at subsonic, transonic and supersonic speeds

10 p1553 A72-23746

Mathematical model for supersonic crack propagation in cubic lattice, deriving velocity-applied stress relation

10 p1558 A72-24895

Trajectory determination of supersonically traveling object from shock arrival times observations at ground locations

11 p1617 A72-25994

Supersonic auroral motions relationship to infrasonic waves generation, showing acoustic pulse within electrojet arcs due to collisions with neutral gas of positive ions

11 p1624 A72-26403

Supersonic aerodynamic influence coefficients matrices calculation for wings of arbitrary planform, constructing computer program

12 p1752 A72-28142

Composition dependence of ultrasonic velocity in binary Mg base alloys measured by pulse method

14 p2143 A72-31030

Sonic boom induced flow field at supersonic/hypersonic speeds, using shock expansion method and hypersonic equivalence principle for sharp and blunt nosed bodies

[AIAA PAPER 72-652] 16 p2349 A72-34082

Quasi-homogeneous approximation for wing with curved subsonic leading edges at supersonic speeds.

[ICAS PAPER 72-54] 21 p2992 A72-41176

The diffraction of light by progressive supersonic waves: Oblique incidence of light. I - Approximate solution of the Raman-Nath equations.

22 p3207 A72-42852

Ultrasonic attenuation and velocity in hot specimens by the momentary contact method with pressure coupling, and some results on steel to 1200 C.

23 p3294 A72-44116

SUPERSONIC STRIKE AIRCRAFT

U ATTACK AIRCRAFT

U SUPERSONIC AIRCRAFT

SUPERSONIC TEST APPARATUS

Facility for studying the failure of structural elements in a supersonic high-temperature flow containing a controlled number of abrasive particles

21 p3043 A72-41717

High response two-transducer pressure measurement for evaluating nonuniform and unsteady inlet air flow distortion effects on supersonic jet engine stability and performance

22 p3216 A72-42683

SUPERSONIC TRANSPORTS

NT CONCORDE AIRCRAFT

NT SUPERSONIC COMMERCIAL AIR TRANSPORT

Thin-down intensities for heavy primaries at SST flight levels, using plastic stacks measurements

[CERN-71-16] 02 p0274 A72-12077

In-flight warning meter for solar and cosmic radiation dose equivalent measurements for radiological protection in SST aircraft

[CERN-71-16] 02 p0274 A72-12078

Cosmic ray exposure thindown tracks in human tissue from solar minimum to maximum at SST flight level

[CERN-71-16] 02 p0163 A72-12079

Stratospheric circulation and air temperature horizontal and vertical distribution, discussing CAT at supersonic transport heights

04 p0541 A72-14676

Minimum flight time routes model at SST altitudes, taking into account temperature, meteorological and wind factors

04 p0542 A72-14678

Storm effects on SST operations, discussing wave initiation at storm top and tropospheric propagation

04 p0542 A72-14683

CAT inducing atmospheric conditions effects on SST flight, discussing turbulence in convective clouds and kinetic energy spectra of atmospheric motions

04 p0543 A72-14693

Wave drag reduction by antisymmetric wing and body arrangement, discussing application to transport aircraft at supersonic speeds

05 p0602 A72-16534

SST operational maneuver effects on sonic boom, discussing steady flight and acceleration-to-crest pressure signatures

[AIAA PAPER 72-196] 05 p0613 A72-16981

Probability estimates of aircraft encounters with hail, discussing variations with locality, hailstone size and height and supersonic transport experience

09 p1346 A72-23423

Runway unevenness and landing gear characteristics effects on SST vibration during taxiing, taking off and landing

09 p1263 A72-23459

Pressure jumps lower bounds across supersonic transports induced shock waves in homogeneous atmosphere, using Whitham function in terms of Riemann integral

10 p1420 A72-24846

Flight airworthiness requirements development for supersonic transports, V/STOL and transport and general aviation aircraft, exploring critical control and stability parameters

[SAE PAPER 720306] 11 p1575 A72-25570

Medical and physiological hazards for SST passengers and crews, discussing cumulative cosmic radiation and high altitude decompression risks

11 p1583 A72-25816

Estimated peak regional concentration of SST exhaust in stratosphere from expected flight operation levels

13 p1991 A72-28837

Thunderstorm encounter probability at SST altitudes for selected cross country routes, using radar observation data

13 p1992 A72-28853

SST water vapor and nitrogen oxides exhausts effect on stratospheric composition, developing nonequilibrium photochemical model

13 p1994 A72-28878

Optimum low noise engine selection for transport and combat aircraft relative to range or payload performance, considering CTOL, VTOL, SST and fighter aircraft

15 p2297 A72-32127

Bibliography on SST upper atmospheric environment, listing references to stratospheric structure, composition and physical dynamics, chemical reactions with pollutants, transport properties, etc

16 p2386 A72-33797

SST contrails stratospheric dispersion by aircraft wake, atmospheric turbulence and exhaust gases temperature induced buoyancy

[AIAA PAPER 72-650] 16 p2388 A72-34084

Stratospheric pollution by SST exhaust gases, discussing water vapor and nitrogen oxides effects on ozone concentration

17 p2597 A72-35327

Meteorological effects on SST performance, considering temperature, wind, turbulence, hydrometeors, ozone and radiation effects

17 p2577 A72-35790

Radiobiological problems caused by supersonic transport /With a survey of the first results established by tests performed on board the Concorde prototype/.

19 p2762 A72-38713

Problems and solutions related to the design of a control augmentation system for a longitudinally unstable supersonic transport.

[AIAA PAPER 72-871] 20 p2887 A72-39128

Economic and social aspects of commercial aviation at supersonic speeds.

[ICAS PAPER 72-51] 21 p2996 A72-41851

Wing flutter prevention in SST structural design, using finite element model and lifting surface aerodynamic theory

22 p3237 A72-42760

SUPERSONIC TURBINES

High tip speed low loading transonic fan rotor design for weak oblique shocks with improved efficiency and stall margin

[AIAA PAPER 72-83] 07 p0907 A72-18951

Economical performance of single rim supersonic turbine stage with repeated low level admission of working body

07 p0908 A72-18986

Supersonic turbine cascade flow properties and pressure distributions on blades, comparing calculated results with experimental data

[ASME PAPER 72-GT-47] 11 p1570 A72-25639

Supersonic turbine stator and rotor blading design corrected for boundary layer displacement thickness, discussing limitations due to normal shock wave at flow separation

[ASME PAPER 72-GT-63] 11 p1571 A72-25653

Optimal arrangement of conical nozzles in a segment of a partial supersonic turbine stage

20 p2963 A72-39913

SUPERSONIC WAKES

Finite difference model application to supersonic planar viscous near wake, determining parameter range by physical and numerical restraints

[AIAA PAPER 72-115] 05 p0609 A72-16971

Book on steady laminar supersonic and hypersonic wakes covering near and far region solutions, boundary layer separation, etc

09 p1261 A72-23029

Development of transition in the wake of a cylinder perpendicular to a supersonic flow

17 p2484 A72-34769

SUPERSONIC WIND TUNNELS

Supersonic wind tunnel study of flow induced pressure oscillations in shallow rectangular cavity, investigating resonant frequencies and pressure mode shapes

01 p0049 A72-10221

Wind tunnel study of space shuttle longitudinal dynamic stability at supersonic speeds, discussing damping-in-pitch

[AIAA PAPER 72-135] 05 p0730 A72-16890

Flat plate boundary layer transition equations for supersonic wind tunnels, taking into account free stream turbulence

08 p1150 A72-21616

Laminar/turbulent boundary layer transition on parabolic wing profile in supersonic wind tunnel, noting critical Reynolds number increase with leading edge thickness

09 p1259 A72-22407

Superconducting magnetic suspension and balance facility of supersonic wind tunnel for dynamic stability studies

10 p1460 A72-24757

Superconducting coil design for magnetic suspension of supersonic wind tunnel balance

10 p1460 A72-24759

Data acquisition and reduction for model aerodynamics in superconducting magnetic suspension and balance of supersonic wind tunnel facility

10 p1461 A72-24766

Holographic interferometer and fringe analyzer with laser sources, discussing design and application to supersonic flow imaging in wind tunnel

12 p1809 A72-27760

Laminar to turbulent boundary layer transition in supersonic flow over flat plate investigated in supersonic wind tunnels, noting unit Reynolds number effect

14 p2069 A72-31004

Supersonic aircraft wing form influence on sonic boom, discussing supersonic wind tunnel tests from noise reduction

20 p2888 A72-39931

Flow quality improvements in a blowdown wind tunnel using a multiple shock entrance diffuser.

[AIAA PAPER 72-1002] 21 p3041 A72-41587

Evaluation of transonic and supersonic wind-tunnel background noise and effects of surface pressure fluctuation measurements.

[AIAA PAPER 72-1004] 21 p3041 A72-41588

SUPERSONICS

Time dependent finite difference /fluid-in-cell/ method for supersonic aerodynamic problems concerning inviscid compressible flow with contact surface and shock discontinuities

16 p2342 A72-32884

SUPINE POSITION

Plasma renin activity during supine physical exercise as function of salt loading

04 p0480 A72-15214

Supine human body mechanical impedance under combined stress of vibration and sustained acceleration

12 p1765 A72-28200

Cardiac stroke volume measurements during supine bicycle exercise and recovery period, using indicator dilution technique

14 p2079 A72-30700

Flight and centrifuge tested aircrew tilting supine seats biomedical and technical adequacy as acceleration protective man machine system

19 p2761 A72-38703

Health condition changes in test subjects during strict bed rest in hypokinetic recumbent and antiorthostatic position subject to lower body negative pressure

23 p2259 A72-43913

Rheographic investigation of cerebral, pulmonary and peripheral circulation during bed rest in antiorthostatic position

23 p2255 A72-43914

Metabolic changes in healthy humans caused by prolonged bed rest in horizontal position, noting prevention by physical exercises and electric muscle stimulation

23 p2260 A72-43923

Induction of hemodynamic deterioration by the hypogravic state - An evaluation of mechanisms and prevention.

24 p3373 A72-45191

SUPPORT SYSTEMS

NT GROUND OPERATIONAL SUPPORT SYSTEM

NT GROUND SUPPORT SYSTEMS

Product support functional organization, discussing support systems analysis and engineering, training design, technical proposals and publications, customer training, field service, etc

04 p0597 A72-15220

SUPPORTS

NT PYLONS

Iterative solution for non-Levy rectangular plates with corner supports, assuming small deflection theory

06 p0896 A72-17966

Influence of coupling behavior on the quietness of multiply supported shaft systems

18 p2694 A72-36070

Theoretical analysis of a cryogenic gas bearing with a flexible damped support.

19 p2810 A72-38837

SUPPRESSORS

NT ECHO SUPPRESSORS

Zener diode transient suppressors with electronic thermal switch for ground vehicle and aircraft applications

[AD-741529] 05 p0637 A72-16553

Large scale high aspect ratio multielement suppressor nozzle arrays testing for augmentor wings and internally blown flaps

[AIAA PAPER 72-131] 05 p0612 A72-16886

- Effect of electrical generator parameters on transient suppressors. 19 p2753 A72-37291
- An improved design and measurement of attenuation characteristics of RF suppressors. 20 p2902 A72-38997
- SURFACE CHEMISTRY**
- U SURFACE REACTIONS**
- SURFACE COOLING**
- Neutron star surface structure and cooling calculations for pulsar cosmic ray production through surface material acceleration 03 p0421 A72-13136
- Hg vapor condensation on cooled vertical steel cylinder at 70-185 C, considering heat flux relation to saturated vapor/cooling surface temperature difference 06 p0903 A72-18190
- Steady heat conduction of cooled gas turbine hollow nozzle blades with gas temperature variation along cascade 08 p1223 A72-20948
- Spatial layer cooling during surface emission according to Stefan-Boltzmann law, assuming heat source inside body 08 p1253 A72-21445
- Space shuttle booster and orbiter thermal protection systems, examining heat sink, metallic radiative, reusable surface insulation and surface cooled designs [AIAA PAPER 72-391] 11 p1726 A72-25412
- Thermal stresses near pole of spherical reservoir during cooling, using thermoelastic equations of shell of revolution 12 p1887 A72-28242
- Numerical solution to stabilization temperatures of supersonic boundary layer under intense surface cooling without constraints on disturbance wave number and Reynolds number 16 p2343 A72-33155
- Chill zone structures in Al-Cu alloys as function of heat sink, surface microprofile and liquid metal fluid flow 16 p2409 A72-33810
- Structural thermal protection systems for Space Shuttle, noting reusable surface insulation with active cooling [ASME PAPER 72-ENAV-32] 20 p2976 A72-39145
- Nonisothermal surface cooling for arbitrary temperature distribution and Prandtl number approaching zero, solving thermal boundary layer equations by series expansion 21 p3129 A72-41061
- German monograph - Cooling of geometrically simple bodies /flat plate, cylinder, sphere/ by convection and radiation. 22 p3244 A72-43062
- SURFACE CRACKS**
- Stress corrosion crack tip electrochemical reactions simulation on Ti and alloy surfaces, using modified rotating disk apparatus with pH measurement 04 p0536 A72-15739
- Dimpling behavior of metal plate with mode I edge crack, relating flaw depth, applied stress level and crack tip plastic zone 05 p0673 A72-16305
- Temperature effects on anodic polarization of Ti open surface and corrosion crevices, discussing critical potential relation to pitting 06 p0829 A72-17946
- Rupture strength of disk with surface crack under concentrated loads, applying integral equation to stressed state 07 p1092 A72-19777
- Analytical model for surface fatigue crack configuration during propagation into thick plate under cyclic loading [AD-741575] 07 p1095 A72-20242
- Brittle fracture dynamics, deriving motion equations and stability conditions of surface cracks under stress waves from energy balance and angular momentum conservation law 09 p1404 A72-22916
- Stress intensity factor for circular crack embedded in finite thickness solid under uniform tension, noting semielliptical surface flaw in brittle material [ASME PAPER 71-APMW-6] 10 p1554 A72-24183
- Brittle continuous and crazed anodic oxide coatings effect on Al filament stiffness, comparing with Dow analysis 13 p1974 A72-28663
- Cu surface contamination effect on hot crack susceptibility and weldability of Co based superalloys 13 p1965 A72-29419
- Crack propagation in biaxially stressed and heat treated cylindrical pressure vessel observed by strain gage displacement measurement, noting effects of initial surface cracks 14 p2169 A72-31176
- Surface stress solution for elastic half space weakened by spherical cut under internal pressure 15 p2333 A72-32681
- Surface crack detection in ferrous and nonferrous metals, glass, ceramics and plastics by water-washable dye penetrants process 16 p2397 A72-33239
- Crack depth measurement with surface waves. 19 p2809 A72-38569
- The influence of grain and twin boundaries in fatigue cracking. 21 p3069 A72-41350
- The magnetic field of eddy currents above a surface crack in metal with excitation of them by an applied inductor. 21 p3057 A72-41722
- The surface crack: Physical problems and computational solutions; Proceedings of the Winter Annual Meeting, New York, N.Y., November 26-30, 1972. 23 p3352 A72-44226
- The surface flaw in aircraft structures and related fracture mechanics analysis problems. 23 p3352 A72-44228
- Surface flaws measurement devices and quasi-static fracture tests, discussing cyclic crack growth, elastic compliance derivative method and stress intensity equations 23 p3353 A72-44229
- Experimental characterization of yield induced by surface flaws. 23 p3353 A72-44230
- Stress intensity factors for embedded elliptical crack in semiinfinite solid and for semielliptical surface crack in plate under tension and/or bending 23 p3353 A72-44231
- The elastic analysis of the part-circular surface flaw problem by the alternating method. 23 p3353 A72-44232
- Line spring analysis model for long part-through surface cracks in walls of plate or shell structures, formulating constitutive laws 23 p3353 A72-44234
- Three-dimensional finite element analysis for fracture mechanics. 23 p3353 A72-44235
- Stress distribution in a homogeneous elastic sphere containing a penny shaped crack of prescribed shape. 23 p3354 A72-44268
- SURFACE DEFECTS**
- Extruded anodized AlMgSi alloy matrix precipitate surface defects, noting wood grain effect, segregated bands, microstructural stains and heterogeneous zones 01 p0077 A72-11042
- Breakdown surfaces of thin Ti alloy specimens under tension as function of composition and heat treatment temperature 01 p0088 A72-11079
- Surface damage effect on strength of c-axis sapphire filaments, assessing impact on sapphire reinforced metal technology 02 p0249 A72-11992
- Dye penetrant surface defect indications on 2014-T6 Al gas metal arc weldments heat affected zone, considering minimization by arc stabilization and caustic etch time reduction 02 p0236 A72-12775
- Double forces distribution over elastic body surface from Lamé equation describing static defects, discussing Kupradse potential and sources corresponding to plane dislocations and cracks 03 p0444 A72-13501
- Defective IC device glass surface passivation effects on scanning electron microscope analysis 03 p0365 A72-14287
- Residual stresses and geometrical imperfections effects on compressive strength of thin welded box columns 07 p1088 A72-19114
- Residual stresses effect on technical cohesive strength of welded cylindrical shell with surface defects, presenting plane strain fracture toughness determination method 07 p0997 A72-20131
- Dielectric and semiconductor crystals surface defects, considering electric polarization structures 10 p1525 A72-23761
- Surface defects absence after intergranular creep from Al bicrystals grain boundaries observation by transmission electron microscopy 10 p1495 A72-24084
- Solids deformation resistance increased by active lubricants effects on coupled friction surfaces, noting damage localization to thin surface layers 12 p1817 A72-28181
- Surface contamination effect on electron temperature measurement using rocket-borne Langmuir probe in lower ionosphere 15 p2236 A72-31926
- Optical nondestructive surface flaw detection for steel plates using oblique angle illumination combined with high pass spatial filter 15 p2238 A72-32153
- Surface defects evaluation on GaAs and Si wafers by metallographic and electrochemical techniques 15 p2296 A72-32758
- Line and surface defect treatments of elastic media dislocation field, noting nonuniqueness with respect to Burgers and jump conditions 16 p2467 A72-33141
- Precipitation caused surface defects on Al-Mg-Si alloy extrusions, considering segregation streaks, cooling induced microstructural stains and cold working-annealing produced heterogeneous zones 18 p2699 A72-36225
- Photoelastic investigation of a Hertzian contact with shallow grooves in the contact area. 18 p2734 A72-36374
- Ways of reducing porosity in argon-arc welding of thin titanium sheets. 18 p2695 A72-36428
- Relation between the plasma ion current and the surface defects produced by ruby and neodymium laser emission 19 p2812 A72-38210
- Some considerations on the residual stresses in orthogonal cut surface of aluminium. 20 p2978 A72-38884
- Compensation of Fabry-Perot surface defects. II - Silicon oxide compensating layers. 21 p3053 A72-40608
- Residual stresses effect on technical cohesive strength of welded cylindrical shell with surface defects, presenting plane strain fracture toughness determination method 24 p3408 A72-45757
- SURFACE DIFFUSION**
- Mixed cubic carbide diffusion layer formation on carbon steel surface, using chemical transport reaction analysis 06 p0828 A72-17570
- Structural changes of nitrided steel diffusion zone, showing alpha solid solution and hard nitride phases mixture 08 p1188 A72-21880
- Diffusion measurements during annealing of Pd-V, Pd-Ti and metal-ceramic systems by microprobe 11 p1664 A72-26853
- Deep diffused layer sintering of metal-ceramic cutting alloys with variable Co content for increased wear resistance and tensile strength 13 p1982 A72-30112
- Reactional diffusion in metal surface layers due to chemically active external media involving solid reaction products formation 15 p2255 A72-31570
- Diffusion layer formation on metallic surfaces, discussing saturation, crystallization, phase structure, chemical reactions, thermal and contact conditions 15 p2255 A72-31571
- Soft X ray appearance potential spectrometer construction and operation for metal film diffusion detection in microcircuit technology 15 p2241 A72-32442
- Incore thermionic reactor cylindrical Mo emitter covered with two CVD W layers, discussing first layer adhesion and diffusion characteristics and work function stability 18 p2707 A72-36135
- Interface morphology development during stress corrosion cracking. I - Via surface diffusion. 18 p2700 A72-36583
- Chromizing of steel sheet by diffusion 20 p2929 A72-39581
- Structure and properties of nickel-phosphorus coatings as a function of the temperature and annealing time 20 p2929 A72-39583
- A comparison of the effect of inward and outward diffusion aluminate coatings on the fatigue behavior of nickel-base superalloys. 21 p3067 A72-40916
- Digital parallel correlator with LSI single-chip bipolar transistor construction, discussing triple diffusion process for n-p-n and p-n-p junctions 23 p2374 A72-44453
- Transition of the oxide film on a molybdenum surface from the two-dimensional to the three-dimensional phase 24 p3432 A72-45503
- SURFACE DISTORTION**
- Solid body surface strain field optical determination, using diffraction gratings [SESA PAPER 1751] 02 p0199 A72-11512
- Previous loading effect on contact area and prints number and size distribution and thermal conductance for two nominally flat surfaces in contact [ASME PAPER 71-LUB-M] 02 p0234 A72-11528
- Impending metal fatigue failure holographic detection by optical correlation of coherent light reflection from deformed surface structure as function of time 02 p0294 A72-12442
- Homogeneous first order solutions to Lamé equations in statistical elasticity theory, yielding harmonic surface displacement for elastic body 03 p0454 A72-14371
- Ultrahigh strain rate measurement via diffraction gratings directly impressed into test material surface, recording outputs by high speed cameras or photoelectric techniques 10 p1487 A72-24573
- Thermal boundary layer interaction with distortions in shape or material of adjacent surface for space shuttle design [AIAA PAPER 72-312] 11 p1614 A72-25246

Boundary surfaces during plastic buckling of hollow cylindrical shell under combined loading by external pressure and axial force

12 p1880 A72-27231

Boussinesq solution for elastic surface deflection due to continuous pressure with polynomial distribution over triangular area

12 p1884 A72-27568

Diffraction efficiency of phase holograms formed by surface deformation of light sensitive dichromated gelatin films

12 p1808 A72-27600

Optical measurement of wave front lens or mirror surface contours by laser unequal path interferometer combined with computer data reduction

20 p2922 A72-39034

Conformal mapping procedure for numerical generation of airfoils with local curvature singularities, presenting test problem results for zero trailing edge angle

21 p2992 A72-41259

An immersion interferometer for monitoring the quality of second-order aspherical surfaces

21 p3058 A72-41808

Influence of deviations in the shape of the base surface on the precision of turbine blade machining operations

22 p3182 A72-41863

Investigation of optical inhomogeneities in large fields by holographic methods

22 p3176 A72-42106

Surface distortion and strain fields visualization by grating produced diffraction patterns, discussing different detection techniques

22 p3234 A72-42391

Stress state of arbitrary contour body of revolution under torsion using finite difference method

23 p3347 A72-43744

SURFACE ENERGY

Terrestrial radiation emission mapping from imagery produced by scanning radiometer, discussing remote sensors used to study surface energy phenomena

02 p0210 A72-11804

Surface energy states of CdS basal plane based on photovoltage inversion effect model

03 p0400 A72-12991

Double cantilevered specimen crack growth, computing fracture surface energies from dynamical cleavage analysis

05 p0735 A72-16019

Surface and interfacial energies measurement by multiphase equilibrium method for refractory metal monocarbides with liquid cobalt

07 p1010 A72-19136

Surface active medium effect on free surface energy and strength of pyrographite in ethyl alcohol solution, using crack kinetics experiment

08 p1197 A72-22182

Surface tension determination at immiscible liquids or liquid-gas phase interfaces by capillary rise measurement of droplet

09 p1294 A72-22678

Fracture surface energy and acoustic emission of boron fiber-epoxy resin composite, using linear elastic fracture mechanics and compliance variation methods

11 p1674 A72-25858

Surface energy effect on alloy structure formation, analyzing crystal growth and formation from supersaturated solutions

15 p2253 A72-31221

Orientation and elongation effects on grain boundary correction term in foil surface energy measurement by zero creep, using virtual work method

15 p2258 A72-32637

Fracture-surface energy model for Cu-W fiber metal matrix composites, using plastic flow analysis

16 p2470 A72-33613

Surface energy and cleavage plane observation of brittle fracture for W single crystal in tension as function of orientation and temperature

18 p2702 A72-36750

The fracture energy and some mechanical properties of a polyurethane elastomer.

19 p2823 A72-38450

Manifestation of the effect of adsorptive reduction in strength under conditions of selective transport during boundary friction

22 p3183 A72-43138

SURFACE EROSION

U EROSION

SURFACE FINISHING

Extruded AlMgSi alloy manufacturing conditions effect on strength, surface finish and anodized appearance, discussing evenly distributed fine hardening precipitates, metal purity, etc

01 p0077 A72-11043

Hydraulic sand blasting and annealing effects on Ti alloy sheet bending fatigue strength

06 p0831 A72-18357

Thin solid film lubricants for use with roller bearings at ambient and elevated temperatures, discussing surface treatment

06 p0823 A72-18585

Milling, band grinding, final manual polishing and tumbler polishing effects on fatigue life and surface finish of steel compressor blades

06 p0824 A72-18651

Maximum allowable time between Ti metal surface preparation and agent application in adhesive bonding

07 p1024 A72-20254

Metal structure effect on anodic dissolution and surface microgeometry formation during electrochemical machining

08 p1175 A72-21040

Electrolyte flow rate, electric current intensity and tool electrode shape influence on surface finish quality in precision electrochemical machining

08 p1175 A72-21044

Machine parts surface hardening and smoothing by vibrating hard alloy sphere impact at ultrasonic frequency

08 p1176 A72-21050

Graphite fibers surface treatment and interfacial adhesive bonding, considering resin composites shear strength enhancement by sulfuric acid and sodium chlorate oxidation

08 p1194 A72-21697

Clam seals comparison with elastomers, discussing aircraft use, contamination, inspection, corrosion and erosion, surface finish, service life and cost

08 p1179 A72-21941

Thick steel plate diffusion welding in air with dead-weight loading and autogenous surface cleaning

11 p1637 A72-25343

Hardcoat anodizing of Al surfaces, discussing preparation, racking, equipment and post treatments [SAE PAPER 720341]

11 p1638 A72-25598

Hydroplasma metal removal for surface cleaning of heat resistant alloys, using electric contact plasma arc machine

11 p1641 A72-26673

Diamond burnishing effect on surface quality and fatigue strength of steel, noting work hardening increase and compressive residual stresses buildup in surface layer

11 p1642 A72-26811

Ge field effect dependence on surface roughness and finishing, noting relief elements dimensions ratio and orientation to current flow direction

12 p1855 A72-27859

Surface finishing effects on steel sensitivity to stress concentration under variable loads, emphasizing diamond smoothing and roller technique

12 p1831 A72-28246

Squeeze casting for precision shaping mechanical properties, surface finish and cost reduction in metal working

[ASME PAPER 72-DE-7]

14 p2108 A72-30862

Surface treatment effects on light and X ray irradiated surface photoconductivity of InSb semiconductor single crystals at liquid nitrogen temperature

15 p2292 A72-31866

Surface cold-working as a means of increasing the short-term fatigue endurance of machine elements

19 p2808 A72-38015

Investigation of the influence of surface treatment purity and procedure on the strength of the Kh18N10T and Kh16N6 steels and the AMG6 alloy at normal and low temperatures

19 p2819 A72-38016

Effects of environment on formation of finished surface in drilling aluminum and aluminum alloys.

21 p3060 A72-40936

Flat optical surfaces production methods for Fabry-Perot interferometers, describing Otte polishing process and quality test methods

22 p3177 A72-42446

Wide-band abrasive grinding of complex surfaces with flexible contact wire elements

23 p3293 A72-43672

Crystalline solids surfaces with catalysis, electronics and corrosive reactions, discussing slow electron diffraction, ionic field microscopy and Auger spectroscopy techniques for surface cleanliness measurement

23 p3324 A72-44461

SURFACE GEOMETRY

Geometrical method in nonlinear shell theory for supercritical elastic deformation determination, considering stability loss and dynamics problems

02 p0289 A72-11612

Rayleigh distance for reflection from curved surfaces in Cassegrain subreflector geometrical optics design

04 p0499 A72-15207

Heat transfer, drag and lift coefficients for free molecular flow over concave surfaces, describing Monte Carlo simulation technique

[ASME PAPER 71-WA/HT-17]

05 p0744 A72-15876

Hypersonic boundary layer displacement interaction and surface curvature effects, employing implicit finite difference methods

[AIAA PAPER 72-76]

05 p0603 A72-16803

Program system for computation of surface from set of data points, using piecewise polynomial functions

06 p0815 A72-17753

Surface relief effect on radiative properties of solid body with random surface roughness distribution

07 p1098 A72-18934

Radiative heat transfer characteristics of optimum geometry radiating stainless steel fin

07 p1098 A72-18997

Metal structure effect on anodic dissolution and surface microgeometry formation during electrochemical machining

08 p1175 A72-21040

German monograph on optimum principle for numerical representation of surfaces, discussing association with elasticity theory extremal requirements

09 p1340 A72-22319

Optimization of load-carrying elastic lattice structures designed on prescribed surface

09 p1402 A72-22746

Spacelike hypersurface conformally invariant three geometry role in unconstrained dynamical degrees of freedom of gravitational field

11 p1691 A72-26706

Computer algorithms and programs for complex surface geometrical parameters calculation and discrete curve coordinates determination by interpolation

13 p1924 A72-29141

Green function solution for electric field intensity in space due to electric dipole at another point under boundary conditions on surface of revolution

13 p1921 A72-29341

Computer algorithm to calculate surfaces formed by equidistant conic sections, using successive approximation method

13 p1966 A72-29461

Infinitesimally small slip bendings of sign-variable curved surface of revolution with parabolic boundary parallels

13 p2061 A72-29794

Large astronomical telescopes construction discussing aspherical surfaces control, grinding, polishing and optical testing procedures

15 p2234 A72-31612

Flows between stationary surfaces of revolution having similarity solutions.

[ASME PAPER 72-APM-4]

17 p2537 A72-34304

The analysis of deployable umbrella paraboloid reflectors.

17 p2524 A72-34355

Solid surface geometry, atomic composition and electronic structure observations, discussing Auger spectroscopy, field ion microscopy and electron diffraction and scattering techniques

19 p2803 A72-38338

Condensation on a downward-facing horizontal rough surface.

[ASME PAPER 72-HT-33]

20 p2983 A72-39483

Double exposure holographic interferometry for distinguishing surface deformations by changing illuminating beam inclination in successive exposures

22 p3175 A72-41992

Viscous interaction over concave and convex surfaces at hypersonic speeds.

23 p3249 A72-44308

Investigation of the dependence of the smoothness of rectilinear motion in precision-equipment mechanisms on the form of the microrelief of contacting surfaces

24 p3403 A72-45322

SURFACE INTERACTIONS

U SURFACE REACTIONS

SURFACE IONIZATION

Mass spectrometric investigation of high power laser beam plasma on solid target, determining multicharged ion yield, energy, angular distribution and recombination effect

01 p0079 A72-10344

Electrostatic surface and bulk ionization ion thrusters current densities for propulsive and working fluid utilization efficiency

05 p0705 A72-16777

Cs diode discharge current oscillations in Knudsen plasma containing electron and positive ion fluxes from thermionic emission and surface Cs ionization

09 p1361 A72-22966

Hydrogen atom ground state ionization probability derivation as function of electric field strength and distance to metal surface

15 p2279 A72-32694

Electrostatic surface ionization and electron bombardment ion thrusters current densities for propulsive and working fluid utilization efficiency

17 p2597 A72-35272

Cs diode discharge current oscillations in collisionless Knudsen plasma containing electron and positive ion fluxes from thermionic emission and surface Cs ionization

17 p2593 A72-35888

Nickel single crystal target ionization by high voltage electron beam bombardment, using flight time mass spectroscopic analysis

19 p2835 A72-38666

SURFACE LAYERS

Gas saturated surface layer deformation in rolled Ti alloys as function of specimen thickness reduction

01 p0077 A72-11086

Lateral surface heat transfer effect on thermophysical characteristics in thin layer coatings, discussing temperature gradients in corundum and zirconium oxide on copper
02 p0304 A72-12864

Solar magnetic field distribution in sunspots surface layers, considering photospheric three dimensional magnetohydrostatic model
03 p0431 A72-13337

Surface layers and aging influence on Bauschinger effect in profiled low carbon steel under low tension-compression load cycles
03 p0445 A72-13591

Finite difference schemes for surface and planetary boundary layer solutions using grid spacings proportional to mixing length and eddy viscosity
03 p0386 A72-14337

Displacements in nonhomogeneous elastic layer, investigating uniformly distributed load surface settling behavior dependence on layer depth relationship to loaded area width
03 p0455 A72-14387

Cross section geometry and deformation effects on rods vibration damping, determining surface layer energy absorbing properties for longitudinal and torsional oscillations
05 p0735 A72-15988

Mixed cubic carbide diffusion layer formation on carbon steel surface, using chemical transport reaction analysis
06 p0828 A72-17570

Flexural, longitudinal and torsional vibration damping of various size rods, taking into account surface layer energy loss
06 p0900 A72-18675

Diurnal temperature variations in lunar surface layer from Apollo 12 samples, comparing with Apollo 11 samples and IR measurements
07 p1068 A72-18874

Gas saturation of Ti alloy in air and vacuum at 750-1050 C for 1-6 hr, discussing surface layer microstructure change after heat treatment
07 p1013 A72-19742

High temperature nitriding of martensitically aging steels in ammonia-nitrogen mixtures, obtaining hard nonbrittle diffusion surface layers
07 p1020 A72-20418

Laminar thermal boundary layer analysis, comparing heat transfer characteristics of continuous surface and semiinfinite plate
08 p1254 A72-21613

Ti crystallographic and topographical features determination by hydrogen-ion microscopy, noting temperature effects on surface films and low index facets production
09 p1327 A72-22805

Transitional microstructure of machined surface layer due to built-up edge disintegration
11 p1638 A72-25508

General relativity equations solution for interaction of gravitational radiation and conducting fluids in magnetic field, noting energy absorption in specified depth surface layer
11 p1720 A72-26116

Metal surface layer and microetching process along grain boundaries during electrochemical precision processing, verifying steel microcrack depths with mathematical model
11 p1640 A72-26260

Axial, circumferential and radial residual stresses calculation in polymetallic coatings and cylindrical elements during surface layer removal by electrochemical processing
11 p1737 A72-26263

Pulsating heat source model for physical processes in metal surface layer under fatigue limit stress level, calculating critical volume to limit energy buildup
11 p1738 A72-26801

Lunar topsoil density variations from Lunik and Surveyor radio wave, alpha and gamma scattering data, discussing Lunik 13 and Surveyor 7 landing sites
11 p1724 A72-26909

Temperature dependence of destruction threshold of lithium niobate surface under laser irradiation, noting ferroelectric properties effects
12 p1853 A72-27069

Electron microscope study of hard alloy surface layer formation characteristics during diamond grinding with electrolysis
12 p1814 A72-27766

Solids deformation resistance increased by active lubricants effects on coupled friction surfaces, noting damage localization to thin surface layers
12 p1817 A72-28181

Ridge dimensions determination and causes of self oscillation in solid surface layers deformation under sliding friction
12 p1817 A72-28182

Physicochemical processes in metal surface layers subjected to contact friction with aircraft fuels presence, noting secondary compounds and thermal oxidation acceleration
12 p1817 A72-28183

Oxide thin films effects on surface layers deformation and wear resistance of coated metals under friction, noting electrical resistance changes in annealing
12 p1818 A72-28189

Metal surface layers structural changes under external friction, noting hardening, softening and phase transformations of active layer material
12 p1818 A72-28190

Cumulative damage and structural changes in friction contact areas of steel plates under cyclic pulsed loads, noting microhardness distribution and surface layers microstructure
12 p1818 A72-28191

General relativity equation of motion for spherically symmetric surface layer of ideal gas under central gravitational field
13 p2035 A72-28646

Blackness degree calculation for semitransparent film on nontransparent substrate with layer temperature gradients, allowing for polarization emission and multiple reflections
14 p2130 A72-30296

Ferroelectric nature of superficial layer on barium titanate crystals from scanning electron microscope and optical observations
15 p2291 A72-31681

Superconducting to normal transition field as function of temperature for Ta with thin surface layer variable density impurities
15 p2293 A72-32241

Hydrogen impregnated Ta superconducting to normal transition and M-H curves, discussing effect on impure surface layer superconducting properties
15 p2293 A72-32242

Photoconductivity in depleted surface layer of quasi-monopolar semiconductors with arbitrary diffusion to Debye lengths ratio, noting n-type low resistance gallium arsenide
15 p2296 A72-32694

Lunar surface diurnal temperature variations calculation based on Apollo 12 lunar fines thermophysical properties and surface layer core-tube sample density
16 p2454 A72-33432

Danckwert liquid film surface layer renewal concept as refinement of Reynolds theory of correlation between convective heat transfer and momentum transfer
17 p2637 A72-35050

Relativistic kinetic theory combined with surface layer theory in curved space-time to study counter-rotating disks with fine central red shift
17 p2582 A72-35389

Temperature anomaly in the superficial layers of rubbing surfaces
17 p2638 A72-35422

Some measurements of the fine structure of large Reynolds number turbulence.
18 p2678 A72-36020

Effect of fluidization on the polarization of reflected light from lunar dust layers.
18 p2729 A72-36987

Spectral characteristics of surface-layer turbulence.
19 p2829 A72-38559

Relation between impurity shear dispersion in the atmospheric ground layer and the turbulence characteristics
19 p2829 A72-38772

Brightness matrix of a flat powdered layer with opaque particles in the single-scattering approximation
19 p2836 A72-38783

Stability of a liquid film in a lateral gas flow and the size of droplets during the breaking of the film
20 p2987 A72-39925

Changes in the wear resistance of polymer surface layers in aggressive and biologically active media
21 p3072 A72-40081

Observation on phenomena associated with a slowly varying surface barrier at niobium oxide and aluminum interface.
21 p3097 A72-40702

Surface effects during high-speed impact of metals
22 p3188 A72-42163

An improved pressure-sphere anemometer.
22 p3178 A72-42596

Interpretation of steady-state surface photovoltage measurements in epitaxial semiconductor layers.
22 p3215 A72-43087

Surface layer grain boundary corrosion damage of Ti alloys during vacuum annealing, reducing rupture strength, vibration resistance and bending fatigue limit
23 p3293 A72-43589

Determination of the optical thickness of polymer fracture surface layers from interference phenomena.
23 p3307 A72-44317

Thermal conductivity of superconducting layer in intermediate stage with Andreev electron excitation trajectories in magnetic field, using Green function and impurity distribution technique
23 p3325 A72-44486

The difference in the plastic deformation of the surface and bulk layers of polycrystalline iron under fatigue loading
23 p3304 A72-44490

Transition of the oxide film on a molybdenum surface from the two-dimensional to the three-dimensional phase
24 p3432 A72-45503

Temperature dependence of destruction threshold of lithium niobate surface under laser irradiation, noting ferroelectric properties effects
24 p3432 A72-45722

Cross section geometry and deformation effects on rods vibration damping, determining surface layer energy absorbing properties for longitudinal and torsional oscillations
24 p3460 A72-45730

Al and Ti alloy fatigue after temperature reduction to 253, 77 and 4 K as function of surface purity after machining
24 p3416 A72-45743

Hydraulic sand blasting and annealing effects on Ti alloy sheet bending fatigue strength
24 p3416 A72-45744

SURFACE NAVIGATION
Lunar Roving Vehicle navigation subsystem power converter design, discussing circuits, performance and voltage regulators and preregulators
01 p0009 A72-11069

Maritime and aerial navigation radio aids, discussing recent technological advances
02 p0258 A72-12750

Tethered flying rotor platform for reconnaissance, fire control and radio transmission assignments in naval missions, discussing system characteristics
04 p0465 A72-15652

Space flight experience application to human factors engineering problems in air and maritime navigation, considering use of small digital computers, display and sensing devices
09 p1348 A72-22785

Lunar roving vehicle reliability program and design features of mobility, electrical power and navigation subsystems
[AIAA PAPER 72-233]
10 p1460 A72-24443

Adaptive multibeam experiment for aeronautical and maritime services /AMEAMS/, discussing NASA ATS-G satellite application to small mobile terminal communications system
12 p1842 A72-27383

Detection range, color, brightness and flash subjective response tests to evaluate light signals for nighttime sea navigation and visual collision avoidance
12 p1777 A72-28326

OMEGA short term range precision for broad ocean area navigation, using four range least squares position solution
13 p1997 A72-29181

OMEGA navigation system in civil maritime application, discussing single frequency, composite, difference and differential configurations and sky wave corrections
13 p1998 A72-29193

OMEGA navigation system operation aboard NOAA ship Discoverer in conjunction with satellite system, noting Trans-Atlantic tracklines
13 p1998 A72-29194

Satellite communications and position finding for ships and aircraft compared with costs and reliability of ionospheric radio communication
15 p2193 A72-31300

Landmark navigation with angle measurements for roving vehicle guidance on lunar and planetary surfaces
15 p2268 A72-31790

Landmark navigation rule, a new navigation device.
19 p2830 A72-37296

OMEGA air and maritime navigation system development, test phase and application potential, discussing operational modes, propagation parameters, solar activity effects and signal loss
19 p2831 A72-37796

Spatial simulator of tactical navigation
19 p2783 A72-37798

Remote control and navigation tests for application to long-range lunar surface exploration.
22 p3203 A72-43131

Utilization of a satellite system for navigation and control of shipping
24 p3422 A72-45224

SURFACE PROPERTIES
NT ADHESION
NT COEFFICIENT OF FRICTION
NT INTERFACIAL TENSION
NT SPECTRAL REFLECTANCE
NT SURFACE CRACKS
NT SURFACE DEFECTS
NT SURFACE ENERGY
NT SURFACE ROUGHNESS
NT SURFACE STABILITY
NT SURFACE TEMPERATURE
NT WALL TEMPERATURE
Unsteady flow about two dimensional airfoils, determining surface pressure fluctuations induced by turbulent boundary layers
01 p0001 A72-10217

Estimation method for surface pressure distribution on cascade airfoil in retarded flow, applying to axial

flow turbomachines design with suction performance and efficiency

01 p0001 A72-10396

Inconel 718 surface integrity from various manufacturing processes, tabulating data on surface finish effects on fatigue, microhardness and metallurgical properties

[SME PAPER IQ 71-239] 01 p0076 A72-10967

Steel and Ti-Al-V alloy surface integrity during various machining methods, considering microstructures, residual stress profiles and fatigue characteristics

[SME PAPER IQ 71-237] 01 p0076 A72-10972

Numerical-integral equation approach to plane wave scattering from nonplanar conducting surface with sinusoidal height profile for magnetic field parallel to surface ridges

[AD-735574] 01 p0032 A72-11237

Digital simulation of general atmospheric circulation via spatial finite difference dense grid, considering surface properties and pressure distribution maps

02 p0252 A72-11652

Airborne remote sensing of earth surface physical properties, using panchromatic and IR black and white, true color and IR false color photography

02 p0208 A72-11782

Surface moisture effect on dielectric properties of ultrafine barium titanate particulates of varying particle size

[ACS PAPER 7-E-69F] 02 p0269 A72-12416

Surface subsidence in semiinfinite resilient elastic solid mass supporting annular load distributed over circular ring

02 p0297 A72-12616

Graphite and molybdenum disulfide surface and lubricating properties, examining basal plane proportion relationship with edge sites

02 p0236 A72-12847

Titanium disilicide oxidation mechanism at various temperatures, discussing surface quality effect, growth rate and protective mechanism

03 p0369 A72-12925

Laminar flame front surface area determination, presenting graphical constructions from generatrix of arbitrary segment number

03 p0455 A72-13099

Minority carriers localized surface distribution effect on helicon propagation modes reflectivity in semiconductor

03 p0402 A72-13797

Alloying elements and grain size effects on thermally induced surface reconstruction of Al film metalization on Si devices from thermal cycling tests

03 p0364 A72-14285

Flexible surface effects on shear stress fluctuations beneath turbulent boundary layer, using fiber optic displacement probe

03 p0343 A72-14324

Light phase curve model for nonatmospheric bodies covered with porous or dust-like surface layer

04 p0574 A72-14910

Ti surface oxide films ionic and electronic conductivity properties and correlation with crevice corrosion susceptibility in contact with polytetrafluoroethylene gaskets

04 p0535 A72-15732

Metal oxide powder surface measurement using modified Kozeny-Karman formula, considering porous space, gas kinetic slip and air permeability effects

05 p0665 A72-16087

Near tip strain criterion validity for ductile crack growth on specimen surface

05 p0673 A72-16307

Surface pressure approximation formula for inclined circular cone in supersonic flow

05 p0603 A72-16547

Contact surface turbulent mixing instability in free piston high enthalpy shock tunnel waves with test air and argon gases

05 p0644 A72-16548

Two dimensional network class port behavior equivalence to three layer structures of linear passive isotropic materials based on depth and surface properties analysis

06 p0793 A72-17595

Earth gravitational potential, including surface density, crystal thickness, potential coefficients, contour maps and spherical harmonic expansion

06 p0877 A72-17657

Surface catalytic properties effect on multicomponent gas hypersonic boundary layer with simultaneous vibrational-dissociative relaxation, considering plate and blunt body laminar boundary layer

06 p0757 A72-18130

Thin film materials and fabrication methods, discussing substrate requirements, surface properties, chemical stability, thermal conductivity and preparation of various resistors and capacitors

06 p0790 A72-18572

Basal plane and edge surface areas measurement in graphite/molybdenum disulfide powders

06 p0837 A72-18601

Graphite and molybdenum disulfide powders lubricating properties relation to surface crystalline orientation

06 p0824 A72-18608

Convective conductance meter for continuous measurement of outdoor exposed surface convection coefficient, using electrically heated plaques with known surface radiation properties

07 p0981 A72-18821

Lunar surface bearing strength vs penetration curves from Surveyor 3 soil sample, comparing with in-situ remote measurements

07 p1067 A72-18873

MOS inversion layer mobility theory and surface charge scattering mechanism

07 p0954 A72-19121

Steady two dimensional laminar compressible boundary layer of reacting gas mixture with surface vaporization and fuel injection, using integral method

07 p0967 A72-19129

Surface and thermal effects on hydrogen oxidation, calculating explosion limits and slow reaction rates

07 p0935 A72-19370

Surface processes effect on hydrogen penetration and diffusion into thick Mo membranes

07 p1014 A72-19772

Boundary value problems in supporting surfaces vibrations theory, constructing Green function from part of differential operator

07 p1093 A72-19984

Exoelectronic emission method for examining deformation induced structural changes and interactions with ambient medium of metals and alloys surfaces

07 p0989 A72-20157

Optical high precision surfaces correction method for laser based reflectors on vacuum vapor differential deposition

07 p1007 A72-20262

Stainless steel saturation with Al and Cr, investigating structure, microhardness, linear expansion and contact surface seizure reduction

07 p1020 A72-20419

Electronic characteristics of real CdS surfaces in room atmosphere and ultrahigh vacuum

07 p1050 A72-20458

Surface structure changes in metal worked by electroerosion, discussing temperature and electrical tension effects

08 p1174 A72-21036

Electron microscopy application to dynamic wear studies of Ni on Ni surface and subsurface topography and microstructure in nitrogen atmosphere

08 p1179 A72-21943

Alkali antimonide photocathodes photoelectric yield /quantum efficiency/ relation to reversible variation of surface potential, noting critical current density temperature dependence

08 p1171 A72-21968

Alloy composition, specimen stressing and surface conditions effects on stress corrosion cracking

08 p1189 A72-22106

Surface current density of perfectly conducting polygonal cylinders for axially polarized incident electromagnetic field

09 p1350 A72-22247

Liquid flow cavitation impact on rotating disk surfaces, showing pitting characteristics dependence on physicochemical properties of specimens

09 p1327 A72-22297

German monograph on model concept for erosion mechanism involved in crystalline material surface bombardment covering particle elastic deformation during impact

09 p1397 A72-22324

Permeable porous plate surface properties effect on boundary layer stability

09 p1293 A72-22408

Phase errors in range finding measurements with radio waves reflection from underlying surface

09 p1277 A72-22481

Transition metal superconducting thin films and rf cavity surface protective coverings, investigating properties by low energy electron diffraction and Auger spectroscopy

09 p1368 A72-22560

Laser induced surface damage probability as function of power density, suggesting electron avalanche breakdown as cause

09 p1324 A72-23083

Metal probe potentials during mechanical displacement along surface of n-region of forward biased Si diode

09 p1288 A72-23362

Laser reflection studies of surface morphology of growing or evaporating crystals

09 p1326 A72-23409

Thermal radiative cooling system characteristics determination, taking into account surface material thermal conductivity and blackness degree dependence on temperature

10 p1561 A72-23840

Electric contact phenomena in ultraclean and specifically contaminated metallic systems, noting resistance relationship to load curves and surface conditions

10 p1448 A72-24172

Selective surfaces and coatings for solar energy conversion systems, discussing semiconductor

photoconverters, white-black surfaces, cooling systems and optimal optical properties

10 p1422 A72-24315

Liquid phase epitaxy GaAs growth in rotary reactors from Ga solution, noting thickness, doping uniformity, reproducibility and surface morphology

10 p1526 A72-24556

Metal adhesive forces to clean Fe surface measured with LEED and Auger emission spectroscopy, noting binding energy correlation to oxygen

10 p1497 A72-24821

Stationary waves properties dependence on weak skin effect in distributed tunnel diode type of nonlinear active transmission lines

10 p1453 A72-24902

Multidimensional formulation of surfaces configuration factor in radiative semidiathermanous absorbing media by change of variable method

[AIAA PAPER 72-275] 11 p1685 A72-25215

Metallic foils effects on thermal joint resistance of interface between lathe turned and optically flat surfaces, noting optimal thickness

[AIAA PAPER 72-283] 11 p1685 A72-25223

Configuration factors for radiative heat transfer analysis with partially occluded surfaces, defining areas by computer technique

[AIAA PAPER 72-304] 11 p1742 A72-25238

Radiative heat transfer spectral, temperature and directional dependence on interacting opaque surfaces system properties, noting models with accounted non-gray character

[AIAA PAPER 72-306] 11 p1742 A72-25240

Surface textures in rolled Al sheets, investigating friction and reduction

11 p1638 A72-25509

Measurement of light pressure-force on Echo 1 satellite based on satellite surface reflection and stellar magnitude as function of phase angle

11 p1718 A72-25939

Surface orientation reconstruction of Apollo 14 lunar rocks from microstereoscopic studies of microcraters, soil covers and glass coatings, determining micrometeoroid erosion

11 p1719 A72-25975

Nose blunting, exposure time and initial temperature effects on axisymmetric bodies ablation surface cross hatching patterns, presenting test results on cones with various vertex angles

11 p1572 A72-26006

Russian book on radar studies of moon covering lunar motion, dimensions, mass, density and surface layer thermal and optical properties

11 p1720 A72-26047

Electrochemical metal precision processing discussing steels carbon content, surface purity, electrolyte anion composition and anode potential

11 p1640 A72-26256

Electrochemical precision metal processing accuracy, analyzing electrode gap size and surface nonuniformities effects on prescribed configuration

11 p1640 A72-26262

Laser induced transparent dielectrics surface fracture mechanism determination based on electron microscopic photograph analysis and disturbed specular reflection under predischARGE conditions study

11 p1648 A72-26333

Spacecraft critical surfaces protection from molecular and particulate contamination sources including gloves, tissues, and covering or packaging materials

12 p1768 A72-27042

Transparent dielectric surface photoelectric emission current under laser pulse illumination, noting correlation to surface treatment and damage threshold

12 p1822 A72-27613

Surface pressure via satellite-borne measurements of atmospheric transmission near absorption band

12 p1802 A72-27710

Sliding dry friction of hard refractory metals and ceramics, discussing surface changes as function of load, sliding speed, temperature and mechanical properties

12 p1817 A72-28184

Clean metallic surfaces adhesion coefficients in vacuum at 77-293 K as function of load, loading time and contact cycles

12 p1818 A72-28193

Surface charge density in thermoplastic recording, showing potential-relief modulation dependence on frequency, scanning rate and electron beam properties

13 p1954 A72-28402

Rigidity of developable surfaces with cylindrical connections and without plane domains, subjected to infinitesimally small bendings

13 p2061 A72-29793

Energy absorption inelastic surface mechanisms effect on I-V characteristics profile for bounded semiconductors with negative differential conductivity

13 p2023 A72-29991

Gas surface interactions models, computing scattering kernels by reduction to boundary value problem

14 p2134 A72-30880

Hydrodynamic and molecular velocity characteristics of rarefied gas motion between infinite plane

parallel emitting and absorbing surfaces, using Boltzmann equation

14 p2096 A72-31025

Lunar topsoil-solid bodies interaction in terms of hardness and friction, discussing simulation equipment

14 p2161 A72-31074

Russian papers on physical chemistry of surface effects in melts covering binary and multicomponent alloys, silicates, oxides and salts at high temperatures

15 p2253 A72-31220

Spacecraft thermal control materials research, discussing surface selection, coatings, space simulation and environmental effects

15 p2260 A72-31806

Absolute intensity LEED spectra for clean Ni surfaces, discussing measurement uncertainties

15 p2276 A72-31854

Photoelectric emission usefulness for investigation of energy parameters and optical transitions of semiconductor surfaces

15 p2276 A72-31865

Edge and surface modification of Nb alloys prior to coating with fused silicide for oxidation life extension

15 p2244 A72-32134

IR internal reflection spectroscopy application to dynamic chemical changes study on ammonium perchlorate surface during thermal decomposition, observing crystal lattice transformation

15 p2296 A72-32313

Stainless steel surface alloy composition characterization as function of vacuum annealing temperature, using proton-induced X rays

15 p2258 A72-32527

Molecular adsorption on semiconducting surfaces, discussing conditions for formation of local surface levels in forbidden gap

15 p2296 A72-32760

Small disturbance behavior in laminar boundary layer on elastic surface experiencing deformation under perturbing pressure, noting surface resilience effect

16 p2377 A72-33164

Physical and chemical surface characteristics investigation methods for fiberglass rovings to consider suitability as reinforcement for synthetic resins

16 p2414 A72-33302

Field-ion microscopy as experimental metallurgical technique for metal surface atomic structure studies, discussing image formation, ionization and field evaporation

16 p2392 A72-33444

Impurities and additives effects on electrode properties in Cs vapor thermionic converter, noting coadsorption model for Cs-W-O surface

17 p2496 A72-34598

Study of the surface reactivity of carbon fibers by gas chromatography

17 p2570 A72-34891

Principle of control of aspherical surfaces by holography and moires

17 p2554 A72-34912

Current and capacitance transient responses of MOS capacitor. I - General theory and applications to initially depleted surface without surface states.

18 p2718 A72-36346

High vacuum technology applications in surface physics research, discussing atomic collisions and adsorption processes

18 p2712 A72-36827

On the intrinsic representation of flows with Lamb surfaces.

18 p2684 A72-37085

A critical examination of the validity of simplified models for radiant heat transfer analysis.

19 p2882 A72-38399

Effect of surface heterogeneity on the adsorptive behavior of of orbiting pressure gages.

19 p2869 A72-38752

The use of an electrical induction method for determining the physical condition of a ground steel surface.

19 p2805 A72-38762

The influence of the surface orientation on yield in Mo single crystals.

20 p2935 A72-39007

Surface tilt and vibration measurements by laser speckle pattern photography, comparing with moire fringes in strain analysis

20 p2930 A72-39032

Thermal emissivity and directivity for V groove and rectangular cavities, optimizing geometry and surface properties for maximum focusing of emitted energy [ASME PAPER 72-HT-L]

20 p2984 A72-39651

Mathematical models for radiative heat transfer prediction in real enclosures, noting directional characteristics of heat exchanging surfaces

20 p2984 A72-39652

Calculation of the surface properties of elastic polymer molecules in athermal solutions by the Guggenheim method

21 p3095 A72-40078

A method for directly determining surface strain fields using diffraction gratings.

21 p3052 A72-40236

A measurement of the surface strain distribution by optical differentiation method.

21 p3056 A72-41239

Spherical focusing transducers with Gaussian surface velocity distribution.

21 p3057 A72-41477

Directional far IR emission from sunlit lunar surface, determining brightness temperature as function of observer and sun elevation angles and surface parameters

22 p3226 A72-42537

Study of the flow kinetics of metal melt spread over hard surfaces

23 p3293 A72-43284

The topology of the regularized integral surfaces of the 3-body problem.

23 p3309 A72-43982

Full-range solution for the measurement of thin-film surface densities with proton-excited X rays.

24 p3431 A72-44715

SURFACE REACTIONS

Ni-Cr-Al alloys high temperature oxidation, detailing surface reactions and continuous oxide layer formation

[ECS PAPER 114] 01 p0082 A72-10172

Vapor bubble growth on heated surface with random temperature distribution and liquid microfilm for water and boiling potassium

02 p0303 A72-12862

Structural inhomogeneities effect on fatigue phenomenon in rolling motion, discussing stress cycles preceding active surface degradation

04 p0526 A72-14473

Low energy He ion bombardment effects on Ni alloy single crystal surface, observing defect structure with stacking faults, tangled dislocations and carbide precipitation

04 p0533 A72-15159

X ray spectral analysis of microchemical changes in surface films of titanium alloys during diffusive interaction with silicon carbide abrasive

04 p0534 A72-15654

Knudsen boundary layer role in physicochemical hydrodynamics of heterogeneous reactions and flows with surface reactions, using Boltzmann equation

05 p0746 A72-16209

Burning gunpowder surface reactions relative to temperature, chemical enthalpy and acoustic waves of pressure, velocity and density

05 p0751 A72-17211

Zinc dithiophosphate and bisphenol effects on surface activation of additive compositions with succinimide base in lubricant applications

07 p1023 A72-19903

Neutral monatomic rarefied gas-surface interaction at energy levels 0.1-10 eV, using Boltzmann equation

07 p0969 A72-20061

Temperature fields and mass and heat transfer at surface of solid spherical particle in laminar viscous fluid flow

07 p0973 A72-20318

Thickening properties of butoxyacrosol products of butyl alcohol vapor and silicon dioxide surface reactions for use as oil lubricant additives

09 p1336 A72-22500

Vibrating membrane generated acoustic pressure wave propagation in rarefied gas, applying to solid surface-gas interaction models

09 p1294 A72-22762

Small scale flow and surface effects in multiphase media hydromechanics, obtaining entropy production in mixture for interphase transformations characterization

10 p1468 A72-24430

Surface ignition behavior of M2 double base propellant, analyzing reaction kinetics

10 p1528 A72-25142

Surface patterns from ablating, melting and flowing materials in supersonic flow of wind tunnel, rocket motor and flight test environments, comparing with theory

11 p1743 A72-25247

Burning gunpowder surface reactions relative to temperature, chemical enthalpy and acoustic waves of pressure, velocity and density

11 p1744 A72-25337

Chemical surface treatment effects on mechanically gripped fiberglass rods tensile strength

11 p1674 A72-25827

Surface reaction mechanisms analysis in adhesion, friction, wear and lubrication, using electron diffraction, Auger spectroscopy and ellipsometry techniques

12 p1813 A72-27036

Solid surface inspection by X ray diffraction, electron microscopy and chemical techniques

14 p2131 A72-30693

Hexagonal and cubic boron nitride surface wetting by liquid metals as function of contact interaction and chemical affinity

15 p2253 A72-31224

Surface phonon appearance criteria associated with crystal surface gas adsorption, discussing entropy variation and colliding particle-crystal energy exchange

15 p2280 A72-31858

Clean Ge crystal surface oxidation process investigation by LEED and conductivity measurements

15 p2292 A72-31868

Study of the surface reactivity of carbon fibers by gas chromatography

17 p2570 A72-34891

Contribution to the study of flows with surface chemical reactions in the boundary layer

17 p2541 A72-35455

Tribological properties of gold for electric contacts.

18 p2693 A72-35980

Contact contamination - Formation of carbonaceous deposits on electrical contacts.

18 p2665 A72-36119

Energetic and topological effects in surface chemical reactions, considering intermolecular dispersion and dipole forces and chemisorption

18 p2657 A72-36828

Space and upper atmosphere environmental effects on spacecraft and instrument surfaces, considering high energy particle radiation, interstellar and lunar dust effects, etc

18 p2712 A72-36832

Anisotropy of angular distribution of radiation due to positron annihilation on the surface of Mo single crystals.

19 p2844 A72-37691

Recombination of hydrogen atoms on the surfaces of solid bodies

19 p2838 A72-38199

High and ultrahigh vacuum equipment and components selection, discussing gas-surface interactions, contamination and cleaning problems

19 p2835 A72-38391

Condensation on a downward-facing horizontal rippled surface.

[ASME PAPER 72-HT-33] 20 p2983 A72-39485

The relationship between the thick film conductor and substrate and its influence on conductor properties.

20 p2908 A72-39494

Saturated liquid film boiling on vertical surface, calculating local heat transfer rates as function of height and superheat from turbulent vapor flow model [ASME PAPER 72-HT-38]

20 p2986 A72-39668

Surface reactions in similar boundary layers.

20 p2915 A72-40014

Russian book - Macromolecules at the boundary between phases.

21 p3071 A72-40077

Polymer adsorption as a cause of changes in contact interaction intensity between two solid surfaces

21 p3059 A72-40083

Laser-induced damage in transparent dielectrics - The relationship between surface damage and surface plasmas.

21 p3062 A72-40241

Spectroscopic study of the interaction of oxides with metallic surfaces. II - SiO₂-Fe /Cu, Al, Ni, Co, Ti, W/ systems

22 p3189 A72-42197

Photoemission from surface states on tungsten.

22 p3190 A72-42478

Crystalline solids surfaces with catalysis, electronics and corrosive reactions, discussing slow electron diffraction, ionic field microscopy and Auger spectroscopy techniques for surface cleanliness measurement

23 p3324 A72-44461

MOS devices instability caused by water and hydroxyl molecules on silicon dioxide surface, noting optimal conditions for chemical stabilization

24 p3431 A72-44821

Oxidation of W/110/. I - LEED study of the oxide formation at 1000 K.

24 p3378 A72-44952

Mass spectra stimulated by O⁺ and Ar⁺ interacting with a surface.

24 p3378 A72-45312

Pulsating conditions in the evaporation of optical materials under the influence of CO₂ laser radiation.

24 p3411 A72-45610

SURFACE ROUGHNESS

Fresnel diffraction on opaque half plane screens with statistically rough surfaces, using Kirchhoff approximation

02 p0183 A72-12755

Impulsive spatial interaction model between monoenergetic molecular beam and rough isotropic rigid metal surface in free molecule flow

03 p0392 A72-14058

Free molecular flow heat transfer to rough surface, discussing surface/molecule interaction model for digital simulation

[ASME PAPER 71-WA/HT-8] 05 p0743 A72-15868

Turbulent flow in smooth and rough pipes at Reynolds numbers 30,000-480,000, presenting velocity mean and fluctuating components rms and cross correlation values

[ASME PAPER 71-WA/FE-7] 05 p0647 A72-15935

Critique on condition for planar antennas physical reliability, concerning smoothness of aperture edges

06 p0782 A72-17362

Diversity reception during radio wave scattering on statistically uneven surface, using geometrical optics method

07 p0944 A72-19566

Technological characterization of electric discharge machines by metal removal rate, volumetric electrode wastage and machined surface roughness

08 p1174 A72-21031

Sea surface roughness mapping by airborne microwave radiometry with correction for viewing angle and atmospheric effects

09 p1297 A72-22525

Aeolian transport and surface roughness of Mars Hellas basin, using Mariner 1969 photographs

10 p1536 A72-24151

Fresnel diffraction on opaque absorbing screen half planes with small rough surfaces, deriving field attenuation factor and structure/correlation functions

10 p1435 A72-24502

Rough surfaces thermal contact resistance in vacuum for normal height distribution, discussing bolted joint nonuniform stress distribution effect

11 p1741 A72-25221

Reflecting surface roughness measurement by holographic interferometry, applying to lapped steel specimens

11 p1629 A72-25309

Sintered Mo diffusion weld strength dependence on contact surface flatness and smoothness

11 p1644 A72-26847

Lunar surface roughness mapping by combined IR and radar measurements

12 p1869 A72-27328

Lunar surface roughness thermal characteristics, comparing IR data with three realistic models

12 p1870 A72-27335

Hertz formulas for undulate solid surface height distribution

12 p1819 A72-28196

Conjunction mechanism of two real contacting bodies with rough surfaces under normal load

12 p1819 A72-28202

Full wave analysis of radio wave propagation over rough surfaces characterized by variable impedance and height parameters

13 p1916 A72-28539

Leading angle effects on cutting force components, temperature and surface roughness in drawing of Ti alloys

13 p1963 A72-28746

Turbulent diffusion limiting flux variation with angular rotation velocity of rough rotating disk

15 p2217 A72-31676

Rough surface elastic bodies stress calculation, using asymptotic method of boundary conditions

15 p2327 A72-31736

Deep drawing of circular mild steel and aluminum sheets with polyurethane or rubber rings, examining strain distribution, shape and surface roughness

15 p2244 A72-32145

Heat transfer and friction coefficients for turbulent flow in rough tubes as function of Reynolds and Prandtl number, using von Karman method

16 p2478 A72-33513

The response of a turbulent boundary layer to a step change in surface roughness. II - Rough-to-smooth.

17 p2540 A72-35191

Effect of a distributed sand roughness on the spectrum of wall pressure pulsations in a turbulent flow in a tube

17 p2541 A72-35542

Correlation of noise-like emission reflected from a statistically uneven surface

17 p2583 A72-35543

Comments on the figure of the moon based on preliminary results from laser altimetry

18 p2774 A72-36280

Adhesive wear theoretical model based on asperity interactions number, area and volume, considering implications for friction and surface temperature analysis

19 p2809 A72-38377

Energy characteristics of radio signals scattered by statistically uneven surface, proposing statistical variables substitution

20 p2900 A72-38892

Fresnel diffraction on opaque half plane screens with statistically rough surfaces, using Kirchhoff approximation

20 p2902 A72-39061

Turbulence theory generalization for flow near wall with various surface roughness modes, presenting velocity profiles

20 p2912 A72-39359

Measurements of Reynolds shear stress fluctuations in a turbulent boundary layer.

21 p3047 A72-41638

Diversity reception during radio wave scattering on statistically uneven surface, using geometrical optics method

22 p3153 A72-42084

Influence of the degree of strain-hardening and roughness of friction surfaces on wear rate and carrying capacity

22 p3183 A72-43157

Phase correlation between two sources formed on a diffusing surface - Application to the human retina

23 p3261 A72-44379

Turbulent boundary layer calculation behind surface cusp, taking into account external flow turbulence and thermal stratification

24 p3390 A72-45008

SURFACE ROUGHNESS EFFECTS

Earth surface roughness effects on vertical Hertz dipole electromagnetic field reflection

01 p0027 A72-10447

Momentum exchange coefficient for surface layer neutrally stable flow after surface roughness change, noting error possibility in flow estimates for heterogeneous terrain

01 p0094 A72-10827

Electromagnetic wave scattering from rough surfaces by Kirchhoff approach and small perturbation method, discussing validity near grazing angle

01 p0032 A72-11249

Bidirectional scattering of electromagnetic waves from rough surfaces in plane of incidence restricted only by tangent plane approximation, comparing with other models

02 p0170 A72-11467

Cross flow through in-line tube bank, investigating surface roughness effects on behavior by pressure drop, static pressure and skin friction distributions measurements

02 p0203 A72-12102

Fine scale surface oxide film roughness effects on metal substrate-oxide film system hemispherical emittance

02 p0303 A72-12319

Acoustic attenuation calculation for turbulent flow in rigid tubes, determining critical flow velocity dependence on wall roughness and sound wave frequency

03 p0340 A72-12954

Digital computer simulation of rarefied gas molecular beam-rough metal surface interaction

03 p0392 A72-14057

Conductive heat transfer from rib roughened surfaces in gas cooled reactor fuel elements

04 p0595 A72-14596

Full wave solution for vertically polarized radio wave propagation over rough variable impedance surface by Fourier transform

04 p0492 A72-15437

X ray spectral analysis of microchemical changes in surface films of titanium alloys during diffusive interaction with silicon carbide abrasive

04 p0534 A72-15654

Brightness temperatures and directionality of IR emission from rough lunar surface of crater field

05 p0714 A72-16104

Equilibrium temperature distribution on radiatively adiabatic smooth and rough planes uniformly irradiated by collimated solar flux

05 p0749 A72-16876

Electromagnetic wave scattering from curved rough surfaces and transmission through turbulent medium, obtaining solution by spatial Fourier transform of three transfer functions product

06 p0771 A72-17340

Surface roughness effect on TEM mode propagation, discussing perturbation and Bessel series methods

06 p0774 A72-17738

Increased Reynolds number simulation with roughness set on aircraft model in transonic flow, investigating flow separation by parietal visualization technique

06 p0758 A72-17846

Rough surfaces with orthogonal parallel V grooves, studying shadowing, interreflection and masking effects on bidirectional reflectance from He-Ne laser illumination

06 p0848 A72-17924

Lunar surface temperature-independent and dependent plane homogeneous models for thermal properties study, discussing surface roughness and localized thermal anomalies

06 p0887 A72-18227

Molybdenum disulfide lubricating effectiveness improvement with finer particles at aggravated sliding conditions, suggesting surface roughness qualifications

06 p0837 A72-18605

Surface relief effect on radiative properties of solid body with random surface roughness distribution

07 p1098 A72-18934

Geostrophic drag coefficient for heterogeneous terrain as function of effective roughness length, considering surface friction effects in large scale atmospheric models

07 p1030 A72-19108

Air flow turbulent behavior and dynamic characteristics dependence on underlying surface roughness variations

07 p1031 A72-20695

Brightness distribution and phase dependence measured for spheres with different colors and roughness for Mars surface optical parameters model validity

08 p1238 A72-21830

Fluid sealing theory based on surface tension effects at roughness asperities within seal film

08 p1177 A72-21928

Spectrum shape of Doppler radar return from two dimensional random rough surface model using helmholtz integral approach and Kirchhoff approximation

09 p1277 A72-22314

German monograph on tire rubber friction on dry and wet rough surfaces, taking into account loading, velocity and temperature effects

09 p1332 A72-22323

Runway unevenness and landing gear characteristics effects on SST vibration during taxiing, taking off and landing

09 p1263 A72-23459

Forced convection heat transfer for turbulent flow over flat surface with attached protrusion for varying Reynolds number and boundary layer thickness

10 p1561 A72-23882

Asymmetric flow in plane channel characterized by diffusional transport of turbulent shear stress and kinetic energy from rough to smooth wall regions

10 p1467 A72-24368

Rough surface effects on EM reflection for electromagnetic probing in geophysics, using Rayleigh and Kirchhoff methods

10 p1512 A72-24738

Radio propagation over slightly roughened curved earth surface, using perturbation method and Taylor series in model calculation

10 p1439 A72-24743

Average electric field and power density of electromagnetic wave scattered from rough layer with plane interface, calculating scattering cross sections

10 p1512 A72-24744

Bolted joint thermal conductance, considering interfacial pressure distribution and surface roughness effects

11 p1741 A72-25222

Anomalous refraction maxima in bidirectional plane polarized radiant flux transmittance of roughened dielectric surfaces

11 p1742 A72-25236

Radiative transfer theory for passage wall surface roughness effects on light transmission and reflection

11 p1742 A72-25237

Roughness effects on radiant heat transfer between interacting surfaces based on Beckman reflectance model

11 p1742 A72-25238

Bidirectional reflectance from randomly rough engineering surfaces, using photographic technique

11 p1742 A72-25242

Lunar surface roughness effect on temperature distribution, noting solar elevation and observation angle dependence

11 p1715 A72-25244

Four stage gas turbine, measuring blade surface roughness and profile changes effects on flow characteristics and efficiency

11 p1704 A72-25630

Turbocompressor deceleration cascades blades surface roughness effects on boundary layer, noting pressure and velocity distributions

11 p1570 A72-25640

Surface roughness effects on air flow in turbulent atmospheric boundary layer, using finite difference method

12 p1838 A72-27026

Ge field effect dependence on surface roughness and finishing, noting relief elements dimensions ratio and orientation to current flow direction

12 p1855 A72-27859

Deep groove ball bearing endurance tests to determine running conditions and lubricant film thickness/surface roughness ratio effects on fatigue life

12 p1816 A72-28112

Molecular-mechanical theory of external friction, taking into account surface roughness, time and temperature dependent mechanical properties and chemical processes

12 p1818 A72-28195

Surface roughness effects on seizure and friction of contacting metal plates under atmospheric pressure and vacuum

12 p1819 A72-28197

Surface finishing effects on steel sensitivity to stress concentration under variable loads, emphasizing diamond smoothing and roller technique

12 p1831 A72-28246

High angular resolution optical system to measure light reflection from rough surfaces

13 p2002 A72-28513

Ultrasonic signal propagation with distance along steel sphere surface compared with lunar seismic signal, discussing surface dent and lunar crater effects

13 p2035 A72-28619

Internal rarefied gas flow, taking into account molecular backscattering due to wall surface roughness

13 p1942 A72-29117

Surface roughness effects on Mars photometric properties for scattering in terms of Minnaert law
15 p2311 A72-32085

Lunik 14 spacecraft radio signal reflection from lunar surface, showing energy spectrum dependence on surface roughness
15 p2202 A72-32655

German monograph on surface roughness effects on pressure loss and heat transfer in high temperature turbulent flow, deriving universal laws
16 p2478 A72-33506

Mechanism by which a two-dimensional roughness element induces boundary-layer transition.
17 p2542 A72-35611

Shadowing function calculation as rough surface point illumination probability by point source radiation, assuming surface elevation as random process
18 p2710 A72-36407

Behavior of boundary layers on rough compressor blades
18 p2641 A72-36420

Sea surface albedo for short wave solar radiation in terms of sun altitude and atmospheric transmittance, noting wind and surface roughness effects
18 p2687 A72-36642

Rotational theory of laminar boundary layer separation of incompressible fluid from smooth surface under pressure gradients
18 p2682 A72-36887

Investigation of the influence of surface treatment purity and procedure on the strength of the Kh18N10T and Kh16N6 steels and the AMG6 alloy at normal and low temperatures
19 p2819 A72-38016

Influence of roughness on the thermal radiation emitted by opaque surfaces - Model test
19 p2881 A72-38393

Atmospheric flow turbulent behavior and dynamic characteristics dependence on underlying surface roughness variations
20 p2948 A72-39010

Turbulent boundary layer calculation, investigating surface roughness, pressure gradient and surface temperature effects
20 p2912 A72-39365

Intensity of turbulence within canopies with simple and complex roughness elements.
20 p2948 A72-39798

IR reflectance [or emittance] remote spectroscopy of mineral particulate surfaces, discussing particle size, surface roughness, porosity and mixing ratios effects
22 p3178 A72-42526

Wind profile development above a locally adjusted sea surface.
22 p3202 A72-42600

Initial electron velocity and emitter surface roughness effects on oscillatory velocities dispersion in helical electron beams used in cyclotron resonance masers
22 p3208 A72-42664

Sunlight scattering by double reflection on rough and absorbing surfaces, deriving fractional circular polarization from models for comparison with observation
23 p3334 A72-43254

Study of the dependence of the spectral and integral radiation properties of bodies on the surface roughness.
23 p3357 A72-44538

Investigation of the dependence of the smoothness of rectilinear motion in precision-equipment mechanisms on the form of the microrelief of contacting surfaces
24 p3403 A72-45325

The effect of the subsurface on the depolarization of rough-surface backscatter.
24 p3380 A72-45635

Determination of the reflecting power of a hilly terrain, knowing the reflective power of a flat terrain of the same nature
24 p3381 A72-45769

SURFACE STABILITY
Physical processes of fluids atomization in electric field, discussing droplet surface instability and boundary values of surface tension coefficient
05 p0667 A72-17185

Numerical solution of disintegration and surface stability of gas bubbles under nonspherical free oscillation
08 p1149 A72-21295

Certain class of solutions of the three-dimensional problem for a rigid perfectly plastic material with a family of momentarily inextensible planes
21 p3123 A72-41392

SURFACE TEMPERATURE
NT WALL TEMPERATURE
Infinite slab, cylindrical or spherical shells with nonuniform heat generation sources and equal surface temperatures, obtaining maximum internal temperature from error bounds
01 p0145 A72-10511

Electron work function and electrode physicochemical properties and surface temperature on boundary layer formation and thickness at electrodes in MHD channel
01 p0009 A72-11206

Remote sensing of surface radiation temperature topographic variations by precision radiation thermometer equipped aircraft, calibrating for atmospheric attenuation
02 p0210 A72-11803

Automated operational procedure for sea surface temperature determination from ITOS IR data, discussing error analysis
02 p0211 A72-11810

Synoptic sea surface temperature mapping off Eastern United States using NASA ITOS satellite IR imagery data
02 p0211 A72-11813

Surface temperature measurement by microwave radiometry, noting sensitivity reduction due to moisture effects for resolution cell size targets
02 p0214 A72-11867

Soil surface moisture content and temperature profile determination by remote microwave sensing
02 p0214 A72-11871

Graphite surface temperature and ablation rate for various stagnation pressures, radiative heat fluxes, stagnation enthalpies, heat transfer coefficients and test gas compositions
02 p0249 A72-12021

Boron-containing polymer heterogeneous combustion determination using hybrid regression rate with thermal degradation and surface temperature data
02 p0270 A72-12260

Locally nonsimilar solutions for thermal boundary layer, presenting surface heat transfer and temperature distribution
02 p0302 A72-12313

Thermal simulator of flows with chemical wall reaction, plotting surface temperature variations with distance
03 p0456 A72-13793

Thermal stresses from inner surface temperature of micropolar hollow cylinder in static thermoelasticity problem with vanishing body loads
03 p0448 A72-13889

Unsteady thermal conductivity inverse problems, obtaining heated body surface temperature and heat flux from temperature measurement in interior
03 p0458 A72-14164

Cloud interference-free sea surface temperatures, using techniques to reduce noise effect in Nimbus IR radiometer data
03 p0385 A72-14227

Dry spot formation in nonboiling ethanol thin film on horizontal surface heated from below
04 p0595 A72-14597

Heat conduction model of surface thermal history of moon as function of dust, anorthosite, basalt and dunite layers
04 p0571 A72-14598

Steady heat conduction plane problem solution for infinitely long cylinder with constant surface thermal flux density and temperature
04 p0595 A72-14644

Equilibrium temperature formula derived for surface subjected to aerodynamic heating by gas from heat balance between convective and radiative heat flow
04 p0595 A72-14651

Thermal laminar boundary layer equations solution for power-law velocity distribution in external flow and arbitrary surface temperature distribution
05 p0742 A72-15844

Environmental effects on superalloy high temperature corrosion in gas turbines, noting blade surface temperature as critical factor
05 p0704 A72-15945

Nighttime ground surface temperature prediction by net flux radiometer
05 p0684 A72-16792

Satellite surface temperature measurements changes due to atmospheric specific humidity, noting increase in water vapor absorption coefficient with content
06 p0806 A72-17671

Nimonic 75 sliding pin and rotating disk frictional force, wear rate and surface temperature
06 p0830 A72-18156

Hg vapor condensation on cooled vertical steel cylinder at 70-185 C, considering heat flux relation to saturated vapor/cooling surface temperature difference
06 p0903 A72-18190

Nonlinearly radiating semiinfinite heat conducting solid surface temperature, expressing heating rate as nonnegative integrable function of time
07 p1098 A72-18814

High intensity laser beams for solid surface material removal by vaporization and explosion, noting surface and subsurface temperature relations
07 p1002 A72-19210

SURFACE TEMPERATURE
Friction coefficient, standard wear and surface layer temperature of seal for dry friction pairs in jet engines, investigating crystal lattice parameters
07 p0996 A72-19768

Plate surface temperature during aerodynamic heating in supersonic gas flow, using linearized Pohlhausen method
07 p0909 A72-19891

Integral contact temperatures and heat balance calculation for heat transfer between contacting bodies with rotational motions
08 p1252 A72-21444

Free convection and hydrodynamics of inclined liquid layers in laminar flow and in stepwise change of heat exchange surfaces temperature
08 p1151 A72-21663

Micropolar thermoelasticity steady state axisymmetric problem solution from equilibrium equations, considering uniform surface temperature and surface heat doublet cases
09 p1403 A72-22749

Radiant heat flux measurement during pulsed processes from surface in high temperature emitting gas, using thin film sensor with small time constant
10 p1561 A72-23843

Viking Mars Orbiter IR thermal mapper (IRTM)/to study surface kinetic temperature, thermal balance, anomalous cooling regions, ground frosts and water vapor
10 p1539 A72-24379

Plasma coating formation mechanisms and parameters, studying metal surface and deposited particles temperatures, spraying time effects, etc
10 p1487 A72-24488

Tropical hurricane model describing initial whirlwind and self exciting wind velocity development and dependence on ocean surface temperature
11 p1682 A72-26879

Overlap emissivity of atmospheric carbon dioxide and water vapor for computer simulated earth surface temperature calculations
11 p1628 A72-26986

Papers on thermal characteristics of moon covering earth based and in situ surface temperature measurements, radar mapping, heat flow experiments, etc
12 p1869 A72-27326

Apollo 11 EASEP nickel resistance thermometer lunar surface data, presenting unshadowed equivalent brightness temperature and thermal parameters and emission directional dependence
12 p1869 A72-27330

Ice formation on helicopter rotor blades, discussing atmospheric moisture and temperature conditions, blade surface temperature, centrifugal and aerodynamic forces and preventive measures
12 p1754 A72-27414

Life on Mars, investigating ground based and probe observations of atmospheric composition and pressure, surface temperature and features and UV radiation
12 p1761 A72-27624

Conductive heat propagation with finite rate for semibound solid body under periodic surface temperature fluctuations dependent on relaxation time
12 p1890 A72-28174

Surface temperature distribution for porous plate in supersonic flow with gas injection into turbulent boundary layer
13 p1893 A72-28917

Aircraft or helicopter-borne IR radiometer for surface temperature of snow covers and glaciers and air-snow energy balance measurements
15 p2232 A72-31244

Thermal laminar boundary layer equations solution for power-law velocity distribution in external flow and arbitrary surface temperature distribution
15 p2334 A72-31263

Unipolar steady electromagnetic bow shock interaction of Mercury with solar wind, calculating planetary surface temperature
15 p2303 A72-31305

German monograph on heat transfer and stability limits for boiling and nonboiling falling films covering surface and bubble boiling conditions
15 p2334 A72-31503

Sea surface temperature determination on Nimbus 2 satellite, using three channels in medium resolution IR radiometer
15 p2224 A72-31674

High speed photographic pyrometer for surface temperature measurements on aerodynamic models during free flight in aeroballistic range
15 p2237 A72-32050

Thermal history and early magmatism for lunar models, considering high near-surface temperatures and radionuclides upward transport during melting
15 p2311 A72-32082

Graphite ablation rate inhibition and surface temperature depression by chlorine gas in supersonic high temperature air environment
16 p2475 A72-32842

Plate surface temperature during aerodynamic heating in supersonic gas flow, using linearized Pohlhausen method
17 p2485 A72-35139

- Temperature anomaly in the superficial layers of rubbing surfaces 17 p2638 A72-35422
- Distortion of the semi-infinite solid due to transient surface heating. 17 p2635 A72-35974
- Calculation of thermal fluxes and temperatures on the surfaces of a plate in the presence of heat exchange between fluids incident on the surfaces 18 p2742 A72-37183
- S-band radiometer design for high absolute precision measurement. 19 p2794 A72-37252
- Erosion combustion effect on unsteady solid rocket propellant burning stability during engine nozzle opening, noting combustion velocity and surface temperature 19 p2879 A72-37353
- Steady combustion thermal stability of condensed explosives for burning rate limitation by condensed phase chemical reactions, noting surface temperature effects 19 p2879 A72-37356
- Influence of the earth's outgoing radiation on the temperature of a rotating disk in space 19 p2856 A72-37496
- Thermoprobe - An instrument for determining the temperature of opaque, translucent, and transparent surfaces in the incandescent temperature range. 19 p2795 A72-37513
- Thermally controlled entry guidance for shuttle. [AIAA PAPER 72-831] 20 p2951 A72-39096
- Turbulent boundary layer calculation, investigating surface roughness, pressure gradient and surface temperature effects 20 p2912 A72-39365
- The effect of thermal conductivity and base-temperature depression on fin effectiveness. 20 p2983 A72-39489
- An analysis of the spectral scanning technique for determining the temperature distribution in a semi-transparent medium. [ASME PAPER 72-HT-6] 20 p2986 A72-39677
- Film cooling effect on surface heat transfer in laminarizing mainstream turbulent boundary layer for injection through flush angled two dimensional slots [ASME PAPER 72-HT-11] 20 p2986 A72-39682
- Remote sensing of urban 'heat islands' from an environmental satellite. 20 p2919 A72-39717
- Allowance for the ocean surface temperature in monthly weather forecasts for the Northern Atlantic Ocean 20 p2949 A72-39946
- Numerical and asymptotic methods for solving the problem of complete boundary-layer stabilization 21 p3047 A72-41659
- German monograph - Cooling of geometrically simple bodies (flat plate, cylinder, sphere) by convection and radiation. 22 p3244 A72-43062

SURFACE TENSION

U INTERFACIAL TENSION

SURFACE TO AIR MISSILES

- Miss distance simulation for SAM guided by proportional navigation, using ASIM programming language for digital computer 03 p0386 A72-13611
- Missile systems of U.S., U.S.S.R. and other nations, discussing ground-to-ground, ground-to-air, air-to-ground and air-to-air missiles 05 p0728 A72-16740
- SAM-D control test vehicle trajectory planning and flight test analysis. 24 p3451 A72-45338

SURFACE TO SURFACE MISSILES

- NT ANTITANK MISSILES
- NT INTERCONTINENTAL BALLISTIC MISSILES
- NT INTERMEDIATE RANGE BALLISTIC MISSILES
- NT MINUTEMAN ICBM
- NT POLARIS MISSILES
- NT POSEIDON MISSILES
- Missile systems of U.S., U.S.S.R. and other nations, discussing ground-to-ground, ground-to-air, air-to-ground and air-to-air missiles 05 p0728 A72-16740
- Harpoon air-sea/sea-sea all-weather missile system, describing two phase guidance system based on inertial platform initial phase and radar terminal guidance 07 p1085 A72-20312

SURFACE TREATMENT

U SURFACE FINISHING

SURFACE VEHICLES

- NT AIRCRAFT CARRIERS
- NT AUTOMOBILES
- NT LIFEBOATS
- NT LUNAR ROVING VEHICLES
- NT LUNAR SURFACE VEHICLES
- NT MANNED LUNAR SURFACE VEHICLES
- NT ROCKET PROPELLED SLEDS
- NT ROVING VEHICLES
- NT SLEDS
- NT TANKER SHIPS
- NT WALKING MACHINES

- Zener diode transient suppressors with electronic thermal switch for ground vehicle and aircraft applications [AD-741529] 05 p0637 A72-16553
- Analog dynamic model of tracked air cushion vehicle for high speed ground transportation systems 13 p1896 A72-28704
- Twin-turboprop transport aircraft, helicopter and all-terrain ground vehicle simulators, discussing control load, visual attachment, cabin motion and sound subsystems 14 p2092 A72-30845
- Landmark navigation with angle measurements for roving vehicle guidance on lunar and planetary surfaces 15 p2268 A72-31790
- Arctic environment surface effect vehicle design, considering structures, drag, lift, propulsive power and range 15 p2181 A72-32125

SURFACE WAVES

- NT BAROCLINIC WAVES
- NT CAPILLARY WAVES
- NT GRAVITY WAVES
- NT SOMMERFELD WAVES
- MHD boundary waves properties, noting application to traveling wave nonreciprocal devices and planar structures based on microwave integrated circuits 01 p0029 A72-10703
- Equivalent circuit model for electroacoustic surface microwave transducer, discussing radiation properties determination from excitation fields distribution 01 p0041 A72-10704
- Characteristic equation of surface wave propagation on two dimensional corrugated structures for phased array applications 01 p0030 A72-10845
- Nonreciprocal guiding devices for electromagnetic surface waves, noting large bandwidth and non-rectilinear polarization of alternating magnetic field 01 p0044 A72-11323
- Orbiting lunar spacecraft Endeavor radio transmission postoculation reception, considering surface wave propagation and mountain formation prismatic refraction 02 p0171 A72-11753
- Quasi-static surface waves at Maxwellian plasma boundary with diffuse electron scattering, considering plasma electromagnetic oscillations 02 p0266 A72-12577
- Apodized interdigital transducers acoustic surface wave front distortion, describing perturbation and compensation method 03 p0360 A72-13602
- Tangential stress pulse effects on transversally isotropic half space surface wave motion under torsion 03 p0452 A72-14128
- Nonlinear surface wave propagation on pinched cylindrical plasma, developing asymptotic approach from L undquist equations 04 p0559 A72-15348
- Two dimensional axisymmetric surface waves motion in inviscid incompressible homogeneous electrically conducting fluid under uniform magnetic and electric fields, considering surface tension effects 04 p0560 A72-15744
- Spontaneous oscillations generation on transverse surface wave, discussing experimental realization with semiconducting CdS single crystals 05 p0626 A72-16282
- Transverse acoustoelectric surface wave domain in piezo-semiconducting body, obtaining gain coefficient and generation threshold criterion 05 p0702 A72-16283
- Surface wave parametric signal processing, obtaining cross correlation of digitally coded input signals 05 p0631 A72-17074
- Cracks interactions with transversal and surface elastic waves, relating crack propagation threshold conditions to critical pulse duration 06 p0893 A72-17419
- Light intensity distribution from ultrasonic surface waves reflection to probe surface acoustic propagation characteristics 06 p0848 A72-17851
- Log-periodic interdigital transducer design to obtain wide bandwidth for acoustic surface waves 06 p0784 A72-18241
- Weighted acoustic surface wave dispersive microwave filter apodized interdigital array design modification for phase error correction to reduce distortion 06 p0787 A72-18380
- Nonlinear self excited oscillations in uniformly distributed oscillators interacting with traveling transverse or surface waves of elastic body 06 p0849 A72-18698
- Corrugated surface wave antenna design with low sidelobe level radiation pattern, finding relief modulated impedance parameters 07 p0955 A72-19514

- Love surface wave excitation in thin film layer by line source as function of propagation direction, frequency and film thickness 07 p1089 A72-19683
- Laser probes for acoustic surface wave amplitude and phase measurements 07 p1008 A72-20385
- Phased directional surface wave splitters and microwave and integrated optics elements based on single mode, dielectric and rectangular waveguides 08 p1131 A72-20935
- Linear inverse problem of coefficient matrix eigenvectors, implying surface waves and free oscillations for earth structure 08 p1159 A72-21495
- Electromagnetic wave propagation along open rectangular dielectric waveguide, deriving dispersion equations for surface waves propagation constants 08 p1136 A72-21739
- Rayleigh type transverse surface wave existence in continuous elastic body with nonlocal interaction 09 p1403 A72-22748
- Dielectric permeability tensor operator for surface wave-electron beam interaction in relativistic nonuniform plasma stream with cylindrical geometry 09 p1359 A72-22769
- Interdigital acoustic surface wave transducer immittance characteristics calculation from equivalent circuit, demonstrating effectiveness on delay lines [AD-743552] 09 p1316 A72-23421
- Telecommunications ultrasonic resonators, electromechanical and piezoelectric filters and microacoustic surface elastic wave devices 09 p1281 A72-23468
- Plane stratified earth crust parameters determination from dispersion curve of Rayleigh surface waves fundamental tone 09 p1304 A72-23488
- Book on continuous elements dynamics covering membrane, torsional, string and elastic beam vibration, four pole techniques, periodic forced motion and surface waves 10 p1557 A72-24674
- Book on continuous transitions in open waveguides covering plane directive surface, single wire transmission line and layered waveguide surface wave propagation modes 10 p1436 A72-24675
- Surface acoustic wave technology in communication systems, discussing analog and digital matched filters and navigation, ATC and collision avoidance applications 10 p1483 A72-24946
- Microwave two reflector rectangular backfire antenna with dielectric surface wave structure as waveguide prolongation, obtaining far field radiation pattern 11 p1604 A72-25749
- Surface waves propagation in inhomogeneous elastic body, deriving wave equations asymptotic solutions 11 p1689 A72-26384
- Antisymmetry principle for solving equation of elastic surface wave caused by waveguide 12 p1845 A72-27392
- Surface wave propagation mechanism on dielectric bodies noting compatibility with physical properties involved with optical cables for commercial transmission systems 12 p1782 A72-27556
- Surface wave devices signal processing for space communication, developing fast lock up spread spectrum communication link broadband 13 p1920 A72-29106
- Surface waves generation and absorption by interdigital transducer with uniform finger spacing, discussing parallel equivalent circuit derived in weak coupling approximation 13 p1960 A72-29769
- Dynamic behavior of long-period oscillations of surface wave type in system of inhomogeneous ion beams moving in dense plasma along magnetic field 14 p1236 A72-30307
- Acoustic surface wave chirp filters application in pulse compression radar system, considering various piezoelectric substrate materials characteristics 14 p2089 A72-31045
- Dispersion equations and resonant absorption of plane and cylindrical surface waves in transition layer between plasmas, noting Langmuir oscillations 15 p2286 A72-32385
- Microwave acoustic surface waves attenuation at solid and monatomic gas boundary, detailing frequency, molecular weight, pressure and temperature effects 15 p2278 A72-32505
- Nondispersive guidance structure for acoustic surface waves due to velocity reduction of thin conducting strip on piezoelectric substrate 15 p2278 A72-32506
- Power spectrum of light scattered from surface waves thermally excited on carbon dioxide liquid-vapor interface near critical point 16 p2423 A72-32948

Piezosemiconductor crystals acoustoelectric surface domain waveguide effect for classical and transverse surface waves
16 p2441 A72-33596

Reliable nondestructive microstructure testing via surface ultrasonic waves
16 p2399 A72-33822

Love wave tapping in isotropic microacoustic surface waveguide by partial transduction into bulk wave at discontinuity
16 p2428 A72-34178

Acoustic edge scattering of elastic surface waves.
17 p2579 A72-34227

High-frequency ultrasonic devices.
17 p2526 A72-34564

The surface plasmon resonance effect in holography.
17 p2553 A72-34723

High-speed image scanning devices using acoustic surface waves and photodiode array.
18 p2658 A72-36267

Vlasov and Maxwell equations solution for surface waves dispersion in semiinfinite hot plasma
18 p2716 A72-36925

Excitation of nanosecond waves on positive columns.
19 p2838 A72-37328

Kinetic theory of surface waves in a cylindrical plasma waveguide
19 p2842 A72-38531

Propagation of surface waves along a plane boundary between two magnetoactive plasmas
19 p2842 A72-38532

Crack depth measurement with surface waves.
19 p2809 A72-38569

Analysis of piezoelectric thin-film transducers for elastic surface waves.
19 p2804 A72-38607

Earth density, surface wave velocity and other properties calculation from model consistent with physical and petrological mantle theories
20 p2917 A72-39475

Amplification of acoustic surface waves under transverse magnetic field in coupled intrinsic semiconductor-piezoelectric systems.
20 p2960 A72-39703

Magnetoplasma surface waves in polar semiconductors: Retardation effects.
21 p3096 A72-40344

Dielectric slab surrounding medium gain effects on bound modes amplification via estimation of evanescent surface wave interactions in optical waveguide by perturbation theory
21 p3062 A72-40605

A directional antenna represented by a system of two planes positioned on the generatrix of a relief impedance cylinder
21 p3033 A72-40942

Correction of diffraction errors in acoustic-surface-wave pulse-compression filters.
21 p3034 A72-41464

Quasi-static loading of the earth by propagating air waves.
22 p3172 A72-42468

Use of rotated electrodes for amplitude weighting in interdigital surface-wave transducers.
22 p3178 A72-42619

Propagation of Rayleigh waves on visco-elastic cylindrical surfaces placed in a magnetic field.
22 p3207 A72-42876

On the propagation of Love type waves in an infinite cylinder with rigidity and density varying linearly with the radial distance.
22 p3207 A72-42878

Plasma-electromagnetic interaction with surface wave propagation along boundary, obtaining boundary conditions for longitudinal and transverse wave amplitudes with allowance for particles interaction
22 p3213 A72-43117

Dynamic behavior of long-period oscillations of surface wave type in system of inhomogeneous ion beams moving in dense plasma along magnetic field
23 p3317 A72-43209

Surface wave parametric excitation by weak HF electric field in semibounded plasma, calculating near threshold instability by dispersion equation
23 p3318 A72-43322

Electronic devices with Rayleigh ultrasonic acoustic surface wave excitation for storage, recognition and separation of electrical signals usually requiring computerized operation
23 p3314 A72-44148

SURFACES

Steady and oscillatory subsonic aerodynamic loads prediction based on Doublet-Lattice method and method of images, determining chord and spanwise loading on lifting surfaces
[AIAA PAPER 72-26]
05 p0607 A72-16917

Monge surface shells reduced to bodies of revolution by small parameter method for solution of momentless theory equations
13 p2058 A72-29489

SURGERY

Resumption of flight after retinal surgery
19 p2760 A72-37879

SURGES

Zener diode transient suppressors with electronic thermal switch for ground vehicle and aircraft applications
[AD-741529]
05 p0637 A72-16553

Acoustic stimuli transients rise time and repetition rate effects on loudness, applying various steady state noise calculation methods to transients Fourier transforms
13 p2004 A72-29097

SURVEILLANCE

NT SPACE SURVEILLANCE [GROUND BASED]
NT SPACE SURVEILLANCE [SPACEBORNE]
Air transportation system design for safety and efficiency, discussing navigation facilities and surveillance systems employment for blunder prevention
01 p0098 A72-11117

Synchronous satellite surveillance system for transoceanic ATC, using suboptimal /modified Kalman/ filter for aircraft position and velocity computation
08 p1204 A72-21091

Optimal tracking filter for processing sensor data of imprecisely determined origin in surveillance system by minimizing effects of correlation uncertainties
10 p1455 A72-23787

Trends in civil ATC discussing plans to increase terminal capacity, surveillance system and use of multiple synchronous satellites for ocean travel efficiency improvement
12 p1842 A72-27103

Correlation technique for position location in surveillance and navigation by phase extraction from range tones using synchronous satellites
[AIAA PAPER 72-564]
12 p1842 A72-27375

ATC operational systems, discussing global surveillance and voice and data communication between aircraft and earth station
14 p2129 A72-31141

SURVEILLANCE RADAR

Avionics contribution to airspace decision making problems, considering navigation, surveillance radar, collision avoidance and ATC techniques
01 p0097 A72-10180

Airfield surface radar detection equipment to control aircraft and ground vehicles under reduced visibility and darkness
02 p0173 A72-12105

Tactical ATC display system for airport surveillance, precision approach and landing and operator/aircraft/machine operations by using terminal Area Surveillance Radar
02 p0230 A72-12421

Target trajectory detector optimization, using data and Markovian chain apparatus
03 p0323 A72-13831

Air surveillance using satellite range-difference measurement from noninterrogated aircraft beacons for ATC
04 p0545 A72-14826

Airborne traffic display system using beacon and radar surveillance network and ground computer processing
06 p0844 A72-17329

Aircraft proximity control for ATC system using national secondary surveillance radar /SSR/ for CAS-PWT functions
06 p0844 A72-17330

Suboptimal decision algorithm to correlate sensor data with stored tracks in real time track-while-scan surveillance system
10 p1441 A72-23780

Electronics and data processing technology effects on radar state of art, discussing automated air traffic control surveillance systems
10 p1435 A72-24490

Average time between successive false target indications in surveillance binary signal detector with variable storage capacity
11 p1595 A72-26295

Target angular position measurement by surveillance radar on background of correlated interference
11 p1595 A72-26296

Azimuth-bearing error dispersion in surveillance radar measurements, using Markov chains
11 p1595 A72-26297

Continuous wave Doppler radar with microwave oscillator for ATC measurements and surveillance
12 p1789 A72-27403

Secondary surveillance radar systems design and planning for ATC application
13 p1917 A72-28698

Surveillance radar for clutter rejection and signal loss reduction at airports, discussing system design features
18 p2662 A72-37046

Bearing azimuth measurement accuracy improvement by ATC beacon system/secondary surveillance radar using monopulse technique
18 p2662 A72-37047

ATC IC transponder used with secondary surveillance radar, discussing design features
18 p2662 A72-37048

SURVIVAL

ATC services configuration with secondary surveillance radar and primary radar data acquisition system, discussing signal processing by automated decoder
21 p3080 A72-40288

Air traffic density effect on secondary surveillance radar operation in ATC for aircraft identification and position determination, proposing selective advisory system
21 p3080 A72-40289

Discrete address beacon system /DABS/ development for surveillance and ground-air communications in support of ATC automation
22 p3204 A72-43151

SURVEYING

U SURVEYS

SURVEYOR LUNAR PROBES

Martian surface nature from Surveyor and Apollo missions data on lunar particle size distribution
01 p0132 A72-11037

Lunar surface soil mechanical properties from computer simulation of Surveyor spacecraft observation data for each landing site, estimating cohesion
02 p0275 A72-11595

Lunar mare soil deformation and cracking from Surveyor and Apollo photographs
04 p0574 A72-14918

Surveyor spacecraft lunar thermal data, comparing spatial resolution with earth based measurements
12 p1869 A72-27329

SURVEYOR 3 LUNAR PROBE

Apollo 12 retrieved Surveyor 3 TV camera mirror surface and camera-shroud organic contamination attributed to spacecraft outgassing and engine exhaust products
03 p0415 A72-12948

Lunar surface bearing strength vs penetration curves from Surveyor 3 soil sample, comparing with in-situ remote measurements
07 p1067 A72-18873

SURVEYS

NT GEODETIC SURVEYS

Urban area aerial photography survey for large scale photomaps, discussing building feature examination and universal stereophotogrammetric instruments utilization
03 p0362 A72-14311

Terminal area ATC specialists and trainees job attitude and motivation from questionnaire on challenge, tasks, salary, work schedule, etc.
06 p0766 A72-17865

Frankfurt Airport air traffic controller opinion survey of attitudes toward work and working environment
09 p1271 A72-23138

SURVIVAL

Microbial survivability in deep space environmental simulation experiments, describing aerospace ecology and panspermia avoidance
01 p0019 A72-10823

Hazard rate of recurrence in patients with malignant melanoma, investigating survival
02 p0167 A72-11713

Complex systems stochastic survivability estimates dependence on delay depth and initial conditions of interaction
05 p0640 A72-16204

Spacecraft and aircraft crew survival after emergency landing in adverse environments, discussing water and food requirements, survival supplies and medical and first aid equipment
05 p0621 A72-16629

High performance aircraft takeoff and landing accidents, investigating survival rates
08 p1109 A72-21563

Survival rates in USAF accidents during 1965-69, noting visual sighting as primary rescue factor
08 p1109 A72-21564

Pilot survival probabilities under various conditions of high performance aircraft takeoff and landing accidents, suggesting emergency action guidelines for pilot training
10 p1428 A72-23732

Passenger behavioral inaction in survivable aircraft accidents, suggesting maladaptive behavior counteraction by leadership and/or training
13 p1908 A72-28727

Effect of Acetazolamide /Diamox/ at different dose levels on survival time of rats under acute hypoxia and on Na⁺/K⁺/ATP-ase activity of rat tissue microsomes.
17 p2499 A72-34546

Stress and adaptation responses to repeated acute acceleration.
17 p2500 A72-34729

Analysis of survival and cause of death statistics for mice under single and duration-of-life gamma irradiation.
23 p3254 A72-43394

A study of USAF survival accidents 1 Jan. 1965-31 Dec. 1969.
23 p3259 A72-43425

Evidence for a metabolic limitation of survival in hypothermic hamsters.
23 p3258 A72-44364

SURVIVAL EQUIPMENT

Spacecraft and aircraft crew survival after emergency landing in adverse environments, discussing water and food requirements, survival supplies and medical and first aid equipment

05 p0621 A72-16629

Survival and flight equipment - Conference, Las Vegas, September 1971

08 p1109 A72-21560

Single Integrated Signal Device to aid in locating downed airmen awaiting rescue in dense jungle terrain by Search and Rescue aircraft

08 p1112 A72-21580

Emergency systems for helicopter crew and passenger survivability improvement, discussing use of ejection seats, extraction systems parachute bail-out and shaped explosive charges

08 p1109 A72-21581

Emergency Life Saving Instant Exit system in aircraft fuselage for use after crash landing, discussing design and ground testing

08 p1109 A72-21583

Manned space flight escape, rescue and survival systems based on onboard, prepositioned aid and earth launched concepts, considering earth orbit, lunar and interplanetary missions

09 p1395 A72-23152

Thermally protective life rafts and clothing evaluation for cold sea survival potential assessment and tolerance limit determination

14 p2081 A72-31088

Survival equipment for life raft in conjunction with Mercury, Gemini, Apollo, Skylab and space shuttle NASA programs

17 p2620 A72-34433

Medical and technical aspects of rescue and survival of astronauts in high mountain and mountainous remote areas.

17 p2507 A72-34434

Some aspects of survival and rescue of astronauts in polar regions.

17 p2507 A72-34435

SUSCEPTIBILITY [MAGNETISM]

U MAGNETIC PERMEABILITY

SUSPENDING [HANGING]

NT MAGNETIC SUSPENSION

Axial and radial displacements determination in rotor center of gravity for gyroscope with elastic suspension

03 p0360 A72-13560

Angular rigidity of support shaft elastic suspension of dynamically adjustable gyroscope

09 p1307 A72-22348

Nonlinear elastic suspension system with two spring pairs in parallel, measuring nondimensional load versus deflection curve and frequency response

11 p1736 A72-26007

Elastic deformation and rigidity of rectangular, circular and elliptic gimbals for gyroscope suspension

13 p1957 A72-29272

Equations of motion for contactless suspension gyroscope in force field

15 p2235 A72-31726

Stability and control dynamics of helicopter hovering with heavy sling load, analyzing maneuvers for minimal excitation of pendulous motion

[AHS PREPRINT 630] 17 p2489 A72-34488

Behavioral features of a composite hydrostatic suspension of a gyrocompass under conditions of vibration

21 p3058 A72-41807

SUSPENDING [MIXING]

Ignition and incandescence of laser irradiated single micron size Mg particles suspended in stoichiometric methane air mixture

10 p1564 A72-25140

Turbulent friction values diminished by reading errors in pitot tube flow measurement of solid particles suspensions and polymer solutions caused by viscoelastic associations

14 p2106 A72-31007

Particle charging behind shock waves in suspensions.

20 p2914 A72-39627

Determination of the characteristics of the averaged motion of the carrier medium in turbulent gas flow with suspended particles

21 p3044 A72-40126

Performance and flow properties change through a rocket turbine by presence of solid particles.

24 p3361 A72-45206

SUSPENSION SYSTEMS [VEHICLES]

Deterministic optimization of aircraft undercarriage suspension characteristics for taxiing induced vibration minimization, discussing damping and stiffness functions and hybrid computer solution

09 p1407 A72-23458

Combined hydrostatic suspension Hg cushion effects on gyrocompass response precision during irregular roll of platform

13 p1961 A72-30022

Design of vibration absorbers minimizing human discomfort.

21 p3009 A72-41231

SUSPENSIONS

Balance laws of micromorphic theory for polycrystalline mixtures, granular composites and fluid suspensions involving motions with wavelength comparable to intrinsic discontinuities in materials

01 p0102 A72-10320

Thermal conductivity, electrical conductivity, viscosity and diffusivity of ionized gas-solid suspension in electric field, using transport equations and particle interaction potentials

01 p0111 A72-11332

Time characteristics preceding self-ignition of solid particle system suspended in gas, discussing quasi-steady state duration

06 p0903 A72-18202

Critical conditions for self ignition of solid fuel particles suspended in gas

06 p0903 A72-18203

Wave equation for sound velocity propagation in suspensions based on mass and momentum balances

11 p1687 A72-26056

Conjugate-flow theory for heterogeneous compressible fluids, with application to non-uniform suspensions of gas bubbles in liquids.

21 p3044 A72-40120

SWAGING

NDT holographic interference pattern technique to determine Advanced Test Reactor fuel element swage joint tightness

01 p0078 A72-11110

Tungsten wire deformation structure from swaging or rolling and drawing processes, noting cylindrical texture superimposed on fiber texture

03 p0375 A72-13933

Power parameter determination in rotary swaging of thin conical shells, discussing radial contact stresses

05 p0666 A72-16628

Brazed-welded lightweight high pressure aerospace tube-fittings.

17 p2560 A72-34939

SWEAT

Peripheral modifications to exercise induced central drive for sweating, determining rates as functions of internal temperature

04 p0479 A72-15212

Regulation of sweat secretion on skin surfaces overlying active and nonactive muscle tissue during skin or core temperature alterations

04 p0480 A72-15216

Body thermal stress, local heating and arterial occlusion effects on sweat electrolyte content

07 p0929 A72-19437

Myoepithelial mechanism of high frequencies pulsatile discharge of human sweat glands

07 p0930 A72-19444

Galvanic skin response techniques for palmar and dorsal sweat detection during motion sickness by vestibular stimulation, comparing arousal and thermal sweat response

07 p0933 A72-20185

Calorimetric measurements of human body temperature and of hot saline solution drinking effects on sweating rate

09 p1267 A72-23440

Calorimetric study of sweating man response to drinking hot saline solution as function of temperature, volume and salinity of ingested liquid

09 p1267 A72-23441

Thermodynamic analysis of heat of evaporation of sweat, considering ambient temperature and humidity effects, body heat storage and presence of solutes

11 p1586 A72-26610

Thermoregulation changes during simulated weightlessness of prolonged bed rest, noting lower sweating threshold and decreased vasodilation/autonomic dysfunction/

12 p1767 A72-28301

Environmental temperature effect on motion sickness sweating, discussing nausea and discomforting symptomatology prediction

12 p1775 A72-28302

Human diaphoretic system physiology, discussing skin surface sweat excretion intensity relation to optimal balancing process in thermoregulation

14 p2076 A72-30672

Skin temperatures in warm environments and the control of sweat evaporation.

17 p2506 A72-35969

Sweat depression during controlled hyperthermia in man - Effects on the sweat rate and sweat electrolytes

20 p2892 A72-39591

SWEAT COOLING

Heat and mass transfer equations for unsteady transpiration cooling, taking into account temperature gradient between coolant and surface

03 p0457 A72-14154

Nozzle and cavity wall cooling limitations on uranium plasma nuclear rocket specific impulse, discussing wall heat flux and transpirational cooling by propellant flow

03 p0387 A72-14383

Surface heat transfer and pressure measurements for downstream effects of transpiration cooled nose tip, using nitrogen as injectant fluid

[AIAA PAPER 72-185] 05 p0605 A72-16840

One dimensional two phase flow transpiration cooling through porous metals

[AIAA PAPER 72-24] 05 p0749 A72-16915

Two phase heat transfer in porous metal transpiration cooling system, comparing measured with calculated temperature distribution

[AIAA PAPER 72-25] 05 p0749 A72-16916

Transpiration cooling of laminar tangential Newtonian flow in annuli, obtaining temperature distribution

07 p1100 A72-19631

Liquid film transpiration cooling concept application to space shuttle leading edge heating and shock heating

[AIAA PAPER 72-389] 11 p1744 A72-25410

Gas side, coolant side and interstitial heat transfer in gas turbines transpiration air cooling

12 p1860 A72-27350

Boundary layer approach to local potential solution of diffusion equations, applying to transpiration cooled half space and heat conduction in melting solid

13 p2064 A72-28885

SWEATING

U PERSPIRATION

SWEDEN

Report to COSPAR on Swedish space research, discussing activities of astronomical, ionosphere and geophysical observatories and space technology, physics and cosmic ray groups

15 p2338 A72-32008

SWEEP ANGLE

NT LEADING EDGE SWEEP

SWEEP CIRCUITS

Final stages of transistorized sweep generators

22 p3158 A72-42114

SWEEP EFFECT

Laminar three dimensional boundary layer nonequilibrium effects at hypersonic wing swept leading edge with intensively cooled surface, considering sweep induced crossflow effect

[VPI-E-71-23] 02 p0152 A72-12422

SWEEP FREQUENCY

Optical sweep generator using single frequency He-Ne lasers with Michelson interferometer for mode selection to provide smooth tuning throughout Doppler width

07 p1000 A72-19010

Matched acoustic generator for sweep frequency testing of power gain of fluoric amplifiers

[ASME PAPER 71-WA/FLCS-2] 10 p1423 A72-25051

Biological system transfer-function extraction using swept-frequency and correlation techniques.

22 p3151 A72-42773

SWEEPBACK

NT LEADING EDGE SWEEP

SWELLING

Effect of neutron spectra on the swelling of ceramic insulators and implications for thermionic reactor design.

18 p2703 A72-36146

SWEPT WINGS

NT ARROW WINGS

NT DELTA WINGS

NT SWEPTBACK WINGS

Subsonic linearized theory for symmetrical cranked wings at zero incidence, presenting corrected formulas for streamwise and spanwise perturbation velocity components due to wing thickness

01 p0001 A72-11154

Increasing lift and Reynolds number effects on displacement and skin friction of three dimensional turbulent boundary layer on infinite swept wing

01 p0002 A72-11395

Laminar three dimensional boundary layer nonequilibrium effects at hypersonic wing swept leading edge with intensively cooled surface, considering sweep induced crossflow effect

[VPI-E-71-23] 02 p0152 A72-12422

A-300B European Airbus cantilever wing design and manufacture, discussing skin forming, skin-stringer and torsion-box assembly, automatic riveting and root-end profile machining procedures

03 p0365 A72-14301

Incompressible boundary layer velocity profile on swept wings, comparing critical Reynolds number to straight wing value

13 p1894 A72-29639

Elliptic-hyperbolic relaxation algorithm for solution to three dimensional nonlinear transonic small disturbance potential equation for flow about swept wings

[AIAA PAPER 72-677] 16 p2346 A72-34063

Aerodynamic test facility data on swept wings, peaky airfoils, aircraft flutter and transonic flow, discussing shock tubes and wind tunnels development

20 p2912 A72-39846

SWEPTBACK WINGS

NT ARROW WINGS

NT DELTA WINGS

Flutter analysis and unsteady pressure fields induced by pitching motions of wall mounted sweptback wing, verifying experimentally lifting surface theory in high subsonic range

22 p3241 A72-43094

- The sweepback effect in the subsonic region in the lower altitudes and in the hypersonic region at high altitudes 24 p3359 A72-44983
- SWIMMING**
Cardiorespiratory functions in child swimmers and nonathletes during growth, relating training to oxygen transport system dimensions 08 p1123 A72-20894
- SWINE**
Pigs role as ideal experimental animal in human biomedical research, discussing investigations to emphasize similarities 18 p2649 A72-36440
- SWINGBY TECHNIQUE**
Planetary swingby optimum transfer between hyperbolic asymptotes with less than maximum natural turn angle 10 p1552 A72-24487
Trajectory analysis for swingby technique using Jovian gravitational field for leaving ecliptic plane along heliocentric orbit and for solar flyby at specified distance 14 p2150 A72-30452
Mission design and navigation for a 1977-1978 Venus Swingby/Mercury Orbiter. [AIAA PAPER 72-941] 21 p3113 A72-41577
Saturn-Jupiter rebound - A method of high-speed spacecraft ejection from the solar system. 23 p3340 A72-44323
- SWIRLING**
Numerical solution for swirling ideal gas flow in Laval nozzle, determining swirling effects on nozzle performance 02 p0149 A72-11583
Multicellular viscous vortex core embedded in unsteady outer potential swirling flow, obtaining numerical solution 02 p0253 A72-11971
Mass blocking of subsonic isentropic swirling flow through convergent axisymmetric nozzle, considering radial velocity component effect on vorticity 03 p0342 A72-13957
Laminar boundary layer velocity profiles in convergent nozzle incompressible swirling flow, considering boundary layer growth effects on free stream axial and tangential velocities 10 p1471 A72-25068
Reynolds analogy for twisted liquid flow in tube with swirl vanes 11 p1619 A72-26968
Swirling flow effects on annular conical diffuser performance in axial flow turbomachines, showing stagnation region and inner body diameter dependence 14 p2069 A72-30580
Fuel injection, mixing and combustion processes investigation in model cylindrical swirl chamber, describing flow visualization method for turbulence observation 15 p2297 A72-32297
Solution existence for singular boundary value problem involving swirling flow, corresponding to problem of axisymmetric flow above rotating disk 16 p2377 A72-33186
Numerical finite difference prediction of inert turbulent boundary layer swirling jet flow, using nonisotropic energy-length model [AIAA PAPER 72-699] 16 p2380 A72-34044
Swirling flows vortex breakdown in nozzles, diffusers and combustion chambers, considering analogy to boundary layer separation 18 p2641 A72-36385
Calculation of axisymmetric swirling and non-swirling turbulent jets 18 p2682 A72-36890
Characteristics of the propagation of swirling jets of variable density 22 p3166 A72-42255
Reacting and nonreacting swirl recirculation bubble gasdynamic structure in fuel combustion systems, noting anisotropic turbulence from hot-wire anemometer measurements 24 p3461 A72-45024
The damping of precessing vortex cores by combustion in swirl generators. 24 p3464 A72-45060
Decay of swirl in a straight pipe flow /with hub at the entrance/. 24 p3394 A72-45367
Swirling base injection for supersonic combustion ramjets. 24 p3434 A72-45785
- SWIRLING WAKES**
U TURBULENT WAKES

NT CAPACITANCE SWITCHES
NT CRYOTRONS
NT ELECTRIC RELAYS
NT ELECTRIC SWITCHES
NT FLUID SWITCHING ELEMENTS
NT PRESSURE SWITCHES
NT SWITCHING CIRCUITS
NT THERMOSTATS
NT TRIGATRONS
- Frequency response of spectral noise amplitude in chalcogenide glass switches 09 p1366 A72-22215
- SWITCHING**
NT BEAM SWITCHING
NT MAGNETIC SWITCHING
NT MICROWAVE SWITCHING
Response of discrete linear systems to forcing functions with inequality constraints. 20 p2910 A72-39604
A new type of switching and memory effect by controlling the polarized field in semiconductor interface. 20 p2961 A72-39709
Isochronic corner generated difficulties avoidance in linear multivariable system minimum time controller, noting association with switchings 21 p0307 A72-40638
An iterative technique for determining the minimal number of variables for a totally symmetric function with repeated variables. 23 p3308 A72-43421
- SWITCHING CIRCUITS**
NT FLUID SWITCHING ELEMENTS
Plasma potentials spatial distribution measurement, describing switching circuit and probe design 01 p0109 A72-10580
Low driving power resistive gate MOSFET microwave switch with performance approaching P-I-N diode 01 p0038 A72-10658
Ionization chamber for direct measurement of radiation dose equivalent, describing high voltage switching circuit [CERN-71-16] 02 p0168 A72-12072
Thermal effects on reversible threshold switching in amorphous semiconductor thin films involving current controlled negative resistance 02 p0268 A72-12202
Millimeter wave pulse signal transmission path length modulator with P-I-N diode switch, discussing system design and experimental results 02 p0196 A72-12798
Polyphase signal generators, using reversed flux region propagation in saturable ring core controlled by switching transistors operation [IEEE PAPER 17-5] 03 p0322 A72-13773
Bistable fluidic amplifiers switching dynamics, developing analytic performance prediction method from flow visualization studies [ASME PAPER 71-WA/FLCS-8] 05 p0615 A72-15916
Book on transistors in pulse circuits covering switching diodes and circuits, multivibrators, blocking oscillators, etc 05 p0640 A72-16288
Switching contacts performance principles, noting inductive energy role in electrical breakdown voltage determination 06 p0791 A72-18579
Digital loaded-line phase shifters for phased array antennas, discussing lossy microstrips effects and P-I-N diode switching shortcomings in design requirements 07 p0954 A72-19048
Digital simulation for predicting performance of data communication networks with computerized switching centers, detailing space shuttle interior communication system 07 p0952 A72-20364
Ac and dc power regulation by switched capacitor, analyzing voltage spectrum for resistive load 07 p0958 A72-20389
Switching characteristics of MOS channel transistors, solving nonlinear differential equations describing current and potential distribution 08 p1140 A72-21267
Six channel integrated MOS switch, discussing MOS transistor operation and circuits structure 09 p1288 A72-23363
German monograph on electric arc behavior in narrow channel with plasma cooling by channel wall and continuously decreasing current for switching applications 10 p1517 A72-23773
Switching behavior and attenuation of space division multiplex crosspoint circuit with end marking, discussing realization in thick film technology 11 p1604 A72-25908
Switch detector output random process energy spectrum and autocorrelation function, noting distortion reduction by proper parameter choice 11 p1605 A72-26317
Sawtooth voltage generator with switching circuit to achieve small retrace time via blocking generator 11 p1605 A72-26320
Aluminum-silicon Schottky diode clamped transistor-transistor logic circuits parameters optimization for high switching speed and IC applications 11 p1606 A72-26568
Parasitic sidelobe suppression in radiation patterns of phase switching linear antenna array without gain loss 11 p1598 A72-26717
- Fall time calculation and junction capacitance effect in diodes with nonuniform base doping switched off by voltage and current generators 11 p1607 A72-26963
Electroluminescent matrix display system with amorphous semiconductor threshold switches for isolation and memory, discussing performance and address waveforms 12 p1788 A72-27239
Reversible threshold switching in amorphous semiconductor alloys by carrier transport and recombinative electron injection 12 p1854 A72-27431
Second order systems time optimal control with delay, determining maximum number of switching points for control function 12 p1794 A72-28141
P-n-p-n junction thyristor turnoff process under reverse anode voltage at high injection level, examining current voltage curve and switching time constant 13 p1932 A72-29293
Metal-dielectric-semiconductor junction transistor HF response analysis by digital computer, deriving switching time as function of impurity concentration and electrode voltage 13 p1932 A72-29294
Chalcogenide semiconductor monostable threshold and bistable memory switching devices, discussing fabrication and performance 13 p1934 A72-30090
Reliability modeling principles, concepts and implementation techniques for switching system design 14 p2091 A72-31167
Fluidic digital logic devices vs electromechanical-electronic equivalents, describing Coanda effect application to bistable jet amplifiers /flip-flops/ as switching or memory devices 15 p2182 A72-31218
High voltage dc arc interrupter for use in high power pulse generators and switching application in high voltage dc power transmission system 15 p2201 A72-32569
Phase distribution randomization in switched antenna array, noting radiation pattern sidelobe compensation application 15 p2209 A72-32666
Langmuir probe dc and second harmonic characteristics measuring system, describing switching circuitry 16 p2392 A72-33608
An investigation of amorphous semiconductor memory devices utilizing thick film fabrication techniques. 17 p2527 A72-34682
Switch properties of thermionic diodes with cesium vapor. 18 p2645 A72-36178
S-band high power microstrip switches with p-i-n diodes for spacecraft radio systems 19 p2770 A72-37257
Contactless relay circuits employing a branched-core magnetic modulator with second-harmonic output 19 p2771 A72-37302
Switching curves and lobesweeping in origin seeking time optimal control for Duffing oscillator, using Pontryagin maximum principle 19 p2777 A72-37373
Symbol generators for the representation of switching circuits by data display devices according to the television principle 19 p2769 A72-37935
Amplitude and harmonic oscillation characteristics of quaternary RC parametron using tunnel diodes 19 p2773 A72-38211
Precise transfer function of a clamper for a commutation switch with a finite closing time 19 p2782 A72-38463
Interference suppression design of switching circuits utilizing slewing rates. 20 p2906 A72-38982
Realization of static /combination/ logic switches with the aid of TRIMELOG pneumatic elements. II 20 p2890 A72-39423
Analysis of the characteristics of an MOS transistor as a switching element 21 p3025 A72-40163
Switches for high-frequency channels 21 p3026 A72-40317
Interpretation of the preswitching behaviour of chalcogenide-glass switches in terms of a space-charge-injection mechanism. 21 p3034 A72-41466
Parameters and properties of special avalanche transistors 21 p3035 A72-41809
The relative merits of thyristors and power transistors for fast power-switching applications. 22 p3159 A72-42306
The switching behaviour of thin films of chalcogenide glass. 22 p3214 A72-42319
A CW Gunn diode bistable switching element. 22 p3159 A72-42610

Ferrite component for waveguide commutator used as microwave switching element and modulator, noting application in navigation instruments and avionics

23 p3270 A72-43768

Preswitching electrical properties, 'forming,' and switching in amorphous chalcogenide alloy threshold and memory devices.

24 p3385 A72-44982

Commutation switch based on an injection semiconductor laser.

24 p3412 A72-45620

A near-time-optimal control circuit with a large number of relay elements

24 p3387 A72-45699

SWITCHING ELEMENTS

U SWITCHING CIRCUITS

SWITCHING FUNCTIONS

U BOOLEAN FUNCTIONS

U SWITCHING

SWITCHING THEORY

Switching operations in TDMA system, noting availability of signaling channels with broadcast mode

01 p0033 A72-11305

Sign behavior of switching function defined for plane fuel-optimal flight on elliptical coast trajectories

05 p0728 A72-16705

Quasi-time optimal control synthesis of two-control variable system by equivalent switching signum function method

07 p0961 A72-19712

Linear time optimal problem with analytical perturbations of initial conditions, determining optimal control switching points from convergent series representation

08 p1145 A72-21466

Laser light induced high-low impedance switch in Cd doped n-type Si diodes with p-p-n junctions and negative resistance

13 p1928 A72-28676

Parabolic switching boundaries method for optimal fuel consumption control of manned orbital space vehicles

18 p2672 A72-36325

SYLLABLES

NT MESSAGES

Cortical responses to visually displayed word and nonsense syllable stimuli, using EEG and computer techniques

04 p0474 A72-15248

SYMBIOSIS

Hereditary endosymbiotic model of microbial evolution of Precambrian prokaryotic and eukaryotic cells

04 p0471 A72-14800

Phylogenetic origin of cytoplasmids from Cyanophyceae alga involved in endosymbiosis with colorless Cryptophyte

13 p1907 A72-29996

SYMBOLIC PROGRAMMING

NT COMPUTER PROGRAMMING

SYMBOLS

NT MESSAGES

Symbol generation with black-and-white or color display devices and time shared computer for man-machine communication

01 p0034 A72-10484

Exploratory test of extrasensory perception to identify random order of symbols in space during Apollo 14 flight with four subjects on earth

04 p0565 A72-14888

Pattern recognition in mental process automation, noting character transformations, written symbols content analysis and syntactic description

12 p1786 A72-27576

Electronic head-up displays for aircraft instrument indication in symbolic form at pilot eye level

15 p2188 A72-31513

Symbol generators for the representation of switching circuits by data display devices according to the television principle

19 p2769 A72-37935

SYMMETRICAL BODIES

NT FAIRINGS

NT PARABOLIC BODIES

NT POINCARÉ SPHERES

NT ROTATING CYLINDERS

NT ROTATING SPHERES

NT SLENDER CONES

NT SPHERES

NT STREAMLINED BODIES

NT TORUSES

Motion of two symmetrical rigid bodies connected by frictionless spherical hinge positioned at dynamic symmetry axes intersection

08 p1206 A72-21168

Dynamic and kinematic equations of attitude and translational motions of symmetric rigid body under body fixed force

09 p1351 A72-22991

Stress concentration in symmetrical U-notched plates, comparing data with Baratta, Neal, Neuber and Heywood formulas

14 p2167 A72-30904

An approximate method for solving problems involving separated flows past bodies

21 p2990 A72-41088

SYMMETRY

Phenomenological symmetry for spatial, mechanical and relativistic physical laws, providing invariance to subsets of described objects

10 p5152 A72-24781

Radiative properties of charged particles moving in attractive Coulomb fields related to repulsive fields by symmetry relationships

12 p1848 A72-28155

Linear differential equations solution symmetry properties, using Lie algebraic methods and finite dimensional linear systems theory

15 p2264 A72-31761

The solution of sharp-cone boundary-layer equations in the plane of symmetry.

21 p2989 A72-40650

Symmetry transformations for thin elastic shells.

22 p3234 A72-42398

Compensating fields of homomorphic imaging problems in space symmetry, discussing quasi-tensors, covariant derivatives and Poincaré group

23 p3312 A72-43336

SYMPATHETIC NERVOUS SYSTEM

Stellate ganglion stimulation and hypoxia effects on hemodynamics and coronary circulation in dogs, discussing myocardial oxygen consumption, sympathetic nerve vasoconstrictor effect and vasodilatory response

05 p0617 A72-16153

Myorelaxant 3,5-dimethyl-4-bromopyrazol injection effect on rabbit and dog heart during direct extracardiac nerve stimulation

05 p0618 A72-16358

Cardiac acceleration by voluntary muscle contractions of minimal duration in men due to vagal tone inhibition

07 p0929 A72-19442

Vagal control of ventilation and respiratory muscles during elevated pressures in cats

07 p0917 A72-19446

Stimulation transmission tracts, synaptic mechanisms and tonic activity of cat sympathetic ganglia

07 p0924 A72-20617

Propranolol as adrenergic beta receptor inhibiting agent for hyperthyroidism symptom amelioration

08 p1118 A72-21550

Sympathetic responses in human skin nerves with accompanying vasomotor reactions induced by emotional, thermal and respiratory stimuli

10 p1424 A72-24241

Physiological and psychological effects of noise noting vulnerability of circulatory apparatus, neurovegetative system and stomach

14 p2079 A72-30696

Effect of beta-adrenergic blockade on plasma volume in human subjects.

19 p2757 A72-38029

Vasomotor reflexes and the principle of descending control

21 p2999 A72-40597

Supraspinal effects in the activity of preganglionic sympathetic neurons delivering axons to the cervical sympathetic nerve

21 p3000 A72-40599

Polysynaptic sympatho-reticular and somatic afferent visceral links between internal organs and cerebrum in interoceptive reflex fields

21 p3000 A72-40755

Unresponsiveness of pial precapillary vessels to catecholamines and sympathetic nerve stimulation.

22 p3140 A72-41934

Influence of the sympathetic nervous system on the presynaptic inhibition of the dorsal surface potential of the spinal cord

24 p3370 A72-44589

SYMPATHOMIMETICS

U ADRENERGICS

SYMPHONIE SATELLITES

Telemetry equipment of network tracking stations for CNES Symphonie satellites at 136-138 and 148 MHz

[DGLR PAPER 72-015]

13 p1939 A72-28966

Parallel operation of the solar generator and battery on the Symphonie satellite

18 p2648 A72-36681

Power regulation in the Symphonie satellite

18 p2648 A72-36682

Reliable component procurement for Symphonie satellite, discussing parts list, specifications and subcontract monitoring and inspection

18 p2670 A72-37124

Integrated systems design procedures as exemplified by Europa 1, 2 and 3 rockets and Symphonie communication satellite development

19 p2869 A72-38302

The Franco-German telecommunications satellite Symphonie

24 p3451 A72-45230

The Symphonie transponder in the integration phase

24 p3380 A72-45273

SYMPTOMOLOGY

Asymmetrical hypertrophic cardiomyopathy symptoms simulating mitral stenosis, suggesting electrocardiography, chest X ray and hemodynamic studies as diagnostic procedures

06 p0761 A72-17380

Environmental temperature effect on motion sickness sweating, discussing nausea and discomforting symptomatology prediction

12 p1775 A72-28302

SYMPTOMS

U SIGNS AND SYMPTOMS

SYNAPSES

Postsynaptic electric potential responses to click on auditory cortex neurons in cats

02 p0158 A72-11757

Synaptic mechanisms of vestibulospinal and reticulospinal effect on transmission to lumbar motoneurons in monkeys

02 p0158 A72-11760

Blink reflexes in man during sleep and wakefulness, discussing electromyographically recorded orbicularis oculi mono- and polysynaptic responses to electrical stimuli

04 p0474 A72-15250

Synaptic contacts in vertebrate retinas, reviewing bipolar terminals, ganglion cells and amacrine responses from electron microscopy

06 p0762 A72-17719

Marine gastropod mollusk synaptic transmission mechanism, discussing various chemical transmitters, two phase potential, receivers, electrical interaction and electrophysiological conditioning

06 p0764 A72-17996

Field and intracellular potentials in cat trochlear nucleus following vestibular nerve and nuclei stimulation for synaptic organization study of vestibulo-ocular reflex

07 p0923 A72-20501

Stimulation transmission tracts, synaptic mechanisms and tonic activity of cat sympathetic ganglia

07 p0924 A72-20617

Motoneuron pool fraction determination in human monosynaptic response of healthy and neuropathological subjects, comparing diagnostic methods

07 p0924 A72-20619

Visual cortex neuronal background activity in unanesthetized rabbits under stimulation and depression of lateral geniculate body and mesencephalic reticular formation, considering synaptic organization

12 p1761 A72-27646

Synaptic patterns in the superficial layers of the superior colliculus of the monkey, Macaca mulatta.

19 p2758 A72-38647

Neuronal fiber and synaptic axonal contact structure of cat spinal gray matter in corticospinal, rubrospinal and reticulospinal terminal zones by Golgi method

21 p2998 A72-40579

The ultrastructure of the lateral basilar region of the spinal cord.

21 p2998 A72-40581

Neuronal organization of descending systems of the spinal cord

21 p2998 A72-40582

Synaptic suprasegmental control mechanisms of spinal cord motor neurons

21 p2999 A72-40584

Study of the conductivity of the motor neuron membrane during supraspinal stimulation

21 p2999 A72-40585

Intracellular study of rubrospinal neurons and of their synaptic activation during the stimulation of the sensorimotor cortical region

21 p2999 A72-40586

Synaptic potentials of sensor and motor neurons of trigeminal nuclei during corticofugal stimulation

21 p2999 A72-40587

Pyramidal control of the activity of interneurons related to various types of peripheral afferents

21 p2999 A72-40589

Possible role of supraspinal formations in the fixation of trace alterations at the segmental apparatus level of the spinal cord

21 p2999 A72-40592

Polysynaptic sympatho-reticular and somatic afferent visceral links between internal organs and cerebrum in interoceptive reflex fields

21 p3000 A72-40755

Synaptic events during specific and nonspecific inhibition of visual cortex neurons

23 p3257 A72-44088

SYNCHRONISM

NT BIT SYNCHRONIZATION

NT FREQUENCY SYNCHRONIZATION

Optimal two stage signal search in frequency vs arrival time indeterminacy plane of communication system

04 p0487 A72-15148

Atomic clocks application to spacecraft position determination, discussing ground stations synchronization and accuracy improvement by lasers

05 p0660 A72-15858

Eros and ATA /Air Transport Association/ time-frequency collision avoidance systems, discussing synchronization methods, back-up mode operation, threat computation and displays

09 p1349 A72-22823

Haag synchronization theory generalization through precision improvement and extension to almost periodical systems

10 p1510 A72-24123

Optimum decision rule for sync word location in binary data frame, noting sum maximization of correlation and energy correction terms

11 p1592 A72-25888

Earth stations synchronization to switched sequences of multiple access and cyclically interconnected multipot beam antennas satellite controlled by stable onboard clock

[AIAA PAPER 72-545]

12 p1781 A72-27368

Relaxation oscillator synchronized by quartz crystal between emitter and base of unijunction transistor, obtaining sinusoidal output by series-connected RC load

13 p1926 A72-28377

Parametric resonance suppression in annular laser by steady noise perturbation, discussing beat signal spectrum

13 p1968 A72-29505

Synchronization theory for digital data transmission with random changes in channel characteristics

14 p2085 A72-30333

Nonlinear resonant circuits analysis, noting steady state operation of ferroresonant circuit with staircase response curve and synchronization conditions

14 p2132 A72-31103

Tunnel diode harmonic relaxation frequency divider, obtaining large division factors and wide synchronization bands with sinusoidal output signal

15 p2206 A72-31666

Extractop model for time signal decoding for worldwide synchronization using Transit satellite system

15 p2199 A72-32078

ATS-3 C band dual transponders for geographically distant clocks time synchronization, using Cs clocks for accuracy verification

15 p2200 A72-32080

Automata with specific properties of diagnostic, arranging and synchronizing word sets

16 p2366 A72-33086

Train synchronism of second harmonic excitation/pumping/ by periodic sequence of ultrashort light pulses

16 p2402 A72-33493

Synchronizing electronic equipment for digital computers input graphic data recording fidelity improvement ensuring proper timing of set and reset pulses

16 p2367 A72-34018

Synchronization and noise performance of mutually coupled oscillators.

18 p2668 A72-37036

Time synchronized ranging system (TSRS) providing high-speed real-time two-way data link between community members

19 p2764 A72-37904

Synchronization in the work of motor neurons during arbitrary motor activity of various types

21 p2999 A72-40595

Analysis of a single-loop parametric amplifier by the phase plane method

24 p3384 A72-44893

SYNCHRONIZED OSCILLATORS

Synchronized multiple microwave oscillators power and noise characteristics at microwave and millimeter frequencies, discussing magic T configuration

01 p0037 A72-10648

Solid state oscillator phase and frequency synchronization by injection of stable sinusoidal uhf signal modulated by 0-180 deg phase jump

02 p0194 A72-12569

Phase stabilization of synchronized tracking oscillator with resonant frequency regulated by output voltage

03 p0333 A72-13895

Mechanical system of elastically coupled bodies carrying identical vibrators, examining self synchronization behavior

06 p0850 A72-18713

Phase locking loop synchronized quartz oscillator for integral frequency multiplication in wideband carrier frequency systems

07 p0954 A72-19174

Thomson autooscillator systems synchronization and small external sinusoidal emf effect with hard and soft bounding of amplitude deviations

08 p1142 A72-21769

Phase stabilization of synchronized tracking oscillator with resonant frequency regulated by output voltage

15 p2209 A72-32706

Determination of the locking range from the reactive power balance of the oscillator.

17 p2530 A72-35430

The locking effect in an autooscillator system with two degrees of freedom

19 p2783 A72-38580

Influence of fluctuations on the synchronization of frequency-modulated oscillators

22 p3159 A72-42658

Reciprocal synchronization of generators connected by a long line section

23 p3272 A72-44210

SYNCHRONIZERS

Branch synchronizer for convolutional decoders, noting design adaptability to nonsystematic codes of different constraint lengths

02 p0188 A72-12410

Synchros as electromechanical function generators and receivers for analog computers, examining errors in standard resolvers operation

03 p0328 A72-13841

Synchronization system for remote control and performance checking of motion picture projectors with running film, discussing recording equipment and stroboscopic pulsed illuminator operations

04 p0521 A72-14711

Myocardium biopulse-controlled cardio-synchronizer as key component of biocontrol systems for cardiological studies

11 p1585 A72-26455

SYNCHRONOUS COMMUNICATION SATELLITES

U SYNCOM SATELLITES

SYNCHRONOUS DETECTORS

U CORRELATORS

SYNCHRONOUS METEOROLOGICAL SATELLITE

Direct readout ground system (DRGS) for receiving, recording and displaying visible and IR imagery collected by ItoS and synchronous meteorological satellite radiometers

01 p0047 A72-10452

Hydrologic data collection via ATS 1 satellite for river and flood forecast of National Weather Service, planning geostationary operational environmental satellites /GOES/

09 p1296 A72-22315

European synchronous meteorological satellite system Meteosat, discussing mission, control and data acquisition

15 p2265 A72-31345

SYNCHRONOUS MOTORS

Vibration measurements of gyromotors with aerodynamic spherical and ball bearings

09 p1263 A72-22347

Hysteretic motor in steady synchronous operation with nonsinusoidal supply voltage, computing stator winding current based on superposition with two linear equivalent circuits

13 p1900 A72-29975

Transistorized oscillators for variable-frequency generators designed to feed synchronous motor drives of equatorial telescopes

14 p2073 A72-30683

Digital computer studies of control loop parameters and configurations effects on performance of synchronous turbogenerator with two field windings

15 p2183 A72-32793

SYNCHRONOUS SATELLITES

NT AEROS SATELLITE

NT SIRIO SATELLITE

NT SYNCHRONOUS METEOROLOGICAL SATELLITE

NT SYNCOM SATELLITES

Nozzle shaped antenna for synchronous satellite, obtaining radiation patterns

01 p0043 A72-11245

Atmospheric pollutants time and spatial profiles monitoring by geosynchronous satellite remote sensors

02 p0211 A72-11806

World Administrative Radio Conference for Space Telecommunications data on geostationary orbit utilization, covering stationkeeping and satellite antenna pointing accuracies

02 p0177 A72-12387

Magnetosphere model for low energy cosmic ray proton propagation mode to synchronous orbit satellite, calculating geomagnetic cutoffs and penetration regions

[AD-741079]

02 p0274 A72-12453

Europa 3 candidate propulsion modules system analysis, considering payload, mission flexibility, orbital injection precision, synchronous satellite design influence, satellite-booster interfaces and costs

02 p0287 A72-12731

Rotating earth oblateness and equator ellipticity influence on near-equatorial synchronous satellite behavior, using nonlinear mechanics asymptotic method

03 p0436 A72-13835

Ionospheric electron content changes during 25-26 May 1967 magnetic storm event from geostationary satellite monitoring

04 p0516 A72-14940

Meteorological satellite stabilization and attitude control in synchronous equatorial orbit for two years life, emphasizing nutation damper optimal dynamic characteristics

05 p0725 A72-16437

Propagation delays for clock synchronization from synchronous satellite tracking by range measurements

05 p0628 A72-16563

SYNCHRONOUS SATELLITES

Ion engine performance optimization by power sharing with secondary batteries on synchronous equatorial satellites

[AIAA PAPER 72-206]

05 p0706 A72-16852

Spacecraft charging at synchronous orbit, constructing mathematical model of ATS 5

07 p1058 A72-19150

ATS F and G satellites with 30 foot deployable antennas as three axis stabilized platforms in geostationary orbit with high pointing accuracy

07 p1085 A72-19275

Nonlinear multivariable system optimal control with respect to time and fuel consumption, discussing Gauss-Newton and Davidson methods and application to geostationary satellite

07 p0962 A72-19719

Geostationary communication satellites and terrestrial radio relays frequency sharing, controlling interference by flux density and transmitter power limitation

07 p0948 A72-20490

Synchronous satellite surveillance system for transoceanic ATC, using suboptimal /modified Kalman/ filter for aircraft position and velocity computation

08 p1204 A72-21091

Aerosat program for ATC and communications via four geostationary satellites over Atlantic and Pacific Oceans, discussing technical and financial international provisions

08 p1256 A72-21203

Meteosat geostationary satellite international program for earth cloud cover observation and meteorological data relays between ground stations as part of Global Atmospheric Research Program

08 p1241 A72-21204

Dioscures geostationary satellites project for Atlantic and Pacific ocean air and ship traffic safety based on radar tracking and multiplex numerical data transmission

09 p1396 A72-23400

Ionospheric electron content determination at different latitudes from geostationary satellite signal Faraday rotation

10 p1475 A72-24955

Electric thruster for orbit and attitude control of nonspinning geostationary communications satellite

[AIAA PAPER 72-436]

11 p1727 A72-26178

Point motion in random error region applied to synchronous satellite trajectory control by single impulse correction

11 p1684 A72-26902

Geostationary satellites spacing dependence on quantifying factors, describing space environment experiments for satellite attitude stability and ground station antenna patterns and polarization effects

[AIAA PAPER 72-542]

12 p1780 A72-27365

Attitude determination during transfer orbit operation of SKYNET and NATO synchronous communications satellites

[AIAA PAPER 72-544]

12 p1876 A72-27367

Correlation technique for position location in surveillance and navigation by phase extraction from range tones using synchronous satellites

[AIAA PAPER 72-564]

12 p1842 A72-27375

Aircraft and water vehicles mobile communications via stationary satellite, discussing optimum multiple access and repeater configuration

[AIAA PAPER 72-565]

12 p1781 A72-27376

Titan 3 family systems analysis for delivering multiple communication satellites to geostationary orbits

[AIAA PAPER 72-570]

12 p1870 A72-27378

Synchronous communication satellites body stabilized three axis attitude control superiority over dual spin techniques, emphasizing single large pitch momentum wheel configuration with magnetic torquing

[AIAA PAPER 72-572]

12 p1876 A72-27380

Solar electric propulsion for satellite transport into geostationary orbit, discussing launchers, energy supply, electrostatic ion thruster and mass/power ratio

[AIAA PAPER 72-505]

12 p1860 A72-27422

Structural design, performance and costs of rigid or semirigid solar panels for geostationary satellites power supplies

12 p1758 A72-28034

Structurally integrated ion thruster /ISIT-5/ for synchronous satellites attitude control and station-keeping, presenting design and performance data

[AIAA PAPER 72-492]

13 p2027 A72-28950

Characteristic thrust concept introduced to classify propulsion system tasks related to geosynchronous communications spacecraft, developing approximate analytical models

[AIAA PAPER 72-514]

13 p2052 A72-28977

Experimental communications satellite system of ATS F and G geostationary satellites for specific application, discussing system performance measurement instruments

[AIAA PAPER 72-578]

13 p1918 A72-28986

Proton and electron fluxes limits in synchronous orbit, investigating local time dependence

13 p2031 A72-29393

Military geostationary communication satellite Skynet 2 subsystems design development and testing

13 p2052 A72-29856

- Seasonal changes in magnetospheric directional fluxes at synchronous altitudes due to solar wind induced field line knee effect and drift shell asymmetry 14 p2097 A72-30131
- Geostationary artificial satellite orbital parameters calculation, taking into account lunar, solar and light pressure perturbations 14 p2150 A72-30451
- Barbados oceanographic meteorological experiment /BOMEX/ sea air interaction program in equatorial Atlantic, using real time synchronous satellite information 15 p2225 A72-31808
- Skyнет 1 synchronous satellite orbit determinations and longitude acceleration due to tesseral harmonics of earth gravity, using tracking station range data 15 p2321 A72-31949
- Anisotropic electron pitch angle distributions at synchronous altitude due to wave-particle scattering and ionospheric acceleration along field lines 15 p2299 A72-31961
- Report on photo-sheath calculations for the satellite GEOS. 17 p2553 A72-34629
- Europa III preparatory phase. 17 p2621 A72-34899
- International UV Explorer synchronous satellite program objectives and technology, describing spacecraft design, instrumentation, ground system, telescope control and data handling 17 p2621 A72-34900

- U SYNCHROTRON RADIATION
- SYNCHROTRON RADIATION**
- Narrow-band type 4 bursts behavior comparison with synchrotron radiation in media with refractive

index less/equal unity, determining magnetic field and electron energy 01 p0118 A72-10415

Synchrotron radiation from incoming auroral electrons based on Schwinger equation, accounting for hf backscatter sounder noise 01 p0060 A72-10839

Photometric calibration of long wavelength vacuum UV standards by synchrotron and plasma black body radiation 01 p0073 A72-11399

Fast cyclotron and synchrotron transverse waves noise measurement in electron flux, using resonator with homogeneous electric field 02 p0190 A72-11573

Periodic solar flare modulation by pulsating structure, attributing radiation to synchrotron radiation emitted by electrons in magnetic flux tube embedded in solar corona 02 p0274 A72-12412

Synchrotron and thermal H II region radio emission in Magellanic Clouds 03 p0425 A72-13259

Radio-astronomical evidence for magnetohydrodynamical pulsations in corona, considering solar radio burst model of pulsating structure due to synchrotron radiation 03 p0432 A72-13349

Charged particle motion in pulsar electromagnetic fields, discussing coherent synchrotron radiation and charge bunching 03 p0438 A72-13874

Absorption effects on circular polarization in synchrotron radiation, discussing frequency and magnetic field dependence 04 p0570 A72-14550

Coherent synchrotron radiation from model with charge distribution moving on ring, applying to pulsars 04 p0566 A72-14555

Spontaneous and induced Compton scattering of high frequency waves by relativistic electrons in synchrotron sources 04 p0487 A72-14902

Moving type 4 radio burst observation with radioheliograph, suggesting isolated self contained synchrotron emitting plasmoid and relation to coronal magnetic field 05 p0710 A72-16521

Synchrotron emission source identification from spectral index dependence on frequency 07 p1059 A72-19807

Steady state problem of energy spectrum of variable magnetic field accelerated electrons, considering synchrotron X ray emission of Crab pulsar and nebula 08 p1231 A72-21119

Synchro-Compton theory for variable compact components in extragalactic radio sources, suggesting stellar mass object collapse as energy source 08 p1233 A72-21181

Quasars and Seyfert galaxies radiation, discussing dust clouds, synchrotron and unstable plasma models 08 p1234 A72-21383

Cosmic electrons energy spectrum between 1 and 25 GeV from balloon observations, noting Compton/synchrotron loss effects [AD-745871] 09 p1377 A72-23001

Nonthermal emission and ejection of matter from galactic nuclei, discussing radio, optical and IR synchrotron sources and background radiation 10 p1535 A72-23906

Cygnus X-1 model with hard X rays from inverse Compton scattering of B star UV photons and IR synchrotron radiation from other component 10 p1530 A72-24944

Gravitational wave observation interpretations, discussing Weber theory of galactic nucleus isotropic radiation and synchrotron radiation sources in terms of black hole existence 11 p1717 A72-25883

Relativistic analysis for synchrotron gravitational radiation emitted by particle in circular orbit around Schwarzschild black hole, noting astrophysical implications 13 p2007 A72-30123

Gyrosynchrotron radiation fields from mildly relativistic electrons in magnetoactive plasma, studying radiative transfer problem 14 p2138 A72-30556

Ionized gas effect on interstellar space synchrotron emission, noting magnetic field orientation-dependent low frequency cut-off 14 p2156 A72-30559

Crab Nebula X ray emission synchrotron model confirmation by sounding rocket polarimeter polarization detection data 14 p2156 A72-30565

Jovian synchrotron emission measurements by radioheliograph at 80 MHz, passing square low detector outputs through RC integrators 15 p2307 A72-31799

Spectrograph for Orion spaceborne astronomical observatory on Salyut space station calibrated with synchrotron radiation from particle accelerator 15 p2242 A72-32744

Quantum mechanics framework for electron movement perpendicular to intense magnetic field, predicting energy broadening with time for initially monoenergetic electron beam 16 p2422 A72-32888

Synchrotron emission source identification from spectral index dependence on frequency 17 p2602 A72-35733

Synchrotron radiation-like angular distribution or gravitational synchrotron radiation produced by ultrarelativistic geodesic particle orbits in Schwarzschild geometry 17 p2583 A72-35820

Polarization characteristics of Schwarzschild black hole gravitational synchrotron radiation in terms of Stokes parameters 21 p3107 A72-41211

Conditions for magnetoactive plasma longitudinal waves with phase velocity near light velocity existence, investigating increments during synchrotron instability due to relativistic particles 23 p3262 A72-43311

SYNCHROTRONS

NT BEVATRON

SYNCLINAL VALLEYS

U VALLEYS

SYNCOM SATELLITES

Scintillation effects on synchronous satellite communications systems at 250 MHz in equatorial region, discussing diversity techniques and composite diffraction refraction theory [AIAA PAPER 72-178] 05 p0631 A72-16900

SYNCOPE

NT BLACKOUT [PHYSIOLOGY]

NT BLACKOUT PREVENTION

Student pilot syncope during altitude chamber training, discussing physiological mechanism from cardiovascular studies and psychiatric evaluation 06 p0767 A72-17877

Case report of pilot near-syncope episode with bradycardia due to hyperactive right carotid sinus reflex 12 p1771 A72-27488

Tilt table tests for orthostatic tolerance, measuring heart rate, blood pressure and responses of fainter and nonfainters 21 p3008 A72-41000

SYNDROMES

U SIGNS AND SYMPTOMS

SYNOPTIC MEASUREMENT

Papers on world geomagnetic survey 1957-1960 covering land, sea, airplane and polar-orbiting geophysical observatory satellite observations, magnetic anomalies and reference field 02 p0219 A72-12008

Magnetic survey worldwide earth coverage by land, sea and airplane measurements data 02 p0220 A72-12008

Ionospheric drift patterns diurnal, seasonal and solar cycle variations from synoptic measurements over east Siberia by closely spaced receivers, using Briggs similar fades method 08 p1160 A72-21510

Synoptic measurement of midlatitude D region electron density diurnal and seasonal variations under quiet conditions, using differential absorption partial reflection experiment 09 p1376 A72-22370

Reference radiosondes for quality control of global high altitude temperature, pressure and humidity measurements, discussing dual soundings and synoptic comparison 10 p1484 A72-25076

Ground based synoptic measurement of mesospheric electron densities, noting variations relationship to solar radiation changes 11 p1626 A72-26428

Barbados Oceanographic and Meteorological Experiment to compare synoptic scale-measured vertical vapor fluxes over tropical ocean 16 p2417 A72-33160

Upper atmospheric trace constituents global mapping by laser radar probing from satellites, discussing feasibility and comparison with ground based system [AIAA PAPER 72-660] 16 p2365 A72-34071

SYNOPTIC METEOROLOGY

Kinematic vertical motions computation from radiosonde wind observations, correlating with synoptic features 01 p0095 A72-10858

Synoptic sea surface temperature mapping off Eastern United States using NASA ITOS satellite II imagery data 02 p0211 A72-11811

Thermal advection statistical relation to vertical motion, discussing conventional synoptic meteorological empirical facts utilization in numerical models for long term weather forecasting 02 p0254 A72-12777

Book on earth, moon and planet space photography, discussing synoptic meteorological data, mapping surface detail inspection and planetary exploration 03 p0438 A72-14090

Computerized synoptic weather map forecasting of heavy snowfall in Colorado
04 p0542 A72-14685

Variance spectral techniques in detecting wave modes of synoptic scale tropospheric wind in midlatitudes and tropics
06 p0841 A72-17634

Stationary-nonstationary temporal sampling for synoptic meteorological networks, illustrating oceanic wind speed measurements
06 p0842 A72-18436

Synoptic and dynamic aspects of tornado-producing thunderstorms development from ATS 3 and aerological data, observing mesoscale convective disturbances
06 p0842 A72-18438

Weather forecasting techniques improvement by synoptic meteorology analysis
07 p1031 A72-20449

Synoptic velocity fluctuations from empirical structural functions of wind fields, proposing spectral kinetic energy distribution model for atmospheric turbulence
07 p1031 A72-20694

Meteorological synoptic analysis of stratospheric planetary wave interaction with lower ionosphere in terms of wind, temperature and ionospheric electron density profiles
09 p1297 A72-22375

Horizontal ozone distribution in middle stratospheric macrosynoptic situations, considering anticyclonic side and jet stream delta region
09 p1301 A72-23194

Upper atmospheric dynamics and electrodynamic processes for evaluation of meteor trail radar observations in synoptic meteorology
10 p1473 A72-24702

Monthly weather forecasting synoptic method development prospects, noting macroprocesses phasing and global experiment program realization impact
11 p1683 A72-26885

Thunderstorm-associated aircraft mishaps relation to surrounding synoptic scale meteorological conditions, discussing storm interior condition contribution to flight stability upset
13 p1992 A72-28851

Synoptic meteorological parameters vs CAT encountered in stratosphere by XB-70 airplane, presenting frequency distributions and probability tables
13 p1994 A72-28867

Persistent intense CAT in upper level frontal zone, discussing synoptic features, vertical wind shears, radar echoes and turbulence intensity
13 p1995 A72-29622

Book on dynamic meteorology covering synoptic disturbance model, numerical weather prediction and baroclinic waves origin
15 p2266 A72-31875

Atmospheric energy spectra from two dimensional synoptic scales applicable to pressure or geopotential surface variables
15 p2266 A72-32721

Atmospheric model for local mesometeorological deviations from large scale field distributions, taking into account synoptic scale influence
16 p2418 A72-33601

Method of constructing a forecast chart of H sub 500 anomalies on the basis of several analogs
19 p2828 A72-38000

Complex analysis of satellite data for electromagnetic emission measurements in the radio, infrared and optical wavelength ranges
19 p2829 A72-38770

Synoptic velocity fluctuations from empirical structural functions of wind fields, proposing spectral kinetic energy distribution model for atmospheric turbulence
20 p2948 A72-39009

Seasonal, nonseasonal and synoptic global variations in stratosphere temperature from satellite-measured radiances, discussing latitudinal warming-cooling relationships
21 p3048 A72-40253

Quasi-two dimensional turbulence model of energy spectra and potential enstrophy transfer in synoptic large scale quasi-horizontal atmospheric motions
21 p3049 A72-41793

Earth surface and background wind effects on mesoscale and large scale meteorological processes in free stably stratified atmosphere
21 p3078 A72-41794

Russian book - Aviation meteorology
22 p3200 A72-42024

Description of global-scale circulation cells in the tropics with a 40-50 day period.
22 p3201 A72-42506

Satellite-observed Southern Hemisphere cloud vortices in relation to conventional observations.
23 p3285 A72-44145

SYNTAX

NT SYLLABLES
NT WORDS [LANGUAGE]
SYNTHETIC ARRAYS

Supersynthesis antenna array design by analytical approach involving isolation and separate optimization

of parameters effects on spatial frequency component sampling
06 p0771 A72-17341

Receiving antennas polarization parameters selection in side-looking synthetic aperture radars
10 p1453 A72-24905

Ultrasonic imaging system based on side-looking synthetic aperture radar principles, using B-scan technique
19 p2798 A72-37624

Linear HF radar antenna array aperture synthesis for ionospherically propagated signal reception in air-plane for achievement of ideal directivity without ionospheric compensation
21 p3022 A72-41080

SYNTHETIC FIBERS
NT GLASS FIBERS
NT NYLON [TRADEMARK]
Microfibrillar superlattice with vacancy defect and point dislocation in microcrack formation and propagation in nylon 6 fibers
05 p0681 A72-16308

Stress relaxation measurement assembly for polymer film and fiber samples under tensile stresses at 213-573 K
07 p0986 A72-19779

Inorganic single crystal titanate whisker fibers with high modulus strength for plastic reinforcement, noting mechanical, thermal and physical properties
08 p1193 A72-21685

Test procedures and apparatus for short and long term creep of polymer monofilaments under radial compression
08 p1194 A72-21758

Morphology and physicomechanical properties of carbonized polyacrylonitrile fibers by scanning electron microscopy, discussing macro and microdefects effects on strength characteristics
08 p1195 A72-21762

Carbonized and ion beam thinned polyacrylonitrile copolymer fibers examination by low angle electron scattering electromicroscopy technique
09 p1339 A72-23190

Model with lamellae and tie molecules disordered alignments to explain relation between stress-strain behavior and bond fracture in highly oriented polymer fibers
17 p2569 A72-34258

SYNTHETIC RESINS
NT ACRYLIC RESINS
NT EPOXY RESINS
NT FURAN RESINS
NT NYLON [TRADEMARK]
NT PHENOLIC RESINS
NT POLYAMIDE RESINS
NT POLYESTER RESINS
NT POLYMETHYL METHACRYLATE
NT THERMOPLASTIC RESINS
NT THERMOSETTING RESINS
NT VINYL COPOLYMERS
High vacuum mass spectroscopic analysis of volatile products released under friction from solid synthetic resin lubricants with molybdenum disulfide as antifriction filler
12 p1835 A72-28199

SYNTHETIC RUBBERS
NT ELASTOMERS
NT THIOPLASTICS
Liquid polysulfide rubber, discussing fabrication method and physical properties
07 p1024 A72-20603

Mechanical characteristics of natural and synthetic rubber, noting features of cork filled urethane
10 p1502 A72-24861

Temperature effects on synthetic rubber sliding friction characteristics against smooth steel surfaces under compression loads in vacuum and air at 10-140 C
13 p1962 A72-28554

SYSTEM EFFECTIVENESS
Multivariable control systems, discussing effects of interaction vs noninteraction /decoupling/ on system performance and energy requirements
07 p0962 A72-19715

Computerized and analytic techniques for estimating multiplexed systems output probability distribution, considering system effectiveness, reliability and survivability
10 p1486 A72-23977

Communication satellite systems reliability assessment using figure of merit method
10 p1435 A72-23991

Aerospace management systems effectiveness in design, development, test and engineering areas, discussing cost, scheduling and technical performance factors
10 p1565 A72-25050

[AIAA PAPER 72-243]
Cybernetic system effectiveness analysis with operations research and statistical theory based on stochastic treatment
11 p1608 A72-25428

Data acquisition and transfer efficiency and reliability in computerized automatic control systems for communications, listing probability and expectation criteria
11 p1600 A72-25436

Radar systems of effectiveness for moving target selection with alternating period compensation devices, allowing for signals and noise statistical properties
11 p1596 A72-26306

Probability distribution density of phase difference between noise and signal-noise sum for radar system efficiency estimation, using Bessel and Whittaker functions
11 p1596 A72-26308

Effectiveness and reliability criteria for information and monitoring systems performance evaluation, suggesting use of revenue ratio
11 p1611 A72-26437

Optimization of diagnostic tests for monitoring industrial system efficiency, obtaining compromise between costs and utilization
11 p1611 A72-26441

Laser beam scanning and recording in two dimensional pattern on silver halide, evaluating systems performance based on signal response, granularity and noise characteristics
20 p2930 A72-39040

Digital computer hierarchical structure based on tree model using request/service resources as nodes, examining parallelor multiple-stream organizations effectiveness
20 p2906 A72-39735

Unknown plant self organizing time optimal controller with variable switching surface and adaptation logic net, noting effectiveness by computer simulation
21 p3037 A72-40639

Book on complete technological system reliability assessment covering performance requirement and achievement, transfer characteristics, sampling, estimation, confidence, synthesis problem, etc
23 p3294 A72-44499

Estimate of the operational efficiency of a human operator in the follow-up mode of a closed-loop control system
24 p3376 A72-45516

SYSTEM FAILURES
Single malfunction diagnosis models in systems failures, describing fixed and sequential testing schedules
02 p0186 A72-11689

Redundancy configuration effect on electronic system reliability, discussing MTBF and cost analysis
02 p0194 A72-12445

Self organizing adaptive aircraft control system with C criterion pitch axis performance and failure compensation
03 p0337 A72-12920

Regenerative system reliability, examining oscillation mode selector
03 p0333 A72-13833

Oxygen hazards, mishaps and safety programs in NASA operations, considering material, design, cleaning and procedural deficiencies and failures
04 p0564 A72-14436

Economically optimal operation of protection circuit for plant subject to stationary random process, determining failure rate of plant
04 p0496 A72-14995

Sequential behavior and inherent tolerance to memory faults in terms of minimum redundancy
07 p0950 A72-19300

Soviet papers on digital computers application to reliability problems solution for recoverable, failing, controlled, redundant and electronic systems
08 p1179 A72-22051

Reliability analysis of redundant and nonredundant systems with different component failures, using probability theory
08 p1180 A72-22053

Functional readiness of periodically inspected recoverable systems with different failure causes
08 p1180 A72-22055

Computerized and analytic techniques for estimating multiplexed systems output probability distribution, considering system effectiveness, reliability and survivability
10 p1486 A72-23977

Reliability program for SAAB 37 Viggen airborne computer, discussing prototype and components operating tests and failure rates
10 p1443 A72-23984

Computer reliability in terms of design criteria to minimize faults incidence, discussing failures detection and correction, fault diagnosis and system maintenance
10 p1444 A72-23985

Reliability statistics of third generation computer systems failure causes, emphasizing cumulative effects of hardware and software
10 p1444 A72-23986

Reliability and time to failure prediction for degradation-prone systems via Markov processes theory
10 p1504 A72-23988

Communication satellite systems reliability assessment using figure of merit method
10 p1435 A72-23991

Operator independence test for human performance reliability modelling based on symptom detection and fault location of sonar system failure
10 p1429 A72-24002

System reliability improvement technique for identification and prevention of failures, using Experience Storage Program for design problem documentation collecting, storage and retrieval
10 p1486 A72-24021

Mathematical model for digital systems reliability, determining probability of success and of various failure modes
13 p1923 A72-28356

Reliability prediction of system with components having independent and constant rate failures
13 p1961 A72-28357

Failure rate function nonparametric estimators comparison on basis of asymptotic and Monte Carlo mean square errors
13 p1985 A72-28364

Mathematical models for complex system debugging in initial life period, noting maximum likelihood estimates for failure rate functions
13 p1962 A72-28365

Magnetic compass use in instrument flight conditions, suggesting emergency procedures during aircraft system failures
15 p2238 A72-32212

Aircraft industry product support role in time delays minimization for aircraft operators, discussing malfunction report, minimum equipment decision and fault diagnosis
15 p2339 A72-32456

Avionics effects on airline operations timekeeping, considering gains due to all-weather capability and engine monitoring vs possible losses due to equipment failures
15 p2208 A72-32461

Man serviced spacecraft systems reliability and maintainability optimization methodology, developing parametric data based on failure modes analysis, components MTBF, duty cycles, redundancy and costs [SAWE PAPER 943]
23 p3343 A72-43483

Allocating optimum time for systems malfunction search.
24 p3406 A72-44661

SYSTEM LIFE
U RELIABILITY
SYSTEMIZATION
U SYSTEMS ENGINEERING
SYSTEMS ANALYSIS

Nonautonomous systems periodic solutions through Liapunov functions construction, considering application to nth-order dynamic systems forced oscillations
02 p0251 A72-11498

NASA/MSC earth observation aircraft program radar scatterometers, presenting system evaluation
02 p0172 A72-11849

Europa 3 candidate propulsion modules system analysis, considering payload, mission flexibility, orbital injection precision, synchronous satellite design influence, satellite-booster interfaces and costs
02 p0287 A72-12731

Symplectic structure of continuous system, constructing relativistic free vibrating cord without linearization
03 p0389 A72-13792

Mathematical modeling methodology for communication receiver life cycle EMC decisions, considering analysis and prediction problems with emphasis on nonlinear circuits and systems
03 p0324 A72-14034

Automated system pathfinder application to systems design and analysis for engineering information exchange
03 p0326 A72-14198

Systems analysis for equipment performance and data management in aerospace programs
03 p0460 A72-14199

Fully redundant relay and data command system for SAS-A satellite, discussing operation and reliability tests
03 p0442 A72-14397

Complex systems stochastic survivability estimates dependence on delay depth and initial conditions of interaction
05 p0640 A72-16204

Synergic control of computer-manipulators, evaluating system
05 p0621 A72-16450

Conventional open and closed loop servo analysis methods applied to Naval aircraft approach power compensator systems, using pilot model concepts [AIAA PAPER 72-124]
05 p0612 A72-16922

Time domain infinite matrices analysis methods for linear stationary and nonstationary multivariable systems, presenting recursion formulae
06 p0792 A72-17310

Third order nonlinear systems phase plane analysis, noting applicability to unity feedback closed-loop systems with linear memory
06 p0792 A72-17313

Nonlinear stochastic systems analysis by extended Volterra-functional method for first and higher order linear plants with constant or time varying parameters
06 p0838 A72-17376

Optimal synthesis of multiparametric machine systems by LP search /determinate analog of random search/, applying to oscillatory models
06 p0821 A72-17726

Book on discrete event computer simulation for complex systems synthesis and analysis covering random numbers use, languages, and interactive man machine applications
06 p0779 A72-17812

Collection of papers on control systems theory and applications covering optimal control, final value control systems, discrete stochastic differential games, linear estimation, etc
06 p0793 A72-17952

GERTS II simulation program for graphically modeling and analyzing complex stochastic systems, discussing applications to assembly line, project management, conveyor and inventory systems
06 p0780 A72-17978

Nonlinear mechanical oscillation systems analysis by analog computer, exemplifying pendulum rotating about vertical axis
06 p0851 A72-18725

Collisional avoidance system operation evaluation, noting protected airspace volume requirement
07 p1032 A72-18835

System properties of information patterns in complex hierarchical automatic control systems
07 p0949 A72-18927

Time-variable multivariable systems reduction to completely controllable and observable systems by subdivision and transformation procedures, using subsystems order matrices
07 p1026 A72-19271

Suboptimal Kalman filter design for system state estimation in presence of plant dynamics uncertainties and measurements noise, optimizing tradeoff between sensitivity and estimation error
07 p0959 A72-19302

Two-variable second order system for multivariable systems predictive control, deriving algorithm for near time optimal control
07 p0961 A72-19709

Multivariable control systems, discussing effects of interaction vs noninteraction /decoupling/ on system performance and energy requirements
07 p0962 A72-19715

Airfield surface system fast-time computer simulation model for airport planning systems analysis
07 p0965 A72-20341

Averaging method for systems with shocks, assessing exact and approximate solutions discrepancy over finite time intervals
08 p1206 A72-20967

Reliability of complex systems performing function with time dependent quantity
08 p1180 A72-22061

Reliability theory distribution function construction for failure analysis in physical processes, considering mechanical system service life and living organisms life span
08 p1180 A72-22062

Automatic systems efficiency determination, using characteristic equation roots sensitivity with respect to system parameters changes
08 p1146 A72-22063

Minimal dynamic systems invariant Borel probabilistic measure with metric space and topological entropy equality
08 p1210 A72-22187

Adaptive algorithms for dynamic systems observation based on extremal data processing systems construction
09 p1283 A72-22219

Ground based ATC information processing systems analysis, considering controllers work load
09 p1348 A72-22778

ATC systems analysis by computerized real time environmental simulation, taking into account new aircraft types, navigation and supervision aids
09 p1348 A72-22782

Generalized polynomial operators for nonlinear systems analysis, presenting local invertibility theorem
09 p1341 A72-23092

Human operator role in ATC systems analysis, evaluating tasks with respect to job demands and personal fulfillment
09 p1270 A72-23127

Air traffic control systems efficiency evaluation, discussing measures for criteria conflict solution
09 p1270 A72-23128

ATC system analysis by fast time arithmetic simulation techniques, describing ground model development
09 p1272 A72-23141

One degree of freedom mechanical system with jump-like variable mass, determining displacement and velocity statistical characteristics under random excitation and mass addition
09 p1353 A72-23608

Analog to digital conversion system analysis and design with linear converter and nonlinear logarithmic amplifier, noting small signal resolution
09 p1284 A72-23678

Hammerstein form nonlinear systems class invertibility and reproducibility criteria derivation, noting decoupling possibility by dynamic precompensation and nonlinear state feedback
10 p1502 A72-23781

Systems analysis and mathematical modeling role in planning transportation networks from control theory viewpoint
10 p1442 A72-23796

Maximum likelihood method of combining system and component data for reliability estimates
10 p1444 A72-24016

Analytical design of pulse width modulated systems with time constant and delay for electronic control using Z transform
10 p1457 A72-24458

System diagnosis based on ordered statistical samples, discussing Kolmogoroff-Smirnov detector use for on-line computers in testing noisy systems
10 p1482 A72-24597

Methods of moments, rational transform approximation, Taylor series expansion and modulating functions used for process identification model, determining system transfer functions
11 p1607 A72-25283

Sampling theorem application to time varying systems, considering Hankel transform as example
11 p1675 A72-25293

Probabilistic analysis of technological systems precision, estimating distribution functions of random output parameters
11 p1609 A72-25430

Reliability analysis of repairable redundant systems with random replenishment of reserves, using discrete time Markov process theory
11 p1600 A72-25440

Continuous signals discrete values for analysis and synthesis of control systems with variable parameters, obtaining recurrent formulas and error estimate
11 p1609 A72-25445

Approximate statistical analysis of PFM and combined modulation systems, proposing linearization method
11 p1609 A72-25447

ATC system, discussing flight data and radar processing functions and terminal automation program
11 p1683 A72-25875

Weighting patterns application to linear finite dimensional systems analysis and synthesis, presenting discrete time realizability condition
11 p1677 A72-26154

Trajectory optimization for low thrust mission and system analysis, exemplifying by Jupiter flyby and comet rendezvous missions [AIAA PAPER 72-426]
11 p1721 A72-26171

Correlations analysis method for homogeneous and inhomogeneous systems under external field based on BBGKY hierarchy and decomposition of reduced distribution functions
11 p1689 A72-26480

Finite difference equations of motion for conservative and nonconservative dynamic systems with finite degrees of freedom, obtaining numerical solution by Hamilton principle
12 p1844 A72-27193

Titan 3 family systems analysis for delivering multiple communication satellites to geostationary orbits [AIAA PAPER 72-570]
12 p1870 A72-27378

First order systems steady state frequency response to general harmonic amplitude modulated input, noting signal attenuation and absence of distortion
12 p1845 A72-27540

Model for supervised repairable system reliability, assuming system life and repair times as exponential probability distributions with deterministic supervisor active and inactive times
12 p1814 A72-27555

Second order systems time optimal control with delay, determining maximum number of switching points for control function
12 p1794 A72-28141

Complete aircraft systems reliability and maintainability, discussing extraordinary variances causes, faulty data inferences and operational testing for equipment specifications validation
13 p1896 A72-28358

Statistical principles of reliability assessment and sequential testing of complex systems, considering confidence level, probability of acceptance and cost factors
13 p1984 A72-28361

Reliability lower confidence limit estimation for serial systems with failure in any subsystems resulting in overall failure
13 p1962 A72-28362

Reliability analysis of automatic systems with structural changes accumulated during operation, noting service life determination and damage prevention
13 p1936 A72-29169

Hydraulic servosystem performance analysis, determining transfer function for time variant input-output relationship, gain levels and stability assurance 14 p2073 A72-30420

Mechanical and electrical technologies unification, discussing systems and balances 15 p2211 A72-31873

Time sharing radio communication system analysis with amplitude modulated carrier, noting power reduction, sideband content and multiplexing 15 p2201 A72-32566

Discontinuity problems in optimal control of systems describable by ordinary differential equations, deriving Weierstrass optimality conditions 16 p2371 A72-32939

Optimization of noise impeding observation of dynamic system subjected to random perturbations, discussing optimal control based on least square estimate 16 p2371 A72-33090

Iterative computational procedure for system parameter identification and optimization, using multilevel technique 16 p2371 A72-33192

Correlation technique for transient response of a hysteretically-damped dynamic system to stationary random excitation. 17 p2579 A72-34231

Nuclear electric propulsion systems performance evaluation for various escape missions 17 p2606 A72-34577

Discrete and continuous systems spurious solutions avoidance through Hamilton principle reciprocal form derivation of geometric compatibility conditions [ASME PAPER 72-APM-54] 17 p2627 A72-34777

Nonlinear system consisting of gas filled tube with pressure sensitive heat source, noting oscillation evolution due to equilibrium perturbation [ASME PAPER 72-APM-21] 17 p2580 A72-34796

Russian book on numerical methods in optimal control systems theory covering functional extremum, dynamic programming, control synthesis and statistical linearization of nonlinear systems 17 p2533 A72-35458

Digital simulation for sampled electro-optical imaging system performance prediction and optimization 17 p2557 A72-35552

New description of a first harmonic approximation for nonlinear distributed parameter systems 17 p2534 A72-35722

The effects of damping on a non-linear system with two degrees of freedom. 18 p2709 A72-36080

Mathematical modeling assumptions and procedures in experimental mechanics, considering transfer function, impedance and human factor roles 18 p2709 A72-36353

Optimally sensitive adaptive control techniques for systems with unknown time-varying parameters, suggesting applicability to ATC 19 p2776 A72-37289

Generalized dynamic systems and process prediction 19 p2833 A72-37378

Mathematical model of class of complex control systems composed of structures obtained from aggregates of ordered sets and random operators 19 p2777 A72-37380

Analysis of discrete automatic control systems with variable parameters by the method of orthogonal expansions. I, II 19 p2778 A72-37438

The output control of linear time-invariant multivariable systems with unmeasurable arbitrary disturbances. 19 p2779 A72-38231

Effects of incomplete adaptation and disturbance in adaptive control. 19 p2781 A72-38263

Parameter identification of a class of multiple input/multiple output linear discrete-time systems. 19 p2826 A72-38269

Feedback loop equations and discrete measuring point methods for synthesis of optimal control systems with location dependent controlled variables 19 p2782 A72-38311

Two state system analytic modelling as nonlinear heat transfer problem 19 p2882 A72-38445

Study of the stability of a polar coordinate compensator 19 p2783 A72-38581

A method of realizing servo links imposed on a mechanical system. I 19 p2835 A72-38587

Book - An introduction to engineering systems. 20 p2945 A72-38925

Incoherent radiation imaging system analysis from detector-display characteristics, target response function and noise characteristics 20 p2922 A72-39044

Synthesis and analysis of a fly-by-wire flight control system for an F-4 aircraft. [AIAA PAPER 72-880] 20 p2887 A72-39119

Dynamic nonlinear system direct statistical analysis by Covariance Analysis Describing Function Technique with linearization, giving illustrative examples [AIAA PAPER 72-875] 20 p2905 A72-39124

System analysis and synthesis for B-52 Control Configured Vehicle program, discussing flutter mode and maneuver load control and augmented stability configurations [AIAA PAPER 72-869] 20 p2887 A72-39130

Nonlinear system described by three generalized coordinates, noting dynamic response stability equivalence to two degrees of freedom system 20 p2953 A72-39553

Use of the multidimensional Laplace transform for the analysis of nonlinear systems with variable parameters 21 p3036 A72-40185

Topological analysis of the sensitivity of a digital system 21 p3036 A72-40222

An application of the concepts and methods of linear systems analysis to the scattering of resonance radiation by an atomic vapour. 21 p3084 A72-40470

Systems analysis approach to the study of spinal mechanisms. 21 p2999 A72-40590

Failure diagnostics in mathematical models of automatic control systems 21 p3038 A72-40712

Mission model for European communication satellite system based on estimated future traffic requirements 21 p3017 A72-40853

Impulse noise in FM receivers in the presence of adjacent channel interference and thermal noise. 21 p3020 A72-40894

Carrier phase jitter extraction method for VSB and SSB data transmission systems. 21 p3021 A72-40910

Quantitative aspects of reliability in process-control systems. 21 p3038 A72-40922

System analysis for an airline operational environment through a computerized network simulation model. 21 p3025 A72-41077

Independent cascaded multicomponent random variable system gain statistics relationship to individual component based on moment derivation, obtaining curves from variance equation 21 p3022 A72-41087

Analysis of impact vibrations by delta-function method - Case of one degree-of-freedom system. I - Perfectly elastic collision. 21 p3121 A72-41238

Extended Kalman filter application to delayed systems for state and time delay estimation, discussing two nonlinear estimators [AIAA PAPER 72-902] 21 p3039 A72-41553

Global asymptotic stability of two classes of control system with pulse-width and pulse-frequency modulation 22 p3162 A72-42184

Polynomial operators for nonlinear systems analysis. 23 p3308 A72-43599

Design of controllers for open-loop unstable multivariable system using inverse Nyquist array. 23 p3275 A72-43609

Asilomar Conference on Circuits and Systems, 5th, Pacific Grove, Calif., November 8-10, 1971, Record. 23 p3276 A72-43851

Berner simulation method /BERSIM/ based on lumping recurring combinations of operations into component subsystems representing specified transformations of input into output variables 23 p3267 A72-44143

A systems analysis of subsonic versus supersonic jet travel. 24 p3466 A72-44580

The heavy lift helicopter - An operations research/technology/performance blend. 24 p3466 A72-44581

A survey and comparison of methods for determining confidence bounds on system reliability from subsystem data. 24 p3406 A72-44652

Robert Bruce's spider problem extended - Reliability of adaptive experimental systems. 24 p3406 A72-44666

Linear analysis and synthesis of three dimensional interference system stationary in space and time domains 24 p3379 A72-44752

Mathematical model for life support system optimization in terms of reduced mass minimization as quality criteria for energy conversion and metabolic processes 24 p3375 A72-45133

Evaluation of the danger of damage to mechanical systems exposed to random vibrations 24 p3459 A72-45449

SYSTEMS COMPATIBILITY

Test facilities for aeropropulsion systems, emphasizing utilization, cost and technical advantages, aircraft inlet-engine systems compatibility and test types [AIAA PAPER 72-1034] 24 p3388 A72-45401

SYSTEMS DESIGN

U SYSTEMS ENGINEERING

SYSTEMS ENGINEERING

Cassegrain type astronomical reflecting telescope design, describing auxiliary equipment 01 p0047 A72-10202

Airline Propulsion Team approach to DC-10 aircraft power plant design for maximum operational effectiveness [SAE PAPER 710778] 01 p0116 A72-10270

Error correction techniques of convolutional coding with Viterbi maximum likelihood decoding for communications systems design, using computer simulation 01 p0026 A72-10344

Multidimensional variable structure systems synthesis for automatic optimization of inertialess technological plants in presence of constraints 01 p0045 A72-10498

Gradient method for optimization control system construction with cross couplings between channels 01 p0045 A72-10501

FM/CW laser radar technique for smoke plume opacity remote measurement, discussing eye safety [AIAA PAPER 71-1081] 01 p0080 A72-10539

Systems approach to space technology application, covering Global Atmospheric Research Program and Earth Resources Technology Satellites 01 p0146 A72-10952

Design and performance of Intelsat III dual TWT power supply, noting space, weight and cost savings. 01 p0007 A72-11056

Electrical power subsystem design in Pioneer F/G spacecraft, using SNAP 19 deployable radioactive thermoelectric generators supplemented by Ag-Cd battery 01 p0008 A72-11065

Electrical power subsystem for Initial Defense Communications Satellite Program/Augmentation, noting solar cells for power conversion and Ni-Cd batteries for energy storage 01 p0008 A72-11066

Air transportation system design for safety and efficiency, discussing navigation facilities and surveillance systems employment for blunder prevention 01 p0098 A72-11117

Inertial navigation role in automatic ATC systems, discussing path control accuracies, environmental conditions, noise and air pollution, etc 01 p0098 A72-11118

Time division multiple access systems for communication satellites, discussing performance and application in Intelsat network 01 p0033 A72-11301

Plasma diagnostics facilities design, circuit diagrams and operation based on Q switched ruby laser and optical recording system 02 p0237 A72-11407

Homodyne frequency converter design using microwave oscillator with bitonal frequency modulation 02 p0223 A72-11415

Anglo-Australian astronomical optical telescope construction, summarizing project organization, components and system design 02 p0199 A72-11640

ATC system decision making problem and future technological and administrative improvements 02 p0255 A72-11718

Hybrid system to process multispectral photographic data from aircraft and spacecraft sensors, assessing data quality, cost effectiveness and delay reduction 02 p0228 A72-11883

Optimum power allocation in design of phase-coherent receiver having bandpass limiter, extending technique from single channel to two channel system 02 p0174 A72-12136

Digital telemetry/communication laser link system design for operation at 1 gigabit/sec 02 p0174 A72-12143

Frame synchronization performance tests for PCM telemetry system, considering code selection, frame length and data recovery 02 p0175 A72-12147

Microwave aircraft landing system development, discussing contract definition, feasibility, prototype development, management planning and program costs 02 p0304 A72-12377

Discrete address ATC radar beacon system operation and design 02 p0256 A72-12378

MTI radar system design philosophy for target detection in land clutter environment 02 p0178 A72-12390

Aircraft and spacecraft integrated avionics systems design with emphasis on telemetry, discussing space shuttle subsystems integration

02 p0179 A72-12403

Multiplex FM recording system parameters effect on system design, considering SNR, deviation ratio, wow and flutter, tape speed errors, crosstalk and FM filters

02 p0230 A72-12409

Visual display systems for man-machine communications, discussing applications, data processing, hardware designs and human engineering

02 p0230 A72-12419

Computer-aided interactive graphic displays for ATC, discussing subsystems, data processing flow and operational capabilities

02 p0257 A72-12420

Soviet book on gas turbine engines control systems design based on similarity theory, determining optimal controller formula from engine parameters

02 p0271 A72-12543

German-American interplanetary solar probes Helios A and B mission characteristics and ground operations system, discussing planning phase [DGLR PAPER 71-122]

02 p0285 A72-12741

Stochastic linear-quadratic-Gaussian problem role in optimal closed loop control system design, emphasizing philosophy, modeling and problem formulation [AD-738763]

02 p0198 A72-12801

Linear and quadratic programming procedures in optimal control problems of stochastic and deterministic system design

02 p0198 A72-12807

Linear multivariable interacting feedback control system optimal design by heuristic approach to determine input-output pairing and controller settings for satisfactory disturbance attenuation

03 p0337 A72-12905

Pulse shaped small parameter variation effects on performance index of minimum fuel control systems with initial and final manifolds

03 p0337 A72-12906

Concorde aircraft electrical power systems design, noting dc and emergency supplies and installation

03 p0311 A72-12910

Book on human factors engineering covering systems design requirements and interface equipment for man machine interaction implementation

03 p0318 A72-13023

Systems, man and cybernetics - IEEE Conference, Anaheim, California, October 1971

03 p0318 A72-13161

Linear time optimal control system with retardations in controls, discussing controllability, existence and uniqueness, synthesis techniques and dynamic programming [AD-737927]

03 p0338 A72-13406

Services and systems integration into total aircraft design, considering utilization and type effects

03 p0309 A72-13413

Magnetic bubble repertory dialer memory design, noting bit storage capacity and random access [IEEE PAPER 28,1]

03 p0328 A72-13782

Analog computer simulation for filtering, phasing, multiplication and addition in AM communication system

03 p0329 A72-14182

Automated system pathfinder application to systems design and analysis for engineering information exchange

03 p0326 A72-14198

High speed digital communication over space to earth satellite links by quadriphase modulation, discussing modulator, receiver and system technology for maximizing data transfer

04 p0485 A72-14477

ATS F and G ground station mobile terminal, discussing system flexibility, utility and reliability features and parabolic antenna design

04 p0485 A72-14478

Chain and branched type electrical and mechanical systems, establishing algorithms with linear flow graphs

04 p0504 A72-14516

Self oscillating dc-dc converter analysis and optimal design, modeling by single loop nonlinear feedback system

04 p0465 A72-14571

Book on system safety engineering covering systems analysis and engineering, evolution of safety philosophy, product reliability and liability, etc

04 p0477 A72-14573

Distributed systems modeled by partial differential equations, identifying unknown parameters by Galerkin method using steepest descent method and nonlinear filter

04 p0505 A72-14674

Collision avoidance systems and pilot warning instruments, minimizing cost by pilot detection, evaluation and avoidance execution

04 p0545 A72-14823

Discrete system high order optimality sufficient conditions and methods for singular and nonsingular controls study

04 p0505 A72-14996

Control system synthesis from transient process estimates with Liapunov functions, proposing optimality criteria based on Gaussian minimum constraint principle extension

04 p0505 A72-14997

ALSEP design and development, discussing reliability, power sources and astronaut interface constraints

04 p0577 A72-15092

Minimal order precompensator with state feedback for decoupling linear time-invariant multivariable control system, discussing design parameters determination from linear equations

04 p0506 A72-15109

Optimal control systems with terminal state constraints, presenting algorithm based on constraint-space conjugate gradient method for function minimization

04 p0506 A72-15111

Product support functional organization, discussing support systems analysis and engineering, trainer design, technical proposals and publications, customer training, field service, etc

04 p0597 A72-15224

Refractory metal thermocouple research program, describing design and performance of ultrahigh vacuum high temperature furnace system

04 p0524 A72-15550

Integrated data processing system organizational model methodology for individual firms, emphasizing interdependence on program groups

05 p0632 A72-15815

Thermal heliotrope adaptation to terrestrial applications, discussing solar radiation energy input dominance assurance and wind effect minimization [ASME PAPER 71-WA/SOL-10]

05 p0614 A72-15893

Structure, controllability and synthesis of n-dimensional invariant systems under perturbation vector, using governing equations

05 p0641 A72-16352

Anthropomorphic robots design and performance for space exploration

05 p0644 A72-16448

Three dimensional global spacecraft attitude control system analytical design technique based on system stability considerations

05 p0726 A72-16457

Heat transfer rate prediction in cooling system design for gas turbines [ALAA PAPER 72-10]

05 p0707 A72-16865

NASA closed cycle MHD facility for power generation, discussing system components, design and operation [ALAA PAPER 72-103]

05 p0616 A72-16936

Aircraft collision avoidance system design and evaluation, developing closed form method for system alarm rate estimation

05 p0688 A72-16945

Adaptive model following control systems design by hyperstability approach for flight control and simulation [ALAA PAPER 72-95]

05 p0613 A72-16956

HF and/or HF-carbon dioxide transfer laser potential power output and design criteria, considering deuterium and fluorine combustion, reaction product expansion and mixing rate [ALAA PAPER 72-147]

05 p0670 A72-16970

Linear time-varying control system synthesis for specific input and maximum admissible error, considering various weighting functions and constraints

06 p0792 A72-17311

Optimal linear multivariable control systems design with prescribed eigenvalues, presenting method for corresponding weighting matrix elements

06 p0792 A72-17315

Raman laser radar (LIDAR) for remote probing, discussing design, construction, testing, atmospheric scattering, and intensity and polarization measurements

06 p0824 A72-17588

Design, development and operation of liquid hydrogen plant, using production for rocket thrust chamber tests and tank pressurization studies

06 p0867 A72-17593

Book on discrete event computer simulation for complex systems synthesis and analysis covering random numbers use, languages, and interactive man machine applications

06 p0779 A72-17812

Earth resources technology satellite program, discussing mission requirements, payload, orbital characteristics, earth stations, data processing, system design and international features [DGLR PAPER 71-139]

06 p0892 A72-18230

Computerized Eros II airborne collision avoidance time frequency system design, considering radar transmission, synchronization and ground stations

06 p0845 A72-18247

Optimal design of dynamic system with universality for series of maneuvers with various degrees of informativeness, considering flight mechanics of limited power engine system

06 p0848 A72-18299

Optimal control systems synthesis with allowance for given reliability, finding extremal value of quality function with constraint on probability of fail-safe operation

06 p0794 A72-18305

Dynamic system optimal design with various degrees of maneuver parameters information, considering space flight mechanics problem of payload maximization for limited propulsive power

06 p0849 A72-18306

Narrow beam radiometer design and performance for atmospheric radiation studies including water vapor continuum absorption and high layer clouds emissivity

06 p0819 A72-18447

C-54 A/B aircraft engine air particle separator anti-ice system design features, manufacturing techniques and testing

07 p1053 A72-18769

Multichannel communication system in adaptive system based on random parameter extremum criterion, deriving average usage time of extremal channel

07 p0938 A72-19008

Systems science - Conference, University of Hawaii, January 1972

07 p0949 A72-19270

First passage time boundary value problem for first order phase locked loop systems, determining probability density function of time to cycle-slip

07 p0959 A72-19273

Algorithmic procedure in compensator design for hyperstable discrete model reference adaptive systems [MRAS/]

07 p1027 A72-19294

Aerospace subsystem alternate designs and cost effectiveness evaluation and optimization, considering algorithm of three functions with minimal coupling

07 p1105 A72-19552

Multivariable plant optimization, considering oil field operations, n-paired transceiver power loads, Laplace and Poisson equations described systems and interindustrial balance

07 p0962 A72-1972

Linear multivariable feedback control system design techniques

07 p0963 A72-1972

Integrated systems approach to computer simulation with functional modules to achieve control processor independent expansion and optimization

07 p0951 A72-20331

Computer simulation requirements for air around transportation system, emphasizing mathematical models capable of system performance relation to design parameters

07 p0952 A72-20362

High resolution digital integrator design based on second order differences

07 p0963 A72-20388

Interactive graphics technique for design of single input linear feedback systems described by state equations or cascaded transfer functions

07 p0963 A72-20391

Single-channel-per-voice-carrier transmission system application to data communication and small earth station operation, discussing modular design and performance

07 p0948 A72-20494

Time optimal closed loop control system synthesis by phase space technique verifying results by state variable approach

07 p0964 A72-20595

Explosive/pyrotechnics performance monitoring for acceptance, lot qualification, comparison testing and system design guidelines

08 p1219 A72-20760

Biased estimator as alternative to linear unbiased estimator for dynamic system model states and parameters optimization and regulation, noting squared errors sum

08 p1144 A72-20852

Test pilot role in attack aircraft avionics systems integration consisting of head-up display, projected map, digital computer, inertial platform, radar and Doppler systems, etc

08 p1165 A72-21012

White Sands Missile Range and Range-Rate system design and verification to meet midcourse tracking requirements under severe target dynamics

08 p1133 A72-21402

Apollo 15 lunar subsatellite particle experiment subsystem design for studying magnetosphere dynamics, plasmas-moon interaction and solar flare physics

08 p1168 A72-21519

Radio communication system optimization from viewpoints of global synthesis, including economics and partial synthesis based on noise stability, precision and reliability

08 p1136 A72-21845

- System reliability improvement by redundancy, noting independence of distribution law type
08 p1180 A72-22057
- Adaptive statistical system with feedback loop for weather analysis and forecasting, examining learning process features
08 p1202 A72-22113
- Soviet papers on industrial plants automatic control systems organization, design and teleautomatic arrangement, covering information handling requirements and man machine interfaces
08 p1256 A72-22144
- Automated administrative control systems design, discussing man machine interactions in industrial and economic enterprises management
08 p1256 A72-22145
- Data transmission system design in computerized administrative control system for industrial enterprise management
08 p1257 A72-22148
- Three phase bidirectional pulsating flow hydraulic control system, discussing design, performance and applications
08 p1114 A72-22162
- Redundant polystable element designs with autonomous redundant state breakdown controls for reliability improvement in automatic control systems
09 p1290 A72-22547
- Systems approach to technological forecasting for short range research, considering consumer, market and organizational resources
09 p1413 A72-22950
- Nonlinear systems controllers design based on Liapunov functions and time domain ratio criterion, presenting digital computer algorithm
09 p1290 A72-23090
- Linear time invariant multirate sampled data control systems characteristic equation simplification
09 p1290 A72-23099
- Numerical algorithm for optimal coefficient equations in analytical design of complex control plants
09 p1291 A72-23426
- Optimal control synthesis for linear passive stationary plants with symmetrical coefficient matrices of minimized functional
09 p1291 A72-23431
- Man machine automatic control system structural synthesis, treating system operation as nonlinear programming problem
09 p1291 A72-23438
- Nonlinear systems optimal design mathematical modeling, discussing synthesis, manufacturing, production, exploitation and evaluation
09 p1343 A72-23610
- Analog to digital conversion system analysis and design with linear converter and nonlinear logarithmic amplifier, noting small signal resolution
09 p1284 A72-23678
- Quadratic performance index generation for optimal design of completely controllable, scalar linear system with state feedback
10 p1454 A72-23783
- Optimal probing signals design for state vector parameter estimation, considering Fisher information matrix function as optimality criterion
10 p1454 A72-23786
- Nonlinear programming and parameter optimization algorithms for constrained feedback control system design
10 p1441 A72-23790
- System methodology application to filter design for inertial reference unit calibration in digital test station for FB-111 aircraft navigation system
10 p1456 A72-23820
- Task oriented maintainability engineering relationship to systems engineering and logistics support requirements
10 p1564 A72-23852
- Lunar roving vehicle reliability program and design features of mobility, electrical power and navigation subsystems
10 p1460 A72-24443
[AIAA PAPER 72-233]
- Weak signal turnaround transponder design for pseudonoise coded ranging systems, discussing bandwidth optimization and performance comparison between various receiver configurations
10 p1452 A72-24688
- Cumulative index of papers on radar systems published in IRE/IEEE journals since World War II
10 p1438 A72-24694
- Avionics systems electrical interface connection design information document creation and dissemination, using EMPRENT computer program
10 p1453 A72-24864
- RCA SECANT aircraft collision avoidance system avionics design using nonsynchronous techniques
10 p1509 A72-24866
- Time division multiplexing system for asynchronous high data rate telemetry, discussing design features
10 p1440 A72-25061
- STOL aircraft systems development coordination, considering vehicle design, airport facilities and related ground environment, transportation modes interface and airspace management
11 p1574 A72-25255
- Structure, controllability and synthesis of n-dimensional invariant systems under perturbation vector, using governing equations
11 p1608 A72-25328
- Time to failure determination in complex service systems, examining Markov processes
11 p1609 A72-25435
- Optimal parameters selection for natural vibrations maximum damping rate, applying method to two mass electromechanical system
11 p1686 A72-25533
- Design and development program for air conditioning system of twin engine unpressurized Piper Navajo, noting flight test results
[SAE PAPER 720328] 11 p1577 A72-25590
- Hale observatories computer system design for telescope control and data handling, using solid state techniques
11 p1601 A72-25696
- Optimal dynamic system design for maneuvers with complete statistical information applied to limited power space flight
11 p1610 A72-25796
- Communications Technology Satellite attitude control system design, taking into account dynamic interactions with large flexible solar cell array
11 p1593 A72-25913
- Electromagnetic compatibility system design checklist, noting usefulness to project personnel
[SAE AIR 1221] 11 p1604 A72-26026
- Weighting patterns application to linear finite dimensional systems analysis and synthesis, presenting discrete time realizability condition
11 p1677 A72-26154
- Biowaste resistojet propulsion system development program, discussing design, propellant management and control subsystems
[AIAA PAPER 72-448] 11 p1707 A72-26185
- Integrated display system design with navigation update, weapon delivery, reconnaissance, bomb damage assessment, threat and terrain avoidance capabilities for multicrew military aircraft
11 p1684 A72-26292
- FAA automated ATC system, discussing subsystems related to operational and nonoperational computer program components, data entry and display, communication, personnel and environments
11 p1684 A72-27000
- Communication systems design with error control, applying algebraic codes to biphasic and multiphase modulation systems
12 p1782 A72-27488
- Reliability, quality and testing assurance in ATS F and G system, discussing computerized handling of spacecraft parts information
12 p1814 A72-27524
- Tactical satellite communication system and ground terminal design options for efficiency improvement, considering power sharing, priority system frequency allocation and system control concepts
12 p1785 A72-27844
- American and European solar generator technology development review, discussing roll-up arrays, flexible panels, and stowage and deployment system components
12 p1756 A72-28005
- Automatic control system synthesis by computer-aided version of grapho-analytical method
13 p1934 A72-28459
- Variable structure automatic control relay system design with reduced insensitivity zone and given transient process requirements
13 p1935 A72-28612
- Aircraft electrical power systems design dependence on latitude, minimum weight requirement, reliability degree, environmental conditions and acceleration
13 p1899 A72-28693
- Secondary surveillance radar systems design and planning for ATC application
13 p1917 A72-28698
- Model determining system responses to nominal profiles of atmospheric parameters from orbital to 25 km altitudes
13 p1989 A72-28807
- Hailstone size estimation to design exposed equipment for irreversible impact damage prevention
13 p1993 A72-28854
- High voltage solar array technology, studying power conditioning control system design and array-space plasma interactions
[AIAA PAPER 72-443] 13 p1899 A72-28942
- Experimental communications satellite system of ATS F and G geostationary satellites for specific application, discussing system performance measurement instruments
13 p1918 A72-28986
- Early design phase reliability analysis of large adaptive systems in terms of domination and graph theories
13 p1965 A72-29171
- Signal system design with digital displays for deviation control in complex multiparameter technological processes, using algorithm to estimate efficiency
13 p1936 A72-29177
- Visual display units as manifold input output devices in data processing systems, discussing structure, characteristics and applications
13 p1925 A72-29343
- Optimal design of dynamic system with universality for series of maneuvers with various degrees of informativeness, considering flight mechanics of limited power engine system
13 p2052 A72-29439
- Linear automatic control systems diagnostics and synthesis
13 p1937 A72-29998
- Process computer technology, discussing data recognition, on-line open loop operation and system characteristics
13 p1926 A72-30051
- Optimal control systems synthesis with allowance for given reliability, finding extremal value of quality function with constraint on probability of fail-safe operation
13 p1937 A72-30073
- Aerospace critical systems and future technologies, presenting illustrative diagram for functions combination and interrelations
14 p2175 A72-31140
- Reliability modeling principles, concepts and implementation techniques for switching system design
14 p2091 A72-31167
- Adaptive reception of weak repetitive signals on background of intense fluctuating noise, synthesizing adaptive detection system for multipath propagation and small SNR
15 p2195 A72-31658
- Stage removal and addition effect on multistage axial compressor for application in engine design
15 p2179 A72-31706
- Human waste management system evaluation in zero gravity flight tests, presenting design concept for collection by air flow technique
15 p2189 A72-31825
- Electro-optical systems design - Conference, New York, September 1971
15 p2247 A72-32026
- Time-frequency dissemination system design, discussing radio propagation, time signals, noise effects, synchronous satellite transponders and TV use, accuracy, geographical coverage and costs
15 p2198 A72-32065
- Fraunhofer holograms wavelength dependent distortion reduction by system parameters optimization, applying to color holotape
15 p2239 A72-32357
- Total system approach to time scheduled aircraft operations - Conference, London, May 1972
15 p2339 A72-32451
- Accessory reliability relation to on-time performance, discussing production route in terms of specification, design, development and manufacture
15 p2339 A72-32463
- Sensitivity design of multiple input controller for dynamic optimization applied to linear systems with quadratic performance index
15 p2212 A72-32795
- Numerical methods for Liapunov linear matrix equations solution in control systems analysis and design
15 p2265 A72-32798
- Discrete system feedback design based on complex number plane mapping, determining gain
15 p2213 A72-32800
- State space approach to linear multivariable servomechanism problem, deriving controllability conditions and design procedure
15 p2213 A72-32801
- Automatic systems design for monitoring dynamic control systems, noting feedback control system performance prediction based on subsystems characteristics
16 p2371 A72-33085
- Observability conditions for nonlinear and unsteady linear systems, noting control systems design
16 p2371 A72-33092
- Integrated airborne-ground based instrumentation system for variable stability X-22A aircraft flying qualities research, discussing telemetry, mobile van, landing aids and airplane design
16 p2348 A72-33628
- Airborne flight test data acquisition system modular design to provide digital readings from monitoring transducers analog signal
16 p2364 A72-33645
- Thermoemission ion gage stability and design aspects, discussing application as secondary standard for vacuum measurements
16 p2394 A72-33871
- A/D and D/A converter for color TV signal digital transmission over communication satellites, discussing system design features
17 p2524 A72-34262
- Communication satellite modeling into subsystems to formulate parametric relationships among power, mass and cost, comparing computerized design alternatives
17 p2512 A72-34263

Intelsat satellite SPADE demand-assignment multiple access system design for increased communication flexibility and efficiency

17 p2512 A72-34269

Comparison of circuit call capacity of demand-assignment and preassignment operation.

17 p2512 A72-34270

Thermionic reactor system for auxiliary power and electric propulsion.

17 p2494 A72-34579

Thermionic reactor power conditioner design for nuclear electric propulsion.

17 p2495 A72-34582

Optimized 100 We multicell thermionic power supply design with high reliability, noting isomote converter performance characteristics

17 p2495 A72-34583

Design features, fabrication technology and in-pile testing of thermionic reactor fuel elements

17 p2495 A72-34584

Design of an external-fueled thermionic diode for in-pile testing.

17 p2495 A72-34585

Process computer system design, discussing structural units, data flow coordination with storage, input/output channels and periphery coupling problems

17 p2523 A72-35443

Structural mode vibration control system design for B-1 aircraft to improve ride during atmospheric turbulence and terrain following

17 p2493 A72-35563

Design and analysis of transistorized, selective HF amplifiers with allowance for sensitivity properties

17 p2532 A72-35978

Intelsat 4 multichannel communication network earth station equipment components and characteristics experimental system/SPADE/ study to realize demand assignment

18 p2659 A72-36272

Practical problems and solutions in modeling physical systems with time-domain input-output measurements or specifications.

18 p2663 A72-36327

Systems approach to integrated planning of airfield pavements design, construction, operation and maintenance, emphasizing need for mathematical models, constitutive parameters and limiting criteria

18 p2675 A72-36788

Surveillance radar for clutter rejection and signal loss reduction at airports, discussing system design features

18 p2662 A72-37046

Model reference adaptive control systems design based on optimal control, parametric optimization, stability and statistical estimation theory

19 p2778 A72-37722

Realisation of a high-efficiency electrodischarge-machining power supply.

19 p2807 A72-37846

A computerized system for the preliminary design of commercial airplanes.

19 p2749 A72-38110

Area navigation and its affect on aircraft operation and systems design.

[AIAA PAPER 72-754] 19 p2831 A72-38125

Designing aircraft structure for resistance and tolerance to battle damage.

[AIAA PAPER 72-773] 19 p2752 A72-38133

Structural-matrix methods for discrete automatic control system designs

19 p2779 A72-38185

Design techniques for model-reference adaptive control systems.

19 p2781 A72-38266

Linear dynamic systems parameter identification via optimal input design, noting eigenfunction dependence on positive self adjoint operator

19 p2781 A72-38271

Decoupling and synthesis of certain nonlinear systems.

19 p2827 A72-38275

Integrated systems design procedures as exemplified by Europa 1, 2 and 3 rockets and Symphonie communication satellite development

19 p2869 A72-38302

Systems management in major projects exemplified by the German Satellite Control Center

19 p2783 A72-38303

Design and testing of a nine-channel photometer

19 p2804 A72-38500

A development study for a 65-m radio telescope for the mm wave range

19 p2804 A72-38510

Optimal control synthesis for linear passive stationary plants with symmetrical coefficient matrices of minimized functional

19 p2782 A72-38514

Man machine automatic control system structural synthesis, treating system operation as nonlinear programming problem

19 p2782 A72-38521

Optical communications in Japan.

19 p2766 A72-38602

A 10,000-gpm liquid hydrogen transfer system for the Saturn/Apollo program.

19 p2784 A72-38829

Long term storage and propellant transfer capabilities of propellant depot system design to act in earth orbit as resupply station for cargo/personnel shuttles

19 p2870 A72-38831

Book - An introduction to engineering systems.

20 p2945 A72-38925

Partially coherent light for image formation of objects with amplitude, phase and complex variations, discussing system concepts, coherence control, apodization and techniques

20 p2931 A72-39048

Application of optimization techniques to the problem of determining optical constants of thin films.

20 p2959 A72-39052

Error analyses of Euler angle transformations arising in design of precision pointing systems, guidance sensors and instruments with gimballs

[AIAA PAPER 72-851] 20 p2949 A72-39078

Design analysis and performance characteristics of a circular test base.

[AIAA PAPER 72-845] 20 p2911 A72-39084

Problems and solutions related to the design of a control augmentation system for a longitudinally unstable supersonic transport.

[AIAA PAPER 72-871] 20 p2887 A72-39128

System analysis and synthesis for B-52 Control Configured Vehicle program, discussing flutter mode and maneuver load control and augmented stability configurations

[AIAA PAPER 72-869] 20 p2887 A72-39130

Development of a laboratory prototype spraying flash evaporator.

[ASME PAPER 72-ENAV-28] 20 p2894 A72-39149

Design criteria for the modular space station environmental control and life support system selection.

[ASME PAPER 72-ENAV-25] 20 p2894 A72-39152

Significant factors in environmental and thermal control/life support system design for space shuttle orbiter

[ASME PAPER 72-ENAV-21] 20 p2895 A72-39156

Space shuttle waste collection system development, discussing human-interface requirements, zero gravity effects and operational considerations

[ASME PAPER 72-ENAV-13] 20 p2896 A72-39164

Water and waste management subsystem design for a space station prototype.

[ASME PAPER 72-ENAV-8] 20 p2896 A72-39169

NERVA flight engine control system design.

21 p3083 A72-40764

Public policy, regulatory controls, market strategies and systems economics considerations for future U.S. domestic communication satellite system

21 p3132 A72-40865

Solid state laser sources, light modulators and silicon avalanche photodiode detectors for fiber optical communication, discussing performance and limitations from system design viewpoint

21 p3018 A72-40866

Television transmission performance of an experimental small aperture earth station.

21 p3018 A72-40878

Suppressed clock pulse duration modulation for noisy voice communication channels with hard limiting satellite repeaters, discussing system design and test data

21 p3020 A72-40898

A procedure for the design of asynchronous time division multiplexers.

21 p3021 A72-40909

Improving R & D management through prototyping

21 p3132 A72-40970

Defense systems development based on balance between theoretical studies and hardware prototyping for uncertainty reduction in performance and cost

21 p3132 A72-40971

Optimum design of MHD generator combustion chamber, noting effects of heating temperature, oxygen enrichment degree and flow velocities

21 p2997 A72-41065

Future trends in air traffic control and landing.

[ICAS PAPER 72-04] 21 p3082 A72-41129

Comparison of design procedures of vibration absorbers for systems with random excitations.

21 p3121 A72-41230

Design of vibration absorbers minimizing human discomfort.

21 p3009 A72-41231

Probabilistic approach to design of control systems.

21 p3038 A72-41232

Anthropotechnics/human engineering/ approach to man machine system optimization, discussing task allocation and adaptations of machine dynamics, displays and controls to human operator

21 p3009 A72-41403

Display device layout based on human operator manual control information requirements consideration, discussing functional categories, motion compatibility, indicators relation and integration

21 p3009 A72-41404

Human engineering requirements in aircraft system development.

21 p3011 A72-41423

Design and development of the United Aircraft Research Laboratories acoustic research tunnel.

[AIAA PAPER 72-1005] 21 p3041 A72-41589

Synthesis of statistically optimal multiloop control systems containing essentially nonlinear elements

22 p3162 A72-42183

Statistical synthesis of navigation aids systems with unsteady random interferences, obtaining optimization criterion by least squares method

22 p3202 A72-42233

Aircraft hydraulic control systems modular design for maintainability, emphasizing component removal with minimum hydraulic fluid loss and air entrainment

22 p3140 A72-42294

Digital computer technique and real time monitoring software application to instrumentation data acquisition system, discussing design guidelines and gas turbine engine test example

22 p3156 A72-42683

Integration sphere facility with water cooled long arc xenon sources for pyranometer calibration/ discussing operation theory and system design

22 p3163 A72-42692

A near real time data acquisition/reduction facility for the Boeing wind tunnels.

22 p3164 A72-42699

Book - Computer simulation of dynamic systems.

22 p3157 A72-43083

Technical and economic processes representation on radioelectronic equipment synthesis optimization using elementary random magnitudes involving output parameters deterioration rates and fabrication tolerances

23 p3269 A72-43442

Computerized weight data storage, recording and information system to aid in aerospace vehicle design [SAWE PAPER 933] 23 p3266 A72-43473

Space subsystems cost optimization technique for minimization of total spacecraft plus boost cost, studying orbital logistics spacecraft

[SAWE PAPER 941] 23 p3342 A72-43488

Integration of safety engineering into a cost optimized development program.

[SAWE PAPER 945] 23 p3358 A72-43489

Electrohydraulic stand for vibration strength testing, discussing system design, specifications, frequency-amplitude characteristics and applications

23 p3278 A72-43760

Stochastically optimal terminal control system synthesis for loss function dependence on finite phase coordinates of dynamic system, considering soft landing of flight vehicle

23 p3275 A72-43781

Design optimization of an integrated-circuit direct access memory unit

23 p3267 A72-43840

Equipment assembly design optimization by operational versions determination and criteria evaluation for optimal conditions, noting rotary wing design

23 p3294 A72-44024

Aerospace tug using atmospheric braking during return from geostationary orbit, discussing radiative thermal protection, mass, design and advantages

23 p3340 A72-44277

Basic considerations concerning the design of control systems

23 p3326 A72-44279

Systems approach to airport passenger terminal planning.

24 p3387 A72-44583

SECANT midair collision avoidance system based on nonsynchronous microsec pulse transmission and receiving via randomly selected frequency, describing modular components and operating principles

24 p3422 A72-44646

Invariant transformation of the control laws in ergodic systems

24 p3376 A72-45510

Selection of an optimizing functional in control system synthesis

24 p3387 A72-45512

Analytical designing of regulators for second-order nonlinear systems

24 p3387 A72-45519

Theoretical-experimental method for parametric synthesis of director-type control systems

24 p3377 A72-45522

SYSTEMS MANAGEMENT

Pilots in aircraft systems management involving machine and air traffic environment

03 p3039 A72-13419

Cost reduction by integration of assurance technologies from complex systems development risk management model

[AIAA PAPER 72-245] 10 p1487 A72-24450

Satellite supplement to domestic communication systems, discussing network management, system reliability, broadband capacity, earth station flexibility, and market proposals

[AIAA PAPER 72-554] 12 p1781 A72-27374

Reliability role in commercial and military telecommunications satellite system planning, discussing economic factors, earth station redundancies and maintenance, spare levels and control systems

13 p2051 A72-28352

Expendable space transportation - A 1972 assessment.
[AIAA PAPER 72-732] 18 p2730 A72-36542
Implementation status of the Omega Navigation System.
22 p3203 A72-42945

SYSTEMS STABILITY

Triangular points stability in restricted three body problem by computer program

01 p0122 A72-10004
Stability of and motion about L4 in restricted three body problem with 3 to 1 commensurability between long and short periods of motion

01 p0122 A72-10010
French monograph on extremum values of function with two variables and nonlinear feedback control systems stability, using associate recurrence solutions properties

01 p0044 A72-10164
Frequency conditions of absolute stability for closed automatic control system with nonlinear unsteady units

01 p0045 A72-10499
Plasma column equilibrium position feedback control stability based on combination principle, analyzing system stability

01 p0109 A72-10502
Closed linear systems optimal stabilization determining transfer function from Wiener Hopf equation

01 p0045 A72-10572
Bulk InP three level transferred electron microwave oscillators, observing current-controlled instabilities and operation modes

01 p0036 A72-10632
Sixth order nonlinear differential equation isolated equilibrium point stability determination, constructing Liapunov function

01 p0094 A72-11125
Nonlinear mechanics and stability - Conference, Rome, February 1970

02 p0251 A72-11492
Linear systems partial stability via Liapunov second method, examining relation between uniformly and exponentially asymptotic partial stability

02 p0251 A72-11493
Stability relative to part of variables of n-dimensional vector equation, considering applications to solid bodies with fluid filled cavities and gyrostatt satellite optimal stabilization

02 p0251 A72-11494
Stability theorems reformulation with one-parameter families of Liapunov functions, discussing applications to Matrosov and Rouche asymptotic stability theorems

02 p0251 A72-11495
Stability theory invariance principle extension to generalized dynamical systems, considering problems in thermoelasticity, viscoelasticity and distributed nonlinear networks

02 p0251 A72-11497
Nonlinear systems absolute stability calculation, considering time lag, backlash type nonlinearity and process controller

02 p0196 A72-11674
Varactor diode microwave parametric amplifiers for radio astronomy interferometer, discussing system design features for gain and phase stabilities

02 p0192 A72-12043
Stability properties of functional differential system solutions, discussing Liapunov functions construction

02 p0252 A72-12173
Electroluminescent image converter with positive optical feedback, investigating steady state bistable operation mode stability

02 p0193 A72-12341
Linear regulator and servomechanism theories modification to account for fluctuation disturbances, obtaining deterministic controller design to maintain set point regulation or servotracking

02 p0198 A72-12803
Linear multivariable interacting feedback control system optimal design by heuristic approach to determine input-output pairing and controller settings for satisfactory disturbance attenuation

03 p0337 A72-12905
Stability and perturbation of oscillator system with frequency fixed by all pass ring transmission function with delayed amplitude regulation

03 p0331 A72-13410
Frequency criteria for stability of nonlinear multivariable RLC networks with bounded solutions approaching equilibrium

03 p0338 A72-13411
Gas-liquid bipropellant rocket motor system instability boundaries under various operating and design conditions, interpreting experimental results via time lag model

03 p0406 A72-13632
Stability criterion for system representing amplitude modulation amplifiers development, noting applicability to excitation functions

03 p0338 A72-13791
Liapunov stability of rigorous particular solutions /corresponding to libration points/ of three body

problem, determining motions of satellite influenced by two spherical bodies

03 p0436 A72-13823
Finite time motion stability of systems with small parameter, using method of averaging and matching principle

03 p0390 A72-13910
Solution stability of linear differential equations systems with harmonic coefficients, using Jordan canonical forms and perturbation method

03 p0382 A72-13918
Soviet book on linear automatic control systems with variable parameters covering pulse transfer function determination algorithms, signal transmission characteristics and systems stability

03 p0339 A72-14245
Nonlinear oscillations stochastic instability in dynamic systems, discussing nonequilibrium statistical mechanics

03 p0390 A72-14316
Linear nongyroscopic conservative system stability from modified Lagrange equations of motion, using pseudo degree of freedom concepts and vibration method

03 p0362 A72-14394
Nonconservative stability problems, obtaining eigenvalues with adjoint variational methods [AD-742170]

04 p0583 A72-14446
Stability conditions for direct control systems in critical case, assuming pair of imaginary conjugated and zero characteristic numbers

04 p0538 A72-14623
Plane periodic oscillations of solid body on elliptic orbit, characterizing stability of motion equations periodic solutions

04 p0582 A72-14632
Closed-loop nonlinear sampled-data systems with sampler and finite Hankel transformable distributed elements, deriving frequency domain stability criteria

04 p0504 A72-14662
Nonlinear stochastic systems stability conditions description by Volterra integral equation, applying to distributed parameter feedback control system with nonlinear amplifier of random gain

04 p0504 A72-14663
Liapunov functionals synthesis for continuous system stability study, discussing linear combinations of moments of governing partial differential operators

04 p0538 A72-14671
Unsteady radial flow between fixed and oscillating walls, obtaining flow equations and air bearings stability conditions

04 p0511 A72-14970
Telemetry systems with discrete compression-expansion function, calculating noise stability improvement as compared to linear and nonlinear signal conversion operations

04 p0487 A72-15000
Self oscillating system stability under parametric excitation and harmonic force for large and small natural frequency mismatch

04 p0549 A72-15046
Time-varying systems with observer for feedback control, investigating stability

04 p0506 A72-15108
Numerical instability of gravitational n-body problem considering differences between computed systems and exact solutions to differential equations

04 p0581 A72-15629
Multiple-input multiple-output linear time invariant feedback systems stability, investigating continuous-time case

04 p0507 A72-15694
Stability-instability criterion of time varying linear systems, using canonical form of differential equations [ASME PAPER 71-WA/AUT-20]

05 p0682 A72-15953
Dynamic systems stability under periodic impulsive parametric excitation, deriving simple closed-form analytic stability criteria for special cases from general theory [ASME PAPER 71-WA/APM-19]

05 p0733 A72-15961
Continuous media stationary motion stability using initial boundary value problem of partial differential equations in perturbations [ASME PAPER 71-WA/APM-17]

05 p0647 A72-15963
Encounterless one-dimensional constant density self gravitating system stability for symmetric disturbances, using analytic treatment and computer experiments

05 p0713 A72-16054
Stability characteristics of finite difference schemes based on lumped-parameter model and numerical integrator for wave propagation in continuous media

05 p0735 A72-16081
Structure, controllability and synthesis of n-dimensional invariant systems under perturbation vector, using governing equations

05 p0641 A72-16352
Stability-instability zones of solutions of Whittaker equation in vibration theory

05 p0690 A72-16353

Relay systems stability in orientation control of flexible satellites

05 p0725 A72-16439
Three dimensional global spacecraft attitude control system analytical design technique based on system stability considerations

05 p0726 A72-16457
Existence and bifurcation conditions of singular point consisting of spliced focus spliced out of ordinary trajectories, investigating stability

05 p0690 A72-16593
Liapunov direct method based approaches to hybrid dynamical systems stability, applying to attitude stability of flexible earth pointing satellite [AIAA PAPER 72-18]

05 p0729 A72-16867
Linear time-varying control systems with one feedback nonlinearity, determining combined time-frequency condition for stability

05 p0642 A72-17090
Tunnel diode amplifier stability under parameter variation due to fabrication tolerances, aging, heating, etc

05 p0638 A72-17189
On-off control system stability with feedback proportional to square of velocity, determining system frequency response

06 p0793 A72-17316
Higher order nonlinear autonomous oscillation system limit cycle and stability determination by numerical solution based on Andronov point transformation and Liapunov theory

06 p0838 A72-17377
Necessary and sufficient equilibrium stability conditions for differential equations systems with quasi-homogeneous right sides

06 p0838 A72-17382
Triangular points linear stability in elliptic restricted three body problem, determining exponents by convergent iteration method

06 p0878 A72-17664
Star cluster stability in form of Einstein model of rotating spherically symmetrical mass system, using Newton approximation

06 p0883 A72-18018
Transit instrument system year-to-year stability in astronomical time determination, considering seasonal wave causes and star coordinate errors

06 p0885 A72-18037
Frequency criterion of weak instability in nonlinear control systems

06 p0794 A72-18304
Stochastic optimal control for operations of plants with pure lag and two point estimate of performance index investigating systems stability

06 p0795 A72-18662
Forced vibrations and stability of one degree of freedom system with damping proportional to velocity, determining amplitude and phase resonance curves

06 p0901 A72-18710
Stability analysis of steady control systems acted upon by random signal in single valued one dimensional nonlinearity form, using statistical linearization

07 p0959 A72-18989
Book on asymptotic behavior and stability in ordinary differential equations covering linear and nonlinear systems, Liapunov and analytical-topological methods

07 p1026 A72-19184
Light amplifier steady state pulse local instability against amplitude perturbations in absence of relaxation or inhomogeneous broadening

07 p1002 A72-19204
Hyperstable algorithm for multiinput and output systems identification through equation error method, representing scheme as equivalent time varying nonlinear feedback system

07 p1027 A72-19290
Singular perturbation of absolute stability of Lure-Postnikov nonlinear systems described by differential equations with small parameters at higher derivatives

07 p1027 A72-19293
Closed system equilibrium correlation functions relationships based on total momentum conservation, discussing application to solids or liquids electrical conductivity via nuclei dynamics

07 p1035 A72-19669
Absolute stability region of linear portion of single loop automatic control system with one nonlinear element determined by frequency criteria

07 p0963 A72-19898
Reduction principle validity in perturbed motion stability theory for near-critical systems with gyro horizon application

07 p1035 A72-19972
Asymptotic method applications to differential equations solution construction and stability analysis and to stochastic systems

07 p1028 A72-20206
Stability requirement of gyro systems in generalized Thomson-Tait theory

07 p0989 A72-20277
Minimum dimensionality determination for control process stabilizing linear mechanical system equilibrium position, obtaining necessary and sufficient conditions

07 p1036 A72-20320

Control system stability with nonlinear feedback in steady equilibrium state 07 p0963 A72-20321

Stability and local error of difference formulas derived from characteristic polynomial for first order ordinary differential equation solution 07 p1028 A72-20472

F region electron-ion gas dynamic model with stability dependence on periodic solutions convergence of continuity equations 08 p1153 A72-20725

Convergence and stability criteria of monotonic difference schemes for linear parabolic differential equations with interface boundary conditions 08 p1199 A72-21286

Nonlinear differential equations system stability conditions for arbitrary initial perturbations of zero solution, using Liapunov functions 08 p1199 A72-21461

Small perturbation stability of discontinuous solution of equations of motion for solid fuel combustion processes 08 p1253 A72-21463

Linear system oscillations and stability under random disturbances, using Laplace transform and Sh-tokalo method 08 p1146 A72-21730

Electroluminescent image converter with positive optical feedback, investigating steady state bistable operation mode stability 08 p1143 A72-21947

Hydraulic actuator servomechanism performance dependence on asymmetrical spool valve lap and closed loop system stability 08 p1113 A72-22153

Stability solutions of collective oscillations of spherical star cluster rotating in near circular orbits in self consistent field 08 p1239 A72-22180

Asymptotic motion stability for part of periodic and continuous systems variables, deriving solution uniqueness sufficient conditions 09 p1350 A72-22206

Potential noise stability of wideband communications systems during discrete signal reception on combined background of quasi-white noise and spectrally lumped interference 09 p1277 A72-22569

Mechanical system with inertial vibration sensor and nonlinear spring, obtaining global asymptotic stability of zero solution of differential equations describing natural vibration 09 p1399 A72-22697

Pod-mounted jet engine follower force instability, analyzing two degrees of freedom system dynamics 09 p1374 A72-22938

Stability analysis of composite systems, applying scalar and vector Liapunov function approach to specific examples 09 p1290 A72-23091

Linear multivariable system stabilization by output feedback technique based on gradient approach 09 p1290 A72-23097

Hyperstability conditions generalization for model reference adaptive systems, using positive definite kernels properties 09 p1290 A72-23098

Difference equation inequalities in sampled data system stability analysis, discussing solution asymptotic behavior 09 p1342 A72-23252

Stability degree analysis of linear feedback control systems with dead time, presenting proportional and integral compensation diagrams produced with digital computer program 09 p1291 A72-23370

Liapunov theory solutions stability for oscillations along galactic axis of symmetry 09 p1390 A72-23396

Motion stability of linear discrete deterministic and random systems over finite time interval 09 p1291 A72-23428

Liapunov functional stability analysis in structural dynamics problems including wave equations with nonlinear damping 09 p1407 A72-23457

Differential equations solutions stability for physical discrete systems with delayed argument, impact excitation, variable mass or structure, disturbances or weak couplings 09 p1343 A72-23601

Dynamic systems stability problems, differential equations linearization and random processes 09 p1343 A72-23603

Hartman-Olech theorem to prove asymptotic stability of mechanical system with nonlinear elastic characteristic, analyzing differential equations of motion 09 p1343 A72-23612

Computer aided design of linear time-invariant multivariable feedback control systems, given specifications in frequency domain in stability margin form 10 p1455 A72-23789

Stability criteria for continuous dynamic system under parametric excitation derived by Liapunov

direct method, using time dependent functionals and Rayleigh operators quotients 10 p1510 A72-24187

Upper bounds on lumped and continuous dynamic systems motion under loads and perturbations, discussing structure stability conditions 10 p1554 A72-24188

Perturbation method for stability boundaries of Hill equation with three independent parameters 10 p1505 A72-24190

Predictor-corrector method for stiff linear differential equations, considering truncation error estimation and system stability 11 p1675 A72-25272

Discrete time systems with periodic feedback gain, deriving stability conditions and Nyquist plot from linear operator spectral theory 11 p1608 A72-25318

Input-output stability of linear time invariant multivariable closed loop control systems 11 p1608 A72-25327

Structure, controllability and synthesis of n-dimensional invariant systems under perturbation vector, using governing equations 11 p1608 A72-25328

Stability-instability zones of solutions of Whittaker equation in vibration theory 11 p1685 A72-25334

Absolute stability conditions of zero solution for PAM automatic control systems equations in terms of transfer function 11 p1609 A72-25446

Extremal feedback control system operation with integral PFM in extremum drift mode, determining equations of motion and steady state regime 11 p1610 A72-25449

Asymptotic stability of astatic pulse frequency modulated feedback control systems with discrete correction, obtaining sufficient conditions in closed form with Liapunov method 11 p1610 A72-25450

Pump and unloading valve hydraulic system model with waves processes allowance in connecting pipe, discussing liquid mass and leakage effects on stability 11 p1578 A72-25770

Stiffly stable implicit linear multistep algorithm for deriving stability properties from extended complex plane transformation 11 p1677 A72-25860

Numerical stability in linear algebraic equations, considering mapping from input data to desired output information 11 p1677 A72-25861

Equilibrium stability of hyperelastic bodies under finite strain, deriving differential equations and boundary conditions of critical equilibrium states 11 p1686 A72-25916

Star cluster stability in form of Einstein model of rotating spherically symmetrical mass system, using Newton approximation 11 p1718 A72-25954

Transit instrument system year-to-year stability in astronomical time determination, considering seasonal wave causes and star coordinate errors 11 p1719 A72-25973

Linearization and Liapunov stability analysis of nongyroscopic holonomic conservative dynamic differential equations system 11 p1677 A72-25979

Self balanced microwave static calorimeter with substantial delay time, discussing system instability conditions 11 p1634 A72-26450

Closed loop system stability, considering small gain and passivity theorems interrelationship and scattering matrix 11 p1612 A72-26470

Design analysis of emitter- and collector-base gain stabilized junction transistor amplifier at elevated temperatures using passive elements 11 p1606 A72-26569

Random Fredholm and Volterra integral equations applied to stochastic systems, investigating absolute stability concept 11 p1679 A72-26780

Triple stellar system evolution and disintegration, discussing energy partitioning and initial velocity effects on stability 12 p1865 A72-27095

Natural vibration modes of coupled spring-mass nonlinear system with two degrees of freedom from stability analysis 12 p1844 A72-27245

Holographic recording systems stabilization with intermittent exposure control for interference patterns fidelity 12 p1806 A72-27263

Approximation for mechanical system equilibrium perturbation anharmonic analysis based on Fourier series with real multiplication factors of fundamental pulsation 12 p1845 A72-27542

Antoniou bridge type gyrator circuit stability, showing sensitivity to resistors ratio variations 12 p1792 A72-27698

Steady bifurcating time periodic solutions stability for flows in bounded domain with complex conjugate simple eigenvalues at critical Reynolds number 12 p1837 A72-27712

Asymptotic stability of mechanical system with two mathematical pendulums and rod subjected to axial follower, correcting aerodynamic and dissipative forces 12 p1847 A72-27979

Binary logic circuits with interconnected repeaters and inverters, discussing signal level selection to ensure maximum noise stability 12 p1786 A72-28120

Limiting stability cases of vehicle with linear attitude control and pointed at star by two power gyroscopes in conical suspensions 13 p2051 A72-28383

Analytical solution to difference stability equations evaluating adequacy of difference scheme for circular cylindrical shell and rectangular hinged plate under compression 13 p2053 A72-28389

Time constant limited stability of numerical integration procedures for systems of kinetic equations, examining causes and effects of stiffness 13 p1985 A72-28419

Single frequency generation stability of one dimensional model of traveling wave laser using inhomogeneously broadened active material 13 p1967 A72-28470

Equilibrium state stability in elastic conservative system, relating system postbuckling behavior to critical branching point 13 p2054 A72-28478

Stability and oscillation in linear and nonlinear systems, examining existence of T-periodic solutions/harmonic forced vibrations/ 13 p2000 A72-28484

Reliability and stochastic stability theory relationships for multidimensional and continuous systems 13 p1985 A72-28486

Popov frequency criterion analog for stochastic nonlinear continuous systems with random parameters and disturbances, investigating stability 13 p1935 A72-28608

Suboptimal controls of linear multidimensional plants with variable parameters, considering asymptotic stability 13 p1935 A72-28609

Control parameters required for stabilization of motion in systems with nonholonomic couplings by dynamic programming method of summary representations 13 p2003 A72-29068

Associated system instability related to difficulties encountered in maximum principle application to optimization problems solution 13 p2003 A72-29069

Homogeneous difference schemes stability for ordinary differential equation of arbitrary order with discontinuous coefficients, analyzing positive definite operators class 13 p1986 A72-29076

Coefficient stability of homogeneous difference schemes using irregular networks for fourth order differential equation with discontinuous coefficients 13 p1986 A72-29087

Liapunov functions and integral inequalities for study of finite time stability of motion, noting small parameter system subjected to continuous disturbances 13 p2004 A72-29496

Kalman filter stability analysis by mathematical modeling, using floating point computer algorithm 13 p1934 A72-30006

Frequency criterion of weak instability in nonlinear control systems 13 p1937 A72-30072

Hydraulic servosystem performance analysis, determining transfer function for time variant input-output relationship, gain levels and stability assurance 14 p2073 A72-30420

Second order moments of system with parametric excitation by filtered white noise calculated with Fokker-Planck equation, giving condition for mean-square-stability 14 p2131 A72-30711

Ferroresonant circuit with inductor, resistor, nonlinear ferrocapacitor and voltage source, deriving oscillation stability condition 14 p2090 A72-31119

Periodic two-parameter solution families of dynamic systems having first integral, showing stability and bifurcation existence criteria relationships to dimensionality and Hamiltonian systems 15 p2261 A72-31309

Spectral stability characteristics of difference schemes for hyperbolic differential equations in gas dynamics involving triangular and tetragonal bases 15 p2178 A72-31444

Instability regions of vibratory system with two degrees of freedom under random parametric effect, calculating bounds by numerical and analytical methods 15 p2275 A72-31608

- Numerical integration of equations of motion in finite element methods, investigating explicit methods stability 15 p2326 A72-31717
- Linear autonomous differential equations finite time stability theory, extending to systems driven by white noise 15 p2264 A72-31764
- Conical scanning system for Pioneer Jupiter spacecraft pointing control, discussing signal processor, spacecraft dynamic behavior, system stability and error budget 15 p2320 A72-31791
- Multidimensional asynchronous FM pulse systems stability, considering continuous linear part transmission matrix poles located on imaginary axis 15 p2212 A72-32172
- Saturating nonlinear feedback systems stability under bounded input excitation, discussing error signals magnitude and duration 15 p2212 A72-32246
- Quasi-optical transmission line stability improvement, investigating pulsating light beam concept 15 p2202 A72-32663
- Limit cycle stability of third and higher order feedback systems predicted from negative slope of describing function 15 p2213 A72-32796
- Liapunov functions for nonlinear autonomous difference equations stability analysis, defining difference gradient, principal sum and definite sum 15 p2265 A72-32802
- Negative resistance devices, stability under open and short circuits from dc I-V characteristic shape 16 p2368 A72-32857
- Mechanical system nonlinear perturbation effect on equations of motion solutions, deriving boundedness and stability conditions via inequality theorems 16 p2423 A72-33101
- Nonparametric probability density function modeling algorithms comparison for convergence rate and limit cycle stability relative to implementation ease 16 p2367 A72-33867
- Thermoemission ion gage stability and design aspects, discussing application as secondary standard for vacuum measurements 16 p2394 A72-33871
- The numerical solution of hyperbolic systems using bicharacteristics. 17 p2574 A72-34449
- Nonlinear system consisting of gas filled tube with pressure sensitive heat source, noting oscillation evolution due to equilibrium perturbation [ASME PAPER 72-APM-21] 17 p2580 A72-34796
- Comparison principle and finite time stability of control systems. 17 p2581 A72-35052
- Transmission line with feedback, deriving Nyquist stability from Michailov criterion with application to liquid fuel rocket model 17 p2621 A72-35100
- Hamiltonian system evolutionary stability via area preserving mapping, using Bartlett eigenvector method 17 p2547 A72-35108
- Continuous elastic systems flutter and divergence instability under nonconservative loading, determining slopes of loading-frequency curves 17 p2633 A72-35255
- On the stability of axisymmetric systems to axisymmetric perturbations in general relativity. I - The equations governing nonstationary, stationary, and perturbed systems. 17 p2611 A72-35315
- Absolute stability analysis of attitude control systems for large boosters. 17 p2622 A72-35489
- Stability and transient behavior of composite nonlinear systems. 17 p2534 A72-35530
- Equivalent predictions of the circle criterion and an optimum quadratic form for a second-order system 17 p2577 A72-35534
- Stability of linear time-invariant distributed parameter single-loop feedback systems. 17 p2534 A72-35535
- Lyapunov functionals for a class of delay-differential systems. 18 p2709 A72-36052
- Feedback controller synthesis from nonlinear system modeling by linear equations, proving theorem relating stability properties 18 p2672 A72-36060
- Stability solutions of collective oscillations of spherical star cluster rotating in near circular orbits in self consistent field 18 p2724 A72-36236
- Russian book - Introduction to the theory of stability of motion 18 p2711 A72-36523
- Linear homogeneous system of differential equations as model for perturbation problems including functions with retarded and/or advanced arguments 18 p2705 A72-36614
- A-stable, accurate averaging of multistep methods for stiff differential equations. 18 p2705 A72-37019
- Trajectories behavior and finite time stability of differential equations system, using Liapunov techniques 19 p2833 A72-37375
- Complex systems dynamics and stability problems, deriving equations of motion and boundary conditions from principle of least action 19 p2784 A72-37388
- Extension of the frequency-type unconditional stability criterion of controlled systems with one nonlinear nonstationary element 19 p2777 A72-37431
- Stability of nonlinear automatic systems with double pulse modulation, discussing systems with linear and nonlinear pulse elements 19 p2777 A72-37435
- Stability of linear systems with constraint damping and integrals of the motion. 19 p2856 A72-37519
- Existence and bifurcation conditions of singular point consisting of focus fused from ordinary trajectories, investigating dynamic system stability 19 p2834 A72-37565
- Model reference adaptive control systems design based on optimal control, parametric optimization, stability and statistical estimation theory 19 p2778 A72-37722
- A circle criterion for nonlinear stochastic feedback systems. 19 p2779 A72-38235
- Variable stability simulation techniques for nonlinear, rate dependent systems. 19 p2780 A72-38241
- Distributed parameter linear and nonlinear systems analysis, deriving theorem for solution stability of linear partial differential equations 19 p2826 A72-38247
- Hyperstability concepts and their application to discrete control systems. 19 p2780 A72-38248
- A stability theory for perturbed difference equations. 19 p2826 A72-38249
- Control theory stability criteria applied to discrete time feedback systems, investigating numerical integration methods for initial value problems solution 19 p2826 A72-38250
- Recent results concerning a graphical test for checking the stability of a linear time-invariant system. 19 p2826 A72-38251
- Liapunov theory application to stability analysis of large scale dynamic systems, developing methods for vector Liapunov functions construction 19 p2781 A72-38262
- Measurement transducers in industrial process control, discussing requirements for dynamic properties, stability, linearity and computer applications 19 p2803 A72-38315
- F region electron-ion gas dynamic model with stability dependence on continuity equations periodic solutions convergence 19 p2791 A72-38353
- Study of the stability of a polar coordinate compensator 19 p2783 A72-38581
- Binary logic circuits with interconnected repeaters and inverters, discussing signal level selection to ensure maximum noise stability 19 p2767 A72-38621
- Tunnel diode amplifier stability under parameter variation due to fabrication tolerances, aging, heating, etc 19 p2775 A72-38625
- Nonlinear system described by three generalized coordinates, noting dynamic response stability equivalence to two degrees of freedom system 20 p2953 A72-39553
- A theorem of the Liapunov theorem type for the stability of a multidimensional system 20 p2954 A72-39866
- HCN laser mechanical, pressure, temperature and voltage environmental factors effects on output power stability 20 p2934 A72-39967
- Reduction principle validity in perturbed motion stability theory for near-critical systems with gyro horizon application 20 p2955 A72-40029
- Instability conditions for holonomic system with stationary constraints, applying to pendulum and to rectilinear motion of material point 20 p2955 A72-40033
- Numerical solution of quasi-conservative hyperbolic systems - The cylindrical shock problem. 21 p3043 A72-40101
- Stable current-to-frequency converter with continuous integration of analog input signal providing digital output suitable for input to scaler 21 p2996 A72-40207
- Using the quasi-homogeneity of differential equations in modeling physical systems 21 p3083 A72-40377
- Bounded-input bounded-output stability of nonlinear discrete systems by a method of comparison 21 p3037 A72-40645
- Geometric criterion for the design of a non-oscillatory dynamical system. 21 p3037 A72-40647
- Linear equilibrium stability relationship to wave propagation through elastic medium, considering Hadamard theorem proofs 21 p3085 A72-41102
- Avalanche transistor circuit with controlled S shaped I-V characteristics, discussing equivalent circuits and operating points stability 21 p3034 A72-41119
- Elastic conservative structural systems stability with many degrees of freedom, discussing critical singular points effect 21 p3120 A72-41206
- Instability of the equilibrium position of a multidimensional system consisting of 'neutrally' unstable subsystems 21 p3126 A72-41546
- Inductive frequency converter with a characteristic having enhanced linearity 21 p3058 A72-41802
- Stabilities and settling times of nonlinear and time-varying feedback systems. 22 p3161 A72-41937
- Multidimensional asynchronous FM sampled data systems stability, considering continuous linear part transfer matrix poles located on imaginary axis 22 p3162 A72-42080
- Construction of Liapunov functions for time-dependent systems containing inertialess nonlinearities 22 p3205 A72-42176
- Global asymptotic stability of two classes of control system with pulse-width and pulse-frequency modulation 22 p3162 A72-42184
- Double water-bag model stability for plane one dimensional stellar system, computing eigenfrequencies and eigenfunctions 22 p3224 A72-42384
- On the stability of axisymmetric systems to axisymmetric perturbations in general relativity. II - A criterion for the onset of instability in uniformly rotating configurations and the frequency of the fundamental mode in case of slow rotation. 22 p3206 A72-42566
- On the perturbation method in the stability analysis of continuous systems. 22 p3206 A72-42842
- Reduction principle application to solution stability of system of differential equations in critical cases, noting instability of free gyroscope in gimbal suspension 23 p3287 A72-43416
- Decision surface estimate of nonlinear system stability domain by Lie series method. 23 p3274 A72-43540
- Singular small parameter perturbation effect on absolute stability of high order derivatives in Lure-Postnikov nonlinear systems 23 p3274 A72-43544
- Stability bounds for nonlinear systems designed via frequency domain stability criteria. [ASME PAPER 72-AUT-L] 23 p3275 A72-43636
- Asymptotic behavior of solutions of systems of conservative differential equations 23 p3308 A72-43693
- A method for partitioning the phase space into regions with constant-sign increments of phase coordinates 23 p3275 A72-43780
- Sufficient condition formulation for Lure type nonlinear continuous control system exponential absolute stability 23 p3309 A72-43854
- Regions of absolute ultimate boundedness for discrete-time systems. 23 p3309 A72-43857
- Nonlinear nonautonomous dynamic systems practical stability conditions for specified settling time, verifying constant matrix Hurwitz property 23 p3309 A72-43858
- Linear inequalities and P matrices, with applications to stability of nonlinear systems. 23 p3309 A72-43859
- Recent results in convolution feedback systems. 23 p3276 A72-43861
- Synthesis of hyperstable discrete model reference adaptive systems. 23 p3276 A72-43867
- Laser radiation geometric divergence and variation of transmitted intensity with mirror transmissivity at centerline for unstable cavity viewed as oscillator-amplifier 23 p3296 A72-43902
- Approximate harmonic linearization method of stability analysis of nonlinear periodic systems, identifying fictitious oscillations due to computation errors 23 p3277 A72-44007
- Gravitational instability of perturbed and unperturbed matter distribution in form of density and

velocity fluctuations associated with continuity relationship between wavelength and rotation direction
23 p3338 A72-44036

Stabilization of the motion of certain nonlinear systems by a linear approximation
23 p3313 A72-44045

A difference method for plane problems in magnetoelectrodynamics.
[ASME PAPER 72-APM-A] 23 p3321 A72-44051

On the sufficiency of the energy criterion for the stability of certain nonconservative systems of the follower-load type.
[ASME PAPER 72-APM-E] 23 p3350 A72-44052

Stability criteria for phase-locked oscillators.
23 p3272 A72-44192

Determination and quality estimation of stability in discrete linear systems
24 p3386 A72-44722

Potential noise stability of wideband communications systems during discrete signal reception on combined background of quasi-white noise and spectrally lumped interference
24 p3379 A72-44748

On exponential-asymptotic stability properties of Boltzmann's equation and a class of its modifications.
24 p3426 A72-44911

A general theory of convergence for numerical methods.
24 p3419 A72-45300

Analytical designing of regulators for second-order nonlinear systems
24 p3387 A72-45519

Allowable regions for stability multiplier characteristics.
24 p3420 A72-45787

SYSTOLE

Extrastolic potentiation of ventricular contraction effect on dog mitral valve function, using roentgen videodensitometry
01 p0015 A72-11036

Canine and human ventricular myocardium microelectrophysiologic studies of postextrastolic T wave change relation to cellular repolarization and contractile potentiation magnitude
02 p0157 A72-11474

Beta-adrenergic and vagal blockage altered autonomous control effects on left ventricular function in conscious dogs, noting heart rate, stroke volume and end-diastolic and end-systolic diameters
02 p0163 A72-12090

Single linear measure of systolic pressure gradient for calculation of aortic valve area in stenosis severity assessment
12 p1762 A72-27734

Determination of systolic time intervals using the apex cardiogram and its first derivative.
19 p2759 A72-38817

Factors limiting the increase in stroke volume obtainable by positive inotropism - Investigations regarding the sufficient heart in the case of continued postextrastolic potentiation
22 p3145 A72-42748

SYSTOLIC PRESSURE

If subaudible chest wall vibration recordings, discussing external, epicardial surface and intraventricular pressure precordial displacement tracings
01 p0017 A72-10120

Automated constant cuff-pressure system to measure average systolic and diastolic blood pressure in man.
17 p2507 A72-34298

T

T TAIL SURFACES

Dynamic aspects of Fokker F-28 aircraft design.
22 p3138 A72-42831

T TAURI STARS

T Tauri type variable stars spectral features relation to evolutionary sequences, noting stellar atmosphere nonthermal equilibrium plasma region effects
10 p1549 A72-25056

T-2 AIRCRAFT

Mitsubishi T-2 two-place supersonic trainer, describing prototype airframe and propulsion system design and operational features
07 p0913 A72-20306

Supercritical thick wing for structural weight reduction and increased cruise speeds flight tested on Navy T2-C aircraft.
[SAE PAPER 720320] 11 p1576 A72-25583

T-33 AIRCRAFT

Flight test of direct side force control by rudder deflection and asymmetrical drag on T-33 airplane, noting use in dive bombing
12 p1754 A72-27520

Flight experiments to determine horizontal visual restriction effects on T-33 aircraft front cockpit during approaches and landings
15 p2180 A72-31697

T-53 ENGINE

Portable self contained ultrasonic field inspection equipment for nondestructive crack detection in T53 gas turbine compressor disks
01 p0076 A72-10814

Metallographic and fractographic analyses of cracking in T53-L13 gas turbine engine compressor disks
01 p0085 A72-10816

T-63 ENGINE

T63/250 engine program current status, covering turboshaft helicopter engine and fixed wing aircraft powerplant models and applications
[SAE PAPER 720350] 11 p1703 A72-25601

TABLES [DATA]

NT MATHEMATICAL TABLES

Chemical analysis of iron meteorites, tabulating Ni, Co, P and C content
01 p0126 A72-10108

RR Lyrae variables intermediate band photometry, tabulating magnitudes and color of 125 stars
01 p0133 A72-11129

International frequency allocation table revision by World Administrative Radio Conference for Space Telecommunications
02 p0177 A72-12385

Minor planet Eros photographic observations by long-focus refracting telescopes and Ross cameras at various Yale observatories, tabulating ephemerides [AD-737017] 02 p0286 A72-12894

Plane and conical shock waves, presenting graphs and tables for numerical applications
03 p0341 A72-13684

Meteor spectrum analysis, presenting tables for Soviet observations
03 p0438 A72-13979

Earth nutation tables, comparing precession-nutations and tidal potential
04 p0575 A72-15031

Planetary mass determination tables, presenting mass inverse value in constants system with international ephemerides
04 p0575 A72-15032

Photoelectric observations in different colors of eclipsing variable TX Cancri, presenting tables
05 p0723 A72-17199

Niobium carbide thermodynamic properties tabulated for 0-3000 K, deriving equation for heat capacity from low temperature experiments
06 p0832 A72-18430

Observational parameters of 61 pulsars, tabulating names, right ascension and declination, galactic longitude and latitude and period and dispersion measures
08 p1233 A72-21179

Tabulation of calculated rotational line intensities relative to integrated vibration-rotation band intensity for various electron transitions of nitrous oxide
09 p1276 A72-22665

Tago-Sato-Kosako comet positions determination from plates obtained with photographic telescope, tabulating averaged spherical coordinates
09 p1389 A72-23068

Radio emission variations of eclipsing binary stars beta Persei and beta Lyrae tabulated
10 p1547 A72-24946

Atmospheric metal ion chemistry, tabulating thermal energy binary and three body reaction rate data
10 p1434 A72-25160

Experimental data on twin vortices formed behind impulsively started or uniformly accelerated circular cylinders
11 p1572 A72-26375

Lunar transient phenomena during 1540-1970, tabulating observation reports
15 p2312 A72-32093

Tabulation of diatomic molecular lines observed in sunspot spectra with rotation branch, quantum number and vibration band
15 p2316 A72-32750

Jupiter Red Spot position determinations by East German observers tabulated
16 p2456 A72-33496

Liquid metals thermodynamic properties tabulation, including high melting transition metals, based on levitation data and periodic table correlations
16 p2479 A72-34000

Book - Angular scattering functions for spheroids
17 p2582 A72-35457

Some new Dy II identifications in the solar spectrum.
17 p2616 A72-35696

Period changes in eclipsing variables. II - The system VW Cephei.
18 p2723 A72-36084

Tabulation of physical conditions in proton and non-proton solar flares from observations and H alpha line width measurements
19 p2851 A72-37815

Positions of the major planets and the moon observed at the 0.33 M photographic equatorial
19 p2858 A72-37856

Table for reduction of stellar radial velocities to the center of the sun
19 p2859 A72-37909

Novae and background stars relative proper motions, deriving and tabulating absolute proper motion via statistical transformation
19 p2860 A72-37977

A tabulation of pulsar observations.
20 p2969 A72-39399

Mathematical determination of decibel-loudness index, tables for various frequencies.
20 p2956 A72-40077

Spectrum of P Cygni in 1968-1969.
21 p3110 A72-41444

Mesospheric noctilucent clouds tables listing weather stations geographical coordinates, observation time periods, elevation above northern horizon and azimuth
22 p3173 A72-42575

Magnetism of meteorites - A review of Russian studies.
23 p3339 A72-44122

Minerals discovered in meteorites, tabulating formula and occurrence and plagioclase composition
23 p3262 A72-44133

Observations of minor planets at the Crimean Astrophysical Observatory AN SSSR. XVIII
24 p3437 A72-44766

TACAN

Tactical ATC display system for airport surveillance, precision approach and landing and operator/aircraft/machine operations by using terminal Area Surveillance Radar
02 p0230 A72-12422

VOR, Direct Measuring Equipment and TACAN polar coordinate radio navigation systems history, improvements and future development
02 p0257 A72-12644

Operational requirements for VORTAC system improvements, including precision VOR, navigation, broadcast, DME capacity and CAS signal synchronization
06 p0845 A72-17330

Integrated inertial-VOR-DME or inertial-TACAN navigation system, presenting slant range and bearing adjustment procedure via least squares method
16 p2421 A72-34130

TACHISTOSCOPES

Selective attention and short term memory encoding, using tachistoscopic visual display arrangements of capital letters
02 p0166 A72-11544

Perception of tachistoscopic binary patterns, examining reproduction accuracy with respect to pattern length and fixation and end-segregation reference points
18 p2653 A72-36914

TACHOMETERS

Sounding rockets spin rate sensor, describing apparatus operation and size and weight reduction
01 p0071 A72-11112

High resolution angular velocity measurement by high speed digital transducer feeding photosensor pick-up pulses into pulse shaping circuit
14 p2103 A72-30199

TACHYCARDIA

Paroxysmal supraventricular tachycardia initiated by sinus beats in patient, observing A-V nodal conduction delay by ECG and electrophysiological methods
02 p0156 A72-11422

Bainbridge reflex mechanism, showing sinus ganglion role in tachycardia onset
02 p0165 A72-12514

Tachycardia role in coronary vascular bed hemodynamic response to severe exercise in dogs
10 p1426 A72-24488

Aortic regurgitation variation with respiratory sinus arrhythmia and respiratory cycle in dogs during tachycardia and bradycardia
22 p3151 A72-42674

TACHYONS

Tachyon generation of gravitational radiation analogous to Cerenkov emission of electromagnetic radiation
05 p0711 A72-17160

State equation for superdense stars treated as perfect degenerate tachyon gas, noting dynamical stability for arbitrarily large central densities
18 p2726 A72-36715

TACTICAL AIR NAVIGATION

U TACAN

TACTICS

Game theoretical modeling of fighter aircraft turning tactics competition in pursuit combat, using minimax technique
[AIAA PAPER 72-950] 22 p3138 A72-42359

TACTILE DISCRIMINATION

Neural substrates of sensory tactile vision substitution for information mediation in blind subjects, using TV camera
01 p0011 A72-10470

Intervening discrete elements effects on filled duration illusion in auditory, tactual and visual presentation
01 p0014 A72-10720

Natural visual capture result of vision and touch conflict in bilateral comparisons of object length
10 p1430 A72-24270

- Visual and haptic perception in angle reproduction matching task, noting performance differences relation to nature of form discrimination and task
10 p1433 A72-25126
- Visual-tactile senses conflict experimental examination, discussing vision as dominant modality
17 p2507 A72-34249
- Meaningful shape coding for aircraft switch knobs.
17 p2510 A72-35944
- Russian book - Neurophysiological background of tactile perception.
21 p2998 A72-40464
- German book - Somatic sensitivity, smell and taste.
22 p3145 A72-42776
- Tactile information transmission for orientation and motor control, discussing somatic sensitivity peripheral mechanism
22 p3146 A72-42778
- TAGGING**
U MARKING
TAIL PLANES
U HORIZONTAL TAIL SURFACES
TAIL SURFACES
NT HORIZONTAL TAIL SURFACES
NT T TAIL SURFACES
NT TRAPEZOIDAL TAIL SURFACES
Unsteady aerodynamic loadings of flexible aircraft with nonplanar wings and wing-tail surfaces in supersonic flow
[AIAA PAPER 72-378] 11 p1574 A72-25402
Small transport aircraft horizontal tail surfaces flow characteristics determination for stress calculation during flight in turbulent atmosphere
14 p2071 A72-30284
- Problems of interference between oscillating surfaces in subsonic flow
23 p3248 A72-43809
- TAKEOFF**
NT VERTICAL TAKEOFF
Aircraft copilot assistance to pilot in flight phases, emphasizing takeoff and landing and man machine system reliability
14 p2072 A72-30815
U.S.S.R. civil aviation regulations on takeoff and landing minimum conditions for cloud ceilings and visibility range for various aircraft characteristics and equipment
14 p2129 A72-30820
Meteorological and takeoff and landing information transmission by proposed automated meteorological and information service, discussing air-ground data link
21 p3080 A72-40287
- TAKEOFF RUNS**
Atmospheric temperature and pressure altitude effects on runway lengths and aircraft takeoff weights
[ASCE PREPRINT 1242] 01 p0047 A72-10193
TU-154 lift and drag augmenting devices for takeoff and landing characteristics improvement
03 p0310 A72-13472
High performance aircraft takeoff and landing accidents, investigating survival rates
08 p1109 A72-21563
Buccaneer Mk 2 and F-4K Phantom takeoff and landing performance improvement due to boundary layer control by leading and trailing edge blowing
09 p1262 A72-22973
Pilot survival probabilities under various conditions of high performance aircraft takeoff and landing accidents, suggesting emergency action guidelines for pilot training
10 p1428 A72-23732
Turbulent jets effectiveness in protection of aircraft surfaces from rain, describing wind tunnel simulation of takeoff and landing
10 p1463 A72-25137
Propulsion system flexibility in V/STOL aircraft with one lift-cruise engine, discussing takeoff thrust requirements and cruise fuel consumption efficiency
[ASME PAPER 72-GT-105] 11 p1576 A72-25670
Application of electronic data processing airport analysis in airlines operations and for manufacturers.
19 p2747 A72-37277
- TAKEOFF SYSTEMS**
U AIRCRAFT LAUNCHING DEVICES
ALC
The effect of firing temperature on properties of natural steatite and pyrophyllite.
17 p2569 A72-34666
- TALKING**
NT SYLLABLES
NT WORDS [LANGUAGE]
TANDEM WING AIRCRAFT
Tail first/canard/ and tandem wing configurations for natural STOL, discussing low cost aerial work aircraft
06 p0758 A72-18285
Interference induced unsteady aerodynamic forces on tandem airfoils in subsonic flow, using two dimensional model
07 p0910 A72-20101
- TANGENTS**
Trajectory optimization problems solution with terminal state constraints using combined parallel tangents/penalty function approach
02 p0280 A72-12264
- Tangent methods for nonlinear equations iterative solution using alternate tangent and derivative values
07 p1026 A72-19039
- TANK GEOMETRY**
Nonlinear oscillations of liquids in complex geometrically shaped moving vessels, using approximation methods for boundary value problem solution in Cartesian coordinate system
06 p0802 A72-18712
Free small steady oscillations of liquid in solid tanks, considering HF modes
16 p2375 A72-32931
- TANKER SHIPS**
Photothermoelastic analysis of temperature and rupture stress in cryogenic tanker structures, using steel and plastic ship models
[ALAA PAPER 72-344] 11 p1728 A72-25373
- TANKERS**
Electrical discharge-produced explosions aboard supertankers during cleaning operation and electrostatic charging of supersonic aircraft during passage through heavy rain, noting water drop disintegration
24 p3368 A72-44979

Free oscillations of liquid masses contained in tanks, analyzing variational and Ritz methods
04 p0513 A72-15557
Coupled oscillations of inviscid homogeneous liquid with free surface under vacuum or gas filled space in elastic cylindrical container
15 p2217 A72-31472
Plastic composite container cylindrical wall fabrication by two stage procedure combining radial and cross winding of glass fiber rovings
16 p2398 A72-33305
Transient turbulent free convection in a closed container with heating at the sides only.
17 p2638 A72-35642
Transient laminar free convection in closed spherical containers.
[ASME PAPER 72-HT-37] 20 p2986 A72-39669
- TANTALUM**
Hydrogen diffusion, electron transfer and density distribution in Ta as function of temperature and field strength
02 p0242 A72-12009
V, Nb and Ta deoxidizing capability in liquid Fe from oxide phase formation identification by electronographic and X ray analyses
07 p1011 A72-19545
Ta, Nb and La superconductivity, investigating surface contamination effects on electron tunneling characteristics
09 p1367 A72-22554
Ta and W X ray spectra fine structure measurement, providing electron states density in unoccupied regions of energy bands of solids
09 p1370 A72-22842
Polymorphism in Ta vacuum condensates, observing beta-alpha phase transformation in films
09 p1329 A72-23041
Work hardening and recrystallization grain structure of sintered and electron bombardment melted Ta after annealing
11 p1644 A72-26839
Phase composition, structure and strength properties of aluminizing coatings on Ni-Al alloys, noting plasticity increase due to Ta addition
13 p1980 A72-29485
Ta thermal conductivity and electric resistance at various temperatures
13 p1981 A72-29897
Mechanical strength of interstitial solid tantalum-oxygen solutions obtained by electron beam fusion, thermal cycling and saturation as function of temperature and oxygen contents
14 p2112 A72-30163
Superconducting to normal transition field as function of temperature for Ta with thin surface layer variable density impurities
15 p2293 A72-32241
Hydrogen impregnated Ta superconducting to normal transition and M-H curves, discussing effect on impure surface layer superconducting properties
15 p2293 A72-32242
Solute quenching technique to determine hydrogen solubility in Ta to liquid He temperature, comparing with equilibrium measurements
15 p2259 A72-32640
High temperature solid-solubility limit and phase studies in the system tantalum-oxygen.
17 p2567 A72-34731
Orientation dependence of slip in tantalum single crystals.
17 p2567 A72-34748
Iridium and tantalum foils for spaceflight neutron dosimetry.
17 p2558 A72-35901
- Relation between hydrogen embrittlement and the formation of hydride in the group V transition metals.
18 p2700 A72-36578
The influence of interstitial nitrogen on the asymmetry of the yield stress of tantalum.
20 p2935 A72-39006
Experimental setup for the investigation of the spectral radiative capability of metals
22 p3175 A72-41893
Oxidation protection of tantalum and tantalum alloys at up to 1500 C
22 p3188 A72-41973
Relationship between the electrical resistivity and solute concentration in the solid solution of tantalum-hydrogen system.
24 p3412 A72-44718
Application of a field-emission microscope to the investigation of the work function of tungsten coated with a thin layer of silicon oxide and with tantalum
24 p3432 A72-44891
- TANTALUM ALLOYS**
Ta-Ra-B ternary alloy, investigating phase equilibria and isothermal cross sections with X ray analysis
03 p0374 A72-13739
Ta-Co system phase diagram from differential thermal, X ray, and microstructural analyses, determining composition, temperature, structural type and lattice constant
03 p0374 A72-13740
Ta-W-Hf alloy ultrahigh vacuum high temperature creep tests, showing deoxidation effect on creep behavior and early test stage oxygen-associated dynamic strain aging
05 p0674 A72-16392
Mo- and Ta-base refractory alloys creep tests, determining interactions between creep strength, fatigue life and strain aging by fatigue vibration application
05 p0677 A72-17111
Oxidation and hot corrosion tests of coated Ta and Ta based alloys between 800 and 1500 C in still air and in oxidizing gas stream
06 p0828 A72-17614
Electron beam welding of W-base alloy to Ta-base alloy, avoiding Re induced embrittlement by pure Mo transition piece
06 p0821 A72-17710
Phase diagram of Ta-B system by thermal, X ray and microstructural analyses
06 p0833 A72-18434
Magnetic properties, electrical resistivity and hardness of vacuum melted Ni-Fe-Ta alloys
11 p1655 A72-25512
Antioxidation coatings of Ta and Ta alloys for high temperature long term operation, emphasizing sintered molybdenum disilicide
11 p1663 A72-26840
Grain boundary network of allotropic phase change for ductility enhancement in Fe-Ta alloys
11 p1668 A72-26941
Fusion silicide protective coatings performance for Ta alloys under simulated reentry conditions, noting oxidation rate, ductile brittle bend transition temperature and mechanical properties
[ASM PAPER W 72-13.6] 12 p1835 A72-28162
W and Nb effect on Ta base alloys high temperature oxidation behavior
14 p2118 A72-30547
Ta-W-Hf alloy mechanical properties impairment from oxygen contamination, noting hafnium dioxide precipitate in reaction zone
14 p2121 A72-30769
Disilicide coated Ta-W alloy system oxidation behavior at 927-1482 C, using thermogravimetric, X ray diffraction and electron microprobe analyses
14 p2121 A72-30771
Ta alloys fusion weld ductility, discussing welding parameters, alloy components, interstitial impurities and weldment microstructure effects
15 p2244 A72-31775
Phase diagrams for W-Ta-Ti alloys at 1600 C from metallographic and X ray analysis
16 p2407 A72-33533
Solid phase reaction kinetics in zirconium beryllide alloys with Ta and Nb at 900-1400 C, noting Be diffusion effect
16 p2408 A72-33535
Precipitation reactions during tempering of Ti-Ta alloys, studying hcp and orthorhombic martensitic phases from electron microscope observations
16 p2408 A72-33619
The effect of oxygen on tantalum-sodium compatibility.
20 p2938 A72-39297
Oxidation protection of tantalum and tantalum alloys at up to 1500 C
22 p3188 A72-41973
Oxidation rate anisotropy investigation on coupon specimen of Ta-Mo alloy at 950 C
22 p3190 A72-42770
Alloying and impurity effects on mechanical and recrystallization properties of Ta obtained by arc, electron beam and zone melting
22 p3191 A72-42809

Specific-heat and magnetic measurements in superconducting Ta-Nb alloys.

23 p3323 A72-43273

TANTALUM CARBIDES

Dislocation splitting and stacking fault energy variation during plastic deformation of TaC at 2200 C, using bending tests and microscope observations [ONERA, TP NO, 1005]

05 p0670 A72-15861

Tantalum carbide specific heat and other thermodynamic properties over 0-3000 K range

05 p0672 A72-16097

Electron microscope observed dislocation splitting in bent thin tantalum carbide sheet, analyzing results in terms of strain rate law and carbon diffusion model

11 p1669 A72-26948

Structure of the energy bands of titanium, hafnium, and tantalum monocarbides

20 p2939 A72-39311

Structural and reaction kinetic characteristics of W, Ti and Ta/C-Co systems, considering solubility, surface energy, diffusion, segregation and grain growth

21 p3071 A72-41849

Enthalpy and specific heat of tantalum carbide over the temperature range from 273 to 3600 K

22 p3187 A72-41890

TANTALUM COMPOUNDS

NT TANTALUM CARBIDES

NT TANTALUM NITRIDES

NT TANTALUM OXIDES

Intercalation complexes of Lewis bases and layered tantalum and niobium disulfide superconductors, noting critical temperatures

01 p0113 A72-10018

Tungsten, molybdenum and tantalum disulfides oxidation rate determination by fluidized bed technique, calculating kinetic and diffusive processes activation energy

03 p0370 A72-13184

Sputtering sources fabrication by plasma spraying for nitride films deposition with Ta-Hf mixtures

04 p0527 A72-15494

Electro-optic KTN/potassium tantalate niobate/crystals for modulators, deflectors, phase shifters and polarization rotator devices

20 p2922 A72-39047

Investigation of tantalum-compound films at the surface of acicular tungsten microcrystals

21 p3068 A72-40964

TANTALUM NITRIDES

Thermodynamic and electrical properties of tantalum nitride powders and thin films for semiconductor IC technology

07 p1049 A72-19935

TANTALUM OXIDES

Tantalum and tungsten vanadium trinitride oxides crystallographic order ratio from diffraction spectrum intensities and overstructure lines disappearance

05 p0675 A72-16699

Stoichiometric composition, crystal structure and chemical bond variations in Ta-O system

15 p2290 A72-31197

TAPE MERGING

U DATA PROCESSING

U MAGNETIC TAPES

TAPE RECORDERS

Notch noise loading tests on predetection tape recording of FM carriers, showing noise power ratio dependence on record level and bias levels and output equalization

02 p0175 A72-12146

Multichannel high-speed high-density digital recorder, describing tape transport and signal system

02 p0187 A72-12151

High density digital tape recorder with combined phase encoded digital electronics and helical scan video transport

02 p0229 A72-12152

Long life magnetic tape recorder for onboard data storage in space flights, discussing two motor tape transport and static memories for improved reliability [IEEE PAPER 12.4]

03 p0360 A72-13767

Impulse noise reproduction for temporary threshold shift and impulse noise measurements, considering rise time, frequency response and limitations of tape recorders

04 p0521 A72-14847

Arterial pressure data recording technique using magnetic tape recorder and automatic conversion to digital form

12 p1772 A72-27649

Measuring tape recorder, properties and utilization for signal recording and processing, discussing digital computer techniques and compensation for interference effects

14 p2104 A72-30287

The use of airborne magnetic tape recorders for fatigue life monitoring.

17 p2553 A72-34812

High speed, high density digital recording.

22 p3175 A72-41933

Broadband magnetic tape predetection recording of data modulated carrier MHz radio telemetry signals, applying to Aris, Mercury and Gemini programs

24 p3385 A72-45269

TAPER

U TAPERING

TAPERED COLUMNS

Improved bounds for buckling loads of tapered elastic columns.

17 p2626 A72-34330

TAPERED WINGS

U SWEPT WINGS

TAPERING

Longitudinal stress pulse amplification during propagation along tapered elastic bars in direction of decreasing cross section

[SESA PAPER 1894]

02 p0287 A72-11504

Tapered I-beams elastic twisting and flexural-torsional buckling, considering critical loads as function of taper ratio

08 p1249 A72-21924

Tapered elastic rod transient behavior under end impact due to mass striking, computing fixed end stress, struck end velocity and impact time duration

15 p2323 A72-31404

Cantilever beam tapered linearly in horizontal and vertical planes, obtaining computer solution for free transverse vibration fundamental frequency and harmonics

15 p2328 A72-32022

Engineering approach to the design of tapered dielectric-rod and horn antennas.

17 p2530 A72-35362

Computerized numerical integration for nonlinear bending of tapered slender cantilever beams under concentrated tip loads

17 p2635 A72-35975

TAPES

Numerically controlled composite tape laying machine, discussing production run simulation, raw material quality effect and control corrective devices

12 p1815 A72-28078

TARE [DATA REDUCTION]

U DATA REDUCTION

TARGET ACQUISITION

Phase comparison direction finder with successive signals comparison using commutation of two antenna elements for target acquisition and tracking operations

02 p0176 A72-12219

MTI radar system design philosophy for target detection in land clutter environment

02 p0178 A72-12390

Clear air atmospheric target detection, comparing bistatic and monostatic radar techniques [AIAA PAPER 72-175]

05 p0630 A72-16835

Response surface methodology/RSM/ techniques application to operator target acquisition performance prediction, describing multivariable functional relationship by multiple regression polynomial equation

06 p0773 A72-17714

Pulsed coherent radar with pulse position random modulation, discussing subclutter visibility, target attenuation and blind speeds cancellation and radial speed measurement without range ambiguities

06 p0775 A72-18184

Quasi-time optimal nonlinear controller for steerable antennas or telescopes in target acquisition or slew mode, predicting performance by digital simulation

07 p0959 A72-19288

Spaceborne laser radar for target acquisition and tracking in spacecraft rendezvous and docking applications

[CLEA PAPER 9.5]

07 p0943 A72-19387

Programmed minimax target acquisition in rendezvous game between conflictively controlled motion and given set of vectors

07 p1028 A72-19969

Spurious target generation due to hard limiting in pulse compression radars with three phase coded signals superposed at input, comparing with digital simulation

08 p1134 A72-21416

Reduced data storage requirement of synthetic aperture radar for target classification by fast Fourier transform

08 p1134 A72-21422

Minimum time duration rocket interception, calculating trajectory parameters and target orbits in Earth gravitational field

09 p1393 A72-23573

Sequential analysis of statistical hypotheses in radar target detection and in communications systems

09 p1282 A72-23680

Stochastic model for eye movements during fixation on stationary target

10 p1429 A72-23795

Instantaneous frequency statistical characteristics of passive noise spectra and fluctuating signals reflected from nonpoint moving radar targets

10 p1436 A72-24514

Stochastic optimization of airborne laser seeker system design parameters to maximize target acquisition probability through regression analysis of data from computerized model

10 p1437 A72-24682

Agile beam electronically scanned multitarget phased array tracking radar, dwell allocation strategy and trajectory extrapolation algorithm effects on target handling capacity

10 p1437 A72-24685

Target angular position measurement by surveillance radar on background of correlated interference

11 p1595 A72-26294

Radar systems of effectiveness for moving target selection with alternating period compensation devices, allowing for signals and noise statistical properties

11 p1596 A72-26304

Combined probability density of amplitude and phase difference distribution of signal and noise sum in moving target selection radar systems

11 p1596 A72-26307

Passive detection radar system for bombers, calculating target distance during horizontal flight

11 p1597 A72-26314

Detection probability for moving small targets embedded in random white noise on TV display, comparing machine processed pattern recognition techniques and human performances

12 p1843 A72-27933

Circadian rhythms of visual accommodation responses and physiological correlations during target tracking, recording monocular focus state by IR optometer

12 p1767 A72-28304

Target acquisition by systems with unlagged acceleration control or rate control with exponential time lag, discussing number of approach and control stick movements

13 p1911 A72-29811

Visual acuity measurement by dynamic and statistics as function of target velocity and exposure time

13 p1911 A72-30044

Cassiopeia attitude control apparatus flight tests on Tacite rocket, describing aiming accuracy, target acquisition and gas consumption

15 p2321 A72-31824

Hypoxia and peripheral visual stimulus position effects on response time during monitoring of centrally located stimulus light

16 p2357 A72-34094

Search density function optimality for random moving target in n dimensional space with location probability density function satisfying given partial differential equation

17 p2574 A72-34344

Radar cross section fluctuation statistics description by generalized chi-square distribution, discussing target detection probabilities maximum likelihood estimates

19 p2763 A72-37734

Overall detection probability for fluctuating and nonfluctuating target models.

19 p2763 A72-37734

Discrete optimal terminal control, with application to missile guidance.

19 p2780 A72-38274

Visual optical system evaluation from viewpoint of human operator target detection under field conditions in terms of resolution, transfer functions, aberrations and eye movements

20 p2893 A72-39044

Real time homing guidance geometry and interceptor/sensor tradeoff studies based on reachable sets and target states analysis

20 p2951 A72-39104

Tactical aircraft weapon system development describing navigation, target acquisition, release point guidance and delivery modes

20 p2951 A72-39104

Programmed minimax target acquisition in rendezvous game between conflict controlled motion and given set of vectors

20 p2947 A72-40024

Intermittent movement control theory for prediction of visual correction applied to target aiming during illumination loss

22 p3142 A72-42544

Visually directed pointing as a function of target distance, direction, and available cues.

22 p3151 A72-42924

TARGET DRONE AIRCRAFT

BQM-34A and E/F target drone aircraft versatile automatic flight control system flight test program and results for basic and advanced flight modes

05 p0687 A72-16664

Unmanned systems flight testing by test bed vehicle conversion to man operated mode, discussing T-33 jet trainer conversion to drone operation

05 p0623 A72-16664

TARGET PENETRATION

U TERMINAL BALLISTICS

TARGET RECOGNITION

Atmospheric scattering and absorption effects on target/background discrimination in environmental remote sensing at 0.4-3.0 microns spectral region

02 p0213 A72-11854

Target detection in sea clutter, showing non-Rayleigh distributed high resolution radar envelope return

02 p0178 A72-12404

Target trajectory detector optimization, using data and Markovian chain apparatus

03 p0323 A72-13834

Radar signal processing by digital computer modeling, presenting apparent target splitting probability and azimuth estimate distribution for shifting window target detectors
03 p0326 A72-14361

Optimal discrimination rule for dual frequency radar targets with inadequate echo signal and background noise level parameters
05 p0625 A72-15821

Targets discovery in predetermined direction by phased array radar, using sequential analysis
09 p1278 A72-22896

Adaptive optical antenna array detection of unknown spatial location radar targets, noting tradeoff between array size and signal energy with respect to performance
10 p1434 A72-23809

Constant false alarm rate signal processors for several electromagnetic interference types, using distribution-free methods and maximum likelihood estimation in radar target detection
10 p1437 A72-24683

Target position information for radar energy potential calculation and detection quality, describing transmitter power reduction for normal range distribution density
11 p1596 A72-26313

Q switched YAG-Nd laser implementation into target designators and range finders, stressing temperature insensitive design with electronic compensation and thermal equalization
12 p1825 A72-27928

White background noise intensity effects on human visual target detection performance considering display difficulty levels, target location, detection time and error
14 p2083 A72-31156

Effect of target-background luminance contrast on binocular depth discrimination at photopic levels of illumination
17 p2508 A72-34879

The relative importance of contrast and motion in visual detection
17 p2509 A72-35689

Determining the detectability range of camouflaged targets
17 p2510 A72-35690

The tracking of targets located outside of Panum's area
17 p2505 A72-35916

Time-compressed displays for target detection
17 p2510 A72-35945

Incoherent radiation imaging system analysis from detector-display characteristics, target response function and noise characteristics
20 p2922 A72-39044

An application of atmospheric light scattering for contrast analysis in electro-optical detection systems
20 p2923 A72-39056

Automatic air targets recognition via digital radar data processing, discussing methods for noise signals suppression
21 p3081 A72-40547

Optimal search in the presence of Poisson-distributed false targets
21 p3075 A72-40837

Optimal discrimination rule for dual frequency radar targets with inadequate echo signal and background noise level parameters
23 p3263 A72-43429

Optimal search with uncertain sweep width
23 p3308 A72-43805

TARGET SIMULATORS

ERTS return beam vidicon imagery simulation, predicting resolvability of ground targets as function of target size, contrast, spectral distribution and radiance level
02 p0226 A72-11833

Target motion simulator with photographic recording of image velocity and motion compensation in cameras, discussing errors
03 p0356 A72-13226

RF simulator design for missile systems performance tests, discussing requirements, target array and anechoic chamber
20 p2911 A72-39125 [ALAA PAPER 72-861]

ARGENT THICKNESS

Triatomic hydrogen positive ions dissociation at 410, 510 and 550 keV in molecular hydrogen gas, measuring atoms yield as function of target thickness
01 p0104 A72-11148

Thick target processes during hard X ray emission, noting electron bombardment during solar flare impulsive phase and white light flare optical continuum production
21 p3100 A72-41292

TARGETS

NT PARTICLE ACCELERATOR TARGETS

NT RADAR TARGETS

Charged to neutral particle transformation capacity of wide aperture recharge target formed by supersonic gas jets in magnetic trap with annular nozzle
09 p1363 A72-23224

Multiple probe targeting from spacecraft for 1977 Venus mission, considering trajectory, spin, release, attack angle, location and navigation and control accuracy effects
15 p2312 A72-32193

The effect of target absorption on the attenuation characteristics of bremsstrahlung generated at constant medium potentials
21 p3087 A72-40474

TASK COMPLEXITY

Problem solving research, discussing trouble shooting, logic, light pattern, search, fire control, code transformation, perceptual maze and computer administered tasks
01 p0020 A72-11192

Skill acquisition in performance of three phase code transformation task
01 p0021 A72-11193

Time sharing three phase code transformation multitask effects on sustained performance
01 p0021 A72-11194

Twelve hour light-dark-dark cycle phase shift effects on monkey feeding behavior and serial task performance
02 p0157 A72-17103

Book on sustained attention (vigilance), discussing effects of signal frequency, magnitude and distribution, task complexity, noise, age, intelligence, etc
07 p0930 A72-19910

Operator mental processes during ATC task performance, discussing work load effect, mental representation and operator algorithm definition
09 p1270 A72-23129

Operator, task level and workload effects on operative strategy, showing controllers methods modification in ATC center
09 p1270 A72-23130

Time analyses of ATC approach controller tasks, developing flow diagram for task component sequencing and quantifying
09 p1271 A72-23133

ATC task analysis by subjective rating of work load, discussing information processing measures, scoring method and observer rating procedure
09 p1271 A72-23135

Acceptable load standards in ATC tasks, defining moments of conscious brain control as mental load measure
09 p1271 A72-23139

Human performance prediction dependence on task and equipment variables effects, using experimental data for performance classification system
10 p1429 A72-24003

Choice reaction task times for responses to signals by middle, little and index fingers
10 p1432 A72-24985

Multichannel information processing task complexity relation to operator performance for rapidly increasing input conditions
10 p1433 A72-25115

Vigilance performance prediction for difficulty-matched auditory and loosely and closely coupled visual intensity discrimination tasks
10 p1433 A72-25127

Work-rest scheduling and sleep loss effect on operator performance in watchkeeping and active multiple visual tasks
11 p1589 A72-26689

Workload modification effects on pilot neurological changes during Boeing 707 letdown, approach and landing
12 p1775 A72-28290

Divided attention effect localization, using choice tracking task reaction times in sequential stage model for human information processing
13 p1911 A72-29852

Time perception distortion level in simulated and real flight due to task complexity-related pilot emotional stress
14 p2078 A72-30392

High temperature and altitude combined effects on performance of tracking, monitoring and mental arithmetic complex task
14 p2083 A72-31155

Aircraft electronic display for pilot precise control in complex tasks, discussing clarity, stability and readability of CRT images
15 p2181 A72-32632

Rotary pursuit task practice effects on transfer of motor skill from slower to faster speeds
18 p2654 A72-36915

Finite Boolean function computation on sequential machine models, developing exchange inequalities between storage, time, et cetera, for relation of combinational and time complexities
24 p3383 A72-45650

TASK SEQUENCERS

U CONTROL EQUIPMENT

U SEQUENTIAL CONTROL

TASKS

NT AUDITORY TASKS

NT VISUAL TASKS

Optimal allocation of tasks and resources, using asymptotic properties of stochastic approximation method
12 p1837 A72-27823

TASTE

Human taste papillae sensitivity to chemical stimuli, showing stable quality and intensity response patterns
05 p0620 A72-17129

Taste organs neurophysiological structure and functioning, considering stimuli and excitation parameters effects on perception threshold
22 p3146 A72-42783

TAURUS CONSTELLATION

Periodicities from power spectrum analysis of light curve of RR Tauri variable
02 p0281 A72-12302

Cas A, Tau A, Cyg A and Orion Nebula absolute flux density measurements at centimeter wavelengths
04 p0578 A72-15313

Cosmos satellite measurements of high energy gamma quanta from Crab Nebula region, indicating excess flux association with Taurus constellation point source
07 p1064 A72-20636

Cassiopeia A secular flux density decrease relative to Cygnus A and Taurus A at 1.4 and 3 GHz, discussing application to antennas and radio telescopes calibration
09 p1390 A72-23529

TAXIING

Anthropotechnical aspects of aircraft taxiing guidance in airfield runway areas, suggesting computerized operational system
09 p1269 A72-22779

Deterministic optimization of aircraft undercarriage suspension characteristics for taxiing induced vibration minimization, discussing damping and stiffness functions and hybrid computer solution
09 p1407 A72-23458

ICAO standardized taxiing guidance and airports surface traffic control procedures
10 p1459 A72-24171

TAXONOMY

DNA primary structure variability relation to origin and evolution, discussing taxon scale in existing animal, plant and microorganism systems
04 p0470 A72-14792

Taxonomy for incomplete data problems, developing unified analysis methods based on maximum likelihood estimate
08 p1199 A72-21199

TAYLOR INSTABILITY

Dynamic stabilization of Rayleigh-Taylor instability at interface between two heavy fluids by viscosity and interfacial tension
01 p0108 A72-10231

Distributed impedance controller synthesis for stabilization of plane fluid flows, investigating Rayleigh-Taylor instability
01 p0050 A72-10504

Finite Larmor radius effect on Rayleigh-Taylor plasma instability in vertical magnetic field, characterizing solution by variational principle
04 p0557 A72-15022

Fluid dynamics stability of double radial sources in intergalactic medium, discussing evolution, ram pressure mechanism and Rayleigh-Taylor and Kelvin-Helmholtz effects
10 p1550 A72-25196

Larmor frequency influence on Rayleigh-Taylor instability of viscous Hall plasma with magnetic field
11 p1698 A72-26604

Rayleigh-Taylor instability in a composite medium
21 p3104 A72-40478

Rotating fluids density stratification effect on characteristic features of homogeneous Taylor column, noting flow patterns
21 p2989 A72-40652

Taylor instability in the shock layer on a Jovian atmosphere entry probe
22 p3136 A72-42873

TAYLOR SERIES

Taylor type antenna radiation distribution for aperture edge behavior realization in E or H planes
07 p0945 A72-19785

Taylor series truncation method for steady supersonic inviscid gas flow past nonaxisymmetric conical bodies
09 p1295 A72-23498

Radio propagation over slightly roughened curved earth surface, using perturbation method and Taylor series in model calculation
10 p1439 A72-24743

Methods of moments, rational transform approximation, Taylor series expansion and modulating functions used for process identification model, determining system transfer functions
11 p1607 A72-25283

Polynomial approximation of measurement signals with variability, comparing Taylor, Abdulaev and Newton formulas
15 p2235 A72-31848

A method for selection of significant terms in the assumed solution in a Rayleigh-Ritz analysis
17 p2634 A72-35408

Computer-aided vector Taylor series approximation of fundamental matrix of ordinary first order differential equations with variable coefficients

21 p0376 A72-41785

Equilibrium equation for unsteady creep of thin truncated conical shell under internal pressure, solving in successive time steps with Taylor series expansion

22 p3233 A72-42062

TAYLOR THEOREM

U TAYLOR SERIES

TD-1 SATELLITE

TD-1, HEOS-B and COS-B satellite-borne experiments, discussing X ray and gamma astronomy

04 p0582 A72-15690

TD-1 satellite mounted slow analysis camera with supervidicon image tube to observe cosmic ray tracks in spark chamber

08 p1170 A72-21961

TD-1A satellite functional description for stellar UV spectroscopy and solar and cosmic ray experiments, emphasizing attitude control subsystem

09 p1396 A72-23263

TD-1A - Europe's largest and most advanced satellite.

18 p2731 A72-37011

Early data from the ultraviolet sky-scan telescope in the TD1 satellite.

19 p2857 A72-37524

TEA LASERS

U CARBON DIOXIDE LASERS

TEACHING

U EDUCATION

TEACHING MACHINES

Instructor station design for automated flight training systems, considering human factors and informational requirements

07 p0928 A72-19277

TEAMS

Social factors of labor organization and control in scientific teams for industry

02 p0304 A72-11728

Team size and decision rule in the performance of simulated monitoring teams.

21 p3008 A72-41016

TEARING

Lamellar tearing and testing of steel sheets in direction of short side by Brodeau test

04 p0527 A72-15561

Semibrittle tears and fractures by progressive cracking in metallic structures, discussing metal fatigue and environmental stress

06 p0897 A72-18297

Tacky adhesive tearing between two flexible strips, solving Newtonian viscous fluid slow flow problem by iterative numerical scheme

12 p1798 A72-27831

TECHNIQUES

U METHODOLOGY

TECHNOLOGICAL FORECASTING

Commercial transport market and technology forecasting, considering all-cargo, STOL, SST and CTOL aircraft

[SAE PAPER 710750] 01 p0002 A72-10249
Space technology development importance for future of mankind, discussing terrestrial environment conservation, extraterrestrial raw materials recovery and power generation, etc

05 p0753 A72-16309

Technological forecasting method evaluation for R and D planning, fitting trend curves to sets of technological data

07 p1105 A72-20268

Technology transfer model in terms of donor-recipient activities for information implementation, forecasting and long range planning in developing countries and regional economics

07 p1106 A72-20271

Technology forecasting and risk assessment in V/STOL transport area, examining mission issues and selection criteria

09 p1261 A72-22473

Systems approach to technological forecasting for short range research, considering consumer, market and organizational resources

09 p1413 A72-22950

Reliability growth curves for product assessment as technical management forecasting technique

10 p1564 A72-24004

Space projects technological developments and benefits, discussing communications, transportation, computers, education, holography, power and life support systems, manufacturing in space and earth resources

11 p1748 A72-25253

Dynamic modeling application to technological forecasting, discussing mathematical simulation for R and D management planning in project selection and budget allocation

11 p1748 A72-26284

Technological forecasting and long range planning in transportation, considering roles of expert opinion, trend extrapolation, normative models and social impact

11 p1748 A72-26285

Space technology developments during 1970s and 1980s, discussing solar system exploration, space shuttle systems, cost effectiveness, international cooperation, nuclear propulsion systems, etc

13 p2051 A72-28453

Technological forecasting in venture analysis and planning for long-term growth objectives, engineering project selection and resource allocation

[ASME PAPER 72-DE-26] 14 p2174 A72-30868

Air transport development between the UK and Europe - The next twenty years.

18 p2743 A72-37092

Economic impact of applying advanced technologies to transport airplanes.

[AIAA PAPER 72-758] 19 p2751 A72-38128

Space technological advance effects on human extraterrestrial, scientific, economic and social progresses

19 p2867 A72-38545

Public policy, regulatory controls, market strategies and systems economics considerations for future U.S. domestic communication satellite system

21 p3132 A72-40865

Space shuttle technological evolution prospects, discussing cooperative development phases toward space transportation system with globally dispersed launch and landing bases

21 p3132 A72-40966

German monograph - Model-analytical investigation of short-haul air traffic with VTOL aircraft in the Federal Republic of Germany.

22 p3245 A72-43068

Forecasting as a means for scientific and technological policy control.

23 p3358 A72-44350

Economic materials processing in orbiting spacecraft under zero gravity conditions, emphasizing single crystal electronic materials and high purity biologicals

24 p3407 A72-45157

Forecasting costs and completion dates for defense research and development contracts.

24 p3468 A72-45479

TECHNOLOGIES

NT BIOTECHNOLOGY

NT MARINE TECHNOLOGY

NT MILITARY TECHNOLOGY

NT REACTOR TECHNOLOGY

Aerospace critical systems and future technologies, presenting illustrative diagram for functions combination and interrelations

14 p2175 A72-31140

Book - Treatise on materials science and technology, Volume I

18 p2718 A72-36392

TECHNOLOGY ASSESSMENT

STOL transport aircraft technology assessment, analyzing airports growth problems

[SAE PAPER 710751] 01 p0003 A72-10250
Industry assisted state of art assessment of high lift turbofan configurations for USAF STOL tactical transport technology program

[SAE PAPER 710758] 01 p0003 A72-10255
Aerospace radioisotope power systems, discussing heat source technology, shielding, safety and thermoelectric integration

[SAE AIR 1213] 01 p0098 A72-10387
Radio astronomy technology developments, discussing antennas, receivers and data processing

01 p0047 A72-10417
Battery separator materials requirements derived from in-cell environment and battery mission, evaluating present technology for R and D area concentration

03 p0313 A72-14235
National Aviation System technology, discussing wide body jets, smokeless turbofans, all-weather operational capability, collision avoidance and noise reduction

04 p0597 A72-14824

Aircraft air breathing propulsion technology, discussing two-place aircraft, turbofan power plants, helicopter engines and V/STOL, CTOL, subsonic transports and supersonic aircraft

04 p0565 A72-14825

Submillimeter waves development, discussing materials research, lasers, semiconductor and electron tube sources, system components and applications in space communication, imagery, metrology and sensing

04 p0550 A72-15591

Civil aircraft technological constraints and requirements, discussing noise, congestion and performance characteristics of rotorcraft, STOL, VTOL, hypersonic and supersonic transports

05 p0611 A72-15774

Aircraft and reusable spacecraft propulsion systems current status and future development, discussing noise and exhaust emission problems, V/STOL bypass and fan engines, ramjets, etc

05 p0705 A72-16735

Flight navigation technology current state and development trends, discussing transition from Doppler to inertial systems, use of computers and satellites, collision avoidance, etc

05 p0687 A72-16737

Rockets and spacecraft technology developments in U.S., U.S.S.R. and other nations, discussing satellite boosters, ballistic missiles, manned and unmanned spacecraft, lunar and interplanetary probes, etc

05 p0728 A72-16742

Gas dynamic laser technology advances, discussing water content, temperature and Na effects and nozzle design

[AIAA PAPER 72-143] 05 p0669 A72-16895

Materials selection problems due to wide variety of new products, discussing technologically and economically optimal decisions on product design, development and future substitutions

06 p0906 A72-18255

Technological advances and program risks assessment by operations research and systems analysis techniques, applying to cost overruns and schedule slippages in weapon systems

07 p1106 A72-20270

Holographic technique development review, discussing current and future applications and unsolved problems

09 p1315 A72-23375

Electron, ion and laser beam technology - IEEE Conference, Boulder, Colorado, May 1971

10 p1517 A72-23926

Reliability growth curves for product assessment as technical management forecasting technique

10 p1564 A72-24004

Communication satellite technology trends, discussing channel capacity, attitude stabilization, antenna pointing accuracy, energy conversion and storage, frequency reuse and onboard switching

11 p1725 A72-25254

Remotely manned systems technology for military, industrial, scientific and civil applications for hostile or difficult environments

11 p1612 A72-25256

Furnace technology review, stressing need for higher sintering temperatures, better automatic atmosphere controls and faster preforms transfer to forging operation

11 p1640 A72-26242

Ball, globe, gate, butterfly, Y-type and safety-and-relief valves assessed for cryogenic applications

11 p1642 A72-26777

Cermets technology applications, discussing powder metallurgy role and sintering mechanism

11 p1665 A72-26871

Electronic structure of technological processes in powder metallurgy of high temperature materials

11 p1646 A72-26873

Composite powders preparation by metals deposition from aqueous solution onto core materials by gaseous hydrogen at high temperature and pressure, noting coating application

11 p1646 A72-26873

Communication satellites design and technology for future launches, discussing ion engine development, antenna beams and thermal control

[AIAA PAPER 72-540] 12 p1780 A72-27363

Solid state array camera based on diffused junction phototransistors, discussing sensor technology and fabrication

12 p1810 A72-27931

Silicon solar cell fabrication technology developments for long mission life performance reliability over wide temperature and radiation intensity ranges

12 p1757 A72-28029

Cost effectiveness model for evaluating general aviation weather dissemination techniques, stressing design variables and time periods

13 p1994 A72-28871

Civil aviation approach and landing guidance systems evolution, discussing ILS development, state of art and future requirements

13 p1996 A72-29014

V/STOL aircraft potential for short haul civil air traffic, discussing present technology and investment costs in comparison with advanced ground transportation systems

13 p1898 A72-30076

Hovercraft state of development and utilization potential, comparing performance to other transportation modes

14 p2073 A72-30818

Microwave semiconductor diode technology review and development prospects in terms of fabrication processes and materials

14 p2088 A72-30834

French quality assurance of electronic components, discussing organizational links with international bodies

14 p2174 A72-30848

Adhesive and abrasive wear technology assessment, considering design equations use for prediction

[ASME PAPER 72-DE-2] 14 p2108 A72-30859

Fluid amplification principles, discussing bistable and proportional amplification, signal transmission and transduction to and from fluid signals

[ASME PAPER 72-DE-20] 14 p2073 A72-30864

Space applications benefits through international cooperation, emphasizing environmental problems

14 p2175 A72-31143

- Aeronautical communication satellite technical and economic survey, considering wave propagation, noise, aircraft antennas and VHF and UHF links 15 p2193 A72-31180
- Rare earth metals and alloys technology assessment and utilization covering quantum mechanics concepts application to Fermi surface 15 p2289 A72-31184
- Nd glass laser drilling and welding applications and tests on materials to evaluate feasibility and operational advantages, identifying optimal pulse energies and durations 15 p2244 A72-32028
- Magneto-optics materials for use in data storage, discussing quality evaluation based on figure of merit reflecting heat sensitivity and readout requirements 15 p2203 A72-32352
- Recyclable holographic recording media performance parameters comparison to develop tradeoffs for storage and imaging applications 15 p2239 A72-32360
- European unity as prerequisite for technological and scientific progress with respect to U.S. and Soviet superiority 16 p2480 A72-32893
- Metal-air batteries with alternately polarizable oxygen electrodes, discussing current state of technology 16 p2350 A72-33670
- Design features, fabrication technology and in-pile testing of thermionic reactor fuel elements 17 p2495 A72-34584
- Development of the insulating multilayer collector system for ITR /Status report/. 17 p2559 A72-34594
- Microwave technology - A five year prospective. 17 p2528 A72-34709
- Monoplastic solid encapsulant for n-p-n and p-n-p silicon planar passivated signal transistors 17 p2528 A72-34715
- International UV Explorer synchronous satellite program objectives and technology, describing spacecraft design, instrumentation, ground system, telescope control and data handling 17 p2621 A72-34900
- Helicopters technical and marketing projections for 1980s, emphasizing reliability, maintainability and maneuverability in design philosophy 17 p2491 A72-34926
- Digital methods of frequency measurement - A comparison. 17 p2530 A72-35363
- Aerospace computer software validation and verification methods application to complex systems, discussing code execution and analysis tools, program diagnostics, cost and schedules 17 p2524 A72-35582
- Composites technology, costs and performance review covering metal matrix composites, ceramic reinforced plastics and whisker composites 17 p2571 A72-35652
- Vibration technology: Balancing flexible rotors; Conference, Technische Universitaet Berlin, Berlin, West Germany, March 23, 24, 1970, Summaries 18 p2731 A72-36064
- Thermionic fuel element development status summary. 18 p2708 A72-36151
- Multicell thermionic fuel element fabrication technology. 18 p2708 A72-36152
- German book on vacuum technology covering theory, measurement techniques and applications in nuclear physics research facilities, electronic tubes, space environment simulation, mass transfer, etc 18 p2709 A72-36250
- Expendable space transportation - A 1972 assessment. [AIAA PAPER 72-732] 18 p2730 A72-36542
- Limitations in microelectronics. II - Bipolar technology. 18 p2667 A72-36980
- Polish aircraft industry production and fabrication techniques, discussing metal working, digital controlled machining and cost reduction 18 p2696 A72-37010
- Development of a complementary MOS technology of high reliability 18 p2671 A72-37142
- Advanced subsonic transport technology. 19 p2748 A72-37677
- Propulsion technology advance factors, stressing noise and exhaust emissions reduction, economic considerations and aircraft performance 19 p2848 A72-37679
- Fluidics - A potential technology for aircraft engine control. 19 p2849 A72-38047
- Fluidics control technology applications to thrust reversal, turbine engine speed, pressure valves, nozzle and fuel flow, discussing life and reliability 19 p2849 A72-38050
- B-52 test vehicle flight demonstration program for control configured vehicles /CCV/ technology concepts validation, noting gross weight reduction [AIAA PAPER 72-747] 19 p2751 A72-38123
- Satellite communications in Japan. 19 p2766 A72-38603
- Cryobiology phenomena and applications, considering mode of action of various substances for freezing injury protection 19 p2762 A72-38828
- Laser beam scanning and recording in two dimensional pattern on silver halide, evaluating systems performance based on signal response, granularity and noise characteristics 20 p2930 A72-39040
- A review of the science, technology, and applications of dispersion strengthened Ni-Cr- and Co-Cr-base alloys. 20 p2936 A72-39209
- Technology and performance of n-channel MOS-LSIs using depletion-type load elements. 20 p2961 A72-39712
- Rocks and meteorites analysis techniques evaluation, using Apollo 11 fines results to evaluate activation analysis for geochemistry and cosmochemistry applications 20 p2899 A72-39827
- Boron fiber reinforced composites technology assessment and utilization, stressing cost reduction [ICAS PAPER 72-30] 21 p2995 A72-41155
- Electron beam diameter measurement technique and welding technology review, describing experimental apparatus 22 p3183 A72-42448
- Technological aspects concerning the structural elements in the development of resistance furnaces under vacuum 22 p3163 A72-42636
- An assessment of energy absorbing devices for prospective use in aircraft impact situations. 22 p3237 A72-42764
- Niobium superconductive tunnel diode integrated circuit arrays. 22 p3161 A72-43090
- Teleoperator technology development, discussing remote operators, mobile manipulators and autonomous robots for man capability extension and industrial application [ASME PAPER 72-AERO-18] 22 p3245 A72-43150
- Forecasting as a means for scientific and technological policy control. 23 p3358 A72-44350
- Rocketry and space age inauguration, considering technical, engineering, management and political problem areas 23 p3358 A72-44354
- Book on complete technological system reliability assessment covering performance requirement and achievement, transfer characteristics, sampling, estimation, confidence, synthesis problem, etc 23 p3294 A72-44499
- Point-to-point national data communication geostationary satellite system associated with computers, discussing organization, earth station equipment and technical and economical feasibility 24 p3380 A72-44975
- Spacecraft rescue/recovery capabilities, discussing in-flight escape, ground egress and descent systems, performance and technical and human factors 24 p3450 A72-45147
- United States Space Nuclear Electric Power Program. 24 p3424 A72-45179
- Streamflow forecasting project to assess feasibility of air and spaceborne remote sensed data acquisition application to watershed hydrological behavior prediction 24 p3398 A72-45215
- OSO and Skylab astronomical instruments technology, emphasizing precision pointing, spatial and spectral resolution and photometric efficiency problems 24 p3405 A72-45545
- TECHNOLOGY TRANSFER**
- Book on NASA technology transfer program covering regional university-based dissemination center evaluation and comparison with other transfer mechanisms 07 p1102 A72-19182
- Technology transfer model in terms of donor-recipient activities for information implementation, forecasting and long range planning in developing countries and regional economics 07 p1106 A72-20271
- NASA space program impact on U.S. technology, discussing performance levels, precision, reliability and industry stimulation 11 p1748 A72-26099
- Aerospace technology transfer to and utilization by industry for product development and improvement, discussing NASA structural analysis computer program /NASTRAN/ [ASME PAPER 72-DE-60] 14 p2175 A72-30875
- Mechanical and electrical technologies unification, discussing systems and balances 15 p2211 A72-31873
- NASA technology transfer from information dissemination and service to product development, noting firemen breathing system 17 p2639 A72-35506
- The impact of aerospace technology on energy conversion in the 70's. [ASME PAPER 72-AERO-11] 22 p3140 A72-43147
- Space structures and materials technology utilization and transfer to world economic and social problems, considering thermal control, NDT, systems analysis and design 24 p3407 A72-45154
- TECHNOLOGY UTILIZATION**
- Channel clearing through clouds by laser beam, considering cross section expansion dynamics, channel growth rate, cloud motion and blurring 01 p0078 A72-10155
- Hybrid microwave integrated circuits, discussing distributed circuits with strip transmission lines and lumped element circuits with inductors and capacitors 01 p0045 A72-10698
- Cb alloy processing technology from ores to manufactured finished fabricated, joined and coated hardware, discussing reduction methods, annealing, forming, joining, etc 01 p0075 A72-10745
- Systems approach to space technology application, covering Global Atmospheric Research Program and Earth Resources Technology Satellites 01 p0146 A72-10952
- Satellite photography application to morphological cartography of Baja California 02 p0216 A72-11892
- ERTS-A orbital earth resources data utilization, describing user community size and character and central repository data center 02 p0305 A72-12381
- Weather forecasting, discussing statistical entropy, numerical and statistical methods and computer technology utilization 02 p0254 A72-12777
- Pulsed Nd laser drilling and welding of metal, metal-semiconductor and semiconductor elements, discussing bond penetration and character, mechanical strength and I-V characteristics 03 p0363 A72-13860
- Low cost large solid rocket boosters technology, discussing propellant, case material, insulation, nozzle ablatives and thrust vector control 04 p0565 A72-14435
- ATC technology impact on flight operations and public value of aviation, discussing microwave landing system economic aspects 04 p0544 A72-14810
- Millimeter and submillimeter wave applications, considering environment remote sensing, radar communication, tracking and imagery, wideband communication, plasma diagnostics and spectroscopy 04 p0550 A72-15592
- Symphonic communication satellite technology application to subsequent satellites, discussing three axes stabilization, use of microwave frequencies, components and subsystems reliability 04 p0494 A72-15681
- Thermal heliotrope adaptation to terrestrial applications, discussing solar radiation energy input dominance assurance and wind effect minimization [ASME PAPER 71-WA/SOL-10] 05 p0614 A72-15893
- Space operations cost effectiveness improvement by earth-to-orbit shuttle, discussing space utilization growth and economics [SD-71-780] 05 p0724 A72-16048
- Book on computer applications to engineering analysis covering mathematical models, numerical techniques, program usage, programming and design 05 p0632 A72-16106
- Space technology development importance for future of mankind, discussing terrestrial environment conservation, extraterrestrial raw materials recovery and power generation, etc 05 p0753 A72-16309
- Water based offshore and floating island airports planning and construction, discussing economic, technical and social aspects 05 p0644 A72-16695
- Holography utilization effectiveness in three dimensional image displays, information storage, image multiplication and recording, interferometry, coding, lens corrosion, pattern recognition, etc 06 p0816 A72-17951
- GERTS II simulation program for graphically modeling and analyzing complex stochastic systems, discussing applications to assembly line, project management, conveyor and inventory systems 06 p0780 A72-17978
- Laser radiation pressure applications to isotope and particle separation, optical levitation, high velocity acceleration and atomic beam analysis 06 p0826 A72-18176

Computer technological development effects on professional engineers education and work, considering impacts of computerized design, simulation, etc
06 p0780 A72-18235

Computer aided design in electronics, discussing interactive computing with time sharing teletype keyboards or CRT graphics and applications in IC, network analysis and optimization
06 p0780 A72-18236

Automated navigation aids interface with human operator, discussing Apollo flight experience and technology utilization in air and marine navigation
06 p0846 A72-18288

Book on lasers and applications covering theories of light, polarization, coherence, resonators, mirrors, modes, electro-optical effect, communication, holography, etc
06 p0827 A72-18524

Semiconductor device IC encapsulation, thermal design, stress analysis, testing and applications
06 p0791 A72-18577

Aerospace waste and water management technologies for community and household applications
06 p0769 A72-18617

Power generation for electrical, thermal and transportation needs, considering technology use for air, noise, thermal, water and nuclear pollution reduction
06 p0761 A72-18627

Semifinished product production technology influence on heat resistant alloys mechanical properties, considering forging, rolling, casting, melting, diffusion welding and powder metallurgy
06 p0834 A72-18647

Weather modification as example of government managed and funded technological innovation, discussing various evolutionary R and D and operational phases
07 p1102 A72-18974

Nd-YAG laser system generating gold conductor patterns on ceramic substrates, using numerical control system for Si production
07 p1002 A72-19213

UN agencies role in communication satellites technology exploitation, discussing international cooperation in outer space peaceful use and exploration and development of space law
07 p1074 A72-19468

Space communication application for information, education and cultural exchange, noting need for international cooperation
07 p1104 A72-19473

Laser technology applications, considering economic factors in terms of market oriented products
07 p1105 A72-19554

Papers on high temperature physics and chemistry covering peaceful nuclear explosions, radiative transfer, hydrodynamics, stellar opacity and solar He abundance
07 p1078 A72-19922

Book on dividends from space covering contributions to home and industry, health and medicine, systems approach to human problems, earth monitoring, communications, etc
07 p1105 A72-20202

Laser applications in industrial machining and welding, describing theory and operation of optically pumped ruby, glass-Nd, YAG-Nd, Ar and carbon dioxide lasers
07 p1007 A72-20224

Collaboration of World Health Organization and various international astronomical organizations for space technology applications to man-environment relationships and medical and communication sciences
07 p0933 A72-20300

French space applications program for telecommunications, meteorology, natural resources survey and air/sea traffic control
08 p1256 A72-21201

Industrial applications of lasers, considering programmable machining, distance measurement, computer memories, communication, night clubs, machine shops, aircraft manufacture and tunnel boring machine alignment
08 p1182 A72-21207

Space applications of camera tubes - Conference, Paris, November 1971
08 p1169 A72-21951

Gas, solid state and semiconductor lasers review, discussing applications
09 p1322 A72-22594

Inexpensive solid state microwave sources development and applications considering spectrum allocations, health hazards and reliability problems
09 p1285 A72-22595

Space flight experience application to human factors engineering problems in air and maritime navigation, considering use of small digital computers, display and sensing devices
09 p1348 A72-22785

Multiple charge Al and C ions X-UV spectra use for studying laser produced plasmas build up and expansion regions
09 p1359 A72-22830

NASA space station activities, describing Skylab missions and capabilities in physical and life sciences, earth resources surveying and technology experimentation
09 p1395 A72-22935

Holographic interferometry application to weak inhomogeneities visualization in gas flows, using photographic emulsion nonlinear properties
09 p1311 A72-22965

Automatic computer-controlled system with laser technology for quality inspection of mass produced automobile master brake cylinders
09 p1319 A72-22979

Electromagnetic velocity and flow measurements techniques application to cardiovascular patients, discussing utilization problems
09 p1272 A72-23275

Materials processing with carbon dioxide lasers, noting cutting, welding and hole drilling applications
10 p1485 A72-23969

Microwave equipment and technology application for instrument landing, terminal ATC, millimeter wave CAT detection and satellite communications
10 p1509 A72-24036

Monolithic, thin film and LSI technology development trends in microelectronics, noting heteroepitaxy, ion implantation and laser beam techniques
10 p1454 A72-25175

Space projects technological developments and benefits, discussing communications, transportation, computers, education, holography, power and life support systems, manufacturing in space and earth resources
11 p1748 A72-25253

Remotely manned systems technology for military, industrial, scientific and civil applications for hostile or difficult environments
11 p1612 A72-25256

Transport aircraft aerodynamic design technology application to general aviation propeller driven twin engine aircraft, discussing wing loading and aspect ratio optimization
11 p1576 A72-25595

Commercial applications of quiet light aircraft technology, discussing cost and noise reduction
11 p1576 A72-25596

Short and long range contributions of NASA space program to life quality improvement, discussing land and crop surveys, communications and environment modification
11 p1748 A72-26098

Boron/epoxy and graphite/epoxy composites application to aircraft structural design, discussing flight test and developmental programs
11 p1577 A72-26234

Complementary metal oxide semiconductor applications, noting device power dissipation, high noise immunity, good switching speeds and cost reduction
11 p1701 A72-26386

High performance low power complementary MOS memories based on silicon-on-sapphire technology, noting quiescent power dissipation
11 p1606 A72-26565

High temperature materials powder metallurgy for space applications, discussing melting points
11 p1665 A72-26866

Cermets technology applications, discussing powder metallurgy role and sintering mechanism
11 p1665 A72-26871

Composite powders preparation by metals deposition from aqueous solution onto core materials by gaseous hydrogen at high temperature and pressure, noting coating application
11 p1646 A72-26875

Weather satellite data use to obtain forecasts for aircraft and ships in Southern Hemisphere and for Antarctic research stations
11 p1683 A72-26890

Commercially available laser systems applications to welding, drilling, scribing and other machining operations
11 p1652 A72-26984

TV reception from satellite broadcasting systems in hostile environment of remote and inaccessible villages over large land areas
12 p1779 A72-27353

Space techniques application to meteorological prediction, noting Meteosat and Eole satellites capabilities
12 p1840 A72-27506

Space technology application to ATS F and G program, discussing high power requirements, parabolic antenna design, tracking accuracy and ground station simplification
12 p1870 A72-27523

Surface pressure via satellite-borne measurements of atmospheric transmission near absorption band
12 p1802 A72-27710

NASA reliability and quality assurance methodology to improve hospital biomedical equipment, using space electric rocket test example
12 p1814 A72-27960

Surface integrity machining practices application to jet engines production, noting cost reduction and process selection and quality control improvement
12 p1862 A72-28163

Worldwide satellite navigation system for precise position and velocity of military aircraft, ships and ground vehicles
13 p1996 A72-28750

Slant Visual Range/Approach Light Contact Height Measurement System utilizing state of art technology for airport applications
13 p1938 A72-28844

High cruise altitude operational advantages for commercial transport aircraft utilizing technological innovations in structures, propulsion, controls, avionics and aerodynamics
13 p1996 A72-28877

Solar electric multimission spacecraft /SEMMS/ concept, investigating Mariner, Viking and TOPS technologies applicability to postulated mission/science objectives
13 p2026 A72-28944

Long range transport aircraft structures and composite materials technology for airframe and engine systems
13 p1897 A72-28955

Gas dynamic lasers and combustion driven devices design, operation, performance and industrial applications
13 p1965 A72-29424

Aerospace technology economic and social effects relating U.S. space expenditures and gross national product
14 p2174 A72-30683

Hovercraft state of development and utilization potential, comparing performance to other transportation modes
14 p2073 A72-30814

High power carbon dioxide laser construction specifications and operation for applications to laboratory and industrial processing of glass, ceramics and metals
14 p2111 A72-30855

Navy program for composites technology development in aircraft structures, discussing design, reliability and cost
14 p2073 A72-30864

Aerospace technology transfer to and utilization by industry for product development and improvement, discussing NASA structural analysis computer program /NASTRAN/
14 p2175 A72-30874

Rare earth metals and alloys technology assessment and utilization covering quantum mechanics concepts application to Fermi surface
15 p2289 A72-31174

Russian book on man and computer covering interaction systems technological capabilities, mathematical aspects and applications
15 p2188 A72-31277

NASA ATS F/G satellites for educational TV broadcasting in foreign countries, discussing technologies and case histories
15 p2196 A72-31824

Sonar techniques application to radar, stressing utilization of preformed channels in rapid and distant detection of satellites and ballistic missiles
15 p2197 A72-31877

Lightweight man-portable uncooled semiconductor laser illuminator design for field use in night vision applications
15 p2248 A72-32047

Time/frequency technology application to reliable aircraft collision avoidance system, discussing precision time-ordered techniques, frequency control and synchronization and flying clocks
15 p2268 A72-32072

Flexible wing applications to passenger and cargo transport, discussing gliding and soaring sport, emergency use, powered flight, rocket payload recovery etc
16 p2347 A72-33182

S-64 Skycrane helicopter current and anticipated applications in commerce and industry, considering logging operations in ecologically sensitive or rugged areas, bridge construction, etc
16 p2348 A72-33182

Microwave transmission phenomenon and application to NDT, discussing various methods and examples
16 p2391 A72-33233

Univac 1616 computer design featuring uses of 16-bit word technology, medium and large scale integration, and transistor-transistor logic
16 p2366 A72-33247

F-100 and F-401 turbofan engine design and development for F-15 and F-14, discussing impingement cooling, Ti alloys, powder metallurgy and metal composites, etc
17 p2597 A72-34390

Re applications technology, discussing production methods, mechanical and physical properties, plasma spraying, annealing and alloying techniques
17 p2567 A72-34825

Composite materials technology utilization in structural design, considering stiffness, strength, weight, fatigue properties, adhesive joining and structural reliability
17 p2633 A72-35283

Electrothermal cutting processes using a CO2 laser. [IEEE PAPER TOD-71-118]
17 p2560 A72-35644

Canadian industrial participation in domestic, U.S. and overseas space projects, emphasizing technology advancement as national objective [AIAA PAPER 72-738]
18 p2742 A72-36544

High vacuum technology applications in surface physics research, discussing atomic collisions and adsorption processes
18 p2712 A72-36827

Economic impact of applying advanced technologies to transport airplanes. [AIAA PAPER 72-758]
19 p2751 A72-38128

Cryobiology phenomena and applications, considering mode of action of various substances for freezing injury protection
19 p2762 A72-38828

Book - Solid state electronic devices.
20 p2907 A72-39024

Potential applications of NASA-developed technology to problems of the environment. [ASME PAPER 72-ENAV-23]
20 p2895 A72-39154

A review of the science, technology, and applications of dispersion strengthened Ni-Cr- and Co-Cr-base alloys.
20 p2936 A72-39209

Electric power generation by thermionic converters, discussing physical principles of operation and technology utilization in communications, meteorology, geophysics, oceanography and space exploration
20 p2890 A72-39940

Advanced technology applications to present and future transport aircraft. [AIAA PAPER 72-759]
20 p2888 A72-40051

Microminiaturization, microprogramming, multiprocessing, and processing and memory module design technology of aerospace computers in different size ranges
21 p3025 A72-41113

Boron fiber reinforced composites technology assessment and utilization, stressing cost reduction [ICAS PAPER 72-30]
21 p2995 A72-41155

Technological utilization of Weissenberg viscoelastic effect for sliding bearings centripetal pressure lubrication, noting analogy with human and animal skeletal joints lubrication
22 p3183 A72-42875

Some contributions to energetics by the Lewis Research Center and a review of their potential non-aerospace applications. [ASME PAPER 72-AERO-12]
22 p3245 A72-43148

Solutions to transportation problems using time/frequency technology.
24 p3422 A72-44649

Application of planetary quarantine methodology and spacecraft sterilization technology to improved health care delivery.
24 p3375 A72-45148

Space structures and materials technology utilization and transfer to world economic and social problems, considering thermal control, NDT, systems analysis and design
24 p3407 A72-45154

Commercial space applications economics, discussing meteorological, navigational traffic control and communications satellites, nuclear waste disposal, space manufacturing, solar power generation, etc
24 p3441 A72-45216

Control configured fighter and bomber aircraft based on flight control technology, discussing development programs
24 p3369 A72-45386

Direct satellite TV broadcasting for complete community or individual home coverage, discussing requirements, technical performance and economic factors in Europe
24 p3380 A72-45553

T E C T O N I C M O V E M E N T
U T E C T O N I C S

Northern Alps geology, hydrology, lithology and tectonic survey, using aircraft-borne thermal IR scanner remote sensor
02 p0209 A72-11795

Lunar passive seismic experiment deducing internal structure constitution and tectonic processes
03 p0418 A72-13108

Satellite photographs of Himalayan-Indian Ocean tectonic patterns, showing major left and right lateral shear belts as evidence of wrench movements
05 p0655 A72-16040

Viking Lander seismic investigations for Martian tectonic activity, internal structure and composition, core size and conditions of formation
10 p1540 A72-24389

Mariner and Mars space probe data on Mars surface and atmosphere, suggesting possibility of tectonic activity
16 p2461 A72-34181

Tectonic dewatering and strain in the Michigamme Slate, Michigan.
18 p2686 A72-36223

Relation between tectonic processes on the earth and moon
19 p2860 A72-37958

T E E T H
Influence of ionizing radiation on the tooth organ
22 p3141 A72-41987

T E F L O N [T R A D E M A R K]
Photoemission from polyethylene, Kapton, Teflon and polyvinyl chloride under photon irradiation
03 p0403 A72-14084

Steel/teflon sliding friction in high vacuum at stepwise controlled oscillation frequencies, sliding rates and loads
07 p0964 A72-18863

Teflon diffusion membrane for in vivo blood and intramycardial tissue gas tension measurement by mass spectroscopy without chemically bonded heparin surface
08 p1124 A72-20901

Solid teflon pulsed plasma thruster quasi-steady and short pulse discharge operations, discussing propulsion system performance and erosion behavior [AIAA PAPER 72-459]
11 p1709 A72-26195

Teflon-bonded hydrophobic gas diffusion electrode performance prediction by mathematical treatment of flooded catalyst agglomerate model
16 p2352 A72-33892

A parametric study of the transient ablation of Teflon. [ASME PAPER 72-HT-32]
20 p2986 A72-39671

Thermal anomalies in stressed Teflon.
24 p3417 A72-44766

T E K T I T E S
NT AUSTRALITES
NT BEDIASITES

Chemical composition and morphology of silicate spherules, comparing to lunar rocks, meteorites and tektites
02 p0280 A72-12283

Cosmic ray exposure age of australites and far-east tektites, using C14 content as indication of terrestrial age
06 p0878 A72-17761

Atmospheric abundance ratios of gas inclusions in Muong Nong and Libyan Desert glass tektites by mass spectrometric analysis, indicating terrestrial origin
12 p1866 A72-27117

Geological verification in search for origin of vagabond tektites, commenting on Caribbean label bediasite find
15 p2303 A72-31307

Czech book - Moldavites and tektites.
21 p3111 A72-41536

Shock damaged zircon, corundum, rutile, monazite and quartz crystalline inclusions in Muong Nong-type indochinite /tektite/, noting production from detrital sedimentary materials as possible terrestrial origin
23 p3335 A72-43398

Book on global communication law covering maritime transport, civil aviation, radio, space com-munication postal services, international cooperation, etc
02 p0305 A72-12575

Sequential analysis of statistical hypotheses applied to radar detection and coded communications systems
02 p0181 A72-12643

Electromagnetic noise and effects on communication systems, considering statistical parameters definition and measurements
03 p0324 A72-14036

Analog computer simulation for filtering, phasing, multiplication and addition in AM communication system
03 p0329 A72-14182

Noise, delay and interruption caused communication degradation effects on feedback control system performance, considering air navigation and computer aided command and control on battlefield
06 p0794 A72-18242

Unified design charts for communication systems filter networks with inverse Chebyshev and elliptic function responses
06 p0787 A72-18400

Phase coherent frequency synthesizer as modulation source for multiple feature communication system, noting noise resistance, navigation capability, Doppler correction and transmitter to receiver ranging
06 p0777 A72-18619

French space applications program for telecommunications, meteorology, natural resources survey and air/sea traffic control
08 p1256 A72-21201

Telecommunications ultrasonic resonators, electromechanical and piezoelectric filters and microacoustic surface elastic wave devices
09 p1281 A72-23468

Sequential analysis of statistical hypotheses in radar target detection and in communications systems
09 p1282 A72-23680

Global NASA communications network /NASCOM/ reliability, discussing design and performance goals
10 p1435 A72-23992

Data acquisition and transfer efficiency and reliability in computerized automatic control systems for communications, listing probability and expectation criteria
11 p1600 A72-25436

Communication systems design with error control, applying algebraic codes to biphasic and multiphase modulation systems
12 p1782 A72-27488

Indian national satellite /Insat/ design for continental TV coverage and urban center telecommunication linkage [AIAA PAPER 72-576]
12 p1785 A72-27866

Error probabilities estimates for communication systems using orthogonal multiposition signals in information transmission, noting techniques applicability to diversity reception systems with self selection
13 p1918 A72-28893

Ground station with control, communication and information processing centers, discussing automation, data transfer, system control and emergencies [DGLR PAPER 72-007]
13 p1939 A72-28965

Apollo centralized ground support and communication system, describing network support team, mission control center, instrumentation support team and manned space flight network
13 p1940 A72-29860

Satellites for long distance telecommunications, noting ATS, Intelsat, military systems and Canadian domestic system Anik
14 p2085 A72-30363

Parametric amplifiers for satellite microwave communication systems, discussing frequency stability, noise temperature and gain relationships
16 p2369 A72-33520

Short- and long-range terrestrial telecommunication using energetic collimated beams of muons
17 p2519 A72-35837

Communication network vertex and mixed cutset definitions and computation from interchange graph of given finite connected undirected graph without loops and multiple edges
21 p3015 A72-40634

Annual International Conference on Communications, 8th, Philadelphia, Pa., June 19-21, 1972, Conference Record.
21 p3016 A72-40851

Adaptive signal-discrimination system using signals for observation of the channel characteristics.
21 p3023 A72-41838

Communication systems with binary convolutional signal encoding and threshold decoding, discussing orthogonal checkout sums distribution for correct and erroneous synchronization
22 p3154 A72-42235

Optimal frequency-difference communications system with manipulated amplitudes
22 p3154 A72-42237

Field reporting system for reliability analysis on telecommunication equipment.
24 p3384 A72-44657

Report on U.S. telecommunications telemetry information theory in period 1966-1969, discussing ionospheric and tropospheric data transmission 02 p0171 A72-11687
Telemetry - Conference, Washington, D.C., September 1971 02 p0173 A72-12126
High data rate convolutional coding for space station telemetry links, considering sequential and cascaded Viterbi decoding 02 p0174 A72-12132
Digital telemetry/communication laser link system design for operation at 1 gigabit/sec 02 p0174 A72-12143
Computerized bias optimization of telemetry timing accuracy applied to Minuteman system 02 p0174 A72-12144
ERTS multispectral scanner data telemetry decom-mutator/processor capable of decommutating five spectral bands of digital video data 02 p0175 A72-12162
Telemetry standards for transmitting, receiving and signal processing equipment at missile test ranges 02 p0176 A72-12164
Telemetry applications in aerospace industry - ISA Conference, Las Vegas, May 1971 02 p0179 A72-12402
Aircraft and spacecraft integrated avionics systems design with emphasis on telemetry, discussing space shuttle subsystems integration 02 p0179 A72-12403
Computer controlled telemetry data acquisition station, noting cost effectiveness 02 p0179 A72-12407
German vhf ground telemetry satellite tracking system radio interferometer, discussing specifications and performance [DGLR PAPER 71-124] 02 p0182 A72-12732
German ground operation system for satellites and space probes, discussing telemetric data processing, handling and flow [DGLR PAPER 71-123] 02 p0201 A72-12742
Scientific balloon data management system, discussing airborne and ground station equipment for telemetry, command and flight control 03 p0327 A72-13725
Dynamic damping coefficient extraction from reentry vehicle flight test telemetered lateral rate data 03 p0441 A72-13951
Automated telemetry system providing real time analytical capability and reduction of flight test time for F-14 04 p0486 A72-14592
Cloud base altitude measurement by optical telemetry using TNN 1000 apparatus, noting reduced maintenance 04 p0521 A72-14691
Automated meteorological telemetry and interrogation response system with terminal extensions for Paris airport 04 p0508 A72-14695
Geodetic determination of geoid shape by computerized laser-effect space telemetry ground stations 04 p0495 A72-15724
Europe-Africa geodetic link in spatial triangulation of passive Pageos satellite, discussing laser telemetry operation 04 p0520 A72-15725
International Satellite Geodesy Experiment based on laser telemetry technique, discussing ground stations network and tracking cameras 04 p0520 A72-15726
High accuracy laser reflector telemetric measurement for earth-moon distance variation in time by correlation method 04 p0495 A72-15727
Azur satellite ground station network with polar stations for telemetry reception 05 p0643 A72-16140
Telemetry system on board beryllium sphere reentry vehicle for hypersonic gas dynamics and wake chemistry experiments, using flush mounted antennas with isotropic radiation pattern [AIAA PAPER 72-176] 05 p0631 A72-16836
Geodetic satellite systems applications, describing trajectory beacons, telecontrol and telemetry stations and computing and operations center of French Geole system 06 p0809 A72-18258
Laser telemetry performance, considering means of noise reduction 07 p0947 A72-20256

- Aberration introduced by high satellite velocities, investigating application to laser telemetry 07 p0947 A72-20258
Tracking efficiency of laser telemetry on reflector carrying satellites 07 p0947 A72-20259
Tracking efficiency calculation for laser telemetry with laser reflector on nonstabilized satellite 07 p0947 A72-20260
Book on telemetry and remote control covering information theory, analog/digital techniques, signal transmission, data processing and coding, etc 10 p1436 A72-24550
Standardized automatic telemetering hydrometeorological station, discussing structure, operation, working principles and sensors 10 p1462 A72-25009
Air, wet bulb and soil temperature indications from automatic telemetering meteorological stations, comparing with Hg thermometer readings 10 p1483 A72-25012
Automatic telemetering meteorological stations and visual observation data processor control 10 p1507 A72-25020
Time division multiplexing system for asynchronous high data rate telemetry, discussing design features 10 p1440 A72-25061
Scanning photoelectric image conversion [photoanalyzing] systems for data telemetry from remote optical sensors 11 p1634 A72-26461
Space center trajectory and telemetry systems, including radar stations, interferometric equipment, optical methods and interlinked computers [DGLR PAPER 72-014] 13 p1938 A72-28961
Spectrum analysis of PCM/AM-FM and PCM/FM-FM telemetry signals, using approximation technique to Fourier transform time signal to frequency domain 13 p1919 A72-29025
Linear negative feedback dc current magnetic transducers for telemetry input signals, discussing operation principles and design 16 p2370 A72-33862
Potential value of turn-rate telemetry in tracking of aircraft equipped with discrete address beacon system /DABS/ for ATC, discussing tracking algorithms design 19 p2830 A72-37282
Real time telemetry processing systems, describing display features and limitations [AIAA PAPER 72-783] 19 p2752 A72-38142
- TELEMETRY AUTO REDUCTION SYSTEM**
U DATA REDUCTION
U TELEMETRY
TELEOPERATORS
Space tools and support equipment for earth orbital systems maintenance, replacement and repair, discussing Skylab requirements and teleoperator applications [AIAA PAPER 72-230] 10 p1488 A72-25049
Teleoperator manipulator for payload handling in space shuttle, noting design features and simulations of master-slave remote control system [AIAA PAPER 72-238] 13 p1909 A72-29075
NASA teleoperator-robot development program, discussing technology and design studies related to space shuttle and stations, satellites and planetary vehicles 15 p2190 A72-32315
Human or computer control role in teleoperator remote control mechanisms, discussing control modes, sensing and transmission time delay problems 21 p3011 A72-41416
Computerized supervisory control for interpretation of subgoal statements from human operator to permit teleoperator interaction with environment without long time delay 21 p3011 A72-41417
Remote control and navigation tests for application to long-range lunar surface exploration. 22 p3203 A72-43131
Teleoperator technology development, discussing remote operators, mobile manipulators and autonomous robots for man capability extension and industrial application [ASME PAPER 72-AERO-18] 22 p3245 A72-43150
A teleoperator system for space application. 24 p3407 A72-45174

Airborne high resolution multispectral TV camera system, describing special objective configuration for improved ground resolution 02 p0227 A72-11850
Apollo 12 retrieved Surveyor 3 TV camera mirror surface and camera-shroud organic contamination attributed to spacecraft outgassing and engine exhaust products 03 p0415 A72-12948
Multispectral TV camera systems for satellite recording of earth surface electromagnetic radiation at separate wavelengths [DGLR PAPER 71-135] 06 p0817 A72-18232
Image resolutions for ERTS return beam vidicon TV, Skylab multispectral cameras and Gemini/Apollo photographs 06 p0818 A72-18328
Spacecraft planetary approach navigation with TV camera onboard Mariner 9 giving images of Mars natural satellites against star background, discussing optical data processing programs [AIAA PAPER 72-53] 07 p1032 A72-18946
Performance tests of return beam vidicon multispectral television camera system for ERTS program 07 p0986 A72-19657
SAS-D borne TV type UV sensitive detector with camera tubes for high resolution astronomical spectroscopy 08 p1169 A72-21954
UV/visible image converter for use with TV camera tubes for astronomical photometry and spectroscopy from satellites and sounding rockets 08 p1169 A72-21955
Nimbus satellite image dissector camera system for continuous meteorological scanning, noting special suitability for cloud and ice features discrimination from brightness changes 08 p1171 A72-21967

Digital image processing for TV camera noise suppression and photometric and geometric distortions calibration and rectification 08 p1172 A72-21977

Subminiature TV camera using hybrid packaging techniques and digital circuitry for full EIA composite video output format and 450 TV/RH resolution capability 09 p1316 A72-23599

Design and operation of digital image recorder based on single stage intensifier and silicon target-inertial television camera tube coupled to large memory 11 p1631 A72-25685

Image-to-signal conversion by TV tube in automatic contactless measuring systems, producing mosaics of object by optical, X ray and ultrasonic techniques 11 p1634 A72-26460

Apollo 15 and 16 TV, still and movie cameras, discussing astronomical activities of astronauts 12 p1807 A72-27546

Low level light TV camera with Si intensifier target tube for fire control system to improve AH-IG Cobra helicopter night reconnaissance and attack capabilities 17 p2557 A72-35555

ERTS-borne return beam vidicon camera using high resolution TV sensors coaligned to view identical scene in different spectral bands 19 p2795 A72-37576

Electro-optical TV technique with laser source illumination to provide engineering metrology and NDT procedure resembling real time holographic interferometry 20 p2930 A72-39038

A detailed analysis of Mariner nine TV navigation data. [AIAA PAPER 72-866] 20 p2977 A72-40061

High resolution multispectral camera system for ERTS A & B. 24 p3402 A72-45182

TELEVISION EQUIPMENT

NT IMAGE DISSECTOR TUBES

NT TELEVISION CAMERAS

NT TELEVISION RECEIVERS

TV time lapse interferometry and contouring for photoelastic nondestructive testing, comparing with photographic techniques 03 p0358 A72-13436

TV tube type image sensors to replace photographic film for space telescope, discussing design and performance 08 p1169 A72-21956

Celestial pole region photographs obtained with TV equipment, emphasizing observations of faint meteoroids and gas trails 13 p2044 A72-29648

TV speckle pattern recording for coherent laser light measurement of mechanical vibrations in micrometer range 13 p1961 A72-30026

Venus observation experiment with the aid of a television system 19 p2858 A72-37820

A transmitting television tube for collecting information from streamer spark chambers 23 p3290 A72-44160

TELEVISION RECEIVERS

Digital computers data output alphanumeric display by commercially available TV sets, describing system design 03 p0355 A72-13075

Alphanumeric data representation by TV receivers, describing coding device and gate system for video signal generation 05 p0634 A72-15813

Color TV tube design without difference current generator, describing scanning unit saddle coils fabrication technique 18 p2667 A72-36678

Receiver terminals for satellite television systems. 18 p2662 A72-36849

TELEVISION RECEPTION

TV reception from satellite broadcasting systems in hostile environment of remote and inaccessible villages over large land areas [AIAA PAPER 72-524] 12 p1779 A72-27353

Detection probability for moving small targets embedded in random white noise on TV display, comparing machine processed pattern recognition techniques and human performances 12 p1843 A72-27933

Geostationary satellite direct TV broadcasting system extension to 12 GHz band, considering receiving installations, antennas, performance and costs 21 p3018 A72-40876

Visual film, TV and optical data systems unified classification for performance criteria based on equa-

tion similar to ideal imaging system description by Rose 03 p0329 A72-14188

Single scan TV-radiography system for providing A-D converter analog signal for digital data acquisition, obtaining transfer functions 04 p0522 A72-15226

Low light television camera tubes application to navigation safety in congested areas, reconnaissance and other watchkeeping system 07 p1032 A72-19070

National TV distribution by Canadian domestic satellite system, discussing design simplicity and payload weight maximization 07 p0944 A72-19654

International and national satellite TV systems, discussing technical and operational characteristics, artificial emission dispersion and costs 07 p0944 A72-19656

International TV broadcasting satellite system, discussing technical problems and cost effectiveness in competition with conventional TV systems 08 p1132 A72-21205

Astronaut training obtained visually in lunar module simulator via film, spacecraft models and landing site relief models as sources for complex TV system 08 p1147 A72-21335

Frequency bands for space-earth links in broadcasting satellite service, stressing application to educational television 10 p1435 A72-24032

TV microscopic system for on-line measurement of cat omentum microvessels diameter relative to heart action 11 p1587 A72-26621

Indian national satellite /Insat/ design for continental TV coverage and urban center telecommunication linkage [AIAA PAPER 72-576] 12 p1785 A72-27866

Extreme UV solar images televised in flight with rocket-borne SEC vidicon system, noting pictures reconstruction enhancement 12 p1810 A72-27930

Intensified electron bombarded Si camera tube performance in low light level TV systems, predicting sensor resolution vs irradiance characteristics 12 p1810 A72-27934

TV network distribution systems cost, comparing video tape shipping, terrestrial interconnection with delay for time zones and indirect and direct satellite transmission [AIAA PAPER 72-552] 13 p1918 A72-28983

Regional microwave ground distribution facility for TV service organized for satellite relay transmitted video signals accommodation [AIAA PAPER 72-557] 13 p1918 A72-28984

Alphanumeric characters for small TV type raster displays, describing legibility experiment for character height optimization 13 p1911 A72-29821

Time data dissemination techniques, discussing astronomical and atomic time scales, frequency standards, broadcasting and TV, navigation and satellite systems 14 p2085 A72-30364

Holographic prerecorded TV system, discussing coherent light noise elimination and redundancy effects on image quality 15 p2239 A72-32356

Factors affecting frequency and orbit utilization by high power transmission satellite systems. 19 p2857 A72-37644

Experimental observations of the instability of stellar images from a bichromatic two-channel television system 19 p2860 A72-37956

Certain results of the statistical processing of a large series of large-scale television images of stars 19 p2860 A72-37957

Comparison of information takeoff from a shadow-indication instrument by television and photographic techniques 20 p2928 A72-40049

TELEVISION TRANSMISSION

Molniya-Orbit communication satellite system, discussing operational quality, maintenance, television transmission facsimile, sound broadcast and multichannel telephony 01 p0023 A72-10046

Educational satellites - Conference, Nice, France, May 1971, covering space communication, TV, performance, data handling, economics, etc 01 p0147 A72-11277

ATS-F educational TV experiment in India, discussing domestic communication satellite development and nationwide coverage problems 02 p0278 A72-11960

Communications and TV broadcasting antenna feeder cost-efficient designs, relating climatology, oscillation theory and structural aerodynamic stability 07 p0955 A72-19513

Review of 1971 Picture Coding Symposium at Purdue University, discussing intraframe, interframe and color TV signal coding 09 p1279 A72-22899

UHF band satellite TV broadcasting system with FM, calculating required field strength and transmitter power 10 p1435 A72-24033

TV reception from satellite broadcasting systems in hostile environment of remote and inaccessible villages over large land areas [AIAA PAPER 72-524] 12 p1779 A72-27353

Satellite technology for TV broadcasting service to Canadian remote areas, considering new frequency band allocation [AIAA PAPER 72-553] 12 p1781 A72-27373

Ground and satellite based TV broadcasting compared in terms of economic, political and pedagogical implications to solve educational problems in developing countries [AIAA PAPER 72-525] 12 p1891 A72-27662

Regional microwave ground distribution facility for TV service organized for satellite relay transmitted video signals accommodation [AIAA PAPER 72-557] 13 p1918 A72-28984

NASA ATS F/G satellites for educational TV broadcasting in foreign countries, discussing technologies and case histories 15 p2196 A72-31829

Range coding application to TV and visiohphone images, stressing plug memory 17 p2518 A72-35675

A polydirectional antenna in polygon reflector design with cosecant-type elevation directional diagram for providing television in the 12-GHz frequency range 21 p3029 A72-40524

Broad-band television transmitting antenna with polydirectional characteristics for the UHF-region 21 p3031 A72-40542

Horizontally polarized polydirectional or beam antenna, which is slightly out of round and consists of beam units, for television and FM radio 21 p3031 A72-40544

Television transmission performance of an experimental small aperture earth station. 21 p3018 A72-40878

Shaped coverage patterns with satellite array antennas. 21 p3019 A72-40884

Analysis of a procedure for the transmission of low-frequency signals in time-compressed, analog form 21 p3023 A72-41399

Remote transmission of telescope coordinate readings by industrial television 21 p3056 A72-41448

Direct satellite TV broadcasting for complete community or individual home coverage, discussing requirements, technical performance and economic factors in Europe 24 p3380 A72-45553

Compound tellurides and their alloys for Peltier cooling - A review.

22 p3215 A72-43088

TELLURIUM

Thermodynamic solids theory generalized for internal strains in perfect non-Bravais crystals, applying to trigonal Se and Te structure

04 p0562 A72-15470

Se and Te additions effects on low carbon steels formability and machinability from metallurgical examination and workability tests

07 p0994 A72-19480

Electrical properties of Te/p-Si/N heterodiodes at room and liquid air temperatures

10 p1527 A72-24937

Te single crystal electrical resistivity and Hall coefficient effects of electron irradiation, suggesting point defects and dislocations interaction

12 p1859 A72-28073

Target anion effect on radioactive Sb and Te distribution formed by high energy proton irradiation of cesium salts containing oxygen

15 p2282 A72-32485

CW laser transitions in singly ionized Te vapor spectrum at 4843-9378 Å, indicating charge transfer as dominant excitation mechanism

16 p2401 A72-33394

TELLURIUM ALLOYS

Sn additions influence on Te structural characteristics relation to microhardness and current carrier mobility variations

09 p1322 A72-22204

TEMPER [METALLURGY]

Alloy steels temper brittleness analysis, using internal friction characteristics as functions of time and temperature

02 p0247 A72-12816

Internal friction peak in fresh tempered martensite from Fe-Ni-C alloy cooled to 77 K, suggesting hypothetical carbon atoms interactions with mobile dislocations

10 p1496 A72-24232

Vacancy annealing effect on beta phase transformation during tempering of Ti alloy with Mo, showing strain hardening and contraction increase

14 p2124 A72-31032

TEMPERATE REGIONS

Midlatitude vhf phase detection of magnetic field aligned ionospheric irregularities

01 p0031 A72-10916

Anomalous changes in ionospheric radio absorption during winter at midlatitudes, investigating diurnal and seasonal variations and stratospheric warming

04 p0518 A72-14967

Vhf waves transhorizontal propagation and day types correlation with sporadic E ionospheric layers in temperate zone, discussing wind shear theories

05 p0659 A72-16782

Temperate latitude sporadic E cause and structure - Conference, Utah State University, Logan, September 1971

10 p1477 A72-25151

Global horizontal sounding technique balloon flights, determining Southern Hemisphere temperate latitude circulation climatology

13 p1988 A72-28443

Test flights into weather at midlatitudes and tropical systems with airborne OMEGA navigation system, discussing E field and H field antennas

13 p1999 A72-29203

Very-high-frequency wave propagation by the temperate-latitude sporadic-E layer.

22 p3154 A72-42367

TEMPERATURE COMPENSATION

Temperature compensated high dielectric constant material, discussing low loss at microwave frequencies, reproducibility and mechanical properties

01 p0044 A72-11308

Transient radiation effects on silicon diodes in avalanche breakdown, considering voltage regulating diode response and temperature compensating junction effects

03 p0334 A72-14090

Aerodynamic compensation for ambient medium temperature effect on fluidic standard components and timing devices

04 p0466 A72-14993

Constant temperature hot-wire anemometer compensation for thermal lag of wire or film resistance thermometer

09 p1306 A72-22307

Fast response thermal compensation system for gas laser resonator length and frequency stabilization, discussing fabrication and design calculation

12 p1822 A72-27607

Light emitting diodes, photodiodes and photon coupled pair temperature compensation schemes, including uses of n-p-n transistors, operational amplifier and thermistor-resistor network

15 p2247 A72-32034

Rational utilization of the strength capabilities of thermal-expansion compensators

21 p3127 A72-41702

Simultaneous measurements of temperature and velocity in heated flows.

23 p3292 A72-44541

TEMPERATURE CONTROL

Cavity resonator thermal stabilization, using gas pressure controlled membrane

02 p0196 A72-12698

Thermal control methods for high density packaging, discussing cooling techniques for hybrid circuit consisting of semiconductor chips and/or thin film components

03 p0337 A72-14293

Closed-loop temperature distribution optimal control by heater-sensor spatial configuration design for highest steady state temperature stiffness under heat flux disturbance

04 p0504 A72-14661

Iterative procedure for computing optimal controls in distributed parameter systems described by linear parabolic differential equations, applying to metal slab temperature profile problem

04 p0504 A72-14664

Nonsteady high-rate heat transfer control in boundary layer by conjugate problem treatment and reduction to Volterra equation, considering limiting-regime and stability

04 p0596 A72-14666

Laser ranging retroreflector deployed by Apollo missions, discussing array design, structural support and thermal control

04 p0509 A72-15099

Nerve structures localized cooling device using vacuum insulated closed circuit controlled cryogenic probe with cooling range of plus/minus 20 C

04 p0481 A72-15252

Azur satellite temperature control system for protection against internal heat dissipation and external thermal loads due to earth radiation and albedo

04 p0582 A72-15651

Ni-Cr thick films triode sputtering technique with temperature control by low-energy electron bombardment heating, presenting phase diagram

05 p0675 A72-16393

Amplifier amplitude characteristic nonlinearity effect on dynamic properties of autooscillatory temperature controller

07 p0981 A72-18926

Zirconium dioxide white pigment coatings for spacecraft thermal control, discussing impurities effects on optical absorption properties

07 p1023 A72-19692

Ti honeycomb brazing, discussing filler metals, furnace temperature and atmosphere control and use of protected graphite as furnace material

07 p0998 A72-20288

Temperature controller with linear time variation for semiconductors thermally stimulated conductivity and thermoluminescence measurements at 90-300 K operating range

08 p1166 A72-21438

Bimetallic actuator for spacecraft thermal control with design emphasis on external power source elimination, high reliability, frictionless operation, simplicity and low weight

09 p1305 A72-22249

Electromagnetic field forces on finite conducting bodies, discussing heating rates and temperatures with ambient air convection and machine design recommendations

09 p1359 A72-22679

ITOS-1/Tiros M/ satellite design, describing structure, thermal and attitude control, primary and secondary sensor subsystems, power supply and operational goals

09 p1396 A72-23373

High purity fine particle pigment materials preparation for spacecraft thermal control coatings discussing hydrothermal, cryochemical and vapor phase processes

10 p1500 A72-24145

Vaporizer temperature effect on ion propulsion system thrust vector, presenting temperature control loop circuit diagram

10 p1528 A72-24652

Thermal diode heat pipe for advanced thermal control flight experiment, discussing engineering model analysis, design, fabrication and test

[AIAA PAPER 72-260]

11 p1739 A72-25205

ATS specular thermal control louver system performance in simulated solar vacuum environment as function of sun and blade angle, noting white paint effect

[AIAA PAPER 72-268]

11 p1740 A72-25209

Experimental cold plates provided with heat pipes for thermal control of electronic equipment

[AIAA PAPER 72-269]

11 p1740 A72-25210

Precision temperature control system for spacecraft equipment thermal loads rejection by space radiator, using acetone variable conductance heat pipes

[AIAA PAPER 72-270]

11 p1740 A72-25211

Heat pipe applications for waste heat rejection, cooling and temperature control in space shuttle, discussing design and performance

[AIAA PAPER 72-272]

11 p1725 A72-25212

Aircraft cockpit electrical heating system, converting three phase ac energy from alternator with economy and safety

[SAE PAPER 720329]

11 p1577 A72-2559

Human body thermoregulatory processes under varying environmental conditions and metabolic rates, discussing role of blood circulation, sweating, nervous stimuli, hormones, etc

11 p1584 A72-2607

Compact photomultiplier housing with controlled cooling, discussing temperature control and measurement

12 p1806 A72-2726

Communication satellites design and technology for future launchings, discussing ion engine development, antenna beams and thermal control

[AIAA PAPER 72-540]

12 p1780 A72-27363

Polymer testing machine for simultaneous structural and mechanical properties measurement of specimens subjected to uniaxial tensile loads for broad temperature range

12 p1795 A72-27465

ATS F/G spacecraft thermal control design verification by chamber thermal balance tests and performance prediction mathematical model of earth viewing module and orbital environment

12 p1877 A72-27527

Turbine inlet gas temperature limiting systems design and operation in turboprop engines, describing blocking mechanism, delaying element and altitude compensation

12 p1861 A72-27863

Electronic heating test arrangement for high temperature testing of metals and electrically conducting ceramics in vacuum, describing temperature control systems

12 p1796 A72-28249

Vacuum induction melting process for high temperature steels and superalloys fabrication, emphasizing control over temperature, pressure, beneficial trace elements and harmful impurities

13 p1964 A72-29100

Time constant of aircraft gas turbine engines gas temperature regulating system, using two thermocouples with different rise times

13 p2028 A72-29138

Temperature control and measurement in electric wire annealing for standard Pt-Pt-10 Rh thermocouples

13 p1960 A72-29766

Single automatic potentiometer based maximum-minimum temperature control unit, noting elimination of dual temperature regulators

14 p2104 A72-30444

Minimum weight phase change thermal control device for planetary descent probes, discussing test over various heat loads

[AIAA PAPER 72-287]

14 p2171 A72-30826

High reliability long life heat pipe thermal control system for space station application

[AIAA PAPER 72-261]

14 p2171 A72-30835

Space simulation shrouds cryogenically cooled with liquid carbon dioxide, discussing automatic temperature control and operating cost savings

15 p2214 A72-32611

Constant voltage and constant emitter-temperature control schemes dynamics in thermionic reactor, showing closed loop responses to load changes, converter failures and reactivity perturbations

17 p2494 A72-34581

Controlled self heating effect in semiconducting barium titanate positive temperature coefficient resistor substrate heater for planar Si devices

17 p2527 A72-34680

Electronic temperature-flattening of thermionic reactors.

18 p2644 A72-36172

A high-accuracy temperature stabilizing and control device also operating in the cryogenic range

19 p2804 A72-38645

Space station prototype environmental/thermal control and life system - A current overview.

[ASME PAPER 72-ENAV-35] 20 p2894 A72-39143

Thermal control design for research applications module (RAM) shuttle compatible payload carriers, using Freon 21-water system

[ASME PAPER 72-ENAV-31] 20 p2894 A72-39146

Thermal control concept evaluation for a ten-year life modular space station.

[ASME PAPER 72-ENAV-30] 20 p2894 A72-39147

Development of a laboratory prototype spraying flash evaporator.

[ASME PAPER 72-ENAV-28] 20 p2894 A72-39149

Thermal control system incorporation into lunar roving vehicle (LRV) for electronic component protection during translunar transportation and lunar surface operation

[ASME PAPER 72-ENAV-27] 20 p2894 A72-39150

Significant factors in environmental and thermal control/life support system design for space shuttle orbiter

[ASME PAPER 72-ENAV-21] 20 p2895 A72-39156

Space shuttle environmental temperature control-life support system program changes, discussing air cooled electronic equipment, cryogenic stores, crew size and mission duration

[ASME PAPER 72-ENAV-18] 20 p2895 A72-39159

The development of a 150,000 watt-inch variable conductance heat pipe for space vehicle thermal control.

[ASME PAPER 72-ENAV-14] 20 p2896 A72-39163

Computer simulation of the space shuttle orbiter environmental thermal control system.

[ASME PAPER 72-ENAV-12] 20 p2896 A72-39165

Integration of an automated onboard data management system with a manned spacecraft environmental thermal control and life support system.

[ASME PAPER 72-ENAV-6] 20 p2896 A72-39171

A temperature adjustment process in a Boussinesq fluid via a buoyancy-induced meridional circulation.

21 p3044 A72-40112

Electronic simulator for calculating effective temperatures in the establishment of climatological procedures

21 p3077 A72-40166

A novel specimen stage permitting high-resolution electron microscopy at low temperatures.

21 p3051 A72-40218

A new creep rupture testing machine with loading by tubular springs and electronic temperature control

22 p3164 A72-42860

Thermal control techniques used in space simulation laboratory testing.

22 p3164 A72-42997

R and D on environmental and thermal control/life support system application to lunar base mission, discussing reliability and food regeneration

24 p3375 A72-45164

TEMPERATURE DIFFERENCES

U TEMPERATURE GRADIENTS

TEMPERATURE DISTRIBUTION

Infinite slab, cylindrical or spherical shells with nonuniform heat generation sources and equal surface temperatures, obtaining maximum internal temperature from error bounds

01 p0145 A72-10511

Thermal stresses, temperature distribution and displacement fields in elastic solid with spherical cavity and external crack

01 p0144 A72-11385

Forced air cooling of cylindrical body with distributed thermal input, calculating temperature distribution and optimum mechanical dimensions for temperature rise minimization

02 p0189 A72-11560

Turbulent boundary layer flow past surface with arbitrary temperature distribution, presenting approximate heat transfer solution with allowance for pressure gradient and Reynolds number

02 p0201 A72-11582

Elastoplastic deformation in medium with initial dislocations and temperature field, expressing kinetic stress and distortion tensors by Hamiltonian derivatives

02 p0290 A72-11630

Temperature fields and stresses in thin elastic non-ferromagnetic electrically conducting cylindrical shells heated by induction determined from heat source distribution and thin shell theory relations

02 p0290 A72-11631

Thermal conductivity and boundary conditions for unsteady thermal fields in thin anisotropic plates with heat emission

02 p0291 A72-11635

Wall conduction effect on heat transfer to laminar boundary layer, obtaining temperature distributions at plate surface by energy transport equation

02 p0202 A72-11670

Space TV images use in hydrothermal temperature discontinuity front location, examining cloud cover distributions over Sea of Japan

02 p0214 A72-11872

Locally nonsimilar solutions for thermal boundary layer, presenting surface heat transfer and temperature distribution

[ASME PAPER 71-HT-L] 02 p0302 A72-12313

Radiative heat transfer within nonisothermal air plasma, presenting centerline temperature data for various boundary pressures and temperatures

[ASME PAPER 71-HT-G] 02 p0302 A72-12316

Nonstationary temperature field determination in stream turbine casing-connector nozzle by difference method based on heat balances, comparing results with electric analog studies

02 p0303 A72-12534

Lee waves characteristics relationship to air flow and temperature layers in troposphere based on satellite pictures

02 p0255 A72-12791

Velocity and temperature distributions for unsteady plane Poiseuille flow of viscous incompressible fluid between two parallel plates

03 p0340 A72-13000

Solar coronal monochromatic optical emission, inferring electron density and ionization or temperature distributions and variations with time

03 p0422 A72-13208

Ground based atmospheric vertical temperature profiles measurement by Raman backscatter from molecular nitrogen

03 p0348 A72-13430

Two dimensional elasto-viscous incompressible fluid flow past porous wall with variable suction, analyzing temperature field of laminar thermal boundary layers

03 p0341 A72-13500

Current lines and temperature fields in square cavity with one movable wall and viscous flow and heat transfer, solving equations numerically

03 p0456 A72-13629

Temperature field analysis in locally heated cylindrical shell for stressed state production with lowest elastic energy

03 p0456 A72-13733

Complex geometry inhomogeneous sandwich plate, calculating temperature field with R functions

03 p0456 A72-13738

Temperature stresses near thermally insulated square holes in unbounded plane, determining temperature distribution

03 p0449 A72-13914

Curvilinear material anisotropy effects on temperature distributions of thin walled cylindrical shells of revolution

03 p0449 A72-13919

Small signal gain and radiant power of carbon dioxide gas dynamic laser, presenting temperature distribution and population inversion

03 p0368 A72-13920

Cross flow blown two dimensional stationary plasma arc deflection and temperature distribution as function of collisional drift velocity and electric field

03 p0397 A72-13921

Elastic plate with two collinear thermally insulated cracks, calculating steady temperature field and stresses for uniform heat flux at infinity

03 p0450 A72-14112

Small parameter method solutions to linear viscoelasticity problems with nonhomogeneous temperature field applied to reinforced tube under internal pressure

03 p0454 A72-14217

Heat transfer to liquid fuel burning from sandfilled pan burner, measuring burning rate, wick temperature distribution and flame radiation heat flux distribution as function of time

03 p0458 A72-14221

Thermal boundary layer of incompressible fluid unsteady laminar flow, obtaining temperature field from energy equation for various wall temperature conditions

03 p0343 A72-14314

Transformation of differential equations describing interaction between electric arc and gas flow by taking temperature as independent variable, considering Laval nozzle example

03 p0344 A72-14392

TEMPERATURE DISTRIBUTION

Freezing of hot fluid flowing onto flat cold wall, solving nonlinear integrodifferential equation for temperature distribution by iteration method

04 p0595 A72-14650

Closed-loop temperature distribution optimal control by heater-sensor spatial configuration design for highest steady state temperature stiffness under heat flux disturbance

04 p0504 A72-14661

Optimal temperature fields and stress-strain state in orthotropic conical and cylindrical shells subject to local heating

04 p0588 A72-15051

Nearly free molecular slit flow of gas from reservoir at finite pressure and temperature ratios

04 p0512 A72-15120

Newtonian fluid laminar free convection over curved wall with arbitrary temperature variation, investigating similarity solutions existence by method of free parameters

04 p0596 A72-15193

Underexpanded nitrogen jet from sonic orifice, investigating axial rotational temperature distribution

04 p0597 A72-15335

Lunar thermal history and radioactivity upper limits determination consistent with proposed temperature distribution and Apollo chondrite data, implying low uranium content

04 p0581 A72-15579

Optimal temperature fields in locally heated orthotropic cylindrical shells, determining rigidities effect

04 p0593 A72-15655

Three dimensional temperature distribution at thermally insulated crack in plate

04 p0593 A72-15658

Thermal laminar boundary layer equations solution for power-law velocity distribution in external flow and arbitrary surface temperature distribution

05 p0742 A72-15844

Piecewise linear approximation of inverse nonstationary conductive heat transfer through unbounded plate with arbitrary temperature distribution and asymmetric boundary conditions

05 p0742 A72-15847

Nitrogen heat pipe axial temperature distribution and vapor pressure measurement, noting effective thermal conductivity variation with power load and inclination angle

[ASME PAPER 71-WA/HT-28] 05 p0744 A72-15881

Steady state heat transfer problem solutions in living tissue modeled as cylindrical shells, discussing blood flow and temperature distributions in extremities

[ASME PAPER 71-WA/HT-34] 05 p0745 A72-15885

Turbulent flow and heat transfer characteristics of non-Newtonian fluids on flat plate, measuring velocity and temperature distributions

05 p0648 A72-16003

Electric field strength, radiated power and radial temperature distribution measurements in high pressure Ar cascade arc

05 p0695 A72-16156

Two dimensional stationary temperature fields determination in ribs, cylinders and pipes with temperature independent heat conductivity

05 p0746 A72-16188

Thermal signal propagation in flowing fluid, plane, line and point sources of varying heat, calculating temperature distribution with conduction and convection heat transfer equation

05 p0746 A72-16295

Time behavior of temperature and emission measure in X ray flares observed from Vela 5 spacecraft

05 p0709 A72-16518

Temperature variation with latitude in upper solar photosphere from photoelectric meridional and equatorial limb-darkening scans

[AD-744409] 05 p0719 A72-16710

Gegenbauer/ultraspherical/ polynomials and Meijer G-functions for solution of heat production and diffusion in cylinder with internal sources leading to axisymmetric temperature distribution

05 p0747 A72-16791

Radiative transfer in gray medium with prescribed spatial temperature distribution in rectangular enclosures with nonisothermal walls, deriving exact solutions by radiation transport theory

[AIAA PAPER 72-21] 05 p0748 A72-16869

Turbulent jets interaction with cross flow, presenting longitudinal and transverse velocity, temperature and turbulence distributions

[AIAA PAPER 72-149] 05 p0651 A72-16870

Equilibrium temperature distribution on radiatively adiabatic smooth and rough planes uniformly irradiated by collimated solar flux

[AIAA PAPER 72-59] 05 p0749 A72-16876

Incompressible fluid unsteady kinetic energy equation periodic solution for harmonic oscillation viscous dissipation influence on temperature field, considering Couette steady flow solution

05 p0750 A72-17007

Partially insulated homogeneous cylinder temperature distribution from heat conductivity boundary value problem equations

05 p0751 A72-17142

Thermoelasticity equations for thermal shock effect on freely supported circular plate, describing deformation and temperature field interactions

05 p0741 A72-17147

Solar wind structure from long lived inhomogeneities in corona, allowing for velocity, density and temperature perturbations

06 p0872 A72-17444

Temperature and density fluctuations in photosphere from Fe and Mg line intensities, noting variations due to granulation in solar atmosphere model

06 p0876 A72-17579

Velocity and temperature pulsations as function of stratification parameter in atmospheric boundary layer

06 p0842 A72-18044

Multiphase Stefan problems for bounded and unbounded temperature fields with variable phase volume

06 p0904 A72-18401

Multilayer heat reflective coating optical thickness effect on temperature distributions, taking into account interlayer contact resistance and thermal radiation volume absorption

06 p0904 A72-18511

Complex bodies time dependent temperature distribution from temperature measurements at arbitrary points, using Duhamel integral

06 p0904 A72-18512

Kinetic theory of wall temperature jump and near-wall temperature distribution in polyatomic gases, solving simultaneous singular linear integral equations by numerical methods

06 p0904 A72-18528

Temperature stress distribution in infinite plate with time varying heat transfer coefficient

06 p0899 A72-18565

Stress and temperature fields in cooled gas turbine blades with allowance for elasticity, plasticity and creep

06 p0899 A72-18628

Power series method with Cauchy formula for non-linear partial differential equations solution in unsteady periodic temperature oscillations

06 p0905 A72-18727

Laplace equation internal Dirichlet and Neumann boundary value problems solution procedure for thermal potential of steady temperature field

07 p1098 A72-18988

Temperature distribution in composite media with internal heat generation, solving diffusion equation via Vodicka type orthogonality relationship

07 p1100 A72-19626

Temperature distribution in infinite slab during and after heat generation by plane source of finite duration

07 p1100 A72-19627

Transpiration cooling of laminar tangential Newtonian flow in annuli, obtaining temperature distribution

07 p1100 A72-19631

Hydrogen halide rotational relaxation to thermal distribution without intermediate quantum number peak, discussing IR chemiluminescence data correction method

07 p0936 A72-19673

Temperature pulsation spectra of turbulent mercury flow in horizontal pipe at various Reynolds numbers, showing dependence on magnetic field

07 p1100 A72-19882

Axisymmetric single phase Stefan problem with boundary condition of second kind, obtaining temperature distribution along solidifying zone

07 p1101 A72-19892

Algorithm for solving boundary value problem of integrodifferential equations describing temperature field inside hollow thin walled rod within solar radiation field in vacuum

07 p1028 A72-20207

Temperature fields and mass and heat transfer at surface of solid spherical particle in laminar viscous fluid flow

07 p0973 A72-20318

Thermomolecular pressure gradients and temperatures in flow between parallel plates for statistical gas models at arbitrary Knudsen numbers

07 p1101 A72-20513

Solar radio emission, considering sources of slowly varying waves, brightness temperature distribution, frequency spectra and fluctuations

08 p1228 A72-20827

Unsteady temperature field and conductive heat accumulating properties of bodies with dihedral and polyhedral angles

08 p1251 A72-20954

Three dimensional nonstationary heat conduction of hollow circular cylinder in medium with different temperature

08 p1251 A72-20972

Spatial-temporal temperature distribution on CW laser irradiated materials, noting application to water film

08 p1252 A72-21289

Temperature and concentration fields of liquid solution droplets during unsteady vaporization process in high temperature gas media

08 p1252 A72-21308

Uniform and crowded temperature distribution in large geometry power transistor, solving time dependent heat diffusion equation

08 p1141 A72-21419

Temperature distribution and zone melting in carbon thin films heated by electron beam, using Sn crystal indicators

08 p1253 A72-21446

Nonuniform temperature distribution effect on heat conduction coefficient of hot-wire cell, using computerized net point method

08 p1166 A72-21449

Mesospheric temperature and wind profiles during stratospheric warming from rocket grenade experiments

08 p1160 A72-21533

Spherically symmetric Stefan problem with boundary condition of second kind, obtaining temperature distribution

08 p1255 A72-21671

Under-lip temperatures and thermal conductivity in rotary shaft seals, using heat transfer analysis

08 p1178 A72-21934

Statistical analysis of temperature characteristics based on natural orthogonal components expansion for weather forecasting application

08 p1203 A72-22120

Weather analysis for mountainous terrain from potential temperature surface maps and vertical cross sections

09 p1344 A72-22431

Temperature fields produced in viscoelastic cylindrical, conical and spherical shells by cyclic loads, calculating displacements from zero moment stress theory formulas

09 p1399 A72-22701

Temperature and thermal stress distribution in cylinder of finite length for mixed heating conditions

09 p1400 A72-22707

Two dimensional thermoelasticity problem with nonstationary temperature field and external boundary forces, using algorithm to evaluate stress-strain state of welded plates

09 p1401 A72-22725

Thermal buckling of parallelogram shaped plate under stationary temperature field and uniformly distributed forces, deriving critical load

09 p1402 A72-22733

German book on unsteady heat conduction and temperature field equalization covering mathematical treatment with Laplace transformations

09 p1412 A72-23175

Nonstationary temperature field of semitransparent shell with nonuniformly distributed heat sources

09 p1412 A72-23184

Radial temperature distribution in Ar plasma jet, assuming local thermodynamic equilibrium

09 p1364 A72-23387

Kinematic and thermal turbulent fluctuations isolation by means of hot-wire anemometric probe

10 p1479 A72-24055

Asymmetry and intermittency factors of temperature and velocity fluctuations in viscous substrate of hot plate turbulent boundary layer

10 p1464 A72-24064

Radial temperature distribution determination in nitrogen plasma jet from continuous spectral background intensity measurement

10 p1519 A72-24131

Heat transfer through glass plate in solar radiation flux, discussing temperature distribution and thermal flux meter design

10 p1562 A72-24318

Cavity flow driven by buoyancy and shear, obtaining flow and temperature fields from Navier-Stokes equation numerical solution

10 p1467 A72-24366

Thin circular plate quasi-static thermal stresses induced by transient temperature distribution on upper face, obtaining series form solution in terms of Bessel functions

10 p1558 A72-24720

Two dimensional transverse subsonic hot-air jet interaction with freestream flow at various jet/freestream velocity ratios, measuring jet velocity and temperature distributions

[AIAA PAPER 72-292]

11 p1567 A72-25230

Lunar surface roughness effect on temperature distribution, noting solar elevation and observation angle dependence

[AIAA PAPER 72-310]

11 p1715 A72-25244

Temperature distributions in constant viscosity incompressible Couette flow with additional pressure gradients

11 p1743 A72-25262

Drazin method application to thermal stratification effects on unbounded jets and shear layers stability characteristics

11 p1615 A72-25552

Global sea surface temperature distribution determination with ITOS 1 radiation measurements and composite histogram, discussing RMS errors

11 p1620 A72-25767

Numerical calculation of temperature distribution and tempering depth for inductive hardening process with automatic material feed, taking into account temperature dependent material properties

11 p1639 A72-25899

Electrode gap current and temperature distributions during electrochemical precision processing of metals studying gas and electrolyte flow

11 p1613 A72-26255

Laser light intensity relationship to temperature distribution in completely ionized plasma, defining optimal heating conditions

11 p1696 A72-26344

Thermal stresses in cylindrical shell under moving hot spot with cooling effect of surrounding media

11 p1737 A72-26423

Thermal stresses in homogeneous isotropic and composite curved beams for temperature distribution in polynomial form with coefficients representing functions of two remaining coordinates

11 p1737 A72-26664

Pressure and temperature fields expansion in natural orthogonal components, considering application to long range forecasts construction

11 p1683 A72-26888

Finite difference method for bending stresses calculation in rotating disks subjected to irregularly distributed temperature, deriving digital computer program algorithm

11 p1712 A72-26970

Hyperboloidal profile circular disk stress distribution induced by thermal pulse nonuniform temperature field

11 p1739 A72-26979

Stress-strain state and temperature distribution in transversely isotropic layer under mixed heat transfer conditions

12 p1878 A72-27083

Two heat conducting phases free boundary problem with temperature distribution within phases, proving existence and uniqueness theorems

12 p1836 A72-27124

Lunar interior thermal history discussing mathematical models for radioactive heat source, initial conditions, temperature distribution and time dependence fractionation

12 p1870 A72-27314

Temperature distribution and dissipation effects in compressible isothermal atmosphere Lamb waves vertical structure

12 p1839 A72-27514

Thermal flux on contact area and temperature distribution on specimen surface during diamond grinding

12 p1814 A72-27717

Temperature distribution and heat dissipation calculations for CW and pulsed laser optical elements

12 p1824 A72-27877

Gas turbine engine combustion chamber, investigating swirl vane air flow rate effects on circumferential nonuniformity of gas temperature field at outlet

12 p1861 A72-28132

Radial and circular thermal stresses in free and end-constrained orthotropic cylinders with axisymmetric temperature distributions, determining relations between temperature and thermoelastic coefficients

13 p2055 A72-28561

Axisymmetric temperature problem with arbitrary load duration for disk-shaped crack fracture mechanics, using Fredholm equation with symmetrical kernel for temperature field determination

13 p2055 A72-28720

Temperature distribution in rotating cylinder with moving surface source, allowing for heat transfer to ambient medium

13 p2064 A72-28916

Surface temperature distribution for porous plate in supersonic flow with gas injection into turbulent boundary layer

13 p1893 A72-28917

Thermomechanical interactions between elastic waves and nonstationary temperature fields in solid continua, considering coupled and uncoupled theories

13 p2064 A72-29093

Three dimensional steady temperature field calculation for solid bodies under concentrated heat source, using flow kinetic heat conduction method

13 p2065 A72-29151

Ethanol liquid fuel counterflow diffusion flame stabilization and thermal structure determination by interferometry

13 p1913 A72-29306

Two point correlation description of MHD plasma properties subject to electrothermal instability, calculating electron number density and temperature fluctuations

13 p2015 A72-29373

Avrett-Krook temperature correction procedure modified to improve, near surface convergence for blanketed model stellar atmospheres

13 p2040 A72-29406

Plastic properties of locally heated refractory metals in hot pressing calculated from temperature distribution
13 p1966 A72-29465

Cs vapors thermal conductivity at various temperatures and pressures, using low emissivity Ni cylinders
13 p2065 A72-29896

Isothermal vertical plate turbulent thermal boundary layer during free convection, noting temperature pulsations dispersion
13 p2066 A72-29899

System of equations derived for unsteady temperature field of arbitrary multilayer shell, using polynomial expression as temperature approximation for shell thickness
13 p2066 A72-29949

Mars upper cover temperature, representing diurnal variations at different areographic latitudes as harmonic series
14 p2148 A72-30207

Interferometric investigation of temperature fields and heat transfer in air layers between vertical, inclined and horizontal parallel walls
14 p2170 A72-30251

Aircraft engine components fatigue life assessment under small cycle temperature conditions, including temperature field and stress-strain determination in critical spot
14 p2145 A72-30279

Composite two-material circular sector two dimensional stationary temperature field determined for certain thermal conduction coefficient ratios
14 p2170 A72-30573

Temperature distribution of structural element with heat shield and metallic layer, determining ablation process for thermal flux at surface
14 p2170 A72-30593

Relaxation method for thermal computation programs to solve nonlinear heat exchange equations for steady state temperature distribution, discussing numerical instability due to linearization
14 p2170 A72-30684

Electric arc plasma, predicting elements addition and electron density alteration effects on radial temperature distribution
14 p2139 A72-30778

Electric arc plasma, investigating reaction energy effects on radial temperature distribution
14 p2139 A72-30779

Schlieren method for qualitative study of optical inhomogeneities produced by temperature field in cylindrical solid body
14 p2106 A72-31162

Temperature distribution and heat transfer coefficients in turbulent separated flow region downstream of rearward step in subsonic wind tunnel, using Mach-Zehnder interferometer
15 p2333 A72-31204

Thermal laminar boundary layer equations solution for power-law velocity distribution in external flow and arbitrary surface temperature distribution
15 p2334 A72-31263

Piecewise linear approximation of inverse nonstationary conductive heat transfer through unbounded plate with arbitrary temperature distribution and asymmetric boundary conditions
15 p2334 A72-31266

Heat conductivity equation solution for laminar gas flow in tubes, calculating temperature field and heat removal for molecular lasers with gas pumping
15 p2245 A72-31421

Thermal stress and temperature distribution in rigidly bounded elastic half-space, taking into account coupling effects
15 p2325 A72-31637

Heat transfer and longitudinal temperature distribution at Hartmann-Sprenger tube inlet calculated approximately on basis of boundary layer data in steady compressible flow
15 p2217 A72-31685

Stress-strain state of spherical body in centrally symmetric temperature field, noting elastoplastic interface and continuity conditions
15 p2327 A72-31742

Closed form solution for transient temperatures between two thermocouple readings, using Laplace transformation
15 p2336 A72-32583

Velocity and temperature distribution for viscous incompressible fluid unsteady flow between two parallel plates with pressure gradient linearly varying with time
15 p2199 A72-32599

Thermoelastic stress analysis for hollow cylinder heated along helix, calculating stress function for given surface temperature distribution
15 p2333 A72-32687

Subsonic and supersonic steady two dimensional compressible turbulent boundary layer flow past wavy wall, presenting wall pressure and temperature distributions
16 p2341 A72-32828

Temperature profile derivation for uppermost convection region of two solar convection zone models from finite amplitude convection theory
16 p2451 A72-33037

Unsteady heat conduction in hollow cylinder suddenly heated by temperature field moving along outer and inner side surfaces
16 p2475 A72-33114

Stress analysis for brittle body with thermoinsulated crack under mechanical load and temperature field, noting limiting equilibrium equation
16 p2469 A72-33272

Steady state temperature field and heat flux at wall for metallic coolant flow in thin walled axisymmetric pipe with nonhomogeneous Neumann boundary condition
16 p2477 A72-33434

Wall and ambient temperature distribution effects on free convection heat transfer from nonisothermal vertical flat plate in temperature stratified medium for Prandtl number range
16 p2477 A72-33434

German monograph on pressure loss and heat transfer in heat exchangers, taking into account hydrodynamic and thermal inflow velocity and temperature distribution
16 p2478 A72-33504

Magnetothermoelastic temperature distribution effects due to linear heat source in infinite circular cylinder acted upon by magnetic field
16 p2425 A72-33595

Temperature field in flat plate with selective radiation absorption coefficient, using asymptotic representations for internal heat flux radiation component
16 p2479 A72-33858

Temperature distribution and heat dissipation calculations for CW and pulsed laser optical elements
16 p2403 A72-33982

Steady state magnetically balanced cross flow arc, calculating flow and temperature fields and boundary shape under assumption of two independent variables [AIAA PAPER 72-687]
16 p2439 A72-34055

Temperature and stress fields generated by pulsating internal pressure in viscoelastic hollow sphere with temperature dependent material properties, using iterative numerical procedure
16 p2473 A72-34122

Prediction of the flow and heat transfer in a rectangular wall cavity with turbulent flow.
[ASME PAPER 72-APM-Q]
17 p2636 A72-34305

A first initial boundary value problem for a semilinear heat equation.
17 p2573 A72-34339

Reactor core length, externally configured thermionic converter.
17 p2495 A72-34589

Collapse calculations for 0.25-10 solar mass spherical protostars, discussing stellar core evolution and temperature distribution in infalling cloud
17 p2606 A72-34674

Computer thermal analysis of hybrid microcircuits.
17 p2521 A72-34679

The identification of parameters in nonlinear thermal networks with the aid of a Kalman filter
17 p2533 A72-34827

Multiphase Stefan problems for bounded and unbounded temperature fields with variable phase volume
17 p2636 A72-34852

Onset of convection near a suddenly heated horizontal wire.
17 p2637 A72-35048

Temperature distribution in solids under laser irradiation.
17 p2564 A72-35355

Unsteady temperature distribution for laminar flow in a porous straight channel.
17 p2541 A72-35434

Turbulent boundary layer with discontinuity in wall temperature and concentration
17 p2638 A72-35746

Distortion of the semi-infinite solid due to transient surface heating.
17 p2635 A72-35974

Observations of the variability of dissipation rates of turbulent velocity and temperature fields.
18 p2678 A72-36022

Geochemically and geophysically consistent model of lunar accretion process to explain initial temperature distribution
18 p2725 A72-36291

Solution of heat transfer problems with the aid of Laplace transforms. I - Development of analytical solutions for two specific boundary value problems
18 p2740 A72-36422

Multimesa versus annular construction for high average power in semiconductor devices.
18 p2666 A72-36455

Convective cells formation in fluid unsteady flow between two horizontal rigid boundaries with time periodic temperature distribution
18 p2681 A72-36483

TEMPERATURE DISTRIBUTION

Thermo-elastic interactions in an infinite elastic solid due to a concentrated transient heat source.
18 p2735 A72-36754

Unsteady-state temperature distribution in a connecting fin of constant area.
18 p2741 A72-36935

Viscoelastic analysis of graphite under neutron irradiation and temperature distribution.
18 p2704 A72-37088

Solution of the general heat transfer problem by the integral Tolubinskii method for a longitudinal flow past cylindrical bodies
18 p2742 A72-37182

Calculation of the temperature field of a heated zone of complex form consisting of a chassis and built-in components
18 p2742 A72-37187

Thermal displacements and stresses in cylindrical shells due to instantaneous line heat sources.
19 p2870 A72-37272

Experimental investigation of nonstationary heat exchange for flow around a flat plate
19 p2880 A72-37665

Temperature probes for flows at high enthalpy [ONERA, TP NO. 1074]
19 p2800 A72-37767

Ulcera meteorite - Determination of differential atmospheric heating using its natural thermoluminescence.
19 p2858 A72-37859

Solution of boundary value problems in heat conduction by the method of the successive averaging of a desired function
19 p2881 A72-38042

Temperature field of a gas turbine rotor blade externally cooled by an air-liquid mixture
19 p2849 A72-38043

Post-critical deformations of a cylindrical shell subject to the action of external pressure and a temperature field
19 p2878 A72-38472

Temperature distribution in hot wires in high-enthalpy low-density flows [DFVLR-SONDDR-216]
19 p2804 A72-38685

Discussion of the thermal state of an open air premixed methane-oxygen flame.
19 p2883 A72-38871

Rotationally symmetric temperature distribution in region between two coaxial circular cones for isothermal and adiabatic conditions, solving heat conduction equation
20 p2983 A72-39329

Temperature distribution control in n-dimensional space via quasi-inversion method with Fourier transformation for Cauchy problem solution of heat conductivity equation
20 p2983 A72-39466

Unsteady heat transfer and temperature for Stokesian flow about a sphere.
[ASME PAPER 72-HT-C]
20 p2983 A72-39482

Straight fins with periodic base temperature variation, calculating design parameters effects on heat transfer rates, temperature distributions and efficiencies
[ASME PAPER 72-HT-E]
20 p2983 A72-39484

The effect of thermal conductivity and base-temperature depression on fin effectiveness.
20 p2983 A72-39489

Microelectronic component system temperature distribution measurement by IR microscope and electrical technique to determine beam-lead IC thermal performance
20 p2908 A72-39498

The computation of dynamic equilibrium temperature distributions on substrates having a temperature-dependent thermal conductivity.
20 p2908 A72-39499

Temperature distribution in a helically heated tube
20 p2984 A72-39648

An analytical solution of wall-temperature distribution for transpiration and local mass injection over a flat plate.
[ASME PAPER 72-HT-57]
20 p2985 A72-39659

Thermal remote sensing of temperature distribution in semitransparent solids - A numerical experiment.
[ASME PAPER 72-HT-5]
20 p2986 A72-39676

An analysis of the spectral scanning technique for determining the temperature distribution in a semi-transparent medium.
[ASME PAPER 72-HT-6]
20 p2986 A72-39677

Remote sensing of urban 'heat islands' from an environmental satellite.
20 p2919 A72-39717

Calculation of a plane stationary temperature field in the presence of a heat source
20 p2987 A72-39915

Digital simulation of the SEI-1 static electrointegrator for solving heat-type equations
21 p3127 A72-40160

Nonisothermal surface cooling for arbitrary temperature distribution and Prandtl number approaching zero, solving thermal boundary layer equations by series expansion
21 p3129 A72-41061

Application of the elementary-balance method to the calculation of the nonstationary temperature fields and aerodynamic characteristics of several versions of a surface-type heat exchanger

21 p3130 A72-41064

Elastic isotropic material mechanical and thermal constitutive equations restrictions investigation to ensure local stability under perturbations of deformation gradient and temperature field

21 p3120 A72-41203

Stresses and strains in the plastic range in an annular disk due to steady-state radial temperature variation.

21 p3121 A72-41210

Steady radiating gas flow past a semi-infinite flat plate at a constant temperature for an optically thick case.

21 p3131 A72-41497

Buildup of thermal equilibrium in a fluid near the critical point

22 p3242 A72-41882

An inverse problem in the momentless theory of shells of revolution situated in a temperature field

22 p3232 A72-41895

Temperature distribution and heat flux in infinite length rectangular and finite length cylindrical fins, examining validity of one dimensional approximation

22 p3243 A72-41961

Axisymmetric temperature problem with arbitrary load duration for disk-shaped crack fracture mechanics, using Fredholm equation with symmetrical kernel for temperature field determination

22 p3233 A72-42097

Analytical calculation of unsteady heat fields in planar devices

22 p3158 A72-42116

Lunar albedo and temperature distribution from simultaneous photoelectric and far IR brightness temperature measurements of sunlit lunar surface

22 p3226 A72-42536

Effective temperatures of massive stars as a function of chemical composition and mass.

22 p3227 A72-42560

Mars upper cover temperature, representing diurnal variations at different areographic latitudes as harmonic series

23 p3333 A72-43237

A current instability in the neutral layer of the tail of the earth's magnetosphere

23 p3283 A72-43368

Stress concentration around a circular hole in an elastoplastic medium under the action of a temperature field and omnidirectional tension

23 p3344 A72-43418

Three dimensional temperature distribution of internally cooled hollow airfoil section turbine blades, deriving heat transfer equations for digital computation

23 p3325 A72-43667

Spatial and temporal temperature distribution in plasma from a low-voltage aperiodic spark discharge in an atmosphere of argon

23 p3320 A72-43677

Temperature distribution in a perforated stiffener

23 p3356 A72-43684

Probability distribution of velocities and temperatures near a wall

23 p3279 A72-43696

On the approximation of the thermal conductivity of rigid heat conductors as a Cauchy problem.

23 p3356 A72-43721

Thermoviscoelastic problem for semiinfinite plate, determining temperature field and stresses permitting heat propagation

23 p3347 A72-43749

Test equipment for heat resistance determination of brittle refractory material, noting data processing procedure and formulas for temperature distribution and thermal stress

23 p3278 A72-43962

On free vibrations at temperature-dependent material properties and transient temperature fields. [ASME PAPER 72-APM-J]

23 p3350 A72-44053

Determination of the stationary temperature field in a plate with a crack in the presence of heat release from the lateral surfaces

23 p3357 A72-44086

Thermomechanical coupling effects in the longitudinal oscillations of a viscoelastic cylinder.

23 p3352 A72-44122

An experimental study of heat transfer downstream of a rearward-facing step with small coolant injection.

23 p3357 A72-44271

Temperature calculation in a multilayered wall acted on by a thermal pulse.

23 p3357 A72-44537

Latitudinal variation of temperature in the lower thermosphere /80 to 100 km/

24 p3395 A72-44635

Dual analysis for heat conduction problems by finite elements.

24 p3461 A72-44877

Laminar high speed mixing of nonequilibrium dissociating gases.

24 p3392 A72-45056

Developing turbulent flow and heat transfer in concentric annuli.

[CSME PAPER 71-39] 24 p3465 A72-45253

Plane thermoelastic one-dimensional waves in an inhomogeneous medium with allowance for connectedness

24 p3459 A72-45266

Partial differential heat conduction equation for temperature distribution in rectangular plate, comparing with finite difference solution

24 p3465 A72-45268

Calculation of the temperature field in a ventilated cassette-type radio electronic device

24 p3386 A72-45324

Approximate temperature distribution for a diffuse, highly reflecting material.

24 p3465 A72-45790

TEMPERATURE EFFECTS

Sphene U-Pb age resistance to thermal metamorphism, discussing zircon U-Pb and biotite and hornblende K-Ar ages within thermal aureole

01 p0052 A72-10069

Tungsten heat capacity, electrical resistivity and thermal radiation measurement over 2000-3600 K range by pulse heating technique

01 p0082 A72-10174

Spectral distribution of total continuous emission coefficient for LTE hydrogen plasma over 8000-16,000 K and 400-15,000 A ranges, observing Stark broadening

01 p0108 A72-10175

Nb alloys bend ductility at various temperatures, showing silicide coatings and electron beam and gas tungsten arc welding effects on mechanical properties

01 p0083 A72-10284

Hydrostatic pressure and temperature effects on growth of psychrophilic marine bacterium, emphasizing inhibited amino acid transport and respiration

01 p0011 A72-10322

Mossbauer spectra measurement of metallic iron, sodium nitroprusside, sodium ferrocyanide and ferrocyanide absorbers at 78-293 K, fitting temperature dependences and resonant velocity to models

01 p0114 A72-10324

Heat transfer in turbulent flow of equilibrium dissociating nitrogen tetroxide within round tube, considering pressure, temperature and mass flow rate effects

01 p0145 A72-10490

Nondestructive determination of temperature dependence of elastic moduli of Al alloy and Ni and stainless steels by resonant frequency method

01 p0084 A72-10518

Stress relaxation resistance at elevated temperatures after reloading as function of internal and effective stress

01 p0138 A72-10520

CW X-band Gunn oscillator in coaxial cavities, investigating frequency variation with ambient temperature

01 p0037 A72-10641

Contrast reversal or distance paradox in temperature perception aftereffect

01 p0013 A72-10716

Thermal and environmental exposure effects on high temperature mechanical properties of graphite/polyimide composites

01 p0090 A72-10730

Temperature and compressive loading cycles effects on high performance multilayer insulation materials and composites, discussing application to space shuttle orbiter

01 p0092 A72-10779

Ionized argon recombination rate constant determination as function of temperature, using dual frequency laser interferometry measurement of corner expansion flow

01 p0050 A72-10851

Ti alloy honeycomb core sandwich panels fabricated by brazing or spot diffusion bonding, investigating elevated temperature effects on mechanical properties

[ASM PAPER W 71-23.3] 01 p0086 A72-10875

Hydrogen diffusion kinetics in Nb under various temperatures during gas-metal absorption experiments, observing room temperature hardness profile

01 p0087 A72-11026

Breakdown surfaces of thin Ti alloy specimens under tension as function of composition and heat treatment temperature

01 p0088 A72-11079

Recrystallization and rolling temperature effects on W strength and plasticity

01 p0088 A72-11083

Optimal conditions for energy conversion in MHD generator, observing ion seeding effect on plasma temperature

01 p0009 A72-11207

Turbine blades adaptability limits to temperature variations, considering rectangular cross section plastic rod under programmed thermal and tensile load cycles

01 p0143 A72-11372

Optical distortion induced by heated windows in high power laser systems, deriving figures of merit for window materials

02 p0237 A72-11470

Annealed pure Al polycrystals fatigue behavior data under elevated temperatures, using transmission electron microscopy

02 p0242 A72-11525

Tube and hollow sphere revolving in thermal flux under surface pressure load, obtaining stress-strain state and random temperature dependences of creep

02 p0289 A72-11618

Low impulsive loading effect on strength creep resistance of polycrystalline Al at elevated temperatures

02 p0243 A72-12011

Gaseous diethyl peroxide spontaneous ignition during decomposition in cylindrical vessel, investigating diluents and temperature effects on self heating

02 p0301 A72-12027

Thermal conductivity measurement of dissociating nitrogen dioxide over 548-792 K and 1-30 atm

02 p0170 A72-12091

Thermal effects on reversible threshold switching in amorphous semiconductor thin films involving current controlled negative resistance

[AD-741462] 02 p0268 A72-12202

Niobium anomalous oxidation below 600 C, noting suboxide formation between solid solutions and heat resistance reduction

02 p0243 A72-12214

Eutectic Ni-Cr alloy temperature effects on deformation rate on plasticity, noting superplasticity point

02 p0244 A72-12243

Real gas tailored shock tube Mach numbers by analytical method, investigating driver temperature effect

02 p0205 A72-12269

Dielectric properties of high purity polycrystalline barium titanate, observing temperature effects as function of heat treatment

[AD-737022] 02 p0269 A72-12417

Temperature effects on strength and deformability of randomly reinforced fiberglass polyamides

02 p0250 A72-12678

Cathode and anode temperatures effect on effective heat of condensation of electrons at anode for particular current density and different cesium vapor pressures

02 p0156 A72-12858

CdS single crystal field emission spectral characteristics at room and cryogenic temperatures, discussing intrinsic and impurity levels

02 p0269 A72-12888

Titanium disilicide oxidation mechanism at various temperatures, discussing surface quality effect, growth rate and protective mechanism

03 p0369 A72-12925

Heat treatable high strength steels fracture toughness dependence on temperature, examining surfaces with electron scanning microscope

03 p0369 A72-12959

High velocity impact reduced temperature increase due to shock compression in metals, discussing pressure and charge effects

03 p0442 A72-13240

Nonperiodically moving object holographic interferometry by time-averaging method, considering single exposure technique advantage over multiple exposure in thermal deformation observation

03 p0357 A72-13373

Temperature and loading conditions effects on structural element service life, showing partial healing process of microdefects

03 p0443 A72-13454

Testing temperature effect on intergranular fracture propagation in steel sensitive to tempering brittleness

03 p0372 A72-13599

Copper sulfide-cadmium sulfide single crystal photovoltaic heterojunctions, showing optically induced and thermal effects on short circuit current degradation

03 p0389 A72-13603

CoO single crystal creep rate at different temperatures, stresses and oxygen pressures, noting slip occurrence

03 p0373 A72-13647

Thermocouple efficiency with respect to Thomson effect and electric resistivity temperature dependence

03 p0360 A72-13651

Heat treated single-phase Pr-Co powder compacts, measuring coercivity as function of annealing or sintering temperature

[IEEE PAPER 7.3] 03 p0402 A72-13756

Computerized design algorithm for ferrite core memory system, considering cross-temperature effect under worst driving conditions

[IEEE PAPER 11.8] 03 p0327 A72-13766

Thermal stresses from inner surface temperature of micropolar hollow cylinder in static thermoelasticity problem with vanishing body loads

03 p0448 A72-13889

Zr and V linear thermal expansion coefficients explanation by alpha Zr hexagonal crystal lattice anisotropy

03 p0376 A72-13946

- Temperature dependence of X ray interference lines for Al-V alloy obtained at high cooling rate, noting metastable solid solution thermal stability 03 p0377 A72-14022
- Edge temperature effects on contact stress concentration in anisotropic plate with elliptic hole under mixed boundary conditions of thermoelasticity 03 p0450 A72-14109
- Metals thermophysical characteristics temperature dependence determination by analog computer, using one dimensional temperature fields in thin infinite plates and cylindrical or spherical surfaces 03 p0458 A72-14165
- Temperature reduction produced by partial cloud cover effect on radiation received by Nimbus 3 IR radiometer 03 p0385 A72-14226
- Polymer adhesives chemistry and properties in 450 F air, discussing weight loss and strength values 03 p0381 A72-14233
- Ionization waves linear theory for low pressure noble gas strong current column, showing self excitation limit and temperature dependence of energy loss rate 03 p0400 A72-14351
- Low temperatures and deformation rates effect on martensitic phase formation in Cr-Ni austenitic stainless steel under compression and tension 03 p0379 A72-14378
- Ferritic steel nil-ductility transition temperature data analysis correlating irradiation results with activation fluences and temperature 04 p0547 A72-14430
- Electrochemical machining electrode processes thermodynamic and kinetic characteristics, discussing temperature, electrolyte viscosity and flow rate and current density effects on metal removal rate 04 p0526 A72-14475
- Carbon monoxide oxidation by hydroxyl radicals at high and low temperatures from transition state theory, confirming flame and shock tube results [WSCI PAPER 71-36] 04 p0482 A72-14584
- Turbulent tropospheric temperature fluctuations effects on optical waves propagation with random scattering, considering amplitude, phase, angle-of-arrival and polarization 04 p0548 A72-14736
- Inorganic phosphates-nucleoside hypohydrous thermal reaction mechanism, discussing thermal polymerization of orthophosphates for phosphorylation and condensing agents in primordial synthesis 04 p0483 A72-14770
- Heat input, interpass temperature and panel width effects on butt welds strength in Al alloy plate 04 p0526 A72-14838
- Ionospheric plasma drift instability, showing electric and magnetic fields, electron density and temperature effects 04 p0517 A72-14956
- Carburization of various irons in methane-hydrogen atmosphere at 750 C, comparing activity coefficients and solubility limits 04 p0533 A72-14978
- Unsteady approach to nonisothermal flow theory for Couette flow, making general assumptions concerning rheological law and temperature dependence of fluidity 04 p0512 A72-14985
- Temperature dependence of quantizing thin films electroconductivity in case of scattering at neutral impurities 04 p0561 A72-15078
- High resolution electron microscope observation of voids in amorphous Ge films, noting density dependence on substrate temperature 04 p0562 A72-15152
- Small sphere hydrodynamic drag in ionized gas at local thermodynamic equilibrium, taking into account nonlinear transport properties variations with temperature [ASME PAPER 71-APM-CC] 04 p0558 A72-15176
- Nb-Ti alloy critical current density increase dependence on temperature, discussing evidence supporting rigidly pinned vortex lattice model 04 p0562 A72-15292
- Longitudinal ultrasonic sound attenuation in superconducting Mo-Re alloys as function of temperature, magnetic field and frequency, using evaporated thin film CdS transducers 04 p0562 A72-15295
- Radiative cooling effects on flow field and heat transfer behind reflected shock wave [AD-737423] 04 p0597 A72-15338
- Zr alloys hydride distribution after oxidation in steam at 550 C, discussing hydrogen uptake 04 p0534 A72-15362
- Arrhenius model and graphical methods for temperature accelerated life tests in electrical insulation systems 04 p0500 A72-15364
- Weak magnetic moments measurement under pressure and over wide temperature range by Faraday method, discussing magnetometer and cryogenic equipment modifications [AD-740076] 04 p0522 A72-15478
- German monograph on refractory materials elasticity modulus determination at elevated temperatures, describing device based on characteristic vibrations frequency relation to temperature 04 p0510 A72-15698
- Supermendur magnetization and ac core loss temperature dependence under slow temperature cycling in vacuum, noting anomalous Barkhausen effect 04 p0564 A72-15718
- Sb 124 dopant redistribution in Ge semiconductor during diffusion alloying with In at 750-850 C 05 p0701 A72-15751
- Thermal load effect on convective heat transfer in turbulent flow in circular duct 05 p0742 A72-15843
- Water heat pipes transient thermal impedance, monitoring evaporator, vapor space and condenser temperature [ASME PAPER 71-WA/HT-9] 05 p0743 A72-15869
- Mean and fluctuating temperature dependence of gas discharging from orifice to atmosphere on pressure vessel wall heat transfer [ASME PAPER 71-WA/HT-32] 05 p0745 A72-15884
- Temperature, flow, end conditions and branching on small signal sinusoidal amplitude frequency response of pneumatic lines, investigating transfer functions [ASME PAPER 71-WA/AUT-5 [FLCS]] 05 p0615 A72-15958
- Temperature and compression rate effects on metal powder packing density, obtaining activation energy from Boltzmann equation 05 p0665 A72-16089
- Thin cylindrical shell bending deformation from axisymmetrical temperature distribution generated by narrow heating element 05 p0736 A72-16113
- Nonstationary oncoming flow temperature effect on heat transfer in thermal boundary layer at forward stagnation point 05 p0746 A72-16217
- Fluid motion model with gas bubbles, noting energy dependence on temperature and density 05 p0649 A72-16224
- Atmospheric temperature effect on solar diurnal variation of muon component, considering asymptotic characteristics of cosmic ray anisotropy 05 p0709 A72-16257
- Temperature, pressure and crystallization time effects on artificial diamond crystal growth of various morphological shapes 05 p0681 A72-16355
- Quasar primordial He content prediction from primordial temperature fluctuations necessary for galaxy formation 05 p0717 A72-16384
- Metastable He atoms concentration in plasma from absorption characteristics at temperatures 4-300 K and pressures 1-70 mm Hg 05 p0696 A72-16612
- Surface oxide film effects on hydrogen liberation rate from Al and alloys in high vacuum at 20-450 C 05 p0675 A72-16627
- Nb alloy oxidation behavior dependence on temperature in 550-1316 C range 05 p0676 A72-16732
- Thermoelastic effect on flutter and vibration of built up delta wings with solid, stiffened and honeycomb/corrugated sandwich skins [AIAA PAPER 72-174] 05 p0740 A72-16834
- Turbine blade row coolant flow velocity, injection location and temperature effects on kinetic energy output [AIAA PAPER 72-12] 05 p0707 A72-16866
- Gas dynamic laser technology advances, discussing water content, temperature and Na effects and nozzle design [AIAA PAPER 72-143] 05 p0669 A72-16895
- Analytical models for predicting mass transfer cooling effects on blade row efficiency of turbine airfoils [AIAA PAPER 72-11] 05 p0707 A72-16943
- Hydraulic fluids behavior under extreme temperature, pressure and filtration conditions, considering viscosity, wear and corrosion resistance 05 p0681 A72-17084
- Prolonged heatings effect on heat resistant magnesium alloys microstructure and mechanical properties 05 p0680 A72-17208
- Electrical resistance, Hall coefficient and magnetic susceptibility of transition metal nitrides at low and room temperatures 06 p0827 A72-17386
- Homologous temperature method to compare mechanical properties of metals tested at different temperatures 06 p0827 A72-17399
- Temperature inhomogeneity effect on plasma column microwave resonant behavior in presence of axial magnetic field, ascribing spectral shifts to electron density and temperature profiles changes 06 p0854 A72-17417
- Co and carbide containing alloys, investigating milling and sintering temperature effects on technological and physical properties 06 p0829 A72-17831
- Automatic frequency adjustment of pair of He-Ne lasers with different oscillation frequency fluctuations under various heating conditions 06 p0825 A72-17840
- Temperature effects on anodic polarization of Ti open surface and corrosion crevices, discussing critical potential relation to pitting 06 p0829 A72-17946
- Dynamic strain aging significance in titanium, observing reduction of temperature and strain rate effects on stress-strain curves shapes 06 p0830 A72-18054
- Flow in gas lubricated conical bearings, considering analytical and numerical solutions for axisymmetric flow model with temperature dependent viscosity and dissipation coefficients 06 p0801 A72-18124
- Bacteriophage synergistic inactivation by heat and ionizing radiation from kinetic model describing dose rate and temperature dependences 06 p0768 A72-18185
- High energy chemical propellant combustion under adiabatic and nonadiabatic conditions, calculating product equilibrium state as functions of temperature and pressure with computer program 06 p0903 A72-18212
- Internal friction spectrum peaks in Fe-Ni alloy at 20-1100 C upon heating and cooling, explaining by grain boundary relaxation and martensitic transformations 06 p0830 A72-18293
- Internal friction in annealed and deformed tungsten at room temperature to 950 C, examining carbon contents, dislocations and temperature effects on carbon Snoek peak 06 p0830 A72-18295
- High temperature and ZrO2 ceramic electrolyte effects on ionic partial conductivity and fuel cells longevity 06 p0760 A72-18337
- Al and Ti alloy fatigue after temperature reduction to 253, 77 and 4 K as function of surface purity after machining 06 p0831 A72-18356
- Compressive strength of Cu-W fiber metal matrix composite as function of temperature, comparing to cermets 06 p0832 A72-18363
- Anomalous temperature-strain rate dependence of Ni-Al intermetallic compound mechanical properties from plastic deformation mechanism 06 p0832 A72-18417
- Plastic deformation and elastic stiffness of refractory metals, discussing impurities, alloying, temperature, work hardening, strain rate and texture effects 06 p0822 A72-18519
- Thermally activated crystal microcrack initiation by fusion of leading and following dislocations 06 p0898 A72-18551
- Approximate trigonometric solution to thermoelastic boundary value problem of plate with doubly periodic system of holes under unsteady temperature and thermal stress fields 06 p0899 A72-18563
- Temperature induced bending of thin freely supported rectangular plate, obtaining stress-strain state 06 p0899 A72-18564
- Graphite and molybdenum disulfide, investigating temperature effect, thermal stability and oxidation effect on weight by TGA and DTA 06 p0837 A72-18602
- Temperature dependent directional differences of modulus of elasticity of Mo sheet, using resonance technique 06 p0833 A72-18632
- Temperature and deformation velocity effects on elasticity and tensile strength of Mo and Nb alloys 06 p0833 A72-18636
- Sheet metal fatigue test method for transverse 100-1000 Hz bending at normal and high temperatures, applying to 1.5 mm Ti alloy sheet 06 p0900 A72-18671
- Polymers mechanical losses temperature-frequency dependence, using nonlinear viscoelastic theory 06 p0838 A72-18678
- Rectangular capacitor overheating calculation with allowance for heat transfer from all surfaces, discussing chassis heat removing action computation during natural cooling 07 p0953 A72-18930
- Test facility for studying temperature dependence of thermal diffusivity and true heat capacity of metals between minus 150 and plus 400 C 07 p0982 A72-18941
- Welding thermal energy effect on residual ferrite of austenitic chrome-nickel steel deposits 07 p1010 A72-18971
- Third harmonic generation in Ge induced by conduction nonlinearity during bulk heating of charge carriers by microwave fields 07 p1047 A72-19023
- Low frequency modulation noise generation due to conductance fluctuations in Gunn oscillators, measuring noise spectra temperature dependence 07 p0954 A72-19050

Nonstationary thermal interaction between thermally inert circular disk in bounded cylinder with controlled temperature, describing control process by third order differential equation

07 p1098 A72-19263

Analog simulation of normal thermal explosions and cool flames, observing oscillations limits, time dependence of parameters and effect of changes in activation energy or initial temperature

07 p1098 A72-19366

Surface and thermal effects on hydrogen oxidation, calculating explosion limits and slow reaction rates

07 p0935 A72-19370

Pulsating flame spread on liquid alcohol surface over range of liquid temperatures, using shadow streak photography

07 p1099 A72-19375

Temperature dependence of carbon monoxide reaction rate with hydroxyl, noting activation energy

07 p0935 A72-19376

Thermal blooming of laser beams in liquids and gases, investigating short and long time behavior under thermal conduction and viscosity effects

07 p1005 A72-19408

Nitrogen interaction with liquid binary Ni alloys, investigating solubility as function of temperature and pressure and titanium nitrides existence conditions

07 p1011 A72-19547

Ti, Fe, Co, Ni, Pt and steels phase transformation and thermal defect effects on high temperature thermal conductivity

07 p1012 A72-19548

Steady state high temperature niobium creep in torsion under rarefied oxygen infiltration conditions, discussing surface interactions kinetics

07 p1012 A72-19679

Pure and doped ammonium perchlorate deflagration rate sensitivity due to sample temperature and environmental pressure changes

07 p1051 A72-19729

Tungsten alloy filaments as reinforcing agent of heat resistant composite chromium alloy, investigating long term high temperature effects

07 p1013 A72-19745

Hydrodynamic flow parameters in laminar incompressible water boundary layer on heated plate, noting plate surface heating effect on velocity profile

07 p0968 A72-19766

Tempering temperature effect on hydrogen penetration level and brittleness of hardened carbon steel

07 p1014 A72-19773

Cu, Al and Pb bcc metals, investigating dislocation structure and creep characteristics change mechanism at transition from low to high temperature

07 p1014 A72-19822

Deformation rate and temperature effects on optimum strength and ductility of die forged and extruded Mo-Ti alloys

07 p1014 A72-19845

Book on materials low temperature mechanical properties covering metals, polymers, ceramics and composites, temperature effects on deformation processes, fracture mechanics, test methods, etc

07 p1015 A72-19909

Martensitic transformations induced by plastic deformation in Fe-Ni-Cr-C system, noting stacking fault energy dependence on temperature

07 p1015 A72-19928

Diffusion kinetics in Nb-Al system for varying time and temperatures

07 p1015 A72-19930

Transition metal borides chemical bonding mechanism from Nb and Cr boride phases thermal emf and expansion, resistivity, Hall coefficient and carrier mobility

07 p1017 A72-19992

Refractory alloys softening under stress relaxation conditions at high temperatures, noting plastic strain hardening effect absence

07 p1018 A72-20138

Test temperature effect on phase composition, mechanical properties and resistance to cavitation of unstable austenitic steels, describing test facility

07 p1018 A72-20140

Kinetics of heat inactivation of phosphoglycerate kinase in soluble fraction from hydrogenomonas facilis

07 p0922 A72-20237

Al wrought alloys dynamic elasticity modulus and Poisson ratio dependence on temperature, using ultrasonic measurement method

07 p1019 A72-20239

High turbine entry temperature effects on gas turbine engine specific power and fuel consumption, noting thrust/weight ratio increase in turbojet and turbofan engines

07 p1055 A72-20311

Temperature effects on hot-wire anemometer calibrations, plotting Nusselt number variation with Reynolds number

07 p0990 A72-20369

Solid solution yield strengthening and weakening of V-Ti alloys, investigating strain rate sensitivity tem-

perature dependence as indication of two deformation mechanisms

07 p1021 A72-20434

Temperature and alloy composition effects on coarsening rate of metal carbide particles in dissimilar metallic matrix

07 p1021 A72-20436

Ni based superrefractory alloy high temperature fatigue tests, studying creep as function of stress load and frequency and temperature

07 p1022 A72-20487

Inhomogeneous high-collision finite pressure plasma stability, finding thermal instability development under uniform temperature and arbitrary pressure

07 p1046 A72-20514

Temperature and physical state effects on rubidium optical constants at 0.3-2.4 microns

07 p1050 A72-20522

Strain rate effects on strain hardening of duralumin, copper and lead, noting yield stress sensitivity to deformation induced temperature changes

07 p0998 A72-20527

Temperature dependence of strain rate sensitivity in low temperature deformation processes, considering inherent lattice conditions and impurity atoms effects

07 p1022 A72-20573

Temperature dependence of electrical resistance and thermal conductivity in duralumin quenched at 77 K

07 p1022 A72-20663

Electrical resistance and thermal conductivity dependence on temperatures in duralumin quenched at 77 K

07 p1022 A72-20666

Temperature effects elimination from underground muon intensity measurements

08 p1226 A72-20813

Gas mixture properties at high temperatures, pressures and densities, applying to thermal ionization of adiabatically compressed air

08 p1210 A72-20942

Basal and prismatic crystal dislocations in Be, measuring critical resolved shear stress dependence on temperature at 300-500 K

08 p1185 A72-20991

Plasma beam cutting of Al sheets, discussing heat effect on surface oxides and microstructure and plasmagenic gas influence

08 p1176 A72-21047

Silicon-silicon dioxide system, investigating effect of heating in dry and moist He on capture-center and recombination parameters by thermal and pyrolytic techniques

08 p1216 A72-21068

Polycarbonate yield dependence on temperature in uniaxial compression and tensile tests described by modification of Eyring theory of non-Newtonian viscosity

08 p1191 A72-21184

Unsteady heat conductivity equation for finite dimensions parallelepiped, noting temperature dependence of specific heat and thermal conductivity

08 p1252 A72-21321

Conductive heat flux propagation rate in gases as function of absolute temperature

08 p1253 A72-21447

Heat transfer in shield-vacuum thermal insulation layers at various temperatures and pressures, noting conductivity anisotropy

08 p1253 A72-21451

Glass fiber reinforced plastics irreversible cumulative damage under axial cyclic tension compression loads with heat production

08 p1191 A72-21500

Wind shear, turbulence, precipitation, temperature, visibility and ceiling effects on airport capacity, suggesting weather data integration into ATC system for pilots information

08 p1147 A72-21521

X ray diffuse scattering from Al crystal at 100-500 V, considering phonon modes effects on anharmonicity and atomic deformation

08 p1186 A72-21591

Turbulized combustion product plasma electrical conductivity, noting temperature dependent variation

08 p1214 A72-21649

Gas temperature variation effects on powder burning stability in rocket combustion chamber from unsteady powder burning theory

08 p1255 A72-21659

Nonlinear viscoelastic body model for stress relaxation of amorphous linear polymers below vitrification temperature for various deformations, temperatures and deformation speeds

08 p1194 A72-21751

Impurities and temperature effects on microdeformation of Mo single crystals under dynamic loads

08 p1188 A72-21789

Temperature dependence of scattering cross sections for cold and hot neutrons colliding with oxygen and deuterium molecules

08 p1211 A72-21872

Metallic four-lip seal performance, discussing force cycle, mechanical spring-back, reusability at room and higher temperatures and thermal shock behavior

08 p1179 A72-21939

Reduced air pressure effect on He-Ne laser output power via self heating

08 p1184 A72-22033

Thermal self disturbance effect on second harmonic generation in crystals and CW and pulsed lasers

08 p1184 A72-22034

Temperature dependence of intrinsic light absorption band edge characteristics in p-type InSb

09 p1366 A72-22213

Cold shortness of W and related refractory metals, noting oxide phases and impurities effects on mechanical properties temperature dependence

09 p1326 A72-22226

Twin triodes type parameters stability in microwave region as function of cathode service life and temperature

09 p1284 A72-22243

German monograph on tire rubber friction on dry and wet rough surfaces, taking into account loading velocity and temperature effects

09 p1332 A72-22323

Oxygen, nitric oxide and water cluster positive ion composition from mass spectrometer experiments in lower ionosphere, noting ion production and low temperature effects

09 p1375 A72-22363

High temperature radiographic techniques for measurements of molten ceramics density, melting point, phase transitions, surface tension and viscosity up to 3000 C

09 p1333 A72-22378

Oxide scale formation on zirconium diboride materials, observing microstructural features as function of temperature and reaction time [AD-737020]

09 p1333 A72-22380

Temperature effects on electrical conductivity and transport mechanisms in sapphire from measurements under protection against surface and gas phase conduction

09 p1335 A72-22400

Thermomechanical treatment effects on microstructure and mechanical properties of Al alloy

09 p1327 A72-22470

Carbon monoxide in carbon dioxide atmosphere determining IR absorption lines broadening at reduced temperatures

09 p1351 A72-22612

Temperature effects on microorganism survival in deep space vacuum, using molecular sink test

09 p1265 A72-22646

Cryostat for high resolution tensile measurements of thermally activated processes during plastic deformation

09 p1398 A72-22657

Temperature induced stresses and displacements in fiberglass reinforced plastic cylindrical shell

09 p1399 A72-22704

Creep properties in turbine disks of heat resistant alloy under plastic deformation due to nonstationary thermal conditions

09 p1401 A72-22730

Nonuniformly heated infinite elastic cylindrical shell stability under axial compression loads

09 p1402 A72-22734

Temperature and internal pressure effects on cylindrical shell stability under tension and compression, deriving critical temperature and loads

09 p1402 A72-22736

Static strain measurement errors due to nonstationary thermal conditions in semiconductor resistance gages

09 p1310 A72-22739

Glass ceramics mechanical properties as function of temperature during bending, taking into account scale factor

09 p1337 A72-22742

Modal behavior and temperature tuning of pulsed room temperature GaAs laser, using hyperfine energy level separation

09 p1323 A72-22768

Polyatomic ions interaction with neutral molecules in gases, calculating ion mobility as function of temperature from core model representation

09 p1355 A72-22784

Inhomogeneous superconductors and proximity effects, calculating conditions for vortex lattice pinning energy as increasing function of magnetic field and temperature

09 p1370 A72-22794

Ti crystallographic and topographical features: determination by hydrogen-ion microscopy, noting temperature effects on surface films and low index facets production

09 p1327 A72-22801

Molecular hydrogen dissociation by He, observing molecule initial quantum states effect on temperature dependent reaction cross section

09 p1357 A72-22851

- Q factor over temperature range of microwave resonator coupled with drifting indium antimonide plasma 09 p1285 A72-22895
- Apollo lunar fine samples total emittance as function of temperature, using spectral emittance measurement technique 09 p1388 A72-23028
- Transistor LF flicker background noise generation mechanism in terms of bulk effect due to temperature fluctuation or phonon electron interactions 09 p1286 A72-23107
- P-channel MOS transistor LF background noise components analysis for different dependencies on gate bias and temperature 09 p1286 A72-23109
- Liquid nitrate ester sensitivity and dissolved water desensitization, using thermal initiation and drop weight impact tests 09 p1373 A72-23145
- Piezoresistance magnitude and temperature dependence changes of electron irradiated n-type silicon due to oxygen vacancy complex /A center/ 09 p1372 A72-23239
- Temperature effects on low pressure calibration in vacuum gage metrology 09 p1312 A72-23249
- Laser beam induced thermal blooming in absorbing gases from combined fluid dynamics and eikonal geometric optics theory, considering wind effects 09 p1352 A72-23333
- Parabolic oxidation kinetics of Ni-Ti alloy compound at elevated temperatures 09 p1330 A72-23358
- Beta-III Ti alloy mechanical properties dependence on heat treatment and elevated temperature exposure, illustrating associated microstructures 09 p1331 A72-23384
- Diode junction parameters and inverse saturation current measurements as function of current density and temperature 09 p1289 A72-23418
- Electrical conductivity and thermal emf as function of temperature in CdSb, discussing energy spectrum and crystallization 09 p1372 A72-23479
- Temperature dependence of Ge solubility in CdSb single crystals from microstructural observations and measurements of microhardness and electrical properties 09 p1372 A72-23480
- Vapor pressure and composition in As-I system, investigating entropy and enthalpy changes and temperature dependence of equilibrium constant 09 p1373 A72-23481
- Niobium carbide resistors properties, investigating temperature dependence of electrical resistance and thermal stability 09 p1331 A72-23483
- Temperature dependence and error compensation of Si strain sensors, using coupled dc generators 09 p1316 A72-23649
- Temperature effects on blood electrobioluminescence, relating luminescence peaks to protein and lipid molecular structure changes 09 p1268 A72-23694
- Hot-stage optical microscopes for microhardness measurements at elevated temperatures, describing techniques to determine heat resistant alloys mechanical and physical properties temperature dependence 10 p1478 A72-23827
- Optical and electron microscopic study of Inconel 625 precipitation and recrystallization behavior over temperature range under plastic deformation 10 p1494 A72-23829
- Thermal radiative cooling system characteristics determination, taking into account surface material thermal conductivity and blackness degree dependence on temperature 10 p1561 A72-23840
- Stress and thermal relaxation effects in viscoelastic behavior of turbulent flows of liquids and gases 10 p1464 A72-23867
- Nonstabilized Ni-P thin films electrical conductivity at 50-280 C, using mass spectrographic, thermal differential, X ray diffraction and electron microdiffraction analyses 10 p1495 A72-24076
- Temperature effects on kinetics of methane decomposition on carbon fiber at high temperatures, showing characteristics relationship to carbon gasification reactions 10 p1433 A72-24086
- Thermal shock and temperature cycling environmental testing, discussing military specifications, components thermal lag characteristics, environmental test chambers and various cooling methods 10 p1459 A72-24144
- Maximum dynamic to static deflection ratio for thermally induced vibrations of elastic beams and plates, considering damping and axial load effects [ASME PAPER 71-APM-UU] 10 p1554 A72-24185
- Quenched specimen anisotropic surface heating effect in liquid vaporization characteristics determination 10 p1561 A72-24207
- Tempering effects on weakly doped n-InSb electrical properties at 77 K, discussing diffusion and activation energies in reversible/irreversible defect change processes 10 p1526 A72-24242
- Temperature dependence of emf coefficient Hall constant and conductivity in solid and liquid phases of InSe semiconductor during melting 10 p1526 A72-24267
- High temperature creep behavior of sintered polycrystalline strontium zirconate as function of temperature, stress, grain size and strain level, using pure bending test method 10 p1497 A72-24275
- Semiconductor air-air heat pumps with solar cell feed current, determining hot air flow temperature effects and energy conversion efficiency 10 p1423 A72-24319
- Positive plasma column theory for longitudinal cylindrical discharge problem in ambipolar conditions, stressing surface and bulk temperature effects 10 p1521 A72-24357
- CW X band Gunn microwave oscillators, measuring frequency variation relationship to ambient temperature 10 p1450 A72-24555
- Alloy p-n-p junction transistor diffusion capacity variation with emitter current as function of temperature at 80-320 K 10 p1451 A72-24558
- Temperature dependence of internal quantum efficiency of spontaneous emission as function of beam voltage in electron beam excited p-type GaAs 10 p1526 A72-24559
- Temperature dependence of gas flow coefficients at low pressures, determining isothermal permeability and heats of transport of He, Ne and Ar capillary flow 10 p1469 A72-24600
- Vaporizer temperature effect on ion propulsion system thrust vector, presenting temperature control loop circuit diagram 10 p1528 A72-24652
- Glass content and temperature effects on fabric reinforced plastic laminates static behavior, analyzing tensile and bending strength and elastic moduli 10 p1501 A72-24660
- Thermolabile triose phosphate isomerase in psychrophilic Clostridium at moderate temperatures 10 p1426 A72-24750
- Interdiffusion of tight contact welded ring Ti-W pairs at high temperature, using X ray analysis and electron beam techniques 10 p1497 A72-24785
- Electron tunneling into amorphous InSb and GaSb films, discussing effects of temperature, voltage, coevaporation doping and Cu and Au diffusion 10 p1527 A72-24874
- Vacuum arc stationary cathode mechanism theoretical analysis, determining cathodic temperature and current density 10 p1524 A72-24930
- Electrical properties of Te/p-Si/In heterodiodes at room and liquid air temperatures 10 p1527 A72-24937
- Radiative heat transfer spectral, temperature and directional dependence on interacting opaque surfaces system properties, noting models with accounted non-gray character [AIAA PAPER 72-306] 11 p1742 A72-25240
- Pendulum impact resistance of tungsten fiber-metal matrix composites, noting heat treatment and test temperature effects 11 p1653 A72-25473
- Temperature dependence of Ni and Ni alloys and solid solutions microhardness, noting strengthening effect of Ti, Cr, Al and B additions 11 p1654 A72-25491
- Test assembly design for microstructural studies of metal and alloy fatigue in vacuum during heating, describing electrical resistance measurement and stroboscopic illumination 11 p1612 A72-25492
- Drazin method application to thermal stratification effects on unbounded jets and shear layers stability characteristics 11 p1615 A72-25552
- Aircraft gas turbine engines exhaust emission characteristics identification, considering ambient temperature and humidity effects [ASME PAPER 72-GT-75] 11 p1705 A72-25657
- Hot corrosion effects on Inconel-700 and Inconel-X gas turbine rotor blades during burning of high sulfur concentration residual oil fuels [ASME PAPER 72-GT-87] 11 p1656 A72-25662
- High efficiency CW performance of InP transferred electron microwave oscillator with anomalous I-V characteristics temperature dependence 11 p1604 A72-25750
- Grain size and carbon content effects on recrystallized Mo wire ductility at room and low temperatures 11 p1657 A72-25758
- Be elastic constants at 25-300 C, using ultrasonic pulse technique 11 p1657 A72-25774
- Nose blunting, exposure time and initial temperature effects on axisymmetric bodies ablation surface cross hatching patterns, presenting test results on cones with various vertex angles 11 p1572 A72-26006
- Temperature and strain rate effects on superplasticity of Ni-Cr eutectic alloy 11 p1659 A72-26129
- Prolonged heating effect on heat resistant Mg alloys microstructure and mechanical properties 11 p1660 A72-26143
- Electrolyte temperature, pH and mixing rate effects on anodic dissolution of steels and brass in electrochemical precision processing, using thermokinetic data processing 11 p1640 A72-26257
- Semiconductor laser threshold current dependence on doping degree and temperature based on optical transition model and energy band theory 11 p1647 A72-26327
- Frequency modulation of CW GaAs laser emission by injection current, noting temperature effects 11 p1648 A72-26337
- Interstellar free radicals and molecules spectra, noting catalyzers, temperature and abundances role 11 p1722 A72-26434
- Design analysis of emitter- and collector-base gain stabilized junction transistor amplifier at elevated temperatures using passive elements 11 p1606 A72-26569
- Fe-Mo solid solutions transient creep behavior as function of applied stress, noting temperature effect 11 p1662 A72-26656
- Nb-Ti alloy elasticity modulus temperature dependence, considering foreign atoms interactions with dislocations 11 p1662 A72-26737
- Nonlinear thermal effects of atmospheric absorption for high power carbon dioxide laser beams 11 p1651 A72-26747
- Thermionic converter model analysis for performance stability and inhomogeneities in Cs diode, considering emission current dependence on temperature 11 p1578 A72-26759
- Turbine blade alloys vibrational fatigue and creep properties under high and low frequency axisymmetric loads at room and elevated temperatures 11 p1662 A72-26798
- Low temperature mechanical properties of Ti-base alloys, examining notched samples impact strength as function of temperature and notch depth 11 p1663 A72-26806
- Creep characteristics of weakly strain-hardenable alloy under variable tensile load and temperature conditions 11 p1663 A72-26808
- Test device for reinforced plastics mechanical properties under heating and pressure with allowance for gas permeability 11 p1613 A72-26813
- Ti alloys fatigue strength, stress concentration sensitivity and grain sizes effects at normal and high temperature under cyclic loads 11 p1663 A72-26821
- Thermodynamic description of metal rich side of Nb-Mo-N solid solution, determining equilibrium nitrogen solubility as function of pressure and temperature 11 p1664 A72-26842
- NASA program to develop heat resistant materials for aerospace applications, discussing refractory carbides, nitrides and borides temperature dependent behavior and properties 11 p1664 A72-26857
- Temperature, oxygen pressure and exposure time effects on oxidation characteristics of molybdenum-zirconium oxide cermets 11 p1665 A72-26865
- Dislocation structure and strength of Ti at low and intermediate temperatures, investigating strain, grain size and interstitial solute hardening 11 p1666 A72-26927
- Lunar surface neutral gas pressure measurement by Apollo 14 cold cathode ionization gage, determining day and night temperature effects on vacuum quality 12 p1805 A72-27041
- Temperature dependence of destruction threshold of lithium niobate surface under laser irradiation, noting ferroelectric properties effects 12 p1853 A72-27069
- High temperature dislocation rearrangement in lightly cold deformed Nb as function of time and temperature, using etch pit technique for evaluation 12 p1827 A72-27136
- Linearized thermal viscoelasticity theory for stability, large strain and wave propagation problems, taking into account heat generating effects 12 p1880 A72-27233
- Low temperature solid state phase transformations in 2H silicon carbide single crystals, noting time and temperature dependence 12 p1854 A72-27276

Mathematical model for thermal lensing of IR laser window, discussing aberrations effect on diffraction-limited far field focus time

12 p1819 A72-27284

Living organisms defense and preservation via refrigeration and vacuum combined use in lyophilization technique

12 p1769 A72-27293

Local heating effect of electrical resistance gages measuring strain across thickness of plane photoelastic Araldite models

12 p1807 A72-27316

Temperature oscillations associated with surface gravity waves at two fluid model compressible vapor-incompressible superfluid interface

12 p1845 A72-27386

Astronomical reflector telescope design, describing thermal effects on Al mirror and image intensification

12 p1807 A72-27428

Niobium diffusion into copper as function of time and temperature, obtaining rates by electrical resistance measurements

12 p1828 A72-27448

Fatigue failure tests of low carbon Mn steel, analyzing structural damage under cyclic loads in relation to temperature curve

12 p1829 A72-27458

Temperature distribution and dissipation effects on compressible isothermal atmosphere Lamb waves vertical structure

12 p1839 A72-27504

Radio attenuation by rain at 37 GHz using sun as source compared with sky emission observations, noting apparent absorber temperature effect

12 p1783 A72-27665

Austenizing temperature relationship to quenching rate in ultrahigh strength steels with high fracture toughness, recommending two step quench technique

12 p1829 A72-27695

Circuitry and operational characteristics of variable output voltage regulator with low temperature coefficient, noting suitability for monolithic integration

12 p1792 A72-27740

Thermoregulation in deeply hibernating rodents during separate chilling and steady hibernation temperature maintenance of skin and brain

12 p1762 A72-27827

Photoelectric properties of cadmium telluride thin film solar cells, discussing energy gap temperature dependence, work function and current variations anomalies

12 p1756 A72-28018

Recombination parameters in low resistivity gamma irradiated n-type Ge, obtaining energy levels and temperature dependence of electron and hole capture probabilities

12 p1857 A72-28056

Recombination luminescence in irradiated Si, investigating uniaxial stress and temperature variations effects

12 p1858 A72-28061

Cubic SiC film growth rate on Si substrate by methyltrichlorosilane decomposition in hydrogen flow, noting dependence on mixture flow rate and temperature

12 p1860 A72-28114

Friction characteristics of high melting point metal chalcogenides as function of load and temperature, noting friction coefficient variations

12 p1817 A72-28185

Temperature effects on crystalline solids adhesion, noting friction rise above seizure point

12 p1818 A72-28187

Clean metallic surfaces adhesion coefficients in vacuum at 77-293 K as function of load, loading time and contact cycles

12 p1818 A72-28193

Molecular-mechanical theory of external friction, taking into account surface roughness, time and temperature dependent mechanical properties and chemical processes

12 p1818 A72-28195

Heat resistant blade alloy test temperature effects on fatigue life, tensile strength, hardness and chemical composition

12 p1831 A72-28230

Tensile strength, plastic properties and notch sensitivity from low temperature tests of binary Ti alloys, noting effects of Sn content and temperature

12 p1831 A72-28239

Environmental temperature effect on motion sickness sweating, discussing nausea and discomforting symptomatology prediction

12 p1775 A72-28302

Ear site body temperature measurement relation to radiant heating of scalp and upper face

12 p1768 A72-28333

Spatially resolved gain measurements in carbon dioxide laser amplifier, considering gas mixture, flow rate, temperature, pressure and current effects

13 p1967 A72-28448

Heating rate effects on residual stresses in thick walled cylinders produced by winding heated binder impregnated fiberglass tape on cold spool

13 p1982 A72-28553

Temperature effects on synthetic rubber sliding friction characteristics against smooth steel surfaces under compression loads in vacuum and air at 10-140 C

13 p1962 A72-28554

Radial and circular thermal stresses in free and end-constrained orthotropic cylinders with axisymmetric temperature distributions, determining relation between temperature and thermoelastic coefficients

13 p2055 A72-28561

Uniaxial elastic deformation pressure effects on electronic conduction in tetrahedrally bonded amorphous semiconducting thin films as function of temperature

13 p2021 A72-28574

Laplace transformation for mechanical response of piezoelectric composite transducer under action of thermal field and electric potential, noting time dependent modulus of elasticity

13 p1955 A72-28621

Strain rate controlling mechanisms of superplastic deformation at various stresses and temperatures, considering vacancy and dislocation creep and grain boundary sliding

13 p1974 A72-28657

Tempered or recrystallized chromium steels tensile behavior at 0 to 700 C, showing strength dependence on martensite transformation induced dislocation structure

13 p1975 A72-28667

Polycrystalline alpha Ti work hardening at low temperatures and different purities, discussing plastic strain effects

13 p1975 A72-28671

Holographic system stability tested by diffraction efficiency-exposure curves obtained in real time from probing holograms sequence, emphasizing temperature effects

13 p1956 A72-28685

I-V characteristics of metal-semiconductor-metal structures based on oxide glasses, noting temperature dependence and current limitation

13 p2021 A72-28688

Diamond powder lattice parameter changes during fast electron irradiation at various temperatures, discussing crystal defect stability and neutron irradiation comparison

13 p1983 A72-28760

Temperature and charge carrier density dependence of conduction electron optical effective mass in semiconductor compounds

13 p2021 A72-28788

Thermoelastic vibrations of simply supported rectangular plate produced by temperatures prescribed on faces, obtaining solution in trigonometric series form

13 p2056 A72-28888

Co-Cu alloy phase formation and separation morphology changes with temperature and anomalous diffusive X ray scattering in solid solutions

13 p1976 A72-28905

Hardened coarse-grained steels recrystallization during fast heating, investigating martensite phase macro- and microstructural changes by X ray analysis

13 p1977 A72-28908

Cu-Al-Ni alloys single crystals internal friction temperature dependence during martensitic transformations

13 p1977 A72-28912

Hg flow and hollow cathode temperature effects on ion thruster neutralizer stability and lifetime capability, using bell jar tests

13 p2026 A72-28937

Thermal effects on phase structure of welded joints of Al alloy with Cu addition

13 p1978 A72-29022

Temperature dependent small signal operation of junction transistors at low supply voltage

13 p1930 A72-29058

Silicone based elastomers acoustic excitation damping properties at 213-423 K, discussing testing technique and results at 200-1000 Hz

13 p1957 A72-29090

Atomic hydrogen viscosity and thermal conductivity coefficients for 1-100,000 K, using quantum theory for low temperatures and classical mechanics for high temperatures

13 p2065 A72-29299

Fusion welding of Ti-W and Ti-graphite composites, determining weldability and effect of weld thermal energy on fiber matrix reactions

13 p1966 A72-29423

Temperature and strain rate dependence of austenitic stainless steel fracture by low cycle fatigue at high temperatures, studying striations with scanning electron microscopes

13 p1979 A72-29449

Statistical method of Pearson moments applied to temperature regimes effects on ruby laser output energy distribution

13 p1968 A72-29506

Temperature dependent electron density of state and dc resistivity of disordered binary alloys, using single band thermal disorder model

13 p2022 A72-29626

Thermal vacuum tests of rhenium disulfide decomposition as function of temperature at 800-1200 C, using thermogravimetric method

13 p2023 A72-29649

Ammonium perchlorate burning rate temperature dependence as function of pressure and oxidizer particles size, noting low pressure deflagration limit [ONERA, TP NO. 1079]

13 p2025 A72-29669

Variational form to determine equations and boundary conditions for elastic isotropic homogeneous nonferromagnetic body subjected to external load, temperature and electromagnetic field actions

13 p2061 A72-29797

Forward voltage vs temperature characteristics for Si planar p-n junction diodes, determining zero temperature energy gaps for silicon, germanium and GaAs

13 p1933 A72-29824

Joule heating power density in NbZr superconductor hollow cylinder, estimating temperature changes and instability locations

13 p2023 A72-29855

High melting point transition metals carbides, nitrides, borides, silicides and oxides thermal conductivity as function of characteristic temperature

13 p1981 A72-29905
